Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Program (2 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.
Outcomes:
Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.
Outcomes:
Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.
Outcomes:
Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)
This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.
Outcomes:
Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)
Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)
This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality. Restricted to Social Work PhD students.

SOWK 801 Historical & Contemporary Issues in Social Work Practice (3 Credit Hours)
The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities. Restricted to Social Work PhD students.

SOWK 802 Grand Theories & Perspectives in Social Work Knowledge (3 Credit Hours)
This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas. Restricted to Social Work PhD students.

SOWK 803 Advanced Statistics (3 Credit Hours)
This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice. Restricted to Social Work PhD students.

SOWK 804 Qualitative Research (3 Credit Hours)
This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing. Restricted to Social Work PhD students.
Outcomes:
Students will be able to design and implement a qualitative research project with understanding of the various methods; ability to understand and apply various methods of data analysis; identify and apply criteria for rigor and trustworthiness

SOWK 805 Research Practicum I (3 Credit Hours)
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 806 Research Practicum II (3 Credit Hours)
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 808 Integration of Research, Practice, & Theory in Social Work Scholarship (3 Credit Hours)
This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students¿ substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions. Restricted to Social Work PhD students.

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.

SOWK 820 Social Theory & Social Change (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.

SOWK 822 Organizational Analysis (3 Credit Hours)
This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.

SOWK 827 Doctoral Study (0 Credit Hours)
Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content. Restricted to Social Work PhD students.

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)
This second course on teaching includes a supervised learning experience with a teaching mentor and regular seminars on instructional methodologies, facilitating discussion and active learning in the classroom, strategies for evaluating student performance, and discussions on managing sensitive and/or challenging issues in the classroom, specifically issues related to social identities, diversity, oppression, and social justice. Restricted to Social Work PhD students.

Social Work (PhD)

The PhD in Social Work program, established in 1986, extends the tradition of educating students skilled in clinical research, scholarship, and teaching with the Jesuit ideals of service to others and commitment to social justice as its foundation. The doctoral program prepares students for leadership roles in diverse practice and academic arenas.

Our mission is to educate and train doctoral students to be independent scholars who conduct rigorous social work research and deliver effective teaching strategies to future social workers. The Ph.D. Program at Loyola University Chicago School of Social Work builds on its clinical reputation by preparing doctoral students to create and evaluate practice-

informed, client-centered interventions and policies that impact practice at the micro, mezzo, and macro levels. Doctoral students are trained in these practice-informed approaches to understand and respond to the complex social, racial, and economic justice issues that impact the most marginalized and oppressed in our society. The doctoral program reflects the social justice mission of our university by training doctoral students to engage in reflective and intentional study to become scholars who transform themselves, their community, the profession, and their world.

Program Goals

The specific goals of the PhD Program at the School of Social Work at Loyola University Chicago and consistent with national goals as outlined in the Group for Advancement of Doctoral Education (https://www.gadesocialwork.org/) are to prepare professionals for:

- Scholarship and research in areas that include but are not limited to theory building, the effectiveness of practice interventions, and program evaluation.
- Academic teaching in the content areas of theory, practice, research, and policy.
- The advancement of the social work profession in a context that is global, and multi-cultural, requiring and addressing global-based human rights violations and inequalities.
- Leadership in the profession's commitment to remedying the growing and profound inequality with a commitment to policies, practices, and research that remedy those inequalities and their immediate negative effects on vulnerable populations.
- Inter-disciplinary scholarly work through course electives taken outside the SSW (School of Social Work) to enhance student's learning toward the completion of their dissertation.

Curriculum

The PhD in Social work requires 48 credit hours of coursework, a comprehensive examination, and a dissertation.

Coursework Requirements

The PhD in Social Work courses expand on student's understanding of social work research methodology and teaching.

Code	Title	Hours
SOWK 800	Statistics	3
SOWK 801	Historical & Contemporary Issues in Social Work Practice	3
SOWK 802	Grand Theories & Perspectives in Social Work Knowledge	3
SOWK 803	Advanced Statistics	3
SOWK 804	Qualitative Research	3

SOWK 829	Teaching Seminar & Practicum II	3
Graduate Level Elective Courses [1]		6
SOWK 827	Doctoral Study	0
SOWK 600	Dissertation Supervision	0
Total Hours		**48**

[1] The goal of elective courses is to enhance the quality and scholarship of the dissertation. The Director of the Doctoral Program should be consulted to provide advising about potential elective courses.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Once a student has completed coursework, they are registered for SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision to maintain standing in the Graduate School. It is not necessary for students to register for either of these courses during the summer term, but it is imperative that they register for either of these two courses every fall and spring term until graduation.

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Comprehensive Examinations

Once students have completed the core curriculum (the second year of course work) they prepare for the Comprehensive Exam which is taken during the fall semester of their third year and prior to developing a dissertation proposal. The written and oral exam tests knowledge and critical thinking in research and micro/mezzo/macro theories and practices in the context of social justice applications.

Dissertation

Students are encouraged to begin thinking about specific areas for scholarly inquiry early in their course of study and to discuss these interests with full time faculty members who have similar interest and expertise. The educational experiences are planned to facilitate the development of skills of intensive investigation and the application of research techniques to clinical phenomenon, process and/or services. A dissertation proposal chairperson may be selected as early as the second semester of study. The selection of the Chairperson is normally a matter of mutual agreement between the student and the faculty member involved. The development of the dissertation proposal is a continuous process of focus, modification, and refinement until the proposal is developed to the satisfaction of the student and the dissertation chairperson.

The following criteria will be applied by members of the Dissertation Proposal Committee in determining acceptability of the document and in granting final approval:

1. Proposals must have as their ultimate objective a contribution to the knowledge of the practice of social work. This objective may be in the advancement of relevant theory, the improvement of practice, the process out outcomes, or synthesis of existing knowledge.
2. The formulated research question must be based on informed and extensive knowledge of theory and prior empirical study in the specific area of pursuit.
3. Clear concepts and well articulated research questions must be formulated.
4. Client systems, other social systems, and social service delivery systems are acceptable foci for subject matter within the context of practice related problems, situations, interactions, processes, and outcomes.
5. Replication of other studies is acceptable provided theory is advanced by way of its application to practice. This implies thinking though of alternative explanations of prior findings, the formulation of questions and hypotheses which reflect this thinking and the development of designs which take into account the gaps and/or limitations of prior work.
6. Proposals must include an acceptable plan and methodology of inquiry. No single research methodology is favored or prohibited. The proposed study may be exploratory, experimental or historic in nature. Appropriate guidelines for the collection of data and data analysis must be stated.
7. Sample size must be appropriate to the nature of the study, the questions asked and methods to be used. Intensive case study (individual, group or family) and single subject approached may be acceptable. However, replication over series of cases may improve the potential for committee approval as a dissertation topic and would provide opportunity for comparative analysis.
8. When agency accessibility and cooperation is essential to the study, a plan based on preliminary negotiations when attention to feasibility must be presented.
9. Proposals must accord with the policies and procedures of all relevant review boards for the Protection of Human Subjects.

When the Chairperson is satisfied that a report is reaching a stage at which approval from the Committee is likely, the Chairperson will request the Director of the Doctoral Program to schedule a Dissertation Hearing which will be open to the public and advertised to the students and faculty and the School of Social Work.

After the Dissertation Committee has given final approval to the Dissertation, the student must bring the manuscript form into conformance with official specifications and to submit all appropriate abstracts and forms. Students should be aware that they will not be allowed to graduate unless the Graduate School is satisfied that they have met all the requirements related to the submissions of the final document.

Learning Outcomes

At the completion of the program, doctoral students in the PhD program should be able to demonstrate the following competencies as practice-informed researchers and teachers in the field of social work.

History of the Profession and its Influence on Current Practice, Policy, and Research

- An advanced understanding of the history and current issues of the social work profession, including their relevance for policy, practice, research, and theory development.
- An advanced understanding of the social work profession in a social-economic-political global and multicultural context that addresses human rights violations and inequalities.

Theory

- An advanced understanding of the purpose, use, and misuse of theories across the micro, mezzo, and macro continuum of social work.
- Ability to understand the evolution and integration of theory as it applies to practice-informed research and research-informed practice.
- An advanced understanding of how theory influences the shape and design of research, its analysis, and its interpretation.
- Ability to critically analyze theories to contribute to the development and operationalization of theories that best address social problems.

Research

- An understanding of multiple quantitative and qualitative research methodologies.
- Advanced skills in a particular methodology as demonstrated in dissertation work.

- Skills and experience in data analysis and preparation of data for dissemination, such as with conference presentations and manuscript submissions.
- Capabilities as an independent research scholar, able to contribute to a body of knowledge in one's area of interest.

Teaching

- Skills in academic teaching such as syllabus development, delivery methods, assignments, organizational methods, and grading criteria in both in-person and online formats.
- Developing a personal pedagogical style and teaching strategies for the classroom to develop and maintain an inclusive classroom tailored to the learning styles of diverse students and their intersectional identities.
- Develop a portfolio of teaching experience across content areas.
- Realize, recognize, and manage personal fallibility, vulnerability, and positionality as the instructor of a course.

Organizations, Leadership, and Social Change

- Theorize and evaluate how macro practice methods are used to advance social change and social justice
- Identify how interdisciplinary theories relate to power, representation, political and civic participation, critical consciousness, and youth development
- Critically analyze when, why, and how progressive theories of social change can create synergy or conflict
- Understand the evolution and development of service delivery within organizations

Institute of Pastoral Studies

Degree Programs

The Institute of Pastoral Studies (IPS) educates adults for professional ministry, spiritual development and faith-based leadership in a wide range of professions. Through their course of study and their spiritual formation, students develop real-world knowledge and skills in theological reflection, ministerial practice and ethical judgment.

IPS has seven graduate degree programs that engage students at the nexus of theory and practice. Each program is built on foundational knowledge, enhanced by professional skills, and requires contextual education (https://www.luc.edu/ips/resources/contextualeducation/). No program at IPS is complete without an integration project (https://www.luc.edu/ips/resources/procedures/#den124710), ensuring that the academic knowledge, skills, and context come together so that our degree students graduate as true "Masters" in their chosen field of study. Our placement rates for graduates are strong, as each student has access to Loyola's career center as well as one of the largest, global network of ministerial alumni from a Catholic institution.

IPS degree programs are offered in Chicago, online, and in Rome, Italy. Due to the generosity of donors, IPS offers need-based grants and merit scholarships to a majority of our students. As we live in an increasingly diverse and global world, IPS supports international education for its students through a special fund established for that purpose.

Being at a world-class institution in a world-class city means that IPS attracts a world-class faculty. Students study with highly-qualified professors many of whom also bring ministerial experience to the program. Whether our students seek a program that leads to a career in ministry, service in the Church, counseling, spirituality, or social entrepreneurship, IPS has a degree or certificate to meet their needs.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), Master of Arts in Pastoral Studies (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Graduate Certificates

The Institute of Pastoral Studies (IPS) offers six certificate programs. All certificate programs are accessible online with an exception to the Pastoral Counseling program which is only available on-site. Some of these programs provide practical skills and can be obtained without an advanced degree, while others require an advanced degree to support the additional scholarly study. Please see the individual descriptions for prerequisite requirements.

The certificate programs provide participants with the opportunity to pursue a concentrated series of courses in Pastoral Counseling, Spiritual Direction, Social Justice or Religious Education. In each of the advanced graduate certificate programs, students may substitute some courses for others, with the approval of the program director, in order to avoid redundancy or in order to create specialized professional focus.

Graduate Programs

- Applied Pastoral Leadership Certificate (p. 1540)
- Christian Spirituality (MA) (p. 1541)
- Christian Spirituality - Spiritual Direction Concentration (MA) (p. 1542)
- Christian Spirituality Certificate (p. 1542)
- Church Management Certificate (p. 1543)
- Counseling for Ministry (MA) (p. 1543)
- Divinity (MDiv) (p. 1544)
- Divinity and Pastoral Counseling (MDiv/MA) (p. 1547)
- Divinity and Social Justice (MDiv/MA) (p. 1548)
- Divinity and Social Work (MDiv/MSW) (p. 1549)
- Divinity with a Concentration in Chaplaincy (MDiv) (p. 1552)
- Divinity with a Concentration in Spiritual Direction (MDiv) (p. 1554)
- Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish) (p. 1556)
- Pastoral Counseling (MA) (p. 1561)
- Pastoral Counseling Certificate (p. 1563)
- Pastoral Leadership Certificate (p. 1563)
- Pastoral Studies (MA) (p. 1563)

- Pastoral Studies with a Concentration in Church Management (MA) (p. 1565)
- Pastoral Studies with a Concentration in Digital Communication (MA) (p. 1566)
- Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA) (p. 1566)
- Pastoral Studies with a Concentration in Religious Education (MA) (p. 1567)
- Religious Education Certificate (p. 1567)
- Social Justice (MA) (p. 1568)
- Social Justice and Social Enterprise Certificate (p. 1569)
- Social Justice and Social Work (MA/MSW) (p. 1570)
- Social Justice Certificate (p. 1573)
- Social Justice with a Concentration in Social Enterprise (MA) (p. 1574)
- Spiritual Direction Certificate (p. 1575)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Association of Catholic Theological Schools (ACTS)

ACTS 991 Old Testament Topics (1-3 Credit Hours)
Topics will vary.

ACTS 992 New Testament Topics (1-3 Credit Hours)
Topics will vary.

ACTS 993 Historical Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 994 Theological Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 995 Ethical Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 996 Religion and Society Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 997 World Mission Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 998 Ministry Studies Topics (1-3 Credit Hours)
Topics will vary.

Institute of Pastoral Studies (IPS)

IPS 400 Introduction to Graduate and Professional Writing (0 Credit Hours)
Writing skills are essential for success in graduate study and work in a variety of professional and ministerial settings. This course covers the following topics: academic integrity, grammar, research skills, citation, writing organization, thesis construction and critical thinking. Restricted to Institute of Pastoral Studies students
Outcomes:
Students will enhance their writing skills and develop analytical and communication skills that are critical to academic and professional writing

IPS 402 Church and Mission (1-3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II to contemporary times

IPS 403 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

IPS 404 Theologies of Suffering (3 Credit Hours)
This course focuses on theologies of suffering with written interaction and assignments, personal reflection on the theologies of suffering and substantive feedback. The readings include 1) Scriptural treatment of suffering (Psalms, Job, Lamentations); 2) Theologians on suffering (Moltmann, Schillebeeckx, Gutierrez, Hall); 3) From various perspectives (womanist, liberation theologians, pastoral care).
Outcomes:
Integrate unit reading and resources with contemporary experience, highlighting the key concepts and points made by the authors

IPS 416 Introduction to New Testament (3 Credit Hours)
This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.
Outcomes:
Gain insight into the socio-economic-political context, discover and utilize the tools of historical studies and textual criticism and to translate New Testament faith into their own contexts

IPS 417 Introduction to the Old Testament (3 Credit Hours)
This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship.
Outcomes:
Understand key theological points, recognize historical realities that gave rise to texts, recognize the theological, sociological, historical critiques expressed by texts, and demonstrate awareness of modern approaches to understanding texts

IPS 428 Introduction to Spirituality Praxis (3 Credit Hours)
Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology.
Outcomes:
Understand the nature of the ministry of spiritual direction; Interpret primary sources on the theme of spiritual formation; Analyze their working spiritual theology and their potential to become spiritual directors

IPS 429 Essentials of Spiritual Direction (3 Credit Hours)
Pre-requisites: IPS 428
This course invites students to consider the practical conditions, requirements and main challenges of the ministry of spiritual direction/accompaniment so as to further their discernment process and prepare them for the Contextual Education component of their program of study, where they will begin to serve as spiritual directors/companions.
Outcomes:
Identify relational dynamics operative in spiritual direction; Measure the significance of developmental, relational and social-cultural factors for spiritual direction; Employ open listening, questioning and verbatim accounts

IPS 433 Dorothy Day and Thomas Merton (3 Credit Hours)
Dorothy Day, Catholic Worker co-founder, and Thomas Merton, Trappist monk, were outstanding American Catholics. Their lives and teaching raise important questions concerning vocation and religious commitment, war and peace, contemplation and simplicity in modern life, Christian activism, racial justice, capitalism, women, laity, and, with Merton, Christianity's relationship to world religions.
Outcomes:
A critical appropriation of activist-and-contemplative Christian/Catholic Christian spirituality and theology as understood and practiced in the lives of two outstanding American Catholic Christians

IPS 434 Art and Spirit: The Sacred and the Secular (3 Credit Hours)
An introduction to the visual arts exploring various approaches to understanding art, art history, terminology, techniques, media, and motivating factors for creating art from secular and sacred perspectives. A secular art appreciation textbook will be used in conjunction with Sacred Art Learning Units including lectures, readings, museum visits, and discussions on art from the Catholic tradition and other perspectives.
Outcomes:
Students will gain an understanding of liturgical art and environment ministry; enriched sense of religious identity; understanding of basic components of secular and sacred visual art, art history, contemporary art, and the value of art

IPS 435 Spirituality and Same-Sex Orientation (3 Credit Hours)
Spirituality is the lived experience of faith. What is the lived experience of Christian faith of gay and lesbian persons? What are the classical and contemporary resources biblical, theological, scientific, psychological, spiritual and experiential by which gay Christians affirm a spiritual core from which they live their lives and faith?
Outcomes:
Demonstrated understanding of key elements by which gays and lesbians shape lives that are simultaneously faithful to the gospel of Christ, their religious tradition, and the truth of their sexuality

IPS 436 Prayer: Ongoing Path of Conversion (3 Credit Hours)
The course combines theory and practice. It presents prayer as an intimate means of ongoing conversion in the Christian life. Content includes the biblical, historical, and theological foundations of prayer, psychological factors, and the actual practice of various Christian meditative and contemplative practices (lectio divina, meditation, Ignatian contemplation, centering prayer).
Outcomes:
A demonstrated understanding of: the history of Christian prayer; growth and development models in prayer; biblical and theological foundations; the experience of 4 Christian and 1 non-Christian prayer form

IPS 440 The History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution in the context of the ancient Near East. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 440/THEO 404

IPS 441 The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament , in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS441/THEO 405

IPS 442 Prophetic Literature (3 Credit Hours)
This course examined the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by the contemporary sociological and anthropological perspectives. Standard historical critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of this course

IPS 443 Wisdom Literature and Psalms (3 Credit Hours)
This course will study the Wisdom tradition and the Psalms of Israel. Formal critical analysis and history of tradition studies will be emphasized. The rich diversity of these parts of scripture will be a prime focus.
Course equivalencies: IPS 443/THEO419
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 445 The Synoptic Gospels (3 Credit Hours)
Even though the course focuses on Matthew, there will be a continual comparison with the other two Synoptics and occasionally with John. By exegesis of the Gospel of Matthew and the study of its specificity among the gospels, it is hoped students will be able to connect their contemporary experience of Christian diversity to the experiences of the earliest followers of Jesus. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 445/THEO 424

IPS 446 Luke-Acts and the New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view. Emphasis will be placed on the theological perspective of the writer of Luke-Acts and on the relationship of that perspective to other early Christian writers (Mark, Matthew, and Paul).
Course equivalencies: IPS 446/THEO 425
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 447 The Johannine Literature (3 Credit Hours)
The gospel of John has arguably exerted more influence on later Christian theology than any other gospel. Its unique Christology, possible anti-Judaism, the history of the Johannine community as reflected in the gospel, and the relation of the gospel to the Johannine epistles will be explored. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 447/THEO426

IPS 448 St. Paul's Contribution to Christianity (3 Credit Hours)
This course looks to three goals: a careful understanding of Paul's thought, to be discovered through exacting analysis of often difficult Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity in its facets of spirituality, Christology, redemption, ecclesiology, worship, sacraments, sin, etc.
Course equivalencies: IPS 448/THEO 427
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 449 The Person of Jesus in the New Testament (3 Credit Hours)
In this course attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities. Emphasis will be placed on both the variety and the development of early Christian attempts to understand the meaning of Jesus. In addition this variety and development will be placed in the context of early Judaism and Graeco-Roman religions.
Course equivalencies: IPS 449/THEO 429
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 453 Grant Writing and Fundraising (3 Credit Hours)
This course is designed to provide the foundational elements needed to work successfully in resource development. Specifically, participants will become comfortable and confident using the donor moves management cycle with individual donors and board directors; submit grants to corporate, foundation, and government sources; and create and plan special donor events.
Outcomes:
Feel comfortable with the importance and implications of fund-raising; Obtain practical skills in writing letter of inquiry, appeal letters, solicitation plans, and fund-raising events, grant proposals, budgeting and grant funders

IPS 465 Psychology and Spirituality of Life Transitions (3 Credit Hours)
Course examines the dynamics of change, attachment, and loss, suffering and grief and the transition process of endings, empty spaces and new beginnings. Conscious and intentional living is recognized as the most precious gift to give to oneself, loved ones, and the world.
Outcomes:
Students will learn how to face and incorporate change with increased faith and hope; more fully understand the psychological and spiritual impact of change; recognize value and meaning in events of daily life

IPS 467 Introduction to Canon Law (3 Credit Hours)
This course introduces students to Canon Law, also known as church law, which is grounded in the theology and ecclesiology of the Catholic Church.
Outcomes:
General overview of canon law as needed for lay ecclesial ministry; basic understanding of canon law as a discipline; knowledge of canons as related to sacrament of marriage and sacraments of initiation

IPS 472 Pastoral Counseling in an Intercultural Context (3 Credit Hours)
This course invites students into a reflective, interactive, experiential process of exploring the place of culture, values, beliefs, and biases in the counseling context. Students examine their own cultural experiences, with special attention to power dynamics, even as they study the complex dynamics of other cultures.
Outcomes:
Deepen awareness of one's own cultural dynamics; develop an increased understanding of other cultures; consider strategies and interventions for sensitively meeting the needs of those encountered in pastoral counseling

IPS 473 Family Therapy and Personal Transformation (3 Credit Hours)
Family therapy is a unique way of working with individuals, couples and families. This course will examine the foundations of, and theory and practice of family therapy as expressed in five major schools. We will integrate psychological and theological dimensions throughout. The course will balance didactic input and experiential exercises.
Outcomes:
Demonstrated knowledge of application ability of family system theory, family therapy, and understanding of culture and other effects on family systems

IPS 474 Addictions & Modes of Therapy (3 Credit Hours)
Addictions are among the most pervasive and potentially destructive entrapments of the human condition. Their presence in manifold forms, underscores the importance of understanding the roots and sources of its patterns, in order to ultimately shape treatment and therapeutic strategies from a holistic and integrative point of view.
Outcomes:
Gain understanding of general addictive patterns/processes as they are discernible across addictions; Grapple with the roots, causes, and extent of addictions, from various viewpoints; Understand various treatment approaches

IPS 478 Couples Counseling (3 Credit Hours)
This course prepares clinicians to understand and work with couples in crisis by examining five therapy approaches. Marital development, premarital counseling, healthy marital functioning, sexuality, spirituality, physiology, enrichment and working with affairs will be addressed. Class built upon lecture, case study, video presentation, role play, small and large group processing.
Outcomes:
Working knowledge of marital health, conflict and role of affect; ability to assess family dynamics and prepare treatment plan; comfort level with couples

IPS 480 Mindfulness and Pastoral Ministry (3 Credit Hours)
Participants will examine: a) historical overview of mindfulness in Christian and certain Eastern religious traditions; b) integration of mindfulness in pastoral ministry; c) emerging neuroscience regarding mindfulness; and, d) clinical research on the effectiveness of mindfulness in promoting positive mental health.
Outcomes:
Participants will gain the ability to describe the benefits of mindfulness and how mindfulness can be integrated into personal life and utilized in professional and/or ministerial roles; be personally knowledgeable about the experience of developing mindful awareness

IPS 483 The Pastoral Care & Counseling of Men (3 Credit Hours)
This course explains what it means to be male and masculine in this time and culture. Psychological development, influence of culture, power, the Male Code, intimacy, emotions, sexuality, spirituality, and inner life will all be explored. Individual and group, clinical and educational approaches will be discussed.
Outcomes:
Appropriated gender-based approach to working with men; and acquired inquisitiveness to men's issues and upbringing

IPS 485 Religious Education, Evangelization & Cultures (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs within cultural settings (e.g., urban/suburban/rural; secular/religious; settled/immigrant; ethnically diverse/uniform; Millennial/GenX/Boomer/Greatest generation). This course provides the tools to analyze a cultural context, identify barriers to ongoing conversion, and teach effectively for religious and spiritual growth. Understand the educational significance of cultural context; Develop ethnographic and contextual analytical skills; Analyze and evaluate themselves, curricula and others for cultural appropriateness; Create culturally sensitive learning events.
Outcomes:
Know basic catechesis

IPS 486 Principles of Religious Education (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs in many contexts often targeted for a particular age or cultural group. This basic course in religious education reveals the theological and educational roots and introduces the basic elements and processes including assessment, backward design, curriculum and learning. Analyze learning contexts; Apply theories to real life contexts; Evaluate oneself, curricula, and others with standards; Create a lesson addressing a real-life teaching challenge.
Outcomes:
Know and understand basic catechesis

IPS 493 Health Care Integration Project Portfolio (0 Credit Hours)
Pre-requisites: This course must be taken in the last year of study after fulfilling the other requirements for the concentration including: 3 designated health care courses, 2 workshops, basic CPE and CPE residency; Focused on the Certification process, an Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program; This 0 credit course seeks to assist in the process by providing supervision for the student Focused on the process for Board Certification. Health Care Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program. This 0 credit course seeks to assist in the process by providing supervision for the student.
Outcomes:
Completed portfolio for Board Certification with the National Association of Catholic Chaplains or Association of Professional Chaplains

IPS 499 Guided Study (1-6 Credit Hours)
Topics will vary.

IPS 501 Advanced Human Relation Skills (3 Credit Hours)
Provides the skills needed for the interpersonal involvement essential in any helping relationship. Participants learn and practice the skills of communicating empathy and challenge to others as well as exploring and disclosing oneself. Learning consists of applying theory to the experience of relationships in small groups.
Outcomes:
Students will effectively use ten essential skills to communicate and connect in relationships; Students will practice these skills with one another to understand the effect of these skills on the receiver

IPS 502 Theology of the Developing Person (3 Credit Hours)
This course seeks to help the students think theologically about human personhood. It offers students a theological anthropology presented with developmental considerations in mind. It offers a theological dialogue partner for psychological perspectives on development.
Outcomes:
Students will form a more abiding and working connection between theology and human experience; Students will understand how pastoral and therapeutic practice is strengthened by theological awareness and supports therapeutic and caregiving relationships

IPS 503 Fundamentals of Pastoral Counseling (3 Credit Hours)
Pre-requisites: IPS 501 (minimum grade of C+)
This course focuses on the process and skills of pastoral counseling. Emphasis is on training in basic listening and influencing skills. Students practice selected strategies drawn from various approaches to counseling.
Outcomes:
At the conclusion of this course, students will be expected to demonstrate mastery of two classes of core counseling skills (listening and influencing), which they will practice in small peer groups under the supervision of the instructors

IPS 505 Group Counseling Approaches (3 Credit Hours)
This course introduces students to the theory and practice of group approaches to counseling and preventative, psychoeducation work. Group dynamics and leadership issues are explored. Students will design and lead a group of their choosing.
Outcomes:
From various approaches to structured and unstructured groups, students develop a design for a specific group in which they are interested and which they plan to use in their subsequent career

IPS 507 Pastoral, Psychodynamic Assessment and Intervention (3 Credit Hours)
This course offers students the opportunity to integrate theoretical insights with the practical issues of assessment, diagnosis and response strategies for individuals and families. Psychodynamic and theological models are used in this effort, as is a strong commitment to naming the pastoral dimensions of assessment and response.
Outcomes:
Gain awareness of how healing and renewal is strengthened therapeutically; Examine how prevailing cultural attitudes contribute to human distress and / or renewal

IPS 509 Psychopathology (3 Credit Hours)
Pre-requisites: IPS 517
Students will learn how to use the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) for diagnosing various psychopathological disorders.
Outcomes:
Familiarity with the DSM-5; DSM-IV TR multi-axial system; examine the etiology, treatment, and prognosis of selected mental disorders; develop interviewing skills to identify psychopathology; integrate a pastoral dimension of dealing with persons suffering from psychopathology

IPS 511 Internship Supervision I (3 Credit Hours)
Internship Supervision/Practicum I intend to facilitate entrance into the clinical internship site. Students will obtain further development of theory and skills of pastoral counseling. The course will facilitate the integration of theory and praxis, psychological and theological, and the personal and professional dimensions of one's identity as a pastoral counselor.
Outcomes:
Demonstrate growing integration of pastoral counseling skills and psychological theory into practice; Develop knowledge and understanding of competencies and diverse perspectives needed by spiritually integrated and clinically informed pastoral counselors

IPS 512 Ethics, Pastoral Counseling, and Spirituality (3 Credit Hours)
This course introduces students to the richness and diversity of the Christian moral tradition, giving particular attention to the deep interconnections between spirituality and ethics. It also introduces students to the codes, procedures and theoretical underpinnings of professional ethics, essential for those pursuing vocations as pastoral counselors and spiritual directors.
Outcomes:
Articulate ethical methodologies, relationship between spirituality and ethics, knowledge of several professional codes, skills of assisting clients, awareness of personal ethical stances and their integration in counseling and spiritual direction

IPS 513 Internship Supervision II (3 Credit Hours)
Pre-requisites: IPS 511
Supervision II/Practicum intends to facilitate ongoing development of theory and skills of pastoral counseling. Students will facilitate the integration of theory and practice, psychological and theological, personal and professional dimensions of one's identity as a pastoral counselor. The course includes the completion of the clinical integration project.
Outcomes:
Demonstrate integration of pastoral counseling skills and psychological theory into practice; Consolidate knowledge and understanding of competencies and diverse perspectives needed for spiritually integrated counseling by pastoral counselors

IPS 515 Research Methods (3 Credit Hours)
This course familiarizes students with research methods quantitative and qualitative approaches, experimental research design, interview and survey methods, descriptive and analytical statistics and evaluative research.
Outcomes:
Increased knowledge of research methods and statistics; critically evaluate research literature; become familiar with current research in counseling and pastoral counseling; identify research topics of personal and professional interest

IPS 517 Models of Pastoral Counseling (3 Credit Hours)
Models act like paradigms that inform therapists about what is important to focus on in their clients and what is healing, restorative, and growth-inducing in therapy. Each says something about what normal and abnormal functioning looks like and how therapy helps a person move from unhealthy to healthy functioning.
Outcomes:
Become familiar with basic counseling theories; articulate key concepts, assumptions about human nature, therapist, client relationship, process and goals, techniques, as well as strengths and limitations of each approach

IPS 518 Career Counseling for the Pastoral Counselor (3 Credit Hours)
This course will shed light on the value of the career counseling process by integrating career counseling theory, career inventories case studies, experiential learning and class discussion.
Outcomes:
General understanding of major career development theories and their relevance to the counseling process; Utilize multiple career development exercises and job search strategies, including resume-writing and interviewing techniques

IPS 520 Testing, Measurement & Assessment (3 Credit Hours)
Pre-requisites: Completion of a minimum of 24 credit hours, including Models of Pastoral Counseling (517), Psychopathology (509), and Human Development (555)
The course is required for licensure but is not a prerequisite for other courses. This course will provide an understanding of the role of individual and group approaches to assessment and evaluation and its role in diagnosis, clinical intervention, and treatment planning. It will cover assessment of the various attributes of a person though standardized tests, and also include an overview of statistical procedures relevant to test standardization and interpretation. Students will gain first-hand exposure to specific tests and learn to read and evaluate such instruments.
Outcomes:
This course is being added to the MA PC curriculum in response to a new requirement in state licensure for master level counselors

IPS 530 Clinical Pastoral Care Registration (0 Credit Hours)
Pre-requisites: Must be in MDiv or MAPS program to register for this course
CPE site must be approved prior to engagement. Clinical Pastoral Care registration for MDiv and MAPS students provides confirmation of CPE requirement for degree. This course serves as continuous enrollment and fulltime status verification for IPS students for whom CPE is a program requirement.
Outcomes:
Fulfills CPE or Contextual Ed requirement for MDiv and MAPS students

IPS 531 Christian Doctrine (3 Credit Hours)
The course is divided into two sections: (1) the historical evolution of Christian doctrine and its theological interpretations through Vatican II; (2) the development of doctrine in the post-Vatican II era, including an in-depth study of Karl Rahner's fundamental theology and contemporary theological issues with applications to present-day pastoral ministry.
Course equivalencies: X - IPS 531 / BEHL 502
Outcomes:
Students will discover the tools of historical theology and correlation; revising theological understanding in changed historical-cultural contexts; and the hermeneutical task of translating their meaning into present contexts

IPS 532 Social Context of Ministry (3 Credit Hours)
Christian life and ministry are socially located; they take place in specific social, cultural, political and economic contexts. We cannot minister effectively if we do not have a better understanding of the context in which we are called to serve. These contexts are the environment within which persons minister.
Outcomes:
Gain skills of critical social analysis and theological assessment for strategies of social change to facilitate ministry in a given context

IPS 541 Liturgy and Christian Sacraments (3 Credit Hours)
The Sacraments express our faith bringing us into an encounter with God's grace, forming us into the image of Christ. This course explores the theological, religious, and cultural origins of the liturgy and the sacraments as they have developed in response to the needs of the Church communities throughout time.
Outcomes:
Students will develop the ability to articulate a sacramental theology and understanding of the sacraments that enables them to address the meaning of the sacraments in connection to contemporary culture

IPS 545 The Foundations of Christian Spirituality (3 Credit Hours)
Enrollment Conditions: This course is required of all students in the MASp: Contemporary Spirituality Concentration and/or the Spiritual Direction Concentration; Is also required of all MDiv students. Christian spirituality (the "lived experience of Christian faith") is a separate but partnered academic field with theology today. Key issues are: defining "spirituality", methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

IPS 551 Social Ethics in the Catholic Tradition (3 Credit Hours)
Students should ideally complete IPS 416, 417, and 531 prior to taking this course. This course focuses on the tradition and practice of Catholic social thought. Students will become familiar with the documentary tradition of Catholic social teaching, as well as the ways that Catholic social thought has been embodied and advanced through the lives of Catholic activists and liberation theology. Particular attention will be given to history, texts, methodology, and significant figures in the tradition.
Outcomes:
Upon completion of this course, students will have a thorough knowledge of the tradition of Catholic social thought, will be able to analyze contemporary issues through the lens of this tradition, and will be able to enact this tradition in their ministerial contexts

IPS 553 Moral Theology and Christian Ethics (3 Credit Hours)
This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching. To articulate the history and central categories in Catholic moral theology; to analyze a variety of contemporary methodologies in theological ethics.

IPS 555 Human Person and Psychological Development (3 Credit Hours)
Human beings are created to grow and mature into their full humanity. Every phase of life carries particular psychological and spiritual agendas. While each person is unique, our developmental story from birth to death is also our universal human story with particular variations, sharpened around gender and cultural differences.
Outcomes:
Exploration of developmental differences; Discovery of reliable markers for ministry to persons throughout the life cycle

IPS 560 Liturgical Leadership (3 Credit Hours)
This practicum develops skills in preparation for preaching and presiding at liturgical celebrations. The student will become familiar with different preaching styles, as well as theories of preaching and presiding. The focus includes public communication and preaching skills, as well as supervising and training volunteer liturgical ministers. Knowledge of preaching and presiding styles and theory.
Outcomes:
Ability to preside at liturgical celebrations; Development of preaching and public speaking skills; Familiarity with liturgical rites

IPS 564 Foundations of Pastoral Care (3 Credit Hours)
Pastoral Care is the ministry of accompanying people in the difficult times of their lives. Students explore the history, theology and purpose of pastoral care, including their own personal loss experiences. Students will be able to assess who they are as minister and what they bring into the pastoral care environment. Students will demonstrate the ability to implement pastoral care skills.

IPS 565 Pastoral Leadership (3 Credit Hours)
Examines recent and contemporary leadership theories, principles and practices, and assists students' applications as pastoral leaders in their own religious traditions and institutions. Offers a wide array of readings from the organizational and corporate literature, church documents, and pastoral literature from Roman Catholic, hierarchical church, and congregational church perspectives.
Outcomes:
Apply leadership literature from organizational, corporate, and pastoral perspectives, growing personal capacity for integrating pastoral management and leadership performances appropriate to their religious traditions, governance structures, and communities

IPS 570 Introduction to Theology and Ministry (3 Credit Hours)
IPS 570: Introduction to Theology and Ministry is recommended as the first course in the program. This course explores the interplay among traditions of theology and ministry, the history of ministry and the challenge of relating foundational traditions to the present array of ministries. The course allows you to become more certain and deliberate about the skills that constitute ministerial practice and ministerial theology.
Outcomes:
Students clarify and articulate a theory of ministry and method of ministry from which to operate; The heart of the course is development of self-confidence ministerial capacities as a professional

IPS 572 Ignatian Spirituality (3 Credit Hours)
This course invites students to consider core elements and principles of Ignatian spirituality, through the study of Ignatius of Loyola's major works and relevant Ignatian literature. Particular attention will be given to the Spiritual Exercises and their use for spiritual direction and formation, discernment and prayer.
Outcomes:
Identify the distinctive characteristics of Ignatian spirituality; Acquire practical knowledge of Ignatian imaginative prayer and discernment of spirits; Learn to adapt and direct Ignatius' Spiritual Exercises for spiritual direction

IPS 578 Contextual Education Preparation (0 Credit Hours)
Restricted to Institute of Pastoral Studies students. Prepares students to engage in the practice of contextual education by orienting students to the contextual education framework, focusing on their own vocational identity, and reflecting on how students view the work of ministry. It also covers the logistics of procuring a site and conducting theological action research.
Outcomes:
Facilitate site selection and completion of site agreement; introduce the practice of Theological Action Research; be orientated to contextual education

IPS 579 Contextual Education Introduction (0 Credit Hours)
Restricted to Institute of Pastoral Studies students. Facilitates the student's initial foray into work at their contextual education site, through regular coaching for reflection and guidance as well as workshops on useful skills for ministry. Students gain 100 hours of hands on experience at their site of ministry and begin to develop a community-based theological action research project.
Outcomes:
To gain basic familiarity with the contextual education site and to build relationships within the community, and gain basic experience in the work of ministry pertaining to the site

IPS 580 Contextual Education I (3 Credit Hours)
Pre-requisites: Completion of at least 18 credit hours, attendance at prep session, approval of site and supervisor by CCE, completed required documentation
Students apply for placement with an approved site at which they will exercise & develop professional/ministerial skills. Students engage in a minimum of 200 hours of leadership praxis. Students receive practically oriented instruction, participate in practice-based workshops & reflect on their leadership experience with their peers & an experienced coach.
Course equivalencies: IPS 580/IPS 640
Outcomes:
Gain tangible skills for leadership in ministry; Test vocational commitments and refine vocational identity; Develop capacity for theological reflection especially toward the integration of discipleship, leadership and mission

IPS 581 Contextual Education II (3 Credit Hours)
Pre-requisites: IPS 580
Students continue in their field placement exercising professional/ ministerial leadership and further developing their self-identified professional/ministerial skills. While continuing to engage these contexts, students meet in class to further reflect on their leadership in ministry, discerning emerging strengths and areas of needed growth.
Course equivalencies: IPS 641/IPS 581
Outcomes:
Gain further proficiency in skills for leadership in ministry; Deepen & refine vocational identity in relation to present & future work; Further develop capacities of theological reflection on their work of ministry

IPS 593 Integration Project (0 Credit Hours)
The Integration Project (typically a written paper) involves the personal integration and application of one's course of studies at IPS into one's vocational/ministerial identity. 593 is required for MDIV, MASJ, MASp, MAHCML and MAPS students (though MAPS-Health Care Chaplaincy concentration students take 493 instead). Enrollment Conditions: Students should register in their final semester of coursework, or when they are within 9 credits of completing the degree. Registration requires a signed copy of the Integration Project Proposal.
Outcomes:
Successful integration and assessment of students' studies and vocational development

IPS 596 Special Topics in Health Care Ethics (1-3 Credit Hours)
This course is restricted to IPS graduate students.

IPS 599 Special Topics (1-6 Credit Hours)
Topics will vary. Restricted to IPS graduate students.

IPS 605 Master's Study (0 Credit Hours)
IPS students who have not completed their degree are required to be continuously enrolled in a course until their degree is completed. This zero credit hour course fulfills that requirement for those who are finished with their coursework but not their final projects. Maintaining enrollment for those who are finished with their coursework but not their final projects.

IPS 610 Foundations of Social Justice (3 Credit Hours)
This course explores the philosophical, ethical and theological foundations for social justice with a particular emphasis on Catholic Social Teaching and Catholic social ethics, addressing the practice of justice with attention to concrete dilemmas which confront Christians in their efforts to do justice.
Outcomes:
To develop an in-depth understanding of social justice in the Catholic social teaching tradition, and in the Jewish and Christian scriptures; to articulate and support a working definition of social justice informed by the course

IPS 615 Liberation Theology (3 Credit Hours)
Liberation Theology refers to several related theologies that emerged in Latin America. Many more have been developed but all share the same basic methodology, focus their efforts on issues of social justice, and proceed with a prophetic voice. The course introduces the method of liberation theology and surveys a selection of primary texts from a variety of social contexts.
Outcomes:
Students will critically and constructively assess the contributions of Liberation Theology in the broader theological conversation; develop the skills necessary to assess and respond theologically to their own social contexts

IPS 620 Diversity and Equity (3 Credit Hours)
This course explores diversity in a global environment characterized by color, ethnicity, culture, national origin, class, gender, age, religion, physical or mental ability, gender identity and sexuality. Students will effectively analyze and assess the cultural and institutional context of social justice issues. IPS 620 is cross-listed with SOWK 502: Oppression,Privilege,Diversity.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

IPS 625 Social Ethics: Politics and Global Economics (3 Credit Hours)
Economic institutions and issues of global justice are considered in the writings of philosophers, economists and socio-political theorists. Students effectively analyze institutional contexts of social justice issues and understand foundational local, national, and international justice issues linked to the political, economic, and social arenas. Analyze & evaluate current trends in international relations policy, economic markets & environmental impact from social justice perspective. Develop tactics for engaging in the work of social change within emerging global context.

IPS 627 Social Entrepreneurship (3 Credit Hours)
Intensive consideration of different examples of social entrepreneurship, including at least one utilizing Catholic Social Teaching; and more general observations of other models of social engagement and challenging unmet needs.
Outcomes:
Creation of an initial business sketch for a viable social entrepreneurship project to address a specific need

IPS 635 Community Organizing and Community Development (3 Credit Hours)
This course combines experiential learning with theories of community organization and development, exploring methods, strategies and key ideas of broad-based community organizing. Students will learn and practice the tools needed to organize as well as exhibit initial (foundational) competencies in social advocacy, community organizing and social change. IPS 635 is cross listed with SOWK 509: Community Intervention.
Course equivalencies: X-SOWK 509/IPS 635
Outcomes:
Increase understanding of approaches and methods of community organizing and community development; Become competent in evaluating resources available for the work of community organizing and development

IPS 651 Clinical Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues that will be examined and analyzed include problem-solving methods, the theory and practice of informed consent, end-of-life decision making, physician-assisted suicide, pediatric ethical dilemmas, spirituality in clinical encounters, the injustice of health care disparities, and the role of ethics committees.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with the terminology, resources, and major frameworks of ethical analysis in biomedical ethics

IPS 652 Organizational Ethics I (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Social and economic context of health care in the United States will be overviewed as the background for considering the responsibilities social justice entails to self, one's profession, one's patients, and the underserved

IPS 653 Organizational Ethics II (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Questions of leadership style and theories of what constitutes effective leadership are considered; Communication strategies and methods of organizational change key focuses

IPS 654 Catholic Bioethics and Clinical Practice (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
Assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics

IPS 655 Catholic Bioethics and Social Justice (3 Credit Hours)
Course involves an historical study of the development of the body of official Catholic Social Teaching specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Develop the participants understanding of the principles of Catholic Social Teaching and their application to the healthcare context

IPS 656 Advancing Health Equity Practice (3 Credit Hours)
A two-month long blended course of online learning and a two-day intensive experience on the HSD campus. Topics cover the role of racial and economic health disparities in the process of care and health outcomes, Cultural and Linguistic Appropriate Standards (CLAS) in health care, self-assessment and evaluation of institutional needs.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Knowledge and skills gained in this course can be used to develop an advocacy role for evaluating and promoting cultural competency within a health care system

IPS 657 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

IPS 658 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

IPS 659 Management of Professionals in Healthcare Organizations (3 Credit Hours)
This course offers students the opportunity to analyze, expand, and synthesize their understanding of technical, human relations and conceptual skills essential to functioning within the role of manager/administrator in health care settings.
Course equivalencies: X-IPS 659/CMAN568
Outcomes:
Analyze and synthesize knowledge of the concepts of professional role and organizational dynamics for use as a foundation for the role of manager/administrator in health care settings

IPS 660 Leadership in Social Justice Organizations (3 Credit Hours)
This course explores different approaches to leadership on behalf of social justice with a strong focus on developing a personal leadership style and practices to deepen students' sense of vocation. Develops a number of practical leadership skills connected to discernment, leading through adaptive challenges, team development and bridge building, management, and visioning.
Outcomes:
To understand leadership models and techniques for social justice organizations; To integrate spiritual practices and disciplines into leadership and management; To develop skills managing and interfacing with faith-based and non-profit

IPS 672 Media for Ministry and Mission (3 Credit Hours)
For more than a hundred years, film, radio, and television have had a profound effect on the practice on ministry and pastoral care. Now in the 21st century, the explosion of new types of interactive and social media have revolutionized our interactions, our economy, and our world. Churches and social justice organizations, however, have often been slow to adopt or even explore these new technologies.
Outcomes:
Participants will leave this course with an understanding of how to navigate the changing media landscape, think theologically about digital communications, and put media tools to work for ministry and mission; You will learn to plan strategic campaigns, create content, and measure results; Coursework will include engagement with various platforms, as well as an introduction to key concepts from media history and theory

Applied Pastoral Leadership Certificate

This certificate is designed specifically for degree-seeking students, who have an interest in expanding their understanding of ethics and social justice. You will develop advanced skills in public speaking, leadership principles, social justice foundations, and organizational development.

Please Note: This certificate can only be completed by students working toward an undergraduate degree within the School of Continuing & Professional Studies.

Christian Spirituality (MA)

Available Online. Drawing on the wisdom of the Ignatian tradition, the Master of Arts in Christian Spirituality equips students for meaningful and holistic living and ministry meeting the personal and social challenges of our time by deepening their knowledge of God and self. Joining contemplation to action, the Ignatian approach to spirituality and spiritual formation is grounded in a personal relationship with God/Christ, lived in the world and addresses the needs and issues of our time, ecumenical in its appeal to all Christians, and adapted to each person's uniqueness.

The Master of Arts in Christian Spirituality is a 36-hour degree program which can be completed entirely online, entirely face-to-face at Loyola's Water Tower Campus, or by taking a combination of online and on-campus courses. Students also have the opportunity to take IPS summer courses offered in Rome, many of which fulfill requirements for the MA in Christian Spirituality. Full-time students can complete the program in two years.

Students completing the MA in Christian Spirituality may choose to pursue a concentration in *Spiritual Direction*. The Spiritual Direction concentration is designed to prepare spiritual directors to facilitate the regular, on-going practice of accompanying people as they attempt to deepen their relationship with the divine. Unique to the Institute of Pastoral Studies, students have the opportunity to receive training on how to direct and make use of the *Spiritual Exercises of Ignatius of Loyola* (30-day or 30-week format) in spiritual direction.

To learn more about the Master of Arts in Christian Spirituality, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The U.S. Department of Education requires any institution offering distance education/online programs to students outside of its home state to acquire authorization from the states in which students reside. Regulations vary from state to state. While Loyola University Chicago is authorized, exempt or pursuing authorization in most states, some restrictions apply. Please see our State Authorization (https://www.luc.edu/online/aboutloyolaonline/state-authorization/) page for the most up-to-date information.

Loyola University Chicago is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The curriculum consists of a 12 course, 36 credit hour program comprising 9 core required courses:

Code	Title	Hours
Required Core Courses		
IPS 545	The Foundations of Christian Spirituality	3
IPS 416	Introduction to New Testament	3
IPS 417	Introduction to the Old Testament	3
IPS 531	Christian Doctrine	3
IPS 555	Human Person and Psychological Development	3
IPS 428	Introduction to Spirituality Praxis	3
IPS 403	Spiritual Paths in World Religions	3
IPS 512	Ethics, Pastoral Counseling, and Spirituality	3
IPS 572	Ignatian Spirituality	3
Electives [1]		*6*
Contextual Education Courses		
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3
Integration Project		
IPS 593	Integration Project	0
Total Hours		**36**

[1] Electives (2 three-credit courses, or 6 credit hours) are chosen in consultation with the academic advisor. Electives may be taken in IPS or in many of the other schools, colleges, academic centers and institutes at Loyola University Chicago. See your academic advisor for more details.

Contextual Education

MA in Christian Spirituality students acquire and enhance their spiritual leadership and skills in a structured contextual education program that combines onsite mentoring and supervision, skill-based workshops, as well as peer and faculty weekly reflection sessions. Students typically minister 8-10 hours per week for a period of 20-22 weeks, for a total of at least 200 hours of onsite experience and formation. The field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated in the resource rich area of Chicago or other settings around the nation or the world.

Students fulfill the Contextual Education requirement of the MA in Christian Spirituality by successfully completing the following 3 courses:

Code	Title	Hours
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3

Integration Project

MA in Christian Spirituality students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Learning Outcomes

By completing the Master of Arts in Christian Spirituality, students will be able to demonstrate:

- Spiritual perspective formed in self-awareness and engagement with modern culture and the classic and contemporary resources of the Christian tradition;
- Spirituality literacy grounded in biblical, theological and psychological competencies;
- Spirituality praxis through personal engagement with the spiritual dimension of Christian faith, discipleship and ministry;
- Professional skills in and for spiritual direction.

Christian Spirituality - Spiritual Direction Concentration (MA)

The Spiritual Direction Concentration provides MA in Christian Spirituality students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

Curriculum

MA in Christian Spirituality students opting for the Spiritual Direction concentration must take two additional required courses (in place of the two electives):

- IPS 429 Essentials of Spiritual Direction (required prerequisite: IPS 428 Introduction to Spirituality Praxis)
- IPS 501 Advanced Human Relation Skills

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

Spiritual_Direction_Confirmation_Form (https://www.luc.edu/media/lucedu/ips/pdfs/Spiritual_Direction_Confirmation_Form.pdf%20Form%2011%2008%202018.pdf%20Updated.pdf)

Students in the MACS-Spiritual Direction concentration willing to learn how to direct the Spiritual Exercises must have completed the 30-day or the 30-week 19th Annotation format of the Exercises prior to beginning the Contextual Education component of their program. This requirement will be waived for those who have taken the complete Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable MA in Christian Spirituality-Spiritual Direction Concentration students to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Prof. Dan Rhodes, Faculty Coordinator of Contextual Education.

Christian Spirituality Certificate

The Graduate Certificate in Christian Spirituality provides students with a foundational and broad understanding of Christian spiritual theologies, traditions, and practices. Students develop an integrated spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. They advance in their spiritual maturity and with a perspective grounded in key biblical, theological, and psychological competencies. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

The Graduate Certificate in Christian Spirituality provides a flexible course of study for

- Persons seeking to deepen their understanding and practice of Christian spirituality
- Those exploring a new career path in ministries that involve spiritual accompaniment
- Ministers who want to expand their vocational horizon, expanding their knowledge and skill base to include Christian spiritual theologies, traditions, and practices
- Volunteers or part-time professionals who seek to advance in their ministry

Curriculum

The Graduate Certificate in Christian Spirituality requires completion of five courses (15 credit hours). Three courses are required and two courses are electives. Students will work with their academic advisor to choose elective courses that best suit their background, experience, interests, and goals.

Code	Title	Hours
IPS 545	The Foundations of Christian Spirituality	3
IPS 572	Ignatian Spirituality	3
IPS 428	Introduction to Spirituality Praxis	3
Electives		6
Total Hours		**15**

The Institute of Pastoral Studies offers a large number of courses online every year, including the three required courses for this certificate. It is possible, therefore, to complete the Graduate Certificate in Christian Spirituality entirely online depending on which courses a student chooses within the elective options that satisfy the curricular requirements.

To learn more about the Certificate in Christian Spirituality, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
IPS 428	Introduction to Spirituality Praxis	3
IPS 545	The Foundations of Christian Spirituality	3
	Hours	**6**
Spring		
IPS 572	Ignatian Spirituality	3
Elective #1		3
	Hours	**6**
Summer		
Elective #2		3
	Hours	**3**
	Total Hours	**15**

Learning Outcomes

Students gain a foundational and broad base of knowledge and skills related to Christian spirituality. Students advance their personal spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. Graduates integrate and embody key biblical, theological, and psychological competencies resulting from personal engagement with the spiritual dimensions of faith, discipleship, and ministry.

Church Management Certificate

Available Online. IPS offers an education in Church Management through a concentration within the MA in Pastoral Studies and through a Graduate Certificate. Click here for information on the Pastoral Studies with a Concentration in Church Management (MA) (p. 1565).

Curriculum

The Graduate Certificate in Church Management requires two courses (6 credit hours) at the Institute of Pastoral Studies and three courses (9 credit hours) at the Quinlan School of Business, for a total of 15 hours. The two IPS courses will be chosen in consultation with the academic advisor. The decision concerning which courses to take at QSB will be determined according to each student's experience in consultation with their academic advisor and the Assoc. Dean for Programs at QSB. There are, however, guidelines that will ensure that each student is well formed in the areas of accounting and management. The Graduate Certificate in Church Management can be completed online.

Code	Title	Hours
Two IPS Courses (chosen in consultation with academic advisor)		6
ACCT 400	Financial Accounting for Business Decisions [1]	3
Choose one of the following:		3
HRER 417	Managing and Motivating in the Workplace	
HRER 430	Organization Development	
MARK 460	Marketing Management	
One Quinlan Graduate Level Elective		3
Total Hours		**15**

[1] Unless there is some previous experience that makes such a course of study redundant.

To learn more about the Certificate in Church Management, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Learning Outcomes

Church Management

The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change in non-profit or faith-based settings.

Counseling for Ministry (MA)

The 36 credit hour Master Of Arts degree in Counseling For Ministry is designed to prepare students to become competent and effective pastoral caregivers in their present and future ministries.

Our contemporary social and cultural contexts reveal strong needs for ministry-based caregiving with competency from within religious traditions and their communities. The long and rich history of counseling within ministry gives witness to that commitment called "ministry of care", or in Jesuit terms, *cura personalis*.

The Master's in Counseling for Ministry degree program is suited to international students and others who do *not* require the 60 credit hour MA in Pastoral Counseling that is designed to meet the requirements for Illinois licensure as a clinical counselor.

The MA in Counseling for Ministry mirrors the competency requirements of the Pastoral Counseling program but without the additional licensure requirements, allowing students to serve the therapeutic needs of faith communities in the USA and around the world.

To learn more about the master's degree in counseling for ministry and studying in the USA, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110

Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The Master of Arts in Counseling for Ministry allows international students and those interested in Pastoral Counseling to receive a degree in counseling without the 60 credit hour licensure requirements. This 36 credit hour program continues to build student's understanding of religious culture, values and beliefs in a reflective and articulate form while equipping students to serve the therapeutic needs of their communities in a meaningful way.

[1] If required at the time of admission

Learning Outcomes

By completing the Master of Arts in Counseling for Ministry, students will be able to demonstrate:

- The ability of pastoral caregivers to engage their social and cultural contextual environments in order to expand their pastoral competencies. (Cultural Context)
- The ability to interpret and assess pastoral caregiving in relation to the historical and contemporary pastoral commitments of faith communities (Theology/Spirituality/Religious Heritage)
- The ability to offer competent and meaningful pastorally supportive services within largely faith-based contexts, based on personal, interpersonal, and spiritual maturity (Maturity/Personal Formation)
- The ability to appropriately assess personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas within the range of their defined competencies. (Skills/Ministerial Leadership)

Divinity (MDiv)

Available Online. The Master of Divinity (MDiv), is a comprehensive degree designed to meet the educational needs of persons called to professional ministerial leadership. Those who elect to pursue this Master of Divinity degree are making a major commitment to prepare for pastoral ministry, choosing to join in the adventure of discerning their gifts and preparing themselves for a life of religious leadership in an evolving church and society.

These ministers extend the religious tradition in spiritual leadership in a variety of contexts (parishes and churches, healthcare institutions, faith-based non-profit organizations, retreat centers, educational institutions, etc.) by preaching and teaching, by counseling, consoling, and offering pastoral care, by serving and challenging, by leading prayer and praying, by empowering and equipping, by prophetically pointing to injustice and by faithfully organizing for needed change. Born of the present needs for church ministers and decision-makers, this degree qualifies women and men for the new genre of pastoral leadership. The MDiv cultivates a ministerial way of being through academic and formational requirements, which parallel the Church's traditional seminary setting. Loyola's Jesuit and university context provides the breadth and depth that tomorrow's Church requires.

The religious leaders who emerge from this MDiv program are called upon to resource (both to mediate and to augment) the Christian Tradition. Thus, they require education and formation not only for the way things are, but also for the way things are going to be. They need to be generalists grounded in the faith tradition, but also specialists possessing the interpersonal and spiritual skills to empower others in particular settings. These persons will be leaders who can articulate in religious language their own profound experience, discern the presence of the divine in others' experience, and convoke and nurture community, accompanying others on the journey through life.

While focused primarily to prepare non-ordained people for ministerial leadership, the Loyola MDiv program also welcomes members of religious communities, clergy, and participants from other communions committed to an academic and formational experience attuned to the diversity, mutuality, and collaboration that will characterize tomorrow's Church.

Students can pursue the degree on campus or as a distance program via online education. For the distance program, the course in Liturgical Leadership will require an on campus intensive, but all other courses are available entirely online. Students can take courses on either a full or part-time basis. Full-time students take three-four years to complete the program; part-time students typically complete their degree within five-six

years. The typical course load is three or four courses per semester for full-time students, with additional classes taken over two summers. The MDiv degree cannot be completed on a summers-only basis.

The MDiv of the Institute of Pastoral Studies at Loyola University Chicago truly assists persons in achieving a degree of difference for tomorrow's Church as it prepares people to lead extraordinary lives.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The MDiv curriculum recognizes that professional ministerial leadership emerges from faith-filled ministerial practice and seeks reflective critical understanding to prepare graduates to know, serve and love practically.

This gives rise to three aspects of the MDiv program: faith formation, reflective critical understanding and ministerial practice.

These areas of the curriculum prepare students for work in various areas:

- The church's institutional placements, which include parish leadership, diocesan administration, hospital chaplaincy and campus ministry, and parallel religious organizations, which include ministry options in organizations dealing with religious communications.
- Peace and justice advocacy, parochial school administration, as well as spirituality centers.
- Public-service positions such as legal advocacy, industrial chaplaincy, business ethics, social work, nursing and counseling that invite a pastoral or spiritual perspective, along with standard knowledge of the field.

The MDiv degree is a 72-credit-hour (24-course) degree program, composed of three interconnected components: academic coursework, pastoral formation and ministerial skills. The IPS MDiv curriculum recognizes ministerial leadership as emerging from faith-filled ministerial practice, seeking reflective critical understanding, so as to serve, know, and love practically. These three movements are reflected in each aspect of the MDiv Program: Faith Formation, Reflective Critical Understanding and Ministerial Practice.

The MDiv curriculum builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program. Course descriptions for several of the core courses below are described in the MAPS degree's section of this website.

Critical Understanding

15 courses, 45 credit hours

Code	Title	Hours
Context		
IPS 555	Human Person and Psychological Development	3
IPS 532	Social Context of Ministry	3
The incarnation of Jesus, Christian life and ministry are socially located, that is, they take place in specific social, cultural, political and economic contexts. These social contexts provide the environment within which persons minister. This course provides a model and practical skills for social analysis and strategies for social change to facilitate ministry in an urban context. As such it involves a group experience of social analysis and the development of strategies to respond to the identified social needs.

Code	Title	Hours
IPS 560	Liturgical Leadership	3
IPS 565	Pastoral Leadership	3
IPS 564	Foundations of Pastoral Care	3
Ministerial Practice Elective		3

Ministry Focus

3 courses, 9 credit hours

Ministry Focus names the process by which the MDiv student reviews the work of the first half of his/her curriculum, declares an intended focus or particular character, and projects the remainder of this curriculum for assessment, feedback, and approval by the IPS faculty. While these two tasks are distinct they intertwine in many ways and are enacted in one procedure.

Ministry Focus Elective, 3 hours

Contextual Education

2 courses, 6 credit hours

As a "pastoral" institute, IPS operates from a "praxis paradigm*" in relation to theological and ministerial education. This means that in Contextual Education students acquire knowledge for the sake of religious transformation as they experience God's action in persons' lives and link this action with tradition. Thus, images of Contextual Education limited to giving students work experience. while they are studying, or that understand Field Education to be the context in which to "learn skills," are marginal to and outmoded for the praxis paradigm for pastoral studies. On the contrary, Contextual Education is an essential locus for exercising and gaining the knowledge essential for pastoral studies. It is a theological exercise, including four movements:

- Describing the community's practice
- Analyzing this practice historically
- Systematically relating life themes in the practice to the religious traditions
- Establishing the norms and strategies of ministerial response to the practice

Contextual Education plays a major role in the very orchestration of theological education, an activity through which students generate data for theological construction and reconstruction. It also provides a setting for the student to exercise ministerial skills of caring for creation (cosmic, social, personal, and individual welfare), proclaiming the faith, and enacting the community.

Contextual Education then stands at the portal between the community and the university. In one direction the Contextual Education students join the community engaging the religious experiences of life. In the other, at the Institute, they join teachers and colleagues reflecting on the community's practice in light of the religious traditions. During this exchange MDiv Students learn to generatively practice reflection and reflectively practice. They learn to become "ministers," ambassadors to the community.

MDiv students normally engage in Contextual Education during the second year of the program (or after 8–12 courses have been completed). This allows students to do one year of classroom work and to prepare to engage a Contextual Education placement. It provides another year of classroom endeavor after the experience to concentrate on one's ministry objectives, refined in Contextual Education.

- IPS 580 Contextual Education I
- IPS 581 Contextual Education II

Clinical Pastoral Education

0 hours

Clinical Pastoral Education (CPE) is a an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before application to candidacy to address one key candidacy concern, namely, personal growth matters of self awareness and self reflection. The student uses material from the CPE report to support his or her candidacy.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

MDiv Midpoint Review

When students reach the half-way point in their coursework, they being preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement, as well as the student's progress toward the completion of the M.Div. program. The advisor will note the successful completion of the Midpoint Review in the student's eportfolio on TaskStream. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction or pastoral counseling, re-taking courses in which one did not receive a passing grade, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the MDiv program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Faith Formation

Spiritual Direction

Spiritual direction is the process of deepening one's relationship with God through a reflection and discernment process shared with a mentor trained to facilitate listening and responding to God's continuing revelation in the whole of one's life. It is recognized that many MDiv students have a spiritual director and the availability of this service is not intended to replace that long-standing relationship. However IPS does provide the opportunity of experienced spiritual directors for all IPS students. Individual sessions will be held for one hour every other week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Pastoral Counseling

Pastoral counseling is a process of developing a deeper understanding of self and self-in-relationship to others, to society and to the environment. Particular attention is given to theological and psychological dimensions of personal growth and integration. Individual sessions will be one hour each week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Click here (https://www.luc.edu/ips/resources/spiritualformation/) **for further information on the Institute's program of Personal Growth and Spiritual Development.**

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Divinity and Pastoral Counseling (MDiv/MA)

This dual-degree program provides the student with a comprehensive background in ministerial leadership and specialist competencies in faith-based counseling.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Master of Arts in Pastoral Counseling

By completing the Master of Arts in Pastoral Counseling, students will be able to demonstrate:

- The ability to pastorally and clinically engage human psychological, relational, and contextual distress in therapeutic ways. (Cultural Context)
- The ability to interpret, engage, and expand psycho-spiritual meaning making in relation to the pastoral legacy of faith communities. (Theology /Spirituality/Religious Heritage)
- The ability to offer competent therapeutic services in secular and/or faith-based contexts based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess and diagnose personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas. (Skills/Ministerial Leadership)

Divinity and Social Justice (MDiv/MA)

This dual-degree program provides the student with a comprehensive background in ministerial leadership and specialist competencies in the field of social justice.

In addition to its partnership with the MDiv degree, the MA in Social Justice can also be pursued in collaboration with the Master of Social Work degree program.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

By completing the Master of Arts in Social Justice, students will be able to demonstrate:

- An in-depth understanding of philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.

- A greater awareness and understanding of competing forces at the heart of conflicts over justice in various contexts and one's own location in relation to them. (poverty, culture, race, ethnicity, gender, sexual orientation, power, inequality, religion)
- A spiritual maturity that drives one to fully and productively engage in diverse contexts experiencing oppression, marginalization, deprivation and conflict.
- The primary skills of deep listening, dialogue, socio-cultural assessment and analysis, adaptive leadership, conflict transformation, relationship building, and have basic facility in the secondary skills of community organizing and development, advocacy for policy change, and practical knowledge for organizational management and social entrepreneurship.
- Substantive development of key business skills in their chosen areas of interest, including such areas as marketing, management, operation, and accounting.
- An understanding of how these business skills can be put to work critically and constructively to support the missions of social justice organizations.

Divinity and Social Work (MDiv/MSW)

This dual-degree program provides the student with a comprehensive background in ministerial leadership and the competencies to become a licensed social worker.

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1976)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1978)

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

MSW Program Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research,

and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Police Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies,

including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Divinity with a Concentration in Chaplaincy (MDiv)

Curriculum

The IPS Master of Divinity (M.Div.) offers a unique Chaplaincy concentration to prepare students for the process to be certified as a Board Certified Chaplain (BCC via BCCI (https://bcci.professionalchaplains.org/content.asp?pl=25&contentid=25)) with the Association of Professional Chaplains (APC) (https://www.professionalchaplains.org/) or The National Association of Catholic Chaplains (NACC) (https://www.nacc.org/).

The M.Div. degree is a 72-credit-hour (24-course) degree program that builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program. Course descriptions for several of the core courses below are described in the MAPS degree's core curriculum (https://www.luc.edu/ips/degrees/pastoral-studies/ipscorecurriculum/) section of this website.

All components of the M.Div. Chaplaincy concentration, except for CPE, can be completed online or on-campus. Students can complete the CPE requirement at any ACPE accredited location (across the USA). Some courses are also available in the summer through the IPS Rome program.

M.Div. – Chaplaincy Concentration Curriculum

In sum, the curriculum requirements include:

Coursework

Critical Understanding

15 courses, 45 credit hours

Code	Title	Hours
Context		
IPS 555	Human Person and Psychological Development	3
IPS 532	Social Context of Ministry	3

[1] If student is going into chaplaincy in a different area, e.g., prison chaplaincy, a different ethics elective may be substituted here. A variety of bioethics courses are offered through Loyola's Neiswanger Institute for Bioethics (https://hsd.luc.edu/bioethics/content/coursedescriptions/).

Ministerial Practice

7 courses, 21 credit hours

Code	Title	Hours
IPS 560	Liturgical Leadership	3
IPS 565	Pastoral Leadership	3
IPS 564	Foundations of Pastoral Care	3
Ministerial Electives		
Select four courses		12
Optional Elective for those seeking APC Certification [1]		(0)
Total Hours		**21**

[1] Additional 3 hours

Contextual Ed

Four Units of CPE

Based on the requirements for Board Certification as a chaplain, the M.Div.—Chaplaincy concentration requires students to complete four units of Clinical Pastoral Education (CPE). Three of these units must be submitted for Advanced Standing (https://www.luc.edu/media/lucedu/ips/pdfs/Advanced_Standing-1.pdf) credits for two Contextual Education courses (6 credit hours): IPS 580 Contextual Education I and IPS 581 Contextual Education II.[1] More information on CPE can be found here (https://www.luc.edu/ips/resources/cpe/). During the fourth and final unit of CPE, students must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

[1] Certification through APC only allows 1 unit of CPE to count for 3 credits towards the 72 credits of graduate work required. Students who plan to seek board certification may need to take an additional 3 credit elective.

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

Final Integration Project

The final program requirement is IPS 493 Health Care Integration Project Portfoliot. In IPS 493 Health Care Integration Project Portfolio, students are mentored in the process of preparing the materials required to sit for board certification.

More information about the vocation of chaplaincy can be found here (https://www.luc.edu/ips/resources/chaplaincy/).

To learn more about the Spiritual Direction concentration, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)

- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Divinity with a Concentration in Spiritual Direction (MDiv)

Curriculum

Master of Divinity Curriculum (p. 1545)

Curriculum Planning Worksheet (p. 1555)

The IPS Master of Divinity (M.Div.) offers a unique Spiritual Direction concentration to provide students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

The M.Div. degree is a 72-credit-hour (24-course) degree program that builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program. Course descriptions for several of the core courses below are described in the MAPS degree's core curriculum (https://www.luc.edu/ips/degrees/pastoral-studies/ipscorecurriculum/) section of this website.

All components of the M.Div. Spiritual Direction concentration, except for CPE, can be completed online or on-campus. Students can complete the CPE requirement at any ACPE accredited location (across the USA). Some courses are also available in the summer through the IPS Rome program.

M.Div. – Spiritual Direction Concentration Curriculum

In sum, the curriculum requirements include:

- **Coursework**
- **Contextual Education**

Contextual Education

2 courses, 6 credit hours

The Contextual Education requirement is adapted to enable students of the M.Div. Concentration in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained coach/mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Dr. Dan Rhodes, Faculty Coordinator of Contextual Education.

- IPS 580 Contextual Education I
- IPS 581 Contextual Education II

Clinical Pastoral Education
0 hours

Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/) is an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before the application to candidacy to address one key candidacy concern, namely, personal growth matters of self-awareness and self-reflection. The student uses material from the CPE report to support his or her candidacy. Students complete CPE units at any ACPE Accredited Center (https://acpe.edu/education/cpe-students/) and must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining

that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

Spiritual Direction
Students must complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction, Spiritual_Direction_Confirmation_Form (https://www.luc.edu/media/lucedu/ips/pdfs/Spiritual_Direction_Confirmation_Form.pdf%20FormUpdate.pdf).

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the M.Div. program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Final Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit course that facilitates the completion of the Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

To learn more about the Spiritual Direction concentration, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish)

Disponible Exclusivamente en Línea | Available Exclusively Online

Español

El programa Virtual (Online) Bilingüe (Español) Maestría de Artes en Estudios Pastorales (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSSpanish.pdf) prepara estudiantes para el servicio ministerial en comunidades biculturales y bilingües (diócesis, parroquias, escuelas, hospitales, y otras organizaciones comunitarias), tanto a nivel local como internacional. Este es un programa que integra la formación teológica y pastoral en cuatro áreas fundamentales:

1. Humana
2. Espiritual
3. Intelectual
4. Ministerial

Por medio del estudio e investigación y de la integración de un proyecto teológico-pastoral en el contexto de sus experiencias, los estudiantes desarrollan sus cualidades y habilidades personales para su ministerio, arraigados en la fe y en la comunión eclesial y Trinitaria. El Programa Virtual Bilingüe MAPS en el Instituto de Estudios Pastorales ofrece a los estudiantes una amplia fundación sistemática para una variedad de ministerios y herramientas necesarias para comprometerse crítica y constructivamente con los retos y oportunidades de nuestro tiempo.

Esta Maestría de Artes en Estudios Pastorales (MAPS) *Bilingüe* en *Español* es completamente virtual, con sesiones sincrónicas y asincrónicas. En las sesiones sincrónicas estudiantes y profesores desde distintas partes del mundo se reúnen simultáneamente en un salón virtual por medio de plataformas (Sakai) y herramientas electrónicas ofrecidas por la Universidad de Loyola Chicago. En las sesiones asincrónicas los estudiantes consultan los recursos y materiales de clase y envían sus ensayos, tareas y preguntas en Sakai de acuerdo a sus propios horarios.

De esta manera los estudiantes no necesitarían trasladarse a Chicago para sus cursos, pero si pudieran asistir, con gusto les daremos la bienvenida a Chicago para la ceremonia de graduación.

Este programa es dialéctico y contextual, en el que interactúan las visiones, ideas, y las *praxes* de teólogos y agentes de pastoral que trabajan en comunidades bilingües y multiculturales en los Estados Unidos de Norteamérica y alrededor del mundo, unidos por el amor al evangelio de Jesucristo y comprometidos con los valores del Reino de Dios.

Al terminar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes estarán preparados para responder al los desafíos pastorales contemporáneos e integrarse en diversos ministerios en comunidades, instituciones, y organizaciones bilingües y multiculturales.

English

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSBiligual.pdf) program prepares students for ministerial service in bicultural and bilingual communities (dioceses, parishes, schools, hospitals, and other community organizations), both locally and globally. This is a program that integrates theological and pastoral formation in four fundamental areas:

1. Human
2. Spiritual
3. Intellectual
4. Ministerial

Through study and research and the integration of a theological-pastoral project in the context of their experiences, students develop their personal qualities and abilities for their ministry, rooted in faith and in ecclesial and Trinitarian communion. The MAPS Online Bilingual Program at the Institute for Pastoral Studies offers students a broad systematic foundation for a variety of ministries and tools necessary to critically and constructively engage with the challenges and opportunities of our time.

This Bilingual Master of Arts in Pastoral Studies (MAPS) in Spanish is completely virtual, with synchronous and asynchronous sessions. In synchronous sessions, students and teachers from different parts of the world meet simultaneously in a virtual room through platforms (Sakai) and use electronic tools offered by the University of Loyola Chicago. In asynchronous sessions, students consult class resources and materials and submit their essays, assignments and questions in Sakai according to their own schedules. In this way, students would not need to travel to Chicago for their courses, but if they could attend, we will gladly welcome them to Chicago for the graduation ceremony.

This program is dialectical and contextual, in which the visions, ideas, and praxes of theologians and pastoral agents working in bilingual and multicultural communities in the United States of America and around the world, united for the love of the gospel of God, interact. Jesus Christ and committed to the values of the Kingdom of God. Upon completion of their Master of Arts in Pastoral Studies (MAPS) students will be prepared to respond to contemporary pastoral challenges and integrate into diverse ministries in bilingual and multicultural communities, institutions, and organizations.

Visión General | Overview

El programa virtual (en línea) bilingüe (español) de maestría en artes en estudios pastorales (MAPS) contiene 12 clases, una experiencia formativa práctica llamada Educación Contextual y un documento de integración acumulativo escrito en el semestre final.

- Las clases estan ofrecidas en español e inglés
- Se puede terminar en 2 años consecutivos
- El programa empieza en el verano (mayo) de cada año
- Todos los cursos se ofrecen en línea, con formatos tanto sincronizados (conferencias de video) como no sincronizados (foros de discusión) que te proveen la oportunidad de ser flexible y balancear el trabajo y vida personal.
- Requisitos de horas de práctica supervisada (Contextual Education) pueden realizarse en tu propia comunidad local.

Importante: Los solicitantes deben tener fluidez en español e inglés para completar con éxito el programa. El MAPS bilingüe en línea es un modelo de cohorte que solo comienza en verano. Las solicitudes deben

presentarse antes del 1 de abril de cada año calendario. Se requiere inscripción continua; los cursos se ofrecerán en el semestre de otoño (16 semanas), semestre de primavera (16 semanas) y sesiones de verano (6-8 semanas).

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) program contains 12 classes, a practical formative experience called Contextual Education, and a cumulative Integration Paper written in the final semester.

- Classes are offered in Spanish and English
- Program can be completed in 2 consecutive years
- The program begins in the summer (May) of each year
- All courses are offered online, with both synchronized (video conferencing) and non-synchronized (discussion forums) formats that provide you with the opportunity to be flexible and balance work and personal life.
- Supervised practice hour requirements (Contextual Education) can be completed in your own local community.

Important: Applicants must be fluent in both Spanish and English in order to successfully complete the program. The MAPS Online Bilingual degree is a cohort model with a summer start only. Applications must be submitted by April 1 of each calendar year. Continuous enrollment is required; courses will be offered in the fall semester (16 weeks), spring semester (16 weeks), and summer sessions (6-8 weeks).

Curriculum

Plan de Estudios | Curriculum

New! Online and Bilingual MA in Pastoral Studies

Español

Plan_de_Estudios (https://www.luc.edu/media/lucedu/ips/pdfs/Bilingual%20MAPS.pdf)

- **12 cursos; 36 horas crédito | 75% de los cursos comunes y especializadas se impartirán en español, y 25% en inglés.**
  - 8 cursos comunes
  - 3 cursos de especialidad (incluida la Administración y Gestión para el Ministerio en Comunidades Interculturales, la Praxis Espiritual Cristiana en el Ministerio Juvenil y la Ética Social Católica y la Migración)
  - 1 curso de Contextual Education (inglés)
  - Proyecto Integración (español o inglés)

Descripciónes de los 8 Cursos Comunes (3 Créditos cada Clase)

IPS 570 Introducción a la Teología y Ministerio

Descripción: Este curso, recomendado al comienzo de este programa, explora la interacción entre las tradiciones de teología y ministerio, la historia del ministerio y los retos que presentan al relacionar las tradiciones fundacionales y la diversidad contemporánea de ministerios. Este curso capacita a los estudiantes a ser más asertivos y reflexivos acerca de las habilidades que constituyen la teología y la praxis en el ministerio pastoral.

Resultados: Los estudiantes clarificarán y articularán la teoría y método del ministerio desde los cuales va a realizar su acción pastoral. El corazón de este curso es el desarrollo de autoconfianza de sus habilidades pastorales como un profesional.

IPS 417 Literatura del Israel Antiguo

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Antiguo Testamento: el Pentateuco, los Libros Históricos, los Profetas y la Literatura Sapiencial en su contexto literario, histórico, social y religioso por medio de los métodos de análisis histórico crítico y literario.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Antiguo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 416 Introducción al Nuevo Testamento

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Nuevo Testamento en su contexto literario, histórico, social y religioso del mundo Palestino y Greco Romano.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Nuevo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 531 Doctrina Cristiana

Descripción: En este curso estudiaremos el desarrollo de la doctrina cristiana desde los Padres de la Iglesia, los primeros Concilios Ecuménicos hasta el Concilio Vaticano II. En este curso analizaremos particularmente el pensamiento de Karl Rahner, Gustavo Gutierrez y Jon Sobrino, así como los documentos latinoamericanos postconciliares y sus repercusiones en la praxis pastoral.

Resultados: Los estudiantes demostrarán y articularán un conocimiento orgánico, sistemático e integral del desarrollo de la Doctrina Cristiana y su aplicación en el contexto histórico y social de su ministerio pastoral.

IPS 402 La Iglesia y su Misión

Descripción: En este curso estudiaremos diversos modelos y tradiciones de la Iglesia y su misión en el mundo, desde el Nuevo Testamento hasta el Concilio Vaticano II, así como las reflexiones y praxes pastorales postconciliares, particularmente en Las Américas.

Resultados: Los estudiantes articularán una visión integral, orgánica y crítica de los distintos modelos de Iglesia y su misión a lo largo de la historia, a fin de identificar los retos y oportunidades de sus propias comunidades eclesiales y su acción pastoral en el contexto socio-económico y cultural del mundo contemporáneo.

IPS 541 Liturgia y Sacramentos

Descripción: En este curso estudiaremos los orígenes bíblicos, teológicos, religiosos y culturales de la liturgia de los sacramentos en las comunidades eclesiales a lo largo de la historia.

Resultados: Los estudiantes desarrollarán la habilidad de articular la teología sacramental y litúrgica de los sacramentos, y así capacitarlos para que respondan al significado y celebración de los sacramentos en su contexto histórico y cultural contemporáneo.

IPS 553 Teología Moral y Ética Cristiana

Descripción: Los estudiantes se familiarizarán con la tradición de la moral católica, así como también con diferentes metodologías contemporáneas sobre ética. Daremos particular atención a la historia de la ética, sus métodos, la función de la Escritura en el razonamiento moral, y en las enseñanzas de la Doctrina Social de la Iglesia.

Resultados: Los estudiantes serán capaces de articular la historia y las categorías centrales en la teología moral Católica para analizar diversas metodologías contemporáneas en teología ética.

IPS 555 La Persona Humana y el Desarrollo Psicológico
Descripción: Los seres humanos son creados para crecer y madurar plenamente. Cada fase de la vida conlleva agendas psicológicas y espirituales particulares. Si bien cada persona es única, la historia de nuestro desarrollo desde el nacimiento hasta la muerte es también nuestra historia humana universal con variaciones particulares, definidas y moldeadas por el género y las diferencias culturales.

Resultados: Los estudiantes explorarán las diferencias del desarrollo humano, así como las características y cualidades confiables para el ministerio de las personas a lo largo de los ciclos de la vida.

Descripciónes de los 3 Cursos Especializadas (3 Créditos cada Clase)
Administración y emprendimiento en contexto pastoral
Descripción: En este curso se hará un repaso general sobre las habilidades fundamentales de administración en el contexto pastoral: financiación y manejo de proyectos, recaudación de fondos, elaboración de presupuestos, políticas de salvaguardia, formación de equipos, manejo de voluntarios, y coordinación de reuniones. Todo desde una perspectiva de emprendimiento que aborde las necesidades de proyectos e iniciativas pastorales.

Resultados: El estudiante demostrará la capacidad de planificar, evaluar, estructurar, coordinar y ejecutar proyectos o iniciativas pastorales con habilidades de planificación estratégica y análisis efectivo en la toma de decisiones.

El ministerio con jóvenes y espiritualidad hoy
Descripción: Los estudiantes explorarán las bases para el ministerio con los jóvenes, incluyendo los componentes esenciales para acompañar a los jóvenes y adultos jóvenes en el desarrollo de su identidad como discípulos misioneros. Exploraremos la espiritualidad ignaciana como una herramienta para responder a las preguntas y desafíos recurrentes que dan forma a la búsqueda de los jóvenes de sentido y propósito en la vida.

Resultados: Los estudiantes podrán articular y evaluar las diferencias entre Youth Ministry, Young Adult Ministry y Pastoral Juvenil Hispana en un panorama actual de multiculturalismo, creciente secularización y desafiliación entre jóvenes, jóvenes adultos, y jóvenes hispanos/latinos hoy, así como encontrar nuevas formas de ayudar a los jóvenes que están en una jornada espiritual a través del discernimiento y el acompañamiento.

Ética Social Católica & Migración
Descripción: Nuestro trabajo pastoral con los y las migrantes requiere de una teología y ética de la solidaridad que dote de mayor sentido al Evangelio y a la experiencia eclesial a través de una cultura del encuentro. En este curso, los y las estudiantes recibirán la oportunidad de:

1. Discernir los “signos de los tiempos” escuchando y poniendo palabras a los sufrimientos, realidades y esperanzas del Pueblo Migrante;
2. Recibir las herramientas para la reflexión personal y comunitaria sobre el fenómeno de la migración e iluminar esta realidad desde una ética de solidaridad expresada en actos de caridad (acogiendo al extranjero) y la justicia social (creando cambios sistemáticos);
3. Tomar conciencia de la condición psicológica, espiritual y social que hace del sujeto migrante una persona extremadamente vulnerable y darse cuenta de que nuestra salvación depende del trato que le hayamos dado (Mt 25,40);
4. Tomar conciencia de nuestra condición de seres sociales y del llamado universal al amor a través de “*La Teología del Buen Samaritano*” como una de las enseñanzas claves de la nueva encíclica del Papa Francisco, *Fratelli Tutti*, la cual implica crear cambios sistemáticos en las estructuras para facilitar el restablecimiento legal e institucional de los migrantes;
5. Reflexionar sobre la importancia y centralidad del acompañamiento como el estilo propio de Jesús y la característica esencial de sus distintos aspectos y retos incluidos en el acto pastoral de acompañar a personas migrantes.

Nota: El curso incorporará una religiosidad popular al igual que las experiencias personales de los y las estudiantes con el fin de acompañar los temas claves que se encuentran en el centro mismo de nuestra Enseñanza Social Católica.

Resultados: Los estudiantes se familiarizarán con la ética social en la Tradición Católica, incluyendo los principios claves establecidos en documentos modernos de los siglos XX y XXI. Los y las estudiantes serán capaces de profundizar en su llamado bautismal de salir al encuentro de los y las migrantes, acompañarles y cuestionar las estructuras que les impiden su desarrollo espiritual y social desde un plan pastoral que incorpore herramientas metodológicas, prácticas y pastorales con las cuales puedan organizar su ministerio de una manera sistemática y efectiva.

Descripción de "Contextual Education" (Una Secuencia de 3 Clases)
El desarrollo contextual es donde el ministerio del estudiante integra los cuatro aspectos del programa MAPS. Es el lugar para integrar el aprendizaje teológico, ministerial, personal y espiritual en el contexto de su ministerio pastoral cotidiano. En este contexto el estudiante desarrolla su capacitación como agente de pastoral en el lugar donde ejerce su ministerio por medio de la supervisión y la educación semanal facilitadas por profesores y compañeros.

Este desarrollo contextual puede estar directamente relacionado con el trabajo que el estudiante está realizando o puede ser seleccionado de entre lugares que el Instituto de Estudios de Pastoral ha cultivado en los Estado Unidos de Norteamérica, Latinoamérica, España, u otros lugares del mundo.

1. IPS 578 Preparación de Educación Contextual (*0 créditos, precio del curso $125.00*)
2. IPS 579 Introducción a la Educación Contextual (*0 créditos, precio del curso $250.00*)
3. IPS 580 Educación Contextual (*3 horas crédito*)

La Educación Contextual es la experiencia pastoral del estudiante durante su educación que está directamente relacionada con sus estudios pastorales. Al mismo tiempo, el estudiante perfecciona sus aptitudes y teología pastoral, y su identidad vocacional. La Educación Contextual consiste de 10-15 horas a la semanas de ministerio pastoral, reflexión semanal con un supervisor y con compañeros en el lugar donde trabajan. Cada semana los estudiantes revisan los objetivos de aprendizaje, preparan y reflexionan sobre los eventos pastorales, y evalúan su aprendizaje y *praxis* con sus compañeros.

Projecto de Integración (*cero horas crédito, precio del curso $500*)

En el último año, los estudiantes completan este programa con el Proyecto de Integración IPS 593.

Este es un ensayo de 35-50 páginas en el que los estudiantes demuestran la integración de los cursos con algún asunto relevante en su contexto de trabajo pastoral. Además, en este proyecto el estudiante demuestra su capacidad de investigación en cuestiones de fe y vida, y su habilidad para integrar cuestiones contemporáneas con la tradición de la Iglesia.

English

Curriculum_Guide (https://www.luc.edu/media/lucedu/ips/pdfs/Bilingual%20MAPS-1.pdf)

- 12 courses; 36 credit hours | 75% of core and speciality classes will be delivered in Spanish, 25% in English
  - 8 core courses
  - 3 specialty courses (including Administration and Management for Ministry in Intercultural Communities, Christian Spiritual Praxis in Youth Ministry, and Catholic Social Ethics and Migration)
  - Contextual Education course (English)
  - Integration Project (English or Spanish)

Description of the 8 Core Courses (3 Credits per Class)

IPS 570 Introduction to Theology and Ministry (3 Credit Hours)
IPS 570: Introduction to Theology and Ministry is recommended as the first course in the program. This course explores the interplay among traditions of theology and ministry, the history of ministry and the challenge of relating foundational traditions to the present array of ministries. The course allows you to become more certain and deliberate about the skills that constitute ministerial practice and ministerial theology.
Outcomes:
Students clarify and articulate a theory of ministry and method of ministry from which to operate; The heart of the course is development of self-confidence ministerial capacities as a professional

IPS 417 Introduction to the Old Testament (3 Credit Hours)
This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship.
Outcomes:
Understand key theological points, recognize historical realities that gave rise to texts, recognize the theological, sociological, historical critiques expressed by texts, and demonstrate awareness of modern approaches to understanding texts

IPS 416 Introduction to New Testament (3 Credit Hours)
This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.
Outcomes:
Gain insight into the socio-economic-political context, discover and utilize the tools of historical studies and textual criticism and to translate New Testament faith into their own contexts

IPS 531 Christian Doctrine (3 Credit Hours)
The course is divided into two sections: (1) the historical evolution of Christian doctrine and its theological interpretations through Vatican II; (2) the development of doctrine in the post-Vatican II era, including an in-depth study of Karl Rahner's fundamental theology and contemporary theological issues with applications to present-day pastoral ministry.
Course equivalencies: X - IPS 531 / BEHL 502
Outcomes:
Students will discover the tools of historical theology and correlation; revising theological understanding in changed historical-cultural contexts; and the hermeneutical task of translating their meaning into present contexts

IPS 402 Church and Mission (1-3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II to contemporary times

IPS 541 Liturgy and Christian Sacraments (3 Credit Hours)
The Sacraments express our faith bringing us into an encounter with God's grace, forming us into the image of Christ. This course explores the theological, religious, and cultural origins of the liturgy and the sacraments as they have developed in response to the needs of the Church communities throughout time.
Outcomes:
Students will develop the ability to articulate a sacramental theology and understanding of the sacraments that enables them to address the meaning of the sacraments in connection to contemporary culture

IPS 553 Moral Theology and Christian Ethics (3 Credit Hours)
This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching. To articulate the history and central categories in Catholic moral theology; to analyze a variety of contemporary methodologies in theological ethics.

IPS 555 Human Person and Psychological Development (3 Credit Hours)
Human beings are created to grow and mature into their full humanity. Every phase of life carries particular psychological and spiritual agendas. While each person is unique, our developmental story from birth to death is also our universal human story with particular variations, sharpened around gender and cultural differences.
Outcomes:
Exploration of developmental differences; Discovery of reliable markers for ministry to persons throughout the life cycle

Description of the 3 Specialty Courses (3 Credit Hours per Class)

Administration and Entrepreneurship in a Pastoral Context

Description: This course will provide an overview of fundamental management skills in the pastoral context: project financing and management, fundraising, budgeting, safeguard policies, team building, volunteer management, and coordination of meetings. All from an entrepreneurial perspective that addresses the need for projects and pastoral initiatives.

Outcomes: The student will demonstrate the ability to plan, assess, structure, coordinate and execute pastoral projects or initiatives with strategic planning skills, and effective analysis in decision making.

Ministry with Young People and Spirituality Today
Description: Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. We will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.

Outcomes: Students will be able to articulate and assess the differences between Youth Ministry, Young Adult Ministry and Pastoral Juvenil in a current landscape of multiculturalism, increasing secularization, and disaffiliation among youth, young adults, and jóvenes today as well as to find new ways to help young people who are on a spiritual journey through discernment and accompaniment.

Catholic Social Ethics & Migration
Description: Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to:

1. Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants;
2. Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change);
3. To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40);
4. To become aware of our status as social beings and the universal call to love through "*The Theology of the Good Samaritan*" as one of the key teachings of Pope Francis' new encyclical, *Fratelli Tutti*, which implies working towards creating change in structures to make resettlement easier legally and institutionally;
5. Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants.

Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.

Outcomes: Students will become familiar with social ethics in the Catholic tradition, including the key principles set out in modern documents of the 20th and 21st centuries. Students will be able to deepen their baptismal call to encounter migrants, accompany them and question the structures that prevent them of their spiritual and social development through a pastoral plan that incorporates methodological, practical and pastoral tools with which they can organize their ministry in a systematic and effective way.

Description of "Contextual Education" (*A 3-course sequence*)
Contextual Education is where the student's ministry integrates the four aspects of the MAPS program. It is the place to combine theological, ministerial, personal and spiritual learning in the context of your daily pastoral ministry. In this context, the student develops training as a pastoral agent in the place where they exercise ministry through supervision and weekly education provided by teachers and colleagues.

This contextual development can be directly related to the work that the student is doing or can be selected from places that the Institute for Pastoral Studies has cultivated in the United States of America, Latin America, Spain, or other places in the world.

1. IPS 578 Contextual Education Preparation (0 credits, course fee of $125.00)
2. IPS 579 Contextual Education Introduction (0 credits, course fee of $250.00)
3. IPS 580 Contextual Education I (3 credit hours, standard tuition rate)

Contextual Education is the student's pastoral experience during their education that is directly related to pastoral studies. At the same time, the student perfects aptitudes and pastoral theology, as well as vocational identity. Contextual Education consists of 10-15 hours a week of pastoral ministry, weekly reflection with a supervisor and with colleagues in the place where they work. Each week students review learning objectives, prepare and reflect on pastoral events, and evaluate their learning and praxis with their peers.

Integration Project (*0 credit hours, $500.00 course fee*)
In the final year, students complete their program with the IPS 593 Integration Project.

This is a 35-50 page essay in which students demonstrate the integration of courses with some relevant issue in their pastoral work context. In addition, in this project the student demonstrate the ability to investigate matters of faith and life, and capacity to integrate contemporary issues with the tradition of the Church.

Learning Outcomes

Resultados | Outcomes

Al completar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes serán capaces de demostrar:

- Un conocimiento profundo de las fuentes y recursos teológicos, ministeriales, e interpersonales para el servicio efectivo en y para la iglesia y el mundo en posiciones de formación, investigación, o liderazgo eclesial.
- Capacidad para entender y analizar los contextos sociales y culturales en los que el graduado estará llamado a servir, siempre con una mirada y compromiso con los marginados, excluidos, y para luchar para erradicar las estructuras y sistemas de opresión.
- Habilidad para articular retóricamente y por escrito temas teológicos y pastorales concretos de relevancia para audiencias y comunidades cultural y teológicamente diversas.
- Su compromiso y habilidad personal para nutrirse de los adelantos académicos sobre espiritualidad, teología pastoral y psicología para optimizar sus contribuciones pastorales y académicas en sus contextos particulares.

Upon completing their Master of Arts in Pastoral Studies (MAPS) students will be able to demonstrate:

- A deep understanding of theological, ministerial, and interpersonal sources and resources for effective service in and for the church and the world in positions of formation, research, or ecclesial leadership.
- Ability to understand and analyze the social and cultural contexts in which the graduate will be called to serve, always with a view and

commitment to the marginalized, excluded, and to fight to eradicate the structures and systems of oppression.
- Ability to articulate rhetorically and in writing concrete theological and pastoral issues of relevance to culturally and theologically diverse audiences and communities.
- Commitment and personal ability to nurture academic advances in spirituality, pastoral theology, and psychology to optimize his pastoral and academic contributions in his particular contexts.

Pastoral Counseling (MA)

Pastoral counseling at IPS is understood as professional therapeutic ministry. This ministry is pursued with a vision of the human person that includes insights from the human sciences as well as religious and spiritual dimensions of life. Often, but not always, pastoral counseling takes place in a setting that reflects a spiritually-oriented environment. The purpose of the M.A. in pastoral counseling is to prepare caregivers and counselors for this work.

This degree program prepares pastoral clinicians to provide therapeutic services in faith-based contexts. A multidisciplinary curriculum and peer learning groups are among the distinguishing characteristics of this degree.

Students in this program will find an understanding of pastoral counseling incorporating both the best of psychological theory and the riches of contemporary theology. They will find educational and spiritual approaches that combine both theory and practice. They will discover a vision of the counselor that reflects both individual and relational work, supportive and intensive therapies, psychological competence and theological congruence. And they will find a methodology that is consistently committed to the achievement of personal and professional integration.

In order to meet the current licensure requirements of the state of Illinois (LPC as a base for moving toward LCPC), and to respond to developing nationwide trends toward interstate licensure portability, while continuing to provide the integrative pastoral focus of Loyola's MA Pastoral Counseling degree, the degree has moved to a three year, 60-hour design.

- LPC = Licensed Professional Counselor
- LCPC = Licensed Clinical Professional Counselor

The Master's in Pastoral Counseling program can also be completed half time over four or five years. The half time student's curriculum is determined with their advisor.

The Master's in Pastoral Counseling **can be completed entirely online.** Students seeking to complete the degree fully online and in three years (as a full-time student) must enroll and begin in a Fall semester.

INTERNATIONAL STUDENTS who will study in person in Chicago must enroll and beginning in a Fall semester.

A diverse number of internship sites are available from non-profits, governmental organizations, schools, counseling, mental health and faith-based sites. Students apply for these internships and are selected by the sites. Students may submit a site of their own choosing, but it must be approved by IPS.

Below is a sampling of some of the organizations where students in the MA in Pastoral Counseling program have recently completed their internships:

- Access Community Health Network
- Alexian Brothers Interfaith Parish Support Services
- Asian Human Services
- Chicago Lighthouse for People who are Blind or Visually-Impaired
- Christ the King Jesuit Preparatory School
- Claret Center
- Haymarket
- Heartland Alliance Marjorie Kovler Center
- Am. Able Family Center
- Isaiah Counseling Center
- Life Works Psychotherapy Center, LLC
- Lorene Replogle Counseling Center
- Loyola University Medical Center
- Loyola University Ministry
- LUHS Department of Psychiatry
- Marjorie Kovler Center
- Methodist Medical Center
- Midwest Palliative
- North Park University Counseling Center
- North Shore Hospice
- Providence Family Services
- Rainbow Hospice
- Rape Victim Advocates
- St. Anthony Home
- Turning Point Behavioral Health Care
- United Stand Family Counseling Center
- Vietnamese Association of Illinois
- Wheaton Youth Outreach

To learn more about the master's degree in pastoral counseling, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

To learn more about state and international authorization of programs, please refer to our State and International Authorization page (https://www.luc.edu/ool/services/stateandinternationalauthorization/). To learn more about the accreditation of Loyola University Chicago and its schools, as well as information about professional licensure, visit our Accreditation page (https://www.luc.edu/accreditation/index.shtml/).

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional

MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

Master of Arts in Pastoral Counseling

In order to meet the current licensure requirements of the state of Illinois (LPC as a base for moving toward LCPC), and to respond to developing nationwide trends toward interstate licensure portability, while continuing to provide the integrative pastoral focus of Loyola's MA Pastoral Counseling degree, the degree has moved to a three year, 60 hour design.

Half-time students will tailor their course selection with their advisor.

- LPC = Licensed Professional Counselor
- LCPC = Licensed Clinical Professional Counselor

Learning Outcomes

Master of Arts in Pastoral Counseling

By completing the Master of Arts in Pastoral Counseling, students will be able to demonstrate:

- The ability to pastorally and clinically engage human psychological, relational, and contextual distress in therapeutic ways. (Cultural Context)
- The ability to interpret, engage, and expand psycho-spiritual meaning making in relation to the pastoral legacy of faith communities. (Theology /Spirituality/Religious Heritage)
- The ability to offer competent therapeutic services in secular and/or faith-based contexts based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess and diagnose personal and relational life conditions that contribute to human distress and break

down, with the skills needed to discern and effectively pastoral engage the identified dilemmas. (Skills/Ministerial Leadership)

Pastoral Counseling Certificate

Available Only On-Site.

To learn more about the Certificate in Pastoral Counseling, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Curriculum

This advanced graduate certificate program prepares counselors to practice in faith-based settings. A master's degree in counseling or divinity/ministry is a prerequisite for this certificate. Five courses comprise this certificate program courses, chosen in consultation with the academic advisor based on the student's background.

Code	Title	Hours
Five (5) courses must be chosen from the following list:		*15*
IPS 472	Pastoral Counseling in an Intercultural Context

Total Hours		**15**

Learning Outcomes

Pastoral Counseling prepares counselors to practice in faith-based settings.

Pastoral Leadership Certificate

The Graduate Certificate in Pastoral Leadership provides students with a foundational and broad understanding of pastoral care, Christian theology, and scripture. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

The Graduate Certificate in Pastoral Leadership provides a flexible course of study for

- Persons discerning a call to pastoral ministry and who want to do so intentionally and in community
- Those who seek to explore a new career path in ministry
- Ministers seeking to supplement their education, expanding their knowledge and skill base
- Volunteers or part-time professionals who seek to advance in their ministry

Curriculum

The Graduate Certificate in Pastoral Leadership requires completion of five courses (15 credit hours). One course is required (IPS 564 Foundations of Pastoral Care) and four courses may be chosen from among a number of electives. One of those must be a theology elective and one of them must be a scripture elective. Students will work with their academic advisor to choose elective courses that best suit their background, experience, interests, and goals.

The Institute of Pastoral Studies offers a large number courses online every year, including the required course for this certificate. It is possible, therefore, to complete this certificate entirely online depending on which elective courses a student chooses within the options that satisfy the curricular requirements.

Click here to download the Curriculum Planning Worksheet for the Certificate in Pastoral Leadership (https://www.luc.edu/media/lucedu/ips/pdfs/Certificate%20in%20Pastoral%20Leadership.pdf)

To learn more about the Certificate in Pastoral Leadership, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Learning Outcomes

Students gain a foundational and broad base of knowledge and skills necessary for pastoral ministry, defined as a ministry of care through accompaniment and support focused on the emotional, spiritual, and social well-being of the person.

Pastoral Studies (MA)

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

Courses are available online, in person at Loyola's downtown Chicago campus, or in Rome, Italy. Students who enroll in the master's degree can study under the general MAPS program or focus their studies in one of

four areas of concentration: church management, digital communication, health care chaplaincy, and religious education.

In addition, for the MAPS concentration in Healthcare Chaplaincy:

- An understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- A readiness to complete successfully the process for certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC).

In addition, for the MAPS concentration in Religious Education:

- The ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

In addition, for the MAPS concentration in Church Management:

- The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change.

In addition, for the MAPS concentration in Digital Communications:

- An understanding and integration of best practices in communications using digital media into their ministerial context and work.

Program Concentrations

- MAPS - Church Management (p. 1565)
- MAPS - Digital Communication (p. 1566)
- MAPS - Health Care Chaplaincy (p. 1566)
- MAPS - Religious Education (p. 1567)

To learn more about the master's degree in pastoral studies, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

To learn more about state and international authorization of programs, please refer to our State and International Authorization page (https://www.luc.edu/ool/services/stateandinternationalauthorization/). Curriculum

Master of Arts in Pastoral Studies

This traditional curriculum, designed to provide a solid first-degree experience in education for ministry includes courses in scripture, pastoral theology, and ministerial skills, as well as numerous concentrations, including one in Healthcare Ministries. This MA in Pastoral Studies forms the basis for the MDiv degree. Students have the option at any point during their degree program or upon completion of their degree program to apply for the MDiv degree, and all of these courses will count toward their MDiv degree.

36 semester credit hours: 12 course

- 8 core theology courses—24 credit hours
- 3 elective ministry area courses—9 credit hours
- Contextual education courses -3 credit hours

Intellectual Development

Intellectual development seeks to expand the pastoral minister's understanding and appreciation of faith. It consists in theological studies, and draws also upon a wide range of other disciplines: philosophy, the arts, psychology, sociology, culture, and language studies.

Ministerial Development

Ministerial development cultivates the knowledge, attitudes and skills that directly pertain to effective functioning in the ministry setting, or to the pastoral administration that supports direct ministry and draws also upon a wide range of other disciplines: counseling, medical ethics, business administration, leadership, organizational development, and law.

Three courses—9 hours

Chosen from course offerings to address elements in pastoral ministry competencies in areas such as:

- Promoting or organizing action on behalf of justice
- Youth ministry
- Pastoral presence and care for the sick and the dying
- Parish ministry
- Health ministries

Contextual Development

The contextual development is where the ministry student brings together all four developmental aspects of the degree program. It is the place to integrate the theological, ministerial, personal and spiritual learnings of this degree in the context of the lived everyday ministry setting. Here, in a structured program that combines on-site mentoring and supervision located in actual ministry practice with peer and faculty weekly reflection sessions, the student achieves and realizes that sense of professional and personal competency as minister.

These field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated. Because of the ability to operate in a blended and on-line teaching manner, these placements can be located in the resource rich area of Chicago or other settings around the nation or the world.

Code	Title	Hours
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3

Contextual Education is the experience during the student's ministerial education that directly engages pastoral practice in the context of ministerial studies. Simultaneously, the student refines pastoral skills, ministerial theology and vocational identity. Contextual Education consists of 10-15 hours per week of ministry at a site, reflection with a site supervisor and as well as a weekly peer reflection seminar on campus. In the weekly seminar students review learning contracts, prepare and reflect on pastoral events, and exercise peer evaluations.

Human Development

Human development seeks to enhance the pastoral minister's human qualities and character, fostering a healthy and well-balanced personality, for the sake of both human growth and ministerial service.

Spiritual Development

Spiritual development aims to arouse and animate true hunger for holiness, desire for union with God through Christ in the Spirit, daily growing love of God and neighbor in life and ministry, and the practices of prayer and spirituality that foster these attitudes and dispositions.

Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

MA in Pastoral Studies - Online Curriculum

Loyola University Chicago's Institute of Pastoral Studies (IPS) offers courses leading toward the M.A. in Pastoral Studies via online distance-learning. Students can take all or part of the 36-hour master's degree program through online courses.

Founded in 1964, IPS is one of the first and most prestigious education-for-ministry programs in the nation. It is one of the few university-based programs that offers an online curriculum identical to its on-campus courses. Students are able to take as many as three courses online each semester. The courses are also available for non-degree seeking student. While students can complete the entire degree completely online, students always have the option of also taking courses in Chicago, if they so choose. These on-campus courses are offered daytime and evenings during the week, on weekends, and through intensive courses during the summer.

The structured online curriculum, designed to provide a solid first-degree experience in education for ministry, includes courses in scripture, pastoral theology, and ministerial skills, with possible concentrations in Church Management, Healthcare Ministries, and Religious Education. For more information on any of these concentrations, click here (p. 1563). Required courses for the Masters in Pastoral Studies degree include:

Code	Title	Hours
IPS 570	Introduction to Theology and Ministry	3
IPS 402	Church and Mission	1-3
IPS 417	Introduction to the Old Testament	3
IPS 416	Introduction to New Testament	3
IPS 530	Clinical Pastoral Care Registration	0
IPS 541	Liturgy and Christian Sacraments	3
IPS 553	Moral Theology and Christian Ethics	3
IPS 555	Human Person and Psychological Development	3

Learning Outcomes

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Church Management (MA)

Available Online. The MA in Pastoral Studies is a 36 hour degree that includes eight core courses, three electives (offered by the Quinlan School of Business), a three credit hour Contextual Education course, and a Final Integration Project. The Church Management concentration can be completed online.

This concentration emerges from reflection on the gap in skill sets among the leaders of many churches today, Catholic and Protestant. Members of church staff, comprised increasingly of laypersons with degrees in pastoral ministry, education, counseling, and theology, find themselves engaging in activities related to budgeting, project management, human resources, organizational development and change, and more. There is a need for parish leaders and pastoral ministers to have the education, training, and skills associated with these areas.

The MBA curriculum at the Quinlan School of Business includes a set of core and non-core courses. The core graduate courses at Quinlan are designed for those with no business experience. Students who already have a business degree, however, or who have taken business courses in the past (within the last 5-10 years) and possess significant business experience should be advised to skip the core courses and go directly to more specific and specialized courses in consultation with their academic advisor and the Associate Dean for Programs at the QSB.

The background and initial plan of each student should be summarized and sent to Quinlan's associate dean for programs for discussion and approval prior to registering for classes.

Related Programs

Certificate

- Church Management Certificate (p. 1543)

To learn more about the online church management program, please visit our request for information form, attend an upcoming information session, or schedule an appointment (https://gpem.luc.edu/portal/ipsappts/).

Curriculum

- Eight IPS core courses of the MAPS - Church Management concentration (24 credit hours) (https://www.luc.edu/ips/degrees/pastoral-studies/ipscorecurriculum/)
- Three graduate selectives from the Quinlan School of Business (9 credit hours) (https://www.luc.edu/ips/degrees/pastoral-studies/maps-churchmanagementconcentration/courses/)
- Contextual Education courses (3 credit hours) (p. 1564)
- Final Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710)

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Digital Communication (MA)

Our contemporary world is very much driven by communication through electronic media channels and social media. In order to reach current and future generations of youth and young adults, it is critical that pastoral leaders be skilled in the use of digital media for evangelization and outreach.

The Master of Arts in Pastoral Studies (MAPS) degree offers a concentration in Digital Communication. This degree concentration will allow students at Loyola's Institute of Pastoral Studies to hone their communication skills and learn best practices for using digital media in the dissemination of parish/congregation/diocese news, events, and the message of the Gospel in order to reach a wider audience through social media, the Web and video, in addition to conventional print media. The Master of Arts in Pastoral Studies - Digital Communication degree requires 36 credit hours.

Curriculum

MAPS - Digital Communication Concentration Curriculum

- Eight IPS core courses of the MAPS Digital Communication Concentration (https://www.luc.edu/ips/degrees/pastoral-studies/digital-communication/curriculum/)
- Three Digital Communication electives from the School of Communication (https://www.luc.edu/ips/degrees/pastoral-studies/digital-communication/courses/)
- Contextual Education courses (3 credit hours) (p. 1564)
- Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710)

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA)

The IPS Master of Arts in Pastoral Studies (MAPS) offers a unique Health Care Chaplaincy concentration to prepare students for the entire process to be certified as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC).

This 36-credit hour degree program consists of the eight Core Courses of the MAPS degree, three health-care related electives, four units of CPE, two workshops, and the Health Care Integration Project.

All components of the MAPS—Health Care Chaplaincy concentration, except for CPE, can be completed online or on-campus. Some courses are also available in the summer through the IPS Rome program.

Curriculum

MAPS - Health Care Chaplaincy Concentration Curriculum

Eight Core MAPS Courses

Code	Title	Hours
IPS 570	Introduction to Theology and Ministry	3
IPS 416	Introduction to New Testament	3
IPS 417	Introduction to the Old Testament	3
IPS 402	Church and Mission	1-3
IPS 531	Christian Doctrine	3
IPS 541	Liturgy and Christian Sacraments	3
IPS 553	Moral Theology and Christian Ethics	3
IPS 555	Human Person and Psychological Development	3

Three Health Care Related Courses

- IPS 564 Foundations of Pastoral Care
- IPS 404 Theologies of Suffering

- A variety of health care ethics courses offered through the IPS and Loyola's Neiswanger Institute for Bioethics Institute: http://hsd.luc.edu/bioethics/

Four Units of CPE

Based on the requirements for Board Certification as a chaplain, the MAPS—HCC concentration requires students to complete four units of Clinical Pastoral Education (CPE). More information on CPE can be found here (https://www.luc.edu/ips/resources/cpe/).

Two Workshops

The NACC also recommends that those preparing for chaplaincy complete at least two workshops related to issues in health care.

The Health Care Integration Project

The final program requirement is IPS 493 Health Care Integration Project Portfolio. In IPS 493 Health Care Integration Project Portfolio, students are mentored in the process of preparing the materials required to sit for board certification.

More information about the vocation of chaplaincy can be found here (https://www.luc.edu/ips/resources/chaplaincy/)**.**

Students interested in becoming Board Certified Chaplains with the Association of Professional Chaplains (APC) can do so by pursuing the Master of Divinity (MDiv) (p. 1544) degree and choosing electives aimed at meeting APC competencies. The APC certifies Protestant chaplains as well as chaplains in an array of religious traditions.

To learn more about the Health Care Chaplaincy concentration, please fill out our request for information form or attend an information session.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Religious Education (MA)

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program offers a concentration in Religious Education. This program develops the practices of thinking, acting, and teaching necessary for service in today's culturally, generationally, and theologically diverse church.

Students in this concentration cultivate the practice of considering every problem and situation through theological lenses, so that the outcome or solution is infused with the principles of faith. These habits prepare students of the Religious Education concentration to engage, catechize, and educate all age groups in a variety of contexts.

For more information about the Religious Education concentration, fill out our request for information form or attend an information session.

Curriculum

The curriculum includes the eight core courses (p. 1564) required for the MAPS degree plus two education courses (IPS 485 Religious Education, Evangelization & Cultures and IPS 486 Principles of Religious Education), one elective course, one contextual education practicum (p. 1564), and a final Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Religious Education Certificate

Available Online. This graduate certificate program prepares individuals for administrating religious education programs or teaching religion in schools and parishes.

To learn more about the Certificate in Religious Education, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Curriculum

A bachelor's degree is required for entry into this five course program.

- Two courses in Religious Education
- Three courses from the Master of Arts in Pastoral Studies core

All of the courses can be completed online. The Religious Education certificate can be applied to the Master of Arts in Pastoral Studies degree.

Learning Outcomes

Religious Education

The ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

Social Justice (MA)

As disparities along ethic/racial, economic, gender and religious lines gain prominence in the national conversation, there is a growing need for trained "change agents" to carry out the work of community development, social justice and human rights advocacy.

Faith-based community service programs, service immersion trips, and social justice projects attract high-minded "change agents" of great generosity and courage who want to serve economically disadvantaged communities, underserved and underrepresented populations, and people whose human dignity is under assault by social arrangements and structures. The post-Vatican II emphasis on a Church that sees working for justice as constitutive of the Christian life and that proposes an "option for the poor" as a pastoral standard, has spawned a growing number of talented and educated young adults who want to integrate service, social justice, and advocacy into their life patterns and career choices. With Pope Francis, the social justice movement is gaining even more momentum.

This degree program is designed to serve these change agents, offering a solid grounding in spiritual and theological foundations for this work, information about the key social justice issues today, the skills and told of assessment and analysis in addressing these issues, best-practice strategies for effective work in advocacy and community development, contextual education at sites where social justice work is exemplary, and the practical tools of successful leadership in addressing social justice issues.

To learn more about the master's degree in social justice, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

The Master of Arts in Social Justice provides graduates with a solid understanding of the theoretical, spiritual, and theological foundations for the work of social justice. Students gain knowledge and develop an understanding of key social justice issues today, skills and tools for assessment and analysis in addressing these issues, best-practice strategies for effective work in advocacy and community development, and contextual education at sites where work for social justice is exemplary.

Curriculum

The MA in Social Justice is a 36 credit hour degree that requires 8 core courses and 3 elective courses along with a sequence of Contextual Education courses (3 credit hours) and a Final Integration Project.

The curriculum consists of a 12-course, 36 credit hour program. Of these courses, nine are required.

Code	Title	Hours
Core Courses		
IPS 400	Introduction to Graduate and Professional Writing [1]	0
IPS 610	Foundations of Social Justice	3
IPS 532	Social Context of Ministry	3
IPS 551	Social Ethics in the Catholic Tradition	3
IPS 615	Liberation Theology	3
IPS 620	Diversity and Equity	3
IPS 625	Social Ethics: Politics and Global Economics	3

IPS 660	Leadership in Social Justice Organizations	3
Electives		**9**
Contextual Education		
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3
Integration Project		
IPS 593	Integration Project [2]	0
Total Hours		**36**

[1] If required at the time of admission
[2] MA in Social Justice students complete the program with IPS 593 Integration Project, the zero-credit Integration Project, in their final year.

Learn More about the Integration Project (https://www.luc.edu/ips/degrees/maincounselingforministry/curriculum/integrationproject/)

Electives (3 three-credit courses, or 9 credit hours) are chosen in consultation with the academic advisor. Electives may be taken in IPS or in many of the other schools, colleges, academic centers and institutes at Loyola University Chicago. See your academic advisor for more details.

The following represents a list of courses across the university that would be appropriate for students in the MA in Social Justice. It is meant to be suggestive rather than exhaustive. This list is to make students aware of “sub-disciplines” within social justice as a way of exploring different career options. This list also emphasizes the interdisciplinary nature of the degree and the career field. In this way, students might take multiple electives within a given field.

Competency Area: International Development

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

By completing the Master of Arts in Social Justice, students will be able to demonstrate:

- An in-depth understanding of philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.
- A greater awareness and understanding of competing forces at the heart of conflicts over justice in various contexts and one's own location in relation to them. (poverty, culture, race, ethnicity, gender, sexual orientation, power, inequality, religion)
- A spiritual maturity that drives one to fully and productively engage in diverse contexts experiencing oppression, marginalization, deprivation and conflict.
- The primary skills of deep listening, dialogue, socio-cultural assessment and analysis, adaptive leadership, conflict transformation, relationship building, and have basic facility in the secondary skills of community organizing and development, advocacy for policy change, and practical knowledge for organizational management and social entrepreneurship.
- Substantive development of key business skills in their chosen areas of interest, including such areas as marketing, management, operation, and accounting.
- An understanding of how these business skills can be put to work critically and constructively to support the missions of social justice organizations.

Social Justice and Social Enterprise Certificate

The Certificate in Social Justice and Social Enterprise is a 15 credit hour graduate certificate designed for those interested in professional formation to enhance their work for social justice and in social organizations but for whom a full graduate degree may not be necessary.

This program is especially suited to those who have completed an undergraduate degree and wish to deepen their understanding of social justice and students in graduate programs who wish to add an advanced graduate certificate in social justice and social enterprise. The Certificate

is also well suited for professionals whose work in the field would be enhanced by the well-rounded theoretical and practical formation afforded by this program. For students who complete this Certificate and return to pursue the full MA in Social Justice (36 credit hours) within 8 years of graduating the credit hours applied to this Certificate will count toward the MASJ.

To learn more about the Certificate in Social Justice and Social Enterprise, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Curriculum

The Certificate in Social Justice and Social Enterprise requires students to complete five courses (15 credit hours). Two of these courses will be taken at the Institute of Pastoral Studies: IPS 610 Foundations of Social Justice and one IPS elective course. The IPS elective will be chosen from among the core courses in the social justice curriculum. Two of the required courses will be taken at the Quinlan School of Business (QSB): MGMT 485 Social Enterprise and one QSB elective course. The QSB elective will be chosen in consultation with their academic advisor. The fifth and final course required for the Certificate is an elective and can be completed at either the QSB or the IPS. This will discerned in conversation with their academic advisor and according the student's experience, context, and interests.

Code	Title	Hours
IPS 610	Foundations of Social Justice	3
IPS Elective		3
MGMT 485	Social Enterprise	3
Quinlan Graduate Elective		3
IPS or Quinlan Graduate Elective		3
Total Hours		**15**

Please Note: If the coursework is planned strategically and only online classes are chosen then this certificate may be completed entirely online. However, this may result in the certificate taking more time to complete based on available online course rotation.

Social Justice and Social Work (MA/MSW)

Recognizing that social work and social justice often inform one another and overlap in terms of content and philosophy, Loyola's School of Social Work (SSW) and Institute of Pastoral Studies (IPS) offer the MSW/MA in Social Justice.

This program is ideal for those who see a role for themselves in an organization that serves individuals and communities or advocates for social change. The MSW/MASJ stresses collaborative and community work at the mezzo and macro levels. As such, the MSW/MASJ seeks to create leaders for transformational organizations in local and global communities while also providing a solid theoretical basis for the work of change.

SOWK Elective		3

1. SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice may be taken in lieu of this course. A student cannot take both SOWK 504 and IPS 635.
2. Fulfills SOWK 653 Community Organizing and Policy Practice.
3. Fulfills IPS 620 Diversity and Equity.
4. IPS 635 Community Organizing and Community Development may be taken in lieu of this course. A student cannot take both SOWK 504 and IPS 635.
5. Must take with SWFI 530S Integrative Seminar.
6. Must take with SWFI 632S Integrative Seminar.
7. Subs for IPS 579 Contextual Education Introduction.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
IPS 610	Foundations of Social Justice	3
IPS 551	Social Ethics in the Catholic Tradition	3
SOWK 501	Assessment of Client Concerns in Context	3
SOWK 503	Practice Skills with Individuals and Families	3
	Hours	**12**
Spring		
IPS 615	Liberation Theology	3
IPS 532	Social Context of Ministry	3

IPS 580	Contextual Education I	3
IPS	General IPS Elective	3
SOWK 653	Community Organizing and Policy Practice	3
SOWK 681	Advanced Mezzo & Macro Practice	3
SWFI 633	Internship Instruction IV & Simulated Experiences	0.5
	Hours	**12.5**
	Total Hours	**70**

1. Fulfills IPS 620 Diversity and Equity
2. Fulfills SOWK 652 Organizations, Program Development, and Evaluation
3. Must take with SWFI 530S Integrative Seminar
4. Must take with SWFI 632S Integrative Seminar
5. Subs for IPS 579 Contextual Education Introduction

IPS = Institute of Pastoral Studies
SOWK and SWFI = School of Social Work

Students should plan to complete their second internship fall-spring to follow the correct sequence for Contextual Education.

Specialization & Track Options

This dual degree is only compatible with the Leadership, Mezzo, and Macro Practice (LMMP) Specialization with Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1976).

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Social Justice (MA)

By completing the Master of Arts in Social Justice, students will be able to demonstrate:

- An in-depth understanding of philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.
- A greater awareness and understanding of competing forces at the heart of conflicts over justice in various contexts and one's own location in relation to them. (poverty, culture, race, ethnicity, gender, sexual orientation, power, inequality, religion)
- A spiritual maturity that drives one to fully and productively engage in diverse contexts experiencing oppression, marginalization, deprivation and conflict.
- The primary skills of deep listening, dialogue, socio-cultural assessment and analysis, adaptive leadership, conflict transformation, relationship building, and have basic facility in the secondary skills of community organizing and development,

advocacy for policy change, and practical knowledge for organizational management and social entrepreneurship.
- Substantive development of key business skills in their chosen areas of interest, including such areas as marketing, management, operation, and accounting.
- An understanding of how these business skills can be put to work critically and constructively to support the missions of social justice organizations.

MSW Program Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Police Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are

also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Social Justice Certificate

Online Option Available[1]

The graduate certificate in Social Justice is intentionally designed in direct consultation with the "best practices" of community-based organizations. It prepares people for faith-based leadership in social advocacy, community and labor organizing, and systemic social change. The program combines theoretical and practical learning in social justice and activism.

The certificate program is specifically designed for:

1. students who have completed an undergraduate degree and wish to deepen their understanding of social justice;
2. students in graduate programs who wish to add an advanced certificate in social justice;
3. professionals whose work in the field would be enhanced by a graduate-level credential.

To learn more about the Certificate in Social Justice, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

[1] **Please Note:** If the coursework is planned strategically and only online classes are chosen, this certificate may be completed entirely online. However, this may result in the certificate taking more time to complete based on available online course rotation.

Curriculum

Five courses from the Social Justice curriculum, chosen in consultation with the advisor, make up the certificate. The Social Justice Certificate can be applied to the MA in Social Justice.

Learning Outcomes

The Social Justice certificate prepares one for faith-based leadership in social advocacy, community and labor organizing, and systemic social change

Social Justice with a Concentration in Social Enterprise (MA)

The Institute of Pastoral Studies and Quinlan School of Business partner to offer an optional concentration in Social Enterprise. With this track, students will have the opportunity to develop, in consultation with their academic advisors, course plans that will help them gain understanding and nurture business skills specific to their interests and context. Students can focus on areas such as marketing, management, leadership, operations, accounting, entrepreneurship, and more. With business knowledge and skills, graduates of the MASJ-SE program will be equipped to lead social justice organizations effectively and sustainably over time, increasing the depth and breadth of their social impact.

To learn more about the master's degree in social justice, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The MA in Social Justice is a 36 credit hour degree that requires 8 core courses (https://www.luc.edu/ips/degrees/social-justice/curriculum/) and 3 elective courses along with a sequence of Contextual Education courses (https://www.luc.edu/ips/degrees/social-justice/curriculum/) (3 credit hours) and a Final Integration Project (https://www.luc.edu/ips/degrees/social-justice/curriculum/). For the Concentration in Social Enterprise, students must take their 3 elective courses from among those comprising the MBA program at the Quinlan School Business (QSB). One of those business courses must be MGMT 485 Social Enterprise. The other two business courses will be chosen according to each student's experience, context, and goals in consultation with their academic advisor at the IPS and the Associate Dean for Graduate Programs at Quinlan School of Business.

Concentration in Social Enterprise Electives

Code	Title	Hours
MGMT 485	Social Enterprise	3
Quinlan Elective		3
Quinlan Elective		3

The list below includes relevant and ongoing graduate courses offered by QSB most appropriate to this degree concentration and available as electives. This list is illustrative, not exhaustive: students work with their academic advisor to identity and select appropriate elective courses based on their experience, context, and goals.

MASJ-SE Quinlan Courses

Code	Title	Hours
MGMT 481	Entrepreneurship	3
MGMT 480	Recognizing Entrepreneurial Opportunities	3
ACCT 400	Financial Accounting for Business Decisions	3
MGMT 472	Organizational Change & Development	3
MGMT 441	Business Ethics	3
MGMT 446	International Business Ethics	3
HRER 417	Managing and Motivating in the Workplace	3
MARK 460	Marketing Management	3
MARK 566	Integrated Media Planning	3
MARK 468	Digital Marketing	3

Learning Outcomes

With the Social Enterprise concentration students will have the opportunity to develop, in consultation with their academic advisors, course plans that will help them gain understanding and nurture business skills specific to their interests and context. The general outcome is an ability to use more effectively business means in pursuit of social justice. More specifically, students can focus on such areas as marketing, management, leadership, operations, accounting, entrepreneurship, and more. With business knowledge and skills, graduate of the MASJ-SE

program will be equipped to lead social justice organizations effectively and sustainably over time, increasing the depth and breadth of their social impact.

Spiritual Direction Certificate

Now Available Online. IPS also offers an 18-credit hour Graduate Certificate in Spiritual Direction. This certificate is suited to applicants holding a Master's degree or above in theological or ministerial studies, psychology or counseling, psychiatric social work, or health care.

Curriculum

The certificate comprises the following courses:

Code	Title	Hours
IPS 545	The Foundations of Christian Spirituality	3
IPS 501	Advanced Human Relation Skills	3
IPS 428	Introduction to Spirituality Praxis	3
IPS 429	Essentials of Spiritual Direction	3
IPS 572	Ignatian Spirituality	3
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3
Total Hours		**18**

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

Spiritual_Direction_Confirmation_Form (https://www.luc.edu/media/lucedu/ips/pdfs/Spiritual_Direction_Confirmation_Form.pdf%20FormUpdate.pdf)

Students in the Certificate in Spiritual Direction willing to learn how to direct the Spiritual Exercises must have completed the 30-day or the 30-week 19th Annotation format of the Exercises prior to beginning the Contextual Education component of their program. This requirement will be waived for those who have taken the complete Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable students of the Certificate in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained coach/mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Prof. Dan Rhodes, Faculty Coordinator of Contextual Education.

Applicants holding a Master's degree in psychology, counseling, or psychiatric social work must provide evidence of having completed prerequisite graduate level courses in biblical and foundational theology, typically a 3-credit hour course in Hebrew Scriptures (Old Testament) or New Testament, and a 3-credit hour course in systematic theology.

Applicants from the psychology or counseling fields who have not completed courses in biblical and theological foundations can do so at the IPS by taking courses such as:

Code	Title	Hours
IPS 416	Introduction to New Testament	3
IPS 417	Introduction to the Old Testament	3
IPS 531	Christian Doctrine	3

To learn more about the Certificate in Spiritual Direction, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

Learning Outcomes

Prepares those who hold Master's degrees in Theology or related fields to offer the ministry of spiritual direction. There is also an optional Ignatian Exercises track, preparing students to lead others through the Spiritual Exercises of St. Ignatius.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

CM/MH/AD Nursing (CMAN)

CMAN 403 Health Care Delivery and Organization (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Distinguish the roles, functions and responsibilities of healthcare system components (ie, delivery, financing and regulation); 2) Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access; 3) Compare the organization of multiple healthcare delivery structures to the effectiveness of meeting population health needs; 4) Analyze factors influencing trends in healthcare quality and patient safety

CMAN 407 Population Health Informatics (3 Credit Hours)
This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.
Outcomes:
1) Apply principles of health care informatics for population health; 2) Apply basic concepts of epidemiology for population health; 3) Analyze the role of population health informatics in understanding data, information, & knowledge; 4) Apply population health informatics in surveillance, interoperability and big data contexts; 5) Evaluate quality in electronic health records, mobile applications, and personal health records; 6) Identify the economic value and potential for sustainability in population health technologies

CMAN 410 Epidemiology (1 Credit Hour)
The course covers the basic principles of epidemiology including descriptive epidemiology, causation, basic epidemiologic designs and interpretation.

CMAN 417 Nursing and Health Care Administration Practicum (1-6 Credit Hours)
The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Outcomes:
1) Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings; 2) Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions, implement safety initiatives, and monitor patient outcomes; 3) Incorporate effective communication techniques to deliver evidence-based, patient-centered care; 4) Analyze and evaluate healthcare organization structure, mission, and philosophy as they relate to the standards of care, staffing and performance, development and marketing of programs and projects; 5) Evaluate the use of information technology to improve patient care outcomes and create a safe care environment; 6) Apply legal, ethical principles to the nursing role of leadership and management

CMAN 425 Advanced Quality and Safety in Health Care (3 Credit Hours)
This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the forces driving the focus on safety and quality in health care; 2) Evaluate strategies for improving safety and quality in health care; 3) Explain the influence of systems (environmental, organizational, provider, technological and task) on healthcare outcomes; 4) Analyze the role of various systems and factors in creating safe environments of care; 5) Explain the impact of just culture thinking on safety and quality improvement in health care; 6) Develop a plan for improvement of a safety and/or quality issue

CMAN 430 Leadership and Administration in Health Care (3 Credit Hours)
This course focuses on the integration of core knowledge in leadership, administration, human resources and communication in health care organizations. Special emphasis is placed on leadership styles, the roles of the leader, human resources management and communication. The course is designed to provide the student with knowledge to practice the leadership skills necessary to positively impact healthcare systems. Selected Topics May Include: Leadership theory and style and professional practice a) leader competencies b) Influencing behaviors c) Relationship management d) Culture e) Nimble flexibility f) Professional accountability g) Motivation for high performance h) Strategic leadership and tactical leadership (Administration vs management) Human resource management a) Communication b) Difficult conversations c) Conflict resolution d) Coaching e) Performance evaluation f) Onboarding Power politics a) Development and management of partnerships/relationships/networks b) Strategic negotiation c) Power.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Relate essential nurse leadership competencies for effective management in healthcare organizations; 2) Evaluate the impact of leadership styles on organizational culture and effectiveness; 3) Generate strategies to optimize human resource performance in healthcare settings; 4) Identify strategies to address interpersonal and intraorganizational conflict

CMAN 436 Advanced Practice Concepts in Community Health (2 Credit Hours)
This course provides a framework for advanced practice in a variety of specialty areas through analysis of essential concepts and methodologies.

CMAN 445 Health Care Outcomes (3 Credit Hours)
This course focuses on the theory and methods to measure and evaluate healthcare outcomes. Concepts of population health will guide the comparison and analysis of health outcomes and measures. Current political, legal, regulatory, and ethical issues will be explored as these relate to health outcomes. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze the political, legal, regulatory, and ethical influences in the development and current status of outcomes management; 2) Apply methods and processes for improving outcomes; 3) Utilize data-driven decision making for health outcomes; 4) Develop leadership and interprofessional competence in analyzing healthcare outcomes; 5) Generate data-driven change strategies to improve health outcomes

CMAN 448 Program Planning and Marketing in Health Care (3 Credit Hours)
This course presents an integrated approach to strategic planning, program planning, and marketing in nursing and health care organizations. Key models, elements and processes associated with strategic planning are presented with an emphasis on the leadership role in leveraging information, environmental scanning, and competitive analysis. Theories, models, tools, and processes for program planning, implementation, and evaluation and the marketing of nursing and healthcare services are addressed. The integration of strategic planning, program planning, and marketing with the mission, goals, and objectives of organizations and services is emphasized. 6. Relate the strategic planning, program planning, and marketing processes to nursing leadership competencies.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze models and theories of strategic planning, program planning, and marketing; 2) Explain the relation between organization mission, goals, and objectives and the strategic planning, program planning, and marketing processes; 3) Apply tools of strategic planning to an organization; 4) Create a comprehensive plan focused on the needs, design, implementation and evaluation of a program that derives from an organizational strategic plan; 5) Evaluate marketing strategies

CMAN 460 Health Care Policy (3 Credit Hours)
This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.
Outcomes:
1) Identify key policy issues in contemporary health systems; 2) Analyze the effect of health policy on practice; 3) Analyze strategies for health system improvement through public policy; 4) Advocate for policy adoption to a health care decision maker; 5) Identify the effects of government regulation on education and practice

CMAN 533 Fiscal Management in Health Care Organizations (3 Credit Hours)
This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery; 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations; 3) Apply cost accounting techniques in health care; 4) Analyze ethical and legal issues surrounding fiscal management

CMAN 569 Comparative Effective Research in Healthcare (3 Credit Hours)
Pre-requisites: GNUR 450 or equivalent required; CMAN 439 and 440 recommended
Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.
Outcomes:
Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population

Doctor of Nursing Practice (DNP)

DNP 510 Capstone Seminar (1-3 Credit Hours)
The DNP scholarly project demonstrates an in-depth knowledge of each student's area of specialization in nursing practice. This project relates to advanced practice in the nursing specialty and benefits a group, population, or community rather than an individual patient. The DNP Scholarly project is a synthesis of the student's work and lays the groundwork for future scholarship with the goal of a tangible and deliverable academic product derived from the practice courses and immersion experience. The DNP scholarly project, unlike that of PhD level research, may take a number of forms such as: practice change initiative; pilot study; program evaluation; quality improvement project; evaluation of a new practice model; or a consulting project. This course addresses the unique needs and challenges second year DNP students face while completing their projects. Seminar content focuses on skills necessary for successful clinical project completion through: presentations, selected readings and online forums. The seminar operates at the group level and is designed to work in concert with and support individual students' DNP Faculty Director and external mentor (often the student's preceptor at the project site). Course content parallels the three overall stages of a DNP Scholarly Project: the design, proposal submission and proposal approval (First semester); project implementation (second semester); and, final presentation and dissemination (third semester). Students are expected to have a Faculty Director for their project and a tentative external mentor in place prior to course entry. This seminar is completed sequentially over a minimum of three semesters. Students are expected to be enrolled in this course each semester that they are working on the DNP Scholarly Project.

DNP 511 Practicum (1-6 Credit Hours)
Theory, evidence, and the systematic translation of research into practice serve as the foci for DNP practicum experiences across the program of study. Students investigate clinical problems and refine their clinical translational capabilities within the context of the broader health care system. Clinical learning is directed toward systematic application of knowledge and scientific discovery in resolving new or persistent problems affecting the safety and quality of patient care. Mentored clinical application of evidence-based knowledge and skills, as well as independent investigation and evaluation of outcomes, supports integration of the DNP role into the complex circumstances of contemporary nursing practice. Leadership, consultation, advocacy, fiscal accountability and interdisciplinary collaboration serve as core competencies to effect organizational change.

General Nursing (GNUR)

GNUR 402 Ethics for Health Professionals (2 Credit Hours)
In their various roles and practice settings, health care professionals participate in the unfolding stories of patients/clients and their families. They encounter ethical questions, concerns, problems and dilemmas in the course of their professional lives. These challenges affect health care professionals as independent and collaborative decision makers as well as members of the health care team who may be called upon to implement the decisions of others. This course provides students with opportunities to explore the impact of ethical issues on their personal and professional lives. Individual, family, institutional and societal issues are discussed. Students are guided in the application of frameworks that aid in resolving ethical dilemmas in professional practice. Emphasis is placed on developing skills in reflective moral thinking.

GNUR 404 Theories & Concepts for Advanced Clinical Practice (3 Credit Hours)
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.
Outcomes:
Upon successful completion of the course the student will be able to: 1) Understand the history and driving forces for knowledge development in nursing; 2) Describe the philosophical foundations of nursing and advanced nursing practice; 3) Understand the levels of theory development in nursing; 4) Explain the use of selected concepts and middle-range theories to guide advanced nursing practice; 5) Analyze concepts and theories for use in nursing practice; 6) Analyze the relation between theory, research, and nursing practice

GNUR 405 Introductory Statistics for Healthcare Professionals (3 Credit Hours)
Pre-requisites: Restricted to MSN, DNP, and PhD Nursing students
This course is focused on facilitating student acquisition of the knowledge and skills that will enable them to manage basic statistical issues that confront practitioners and researchers in health professions. Course topics and experiences will prepare students to interpret findings from published research and quality improvement reports and to conduct basic data analysis in future projects.
Outcomes:
1) Define basic statistical concepts; 2) Differentiate descriptive and inferential statistical tests; 3) Describe the purpose and appropriate application of statistical techniques; 4) Interpret the meaning of statistical tests; 5) Manage and analyze data using statistical software

GNUR 407 Social Justice and Ethics in Health Care (3 Credit Hours)
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics; 2) Analyze social justice and ethical issues at local, national, and global levels; 3) Apply professional codes to individual and interwoven issues of social justice, ethics and leadership; 4) Develop a plan to address population health inequities, based on evidence, codes and principles

GNUR 408 Research for Advanced Clinical Practice (3 Credit Hours)
Pre-requisites: Admission to a Master of Science in Dietetics or Master of Science in Nursing program
This course prepares students to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices and protocols form the foundation health care practice. The importance of translation of scientific evidence to improve practice is emphasized.
Outcomes:
Conceptualize an evidence-based protocol or pilot research study that corresponds to a clinical, educational administrative or policy issue or problem

GNUR 409 Advanced Health Assessment Lecture and Lab (3 Credit Hours)
This course prepares graduate nursing students to obtain a complete and accurate health database, including history, physical examination, and laboratory components, as a foundation for advanced nursing practice. Building upon previously acquired assessment skills, the focus is on the critical skills of obtaining a meaningful history and integrating it with physical findings to begin to develop a problem list.

GNUR 413 Advanced Pharmacology (3 Credit Hours)
This course will be the foundation for the advanced practice nurse to make appropriate decisions regarding the pharmacological management of patients in clinical practice. Pharmacological principles, including pharmacokinetics, pharmacodynamics, mechanisms of adverse drug reactions, and contraindications will be discussed. Legal requirements for writing prescriptions and the format for prescriptions as well as common sources of medication errors and methods to prevent them will be described. Developmental considerations, socioeconomic status, and complementary therapies will be addressed throughout the course. Pharmacotherapy of selected common disorders will be addressed. Students will synthesize and integrate diverse viewpoints, principles, and selected research findings related to the complex needs of patients via case study analyses. This course, along with clinical courses, will prepare the advanced practice nurse for prescriptive authority.

GNUR 420 Leadership and Roles in Advanced Nursing Practice (3 Credit Hours)
This course focuses on leadership concepts and theories with emphasis on application for transformation in healthcare. This course is designed to assist the student to enter into leadership and advanced nursing practice roles. Special emphasis is placed on the student's personal and professional development as a leader with a clear, individual vision for impacting the health of specific populations.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Synthesize knowledge of the concept of role and its components as they relate to advanced nursing practice; 2) Understand role expectations of advanced nursing practice and its major components: advanced practitioner (NP, CNS, CNM, CRNA), consultant, change agent, case manager, educator, researcher and leader and how they are integrated into health systems; 3) Articulate the role of the graduate prepared nurse as a clinical nurse expert, leader and innovator in healthcare; 4) Analyze knowledge of leadership theories for use as a foundation for role enactment as a leader in healthcare; 5) Understand principles of systems theory and their application to the clinical environment; 6) Compare models for change and sustainability consistent with current healthcare system dynamics; 7) Identify actionable leadership opportunities to improve nursing practice and patient outcomes; 8) Understand the potential for information systems to support decision making and innovation in practice and care delivery systems

GNUR 425 Advanced Health Assessment Across the LifeSpan (4 Credit Hours)
This course will prepare the graduate-level nursing student to generate a patient health database, including history and physical examination to inform clinical decision making and health promotion, across the lifespan. The course includes lecture and laboratory components.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Obtain comprehensive and problem-focused health histories including nutritional, cultural, social, functional, and developmental components; 2) Document comprehensive and problem focused health histories; 3) Perform comprehensive and problem-focused physical .examinations; 4) Differentiate normal and abnormal physical, behavioral, and developmental findings; 5) Develop a client problem list based on that patient's health history, and physical examination; 6) Plan anticipatory guidance and health promotion based on age, developmental level and cultural background

GNUR 432 Philosophical Bases of Nursing Science (3 Credit Hours)
Pre-requisites: Admission to PhD in Nursing Program
This course focuses on the nature and meaning of knowledge, the history of Philosophy, and the foundation and evolution of modern nursing science.

GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan (2 Credit Hours)
Pre-requisites: GNUR 425 Advanced Health Assessment Across the Lifespan
This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit a comprehensive psychiatric health history and mental health assessment; 2) Distinguish assessment features, interviewing techniques, and legal/ethical aspects for children, adolescents, older or cognitively-impaired adults, and other special populations; 3) Integrate medical history and laboratory findings into differential diagnoses and diagnostic formulation; 4) Apply critical thinking skills and diagnostic reasoning with the use of evidence-based clinical practice guidelines across the lifespan; 5) Identify risk and protective factors, vulnerability, and areas of mental health resilience for patients, families, and communities

GNUR 442 Advanced Physiology/Pathophysiology (3 Credit Hours)
This course presents contemporary principles of physiology that underlie the normal function of the human body and serve as a basis for clinical practice in a variety of settings. The content is taught within the context of key molecular processes, cellular and organ system function, and interactions among organ systems. Select clinical cases and exemplars are used to illustrate physiologic concepts and to facilitate the application of physiologic principles to understand the body's homeostatic processes in health and disease. Emphasis is on normal physiology but approaches are used to bridge physiological science with clinical application to common clinical disorders. The educational experience consists of three hours of classroom or on-line instruction per week, independent readings, case analyses, web-based applications, and classroom and/or course platform-supported discussion.

GNUR 451 Psychopharmacology Across the Lifespan (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the development of psychopharmacologic knowledge, critical thinking, and clinical judgment in the application of psychotropic medications to treat and manage psychiatric mental health conditions across the lifespan. Emphasis is on the neurobiological underpinning of psychopathology, pharmacodynamics, and pharmacokinetics of psychotropic medications. Students will learn the general principles of psychopharmacologic treatment, major psychotropic drug classes, and the ethical, legal, and professional guidelines for prescribing as an advanced practice nurse.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand the neurobiological processes related to the psychopharmacological treatment of psychiatric mental health disorders across the lifespan; 2) Differentiate between the major classes of psychopharmacologic medications in terms of pharmacokinetics, pharmacogenomics, pharmacotherapeutic value, and pharmacodynamics; 3) Apply critical thinking and clinical judgment when selecting appropriate psychotropic medications for patients, including: indication for use, diagnostic reasoning, medication and family history, dosing regimens, side effects, drug interactions, contraindications, and therapeutic drug monitoring; 4) Distinguish the management of psychotropic medications across the developmental lifespan, including children, adolescents, adults and older adults, and for patients with psychiatric comorbidities, substance use disorders, and other acute or chronic medical illnesses; 5) Evaluate therapeutic outcomes of psychopharmacological intervention using evidence-based prescribing guidelines, standard monitoring methodologies, psychological tools sensitive to medication changes, and other recommended laboratory testing; 6) Understand the legal, ethical, socio-cultural, and economic considerations when prescribing psychotropic medications across the lifespan

GNUR 455 Scholarly Writing (1 Credit Hour)
This course provides the opportunity for graduate students to further develop their scholarly writing skills. Research tools, publication ethics, literature reviews, academic writing, scientific research reports, submission strategies and etiquette, and alternative disciplinary genres will be explored.
Outcomes:
Develop individual strategies for reading, generating, revising, editing, and proofreading scholarly writing; Recognize, discuss, and demonstrate dynamics of effective literature reviews, scientific research reports and proposals

GNUR 456 Psychotherapeutics Individuals Groups Families (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the theoretical underpinnings and professional practice of integrating and evaluating psychotherapeutic modalities into advanced practice psychiatric nursing care with individuals, groups, and families. Using the principles of psychotherapy, students will learn the skills to develop strong therapeutic relationships to enhance mental health treatment, strengthen mental health resilience, and improve psychiatric outcomes. Emphasis will be on patient and family-centered care, which integrates socio-cultural perspectives of mental health and illness, treatment preferences, ethics and values, and legal or economic considerations.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize theories, ideological approaches, and methods for psychotherapeutic intervention as a basis for individual, family, and group therapy; 2) Understand how psychotherapeutic modalities, such as cognitive-behavioral, humanistic, and integrative-holistic therapies, are recommended based on age and developmental level, psychiatric condition, evidence-based practice, and patient-family preferences; 3) Apply clinical judgment, critical thinking, and decision making when integrating principles and techniques of psychotherapy into care; 4) Assess socio-cultural and spiritual perspectives of individuals, groups, and families and incorporate values into care; 5) Evaluate psychotherapeutic approach based on patient or family response, research and practice evidence, and changes in health policy; 6) Integrate legal, ethical, economic, and professional standards to the practice of psychotherapy

GNUR 461 Health Policy Issues (1 Credit Hour)
This course will introduce graduate nursing students to general health policy with a clinical approach. The focus of study in this course is to look at health policy as well as individual patients and caregivers and how they interact with each other and with the overall health systems. Health policy affects the patients we see on a daily basis, and the finances of health in the United States influences the care that is offered depending upon public or private health care funding. This course content will help bridge the gap separating the micro-world of individual patient and the macro universe of health policy.

GNUR 462 Health Care Financing (1 Credit Hour)
This course introduces concepts of economics and financial management for health care professionals. Course content includes principles of economics, fundamentals of managed care, and health reform, budgets and budget preparation, financial analysis, preparation of business plans, and health program grant proposals, and issues relevant to international settings and future trends.

GNUR 463 Cancer Genomics (3 Credit Hours)
This course uses a case-based learning process to examine the genetic basis for cancer disease, common cancer genetic syndromes, relative risk assessments, screening and surveillance guidelines, and the educational and management needs of clients and their families related to genetic predisposition to cancer. The emphasis is on the role of the advanced practice nurse.
Outcomes:
Upon completion of this course the student will be able to: 1) Describe the structure of DNA and differentiate among the various forms of genetic inheritance; 2) Describe the cancer burden in United States and how the science of genetics will assist with cancer control; 3) Explain oncogenesis, and function of oncogenes and tumor suppressor genes; 4) Obtain a genetics family history, and make a preliminary assessment of risk for genetic predisposition for cancer and the need for referral for further a genetic work-up; 5) Develop a basic level of skill in communicating information regarding cancer predisposition with sensitivity to the culture and the educational level of the clients and their families; 6) Analyze the cancer risk associated with common genetic cancer syndromes, the criteria for genetic screening and surveillance, and the genetic therapies available to date; 7) Analyze and apply current and future applications of genomics to cancer care

GNUR 471 Palliative Care (2 Credit Hours)
This course is designed to provide the student with an overview of the philosophy and principles of palliative care; the course emphasizes the unique knowledge that describes, explains, and guides the provision of hospice and palliative care. Students consider a holistic approach to care, including state-of-the-art nursing interventions that provide effective pain and symptom management and promote psychosocial and spiritual well-being. Students are prepared to serve diverse client populations whose diseases are life-threatening, and to perform effectively as members of an interdisciplinary team providing palliative care.

GNUR 472 Psychiatric Mental Health Advanced Practice Across Lifespan I (3 Credit Hours)
Pre-requisites: GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan
This course focuses on the neuroscientific understanding of psychiatric mental health disorders, which includes current evidence in genetics, biochemistry, neuropsychiatry, and behavioral neurology. Students will learn the DSM-5 classification for mental disorders, including etiology, development and course, risk and prognostic factors, diagnostic criteria, differential diagnoses, and cultural considerations. Major categories of mental disorders examined in this course are: psychosis and schizophrenia, depression and other mood disorders, anxiety disorders, trauma and stressor-related disorders, attention-deficit hyperactivity disorder, and substance use disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the developmental lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. Socio-cultural and ethical implications of the psychiatric mental health diagnosis also will be discussed.
Outcomes:
At the successful completion of the course, students will be able to: Synthesize neuroscientific evidence for the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; Apply critical thinking, diagnostic reasoning, and clinical judgment to the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; Implement the use of psychological tools and rating scales to strengthen diagnostic certainty, collect subjective and objective data, measure progress, and evaluate treatment outcomes; Examine the socio-cultural and ethical implications associated with the psychiatric mental health diagnosis

GNUR 474 Psychiatric Mental Health Advanced Practice Across Lifespan II (3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course builds on the knowledge base, diagnostic reasoning, and critical thinking competencies developed in Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I. This course continues the neuroscientific understanding of psychiatric mental health disorders and DSM-5 classification - for additional categories of illness, including autism and other neurodevelopmental disorders, eating disorders, dementia and delirium, sleep disorders, suicidality, and personality disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. In addition, emphasis on the bio-social-cultural understanding of mental health and illness will continue to be explored with special consideration to vulnerable groups.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize neuroscientific evidence on the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; 2) Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; 3) Apply critical thinking, diagnostic reasoning, and clinical judgment into the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; 4) Develop treatment recommendations and care plans that incorporate the perspectives, cultures, and values of patients and families with consideration to safety, environmental context, and professional ethics; 5) Explain the complex socio-cultural, ethical, political, and economic context for psychiatric diagnosis, mental health care, and mental health policy within the US; 6) Examine the impact of policy changes and advocacy efforts for special or vulnerable populations within psychiatric mental health care and treatment

GNUR 476 Basic Diagnostics for Advanced Practice (2 Credit Hours)
Pre-requisites: Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology
The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.
Outcomes:
1) Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses; 2) Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis; 3) Interpret diagnostic test results for clinical decision making

GNUR 482 Psychiatric Mental Health Advanced Practice Nursing Practicum (2-3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit and document a comprehensive psychiatric history and mental health assessment with consideration for level of care and treatment setting; 2) Generate differential diagnoses, problem list, and diagnostic formulation after synthesizing and evaluating objective and subjective data from patients, families, and other informants; 3) Develop an evidence-based treatment plan based on psychiatric diagnosis and presentation, knowledge of psychopharmacology and psychotherapeutic approaches, respect for persons, and consideration to special or vulnerable groups; 4) Apply critical thinking, clinical judgment, and decision making when implementing treatment recommendations and evaluating strategies within mental health care plans; 5) Understand the importance of coordinated care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care; 6) Implement preventive psychiatric mental health care for populations across the lifespan, which includes health and wellness programs, mental health screening, psychoeducation, counseling and therapeutic services, and integrative and holistic approaches

GNUR 498 Independent Study (1-6 Credit Hours)
Directed study in a specific topic area under the supervision of a faculty member.

GNUR 499 Interprofessional Team Practicum (1-7 Credit Hours)
Consent of discipline Program Director in collaboration with course faculty is required for registration. This course provides opportunities to students with backgrounds in a variety of clinical disciplines to engage in interprofessional team projects in healthcare settings and health and human service organizations, and to develop interprofessional competencies and project management skills.
Outcomes:
Apply knowledge of selected concepts, models, and theories from the clinical and management sciences to the management of high performing teams; apply evidence based/research findings for a selected problem/project; and examine the leader role within an interprofessional team environment

GNUR 500 Conceptual Inquiry (3 Credit Hours)
The course focuses on the analysis and development of concepts and conceptual thinking relevant to nursing and related phenomena. Traditional and advanced methods of concept analysis and development and the role of concepts in the comprehensive knowledge structure are emphasized. Fieldwork experiences for developing and refining conceptual knowledge are included.
Outcomes:
1) Evaluate existing and emerging concept analysis and development methods; 2) Infer Philosophical assumptions associated with selected concept analysis methods; 3) Apply quantitative and qualitative approaches to the conceptual analysis of a phenomenon; 4) Analyze the theoretical-conceptual-empirical-structure of a phenomenon

GNUR 501 Theoretical Foundations for Nursing Science (3 Credit Hours)
This course focuses on theory as it contributes to the body of nursing science. The focus is on a variety of areas of nursing. Emphases will be placed on strategies of theory development, evaluation and testing in nursing as well as those in other disciplines. Students will explore existing theories that have informed research of a phenomenon of interest.

GNUR 504 Emergency and Acute Care Procedures for the NP (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 509 Teaching in Nursing (3 Credit Hours)
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluations and measurements strategies, the faculty role, and regulatory issues.
Outcomes:
1) Explain philosophies, theories and principles of teaching and learning; 2) Understand curricular design, implementation and evaluation; 3) Analyze evaluation and measurement strategies in nursing education; 4) Understand the expectations of the faculty role; 5) Understand the relationship among educational setting, teaching methods, and student learning outcomes; 6) Evaluate education and nursing education research literature for implementation in practice

GNUR 510 Teaching Practicum (3 Credit Hours)
Pre-requisites: GNUR 509
This course is designed to give students a context for applying the concepts of teaching and learning in nursing education. Students will experience numerous aspects of the teaching role and the opportunity to design, deliver and evaluate approaches to teaching and learning. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.
Outcomes:
1) Assess the learning needs and learning styles of learners; 2) Demonstrate effective teaching in a selected area of nursing; 3) Demonstrate the ability to conduct formative and summative evaluation of the learners; 4) Evaluate teaching effectiveness in self

GNUR 512 Quantitative Methods and Design for Nursing Research (3 Credit Hours)
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection analysis and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Strategies for developing a program of research and the leadership role of the researcher/scholar are addressed.
Outcomes:
1) Explain the significance of quantitative research in the development of nursing science; 2) Develop research questions to address gaps in knowledge; 3) Utilize the elements of quantitative research methods in the planning and conduct of research; 4) Understand the importance and implications for using big data for research and the issues related to measurement error; 5) Synthesize knowledge from nursing practice, theory, and research in the formulation of quantitative nursing research studies; 6) Analyze ethical concerns of quantitative research

GNUR 513 Qualitative Methods in Nursing Research (3 Credit Hours)
This course focuses on exploration of inductive qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical, political, and special concerns of inductive qualitative research are emphasized.
Outcomes:
1) Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science; 2) Explain the relationship between theoretical and philosophical foundations and assumptions to the major qualitative research methods; 3) Compare the major qualitative research designs in terms of background, purpose, research questions, data gathering techniques, analytical methods and report of results; 4) Develop basic skills in qualitative data collection and analysis; 5) Analyze ethical issues related to qualitative research and the protection of human subjects

GNUR 514 Common Health Problems of Adults/Older Adults (3 Credit Hours)
One course of a three-course sequence, GNUR 514 is designed to prepare the Nurse Practitioner to assume responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing common health problems.

GNUR 517 APN Practicum: Primary Health Care (1-6 Credit Hours)
Pre-requisites: Minimum grade of B- in GNUR 413, GNUR 425, & GNUR 442
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Clinical seminars will include discussion of concepts introduced in previous courses with application to clinical practice. Seminars will include student and faculty-led discussions, case reviews, and guest speakers.

GNUR 518L First Semester Student Standardized Patient Lab (0 Credit Hours)
This one-day seminar focuses on helping the primary care nurse practitioner student prepare for the first clinical practicum. The seminar includes a standardized patient experience.

GNUR 519 Measurement in Nursing Research (3 Credit Hours)
This course focuses on principles and concepts of measurement in nursing research. Psychometric theory and instrument development, critique and testing are addressed. Methods for generating and evaluating reliability and validity are emphasized and operationalized. Ethical concerns related to development and use of measuring instruments are examined.
Outcomes:
1) Understand key principles and concepts of psychometric theory; 2) Differentiate between reliability and validity as measurement concepts; 3) Apply statistical techniques in the assessment of reliability and validity of scores from measuring instruments; 4) Evaluate measures and measurement approaches in answering research questions; 5) Understand principles and approaches to instrument development and testing; 6) Understand ethical issues related to instrument development, testing, and usage; 7) Design a research study to test the psychometric properties of an instrument

GNUR 521 Population-Focused Health (3 Credit Hours)
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
Outcomes:
1) Analyze the role of federal, state, and local governments in population health; 2) Assess population specific health needs using Healthy People and the determinants of health as frameworks; 3) Examine the role of the World Health Organization and non-governmental organizations in population health; 4) Analyze health disparities and needs of priority populations using databases; 5) Apply epidemiologic concepts when completing a population needs assessment; 6) Examine evidence-based interventions for population specific health issues

GNUR 522 Emergency Health Care of Adults (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 523 Health Care Policy and Economics (3 Credit Hours)
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels; 2) Analyze the effects of health policy; 3) Analyze the effects of economic factors on health care decision making; 4) Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research; 5) Design practice improvement recommendations that account for policy, economic and financial variables affecting selected populations

GNUR 524 Advanced Reproductive and Sexual Health (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course will prepare the advanced practice nurse to manage the reproductive and sexual health care needs of all individuals throughout the lifespan. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for reproductive and sexual health. Emphasis is on the principles of reproductive anatomy and physiology including puberty, genetics, pregnancy, embryonic/fetal development, parturition, puerperium, lactation, and menopause in relationship to advanced practice nursing care.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Synthesize principles of neuroendocrine and physiological regulation of female and male reproductive function and the normal parameters of puberty, menarche, fertility, and menopause; 2) Analyze the impact of non-gynecologic primary health conditions on reproductive and sexual health; 3) Incorporate established evidence based sexual and reproductive health clinical practice guidelines; 4) Identify strategies to provide high quality, person-affirming, and culturally inclusive healthcare for self-identified gender and sexual minority persons and non-conforming individuals; 5) Develop genomics and genetic risk factor assessment in relation to reproductive and sexual health care, including basic principles of genetic testing, counseling, and referrals; 6) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes

GNUR 525 Special Populations and Topics in Emergency Health Care (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Synthesize evidence-based theories and practices into assessment, diagnosis and treatment of patients in special populations that present to the emergency department for care; 2) Analyze subjective/objective information to emulate differential diagnoses of emergent conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Develop treatment plans that incorporate inter-professional and socio-cultural sensitive treatment options; 5) Recognize legal issues that are unique to the delivery of care in the emergency setting; 6) Apply principles of disaster management to the care of individuals and communities affected by disasters

GNUR 526 Management of Common Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting common health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of common conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 528 Management of Complex Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting complex health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of complex conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 529 Family-Focused Health Promotion and Disease Prevention (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Analyze data sources that identify and predict health risks of the individual, family, and community to facilitate development of clinical intervention strategies; 2) Integrate family systems theory and research on health promotion and disease prevention into strategies to manage health-related problems affecting family and community; 3) Synthesize broad ecological, global and social determinants of health to design evidence-based, culturally relevant clinical interventions and strategies; 4) Apply evidence-based guidelines to the identification and prevention of significant healthcare problems affecting populations at risk; 5) Distinguish cultural, spiritual, ethnic, gender, sexual orientation, economic, environmental, and age cohort differences in the risk, presentation, progression, and treatment of health problems

GNUR 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

GNUR 532 Research Internship (2-3 Credit Hours)
This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

GNUR 534 Advanced Practice Nursing Care of Older Adults (2 Credit Hours)
Pre-requisites: GNUR 528 Management of Complex Adult Health Problems for NP students OR MSN 447 for CNS students
This course explores current issues in aging and the care of older adults. A major focus of the course is preparing the advanced practice nurse to manage the healthcare of older adults with multiple medical and psychosocial needs in increasingly complex care systems. Topics include health promotion, disease prevention, and social determinants of health for older adults across the spectrum of health and illness, best practices in the management of geriatric syndromes, and special considerations in the assessment of older adults with functional and cognitive limitations.
Outcomes:
1) Apply current issues in aging, including aging theory, social determinants of health, caregiving, and legal-ethical considerations in the care of older adults; 2) Investigate the variety of care systems and settings where older adults receive care, including transitions of care; 3) Generate comprehensive health maintenance plans for healthy older adults and older adults with multiple comorbidities, incorporating evidence-based screening and prevention principles; 4) Discuss special considerations in the assessment of older adults with functional and cognitive limitations; 5) Apply best practices in assessment and management of geriatric syndromes; 6) Evaluate the importance of interprofessional teamwork in the care of older adults with multiple comorbidities

GNUR 535 Substance Use Disorders Addiction Lifespan I (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I and II
This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and treat clients with substance use and addictive disorders. Neurobiological, behavioral, and socioecological perspectives will be used to understand the etiology, course and development, differential diagnoses and management of substance use and addiction. Students will learn pharmacological and non-pharmacological interventions to treat and manage substance use and addictive disorders across the lifespan.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize evidence-based scientific theories of substance use and addictive disorders; 2) Understand the neurobiological, behavioral, and socioecological aspects of substance use and addiction; 3) Assess and diagnose substance use and addictive disorders for clients with developmental considerations across the lifespan; 4) Apply pharmacologic, non-pharmacologic, and behavioral interventions in the management of clients with substance use and addictive disorders; 5) Evaluate management strategies in the treatment of substance use and addictive disorders

GNUR 536 Management of Adults with Acute/Critical Conditions I (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in the assessment, diagnoses, collaborative and holistic management of adults and older adults with traumatic, pulmonary and cardiothoracic disorders in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with trauma and cardiothoracic disorders within an acute care setting; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 537 Substance Use Disorders Addiction Lifespan II (2 Credit Hours)

Pre-requisites: Substance Use Disorders and Addiction Across the Lifespan I

This course focuses on the complex management of treating substance use and addictive disorders across the lifespan. Evidence-based strategies for caring for clients with co-occurring substance use and psychiatric disorders are presented. Students will learn innovative and novel approaches within research and practice to treat substance use and addiction. The socio-cultural, ethical, and legal challenges surrounding addiction and substance use disorders also will be explored.

Outcomes:

At the successful completion of the course, students will be able to: 1) Understand different philosophical approaches to manage addiction and substance use, including abstinence and harm reduction models; 2) Implement and evaluate evidence-based strategies to care for clients with complex co-occurring psychiatric and substance use disorders with an emphasis on recovery; 3) Describe how to include family and community members into the management of substance use disorders and address stigma associated with addiction and substance use; 4) Analyze the current research and practice focused on innovative and novel approaches and examine socio-cultural, ethical, and policy implications; 5) Explain the legal, ethical, and economic factors associated with substance use and addiction practice

GNUR 538 Management of Adults with Acute/Critical Conditions II (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in assessment, diagnoses, collaborative and holistic management of adults and older adults with systemic disorders that include episodic and chronic health problems in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with systemic disorders that include acute and critical episodes of health problems in acute care settings; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 540 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes:

1) Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy; 2) Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing; 3) Identify presuppositions/assumptions underlying one's positions and the bases for accepting those presuppositions/assumptions; 4) Examine fundamental critical questions in ethics and nursing; 5) Explore selected social justice bioethical issues

GNUR 542 Grantsmanship (1 Credit Hour)

Pre-requisites: GNUR 512 and GNUR 513

This course provides students with a basic understanding of the research grant application process. The overarching objective is to foster fundamental skills and strategies needed to prepare and submit a competitive research grant proposal. Emphasis is placed on the means by which to best position a research grant application for success. Sources and types of funding from governmental agencies, private foundations and professional societies are considered, with an emphasis on federal (NIH, AHRQ) grant programs, mechanisma, application and review process. Key aspects of successful proposal development from conceptualization of an idea or research question to submission of the application is fully developed and explored. Strategies for successful writing of each component of a research grant are provided using examples and online tutorials. Best practices for approaches for amendment of a non-funded proposal are considered.

GNUR 543 Adult Primary Care NP Practicum (1-4 Credit Hours)
Pre-requisites: GNUR 526: Management of Common Adult Health Problems or GNUR 528: Management of Complex Adult Health Problems; WHNP Students also need MCN 414: Childbearing/ Family Course
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in primary care. During each practicum, the student will care for adult patients. This care includes health promotion, disease prevention, as well as assessment and management of the most common acute, chronic, and complex health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform complete physical, psychological and social health assessments, incorporating principles of health promotion, health maintenance, and chronic disease management; 2) Provide teaching, counseling, and anticipatory guidance in accordance with the patient and family's readiness stage; 3) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 4) Integrate knowledge of pathophysiologic and psychosocial changes associated with common acute, chronic and complex health problems into clinical decision-making; 5) Implement evidence-based, developmentally supportive plans of care for adolescents, adults, and older adults; 6) Modify management plan according to clinical response and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

GNUR 544 Nursing and Health Policy (3 Credit Hours)
This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level, The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
Course equivalencies: X-DNP 503/GNUR 544
Outcomes:
1) Analyze health care delivery systems and specific health policies using selected theoretical models; 2) Describe forces that shape health care policy development and implementation in the United States; 3) Relate the philosophy and ethical basis of Jesuit education to the values and preferences which shape health policy in a pluralistic society; 4) Outline the process of policy development and implementation within the content of multiple forces (government, the private sector, health professionals and consumers) that shape health care policy in the United States; 5) Discuss current health and nursing policy issues in the US and globally with emphasis on the political, social, economic, and cultural factors which influence health disparities and access to care; 6) Analyze a health policy within the student's own area of practice and interest in terms of the social, economic, legal political, and ethical forces that effect current and latent health outcomes; 7) Explain specific methods and strategies hat health care providers can use to advocate for and influence health policy at the organization, local, state, national and/or international level

GNUR 545 Evidence Translation for Advanced Clinical Practice (3 Credit Hours)
This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate theory, concepts and methods to guide translation of evidence; 2) Formulate questions about population-based practice problems, issues and areas for improvement in context; 3) Synthesize the state of evidence with regard to a specific practice problem; 4) Develop an evidence-based protocol to address the practice problem, issue and/or area for improvement in context; 5) Understand the use of metrics in the identification, monitoring and evaluation of practice outcomes; 6) Analyze social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 546 Introduction to Linear Models (3 Credit Hours)
This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. Conceptual understanding and critical evaluation of statistical models is emphasized . Topics to be covered include probability statistical foundations, correlation, analysis of variance, simple and multiple linear regression, variable selection, model selection, model building, regression diagnostics, and prediction. Interpret results of statistical testing using linear modeling techniques; 4) Explain the assumptions associated with statistical testing using linear models; 5) Apply linear modeling techniques in answering research questions.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Explain strengths and limitations of linear models; 2) Select from basic exploratory data techniques the appropriate model to fit to a dataset; 3) Analyze univariable and multivariable models

GNUR 547 Categorical Data Analysis (3 Credit Hours)
This course focuses on categorical data analysis techniques common in clinical and health outcomes research. Students will learn how to apply and interpret bivariate analysis, measures of agreement, logistic regression, proportional odds models, and models for matched/correlated data. Knowledge commensurate with undergraduate intermediate algebra (equivalent to Loyola's MATH 100 course), undergraduate introductory statistics (equivalent to Loyola's STAT 103 course), GNUR 546 (Introduction to Linear Models), and good working knowledge of a statistical package.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply appropriate categorical analysis techniques based on research questions about differences in proportions or trends; 2) Evaluate diagnostic tests through sensitivity, specificity, and positive and negative predictive value calculations; 3) Explain sample size or statistical power for studies with binary outcomes; 4) Interpret goodness of fit and calibration of the model to categorical outcome data; 5) Interpret findings of statistical categorical analyses from software output for select tests; 6) Critique categorical data designs, including randomization and power analysis

GNUR 550 Substance Use Management Practicum (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Practicum
This specialty practicum course has a focus on the diagnostic reasoning and clinical judgment required to assess, diagnose and treat substance use and addictive disorders. Students will integrate knowledge from their coursework and psychiatric mental health population clinical to diagnose and manage clients with substance use and addictive disorders across the lifespan. The student's level of performance is expected to progress throughout the clinical practicum.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence-based practice strategies to assess and diagnose children, adolescents, adults and older adult clients with substance use and addictive disorders; 2) Implement management strategies in the treatment of substance use and addictive · disorders; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of clients with substance use and addictive disorders; 4) Coordinate care across transitions for clients diagnosed with substance use and addictive disorders

GNUR 551 Cancer Care: Cancer Biology and Epidemiology (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in cancer biology and pathogenesis. Genetic, molecular and cellular mechanisms of cancer pathogenesis are covered in depth. Cancer epidemiology, concepts of primary risk reduction, as well as cancer screening are presented. Susceptibility for hereditary cancers due to germline mutations is included in the context of primary and secondary prevention. Current and future applications of genomics to cancer care are presented and discussed.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of the biology of cancer; 2) Describe national and global trends in cancer incidence and mortality; 3) Discuss evidence supporting cancer prevention; 4) Analyze cancer risk associated with common hereditary cancer syndromes; 5) Understand general principles of cancer screening; 6) Analyze current and future applications of genomics to cancer care

GNUR 553 Cancer Care: Diagnostic and Therapeutic Approaches (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course will focus on the diagnostic and management dimensions of select cancers including hereditary cancer syndromes. Specialized content will focus on the therapeutic modalities utilized during the acute care phase of the cancer continuum across multiple care settings. Pharmacology of cancer therapies will be explored.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Differentiate among specific cancer types in terms of: epidemiology, etiology, prevention, screening, detection, classification, and treatment; 2) Apply diagnostic approaches and methods to cancer management; 3) Explain concepts and principles of cancer staging for various cancer types; 4) Apply general principles of treatment planning in cancer management; 5) Compare major treatment modalities; 6) Evaluate evidence-based therapeutic and pharmacologic treatment strategies for patients across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 555 Cancer Care: Palliative/Supportive Management (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in psychological and supportive care for patients and families living with cancer. Information relevant to the following domains will be explored: symptom management; psychological, spiritual and culturally-appropriate care; communication; survivorship; and hospice and palliative care.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of cancer and treatment-related symptoms across the cancer care continuum; 2) Identify evidence-based advanced nursing practice for symptom management and psychological care of patients with cancer, across the cancer care continuum, including at the end of life; 3) Identify strategies for effective communication with patients, families, and interprofessional team members; 4) Describe psychosocial, spiritual, and culturally appropriate components of care with patients and families coping with cancer; 5) Explain unique issues of the cancer survivor; 6) Integrate principles of palliative care across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 560 Cancer Care Advanced Practice Practicum (2-3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the advanced practice nurse providing advanced nursing care to patients and families across the cancer care continuum. Students will gain experience in a variety of settings that will advance their proficiency in caring for patients and families with cancer.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence in the assessment and management of patients across the cancer care continuum; 2) Collaborate with health professionals to plan and implement best practices in cancer care; 3) Evaluate the treatment plan for value and quality and modify as needed; 4) Analyze the ethical, legal, cost, and policy issues affecting advanced practice nursing of patients and families across the cancer care continuum; 5) Discuss the value of multidisciplinary cancer care teams to provide the most appropriate care for this complex and vulnerable population; 6) Demonstrate and document personal and professional growth in the role of the advanced practice nurse

GNUR 562 Emergency Health Care Advanced Practice Practicum (1-6 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the nurse practitioner in the emergency setting. Students will advance their proficiency in caring for patients that present across the lifespan and across acuity levels.
Outcomes:
1) Apply evidence-based practice strategies to assess and diagnose patients across the lifespan and across acuity levels that present with emergency/urgent conditions; 2) Implement management strategies in the treatment of patients in the emergency department setting; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of patients that present in an emergency/urgent care setting; 4) Implement proficiency in procedural skills relevant to the evaluation, stabilization, resuscitation, and treatment of the patient in the emergency setting; 5) Integrate the appropriate use of consultation, collaboration, and referral to appropriate health care providers into management of patients in an emergency/urgent care setting

GNUR 570 DNP Scholarly Project: Planning (1 Credit Hour)
Pre- or co-requisites: GNUR 545
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH course focuses on skills necessary for planning a successful DNP scholarly project. Project identification within the student's area of advanced expertise, organizational needs assessment, and outlining the project are emphasized. Skills necessary for the implementation of a successful DNP scholarly project, including collaborative inter-professional team participation and leadership, communication, and methods for project management, are emphasized.
Outcomes:
Upon successful completion of this course, DNP students will apply project management principles in the identification of a feasible DNP Scholarly Project that reflects the student's practice expertise, is evidence-based and grounded in theory

GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation (2 Credit Hours)
Pre-requisites: DNP Scholarly Project: Planning
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 2 SH course entails 1 SH of on-line seminar and 1 SH (75 clock hours) of practicum experience. The seminar focuses on full development and writing of a succinct proposal which describes planning, implementing, evaluating, and disseminating a scholarly project. The project is designed to improve patient, practice, or organizational outcomes based on an organizational needs assessment that demonstrates feasibility and organization's readiness for student's proposed project. Development of relationships at the project site, and exploration/initiation of preliminary project steps are emphasized during the practicum hours.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Incorporate findings from an organizational needs assessment into the development of a feasible scholarly project; 2) Defend a written project proposal which links scholarly experiences, use of evidence to improve either practice or patient outcomes or both

GNUR 572 DNP Scholarly Project: Project Implementation (2 Credit Hours)
Pre-requisites: GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Implement DNP Scholarly Project using project management skills and competencies; 2) Demonstrate leadership skills in project implementation and management; 3) Apply problem-solving methods and change concepts during project management

GNUR 573 DNP Scholarly Project: Analysis and Dissemination (1 Credit Hour)
Pre-requisites: GNUR 572 DNP Scholarly Project: Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.
Outcomes:
Upon successful completion of this course, DNP student will integrate project elements and data, demonstrating the use of evidence to improve patient or system outcomes

GNUR 598 Directed Study (1-6 Credit Hours)
Directed Study is a focused, defined, and substantive reading or research experience supervised by a faculty member. Directed study involves a close collaboration between the student, supervising faculty, and the academic advisor/chair in the design, scope, and expected student learning outcomes from the experience. Directed study may not be used as a substitute for an existing course or a cancelled course. Directed study credits may range from 1 to 3 semester hours. A course topic of Directed Readings or Directed Research may be requested to be entered on the transcript.

GNUR 600 Dissertation Supervision (0 Credit Hours)
This course focuses on continuing formation as a scholar through the development of the dissertation proposal. Using the student's dissertation plans as a reference point, the course will target strategies and competencies in generating and critically evaluating new knowledge, understanding the legacies of past and current work in the discipline and topic area, the transformational nature of knowledge, and the transformative work of communicating knowledge to others. Students are expected to maintain close and frequent contact with their dissertation chairperson/ committee members during their enrollment in the course. Two semesters in seminar format and thereafter the student works with the Dissertation Chair and committee in completing the dissertation

GNUR 605 Master's Study (0 Credit Hours)
Course designation for students who have completed their coursework and are completing the master's comprehensive examination. Enrollment in GNUR 605 is considered full-time study. Graded as credit (pass) or no credit (fail). This course can be taken twice.

GNUR 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Maternal/Child Nursing (MCN)

MCN 401 Child/Family Health (3 Credit Hours)
Pre-requisites: B- or higher in GNUR 413, GNUR 425, and GNUR 442
MCN 401 is designed to prepare the Nurse Practitioner to assume responsibility for the coordination and management of health care for children, birth through adolescence. A developmental perspective is used to address the primary health care needs of the childrearing family with an emphasis on meeting the psychosocial and developmental needs of children and families. A major focus of the course is to prepare the student to assess, diagnose and manage selected common health problems of the pediatric population in primary care settings. Indications for collaboration, consultation, and/or referral to other members of the health care team are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical clinical judgment and implement theoretical knowledge in the management of the pediatric population, both in health and when experiencing common health problems.

MCN 414 Childbearing/Family (3 Credit Hours)
Pre-requisites: GNUR 413 & GNUR 442 (minimum grade of B-); Co-requisites: GNUR 425
This course will prepare the advanced practice nurse to manage the health care of essentially normal childbearing women during the prenatal and postpartum periods. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for childbearing women and families. Emphasis is on the concept of wellness during pregnancy, recognition of high-risk conditions requiring referral or collaborative practice, and the importance of support from family and community networks.

MCN 420 APN Practicum: Child/Family Health (1-3 Credit Hours)
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Course equivalencies: MCN 420 / MCN 406

MCN 516 Pediatric Primary Care NP Practicum (3 Credit Hours)
Pre-requisites: MCN 401 Child/Family Health
This course guides the student toward a synthesis of content from nursing and related sciences, applying this knowledge to the role of the nurse practitioner in the primary care of pediatric patients. During this practicum experience, the student will care for children from birth through adolescence across a continuum from health promotion to the management of common health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform a complete physical, psychological and social health assessment incorporating principles of child development, health promotion and health maintenance; 2) Provide developmentally appropriate teaching, counseling, and anticipatory guidance; 3) Apply preventive interventions and risk reduction strategies for infants through adolescents, and their families; 4) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 5) Implement evidence-based, developmentally supportive plans of care for pediatric patients and their families; 6) Modify management plans according to clinical responses and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

MCN 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation. Restricted to Graduate Nursing students.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

Medical/Surgical Nursing (MSN)

MSN 408 APN Practicum (1-9 Credit Hours)
Pre-requisites: GNUR 413 & 442 (minimum grade of B-); Corequisites: GNUR 425
This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include understanding relationships among nursing theory, research, principles of epidemiology and practice; formulating research questions and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

MSN 431 12-Lead ECG Interpretation (1 Credit Hour)
12-Lead ECG Interpretation is a summer course that promotes in-depth exploration of the significant diagnostic ECG challenges encountered in the advanced practice nursing environment. An understanding of the importance of clinical assessment skills and clinical judgment associated with diagnosis of clients in a variety of settings is an underlying assumption of faculty teaching this course. Included in this course are techniques for interpreting a variety of basic and advanced dysrhythmias and the ECG changes associated with bundle branch block, myocardial ischemia and infarct, atrial and ventricular hypertrophy, electrolyte imbalance, drug effects on the ECG, and other miscellaneous changes. Diagnostic characteristics, causes of the disorder, clinical significance, and management strategies will be highlighted. The student will be provided with opportunities for practicing 12-lead ECG interpretation using a variety of media.

MSN 432 Diagnostic Imaging for Advanced Practice Nurses (1 Credit Hour)
This course offers the advanced practice registered nurse (APRN) basic principles of radiographic interpretation. A systematic approach to interpret chest x-rays (CXR) will be discussed. Normal and abnormal findings commonly seen in emergency departments and critical care areas are presented. Correlation between symptoms and radiographs will be delineated. Common indications for obtaining a plain x-ray, CT, or MRI and orthopedic injury will be discussed in regard to patient safety, cost contained care and optimization of outcome.

MSN 433 Suturing and Acute Wound Management (1 Credit Hour)
This course is designed to enable the APRN student to obtain the theoretical knowledge and practical skills necessary to assess and manage acute wounds. This didactic/lab course discusses principles of wound care and teaches students techniques of wound closure including pain control, basic suturing and advanced skin closures; management of infections and injuries to the skin, hands and feet; and simple incision and drainage of abscesses. The student will be able to practice advanced skills that essential in the clinical management of the patient with acute wounds.

MSN 447 CNS Practice Across the Adult Age Spectrum (3 Credit Hours)
This course promotes in-depth exploration of significant clinical problems occurring in adult health patients from the vantage point of the advanced practice nurse prepared as a clinical nurse specialist (CNS). This course will prepare the CNS student for expert clinical practice and the competencies to translate clinical expertise into quality, cost-effective outcomes for adult patients. A major focus of the course is to prepare CNS students to assume responsibility for coordination, management and assurance of safety and quality of care of adult patients across the three spheres of influence: patient/client, nurses and nursing practice, organization/system of adult health patients. Attention will be directed to identifying and analyzing selected problems, designing effective advanced nursing interventions and evaluating health care outcomes related to adult health patients. Special consideration with be given to the top Medicare diagnoses, National Patient Safety Goals, CMS core performance measures, and new models for healthcare delivery. Indications for leadership, collaboration and consultation with other health care professionals are emphasized to insure optimal clinical management and achievement of evidence-based outcomes for the hospitalized adult patient. Strategies for improving the quality of health care through patient safety interventions and strategies are incorporated into patient care protocols at the individual, group and system level. The subsequent APN practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the coordinating and managing the care of adults experiencing acute and chronic health problems.

MSN 449 Management of Complex Adult Health Problems (3 Credit Hours)
One course of a three-course sequence, MSN 449 is designed to prepare the Nurse Practitioner to assume the responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults/older adults who are experiencing complex health problems.
Outcomes:
1) Analyze pathophysiologic and psychosocial components of complex health problems while doing client assessments; 2) Select appropriate and cost effective diagnostic tests and procedures for complex health problems; 3) Choose appropriate and cost effective traditional and alternative therapeutic approaches in the management of complex health problems, with emphasis on health restoration and maintenance; 4) Formulate prognoses and expected outcomes for persons with complex health problems; 5) Determine when consultation and collaboration with and referral to appropriate health care providers are necessary; 6) Design an appropriate plan of care for the adult /older adult with complex health problems synthesizing knowledge from ethics, research, and biological, behavioral, and nursing science; 7) Evaluate the management outcomes of adults with complex health problems and revise management as appropriate

MSN 485 APN Practicum: Adult/Older Adult Acute Care NP (1-12 Credit Hours)
Pre-requisites: GNUR 413 & 442 (minimum grade of B-); Co-requisites: GNUR 425
This clinical practicum is designed to guide the student toward the development of scientific knowledge and advanced practice skills in the area of acute care nursing. The attainment of this advanced practice mastery involves the synthesis of concepts, knowledge and skills gained in the previous courses applied to the care of the acutely ill adult patient. Course content focuses primarily on the advanced practice of acute care nursing and guides the student toward an actualization of the role of the acute care practitioner. The student will care for the acute care patient from admission to the tertiary care center through discharge/rehabilitation when possible. Through the use of nursing frameworks, nursing diagnosis, the nursing process, application of advanced knowledge, and advanced practice skills, the student will develop strategies for the nursing management of the critically ill patient. Professional, legal, cultural and ethical implications are presented. The practicum offers the student opportunities to work with the interdisciplinary team and to develop skills necessary for advanced practice nursing, advanced management, and exploration of research in the area of acute care nursing. Clinical seminars will include discussion of concepts that have been introduced in previous courses and will be built upon with added depth. A grand rounds/case study approach will be utilized with cases cared for by students in the clinical arena. Other possible topics include: implementation of the advanced practice nursing role, social support, patient advocacy, vulnerable populations, cultural diversity, contracting, credentialing, privileging, etc. Seminars will also include identification of ethical issues in the students' practice, application of research findings, applying a Jesuit philosophy in the care of the acutely ill individual or family, and individual development of a philosophy of advanced practice nursing. Seminars will include student and faculty-led discussions.

MSN 510 Clinical Practicum for Advanced Practice in the CNS role (2-4 Credit Hours)
Pre-requisites: MSN 447 CNS Practice Across the Adult Age Spectrum
This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact.
Outcomes:
At the end of the course the student will be able to: 1) Apply nursing health related models in the clinical practice setting; 2) Collaborate with the interprofessional team to support and improve patient outcomes; 3) Demonstrate the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; 4) Design, deliver and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; 5) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 6) Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; and 7) Analyze psychosocial, legal, ethical, political, and spiritual factors relevant to advanced nursing practice across the three spheres of impact

MSN 516 Adult Gerontology Acute Care NP Practicum (2-5 Credit Hours)
Pre-requisites: GNUR 536 Mgmt of Adults with Acute/Critical Conditions I and 538 Mgmt of Adults with Acute/Critical Conditions II
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in acute care. The practicum offers the student opportunities to work with the interprofessional team and to develop skills necessary for advanced practice nursing, including advanced management and exploration of evidence in the area of acute care nursing.
Outcomes:
1) Assess acutely ill adults applying nursing, behavioral and natural sciences concepts; 2) Collaborate with an interprofessional team in providing care to acutely ill patients in primary, secondary and tertiary health care settings; 3) Apply evidence-based strategies to the management of acutely ill adults; 4) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 5) Incorporate teaching-learning principles in meeting the educational needs of patients, families, and the community at large; 6) Examine quality improvement issues in the clinical setting, prioritizing patient safety and cost effectiveness; 7) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens

Nursing (RN to MSN)

Designed for nurses who have completed their associate degree in Nursing (ADN) or diploma in Nursing, the online RN-to-MSN program with a concentration in Nursing and Health Care Administration track provides an accelerated pathway to earning both the Bachelor of Science in Nursing (BSN) and Master of Science in Nursing (MSN) degrees within a minimum of two and a half to three years. This degree program develops nurse leaders to assume key roles in a variety of health care settings.

Curriculum

Students need 120 credits to receive BSN degree before transitioning to the MSN part of the program. Details of these requirements are found on the RN to BSN pages of the catalog.

Practicum sites are sought out and secured by the School of Nursing at one of over 300 healthcare organization partners including hospitals, outpatient clinics, healthcare accreditation bodies, consulting firms and professional associations.

Students will complete a comprehensive examination project in the last fall and spring semesters of the program. There will be a written component as well as presentation. Students will present their project during Day of Scholarship event held at the health sciences campus

Immersion Learning

The Nursing and Healthcare Administration program includes an on-site immersion weekend. There will be one weekend dedicated for the immersion during spring semesters of the MSN component of the program. Immersion weekends typically begin a Saturday morning and conclude by Sunday afternoon.

BSN Courses

BSN Courses are detailed on the RN to BSN pages of the catalog. In the RN to MSN option, students complete the graduate level courses in theories and concepts for advanced nursing practice, population health informatics, and advanced quality and safety in health care that count toward the BSN degree requirements. Courses include:

Code	Title	Hours
CMAN 375	Community Health Nursing	3
GNUR 338A	Physical Assessment for R.N.s	3
GNUR 360	Nursing Research: For Evidence-Based Practice	3
GNUR 361	Nursing Ethics	3
GNUR 363	Healthcare Transitions	3
GNUR 383	Leadership for Professional Nursing Practice	3
GNUR 390	Integrative Clinical Practicum	0
GNUR 404	Theories & Concepts for Advanced Clinical Practice [1]	3
CMAN 407	Population Health Informatics [1]	3
CMAN 425	Advanced Quality and Safety in Health Care [1]	3

[1] MSN-level credits

MSN Courses

Students will complete 30 MSN level credits (then 3-credit hour courses) after transitioning from the BSN program completion. The courses are:

Code	Title	Hours
GNUR 407	Social Justice and Ethics in Health Care	3
GNUR 408	Research for Advanced Clinical Practice	3
CMAN 403	Health Care Delivery and Organization	3
CMAN 430	Leadership and Administration in Health Care	3

CMAN 445	Health Care Outcomes	3
CMAN 448	Program Planning and Marketing in Health Care	3
CMAN 460	Health Care Policy	3
CMAN 533	Fiscal Management in Health Care Organizations	3
CMAN 417	Nursing and Health Care Administration Practicum	6

Learning Outcomes

The BSN learning outcomes are detailed on the RN to BSN pages of the catalog. The MSN program goal and learning outcomes are:

The goal of the Master of Science in Nursing program is to prepare nurses at the master's level who use advanced knowledge and skills to assume a leadership role in interprofessional health care delivery to improve health outcomes as the system, population. or individual patient levels.

At the completion of the MSN program, the graduate has the knowledge and skills to:

• Integrate scientific findings from nursing, healthcare, and biopsychosocial fields; public health sciences; and the Jesuit Catholic tradition for the continual improvement of nursing and healthcare across diverse settings.

• Function as a leader emphasizing ethical and critical decision-making, effective working relationships, and application of organizational sciences in a systems perspective, to promote safe and high quality patient-centered care.

• Use translational science to integrate evidence into practice.

• Critically appraise healthcare technologies and information systems and incorporate data to promote optimal communication and healthcare delivery at the system and patient-care levels.

• Understand and appreciate the importance of health policies on health status and employ advocacy strategies to positively influence health care at the population level.

• As a leader or member of an interprofessional team, effectively communicate, collaborate, and consult with other health professionals to improve patient and population health outcomes.

• Working collaboratively with patients, families, and communities, utilize culturally sensitive evidence-based strategies for health promotion and disease prevention locally, nationally, and globally.

• Use expanded knowledge and change-agent skills for professional growth and the provision of indirect and direct care that enhances outcomes for individuals, populations, and systems.

- Evaluate research-based evidence for planning, implementing, and evaluating patient outcomes.
- Apply ethical principles to decision-making.

Nursing and Healthcare Administration (MSN)

The MSN track in Nursing and Healthcare Administration is designed to prepare the next generation of nursing executives with the clinical and administrative skills to shape nursing and health care teams and improve the overall delivery of patient care.

Curriculum

Loyola's MSN in Nursing and Health Care Administration is a hybrid program with both online courses and annual Immersion sessions.

Code	Title	Hours
CMAN 403	Health Care Delivery and Organization	3
CMAN 407	Population Health Informatics	3
CMAN 417	Nursing and Health Care Administration Practicum	1-6
CMAN 425	Advanced Quality and Safety in Health Care	3
CMAN 430	Leadership and Administration in Health Care	3
CMAN 445	Health Care Outcomes	3
CMAN 448	Program Planning and Marketing in Health Care	3
CMAN 460	Health Care Policy	3
CMAN 533	Fiscal Management in Health Care Organizations	3
GNUR 402	Ethics for Health Professionals	2
GNUR 404	Theories & Concepts for Advanced Clinical Practice	3
GNUR 407	Social Justice and Ethics in Health Care	3
GNUR 408	Research for Advanced Clinical Practice	3
Total Hours		**38**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
GNUR 404	Theories & Concepts for Advanced Clinical Practice	3
CMAN 403	Health Care Delivery and Organization	3
	Hours	**6**
Spring		
CMAN 533	Fiscal Management in Health Care Organizations	3
CMAN 407	Population Health Informatics	3
	Hours	**6**
Summer		
CMAN 425	Advanced Quality and Safety in Health Care	3
	Hours	**3**
Year 2		
Fall		
CMAN 430	Leadership and Administration in Health Care	3
CMAN 445	Health Care Outcomes	3
	Hours	**6**
Spring		
GNUR 408	Research for Advanced Clinical Practice	3

This is a sample program plan based on a Fall semester start. All students will work with their program director to create their program plan prior to starting the program.

[1] *Nursing and Healthcare Administration MSN is an online program that will include immersion weekends. There will be one weekend in the Fall semester and one weekend in the Spring semester for the first two years of the student's program. Immersion weekends will begin on Saturday morning and conclude Sunday afternoon.*

Clinical Requirements

All our practicums are designed by faculty members, who will help you secure your clinical site placements. Practicum experiences for the Nursing & Health Care Administration program can be completed in the student's geographical area.

The Nursing & Health Care Administration Practicum is six semester hours (each semester hour equals 56 clock hours).

Exam Requirements

All MSN students are required to complete a comprehensive exam to complete their degree.

Immersion Sessions

Loyola's Nursing Health Care Administration MSN program is offered in a hybrid learning format that combines distance education with on-campus immersion sessions annually incorporating course work, seminars, and presentations.

Learning Outcomes

Program Goal

The goal of the Master of Science in Nursing (MSN) program is to prepare nurses at the master's level who use advanced knowledge and skills to assume a leadership role in interprofessional healthcare delivery to improve health outcomes at the system, population, or individual patient levels.

Program Outcomes

At the completion of the MSN program, the graduate has the knowledge and skills to:

• Integrate scientific findings from nursing, healthcare, and biopsychosocial fields; public health sciences; and the Jesuit Catholic tradition for the continual improvement of nursing and healthcare across diverse settings.

• Function as a leader emphasizing ethical and critical decision-making, effective working relationships, and application of organizational sciences in a systems perspective, to promote safe and high quality patient-centered care.

• Use translational science to integrate evidence into practice.

• Critically appraise healthcare technologies and information systems and incorporate data to promote optimal communication and healthcare delivery at the system and patient-care levels.

• Understand and appreciate the importance of health policies on health status and employ advocacy strategies to positively influence health care at the population level.

• As a leader or member of an interprofessional team, effectively communicate, collaborate, and consult with other health professionals to improve patient and population health outcomes.

• Working collaboratively with patients, families, and communities, utilize culturally sensitive evidence-based strategies for health promotion and disease prevention locally, nationally, and globally.

• Use expanded knowledge and change-agent skills for professional growth and the provision of indirect and direct care that enhances outcomes for individuals, populations, and systems.

Adult-Gerontology Acute Care Clinical Nurse Specialist (DNP)

Graduates of the Adult-Gerontology Acute Care Clinical Nurse Specialist track use advanced skills to care for adults in increasingly complex acute and critical care settings. The curriculum focuses on three spheres of impact: patient care, nursing personnel, and the health care system. Graduates of the track possess the core competencies to practice as a CNS for acute and critically ill adult patients in a variety of inpatients settings, including direct care, consultation, systems leadership, collaboration, research, ethical decision-making, and advocacy.

Curriculum

This program is 63 credit hours.

Clinical Experiences

Practicum experiences are designed by faculty members, who will help secure clinical site placements. Practicum experiences for the Adult-Gerontology Acute Care CNS program can be completed in the student's geographical area. Students must have an RN license in before they begin clinical rotations.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Acute Care Nurse Practitioner (DNP)

Learn to care for adults with complex and critical conditions.

The Adult Gerontology Acute Care Nurse Practitioner track is designed to develop the advanced skills and knowledge to handle complex and critical patient situations, involving adults and older adults.

Curriculum

This program is 71 credit hours.

Clinical Experiences

A minimum of 2,000 hours of recent clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have an Illinois RN license and CCRN certification before they begin their clinical experience/rotation.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership

domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult Gerontology Clinical Nurse Specialist (DNP)

The Clinical Nurse Specialist (CNS) role provides leadership for best practice initiatives and cost- effective quality improvement.

Clinical Nurse Specialists possess the advanced knowledge and skills to coordinate quality care practices across three spheres of impact: patient care, nursing personnel, and the health care system. The role may include direct patient care, as well as consultation, systems leadership, research, ethical decision-making, and advocacy.

Specialty

Learn about the advanced practice care of patients across the cancer care continuum, by adding an Oncology specialty to your DNP degree.

Learn more about Loyola's Oncology Nursing program. (https://www.luc.edu/nursing/academics/certificateprograms/oncologynursing/)

Curriculum

The Adult-Gerontology CNS program can be completed fully online, allowing students to complete their clinical practicum hours at a site close to home. The program is 63 credit hours.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult Gerontology Clinical Nurse Specialist with Oncology Specialty (DNP)

The Clinical Nurse Specialist (CNS) role provides leadership for best practice initiatives and cost- effective quality improvement.

Clinical Nurse Specialists possess the advanced knowledge and skills to coordinate quality care practices across three spheres of impact: patient care, nursing personnel, and the health care system. The role may include direct patient care, as well as consultation, systems leadership, research, ethical decision-making, and advocacy.

The oncology specialty preparation in the Adult Gerontology Clinical Nurse Specialist track provides the graduate with advanced oncology knowledge and skills to care for patients and their families across the cancer care continuum.

CURRICULUM

The Adult-Gerontology CNS program can be completed fully online, allowing students to complete their clinical practicum hours at a site close to home. This program is 63 credit hours for the Adult Gerontology Clinical Nurse Specialist track and 12 credit hours for the Oncology Specialty preparation.

All DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet FNP competencies. Faculty design all clinical rotations and secure placements for students.

Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working with and in underserved communities.

An RN license and a minimum of 2,000 hours of recent RN clinical practice experience is required before beginning the first practicum.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Family Nurse Practitioner with Emergency Specialty (DNP)

The Family Nurse Practitioner with Emergency Specialty track of the DNP program is designed to prepare graduates to work in emergent settings. Graduates are prepare to prioritize and triage patients, conduct advanced health assessments and health histories, diagnose and manage episodic illnesses, injuries, and acute exacerbation of chronic diseases in emergency settings, undertake emergency care procedures, and provide leadership in team partnerships to advanced emergency care, emergency preparedness, and response efforts.

Curriculum

This program is 79 credit hours.

Clinical Experiences

Faculty design and secure all clinical rotations for students. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on serving communities with high needs. Clinical experiences will be completed in primary care and emergency department settings.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.

- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Psychiatric Mental Health Nurse Practitioner (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental health, develop and implement mental health treatment plans included medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

Curriculum

The Psychiatric Mental Health NP program is a blended format with both online and in-person instruction, including Immersion weekends at Loyola's Health Sciences Campus. Many students are working professionals with families, so we offer both part-time and full-time options to fit your schedule.

With our rigorous curriculum and significant number of credit and clinical hours, we seek to prepare you to successfully take the American Nurses Credentialing Center (ANCC) certification board in Psychiatric Mental Health Nurse Practitioner (Across the Lifespan).

The DNP can be completed in 72 credit hours or about four to five years.

Practicum		
GNUR 482	Psychiatric Mental Health Advanced Practice Nursing Practicum	2-3

Clinical Experience

DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet the competencies to practice as a psychiatric mental health NP. Faculty design clinical rotations and place students with preceptors. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working in underserved communities.

An RN license and a minimum of 2,000 hours of recent clinical nursing experience in psychiatric mental health is required before beginning your first practicum.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level

of professional nursing practice in advancing health and health outcomes.

Psychiatric Mental Health Nurse Practitioner with Substance Use and Addictions Specialty (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental health, develop and implement mental health treatment plans included medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

The Substance Use and Addiction specialty preparation is focused on the comprehensive diagnosis and treatment of substance use disorders and the impact of these disorders on psychiatric mental health and treatment options. Students complete additional coursework and practicum experiences with a specific focus on substance use and addiction.

Curriculum

The Psychiatric Mental Health NP with Substance Use and Addictions specialty is offered in a hybrid learning format with both online and in-person instruction. This program is 73 credit hours.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Systems Leadership (DNP)

The Systems Leadership track of the Doctor of Nursing Practice program integrates advanced nursing practice competencies in a post- master's curriculum that includes leadership, systems thinking, quality and safety, health policy, and health care economics and finance.

Curriculum

Our flexible DNP in Systems Leadership program provides part-time and full-time options to fit your schedule.

Courses

Code	Title	Hours
GNUR 521	Population-Focused Health	3
GNUR 420	Leadership and Roles in Advanced Nursing Practice	3
GNUR 523	Health Care Policy and Economics	3
GNUR 407	Social Justice and Ethics in Health Care	3
GNUR 405	Introductory Statistics for Healthcare Professionals	3
GNUR 545	Evidence Translation for Advanced Clinical Practice	3
Elective Course		3
Practicum		
DNP 511	Practicum	1-6

The online program includes two required immersion weekends for integrated learning and collaboration with classmates and faculty. The weekends occur once a year during the last two years of the program at Loyola's Health Sciences Campus.

DNP Project

Students are required to complete a final DNP project which must focus on translating evidence to practice, practice change, or health policy change.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Women's Health/Gender Related Nurse Practitioner (DNP)

The Women's Health/Gender Related track of the Doctor of Nursing Practice program prepares graduates to conduct advanced health assessments and health histories, develop treatment plans for acute illness and chronic disease management, manage health across the lifespan, including pregnancy and menopause, manage sensitive topics in women's and gender related health, and provide leadership in interprofessional, team-based evidence based health care.

Curriculum

This program is 71 credit hours.

GNUR 517	APN Practicum: Primary Health Care	1-6

Clinical Experiences

A minimum of 2,000 hours of recent clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have a RN license in the state of Illinois before they begin the clinical portion of the program.

Learning Outcomes

PROGRAM GOAL

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

PROGRAM OUTCOMES

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.
- Collaborate with patients, families, and communities, utilizing culturally sensitive, evidence-based strategies for health promotion and disease prevention.
- Communicate, collaborate, and consult with members of the interprofessional team in the improvement of patient and population health outcomes.

Post-Graduate Advanced Practice Registered Nurse (APRN) Certificate

The Post-Graduate APRN Certificate program is designed for graduate prepared registered nurses who wish to obtain preparation in an additional advanced practice nursing role and/or population, and eligibility for completing the certification examination in that role and/or population. A gap analysis that considers prior graduate level coursework and the recency of that coursework serves as the foundation for an individualized program of study leading to the certificate.

Program Goal

The goal of the post-graduate Advanced Practice Registered Nurse (APRN) certificate programs is to prepare APRNs in a selected role and population, with the option of a specialty focus, by building on previous graduate level nursing education.

Learning Outcomes

Upon the successful completion of the Post-Graduate Certificate Program, the graduate will be able to:

- Integrate scientific findings from nursing, healthcare, biopsychosocial fields and public health into values-based advanced practice nursing care.
- Function as a clinical leader, emphasizing ethical and critical decision-making and effective working relationships in the delivery of safe, high quality, patient-centered care.
- Use translational science to integrate evidence into practice.
- Employ advocacy strategies in advanced nursing practice.

Oncology Nursing Certificate

The Oncology Certificate program is designed for baccalaureate or graduate prepared nurses who desire to advanced their skills and knowledge in the care of patients with cancer.

Students may also complete Oncology Specialization as part of their program of study in the Adult-Gerontology Clinical Nurse Specialist or Adult-Gerontology Primary Care Nurse Practitioner tracks of the DNP program.

Loyola Nursing's Online Oncology Certificate program is designed for advanced practice nurses and BSN-prepared nurses who want to advance their oncology knowledge and skills. Experience in an oncology nursing practice area is required.

Curriculum

Loyola's Oncology Certificate program focuses on the continuum of cancer care—from prevention, risk identification, acute care, and end of life.

Credit Hours

Online Certificate: nine semester hours

Courses

If you are pursuing an Oncology Certificate, you will take the following courses:

- Cancer Biology and Epidemiology
- Palliative/Supportive Management
- Diagnostic and Therapeutic Approaches

Students pursuing Oncology Specialty preparation as part of the DNP program complete the following courses and the oncology specialty practicum:

- Cancer Biology and Epidemiology
- Palliative/Supportive Management
- Diagnostic and Therapeutic Approaches

Learning Outcomes

The Oncology Nursing Certificate program is focused on:

- Collaboration with health professionals to plan and implement best practices in cancer care
- Providing advanced nursing care to patients and families across the cancer care continuum

Parkinson School of Health Sciences and Public Health

Loyola University Chicago's Parkinson School of Health Sciences and Public Health brings together our call as a Jesuit institution to go to the

frontiers of education, research, and practice, and help people who live at the margins.

An established leader in health care education with the Stritch School of Medicine and the Marcella Niehoff School of Nursing, the Parkinson School of Health Sciences and Public Health draws on those strengths to address today's public health challenges and train the next generation of experts in public health, health systems and informatics, dietetics, exercise science, and medical laboratory science.

Flexible degree programs and certificates are available as listed below that meet student, community, and industry needs. The Parkinson School includes programs for undergraduate and graduate students, as well as career professionals who seek additional skills or a career change. Innovative and accessible program formats for adult learners along with traditional undergraduates include online instruction and hybrid learning programs on Loyola's Health Sciences Campus and Lakeshore campuses.Insight into the student experience (https://www.luc.edu/features/stories/parkinson/).

Graduate Programs

- Clinical Research Methods and Epidemiology (MS) (p. 1619)
- Dietetic Internship Certificate (p. 1620)
- Dietetics (MS) (p. 1622)
- Exercise Science (MS) (p. 1623)
- Health Informatics (MS) (p. 1624)
- Health Informatics Certificate (p. 1625)
- Healthcare Administration (MHA) (p. 1625)
- Medical Laboratory Science (MS) (p. 1626)
- Medicine/Public Health (MD/MPH) (p. 1627)
- Public Health (MPH) (p. 1629)
- Public Health Certificate (p. 1631)
- Social Work/Public Health (MSW/MPH) (p. 1632)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Exercise Physiology (EXCM)

EXCM 401 Applied Physiology of Exercise (4 Credit Hours)
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.
Outcomes:
1) Describe major milestones, influences, and future directions in the development of the science of exercise physiology; 2) Explain the importance of the physiological adaptations that occur as a result of properly designed training programs; 3) Analyze measures of the physiology of respiration, circulation, energy production, metabolism, and muscle function in rest and exercise states; 4) Interpret research findings focused on cardiovascular, respiratory, metabolic and neuromuscular physiology in exercise science; 5) Perform selected laboratory and field tests of physiological function and physical fitness; 6) Interpret results from laboratory and field tests of physiological function and physical performance; 7) Differentiate positive training changes and signs and symptoms of overtraining among healthy individuals throughout the life cycle

EXCM 424 Motor Learning and Performance (3 Credit Hours)
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.
Outcomes:
1) Understand theoretical approaches that drive motor control and motor learning research; 2) Analyze principles and processes underlying movement skilled performance; 3) Analyze the human motor system and how it supports the acquisition and retention of complex movement skills; 4) Adapt instruction situations to achieve maximum performance and retention of learned skills; 5) Relate information processing and decision-making models to performance and movement

EXCM 435 Health Promotion and Wellness Theories and Frameworks (3 Credit Hours)
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.
Outcomes:
1) Relate concepts of health, health promotion, and wellness that influence individual and group health and quality of life; 2) Assess the health education and health promotion needs of individuals and groups in diverse populations; 3) Design culturally congruent health education, wellness, and behavioral modification programs, focused on improved health and quality of life, in community-based settings; 4) Implement health education, wellness, health promotion, and behavioral modification programming for diverse populations; 5) Evaluate health education, wellness, health promotion and behavioral modification programming in a variety of settings, using an outcomes-oriented approach; 6) Identify cultural, social, economic, and political influences on decision making and action in health and wellness

EXCM 444 Strength Training and Conditioning (3 Credit Hours)
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individuals¿ goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.
Outcomes:
1) Analyze the relation between resistance training and human performance; 2) Incorporate appropriate exercises, such as resistance training, medicine ball, balance, plyometric, and linear and lateral movement exercises into exercise prescriptions; 3) Differentiate between general fitness prescriptions and specific training to enhance athletic performance; 4) Evaluate biomechanical aspects of efficiency and performance; 5) Apply performance enhancement training principles to individuals' specific needs and goals

EXCM 450 Nutrition, Health and Performance (3 Credit Hours)
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimension of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.
Outcomes:
1) Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance; 2) Apply principles of evidence-based nutrition to the food habits and practices of diverse individuals and populations; 3) Analyze energy and nutrient intake based on level of training and type of sport and exercise; 4) Understand roles and domains of practice of collaborating professions in promoting health, fitness and performance; 5) Develop interprofessional competencies to collaborate with nutrition professionals in optimizing nutrition for health, fitness, and performance

EXCM 454 Applied Sports Science (3 Credit Hours)
This course focuses on the application of science in the study of elite athlete sports performance. Advanced aspects of physiological monitoring, along with other athlete assessment tools will be examined. Special emphasis will be placed on the evidence-based, practical application of these various techniques, enabling a holistic approach to improving athlete health and performance.
Outcomes:
Identify the relation between cumulative stress and human performance; Plan periodized practices of strength and conditioning, sport training, nutrition, and psychological preparation to optimize performance in individual and team sport

EXCM 458 Cardiac and Pulmonary Disease and Rehabilitation (3 Credit Hours)
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.
Outcomes:
1) Understand anatomy and physiology associated with cardiopulmonary health and disease; 2) Relate pathophysiology changes in cardiac and pulmonary disease to exercise prescription; 3) Explain diagnostic tests and procedures used in exercise assessment and intervention in cardiac and pulmonary health and disease; 4) Understand essential elements and phases of cardiac and pulmonary rehabilitation; 5) Design preventive exercise prescriptions for cardiac and pulmonary health in individuals and groups; 6) Design rehabilitative exercise prescriptions for patients with cardiac and pulmonary health alterations

EXCM 468 Application of Advanced Clinical Exercise Testing & Prescription (4 Credit Hours)
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.
Outcomes:
1) Understand the signs, symptoms and scope of cardiovascular conditions, respiratory conditions, and metabolic conditions, and the development of these pathologies; 2) Apply risk assessment and stratification models in the diagnostic and functional assessment of individuals; 3) Evaluate the indications and contraindications of subject selection for testing, considering safety precautions, indications for test termination, and emergency procedures for conducting a graded exercise stress test; 4) Interpret results of exercise stress tests; 5) Differentiate normal and abnormal electrocardiographic responses to exercise of varying duration and intensity; 6) Design appropriate exercise test mode and protocols in consideration of client characteristics; 7) Understand responses to various emergency situations that may occur in exercise settings

EXCM 475 Exercise Applications in Special Populations (3 Credit Hours)
This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.
Outcomes:
1) Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations; 2) Analyze the effects of exercise training and nutrition on the underlying etiology and pathophysiology of acute and chronic conditions; 3) Prescribe exercise activities to optimize health and performance in special populations; 4) Adapt exercise prescriptions based on the individualized needs of individuals with anatomic, physiologic, or sensory challenges; 5) Evaluate the effectiveness of adaptations to exercise prescriptions and programming in special populations

EXCM 478 EKG Interpretation (0 Credit Hours)
This course will help students master the practical competencies of electrocardiography (EKG), including performing a 12-lead EKG, ambulatory monitoring, and the concepts of monitoring and interpreting an EKG with and without exercise stress testing. Additionally, this course will present content related to the cardiac cycle, EKG abnormalities, ectopy, and dysrhythmias, and identifying ischemia. Students will perform hands-on 12-lead EKG analysis at rest and with exercise and the steps required for ambulatory monitor testing.

EXCM 480 Advanced Exercise Assessment and Programming (3 Credit Hours)
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.
Outcomes:
1) Apply periodization models in the optimization of athletic or physical training and performance; 2) Analyze the relationship between training volume and intensity over time; 3) Analyze principles of program design for performance enhancement; 4) Evaluate testing approaches to the assessment of strength and conditioning; 5) Generate exercise program modifications for individuals based on youth development, injuries, and inexperience; 6) Relate variables of overload, variation, and specificity to strength and conditioning training

EXCM 482 Research Methods and Evidence in Exercise Science (3 Credit Hours)
This course prepares the student to understand scholarly inquiry, evaluate research evidence, develop evidence-based practices/protocols, and generate knowledge for evidence-based practice in exercise and fitness. Methods of operationalizing scholarly inquiry include: understanding relations among theory, research, and practice; formulating research questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying research findings to exercise science practice. Social, cultural, political and ethical issues related to research are addressed, including special considerations of research conducted in exercise settings.
Outcomes:
1) Understand scholarly inquiry processes in relation to evidence-based practice and knowledge generation in the field of Exercise Science; 2) Formulate research questions that address clinical, educational, administrative, or policy issues for evidence-based practice in Exercise Science; 3) Understand the elements of various quantitative research designs; 4) Assess the adequacy of selected quantitative and qualitative designs in answering research questions in Exercise Science; 5) Evaluate extant evidence and theories relevant to knowledge gaps in the field of exercise science; 6) Analyze ethical issues and concerns in research related to Exercise Science

EXCM 485 Applied Biomechanics (4 Credit Hours)
This course will provide an analytical approach to the study of the human nervous system and human motion as applied to kinematic and kinetic analysis, study of anatomy, physiology, and mechanics.
Outcomes:
Students will use and apply laboratory measurement techniques commonly used in exercise science

EXCM 490 Special Topics in Exercise Science (1-3 Credit Hours)
Contemporary research, literature, projections and views as applied to fitness, nutrition, health, and well-being. Much of the learning that occurs in this course will be the result of group discussion. The topic areas covered will include fitness, nutrition, health, aging, obesity, and injuries. However, topics covered will largely be determined by student interests. Pre-requisites: Restricted to Parkinson School of Health Sciences and Public Health students.
Outcomes:
1) Understand research findings and scholarly writings in a specific topical area of Exercise Science; 2) Evaluate scientific and theoretical literature in s specific topic area of Exercise Science; 3) Direct scholarly discussion in a topical area of exercise science, with a focus on the individual, family, and community

EXCM 495 Advanced Exercise Science Internship (4 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management. 1 credit hour is 50 clock hours of internship.
Outcomes:
1) Apply specialized skills and knowledge acquired in exercise science core courses in a practicum setting; 2) Work collaboratively with the interprofessional team; 3) Participate in planning sessions, meetings, and other activities of the professional staff in the field setting; 4) Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

Food and Nutrition (FONU)

FONU 400 Role Development in Dietetic Practice (1 Credit Hour)
Pre-requisites: Admission to the dietetic internship
This course includes concepts and resources related to professional practice as a registered dietitian. Ethical issues, licensure, and scope of practice will be explored. Professional development will be discussed from entry-level to advanced practice. Fiscal aspects of professional practice, such as reimbursement and compensation, will also be considered.
Outcomes:
Students will define ethical issues, licensure requirements, increase professional development, and learn about fiscal aspects of the practice, such as reimbursement and compensation

FONU 410 Nutrition Focused Physical Assessment (2 Credit Hours)
This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities. Master of Science in Dietetics major, or instructor permission
Outcomes:
Demonstrate competence in conducting a nutrition-focused physical assessment; Demonstrate skills for assessment and care of the patient receiving specialized nutrition support; Measure common physiologic parameters used in medical nutrition therapy

FONU 420 Transition to Supervised Practice in the Dietetic Internship (1 Credit Hour)
Pre-requisites: admission to LDI
This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422 Medical Nutrition Therapy Theory (3 Credit Hours)
Pre-requisites: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, and renal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424 Public Health Nutrition and Research Theory for Dietetic Practice (3 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

FONU 425 Supervised Practice in Public Health Nutrition, Research, Professional Development & Marketing (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 426 Food Management Theory: Geriatric Nutrition (1 Credit Hour)
This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition (1 Credit Hour)
This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 501 Writing and Communications in Nutrition and Dietetics (3 Credit Hours)
This course focuses on scientific writing and communication skills essential to dietetic practice. Emphasis will be placed on clarify, consistency and translation of scientific evidence into effective messages for diverse populations. Standards for publication of practice and research based papers understanding and responding to peer review process will be discussed. Master of Science in Dietetics major, or instructor permission
Outcomes:
Create proposals, scientific reports and/or articles using writing skills of planning, drafting, revising and editing to incorporate appropriate evidence tailored to different audiences, publications and media formats

FONU 503 Dietetic Theories & Research Methods (3 Credit Hours)
This course analyzes theories of health and disease with implications for dietetic practice. Principles of research will be examined with a focus on methods to assess food, nutrients and related physical or biochemical parameters.

FONU 505 Trends in Dietetic Practice (2 Credit Hours)
Pre-requisites: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission
This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergics and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including movational interviewing for behavior change.
Outcomes:
Student will demonstrate knowledge in emerging areas related to dietetic practice

FONU 507 Behavioral Change for Health Promotion (3 Credit Hours)
This course focuses on concepts and theories of health and behavior related to food, nutrition and other behaviors. Evidence to support select skills and techniques for health will be evaluated and applied. The impact of interventions will be analyzed to provide evidence-based frameworks for behavioral change in individuals and groups. Master of Science in Dietetics major, or instructor permission.
Outcomes:
Incorporate evidence-based behavioral change interventions into nutrition care plans; demonstrate skill in a behavioral change encounter in a simulation, analyze major approaches and influences of health promotion (eg policy, community engagement, advocacy and social marketing)

Health Informatics & Data Science (HIDS)

HIDS 401 Foundations of Health Informatics (3 Credit Hours)
Health Informatics / Biomedical Informatics is the information as studied in or applied to biomedical science, healthcare, and public health. Thus, its focus is on the use of informatics methods to transform data into actionable knowledge within the broad context of health, from basic science, to public health.
Outcomes:
By the end of this course, students will be able to understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge

HIDS 411 Clinical Data Science (3 Credit Hours)
Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.
Outcomes:
By the end of this course, students will be able to understand and describe the steps in the life cycle of data in biomedical and clinical research

HIDS 412 Translational Bioinformatics (3 Credit Hours)
Pre-requisites: HIDS 411 Clinical Data Science
This course covers the fundamental issues of bioinformatics and how they apply to translational and clinical problems. The course is organized in 4 parts: sequence analysis, databases and ontologies, genome-wide association and linkage analysis, and networks.
Outcomes:
Students will be able to understand and apply a broad range of bioinformatics algorithms, and their computational efficiency; apply and analyze informatics techniques to retrieve, store, and analyze data

HIDS 421 Security and Privacy in Healthcare (3 Credit Hours)
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.
Outcomes:
Students will be able to understand the role of information security and data privacy in healthcare; apply basic principles of computer security; apply/analyze security principles in research data management

HIDS 422 Ontologies in Healthcare (3 Credit Hours)
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.
Outcomes:
Students will be able to understand the role of ontologies in knowledge representation; understand the differences between realist and anti-realist ontologies and apply different types of ontologies in biomedical research

HIDS 431 Introduction to Natural Language Processing in Health (3 Credit Hours)
Pre-requisites: HIDS 401 Foundations of Health Informatics and HIDS 411 Clinical Data Science
The objective of this course is to present a broad overview of methodologies to automatically analyze and mine biomedical text automatically. Students will be exposed to some of the common and state-of-the-art software, algorithms and techniques to extract content and knowledge from biomedical texts.
Outcomes:
By the end of this course, students will be able to understand and apply artificial intelligence methodologies and software to automatically extract information from unstructured text

Healthcare Administration (MHA)

MHA 405 U.S. Health Systems Management (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.
Outcomes:
Distinguish roles, functions and responsibilities of healthcare system components; Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access

MHA 415 Culture of Quality & Safety in Health Care (3 Credit Hours)
Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.
Outcomes:
Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes; Analyze role of various systems, factors in creating safe environments of care; Explain "just culture" thinking on safety, quality improvement; Develop plan for improvement of safety/quality

MHA 430 Managerial Epidemiology (3 Credit Hours)
Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.
Outcomes:
Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions

MHA 440 Healthcare Management and Ethics (3 Credit Hours)
This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.
Outcomes:
Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager; Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges

MHA 451 Healthcare Finance I (3 Credit Hours)
This course provides a basic understanding of financial management principles with emphasis on the not-for-profit entity. Foundational accounting concepts are explored with a focus on risk, financial statements, capital investments, debt and equity financing.
Outcomes:
Students will be able to recognize the three main corporate financial statements and explain in lay terms the information contained therein

MHA 452 Healthcare Finance II (3 Credit Hours)
Pre-requisites: MHA 451
Building on the foundational learning from Healthcare Finance I, this course focuses on for-profit entities within the health care sector and reimbursement methods. Financial concepts, discounted cash flow analysis, risk, financial performance evaluation, capital investments, capital budgeting, debt, equity financing will be explored. Description, assessments of reimbursement methodologies, strategies will be explored.
Outcomes:
Engage in long-term financial forecasting and planning; Differentiate various reimbursement strategies/ methodologies; Complete comprehensive financial forecast for a healthcare organization

MHA 460 Strategy and Leadership in Healthcare Organizations (3 Credit Hours)
This course examines competitive strategy, leadership in current healthcare environment. Content emphasizes formulation, execution & management, critical evaluation of organizational strategy. Key challenges faced by U.S. healthcare organizations and strategic responses are introduced. The relationship between strategic outcomes and leadership is explored emphasizing values-based leadership and individual qualities that define effective leaders.
Outcomes:
Analyze internal and external environments to which a strategy must respond; Evaluate strategic options and formulate a strategy for healthcare organizations; Manage execution of a strategy; Evaluate performance of a strategic plan; Compare theoretical concepts of leadership

MHA 468 Topics in Healthcare Data Analytics and Business Intelligence (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
This course explores the use of data analytics, mining, visualization, tools to support data-driven decisions in healthcare organizations. Students develop a comprehensive view of data, use data to drive outcomes and efficiencies in healthcare. Commonly used methods/challenges in data analytics discussed. Multiple sources are explored including patient-generated data, electronic health records, administrative databases.
Outcomes:
Students will discuss the role of data analytics in health care organizations, demonstrate conceptual and practical knowledge, share structuring of health and healthcare data, retrieve data, perform descriptive analyses on healthcare datasets

MHA 480 Topics in Post-Acute Care (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
This course acquaints students with services delivered following traditional acute-care episodes or stays, providing comprehensive overview of programs, policies, services specific to post-acute care providers, facilities. The operating environment is examined with emphasis on regulations, reimbursement, care delivery, alternative delivery systems. Timely issues, challenges, dilemmas confronting long term care management explored.
Outcomes:
Demonstrate understanding of the basic operations of the continuum of post-acute care services, including delivery systems, consumers, providers, competitors; Discuss legal, regulatory environment surrounding post-acute care; Delineate role of financing/reimbursement

MHA 484 Healthcare Decision Support (3 Credit Hours)
The course focuses on understanding decision support systems and how they are used to inform leadership decision-making across healthcare organizations
Outcomes:
Identify and describe current uses of decision supports; Use various decision and analytic models for interactive decision-making and problem solving; Explain the differences between knowledge-based, data-based, and model-based DSS, distinguish among their basic features, benefits, and limitations of intelligent decision support methods; Compare traditional decision support with organizational and group decision support methods

MHA 490 Research and Innovation in Healthcare Administration (3 Credit Hours)
This course explores the research process and the regulatory requirements in drug, device, and biological product development. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations.
Outcomes:
1) Outline the research and drug, device, and biologic development processes; 2) Discuss regulatory and policy factors that impact health-related research; 3) Critically evaluate health-related research; 4) Evaluate academic and industry contributions to innovation; 5) Evaluate the relevance and implementation challenges of novel research; 6) Determine how ethical healthcare leaders impact innovation and research

MHA 491 Systems Thinking for Healthcare Leaders (1 Credit Hour)
This two-day immersion will serve as an introductory course for the MHA program. Students will explore the concepts of systems thinking and develop practical skills for its application in healthcare settings. Students will be provided with supplemental reading materials and participate in simulations and exercises to hone their skills in this critical leadership competency.
Outcomes:
Students will define systems thinking as a leadership model and Apply relevant components of systems thinking in real-world healthcare setting

MHA 492 Governance of Healthcare Systems (1 Credit Hour)
Pre-requisites: MHA 491
Two-day immersive course provides an overview of how health systems are governed focusing on the structure and operations of boards of directors, as well as external regulatory oversight agencies. Students will explore the relationship of healthcare organizations with governing bodies and identify strategies for effective communication and engagement.
Outcomes:
1) Define various health system governance models and how they are implemented to support operations; 2) Demonstrate knowledge of the relationship between health system leadership and various governing and regulatory bodies

MHA 493 Performance Management in Healthcare (1 Credit Hour)
Pre-requisites: MHA 491
This two-day immersion helps students build practical skills for ongoing performance management and monitoring of strategically aligned key performance indicators. Students will explore use of scorecards, dashboards as tool for ongoing outcomes monitoring, management within health systems. Students will be provided with supplemental reading, guest lecturers, participate in simulations, exercises.
Outcomes:
Students will build outcome monitoring scorecards and dashboards, effectively communicate outcomes and performance metrics

MHA 494 Multi-Disciplinary Teams in Healthcare (1 Credit Hour)
Pre-requisites: MHA 491, MHA 492, MHA 493
Two-day immersion provides students with practical lessons, recognizing and optimizing the multi-disciplinary nature of healthcare workforces. Focus on building cross-functional teams, recognizing potential strengths/weaknesses of team members from different educational/practice backgrounds. Team building exercises, small group theories will be incorporated to demonstrate practical value of multi-disciplinary teams. Course includes supplemental reading materials, guest lecturers, simulations, exercises to hone skills in critical leadership competency.
Outcomes:
Students will identify opportunities, challenges facing healthcare workforce; will effectively build multi-disciplinary teams of health care workers from a variety of specialties and fields

MHA 495 Specialty Capstone (3 Credit Hours)
This course provides students with the direction and support to complete an independent capstone project relative to their specialty track or area of professional interest. Specialty track students must complete the capstone project in the field of their specialty. Generalist students may choose a focus of study. Students identify a community-based partner of interest and secure commitment from the organization and individual preceptor willing to facilitate the project onsite. Students develop a precise and targeted literature review on a topic of interest and propose an interventional capstone project to address the identified need/problem. A written plan of execution is submitted in the form of the Capstone Project Plan.
Outcomes:
Examine a relevant healthcare problem or knowledge gap by executing and synthesizing professional research and literature review; Demonstrate analytic, critical thinking and problem-solving capabilities by proposing an administrative solution to a healthcare problem; Formulate a precise problem statement defining the current state, impact, and desired state for identified issue; Delineate relevant data required to analyze the problem and propose intervention; Design a feasible and evidence-based course of action for implementation

MHA 499 Independent Study in Healthcare Administration (1-3 Credit Hours)
Pre-requisites: Course open to MHA students; Permission of the Program Director
This is a directed study course in healthcare administration for approved students, supervised by a member of the MHA faculty. Students must have assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

Implementation Science (MIS)

MIS 400 Implementation Science Theories (3 Credit Hours)
The course will review the major theories used in implementation science.
Outcomes:
Students will be able to define, explain and determine in what situations the various theories of implementation science best apply

MIS 402 Implementation Science Research Methods (3 Credit Hours)
This course will review research methods used in conducting implementation science research.
Outcomes:
Students will be able to define, explain and apply various research methods to different study questions

MIS 404 Qualitative Methods for Implementation Science Research (3 Credit Hours)
This course will review various qualitative methods including interviews, focus groups and other strategies.
Outcomes:
Students will be able to create an interview guide and focus group script, and understand basics of coding qualitative data

MIS 406 Community-Engaged Research (3 Credit Hours)
This course will review various qualitative methods including interviews, focus groups and other strategies.
Outcomes:
Students will be able to create an interview guide and focus group script, and understand basics of coding qualitative data

MIS 408 Dissemination Strategies (1 Credit Hour)
This brief course will demonstrate how to present key findings in the most understandable and usable formats.
Outcomes:
Students will be able to prepare key findings and messages in understandable and usable formats

MIS 410 Field Practicum in Implementation Science (6 Credit Hours)
Pre-requisites: MIS 400, MIS 402, MIS 404, MIS 406, MIS 408
This practicum will provide students with hands on experience in developing and leading a pilot implementation project.
Outcomes:
Students will present their findings as a requirement for completion of their MS

Master of Public Health (MPBH)

MPBH 400 Determinants of Population Health (3 Credit Hours)
This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed. Graduate standing in the MPH or Public Health Certificate Program, or permission of instructor.

MPBH 401 Environmental Health (3 Credit Hours)
This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.
Course equivalencies: X-ENVS301/PUBH301/MBPH401

MPBH 402 Public Health Practice and Management (3 Credit Hours)
This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.

MPBH 403 Introduction to Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

MPBH 404 Biostatistics for Health and Biological Science (3 Credit Hours)
Introductory course allows students to utilize SAS software to perform analytical methods including Graphical and Numerical Descriptive Statistics, Probability calculations and distributions with emphasis on the binomial(discrete) and normal (continuous) distributions, Inferential Statistics: Point Estimation, Interval Estimation and Hypothesis Testing, Nonparametric statistical methods and Sample Size Calculation.
Course equivalencies: CRME420/BMSC402/MPBH404

MPBH 407 Public Health Policy: Concepts and Practice (3 Credit Hours)
Pre-requisites: Open for registration for MPH students; All other students require department approval
No course description is available
Course equivalencies: PUBH 307/MPBH 407

MPBH 409 Biostatistics I (3 Credit Hours)
Pre-requisites: Introductory course
Introductory biostatistics course which allows students to utilize STATA software and perform/ operate analytic methods. Course provides outline of tests of statistical significance and probability theory. Students will conduct statistical hypothesis testing using methods presented in class.

MPBH 410 MPH Practicum (1-3 Credit Hours)
All MPH students are required to complete at least 1 credit of a practicum (internship) to gain a better understanding of a public health practice, directly utilize their own MPH training, and network with public health professionals in the field. Students need to provide a signed agreement and must be in the process of completing 21 credit hours, including at least four core courses.

MPBH 411 MPH Capstone (1-3 Credit Hours)
The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice. Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.
Outcomes:
The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation

MPBH 412 Intro to Statistical Computing for Public Health (2 Credit Hours)
Pre-requisites: This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409)
This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages.
Outcomes:
Upon completion of this course, students will be able to use statistical software to: read in data files, subset data, create variables, recode data values, analyze data, summarize the results

MPBH 413 The Epidemiology of Obesity: An Energy Balance Perspective (3 Credit Hours)
Pre-requisites: MPBH 403 or department consent
This course is a survey course designed to expose MPH and other interested inter-professional students, e.g., nursing and dietetic students, to the multiple domains of the worldwide obesity epidemic. The course will explore determinants, outcomes and public health policy associated with obesity from the perspective of energy balance, i.e., that ultimately all determinants and outcomes of obesity.
Outcomes:
Describe the concept of energy balance and how it is related to the development, treatment and prevention of overweight and obesity; Explain the scope and historical trends of obesity prevalence among children and adults in both the industrialized and developing worlds

MPBH 414 Introduction to Global Health (3 Credit Hours)
Introduction to Global Health is an introductory course to global health, both epidemiology and policy aspects, focusing on health disparities on the international level.
Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 416 Health Services Research Methods (3 Credit Hours)
This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.
Outcomes:
Determine health services research's scope

MPBH 417 Global Maternal & Child Health (3 Credit Hours)
Pre-requisites: MPBH 414 Introduction to Global Health and MPBH 403 Introduction to Epidemiology; This course will be required for the newly approved Global Health Equity track of the Master in Public Health Program
No course description is available
Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 420 Public Health Law: Theories and Cases (3 Credit Hours)
This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy. This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.
Outcomes:
Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching public health through law

MPBH 421 Biostatistics II (3 Credit Hours)
Pre-requisites: MPBH 409 Biostatistics I Students will utilize text on Biostatistics for Public Health
Course will cover linear and logistic regression and ANOVA. Students will utilize STATA software for hypothesis testing.
Outcomes:
Students will conduct statistical hypothesis testing using methods presented in class

MPBH 422 Population Health Planning & Management (3 Credit Hours)
This course prepares students to confront--thoughtfully and systematically-resource allocation decisions by developing the knowledge, tools, and skills needed to plan, implement, and evaluate programs, interventions, and services that address public health problems, improve population health, and reduce inequities.

MPBH 423 Intermediate Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 Introduction to Epidemiology
Intermediate Epidemiology focuses on analysis of observational data. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 424 Health Economics and Healthcare Financing (3 Credit Hours)
This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research.
Outcomes:
Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis

MPBH 425 Policy Analysis (3 Credit Hours)
This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice. This is a track-specific requirement for MPH Graduates in the Health Policy track.
Outcomes:
Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems

MPBH 426 Infectious Disease Epidemiology (3 Credit Hours)
Pre-requisites: Introduction to Epidemiology (MPBH 403)
This course will introduce the basic methods for infectious disease epidemiology and review case studies of important disease syndromes and entities. Important terminology and definitions for infectious disease epidemiology will be reviewed, including nomenclature related to outbreak investigations, disease surveillance, laboratory diagnosis, molecular epidemiology, disease transmission and susceptibility.

MPBH 427 Introduction to Correlated Data Analysis (1 Credit Hour)
Co-requisites: MPBH 421 (or prior completion of a two-semester course sequence in Biostatistics) and one course in statistical computing such as MPBH 412
This course covers a broad overview of statistical models and estimation methods for outcome variables (normal and non-normal) that are clustered or measured repeatedly in time or space. The focus is on applications and computer software methods for correlated regression models, including ANOVA based methods, hierarchical linear models, etc.

MPBH 430 Environmental Health Policy (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. This course is offered both online and in-person.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

MPBH 431 Grant Writing (3 Credit Hours)
This course will provide an overview of the NIH extramural funding process, with additional information on funding opportunities outside NIH. Students will learn the key components of successful grants and factors that may lead to grants not being reviewed favorably. The focus will be on grant writing skills.
Outcomes:
Students will be required to write a 10-12 page R01-style grant proposal (application), as described in the NIH guidelines

MPBH 432 Health Impact Assessment (3 Credit Hours)
This course is an introduction to health impact assessment which is a decision-support tool that uses a combination of procedures, methods, and approaches to determine how a policy, project/program may affect the health of a community, and the distribution of those effects within the population of the community.

MPBH 433 Clinical Trials (3 Credit Hours)
Clinical Trials course is designed for students interested in the design, implementation and management of clinical trials and their ethical and clinical implications. Topics include trial design, randomization, recruitment and sample size, monitoring and analysis. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 434 Systematic Review and Meta-Analysis (3 Credit Hours)
Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 495 Special Topics (1-3 Credit Hours)
This course covers a specific topic in public health. Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor. Outcome: students will be able to articulate a general understanding of the selected topic.

MPBH 499 Public Health in Action (3 Credit Hours)
Public Health in Action prepares MPH students for the real world through practical hands-on learning that addresses the cross-disciplinary competencies in advocacy, leadership, budgeting, planning and implementing programs with limited resources, building a shared vision and mission, setting priorities and goals, contributing on inter-professional teams, advancing cultural diversity and inclusiveness in community health efforts, building partnerships, leading community initiatives, and communicating to media. It is intended students will take this course at the end of the MPH program. Enrollment Conditions: Graduate standing in the MPH Program and graduating in the current or following semester, or permission of instructor. Students should have completed at least 18 credit hours of coursework, including all other core courses. MD/MPH students may take this course in the spring of their first year in the program.

Medical Laboratory Science (MLS)

MLS 401 Laboratory Fundamentals (2 Credit Hours)
Introduction to life in the clinical laboratory. Safety practices, laboratory mathematics, statistical analysis, and fundamental laboratory training in phlebotomy, pipetting, microscopy and calibrations. Enrollment conditions: Admission to M.S. in Medical Laboratory Science program
Outcomes:
Upon completion, students will demonstrate safe and professional knowledge consistent with the field of Medical Laboratory Science, including use of universal precautions, phlebotomy, processing specimens, microscopy, and calibrations

MLS 410 Clinical Immunology (2 Credit Hours)
This course focuses on principles and procedures of immunology and serology. Emphasis will be on the role of the immune system in health and disease and developing an understanding of the role of both humoral and cellular immunity. Admission to M.S. in Medical Laboratory Science program. Upon completion, students will demonstrate understanding of the discipline of immunology and apply theoretical concepts to differentiate patient health and disease states.

MLS 415 Urinalysis and Body Fluids (2 Credit Hours)
Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease. Restricted to students in the M.S. in Medical Laboratory Science program. Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

MLS 420 Molecular Diagnostics (2 Credit Hours)
This course is will provide students with an understanding of the processes which have been collectively referred to as molecular biology as they relate to laboratory medicine. Instruction emphasizes molecular methodologies and current applications of molecular diagnostics utilized in the clinical laboratory. Upon completion of this course students will gain a background in molecular biology which will promote critical thinking and problem solving as it relates to clinical molecular diagnostics.

MLS 430 Clinical Chemistry I (3 Credit Hours)
Pre-requisites: Admission to M.S. in Medical Laboratory Science program
This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.
Outcomes:
Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins

MLS 440 Clinical Chemistry II (2 Credit Hours)
Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program
Outcomes:
Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis

MLS 450 Hematology (4 Credit Hours)
Study of formed elements of blood including normal and abnormal conditions. Recognition and correlation of pathological changes in cells of the peripheral blood and bone marrow to disease states. This course will prepare students for a clinical practicum in Hematology. Admission to the M.S. in Medical Laboratory Science program required. Identification of morphological characteristics for normal and abnormal cellular elements of blood and associations to disease states.
Outcomes:
Students will describe the physiology, development of cells, and process of hematopoiesis

MLS 455 Hemostasis (2 Credit Hours)
This course will cover the mechanisms by which blood coagulates. Topics explored include the pathophysiology of hemostatic disorders and the antithrombotic therapies utilized to manage them. Focus on examination of the coagulation system and correlations of laboratory results to clinical findings in the classification of disorders. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will apply knowledge of the process of coagulation to interpret laboratory results as they relate to hemostatic dysfunctions and treatment of clinical disease.

MLS 460 Immunohematology (5 Credit Hours)
Focus on principles of the antigen/antibody reactions and their relevance to Immunohematology. ABO/Rh and major blood group systems, regulation, procedures, adverse reactions, and donation of blood components are all studied as integral parts to the practice of transfusion medicine. This course prepares students for a clinical practicum in Immunohematology. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program.
Outcomes:
Upon completion of this course students will be able to apply theoretical concepts and techniques to analyze and determine Immunohematology results

MLS 465 Laboratory Leadership I (1 Credit Hour)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
This first of three courses in the leadership series, prepares the student for an entry-level laboratory position by developing skills in basic laboratory management practices including principles of leadership, functions of a manager, and personnel management.
Outcomes:
Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues

MLS 466 Laboratory Leadership II (1 Credit Hour)
The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

MLS 467 Laboratory Leadership III (1 Credit Hour)
The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning. Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

MLS 470 Bacteriology and Virology (5 Credit Hours)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology.
Outcomes:
Upon completion, students will be able to identify bacterial or viral organisms by characteristic clinical features of infections through laboratory testing

MLS 475 Clinical Parasitology and Mycology (2 Credit Hours)
Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

MLS 481 Clinical Practice in Hematology (3 Credit Hours)
Pre-requisites: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory

MLS 482 Clinical Practice in Chemistry (3 Credit Hours)
Pre-requisites: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory

MLS 483 Clinical Practice in Immunohematology (3 Credit Hours)
Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

MLS 484 Clinical Practice in Hemostasis and Body Fluids (1-2 Credit Hours)
Pre-requisites: MLS 415, MLS 455, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hemostasis, Urinalysis, and other Body
Fluid analyses under the guidance of qualified medical laboratory professionals. Application of knowledge and clinical skills gained from first year courses. Focus on acquisition of manual and automated laboratory skills, laboratory safety, principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will demonstrate evidence of possessing the knowledge and skills necessary to perform Hemostasis, Urinalysis, and Body Fluid analyses testing in a medical laboratory

MLS 485 Clinical Practice in Microbiology (3 Credit Hours)
Pre-requisites: Completion of MLS 470, MLS 475, and good academic standing as defined in the M.S. in Medical Laboratory handbook
Clinical experience in Microbiology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first-year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Microbiologic testing in a medical laboratory

MLS 486 Clinical Practice - MLS Special Topics (1-2 Credit Hours)
Clinical experience in specialty areas of laboratory medicine under the guidance of qualified medical laboratory professionals. Students will actively engage in applying the medical knowledge and clinical skills gained in the didactic and student training laboratory courses in Molecular Diagnostics, Flow Cytometry, HLA testing, and laboratory administration. Completion of MLS 420, MLS 466, and good academic standing as defined in the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills needed to enter into specialty areas of a medical laboratory.

MLS 490 MLS Educational Practice and Review (2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
This course will prepare students for taking a Medical Laboratory Science certification exam. Students will gain basic educational and pedagogical approaches needed to train others in the field of Medical Laboratory Science. Application of theories demonstrated through presentation of review lectures and assisting in kinesthetic instruction for laboratory sessions.
Outcomes:
Upon completion of this course students will be able to utilize effective teaching strategies to plan and present a lecture unit, including writing objectives and assessment strategies

MLS 495 Medical Laboratory Science Capstone (1-2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine.
Outcomes:
This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience

Clinical Research Methods and Epidemiology (MS)

Design and implement your own health care clinical studies to improve patient care.

Loyola University Chicago's Master of Science (MS) in Clinical Research Methods and Epidemiology (CRME) degree is a 2.5 year part-time program for clinicians and other health care professionals, based in the Chicago-land area, wanting to pursue clinical and patient-orientated research. With the guidance of a research mentor, you will create your own research proposal and project. The flexible learning environment in this clinical research master's program combines in-person classroom instruction with one-on-one mentoring to give you the skills to design and implement clinical studies and obtain independent funding.

Curriculum

A total of 30 credit hours are required to complete the degree. Students must complete six core courses (18 credit hours) and three elective courses (9 credit hours). All students must also complete a research project (3 credit hours) as part of their degree. Courses are offered both on campus and online.

Code	Title	Hours
Core Courses		
MPBH 403	Introduction to Epidemiology (classroom and online)	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 421	Biostatistics II (classroom)	3
MPBH 423	Intermediate Epidemiology (classroom)	3
MPBH 431	Grant Writing (classroom)	3
BEHL 405	Research and Ethics (online)	3
Electives		
Select three of the following:		9
MPBH 400	Determinants of Population Health	
MPBH 401	Environmental Health (online)	
MPBH 402	Public Health Practice and Management	
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective (online)	
MPBH 414	Introduction to Global Health	
MPBH 416	Health Services Research Methods (online)	
MPBH 420	Public Health Law: Theories and Cases	
MPBH 422	Population Health Planning & Management	
MPBH 424	Health Economics and Healthcare Financing	
MPBH 425	Policy Analysis	
MPBH 432	Health Impact Assessment	
MPBH 433	Clinical Trials (classroom)	
MPBH 434	Systematic Review and Meta-Analysis (classroom)	
MPBH 495	Special Topics (upon approval)	
HIDS 401	Foundations of Health Informatics	
HIDS 411	Clinical Data Science	
HIDS 421	Security and Privacy in Healthcare	
HIDS 422	Ontologies in Healthcare	
Research Project		
Complete a Research Project (p. 1619)		3
Total Hours		**30**

Research Project

All students must demonstrate integration of knowledge gained through the program by presenting a research project (either a completed research project or research proposal) to the Master of Science in Clinical Research Methods Program Curriculum Committee. This research project or proposal will incorporate the skills and concepts obtained from the

coursework. Students will have up to three years after enrolling in the program to complete the research project and obtain the degree.

- Apply components of research design and analysis for the purpose of critically reviewing research and programs in medicine
- Analyze various methods to evaluate topics in healthcare
- Identify the uses to which data management can be put in practical statistical analysis, including the establishment of standards for documentation, archiving, auditing, and confidentiality; guidelines for accessibility; security; structural issues; and data cleaning

Dietetic Internship Certificate

Translate science into solutions for health.

Loyola University Chicago offers two tracks of an accredited Dietetic Internship (DI) to prepare students to become professional registered dietitian nutritionists. Students benefit from the constructive and supportive environment of Loyola University Chicago. With Jesuit values as a foundation, students learn leadership, communication, and management skills which are applied to dietetic practice in health care and other settings. This prepares our students to enter dietetic practice as competent, highly qualified professionals after passing the registration exam for dietitians. Graduates of Loyola's Dietetic Internship program are highly sought for positions in health care and nutrition programs. Students enter a wide range of dietetic careers, including:

- Clinical dietitians with health care organizations including hospitals, medical centers, dialysis centers, skilled nursing, and rehabilitation facilities
- Community nutritionists with public health departments, federally qualified health centers, community clinics, and federal nutrition programs such as the Women, Infant, and Children's program
- Director or manager of food service operations
- Private practice or consulting

To Become a Registered Dietitian Nutritionist

To become a registered Dietitian Nutritionist (RDN) The following criteria must be completed:

1. Completion of a bachelor's degree at a US regionally accredited university or college and course work accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®) of the Academy of Nutrition and Dietetics,
2. Completion of an ACEND®-accredited supervised practice program, such as the Loyola Dietetic Internship,
3. Pass the Registration Examination for Dietitians, national examination administered by the Commission on Dietetic Registration (CDR).
4. More information regarding the examination can be found online through CDR (https://www.cdrnet.org/).
5. Licensure is required to practice as a Registered Dietitian Nutritionist in the State of Illinois (https://www.idfpr.com/profs/dietNutrition.asp)

To maintain the RDN credential, one must complete continuing professional education requirements.

Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require the minimum of a master's degree to be eligible for the credentialing examination for registered dietitian nutritionist (RDN). For more information about this requirement, please refer to the CDR website (https://www.cdrnet.org/).

Professional Dietetic Practice

Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars, and others based on track), students receive a verification statement of completion of the ACEND - accredited dietetic internship and are eligible to take the *Registration Examination for Dietitians* by the Commission on Dietetic Registration. In the State of Illinois, one must be licensed by the Department of Professional and Financial Regulation to practice dietetics. Information about licensure for dietitians in Illinois can be obtained at: http://www.idfpr.com/Renewals/apply/Forms/diet-ex.pdf.

Additional information about licensure for dietetic practice in other states can be found online (https://www.cdrnet.org/).

Accreditation

The Loyola University Chicago Dietetic Internship (LDI) is accredited by the Council on Accreditation for Education in Nutrition and Dietetics (ACEND) an agency of the Academy of Nutrition and Dietetics (AND). Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars and others based on program track), students receive an ACEND verification statement and are eligible to take the Registration Examination for Dietitians by the Commission on Dietetic Registration. Information about accreditation status can be obtained from:

Accreditation for Education in Nutrition and Dietetics
Academy of Nutrition and Dietetics
120 South Riverside Plaza, Suite 2190
Chicago, IL 60606-6995
1-800-877-1600 ext 5400 or education@eatright.org

Curriculum

The Loyola Dietetic Internship offers two options or tracks to completion: Dietetic Internship Certificate track (DI/C) or a combined Master of Science in Dietetics/Dietetic Internship (MS/DI).

Dietetic Internship Certificate track (DI/C)

This is 7 courses, 14 credits and includes 1100 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427.

Upon completion of the DI/C requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*.

Code	Title	Hours
Didactic Courses		
FONU 400	Role Development in Dietetic Practice	1
FONU 420	Transition to Supervised Practice in the Dietetic Internship	1
FONU 422	Medical Nutrition Therapy Theory	3
FONU 424	Public Health Nutrition and Research Theory for Dietetic Practice	3
FONU 426	Food Management Theory: Geriatric Nutrition	1
Supervised Practice Courses		
FONU 423	Supervised Practice (SP) in Medical Nutrition Therapy	2

FONU 425	Supervised Practice in Public Health Nutrition, Research, Professional Development & Marketing	2
FONU 427	Supervised Practice: Food Management, Geriatric Nutrition	1
Total Hours		**14**

Combined Master of Science in Dietetics/Dietetic Internship (MS/DI)

This is 20 courses, 46 credits and includes 1200 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427, and the comprehensive exam.

Upon completion of the MS/DI requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*, and a Master of Science in Dietetics degree from the Loyola University Chicago Graduate School.

MPBH 400	Determinants of Population Health	
MPBH 402	Public Health Practice and Management	
MPBH 403	Introduction to Epidemiology	
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective	
MPBH 414	Introduction to Global Health	
MPBH 417	Global Maternal & Child Health	
MPBH 431	Grant Writing	
MPBH 495	Special Topics	
Total Hours		**46**

Once a week, students are required to participate in class at the Loyola University Health Sciences Division (HSD) campus in Maywood, IL. Class time is not calculated in the supervised-practice hours and typically are scheduled from 6 p.m. - 9 p.m. Classes include lecture, discussion, group problem-solving, critical-thinking activities, exams, and additional assignments. In addition to the courses below, dietetic interns are required to attend seminars, both internal and external to the University, that enhance knowledge and skill development.

Please note that completion of the MS in Dietetics (p. 1622) degree also requires successful comprehensive exam completion according to policies of the Parkinson School of Health Sciences and Public Health.

Details about the Loyola academic calendar, including the start dates of each semester, can be found online (https://www.luc.edu/academics/schedules/index.shtml/).

Download the Loyola Dietetic Internship (LDI) program plan (https://www.luc.edu/media/lucedu/schoolhealthsciencespublichealth/documents/LDIProgramPlan.pdf). For additional questions, please contact: Joanne Kouba, (jkouba@luc.edu) PhD, RD, LDN, Director, Dietetics Education Programs. Also see the Dietetics Handbook Aug 2023 (https://www.luc.edu/media/lucedu/parkinson/pdfs/LDI.Handbook.revised.2023.08.28.Final.pdf).

Internship

Two Options For Completing the Loyola Dietetic Internship

Each track meets ACEND standards for dietetic internships. Ten students are admitted annually to each track of the LDI as coordinated by nationwide, computerized matching by D&D Digital (https://www.dnddigital.com/).

Anticipation Time for Completion

- DI/C: 13 months
- MS/DI: 22 months

Credits

- DI/C: 14
- MS/DI: 46

D&D Digital Matching Number

- DI/C: 494
- MS/DI: 156

Both tracks are eligible to take the registration examination for dietitians.

Hours of Supervised Practice

- DI only: 1100
- MS/DI: 1100

Supervised Practice Starts

- DI/C: The first semester after admission
- MS/DI: After completing majority of graduate work

Upon Completion Student Receives

- DI/C: ACEND verification state of DI completion
- MS/DI: ACEND verification statement of DI completion and Loyola Master of Science (MS) in Dietetics degree

Supervised Practice Experiences Summary

Interns complete eight rotations during the course of the program, which are nested within FONU 423, FONU 425, and FONU 427. Interns are typically scheduled to complete supervised practice eight hours per day, typically Monday through Friday. Interns should expect to be in supervised practice two-three weekend days per semester. Time for travel is not part of supervised practice.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy

Medical Nutrition Therapy (55 days): Interns develop skills to meet the responsibilities of a clinical dietitian and follow the host facility's standards of care and practice guidelines. Interns are initially assigned a low number of assessment, screening, educational, and follow-up activities per week on less-complex patients. As the weeks proceed, interns are assigned more complex cases and the volume of patients increases. In addition, interns participate in the quality management program for clinical nutrition care, in-service presentations, patient care conferences, and departmental meetings.

Dialysis Medical Therapy (5 days): Interns develop medical nutrition therapy skills with a focus on renal patients.

FONU 425 Supervised Practice in Public Health Nutrition, Research, Professional Development & Marketing

Public Health Nutrition (35 days): This experience allows interns to work with diverse age groups, as well as socioeconomic and cultural backgrounds. Interns are involved in planning and delivering nutrition programs including those provided by the Women, Infant, Children (WIC) special supplemental nutrition program, schools and school-based health clinics, Catholic Charities, and outpatient departments.

Professional Development (10 days): Students identify an area of professional dietetic practice that they would like to explore with additional experiences. The DI Director and student collaborate to develop this individualized experience using available resources.

Research (10 days): Students develop and engage in scholarly inquiry under the direction of faculty and preceptors, including perspectives of ethical considerations, research methods, statistical analysis, and dissemination of findings. Projects may be individual, group, and/or at other supervised practice sites.

Marketing Rotation (5 days): Interns have the opportunity to work on marketing a food product or nutrition service, employing market strategies, evaluating consumer needs and trends, testing products, and interacting with the media. Possible sites include food and pharmaceutical companies, public relations firms, and wellness programs.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition

Management Rotation (25 days): Interns actively participate in all aspects of food-service management, including production, purchasing, service, inventory systems, human resources, safety, and sanitation. Through this experience, interns gain experience in problem solving, quality management, and fiscal management.

Long-Term Care Rotation (5 days): Interns work collaboratively with preceptors to provide nutrition care to the elderly, developmentally disabled, psychiatric, and rehabilitation residents in long-term care facilities. This rotation includes experiences in both clinical nutrition care of residents and management of food-service operations within long-term care facilities.

Monthly Seminars and Activities

Interns broaden their perspective on various areas of dietetics through seminars, group tours, and other activities. Participation in all seminars and related activities is mandatory for all interns. Examples include: participation in the Distinguished Speaker Seminar Series and the Palmer Research Symposium sponsored by the Marcella Niehoff School of Nursing; Illinois Dietetic Association (IDA) Annual Assembly; IDA Lobby Day in Springfield, IL; seminars on sports nutrition, reimbursement and ethical issues in dietetic practice; media training; and an ethnic food tour. Participation in these activities is required. This time is not calculated as part of supervised-practice or didactic hours. An additional fee is added to tuition to cover the costs of seminar participation.

Learning Outcomes

Interns should become competent in the application of theoretical education, adjusting to the reality of existing practice environments, and develop interaction skills with other professionals, workers, and clients. Competent practice is defined not only as the application of knowledge in nutrition, foods, and related areas, but also as the development and use of skill in leadership, communication, and management.

Dietetics (MS)

For registered dietitians who want to be leaders in health care administration.

Loyola University Chicago offers a unique opportunity to complete a Master of Science degree in Dietetics. The program offers a healthcare administration focus, preparing professional, registered dietitians to design and implement systems that lead to desired health outcomes. This program can also be completed while simultaneously completing the Dietetic Internship.

Curriculum

Successful completion of a comprehensive exam is a program requirement for degree conferral. The Master of Science in Dietetics (without the dietetic internship) does not require supervised practice or practicum hours in a health care agency. FONU 410 Nutrition Focused Physical Assessment requires experiential learning in a clinical skills or simulation lab on campus.

Required Courses and Elective Options

Code	Title	Hours
CORE		
FONU 400	Role Development in Dietetic Practice (Fall/Spring)	1
FONU 410	Nutrition Focused Physical Assessment (Fall)	2
FONU 501	Writing and Communications in Nutrition and Dietetics (Spring)	3
FONU 503	Dietetic Theories & Research Methods (Spring)	3
MPBH 404	Biostatistics for Health and Biological Science (Fall/Spring)	3
FONU 507	Behavioral Change for Health Promotion (Fall)	3
Health Care Administration Focus		
MHA 405	U.S. Health Systems Management (Fall)	3

MHA 415	Culture of Quality & Safety in Health Care (Spring)	3
MPBH 495	Special Topics (Spring/Summer)	3
or MHA 460	Strategy and Leadership in Healthcare Organizations	
MPBH 407	Public Health Policy: Concepts and Practice (Fall/Summer)	3
or SOWK 602	Health and Behavioral Health Policy and Systems	
MHA 451	Healthcare Finance I (Fall)	3
Electives		
Select one of the following:		3
MPBH 400	Determinants of Population Health (Fall/Summer)	
MPBH 402	Public Health Practice and Management (Fall/Spring)	
MPBH 403	Introduction to Epidemiology (Fall/Summer)	
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective (Fall)	
MPBH 414	Introduction to Global Health (Fall)	
MPBH 417	Global Maternal & Child Health (Spring)	
MPBH 431	Grant Writing (Fall/Spring)	
MPBH 495	Special Topics (Spring)	
Total Hours		**33**

Learning Outcomes

You will learn to redesign health care processes, use information technology, develop effective health care teams, coordinate care, and enact performance and outcome measurements, all essential methods of performance improvement in health care administration.

Exercise Science (MS)

Take the next step towards a career in rehabilitation, sports medicine, or fitness.

While a bachelor's degree in exercise science is sufficient to get an entry-level position, continuing education in exercise science is a must to advance in the field. At Loyola, you can earn a master's degree in exercise science and move to a career in rehabilitation, sports medicine, athletic performance, or fitness.

Picture yourself helping people making positive lifestyle choices for their health, whether it's in hospitals, acute and chronic care health centers, sports medicine, cardiac or pulmonary rehabilitation, community health centers, sports performance, or fitness facilities. This degree is a great first step toward a doctorate in physical therapy or PhD in exercise science.

Curriculum

During your first year in this two-year program, you will build a foundation in exercise science-related fields through classroom instruction and lab-based activities. In your second year, you will complete advanced specialty coursework as well as a 200-hour internship and a comprehensive final examination.

MSES Curriculum (36-38 credits)

Pre-Requisites: Anatomy with Lab (4 credits); Physiology with Lab (4 credits); Exercise Physiology (3 credits); Biomechanics or Applied Kinesiology with Lab (4 credits)

Code	Title	Hours
Foundational Coursework		
EXCM 401	Applied Physiology of Exercise	4
EXCM 450	Nutrition, Health and Performance	3
EXCM 475	Exercise Applications in Special Populations	3
EXCM 482	Research Methods and Evidence in Exercise Science	3
Concentrations and Electives		
General Track and Concentration Elective Courses		
General track must complete a minimum of 18 credit hours (15 of which are EXCM courses) from below. Concentrations must complete a minimum of 6 credit hours (3 of which are EXCM courses) from below.		6-18
EXCM 424	Motor Learning and Performance	3
EXCM 435	Health Promotion and Wellness Theories and Frameworks	3
EXCM 444	Strength Training and Conditioning	3

EXCM 468	Application of Advanced Clinical Exercise Testing & Prescription	4
EXCM 478	EKG Interpretation	0
Internship Course		
EXCM 495	Advanced Exercise Science Internship	4

Comprehensive Examination

- A comprehensive exam is required for all students. Please contact your Graduate Program Director or visit the EXCM Graduate Student Sakai page for more information.

Learning Outcomes

Upon successful completion of the program, graduates will be able to:

- Conduct comprehensive health and fitness assessments using theories and frameworks.
- Apply scientific principles and evidence-based recommendations into the prescription, implementation, and evaluation of exercise and fitness programs.
- Create lifestyle modification and health promotion plans for individuals and groups.
- Incorporate effective communication and motivational strategies to support clients or patients as they adopt, perform, and maintain a healthy lifestyle.
- Implement role behaviors consistent with the scope of practice of exercise sciences.
- Manage human, fiscal, and physical resources of health fitness facilities and programs.

Health Informatics (MS)

Create data-driven solutions to improve patient care.

With the abundance of data, particularly in health care, a Master of Science (MS) in Health Informatics & Data Science from Loyola University Chicago's Parkinson School of Health Sciences and Public Health will prepare students to understand how to use data to improve patient care and population health. Learn how to unlock the power of data through a wealth of career paths such as: Healthcare Data Analystor Informaticist.

In our 100% online program, you will access real-world data through an internship or capstone project. Become a part of the new health care workforce trained in informatics and data science to improve outcomes and delivery, minimize health inequities, and achieve better care.

Curriculum

Loyola's MS in Health Informatics & Data Science is a two-year, 100% online program, with full- and part-time options available. You will start with foundational courses in health care informatics and data science, then hone in on your interests with elective courses. The program concludes with a capstone project and/or internship.

The program is 39 credit hours with a capstone project or 33 credit hours with an internship with capstone report and presentation.

Data Analysis Courses		
MPBH 409	Biostatistics I	3
HIDS 411	Clinical Data Science	3
Electives		
Technical Electives		*9*
Choose three (3) courses from the following: [1]		
COMP 406	Data Mining	
COMP 412	Open Source Computing	
COMP 453	Database Programming	
MPBH 403	Introduction to Epidemiology	
MPBH 423	Intermediate Epidemiology	
MPBH 421	Biostatistics II	
ENVS 480	Introduction to Geographic Information Systems	
Social Electives		*3*
Choose one (1) of the following:		
BEHL 401	Clinical Topics in Bioethics	
BEHL 402	Justice & Health Care	
BEHL 405	Research and Ethics	
BEHL 406	Principles of Health Care Ethics	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 408	Ethics, Genetics and Health Policy	
PHIL 444	Studies in Logic	
SOWK 500	Life Span Development, Human Behavior, Trauma, & Theory	
SOWK 602	Health and Behavioral Health Policy and Systems	
Capstone		
HIDS 399	Health Informatics Capstone (Taken twice)	
Total Hours		**33**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
HIDS 401	Foundations of Health Informatics	3
HIDS 411	Clinical Data Science	3
HIDS 431	Introduction to Natural Language Processing in Health	3
	Hours	**9**
Spring		
HIDS 412	Translational Bioinformatics	3
HIDS 422	Ontologies in Healthcare	3
MPBH 409	Biostatistics I	3
	Hours	**9**
Year 2		
Fall		
HIDS 421	Security and Privacy in Healthcare	3
Technical Elective #1		3
Technical Elective #2		3
HIDS 399	Health Informatics Capstone	
	Hours	**9**
Spring		
Technical Elective #3		3
Social Elective		3
HIDS 399	Health Informatics Capstone	
	Hours	**6**
	Total Hours	**33**

Capstone Project/Internship

Two-semester capstone project or internship with capstone report and presentation.

Learning Outcomes

- You will be able to analyze problems, assess solutions against specific measures, and generate new bodies of knowledge from initial data, while understanding the ethical considerations of data usage, specifically as they relate to patient safety and privacy.
- You will also develop new frameworks and models to solve health informatics and data science problems.

Health Informatics Certificate

Learn how to unlock the power of data to improve health outcomes and patient care.

Electronic Health Records (EHRs) contain vast amounts of data. Yet typically, only 20 percent can be readily extracted.

In this certificate program, students learn how to apply machine learning, research methods, natural language processing, and database management to leverage the other 80 percent of "unstructured" health data. We work with our academic medical center partners to provide a hands-on, real-world healthcare database learning environment of more than two million patient encounters over 12 years (including structured and unstructured EHR data).

Curriculum

Loyola's Health Informatics Certificate is a 15 credit hour program.

Code	Title	Hours
HIDS 401	Foundations of Health Informatics	3
HIDS 411	Clinical Data Science	3
HIDS 421	Security and Privacy in Healthcare	3
HIDS 412	Translational Bioinformatics	3
HIDS 422	Ontologies in Healthcare	3
Total Hours		**15**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
HIDS 401	Foundations of Health Informatics	3
HIDS 411	Clinical Data Science	3
HIDS 421	Security and Privacy in Healthcare	3
	Hours	**9**
Spring		
HIDS 412	Translational Bioinformatics	3
HIDS 422	Ontologies in Healthcare	3
	Hours	**6**
	Total Hours	**15**

Learning Outcomes

Graduates will be able to work with a multidisciplinary team of computer scientists, healthcare researchers, and data analysts to learn how to use open-source software packages to solve real healthcare programs.

Healthcare Administration (MHA)

Built on a thriving undergraduate Healthcare Administration (p. 648) (HCA) program and its strong national reputation within the Association of University Programs in Healthcare Administration (https://www.aupha.org/home/) (AUPHA), the new Healthcare Administration (HCA) graduate program is uniquely designed for aspiring professionals seeking the flexibility of part-time, online formats.

The program encourages individuals from diverse backgrounds and those with varied interests in health care.

Curriculum

The MHA is a two-year, 37 credit hour, cohort, online program with one-day immersion sessions required prior to each fall and spring semester. Cohorts are admitted in the fall semester. Faculty offer a wide variety of industry and academic experience that they leverage into substantial hands-on learning opportunities via twice-yearly immersion weekends, a unique capstone project, and case competition experiences.

Code	Title	Hours
Required Courses		
MHA 405	U.S. Health Systems Management	3
MHA 415	Culture of Quality & Safety in Health Care	3
MHA 430	Managerial Epidemiology	3
MHA 440	Healthcare Management and Ethics	3
MHA 451	Healthcare Finance I	3
MHA 452	Healthcare Finance II	3
MHA 460	Strategy and Leadership in Healthcare Organizations	3
MHA 491	Systems Thinking for Healthcare Leaders [1]	1
MHA 492	Governance of Healthcare Systems [1]	1
MHA 493	Performance Management in Healthcare [1]	1
MHA 494	Multi-Disciplinary Teams in Healthcare [1]	1
MHA 495	Specialty Capstone	3
Elective Courses		
Select three (3) of the following:		9
MHA 468	Topics in Healthcare Data Analytics and Business Intelligence	
MHA 484	Healthcare Decision Support	
MHA 490	Research and Innovation in Healthcare Administration	
MPBH 422	Population Health Planning & Management	
MPBH 495	Special Topics	
Total Hours		**37**

[1] Onsite Immersion course.

Track Options

With a solid curriculum of core courses, students may specialize in one of three high-demand tracks:

Healthcare Business Intelligence

- 9 hours of required courses including Topics in Healthcare Data Analytics and Business Intelligence and the specialty capstone experience
- 3 hours of elective courses selected from Foundations of Health Informatics, Population Health Informatics, or Decision Support in Healthcare

Healthcare Community Engagement and Partnership

- 9 hours of required courses including Topics in Healthcare Community Engagement and Partnership and the specialty capstone experience.
- 3 hours of elective courses selected from Program Planning and Marketing in Health Care, Advancing Health Equity Practice, or Management of Nonprofit Organizations.

Post-Acute Care Administration

- 9 hours of required courses including Topics in Post-Acute Care Delivery and the specialty capstone experience.
- 3 hours of elective courses selected from Advanced Concepts in Health Systems Management, Social Work Policy with Older Adults, or Loss, Grief and Dying.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Hours	**3**
	Total Hours	**37**

[1] Onsite Immersion course.

Learning Outcomes

Aligned with our Jesuit heritage, MHA students (and graduates) will have the skills and encouragement to positively influence change in their communities. Through experiences such as the unique capstone project, students are asked to take initiative, identify and meet needs in their communities, and make long-term commitments. In short, MHA students are groomed to be leaders in improving the health of their communities.

Specifically, graduates will be prepared to:

- Apply core business and financial principles to the healthcare environment
- Evaluate industry and organizational dynamics in the healthcare environment
- Assess and prioritize population health needs
- Drive operational and performance improvements in healthcare organizations
- Manage data to guide decision making in health services organizations
- Synthesize theoretical and analytical knowledge, critical thinking, and communication skills to solve problems in healthcare administration
- Integrate values, ethics, and social justice into the management and leadership of health services organizations, aligned with the Jesuit Catholic tradition

Medical Laboratory Science (MS)

At the heart of a patient-centered health care team, managing labs and running tests that will inform diagnosis and treatment.

A career in medical laboratory science combines the challenges of medicine, pathology, basic sciences, and clinical laboratory sciences. Using state-of-the-art biomedical instruments, critical thinking skills, and molecular techniques, medical laboratory scientists are detectives. Loyola's two-year Master of Science in Medical Laboratory Science will give you the tools you need to enter this low-profile, but critically important, aspect of the health care field.

Curriculum

The MS in Medical Laboratory Science program accepts students for fall semester enrollment and is designed to be completed within five continuous semesters of study over the course of two years.

The MS in Medical Laboratory Science degree accepts students for fall semester enrollment and is designed to be completed only on a full-time basis within five continuous semesters of study over the course of two years.

Code	Title	Hours
MLS 401	Laboratory Fundamentals	2
MLS 410	Clinical Immunology	2
MLS 415	Urinalysis and Body Fluids	2

Learning Outcomes

- Competencies to work as an entry-level medical laboratory scientist
- Strong written and verbal communication skills to serve the needs of patients, the health care team, scientific peers, and the general public

Medicine/Public Health (MD/MPH)

Combine medical training with public health knowledge.

A degree in public health provides a broader lens through which to examine individual patient care. Physicians with a public health background look at how environments and community resources can contribute – or detract from – overall health and wellness. Our dual MD/MPH degree is offered by the Parkinson School of Public Health and the Stritch School of Medicine, and can be completed in five years. The MPH is accredited by the Council on Education for Public Health (CEPH).

Curriculum

The MD/MPH requires 42 credit hours towards the Master of Public Health program (six of which are transferred from electives in the MD program), practical experience in public health, and a capstone project.

Doctor of Medicine Requirements

Degree requirements for the MD can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/).

Students will begin the MPH curriculum during the summer before the first year of medical school (M0) and complete all eleven (11) didactic courses (33 credit hours). Six (6) credits are transferred from electives taken during year M3 or M4 in the MD program. A two-credit capstone project completed during a Stritch research elective or discretionary time

in the M3 or M4 year. An applied practice experience in public health is required and can be completed during the M0 year.

The dual MD/MPH program focuses on health disparities and identifying strategies to minimize them. Loyola's Health Sciences Campus is located in Maywood. This underserved community provides a unique opportunity to promote health equity in our own community and collaborate with local groups to improve public health.

Master of Public Health Requirements

Curriculum

Offered in-person, online, or hybrid, Loyola's MPH is a 42-credit curriculum. Online courses include both synchronous and asynchronous components. We offer concentrations in three study tracks: Epidemiology, Policy and Management, and Global Health Equity. The curriculum includes six core courses, concentration-specific courses, electives, and applied practice and integrative learning experiences.

Online Learning

Convenient and rigorous, the online program is geared to working professionals, non-traditional students, and individuals who need a more flexible learning format. Loyola University Chicago faculty with expertise in Public Health, Public Health Policy and Management, Environmental Health, Bioethics, Epidemiology, and Biostatistics teach in this program. The vast resources of Loyola's Parkinson School and the Health Science Campus, along with the combined knowledge and experience of distinguished faculty from medicine, social work, bioethics, health policy and law, will help you take on many opportunities and challenges.

Courses & Tracks

Code	Title	Hours
MPH Core Courses		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
or MPBH 409	Biostatistics I	
MPBH 407	Public Health Policy: Concepts and Practice	3
MPBH 499	Public Health in Action	3
MPH Track-Specific Curricula		**15**
Total Hours		**33**

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPBH 427	Introduction to Correlated Data Analysis	1
MPBH 431	Grant Writing	3
Choose One Research Methods Course from the following:		3
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective	
MPBH 414	Introduction to Global Health	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
Total Hours		**15**

Global Health Equity

This concentration is a hybrid program of online and evening classes. Study the health of global populations with the ultimate goal of identifying and eliminating structures and practices of inequity and injustice to advance health equity for individuals and populations.

Code	Title	Hours
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal & Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 431	Grant Writing	3
Choose one of the following: [1]		3
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 432	Global Bioethics	
Total Hours		**15**

[1] Students may choose an elective course not on this list with Track Director approval.

Public Health Policy and Management

This concentration can be completed entirely online, and also can be taken with in-person courses. This curriculum studies the organization, structure, and delivery of health-related services, and associated population health outcomes. Students may customize their academic focus in either public health policy, administration, or both.

Code	Title	Hours
MPBH 416	Health Services Research Methods	3
MPBH 425	Policy Analysis	3
Choose one of the following		3
BEHL 402	Justice & Health Care	
BEHL 404	Biomedical Ethics and Law	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 411	Public Health Ethics	
BEHL 412	Organizational Ethics: Business, Professionalism, and Justice	
BEHL 418	Advancing Health Equity Practice	
BEHL 432	Global Bioethics	
Choose two of the following		6
Policy-oriented		
MPBH 420	Public Health Law: Theories and Cases	
MPBH 424	Health Economics and Healthcare Financing	
Management-oriented		
MPBH 422	Population Health Planning & Management	
CMAN 533	Fiscal Management in Health Care Organizations	
Total Hours		**15**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

MPH Graduate Student Handbook (https://www.luc.edu/media/lucedu/schoolhealthsciencespublichealth/publichealth/documents/2022-23%20MPH%20Graduate%20Student%20Handbook.pdf)

Dual Degrees and Other Programs

The needs of the public health workforce are diverse and ever-changing. Our students are diverse and pursue public health graduate studies at different points in their careers, from undergraduate through practicing nurses and physicians. To meet these needs, the Department of Public Health Sciences offers six additional programs:

- Five-Year Bachelor/MPH Degree
  - Environmental Science BA or BS/MPH
  - Health Care Administration BS/MPH
  - Public Health BS/MPH
- Doctor of Medicine/ Master of Public Health (MD/MPH)
- Master of Social Work/Master of Public Health (MSW/MPH)
- MS in Clinical Research Methods and Epidemiology (CRME)
- Public Health Certificate

Note: Students entering the program may wish to pursue careers that may require licensure (e.g. Registered Environmental Health Specialist) or certification (e.g. Certified in Public Health or Certified Professional in Food Safety) upon or before employment. Loyola University Chicago cannot guarantee that the Master of Public Health will prepare students to meet the unique requirements for licensure or certification in their specific location and/or area of expertise. Students should check with their local licensing or certifying authority to determine what requirements are necessary.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

You will combine patient care training with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communications, inter-professional practice, and system-wide approaches.

Public Health (MPH)

How will you improve population health? As a public health professional, you can change lives by promoting and protecting the health and well-being of people and their communities locally, regionally, nationally, and globally.

Inspired by Loyola's Jesuit tradition of social justice and freedom of inquiry, the Loyola University Chicago Master of Public Health program prepares students to promote health equity. We prepare future public health leaders through a competency-based and flexible community-engaged curriculum.

The Master of Public Health program is ideal for individuals seeking leadership careers in the diverse and growing field of public health.

Accreditation

Loyola's BSPH and MPH programs are accredited by the Council on Education for Public Health (CEPH). CEPH accreditation provides assurance that the program has been evaluated and met accepted standards established by and with the public health profession. For question on accreditation, contact the MPH Program Director, Ruth Kafensztok (rkafens@luc.edu).

Learning Outcomes

Learning Outcomes

You will graduate with public health competencies in the areas of quantitative and qualitative data collection, evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking. More specifically, **public health foundational competencies** attained through the MPH curriculum include:

Evidence-based Approaches to Public Health

1. Apply epidemiological methods to the breadth of settings and situations in public health practice.
2. Select quantitative and qualitative data collection methods appropriate for a given public health context.
3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
4. Interpret results of data analysis for public health research, policy or practice.

Public Health & Health Care Systems

1. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
2. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.

Planning & Management to Promote Health

1. Assess population needs, assets and capacities that affect communities' health.
2. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
3. Design a population-based policy, program, project or intervention.
4. Explain basic principles and tools of budget and resource management.
5. Select methods to evaluate public health programs.

Policy in Public Health

1. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
2. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
3. Advocate for political, social or economic policies and programs that will improve health in diverse populations.
4. Evaluate policies for their impact on public health and health equity.

Leadership

1. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
2. Apply negotiation and mediation skills to address organizational or community challenges.

Communication

1. Select communication strategies for different audiences and sectors.
2. Communicate audience-appropriate public health content, both in writing and through oral presentation.
3. Describe the importance of cultural competence in communicating public health content.

Interprofessional Practice

1. Perform effectively on interprofessional teams.

Systems Thinking

1. Apply systems thinking tools to a public health issue.

Public Health Certificate

How will you help address health disparities? Loyola's commitment to serve people who live on the margins and suffer other injustices includes efforts to eliminate disparities in access to health care in Chicago and throughout the world. The Public Health Certificate (PHC) program trains students to address racial and economic health disparities through public health research, practice, and advocacy. Loyola's campuses, in racially and economically diverse communities, provide "real-world" experience during your certificate courses, and our health professionals and faculty are committed to promoting social justice in the Jesuit tradition.

Curriculum

Students must complete 12 credit hours (four courses) of introductory graduate-level coursework including:

Code	Title	Hours
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 402	Public Health Practice and Management	3
MPH Graduate Elective		3
Total Hours		**12**

Learning Outcomes

The Public Health Certificate from Loyola will provide students with core public health knowledge and skills to address public health concerns in your field of practice or to further pursue a master's in public health. More specifically, by completion of the program students should:

- Acquire proficiency in the core public health disciplines, including epidemiology, biostatistics and public health practice/management.
- Have a foundation to explore further training in public health and/or global health.

- Develop skills in the areas of:
  - Evidence-based approaches to research
  - Health care systems planning and management
  - Leadership and communication

Social Work/Public Health (MSW/MPH)

The MSW/MPH dual degree program provides a multidisciplinary education covering both client-centered and population-based health perspectives to train those who will work to address the health and social needs of vulnerable populations. The dual degree program is designed to prepare social work and public health leaders who understand and respond to social and health issues in order to promote the well-being of communities at local and global levels. The program will have an emphasis on eliminating social and health inequities through transformative education, rigorous research, and active community engagement.

Curriculum

MSW/Master of Public Health

The MSW/MPH program blends coursework from the School of Social Work and the Master of Public Health (MPH) program.

Students in the dual degree will select the Micro Practice Specialization with Advanced Clinical Practice Track (p. 1978). Within the MPH program, students complete the Public Health Policy and Management (p. 1629) track.

The focus of the **MSW Program** is to prepare students to become practicing social workers in their concentrations of practice. Generalist content, therefore, is taught in the foundation courses from a practice perspective and prepares MSW students for study during their concentration year. The curriculum of the MSW program is thus designed to prepare students to have the knowledge and skills necessary for them to effectively intervene with and on behalf of the client systems that they serve.

The **MPH Program** provides students with the theoretical, methodological, and practical experience relevant to addressing contemporary public health issues. The MPH curriculum consists of required course work in all five areas of concentration in public health (Health Services Administration, Epidemiology, Biostatistics, Environmental Health, and Social/Behavioral Health), track-specific and elective courses, and a practicum training experience, and a capstone project.

The dual degree has been carefully crafted to fulfill both program requirements while maximizing opportunities for curriculum integration through shared content. The resulting curriculum requires 75 credit hours which can be completed within three years on a full-time basis.

Code	Title	Hours
MPH Requirements		
MPH Core Courses		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 407	Public Health Policy: Concepts and Practice	3
MPBH 499	Public Health in Action	3
Public Health Policy and Management Track Courses		
MPBH 416	Health Services Research Methods	3
MPBH 425	Policy Analysis	3
Management-oriented Courses		
MPBH 422	Population Health Planning & Management	3
CMAN 533	Fiscal Management in Health Care Organizations	3
Bioethics (BEHL) 400-Level Elective		*3*
Choose one of the following:		
BEHL 402	Justice & Health Care	
BEHL 404	Biomedical Ethics and Law	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 411	Public Health Ethics	
BEHL 412	Organizational Ethics: Business, Professionalism, and Justice	
BEHL 418	Advancing Health Equity Practice	
BEHL 432	Global Bioethics

	Hours	**8.5**
Spring		
SOWK 681	Advanced Mezzo & Macro Practice [1]	3
MPH Elective	Elective [2]	3
MPBH 411	MPH Capstone [2]	1
SWFI 633	Internship Instruction IV & Simulated Experiences [1]	0.5
	Hours	**7.5**
	Total Hours	**75**

1 MSW
2 MPH
3 Counts for SOWK 602 Health and Behavioral Health Policy and Systems
4 Shared credit
5 MPBH 416 Health Services Research Methods substitutes for SOWK 506 Research and Evaluation in Social Work Practice
6 MPBH 410 MPH Practicum (1 hr credit sharing it will map to both SWFI 530 Internship I & Simulated Experience and SWFI 531 Internship II & Simulated Experience)
7 MPBH 499 Public Health in Action substitutes for SOWK 509 Social Work Policy and Community Intervention
8 MPBH 422 Population Health Planning & Management is equivalent to SOWK 606 Practicum in Research & Evaluation-counts as a Social Work elective

Specialization & Track Options

The Social Work/Public Health (MSW/MPH) is only compatible with theMicro Practice Specialization with Advanced Clinical Practice Track (p. 1978).

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

MPH Learning Outcomes

Students will graduate with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking. For a description of the **MPH Learning Outcomes**, go to the **MPH Program** description page.

MSW Program Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Police Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Quinlan School of Business

From the smallest startups to the largest international corporations, the rapidly changing business world needs leaders who can anticipate change and innovate.

Loyola University Chicago's **Quinlan School of Business** helps prepare you for these leadership roles. Our top-ranked programs offer convenient MBA and MS programs in the heart of Chicago.

Flexible. Convenient. Transformative.

Through evening and weekend classes in downtown Chicago and online, you will be able to fit your graduate business program into your personal and professional life.

We offer a broad range of programs and specializations:

What Sets Us Apart

You have big plans for the future. Whether you're building a new career or enhancing the job you have, we can get you where you want to be. Loyola University Chicago's Quinlan School of Business offers top-ranked and respected graduate programs to make those big plans a fulfilling reality.

Sustainable Leadership

Extraordinary leaders are respected and trusted in their organizations as well as in their communities. At Quinlan, you will learn from the successes and mistakes of business leaders and see how those principles translate into the work you are doing today and in your future.

Real-world Learning

All of our courses focus on real-world, hands-on business issues in a global context. You'll apply theory learned in the classroom to current business problems. Our faculty members are established business experts who enrich our graduate programs with their extensive knowledge and first-hand experiences.

Faculty

Quinlan students rely on the expertise of our instructors to gain a global perspective and to refine their analytical tools and managerial abilities, while sharpening critical thinking and leadership skills.

Mid-career professionals benefit from building their theoretical and practical know-how by analyzing case studies and developing real-world projects.

Our Alumni Network

Quinlan graduates join an impressive network of 30,000 alumni in Chicago, the U.S., and around the world—many of whom have achieved leadership positions, and the majority of whom continue to reside and work in the Chicagoland area.

Our Values

Our graduate business programs believe that it is possible to be successful in business while still operating in an ethical and responsible manner:

- **Community**: We value all members of our campus, local, and global community, and seek to develop involved and responsible community members.
- **Diversity**: We value civility, respect, appreciation, and an in-depth understanding of diversity, including the ability to put knowledge into meaningful action.
- **Ethics**: We focus on ethical issues and challenges in business to develop leaders who demonstrate ethical awareness, ethical judgment, and the ability to evaluate and make moral decisions in difficult scenarios.
- **Justice**: We value justice through service that uses learning and leadership in the pursuit of truth and care for others.
- **Leadership**: We value personal growth through leadership and seek to develop responsible leaders who are committed to the common good.
- **Sustainability**: We engage students in understanding and responding to local and global environmental issues by raising awareness, advancing our knowledge of environmental problems, developing solutions, encouraging action, and developing an environmentally conscious culture throughout the university.

Accounting (ACCT)

ACCT 400 Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400B Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400E Financial Statement Analysis and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the development and application of financial statement information. Students will focus on basic concepts, standards, and practices of financial reporting to serve decision-making needs. Students will also work with financial ratio analysis software.
Course equivalencies: ACCT600E/ACCT400E

ACCT 402 Issues in Financial Reporting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course stresses research of selected accounting issues and uses the authoritative pronouncements to better understand financial accounting and reporting. The course structure includes lectures, class discussion, case analysis, and research of timely accounting issues. Group interaction is heavily emphasized.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the recognition and measurement of selected accounting topics; Students will also be able to work as a team to research an accounting issue and professionally communicate their research findings

ACCT 404 Financial State Analysis (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course evaluates the information contained in the financial statements, footnotes, and management discussion and analysis for its usefulness in making investment and credit decisions. Students will synthesize these assessments via a comprehensive financial statement analysis project.
Outcomes:
Students will be able to assess the appropriateness of asset valuation, liability measurement, and equity values for judging the performance of an enterprise

ACCT 405 Accounting Theory I (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent with a grade of C- or better
The course involves a detailed study of the theory, concepts, and procedures of financial accounting. The course focuses on applications involved in accounting for assets, equities, and the valuation and measurement of related income items. It also focuses on the accounting model with emphasis on applying the accounting framework to revenue and asset valuation. Time is spent discussing the theory and logic behind the accounting model and how it impacts financial statements. Restricted to Graduate School of Business Students.

ACCT 406 Accounting Theory II (3 Credit Hours)
A continuation of ACCT 405, the course focuses on valuation issues related to liabilities and other special topics. Complex problems involving investments, earnings per share, pensions, leases, income taxes, bond valuation, and fair value accounting are studied.

ACCT 407 Tax Principles Applied to Individuals (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to individual taxpayers.

ACCT 408 Tax Principles Applied to Entities (3 Credit Hours)
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to various business entities and an overview of Federal transfer taxes.

ACCT 409 Audit I -Audit and Assurance (3 Credit Hours)
This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 410 Audit II-Advanced Audit and Professional Ethics (3 Credit Hours)
This course consists of an in-depth study of specific topics related to both attest and non-attest services rendered by public accounting firms. Topics include: Professional ethics and a study of the AICPA Code of Professional Conduct; Accountants legal liability, federal securities laws and cases related to CPA malpractice; The use of technology and sampling in an audit; Securities & Exchange Commission practice, the integrated audit and the Sarbanes-Oxley Act; and Audit and other reports. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 411 Business Law and Accountants (3 Credit Hours)
This course is designed to familiarize the student with aspects of the legal environment of special concern to accountants. With emphasis on the legal aspects of commercial transactions, the course examines the laws governing sales transactions and the instruments for financing those transactions. Topics include contract law, the Uniform Commercial Code (sale of goods, negotiable instruments, secured transactions), and creditor-debtor relations.

ACCT 412 Special Topics in Accounting (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 424 Managerial Accounting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
Topics include product costing and activity based costing concepts, development and analysis of information for short-run and long-run decision making, the impact of accounting information on divisional performance, cost estimation and cost-volume-profit analysis, segment analysis, transfer pricing, budgeting concepts, and behavioral issues associated with accounting information.
Outcomes:
Develop and use managerial accounting information for operational and strategic decision making

ACCT 424E Strategic Cost Management (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the application of internal accounting information. Students will focus on traditional and contemporary managerial accounting practices. Students will work to (1) understand cost behavior, (2) conduct activity analysis, and (3) predict cost under different business decisions.
Course equivalencies: ACCT 424E/ACCT 601E

ACCT 425 International Accounting (3 Credit Hours)
This course explores the similarities and differences of accounting principles and procedures between the United States and other countries. Topics include consolidation of foreign subsidiaries, performance evaluation of foreign operations, translation issues, inflation accounting, and efforts at standardization of accounting rules.
Outcomes:
Students will become familiar with international accounting issues including accounting harmonization, pronouncements of the International Accounting Standards Board, transfer pricing, foreign currency financial statements, foreign exchange, and international taxation

ACCT 431 Tax Research (3 Credit Hours)
This course will provide graduate business students with the basic techniques of conducting federal tax research, and enable them to apply those techniques to a variety of research cases and communicate their research results in both written and oral formats. Includes establishing relevant facts; identifying tax issues; developing & communication conclusions and recommendations in writing and orally.

ACCT 432 State, Local and International Tax (3 Credit Hours)
Pre-requisites: ACCT 408 with a grade of C- or better or its equivalent; Department Consent Required
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. multi-jurisdictional taxation. The first half of the course will focus on the various types of state and location taxation and their common themes and differences. The second half will address Federal income taxation of cross-border transactions, both inbound and outbound.
Outcomes:
Demonstrate the ability to properly allocate taxable income between different taxing jurisdictions; Understand the basic principles and policies underlying state, local, and international taxation; Develop a working knowledge of the different types of taxes

ACCT 433 International Tax (3 Credit Hours)
Pre-requisites: ACCT 341 or ACCT 408
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. International taxation. The course will primarily focus on US companies with foreign subsidiaries ("outbound transactions") but will also discuss foreign companies with US subsidiaries ("inbound transactions") and individual taxation. Topics include; Sources of income, foreign tax credits, controlled foreign corporations (CFCs), Subpart F provisions, US treaties, and BEPS initiatives.
Outcomes:
Develop an understanding of International taxation and how it impacts operational and strategic decision making

ACCT 435 Internal Audit (3 Credit Hours)
This course will expose students to the fundamentals of internal auditing with an emphasis on internal controls. Topics covered will include an overview of internal auditing theory and internal audit in practice. After these overviews, an in depth review of internal controls will be examined, including internal controls best practices, risk assessment, control identification, audit design, testing of controls and audit reporting. Finally, the class may include a hands-on internal audit engagement in a real life setting. Student must have completed 9 hours of undergraduate accounting or 6 hours of graduate accounting courses.
Outcomes:
Students should have a clear understanding of how internal controls are used throughout a company and how auditors help design, test and report on their effectiveness

ACCT 436 Forensic Accounting and Fraud (3 Credit Hours)
The purpose of the course is to familiarize students to the field of Forensic Accounting and sensitize them to: the prevalence of fraud in all forms of business activity; the methods people use in initiating/perpetuating fraud scheme; ways of staying out of or getting out of a fraud conspiracy. Students are presumed to have strong accounting and auditing skills. This course will be covering ethics, accounting, auditing, misappropriation of assets, fraudulent financial reporting, electronic fraud and other fraud investigation/forensic accounting topics.
Outcomes:
Students who successfully complete this course will be able to demonstrate: knowledge of the nature and magnitude of economic fraud as it affects a variety of entities; understanding of the role of the accounting profession in fraud prevention and detection; technical knowledge of forensic accounting, forensic investigations and research

ACCT 437 Advanced Forensic Accounting (3 Credit Hours)
This course will focus on fraud audits of private entities. In the course of financial reviews questions arise about complex financial transactions, employee dishonesty, collusion, and breakdowns in internal controls. Normal audit procedures may discover the issue but additional steps are necessary to quantify and detect the extent of the fraud.
Outcomes:
Students in this course will develop basic forensic skills via analytical training

ACCT 439 Independent Study (1-3 Credit Hours)
Independent study is in-depth research and/or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Student is typically expected to develop a manuscript worthy of publication. The project should require the workload associated with a graduate level course. Normally, this course may be taken one time for credit.
Outcomes:
Student must demonstrate a detailed understanding of the selected accounting topic

Business Administration (BSAD)

BSAD 400E Business Foundations (1.5 Credit Hours)
Enrollment limited to students enrolled in the EMBA or EMBA Health Care Management Programs. Introductory course delivered during initial residency/orientation week to lay foundation for business education in the EMBA and EMBA Health Care Management Programs. Course coverage includes: Jesuit traditions/values, Quantitative Methods, Business Communications, and current topical lecture.

BSAD 401 US Culture & Academic Success Skills for International Students (0 Credit Hours)
This course is restricted to international students admitted to the Quinlan School of Business Graduate Programs. Verbal and nonverbal communication, active listening, participation in classroom discussions, collaborative group work, presentation skills, reading comprehension strategies, academic writing, understanding and avoiding plagiarism.
Outcomes:
International students will be better prepared for achieving success in graduate business studies by adapting to unfamiliar cultural differences in and out of the classroom

BSAD 401E Effective Business Writing Workshop (0.75 Credit Hours)
Enrollment is restricted to the Executive MBA or Executive MBA Health Care Management program. This course introduces the fundamentals of good written and oral business communications. Course topics include: communicating strategically; making a business case (argumentation and persuasion); presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering a powerful presentation.

BSAD 402E Effective Business Presentation Skills Workshop (0.75 Credit Hours)
This course introduces the fundamentals of good oral business communications. Course topics include: presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering powerful presentations. Restricted to students enrolled in EMBA or MBA Health Care Management cohort

BSAD 403 Fundamentals of Business (3 Credit Hours)
Only students with undergraduate degrees other than business are eligible to take this course. This course examines essential topics in management, marketing, operations, information systems, accounting and finance. Within each discipline, we examine the key decisions that are made and how those decisions are or should be made. They will understand what decisions are made in each discipline and how those decisions should be made.
Outcomes:
By the end of this course, students will be familiar with the key discipline areas in business

BSAD 409E Integrative Strategy (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Integrates functional area considerations with strategic decision-making at the end of the program.

BSAD 499 Special Topics (3 Credit Hours)
Enrollment is restricted to students in the Quinlan Graduate School of Business. This course offers students the opportunity to gain additional understanding of special business topics not otherwise addressed in the standard graduate business curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate an understanding of a specialized topic not otherwise addressed in the standard graduate business curriculum

BSAD 499E Special Topics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Offers students opportunity to gain additional understanding on a special business topic not otherwise covered in the standard EMBA curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate understanding of specialized topics not otherwise covered in EMBA curriculum

BSAD 501 Internship - Curriculum Practical Training (1-3 Credit Hours)
This is the companion course for any Graduate Business student concurrently engaged in an internship for 1 to 3 hours of elective academic credit. BSAD may be taken for academic credit up to three times for a total of 3 credit hours.
Outcomes:
Students will gain first-hand experience with a particular project or area of business operations, will engage in reflection on their contributions to the workplace and the overall internship experience

BSAD 601E Special Topics (1.5 Credit Hours)
Restricted to Executive MBA students. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

BSAD 609E Integrative Strategy (1.5 Credit Hours)
Restricted to Executive MBA students. Integrates holistic and humanistic concepts (social justice, sustainability, greater good, Jesuit perspectives, etc.) into scientific business management and one's individual lifestyle. Students apply these perspectives by addressing recent developments in emerging topics. In addition, students will present final Capstone project.

BSAD 699 Capstone Master of Business Data Analytics (3 Credit Hours)
Course is restricted to the MSBDA students. The capstone course is the last class students take in the MS Business Data Analytics program. As such, it asks students to integrate all the knowledge and skills they've developed in the foundation and elective courses, and to apply their efforts to solve a real-world business problem. The Capstone Project Coordinator will work with a set of host companies to identify projects that are suitable for students enrolled in the capstone course.
Outcomes:
Students completing this course will: 1) Gain a deep understanding of some of the tools and software that are used in modern-day analytics; 2) Learn how to transform large data sets into insightful and actionable information in an easy-to-understand format to assist organizational decision-making through the use of advanced analytical tools; 3) Learn how to evaluate the appropriate methods and tools for data analysis in specific organizational contexts, including selecting a modeling approach, building a model using appropriate tools, validating the model, and deploying the model for prediction and analysis; 4) Acquire experience tackling industry-specific problems and challenges using advanced analytics and computational methods

Business Ethics (ETHC)

ETHC 441E Business Ethics and Responsible Leadership (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. This course combines Quinlan's core business ethics course with contemporary instruction in leadership. Students will develop a framework for ethical decision making and the leadership strength needed to advance business decisions.
Course equivalencies: ETHC 600E/ETHC 441E

Economics (ECON)

ECON 420 Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 OR ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420B Managerial Economics (3 Credit Hours)
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420E Managers, Markets and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. The purpose of this course is to guide students in recognizing, analyzing, and solving managerial problems related to firms and markets under conditions of uncertainty. The course uses economic analysis to understand demand, supply, profit, production, competition, pricing policies and business criteria for investments. Strategic decisions using economic laws influenced by FED will also be examined.
Course equivalencies: ECON 420E/ECON600E

ECON 421 Business Fluctuations (3 Credit Hours)
Pre-requisites: ECON 420
This course studies the economic environment's impact on the firm where topics include national income accounting, factors in economic fluctuations and growth, fiscal and monetary policies, economic forecasting, the relationship of foreign trade and balance of payments on economic activities, economic indicators and measures, and problems of public policy.
Outcomes:
Students learn to recognize the macro environment and the business cycles in which to operate in and to make learned forecasts

ECON 424 International Business Economics (3 Credit Hours)
Pre-requisites: ECON 420
This course analyzes topics in international economics, specialization and comparative advantage, balance of payments and foreign exchange, elements of commercial policy, and international investment.
Outcomes:
The students develop skills in this course in analytical and creative thinking, Communication and team-work in evaluating trade policies and opportunities, comparative advantage, exchange rate dynamics and fluctuations and risk management

ECON 424E Global Issues in Economics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 429 Independent Study in Business Economics (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in economics

ECON 522 Game Theory & Strategy (3 Credit Hours)
Pre-requisites: ECON 420
This course studies cooperative and non-cooperative games and winning strategies and discusses prisoners dilemma, tragedies of common resources, executive compensation and auctions as applied to mergers and acquisitions.
Outcomes:
Students learn to think systematically to set strategy for the modern corporate firm in both cooperative and non-cooperative situations and to solve conflicts arising from principal agent problems

ECON 599 Special Topics (3 Credit Hours)
Pre-requisites: ECON 420; Restricted to Graduate School of Business students
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 602E Global Issues in Economics (1.5 Credit Hours)
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

ECON 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

Finance (FINC)

FINC 450 Financial Management (3 Credit Hours)
Pre- or co-requisites: ACCT 400
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450B Finance for a Sustainable World (3 Credit Hours)
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450E Financial, Investment and Portfolio Management (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks, and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty.
Course equivalencies: FINC 450E/FINC 600E

FINC 451 Financial Markets & Institutions (3 Credit Hours)
Pre-requisites: FINC 450
Introduction to the financial system in the United States, including the fundamentals and role of money and capital markets, the institutions operating in these markets, the instruments traded, and the organization, functioning and operation of the Federal Reserve System.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 452 Investment Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course includes the topics of asset pricing models; risk and return analysis of stocks, bonds and cash equivalents; portfolio theory; bond pricing, the term structure of interest and immunization strategies in managing fixed income securities.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 453 Topics in Advanced Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 455 International Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course examines the international dimensions of financial management. It introduces potential opportunities/challenges faced by multinational corporations as they expand their business overseas.
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, foreign exchange risk management strategies, and capital budgeting for multinational corporations

FINC 455E International Financial Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 456 Management of Financial Institutions (3 Credit Hours)
Pre-requisites: FINC 450
The course analyzes the importance played by financial institutions. This is a survey course that analyzes the present financial institutional structure with a special focus on managing risk.
Outcomes:
Students will demonstrate an understanding of the following topics: the role of financial intermediaries in managing interest rate, credit, market and international banking risks; Special attention will be given to procedures for measuring and managing these risks

FINC 459 Independent Study-Finance Management (3 Credit Hours)
Pre-requisites: FINC 450
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 470N Business Finance (3 Credit Hours)
Pre-requisites: FINC 450 or equivalent course
Exposure to international financial markets, international diversification, derivatives, risk management, asset valuation, multinational capital budgeting and more.
Outcomes:
Exposure to international diversification, derivatives, risk management, trading options, asset valuation and more

FINC 552 Emerging Markets (3 Credit Hours)
Pre-requisites: FINC 450 and ECON 420
An introduction to the contribution made by financial markets and institutions to economic growth and development in emerging market countries. Normally taught in Thailand, the course will provide a close look at a successful emerging market country.
Outcomes:
Students will demonstrate an understanding of the following topics: the contribution of financial institutions and markets to economic growth and development, the causes and effects of financial crises, the financial liberalization controversy, the impact of inflation, and the causes and effects of corruption; In addition, students will also demonstrate knowledge of Thailand's economic and financial systems

FINC 553 Applied Portfolio Management (3 Credit Hours)
Pre-requisites: FINC 452
This is a course in investment analysis and applied portfolio management. Topics will include investment policy and objectives, performance analysis and attribution, portfolio design, fixed income analysis and portfolio management, and equity analysis and portfolio management.
Outcomes:
At the conclusion of this course the student should be able to: 1) Create an investment policy statement; 2) Analyze and value fixed income securities; 3) Analyze and value equity securities; and 4) Develop and manage a portfolio of debt and equity securities

FINC 554 Fixed Income (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver; or B or better in FINC 335
This course provides an in-depth coverage of fixed income securities, and their markets. The course is an extension to other offerings in the finance program on futures, equities, and interest rate derivatives. The course is supplemented with hands-on applied sessions using Bloomberg, a leading global benchmark for data and analysis used by financial professionals worldwide.
Outcomes:
Identify the types, classifications, and characteristics of fixed income securities; Use Bloomberg and/or other resources to extract, interpret and aggregate key data; Analyze and price different types of fixed income securities

FINC 556 Investment Banking (3 Credit Hours)
Pre- or co-requisites: FINC 452; or prerequisite FINC 335 with minimum grade of " B"
This course provides a broad overview of the activities of investment banks, including venture capital fundraising, stock and bond underwriting, mergers and acquisitions, trading, asset securitization and money management.
Outcomes:
Students will understand how investment banks enhance capital markets by providing financing and investment services to companies, governments and individuals

FINC 599 Special Topics (3 Credit Hours)
Pre-requisites: FINC 450
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

FINC 602E International Financial Management (1.5 Credit Hours)
Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 620 Financial Mathematics and Modeling I (3 Credit Hours)
Pre-requisites: FINC 452 (co-requisite) and ISSCM 491 (pre-requisite); OR FINC 335 with a minimum grade of B (pre-requisite)
This course focuses on how to effectively use Python to build financial models. The course initially trains students to become sufficiently proficient to build financial models using Python, and then moves to its applications, such as translating raw data into meaningful indicators to help investment decisions. The course will examine financial securities, portfolio optimization, as well as valuation problems.

FINC 621 Financial Mathematics and Modeling II (3 Credit Hours)
Pre-requisites: FINC 620
Financial mathematics and modeling II is the second in a sequence of two courses. It is a combination of lecture and lab and will focus on the core mathematical, computational and practical modeling aspects encountered in modern financial applications. The programming languages of choice will be R and Excel/VBA. This course has a prerequisite of FINC 450, FINC 452, FINC 620, and ISOM 400. No prior R programming experience is required but familiarity with Excel/VBA is a pre-requisite.

FINC 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

FINC 624 Interest Rate Risk Management (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.
Course equivalencies: X-ECON624/FINC624
Outcomes:
Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks

FINC 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

FINC 626 Credit Risk Management and Structured Finance (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

FINC 628 Valuation (3 Credit Hours)
Pre-requisites: FINC 450 or Quinlan Finance 450 Student Group Waiver, or FINC 342 with the minimum grade of "B"; Restricted to Graduate School of Business or Undergraduate School of Business
This is an advanced course in valuation where students are given a thorough grounding in traditional valuation models (DCF and relative valuation) and also introduced to real option methods and ideas; a certain emphasis is placed on the valuation of start-ups and students are introduced to the venture capital markets.
Outcomes:
Students will be able to demonstrate an understanding of traditional valuation models as well as real options methods and ideas

FINC 630 Capstone Master of Science Finance (3 Credit Hours)
Pre-requisites: FINC 450 and any 3 additional 450 and above FINC courses
This course integrates theory, analytics, and modeling skills acquired in advanced finance courses. Subject matter will include topics and techniques in corporate finance, international financial management, risk management, and investments. It is intended for Master of Science in Finance (MSF) students and select MBAs concentrating in finance and who have satisfied the necessary prerequisites.
Outcomes:
Students will be able to perform a complicated valuation analysis of a public or private company; Students will understand different short and long-term financing techniques and their impact on a firm's cost of capital, capital structure, financial risk, credit, and business strategy; Students will be able to perform a complicated international capital budgeting analysis; Students will be able to evaluate public and private investments and assess their place in a portfolio

Healthcare Management (HCMT)

HCMT 501 Health Care Finance and Accounting (3 Credit Hours)
This course is restricted to students enrolled in the MBA Health Care Management program.

HCMT 502 Healthcare Economics (3 Credit Hours)
This course provides an understanding of the unique economic complexities of the health care industry, with a focus on consumer demand for health and the supply of health care services.

HCMT 505 Health Care Business Ethics (3 Credit Hours)
This course examines the decision-making process in health care settings using an ethical framework that reconciles competing values and a mindset that prioritizes dwindling resources among a significant number of health care stakeholders.

HCMT 506 Health Care Law (3 Credit Hours)
This course will introduce the student to the US Legal System and its application to the Healthcare Administrative environment. Topics covered will include the major legislative and regulatory standards of Health Care Law.

HCMT 507 Health Care Risk Management (3 Credit Hours)
Students will learn to identify legal, ethical, administrative and compliance risk management and patient safety issues and to reach resolutions for the problems presented. Students will learn how to respond to various risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed; and often how these perceptions are in conflict.

HCMT 508 Global Issues in Healthcare Management (3 Credit Hours)
This course provides students with an understanding of comparative global health care systems. Topics of study will include different models of funding health care services (via public and private health insurance systems), various models of organization of health care providers, and measures of population health in the visit countries.

HCMT 509 Special Topics in Health Care Management (1.5 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary. Enrollment is restricted to students enrolled in MBA-Health Care Management program.
Outcomes:
Students will be able to demonstrate understanding of specialized topics in health care

HCMT 510 Data Driven Decision Making in Healthcare Management (3 Credit Hours)
The intent of this course is to expand data literacy by learning about data tools and how pitfalls can occur in the process of creating them. This includes learning how data is defined, captured, analyzed, and cleaned. In addition, students will learn how data science tools are used within a healthcare setting and what ethical concerns may exist.

HCMT 512 Health Care Marketing (3 Credit Hours)
This course will cover how marketing should be integrated across today's healthcare organizations, and give healthcare leaders a foundational understanding of the marketing concepts necessary for effectively defining their market, communicating with multiple customer groups, and ultimately driving customer loyalty and growth.

HCMT 513 Strategic Human Resources Management (1.5 Credit Hours)
This course will help students understand and analyze the strategic HR challenges and decisions that organizations face today. The course will include lecture, readings, completion of case analysis in learning teams, a group presentation on one case, an individual paper, and a panel discussion with healthcare HR professionals.

HCMT 514 Health Care Leadership for the 21st Century (1.5 Credit Hours)
This course will help students expand their thinking on what it takes to be an effective leader in today's healthcare environment. It will also provide students an opportunity to gain insight on themselves as leaders, including their leadership purpose, values, style, talents, and development priorities.

HCMT 515 Special Topics: Project Management (3 Credit Hours)
Enrollment limited to students enrolled in MBA-HCM program.

HCMT 516 Change Management (1.5 Credit Hours)
This course explores the complexity and dynamics of change in organizations, with a particular focus on the health care domain. Topics covered include organization development, managing resistance, and change leadership. Students will develop an awareness of the ethical issues of change and corporate social responsibility. Restricted to Healthcare Management cohort only (HCMC-MBA).
Outcomes:
Students will develop an awareness of the ethical issues of change and corporate social responsibility

HCMT 530 Capstone (3 Credit Hours)
This is the capstone course of the Health Care MBA program, and is intended to be a bridge to working responsibly and effectively in the real world, particularly in the health care industry. This course will explore the fundamental frameworks for identifying, developing and implementing effective strategy for health care organizations.

Human Resources & Employment Relations (HRER)

HRER 413 Compensation (3 Credit Hours)
This course examines wage and salary policies and programs in private and public organizations. Legislative and social issues affecting pay decisions, and the alignment of pay policies with the business strategy and other human resource programs are covered.
Course equivalencies: HRIR413/HRER413
Outcomes:
Students will learn how to design and implement compensation policies and programs that will give their employers a competitive advantage; resolve compensation problems from both a human resource professional and managerial perspective; and create pay policies that are perceived as just and equitable; Students will improve their team leadership, analytical and writing skills

HRER 415 Internship (1-6 Credit Hours)
An internship provides the student with direct exposure to human resources and/or industrial relations functions as they are practiced in the real world.
Course equivalencies: HRIR415/HRER415
Outcomes:
Students will learn to practically apply the concepts and theories learned in the classroom to a real organizational work environment

HRER 417 Managing and Motivating in the Workplace (3 Credit Hours)
The course primarily explores the structure and function of human behavior in organizations. Students will be introduced to the principles of theory of perception, motivation, decision-making, job and organizational design as they relate to organizational realities such as power, politics and change.
Course equivalencies: CORD/HRIR/TRDV/HRER417/MGMT470
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417B Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores the structure and function of human behavior in organizations with a special focus on diversity, equity, and inclusion and on change management.
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417N Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Graduate School of Business Student
Students research a global HR challenge and develop written and oral communications focused on resolving the challenge that are presented to an executive panel at the end of the class. Students lead multiple in-class presentations and case analysis writing. Readings provide insight on building an inclusive work environment and resolving conflict.
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including culture, race, religion, and gender; Communication Skills: communicating effectively in an oral and written manner

HRER 418 Human Resources Law (3 Credit Hours)
This course will introduce students, by a combination of statutory case law analysis and readings, to the substantive case law in the area of employee-employer relations' law. The statutes and case law encompass the following: National Labor Relations Act, Title VII of the Civil Rights Act of 1964, Age Discrimination in Employment Act (ADEA), Americans with Disabilities Act (ADA), Civil Rights Act of 1991, Illinois Human Rights Act, and Illinois Employment Law Statutes and Regulations.
Course equivalencies: HRIR418/HRER418
Outcomes:
The primary purpose of this course is to introduce graduate students to a practical examination of the principles of "employee-employer" relations law, also called human resources law or personnel law; Students will be exposed to the principal theories, policies and literature concerning the relevant federal and state (Illinois) court case law and government regulations of the employee-employer relationship in primarily the private sector

HRER 422 Global HR Management (3 Credit Hours)
This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team building, and communication.
Course equivalencies: HRIR422/TRDV422/HRER422
Outcomes:
To survey the three types of topics covered by the field of Global HRM: 1. management of human resources in global corporations; 2. management of expatriate employees; 3. comparison of HRM practices in a variety of different countries: To consider special topics at the forefront of global HR, such as effects of NAFTA and the European Union, global ethics, and critiques of globalization

HRER 429 Human Resource Development (3 Credit Hours)
This course examines how organizations develop employees with the appropriate technical, interpersonal and leadership skills to be effective in their jobs.
Course equivalencies: CORD429/HRIR429/HRER29
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, and to evaluate the impact of the program on the employee and organization; In addition to conducting formal training programs, students will learn how to use career planning, job rotation and performance feedback to develop employees and themselves; Students will improve their presentation, team leadership, analytical and writing skills

HRER 430 Organization Development (3 Credit Hours)
This course examines how the effectiveness and the quality of life in organizations can be increased using collaborative methods.
Course equivalencies: CORD430/HRIR430/HRER430
Outcomes:
Students will learn to apply concepts from team building, employee involvement, work design, and large group interventions to organizational settings; In addition, students will increase their overall knowledge and effectiveness about leadership, organization development, training and human resource management

HRER 433 Group Process and Facilitation (3 Credit Hours)
This course focuses on major concepts of group development and group dynamics. Other topics of discussion include communication patterns, authority relations, leadership, norms, stages of group behaviors, paradoxes of group life, and self-awareness within group settings.
Course equivalencies: HRIR433/HRER433
Outcomes:
Students learn the various tools and techniques of process consultation and also gain knowledge and competence for working with groups; The course combines cognitive and conceptual materials with experienced-based learning

HRER 442 Global Overseas Seminar (3 Credit Hours)
This course examines cross-cultural human resources topics both within the business organization and across the global marketplace.
Course equivalencies: X-CORD442/HRIR442/HRER442

HRER 452 Human Resources Information Systems (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course offers an in-depth look into the processes involved in implementing an HRIS and how to use analytics to drive key business decisions.
Course equivalencies: HRIR452/HRER452
Outcomes:
Understand how to prioritize needs, implement, and use HRIS to support business decisions; Learn basic programming for analytics

HRER 453 Incentive Pay and Employee Benefit Programs (3 Credit Hours)
This course examines incentive pay and employee benefit programs in private and public organizations. Program design and the alignment of incentive pay and benefit programs with business strategy and human resource programs are covered.
Course equivalencies: HRIR453/HRER453
Outcomes:
Students will learn to design and implement incentive pay and employee benefit programs that will give their employers a competitive advantage and be perceived as equitable among employees; Students will improve their team leadership, analytical and writing skills

HRER 462 Employment Relations (3 Credit Hours)
This course examines critical labor laws in the United States and the structure and function of our employment relations system.
Course equivalencies: HRIR462/HRER462
Outcomes:
Students will demonstrate understanding of basic case law in the field of labor relations and how unions, management representatives, and government dynamically interact to provide employee representation, balance group interests, and ideally avoid disruptive workplace conflict

HRER 463 Staffing (3 Credit Hours)
This course provides an overview of staffing processes in organizations, with an emphasis on recruitment and selection procedures. Other topics of discussion include legal and strategic issues in staffing, and relevant statistical concepts.
Course equivalencies: HRIR463/HRER463
Outcomes:
Students will become comfortable with the entire staffing process and be able to design and implement cutting-edge staffing systems, with an emphasis on business strategy

HRER 490 Analytical Problem Solving (3 Credit Hours)
This course is designed as an introductory graduate level course in analytical problem solving, another name for research methods, and design. A basic understanding of - and general familiarity with fundamentals of statistical concepts is assumed. However, where necessary, we will revisit these concepts briefly. Of course, this is not a course in statistics.
Course equivalencies: HRIR490/HRER490

HRER 498 Independent Study (3-6 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of human resources not otherwise covered by department course offerings.
Course equivalencies: HRIR498/HRER498
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in human resources management

HRER 500 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
This course engages students in a chosen Special Topic in HRER.
Course equivalencies: HRIR500/HRER500
Outcomes:
In-depth understanding of a special topic in the area of HRER

HRER 501 Performance Management (3 Credit Hours)
Designed to provide both current and future managers an in-depth understanding of performance appraisals and related issues, this course also emphasizes on goal-setting, feedback and the rating process.
Course equivalencies: HRIR501/HRER501
Outcomes:
Students will learn to apply the various techniques used to conduct effective performance appraisal processes and design comprehensive performance management systems for their organizations

HRER 501E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

HRER 502 Global Employment Relations (3 Credit Hours)
This course introduces students to different employment relations systems in advanced industrial economies in North America, Europe, and Asia and to formats for resolving new types of labor problems that have merged in a global economy.
Course equivalencies: HRIR502/HRER502
Outcomes:
Students will be able to identify critical differentiating aspects of employment relations systems in the developed world and common pro and con arguments regarding proposed solutions to substandard working conditions in the developing world

HRER 511E Conflict Management and Negotiation (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

HRER 513E Strategic Human Resource Management (1.5 Credit Hours)
As a leader or manager, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best; preserving the organization's financial health and protecting it from legal risks. This course focuses on how best to accomplish this. Enrollment limited to EMBA Cohort.
Outcomes:
Understand the role of HR in the successful execution of business strategy; Understand the importance of fit-driven strategic hiring; Understand the basic tactics of distributive and integrative bargaining

HRER 600E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

Information Systems (INFS)

INFS 443 Business Analytics (3 Credit Hours)
Business analytics is the practice of using methodically collected data to drive decisions about business and in business applications. The goal of the course is to introduce students to the current approaches, tools, and techniques involved in this practice. Because many topics and concepts in business analytics are best learned through hands-on work, time will be spent obtaining, processing, analyzing and visualizing data that pertain to different business cases. Students will use R, arguably the most popular analytical software used by data scientists. During this course, students will learn to use R, as well as gain and help improve business insight through data-driven analytics. Restricted to Graduate School of Business students.
Outcomes:
Explain the key factors differentiating business intelligence from business analytics; Frame a problem in a business analytics context to drive insightful decisions and gain the competitive edge

INFS 485 Business Requirement Analysis (3 Credit Hours)
This course focuses on information systems requirements and related skills. Students learn techniques for translating between business needs and requirements for analytics systems and related processes. Students will learn how to elicit, analyze, specify, prioritize, and validate requirements for analytics that enable an organization's business goals. The course reviews primary processes, e.g., transaction processing, that collects and processes the information the business uses as inputs into analytics.
Course equivalencies: ISOM485 / MGSC485

INFS 492 Database Systems (3 Credit Hours)
This course uses database systems as the focus for studying concepts of data modeling and data manipulation. Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and using it to support business processes.
Course equivalencies: ISOM492 / MGSC492
Outcomes:
Understanding the development and use of business database systems

INFS 492E Business Intelligence/Data Warehousing (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 493 Strategic Use of Database Analytics (3 Credit Hours)
This course focuses on practical methods for in-database data preparation and manipulation to extract analytical insights out of a large or big data repository. The concept of big data, distributed computing frameworks, and massively parallel processing databases are also covered. Students will become proficient using open source databases, performing extensive advanced SQL programming, writing scripts and manipulating strings, numbers, data, etc. within a database

INFS 493E Strategic Use of Information Technology (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on the use of information technology for competitive advantage, including the management of information as a corporate resource, and information systems planning and its relationship to corporate planning.
Course equivalencies: ISOM601E / INFS601E/INFS493E

INFS 494 Data Mining (3 Credit Hours)
Data Mining involves the search for patterns in large quantities of data. The fundamental techniques used in data mining include, but are not limited to, clustering, decision trees, neural networks, and association analysis.
Course equivalencies: X-CSIS494/INFS494
Outcomes:
The student will be able to build models using an industry-standard package and interpret the results

INFS 496 Systems Analysis and Design (3 Credit Hours)
Provides a core set of skills for planning, managing and executing systems analysis and design processes in e-business and Web-based environments. Topics typically include project initiation and planning, methods used in the determination of information requirements, prototyping, techniques used in systems design, testing and implementation strategies.
Course equivalencies: X-INFS496/CSIS496
Outcomes:
Understanding of the development and implementation of business information systems

INFS 499 Independent Study (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information systems not otherwise covered by department course offerings.

INFS 590 Global Strategy and Data (3 Credit Hours)
This course introduces the student to economic and business practices of a foreign country using the analysis of data, and on-site experiences. We will focus on business strategies, impediments, and challenges in light of the culture, politics, history and institutions of a selected country. We will interact with a variety of local people such as small business owners, firm managers, economists, journalists, and students, in order to inform our understanding and analysis.
Course equivalencies: MGMT590/ISOM590
Outcomes:
Students will gain knowledge and analytical skills that can assist them in facing the challenges of conducting business in global locations

INFS 592 Data Visualization (3 Credit Hours)
Pre-requisites: INFS 492
The amount of data that our world generates is growing at a torrid pace. Sifting through & making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries & advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process & visualize large amounts of data in order to enable efficient & effective analysis using industry standard software

INFS 600E Business Intelligence & Data Warehousing (1.5 Credit Hours)
Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 604E Business Data Analytics - Infrastructure (1.5 Credit Hours)
The course covers concepts related to data organizing and database modeling, and the managerial issues related to the design, implementation, and utilization of systems that support operational data use and provide infrastructure for business data analytics. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how to gather, understand, manage, and act on information stored in databases, data warehouses, and Big Data repositories

INFS 605E Business Data Analytics - Application (1.5 Credit Hours)
The course covers the effective uses and applications of data analytics; including On-Line Analytic Processing/Business Intelligence, data mining techniques and their particular applications and data visualizations methods and tools. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how business data analytics is applied to create competitive edge and business opportunities and how to understand and manage business data analytics applications projects

INFS 691 Principles of Analytic Programming (3 Credit Hours)
Pre-requisites: INFS 443
This course will focus on the R language and will build on the introduction from INFS 443.
Outcomes:
Students will learn to manipulate data, write functions and scripts for repeatable analysis, build models, and perform data analysis tasks

INFS 791 Programming for Business Decision Making (3 Credit Hours)
This course focuses on how to effectively use a computer programming language to support decision making in business. Examples include using Visual Basic for Applications (VBA) to create applications within Microsoft Excel or using Python for manipulating and analyzing data. In addition to covering the concepts of programming using the specified language, this course covers developing user interfaces, working with external data and debugging code. By the end of this course, the student will be able to build custom procedures and create user-defined functions in the programming language used.

INFS 795 Ethics and Data Analytics (3 Credit Hours)
The rapid advancement in technology necessitates an equally rapid advance in the ethics of data analytics. We will explore ethical questions in this field through the use of business case studies. We will also look at examples of ethical codes of conduct.
Outcomes:
Students will evaluate following ethical considerations: how data is collected, how it is interpreted, how it is applied, and with whom it is shared

INFS 796 Data Warehousing (3 Credit Hours)
Pre-requisites: INFS/ISOM 492
The components and design issues related to data warehouses and business intelligence techniques for extracting meaningful information from data warehouses are emphasized. Oracle tools will be used to demonstrate design, implementation, and utilization issues.
Course equivalencies: X-ISOM796/MGSC796/CSIS796
Outcomes:
Students will learn how data warehouses are used to help managers successfully gather, analyze, understand and act on information stored in data warehouses

INFS 797 Applications of Visualization (3 Credit Hours)
Students will explore human perception and cognition, the use of best design practices, and interacting/storytelling with data.
Outcomes:
This course will develop a vocabulary and framework for discussing, critiquing, assessing, and designing visual displays of quantitative data

INFS 798 Quality in Product Management (3 Credit Hours)
This 10-week intensive course aims at mastering the end-to-end process of discovering, designing, developing, delivering, and managing products in context to data, machine learning and artificial intelligence. The course concentrates on strategic thinking and tactical implementation of data driven products and provides skills needed to become a successful product manager.

INFS 799 Special Topics in Information Systems (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Information Systems and Supply Chain Management (ISSCM)

ISSCM 400 Quantitative Methods (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.

ISSCM 400E Quantitative Methods (1.5 Credit Hours)
Quantitative Methods is restricted to students enrolled in the Executive MBA and MBA Health Care Management programs.

ISSCM 400N Quantitative Methods I (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students learn the tools for modeling business decision problems and the techniques for finding solutions for these models

ISSCM 402N Quantitative Methods II - Statistics Primer (0 Credit Hours)
The fundamentals of managerial statistics are presented. Topics include descriptive statistics, regression, and correlation analysis.

ISSCM 484B Project Management (1.5 Credit Hours)
Pre-requisites: Completion of two Core business courses (ACCT 400, MARK 460, HRER 417, ISOM 491, FINC 450, ECON 420, OPMG 480)
The art and science of project management as applied to a variety of business and technical projects in commercial, public, and private sectors. Covers: project life cycle and methodology; teambuilding; project organization, stakeholders and leadership; proposals and contracts; techniques for project planning, estimating, scheduling, and control; PMO.
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods, tools, and procedures for initiating, defining, and executing projects

ISSCM 484E Project Management (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the art and science of project management and systems development, as applied to a variety of large and small project situations in commercial, public, and private sectors.
Course equivalencies: OPMG601E/ISOM484E

ISSCM 484N Project Management (3 Credit Hours)
Project management is the art, craft, and occasional science of being intentional and systematic about transforming ideas into practice and realizing organizational value. We explore how to design and sequence tasks and deliverables, obtain resources, and manage to deadlines and value. Restricted to School of Business graduate degree students.
Outcomes:
Identify project management opportunities; Design executable project plans; Recognize and address risks that arise during execution

ISSCM 486E Global Supply Chain Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers.
Course equivalencies: ISOM486E/OPMG602E

ISSCM 491 Managerial Statistics (3 Credit Hours)
The fundamentals of managerial statistics are presented. Topics may include descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, and correlation analysis. Statistical software is used to assist in the analysis of these problems.
Course equivalencies: ISOM491 / MGSC491
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

ISSCM 491E Data Analysis for Managers (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Provides an in-depth treatment of computer-based data analysis, including sampling, estimation, hypothesis testing, regression, and time-series models. The emphasis is on managerial applications and on letting the data tell the story.
Course equivalencies: ISOM 600E/ISOM491E

ISSCM 495 Forecasting Methods (3 Credit Hours)
Pre-requisites: Graduate School of Business Student and ISSCM 491 or ISSCM 402N
Techniques of forecasting and model building are introduced. Methods covered are simple and multiple regression, introduction to time series components, exponential smoothing algorithms, and AIRMA models - Box Jenkins techniques. Business cases are demonstrated and solved using the computer.
Course equivalencies: ISOM495 / MGSC495
Outcomes:
To be able forecast business and economic variables to enhance business decisions

ISSCM 595B Decision Strategy Critical Thinking & Decision Analysis (3 Credit Hours)
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 595N Decision Analysis (3 Credit Hours)
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights. Restricted to School of Business graduate degree students.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 596B Data Driven Decision Making (3 Credit Hours)
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.

ISSCM 596N Data Driven Decision Making (3 Credit Hours)
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge. Restricted to School of Business graduate degree students.
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

ISSCM 799 Special Topics- Information Systems & Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM799 / MGSC799
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Legal Environment of Business (LREB)

LREB 443E Executive Legal Liability (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Treats selected areas of corporate activities in which officers and directors are subject to personal liability including conflicts of interest, security transactions, and provisions of the Foreign Corrupt Practices Act. Students will design company compliance programs related to such matters including anti-trust regulations.
Course equivalencies: LREB600E/LREB443E

LREB 445 Entrepreneurship Law (3 Credit Hours)
Pre-requisites: Quinlan School of Business graduate students
This course provides aspiring and established business owners with an understanding of the recurring legal issues at various stages in entrepreneurship. Comprehending these principles will assist business owners in better organizing their business structures and operations.
Outcomes:
The goal is to help increase a business' duration and profitability by implementing appropriate processes to reduce the potentially substantial costs and irreparable harm associated with failing to apply proper attention to foreseeable commercial risks

Marketing (MARK)

MARK 425N Business Communication (1.5 Credit Hours)
Effective communication skills are important because they give leaders and followers the ability to transmit and receive information with a high probability that the intended message is passed from sender to receiver. Good leaders communicate ideas, articulate arguments, advocate positions, solicit ideas from others, and persuade others. Restricted to School of Business graduate students.
Outcomes:
1) Learn to communicate effectively in an oral presentation; 2) Develop specific skills to enhance effective professional interpersonal communication as well as written and oral communication

MARK 460 Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460E Marketing Management/International Management (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Introduces use of strategic research, customer analysis, target market, and the application of marketing tools to a variety of case problems. Emphasis is placed on product planning, pricing policies, promotional methods, and distribution channels. Considers cultural, governmental, economic, business, and environmental factors affecting the marketing of goods and services globally.
Course equivalencies: MARK600E/MARK460E

MARK 461 Research Methods in Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the marketing research process and the role of survey research in it.
Outcomes:
Students formulate research problems and a design research study, including the development of a questionnaire, selection of an appropriate sample and data analysis

MARK 463 Sales and Strategic Leadership (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the tools and techniques required for developing a sales force and for managing revenue generation within organizations.
Outcomes:
Students apply processes for hiring and managing sales professionals; tools for successful account management; and skills in solving revenue generation problems facing profit and non-profit organizations

MARK 464 Integrated Marketing Communication (3 Credit Hours)
Pre-requisites: MARK 460; MARK 467 is recommended
This course develops an understanding of how advertising, sales promotion, public relations, personal selling and in same cases packaging decisions form a coordinated marketing communications plan.
Outcomes:
Students apply the elements of integrated marketing communications and develop a coordinated Marketing Communications plan for a project or case study

MARK 465 International Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of marketing problems in an international context with particular attention given to how international factors impact consumers, competition, and marketing strategies. Students analyze cases and identify optimal solutions to international marketing problems.
Outcomes:
Students apply the principles of marketing to solve marketing problems in an international context

MARK 467 Consumer Behavior (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of how consumers behave before, during, and after the consumption process by exploring both the micro-level mental processes that impact consumer decision-making as well as the macro- level cultural and social influences on consumer behavior.
Outcomes:
Students apply course concepts and theories to develop a consumer analysis and marketing strategies for a firm or non-profit organization

MARK 468 Digital Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of the Internet as part of an overall marketing strategy by considering the ways in which the Internet has changed marketing and business. The course covers topics such as online consumer behavior, web analytics, online advertising, email, social media, mobile, and search engine marketing (paid and organic). In addition to learning fundamental principles of digital channels, students will apply the learned principles in a class project; example projects include creating a paid search campaign for a client, running a digital marketing simulation, writing a digital marketing plan, or conducting a social media audit.
Outcomes:
Students develop the power to act effectively by using technology in increasingly complex buying environments

MARK 469 Independent Study-Marketing Management (3 Credit Hours)
Pre-requisites: MARK 460
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area not otherwise covered by department course offerings. Variable credit. Permission of area coordinator required. Special Topics are scheduled classes; specific titles and content will vary.
Outcomes:
Varies with course of study selected

MARK 470N Research, Insights and Storytelling (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Students will learn to monitor trends and shifts in the socio-cultural landscape, identify relevant market information, gather consumer research and translate into actionable strategies through storytelling. Enrollment limited to MBA Students. Collect, analyze & glean insights from data; Apply & translate insights into compelling stories for actionable business outcomes & social impact.
Outcomes:
Understand research process & approaches

MARK 472E Market Opportunity Analysis (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Enables students to discover market opportunities and business relationships that are critical to sustainable business growth. Course will challenge students to move away from "copy cat" business ideas to innovative business solutions.
Course equivalencies: MARK 604E/MARK472E

MARK 561 Comparative Consumer Behavior (3 Credit Hours)
This course develops an understanding of the marketing implications of cultural differences and similarities between the people of two or more nations and considers two opposing views of marketing scholars as to whether the similarities or the differences are the more important factor.
Outcomes:
Students apply methods of cross-cultural analysis as well as examine frameworks for assessing multinational strategies

MARK 562 Database Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the development and use of databases for marketing, retrieval of appropriate data and analysis of that data to increase marketing effectiveness.
Outcomes:
The student will perform database manipulation and analysis of data; Analysis includes at least univariate analysis, cross-tabulation, creation of new variables, regression analysis and recency-frequency-monetary analysis

MARK 564 Brand Equity and Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460 or by Departmental Consent
This course develops an understanding of the way firms may increase their share of market and profits by creating, building, and managing strong, unique, and favorable brand equity for their products and services.
Outcomes:
Students develop a Brand Plan, evaluating the contributions of traditional brand elements, and develop a framework for creating the marketing strategies required for successfully building and managing brand equity

MARK 566 Integrated Media Planning (3 Credit Hours)
The course provides an overall understanding of media planning: basic media concepts, buying and selling of media, development and evaluating effective media strategies and plans, and the role that media plays in an integrated marketing and communications plan. The course is recommended for students with little or no media planning experience.

MARK 567 Customer Relationship Management (3 Credit Hours)
Pre-requisites: MARK 460; MARK 468 is recommended
This course develops an understanding of CRM as a business philosophy that involves acquiring new customers as well as maintaining long-term and profitable relationships with existing customers. Key concepts such as customer experience, customer satisfaction, loyalty, customer lifetime value, among others, will be explored.
Outcomes:
Students conduct an analysis and critique of a firm's CRM strategy and provide recommendations for improving the customer-firm/customer-brand relationship

MARK 568 Social Media & Content Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course examines the connection between social media and content marketing for the purposes of branding, acquisitions, customer retention, employee recruitment, and other important organizational initiatives. Assess, implement, and leverage tools to build community and attract customers. Prove the ROI of any social media or content marketing effort.
Outcomes:
Develop social media and content marketing strategies that drive value

MARK 569 Special Topics (3 Credit Hours)
Pre-requisites: MARK 460
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

MARK 661 Customer Analytics (3 Credit Hours)
Pre-requisites: MARK 460, ISSCM 491, HRER 417, and MARK 461; Suggested Additional Prerequisites: INFS 492, INFS 791 and FINC 620
In this course the students will study how to use data analytics to learn about customer needs and improve targeting individual consumers. The course will encourage students to apply scientific methods and models to predict and respond to customer choices. This is the key part of learning Big Data. The term Big Data is viewed in the broad sense as it relates to various aspects of the consumer behavior, which may be captured, measured, and transformed to the digital form. Through applications of statistical models to the analysis of the real-world databases, the students will learn how firms may use customer data to serve customers better.

MARK 662 Marketing Metrics (3 Credit Hours)
Pre-requisites: MARK 460, ISSCM 491, HRER 417, and MARK 461; Suggested Additional Prerequisites: INFS 492, INFS 791 and FINC 620
This course is designed with marketing managers in mind. As profession marketing is evolving, it is no longer based primarily on the conceptual content. Marketers get exposed to thousand times the volume of data she(he) saw five years ago. More data cannot lead to better decision making unless managers learn how to use that data in meaningful ways. In this course, the students will be introduced to the analytical decision models that assist modern managers in making marketing decisions related to the targeting, product design, communications, etc.
Outcomes:
The objectives of this course are the following: 1) To learn analytical techniques and decision models for enhancing marketing decision making in the modern organizations; 2) Improve skills to viewing marketing processes and relationships systematically and analytically; 3) To learn power of decision models applied in the real managerial contexts; 4) To provide students with toolkit that may be used to assess, and measure return on marketing investments in organizations

Management (MGMT)

MGMT 400B Values-Based Leadership (1.5 Credit Hours)
This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.
Outcomes:
Students will: 1) learn and understand fundamental and diverse principles and theories of leadership and management; 2) develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions; 3) apply what they learn in this course to clarify thinking on leadership and to solve problems in the future; 4) learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management; 5) develop a personal style that will begin to answer the question "What kind of leader do I want to be?"; and 6) Understand the meaning of "vocation" and how it applies to each student's life

MGMT 401B Innovative Corporate Social Responsibility (1.5 Credit Hours)
This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness.
Outcomes:
Students will be able to: 1) examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives; 2) demonstrate understanding of changing legal, social, and political environments as they affect organizations; and 3) analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes

MGMT 402B Social Enterprise (1.5 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.
Outcomes:
Students will demonstrate: 1) an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship; 2) a strategic understanding of how social enterprises succeed; 3) the ability to use analytical tools to develop and measure the impact of social enterprise models; and 4) the ability to formulate their ideas into a social enterprise model presentation

MGMT 403B Creating Ethical Work Environments (1.5 Credit Hours)
This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility.
Outcomes:
Students will: 1) have familiarity with major ethical issues in human resources; 2) understand how companies make ethical human resources decisions aligned with their values; and 3) demonstrate knowledge of current human resource approaches to diversity, inclusion, and social responsibility

MGMT 404B ESG Investing (1.5 Credit Hours)
This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about: 1) the history and growth of ESG in investing; 2) how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and 3) how companies can improve their ESG performance.
Outcomes:
Students will: 1) understand why ESG factors influence a company's financial performance; 2) assess a company's ESG performance; and 3) develop recommendations for ESG improvement

MGMT 405B Sustainable Business Management (1.5 Credit Hours)
No course description is available
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 406B Influential Leadership (1.5 Credit Hours)
This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace. Students will be able to: 1) identify their personal leadership styles; 2) know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and 3) demonstrate familiarity with coaching techniques to improve personal and team performance.

MGMT 407B Impact Investing (1.5 Credit Hours)
This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns. Students will: 1) understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; and 2) be able to evaluate an investment with an SROI (social return on investment) framework.

MGMT 426N Leadership Development (1.5 Credit Hours)
Leader development is a systematic process that outlines self-improvement goals and strategies to assist leaders to take advantage of opportunities. Development planning consists of identifying development needs, prioritizing development needs, building a development plan, and modifying the development plan. Restricted to School of Business graduate students.
Outcomes:
1) Develop an understanding of the skills that are necessary to be an effective leader; 2) Create a development plan to become a more effective leader and responsible leader who exhibits personal integrity and ethical awareness

MGMT 430B Strategy and Leadership (3 Credit Hours)
The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders. This course is restricted to students in the MBA program and should be taken during the student's final quarter.
Outcomes:
Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity; Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into increasingly more responsible positions inside organizations

MGMT 430E Capstone (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Brings all of the learning together from the program as it concludes. This course builds on the Entrepreneurship course by having teams prepare a complete business plan for the concept they have developed.
Course equivalencies: MGMT610E/MGMT430E

MGMT 430N Strategy and Leadership (3 Credit Hours)
Pre-requisites: Graduate School of Business Student; MGMT 425N, 426N; ISSCM 595N, ISSCM 596N, ISSCM 484N
No course description is available

MGMT 431N Business Consulting Course (3 Credit Hours)
Pre-requisites: Graduate School of Business Student; MGMT 425N, 426N; ISSCM 595N, ISSCM 596N, ISSCM 484N
This applied fieldwork project provides an opportunity to apply the knowledge and skills learned in the classroom to a client. The student teams will work directly with companies to create implementable business solutions.
Outcomes:
1) Increase proficiency in integrating the techniques, processes and procedures of the fundamental business disciplines; 2) Learn to apply the theory, skills, and knowledge from the business disciplines to business practice; 3) Demonstrate an innovative, entrepreneurial approach to management decisions

MGMT 441 Business Ethics (3 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

MGMT 441B Business Ethics (1.5 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

MGMT 441N Business Ethics (3 Credit Hours)
Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender; Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner

MGMT 443 Global Environmental Ethics (3 Credit Hours)
This course develops an understanding of the ethical issues and responsibilities arising from human interaction with the non-human natural environment. Perspectives from various religious traditions, Western philosophy, and the science of ecology are considered.
Outcomes:
Students will be able to demonstrate ethical awareness, reflection, and application of ethical principles in decision making

MGMT 444 Introduction to ESG - Expectations & Opportunities (3 Credit Hours)
Pre-requisites: Open to all graduate degree and graduate certificate students
Concepts and practices of ESG are introduced within the context of growing and emerging megatrends such as climate change and social justice concerns that presents companies with new risks and new opportunities. Themes related to private and public companies will be explored.
Outcomes:
Develop strong grounding in the overall themes of ESG; Develop an understanding of the core methods for assessing ESG outcomes; Establish the foundation for delivering ESG impact

MGMT 445 ESG in Practice-Business Leadership in Times of Change (3 Credit Hours)
Pre-requisites: Completion of MGMT 444 and two ESG electives
Class integrates the full knowledge of ESG by building on introductory course while encouraging students to integrate prior ESG knowledge from both practice and other classes. Students apply content and build out plans and pathways for a specific organization. Student may be enrolled in second elective concurrently.
Outcomes:
Demonstrate understanding of reporting tools and approaches; Demonstrate applied understanding of ESG topics; Demonstrate understanding of ESG values based on leadership and change management

MGMT 446 International Business Ethics (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical issues that arise in the global business environment, including the standards for the operation of multinational corporations and the ethical perspectives of managers in different countries.
Outcomes:
Students will understand the specific ethical problems of international business and of different ethical perspectives; develop skills for personal decision making and for developing and implementing ethical corporate policies in international business; and learn how to work toward more effective background institutions and forms of international business regulation

MGMT 448 Ethics in Finance (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical challenges in finance, which includes financial markets, financial services, financial management, and finance theory. The aim of this course is to understand the ethical issues that arise in the various areas of finance and to develop an ability to resolve these issues effectively and responsibly. Topics include: fairness in financial markets, the rationale for market regulation, duties of agents, fiduciaries, and professionals, conflict of interest, insider trading, manipulation and fraud, marketing and sales, consumer privacy, abusive credit practices, financial management, financial reporting, bankruptcy, acquisitions and mergers, and building an ethical corporate culture.

MGMT 455 International Strategies for Multinational Enterprises (3 Credit Hours)
International business activity by multinational enterprises (MNEs) is one of the key features of the contemporary global economy. This course is designed to provide students with a broad overview of multiple quantitative approaches for analyzing MNEs' successful international (or global) strategies in foreign countries. The course includes topics such as modern theories of MNEs, entry mode choices, location selections, country risk assessment, MNE performance, and diverse econometric models for analyzing MNEs' international (or global) strategies.
Outcomes:
Students completing this course will have an understanding of and the ability to apply the following: 1) Theoretical and analytical insights for understanding the real world of international business in terms of both external environmental forces and internal strategic management issues surrounding multinational enterprises (MNEs) in the world markets; 2) Quantitative data analysis skills, especially important in an area that changes as fast and is as complex as the field of international business; 3) Integrative knowledge from several functional areas of MNEs, ie, accounting, business law, economics, finance, information systems, operations, management, and marketing, in order to properly understand the business transactions of MNEs taking place across national borders; 4) Research, written, and oral communications skills by preparing for in-depth data-driven business analyses on successful foreign operations of MNEs currently operating in the real business world; 5) Interdisciplinary perspectives with respect to the area of international business

MGMT 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MGMT 460E Values Based Leadership and Vocation (1.5 Credit Hours)
This course is focused on "values-based" leadership. This is an umbrella term that covers a wide range of approaches to leadership, all of which have at their foundation a set of values or principles, or at least an examination of one's values and beliefs.
Outcomes:
To assist students in beginning to develop a personally relevant and valuable style of leadership and management that will positively impact them and their organizations in a complex, diverse, and interdependent world

MGMT 472 Organizational Change & Development (3 Credit Hours)
This course focuses on the manager's role as a change agent in implementing effective change management and organizational development. Special Note: MGMT 472 is cross-listed with HRER 431.
Course equivalencies: X-CSIS472/MGMT472/HRER431
Outcomes:
Students will apply change theory frameworks in analyzing different types of organizational change such as mergers and restructuring and will learn how to manage resistance to change, facilitate change implementation and foster long-term acceptance of change by employees

MGMT 472E Organizational Change and Development (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 474E Strategic Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. This course introduces and develops strategic techniques to facilitate an organization's articulation of its mission and goals and its formation, implementation, and evaluation of key strategies. Additional topics include: strategic thinking, competitive advantage, vertical and horizontal integration, and planning horizon.
Course equivalencies: MGMT 604E/MGMT474E

MGMT 475 Cross-Cultural Dimensions of International Management & Marketing (3 Credit Hours)
This course examines cross-cultural management and marketing topics both within the business organization and across the global marketplace. Special note: MGMT 475 is cross-listed with MARK 475.
Course equivalencies: X-MARK475/MGMT475
Outcomes:
Students learn how differences in national and ethnic cultures affect the behavior of employees working in organizations, managers making business decisions and consumers making product choices

MGMT 477 Family Business (3 Credit Hours)
This course examines the family, ownership and management challenges involved in operating a family business, including governance and leadership succession.
Outcomes:
Students will be able to analyze the stumbling blocks to family business succession, compare differences between family and non-family owned firms and understand the impact of systems of family ownership and management on a firm's stakeholders and advisors

MGMT 479 Independent Study in Management (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of management not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in management

MGMT 480 Recognizing Entrepreneurial Opportunities (3 Credit Hours)
This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science.
Outcomes:
Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities

MGMT 481 Entrepreneurship (3 Credit Hours)
This course enables the students to develop their new venture ideas. We discuss how to cultivate new business ideas, form venture teams, evaluate the opportunities, and design a firm to bring the ideas to life. At the end, each venture team produces a business plan.
Outcomes:
The students learn how all major functions of a business come together in a new venture; This course will help those who might want to start their own business in the future; It will also help those who will work for existing companies by encouraging them to think more strategically and creatively about business

MGMT 481E Innovation and the Entrepreneurial Mindset (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Introduces the tools necessary for an individual to determine a relevant business concept and prepare to form a business to take that concept to market.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 482 Entrepreneurial Marketing (3 Credit Hours)
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas."

MGMT 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project.

MGMT 485 Social Enterprise (3 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

MGMT 499 Special Topics in Management (3 Credit Hours)
Pre-requisites: Graduate Business Student
No course description is available

MGMT 573 Business Strategy (3 Credit Hours)
This course analyzes the responsibilities of general management in formulating, communicating, and implementing a strategic plan. Whereas corporate strategy (MGMT 574) defines the vertical and horizontal scope of a firm, business strategy (MGMT 573) is concerned with how the firm generates and sustains competitive advantage within a particular industry or product market. Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole. Through case studies, students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the challenges of the business environment.

MGMT 574 Corporate Strategy (3 Credit Hours)
This course focuses on the strategic management of multi-business firms. Whereas business strategy or competitive strategy is concerned with how the firm competes within a particular industry or product market, corporate strategy defines the scope of the firm in terms of the industries and markets in which it competes.

MGMT 602E Organizational Change & Development (1.5 Credit Hours)
Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 605E Conflict Management & Negotiation (1.5 Credit Hours)
Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

MGMT 606E International Immersion (3 Credit Hours)
Students take an international trip to two countries to gain a better understanding of the opportunities and challenges and opportunities related to international business endeavors.

MGMT 607E Entrepreneurship (1.5 Credit Hours)
Introduces the tools necessary for an individual to determine a relevant business concept and prepare a business concept for the marketplace.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 610E Capstone (1.5 Credit Hours)
Enrollment limited to students in MBA for Executives program.
This course brings together all of the learning from the program as it concludes. Students prepare and present a complete business plan for the concept they developed in the Entrepreneurship course (MGMT 607E).
Course equivalencies: MGMT610E/MGMT430E

Supply Chain Management (SCMG)

SCMG 480 Intro to Operations Management (3 Credit Hours)
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Course equivalencies: ISOM480 / MGSC480
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480B Operations Management (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 481 Performance Improvement in Business Processes (3 Credit Hours)
Focuses on process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides the tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and functioning efficiently and effectively in their organization.
Course equivalencies: ISOM481 / MGSC481
Outcomes:
Understanding of the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 481E Performance Improvement in Business Processes (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program.
Focuses on teaching students how to successfully analyze a business process, research methods for improving a process, and adapt/integrate the improvement methods into the business process in a prioritized and actionable manner. The course accomplishes this through the concepts of benchmarking, best practices, and performance improvement principles.
Course equivalencies: OPMG 603E/OPMG 481E

SCMG 482 Lean Production Concepts and Practices (3 Credit Hours)
Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, standard operations, visual management, employee empowerment, and supplier partnerships.
Course equivalencies: ISOM482 / MGSC482
Outcomes:
Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 483 Management of Service Operations (3 Credit Hours)
Pre-requisites: SCMG/ISSCM 480
This course explores the application of operations management concepts and techniques in service-sector organizations, and, in particular, how services are delivered to the customer.
Course equivalencies: OPMG483/CSIS483
Outcomes:
Understanding how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations

SCMG 486 Global Logistics (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines how business partners along the supply chain can work together to gain competitive advantage in moving products and services around the world to satisfy customers.
Outcomes:
Understanding best practices like vendor-managed inventory and category management, and the application of information technologies for sharing information

SCMG 486E Global Supply Chain Management (1.5 Credit Hours)
Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers. Must be part of the Cohort of Executive MBA (EMBA) students to enroll.

SCMG 487 Purchasing Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of organizational procurement processes and decision making framework. Topics include in-sourcing/out-sourcing decisions based on total cost of ownership; purchasing cycle and processes; developing material and technical specifications; supplier evaluation, selection and management; supplier quality management; purchasing capital goods and services; global sourcing and e-commerce; and purchasing tools and analytics.
Outcomes:
Students will have developed an understanding of fundamental and strategic issues in material planning and procurement, with the ability to source in a global marketplace

SCMG 488 Inventory Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.
Outcomes:
Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain

SCMG 489 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.
Outcomes:
Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems

SCMG 499 Independent Study-Production & Operations Management (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department course offerings.

SCMG 589 Supply Chain Management Consulting (3 Credit Hours)
Pre-requisites: SCMG 480 Intro to Operations Mgmt; Graduate School of Business students
This course is the capstone of the Supply Chain Management Portfolio of the Master of Science in Supply Chain Management curriculum. As such, it is designed to integrate course topics covered in the foundation courses and engage students in discussions of critical supply chain leadership topics.
Outcomes:
Students will have developed an understanding of how to apply the concepts learned throughout the Supply Chain Management curriculum to a variety of full scale problems

SCMG 603E Performance Improvement in Business Processes (1.5 Credit Hours)
Restricted to Executive MBA students. This course focuses on the process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and function efficiently and effectively.
Course equivalencies: OPMG 603E/OPMG 481E
Outcomes:
Understanding the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 799 Special Topics in Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Sport Management (SPRT)

SPRT 532 Sport Law (3 Credit Hours)
This course examines and analyzes legal issues connected to amateur and professional sport associated with the fundamental concepts of law, sport business structure and legal authority and understanding the process of legal research. Students will comprehend the legal and court system, legal process, and the fundamental concepts of common, statutory, and constitutional law; perform and analyze sport law research; understand the elements of negligence; discuss recent court interpretations; and recommend a risk management standard of practice in the sport industry.

Accountancy (MSA)

With its emphasis on hands-on application of accounting principles and responsible leadership, Loyola's Master of Science in Accountancy program gives you the foundation you need to excel in today's constantly changing regulatory environment.

Curriculum

The Master of Science in Accountancy degree is a 12-course evening program taught on a quarter system. A student may enter the program at the start of the fall and spring terms.

Students who have not completed foundational courses in accounting will have to take additional courses to fulfill prerequisite requirements.

Courses: 12 required

Code	Title	Hours
MSA Core Courses		
Choose six (6) Accounting courses		18
ACCT 402	Issues in Financial Reporting	
ACCT 404	Financial State Analysis	
ACCT 412	Special Topics in Accounting

Three (3) ACCT or Graduate Business Elective Courses [5]		9
Total Hours		**36**

1. Prerequisite is ACCT 406 Accounting Theory II.
2. Prerequisite is ACCT 408 Tax Principles Applied to Entities.
3. Prerequisite is ACCT 409 Audit I -Audit and Assurance.
4. Prerequisite is ACCT 409 Audit I -Audit and Assurance or ACCT 436 Forensic Accounting and Fraud.
5. Introductory Core courses (ACCT 400, ECON 420, FINC 450, MARK 460, SCMG 480) may not be taken to fulfill the or general elective requirements.

MSA Prerequisite Pool

For students who need additional foundational courses in accounting, the following course options will fulfill prerequisite requirements.

Code	Title	Hours
ACCT 405	Accounting Theory I	3
ACCT 406	Accounting Theory II	3
ACCT 407	Tax Principles Applied to Individuals	3
ACCT 408	Tax Principles Applied to Entities	3
ACCT 409	Audit I -Audit and Assurance	3
ACCT 410	Audit II-Advanced Audit and Professional Ethics	3
ACCT 411	Business Law and Accountants	3

Learning Outcomes

Upon completion of the Master of Science in Accountancy (MSA) program, graduates are expected to have acquired essential skills in the areas of:

- Measurement: Graduate accounting students will demonstrate the ability to identify what needs to be measured, apply the appropriate measures, and recognize the strengths and weaknesses of the measures used.
- Decision Making: Graduate accounting students will demonstrate the ability to critically use financial and non-financial data in decision-making.
- Research: Graduate accounting students will demonstrate the ability to research new or existing accounting issues and topics, understand the link between business and accounting, and apply the finding to the business condition.
- Risk Analysis: Graduate accounting students will demonstrate the ability to identify and manage risk.
- Communication: Graduate accounting students will possess the ability to communicate scope, findings and recommendations of accounting work.

Accounting (MBA/MSA)

The dual MBA/MS in Accounting degree provides students with a depth of knowledge in financial and public accounting, and the breadth of business acumen sought by accounting and financial professionals.

Curriculum

Degree Requirements

The dual degree in business and accounting requires four fewer courses than if each degree were earned separately. Students completing the dual-degree program will earn an MBA (p. 1679) with a specialization in accounting and an MSA degree (p. 1656).

A maximum gap of three years is allowed between the completion of one program and the start of the other.

Code	Title	Hours

Total Hours		**66**

1. Students may be granted a waiver of prerequisite and introductory MBA courses based upon academic work completed in the last 5 years with students earning the grade(s) of "B" or higher within a discipline.
2. Prerequisite of ACCT 406 Accounting Theory II.
3. Prerequisite of ACCT 408 Tax Principles Applied to Entities.
4. Prerequisite of ACCT 409 Audit I -Audit and Assurance.
5. Prerequisite of ACCT 409 Audit I -Audit and Assurance or ACCT 436 Forensic Accounting and Fraud.
6. NOTE: Introductory Core courses (ACCT 400, ECON 420, FINC 450, MARK 460, SCMG 480) may not be taken to fulfill the or general elective requirements.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

for the MBA

Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

for the MSA Learning Outcomes

Upon completion of the Master of Science in Accountancy (MSA) program, graduates are expected to have acquired essential skills in the areas of:

- Measurement: Graduate accounting students will demonstrate the ability to identify what needs to be measured, apply the appropriate measures, and recognize the strengths and weaknesses of the measures used.
- Decision Making: Graduate accounting students will demonstrate the ability to critically use financial and non-financial data in decision-making.
- Research: Graduate accounting students will demonstrate the ability to research new or existing accounting issues and topics, understand the link between business and accounting, and apply the finding to the business condition.
- Risk Analysis: Graduate accounting students will demonstrate the ability to identify and manage risk.
- Communication: Graduate accounting students will possess the ability to communicate scope, findings and recommendations of accounting work.

Baumhart Scholars MBA (Social Impact MBA)

Baumhart Scholars go through Loyola's top-notch MBA experience, while enjoying specialized leadership opportunities to drive their careers and their social impact forward.

Curriculum

Business Strategy + Social Purpose

Our 16-course, cohort-based approach to the MBA curriculum is designed to provide a solid foundation in all business disciplines, develop leadership skills, and deeply explore purpose in business.

The Baumhart Scholars curriculum has three parts:

- **Foundational courses** in business fundamentals, which prepare you to be a data-driven business leader with the ability to think critically and communicate effectively.
- **Specialty courses** in corporate social responsibility, social enterprise, impact investing, ESG, and values-based leadership, which equip you with the tools to marry profit and purpose.

- **Elective courses** in a wide array of disciplines, which enable you to dig deeper in areas that meet your individual learning goals.

Foundational Courses

Scholars go through Quinlan's core MBA experience as a cohort, taking courses aimed at developing foundational business knowledge, skills, and values. The faculty who teach these courses are committed to integrating environmental, social, and governance (ESG) issues into their learning objectives.

Business Ethics

This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.

Data Driven Decision Making

This course aims to improve your understanding of quantitative decision-making for management, including a focus on measuring and managing impact data.

Decision Strategy

The course introduces students to a variety of tools that will improve their critical reasoning skills and provide an analytical framework to help them make effective decisions.

Financial Management

This course provides students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.

Financial Accounting

This course is an introduction to the accounting function that is used to measure and communicate business transactions with a special emphasis on companies with high environmental, social, and governance standards.

Managerial Economics

This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.

Managing and Motivating in the Workplace

The course explores the structure and function of human behavior in organizations with a special focus on diversity, equity, and inclusion and on change management.

Marketing Management

This course develops a broad understanding of the marketing principles that undergird successful marketing strategies with special attention given to asset-based communications and mission-driven marketing.

Operations Management

This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.

Project Management

This course immerses students in the philosophy and practice of project management through the application of these management tools to a real-world project.

Strategy and Leadership

This class, which serves as a capstone for the Baumhart Scholars MBA experience, explores the manner in which companies develop and implement strategies to drive enhanced financial, social, and environmental performance.

Note: ISSCM 400 Quantitative Methods *and* ISSCM 402N Quantitative Methods II - Statistics Primer *may also be required, depending on a student's undergraduate record.*

Specialty Courses

Scholars participate in an opening immersion weekend and receive mentoring and coaching opportunities designed exclusively for Baumhart Scholars. The program includes the specialty courses described below exploring values-based leadership, corporate social responsibility, social entrepreneurship, influencing skills, ESG, and impact investing.

ESG Investing

This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about:

1. the history and growth of ESG in investing;
2. how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and
3. how companies can improve their ESG performance.

Outcomes

Students will:

1. understand why ESG factors influence a company's financial performance;
2. assess a company's ESG performance; and
3. develop recommendations for ESG improvement.

Impact Investing

This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns.

Outcomes

Students will:

1. understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; and
2. be able to evaluate an investment with an SROI (social return on investment) framework.

Influential Leadership

This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace.

Outcomes

Students will be able to:

1. identify their personal leadership styles;
2. know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and
3. demonstrate familiarity with coaching techniques to improve personal and team performance.

Innovative Corporate Social Responsibility

This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus

on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness.

Outcomes
Students will be able to:

1. examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives;
2. demonstrate understanding of changing legal, social, and political environments as they affect organizations; and
3. analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes.

Social Enterprise

Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

Outcomes
Students will demonstrate:

1. an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship;
2. a strategic understanding of how social enterprises succeed;
3. the ability to use analytical tools to develop and measure the impact of social enterprise models; and
4. the ability to formulate their ideas into a social enterprise model presentation.

Values-Based Leadership

This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.

Outcomes
Students will:

1. learn and understand fundamental and diverse principles and theories of leadership and management;
2. develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions;
3. apply what they learn in this course to clarify thinking on leadership and to solve problems in the future;
4. learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management;
5. develop a personal style that will begin to answer the question "What kind of leader do I want to be?";
6. understand the meaning of "vocation" and how it applies to each student's life.

Elective Courses

Through your three electives, you can customize your education to your personal career path and interests.

Elective courses can be taken within the Quinlan School of Business or from across Loyola colleges and schools (for example, Social Work (https://www.luc.edu/socialwork/academics/graduate/graduate-courses/), Law (https://www.luc.edu/law/currentstudents/registrar/registrationplanning/coursedescriptions/), Communications (https://www.luc.edu/soc/graduate/), or the School for Environmental Sustainability (https://www.luc.edu/sustainability/academics/graduatedegreeprograms/)) for flexibility and customization.

You can choose to have a concentration by taking all three elective courses in the same discipline. You can also use your electives to work toward a Graduate Certificate, such as Business Data Analytics (p. 1663) or Cybersecurity (p. 1664). See the full list of Graduate Certificates (p. 1636).

Elective courses in Quinlan are offered in a number of areas. Learn more here (p. 1636).

Learning Outcomes

1. Provide a solid foundation in all business disciplines: Students in this MBA go through Quinlan's core MBA experience as a cohort, taking courses aimed at developing foundational business knowledge, skills, and values. Students take business ethics, data-driven decision-making, decision strategy, financial accounting for decision-making, financial management for a sustainable world, managerial economics, marketing management, operations management, project management and strategy and leadership.
2. Develop leadership skills: Students in this MBA take courses in managing and motivating in the workplace, values-based leadership, and influential leadership.
3. Deeply explore purpose in business: Specialty courses in corporate social responsibility, social enterprise, impact investing, and ESG equip students in this MBA with the tools to marry profit and purpose.

Baumhart Certificate in Environmental, Social, and Governance

The Baumhart Certificate in Environmental, Social, and Governance (ESG) will rapidly equip leaders with the knowledge and skills to be effective today as companies determine how they engage in broader societal issues – from climate change to water scarcity, from community stakeholders to internal diversity, equity and inclusion. The Certificate will equip leaders and emerging leaders who are already working in companies to accelerate their personal and company's ESG journey by developing fundamental skills to navigate different ESG approaches, assess ESG risks and opportunities, implement ESG initiatives, and ultimately deliver and report financial and societal impacts.

In addition to two ESG-focused courses, you can choose three electives from: the Quinlan School of Business, the Parkinson School of Health Sciences and Public Health, and the School of Environmental Sustainability.

Curriculum

The certificate requires the completion of five courses (15 credit hours).

Code	Title	Hours
Introductory Course		
MGMT 444	Introduction to ESG - Expectations & Opportunities	3
Elective Courses		
Select three of the following:		9
ENVS 401	Sustainable Systems - Natural Science Perspectives	
ENVS 402	Sustainable Systems - Social Science Perspectives	
ENVS 410	Introduction to Environmental Law & Policy	
ENVS 412	Water Law & Policy	
ENVS 413	Energy Law & Policy	
ENVS 427	Food Systems Analysis

MPBH 414	Introduction to Global Health	
MPBH 417	Global Maternal & Child Health	
Capstone Course		
MGMT 445	ESG in Practice-Business Leadership in Times of Change	3
Total Hours		**15**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
MGMT 444	Introduction to ESG - Expectations & Opportunities	3
Select one from Electives		3
	Hours	**6**
Winter		
Select one from Electives		3
	Hours	**3**
Spring		
MGMT 445	ESG in Practice-Business Leadership in Times of Change	3
	Hours	**3**
Summer		
Select one from Electives		3
	Hours	**3**
	Total Hours	**15**

Learning Outcomes

- Develop a strong grounding the overall themes of ESG (Environment, Social and Governance). Provide all students with a required introductory class and a required capstone class that together establish the historical evolution of business, the linkage to all three themes in ESG and the relationship to the economy today. This is solidified in the capstone class, which links the students to examples of real world organizations engaged in ESG.
- Develop an understanding of the core methods for assessing ESG impact. Through the introductory and capstone classes, develop a strong foundation in the methods currently in use to identify ESG trends and impacts. This will connect both the ideas of identifying leadership organizations as well as the emerging ways to link actions to the underlying themes (i.e. Environment: climate and air pollution, etc.; Social: community health and DEI, etc.; Governance: organizational structure and internal policies, etc.)
- Establish an understanding of the current state of the industry and the opportunities to deepen on the ground impacts tied to the ESG high-level framework. Students will have the opportunity to go deep in all three areas by taking targeted classes the further define the ESG themes and are offered across the University. As examples, student can take electives in the Quinlan School of Business, School of Environmental Sustainability, Parkinson School of Health Sciences and Public Health and the School of Law. They will then go deeper on the impact through a capstone class with an applied project.

Business Data Analytics (MSBDA)

Position yourself as a data-driven business leader—and your company's data scientist—with an MS in Business Data Analytics.

This one-year, full-time graduate degree program will prepare you to make informed business decisions based on a targeted analysis of the data available to business today.

Learning Outcomes

1. Gain a deep understanding of some of the tools and software that are used in modern day analytics

2. Be able to transform large data sets into insightful and actionable information in an easy-to understand format to assist organizational decision making using advanced analytical tools
3. Develop skills in forecasting, modeling and problem solving
4. Develop experience tackling industry-specific problems and challenges using advanced analytics and computational methods

Business Data Analytics Certificate

The Business Data Analytics certificate is an excellent specialization if you are currently pursuing a Quinlan graduate degree or are a working professional who needs to better understand current business analytics methodologies. This certificate will strengthen your analytic skills, while also guiding you through the most contemporary software, languages, and methodologies for modeling and analyzing data.

Learning Outcomes

Upon completion of the certificate program, you will be able to:

- Organize and analyze data in a professional manner using formal methods and techniques;
- Leverage data and analytics as a business asset;
- Use data and analytics to identify new business opportunities;
- Formulate strategic recommendations based on data and analytics;
- Use various languages and tools, including R, SQL, Tableau, and data modeling software

Business Ethics Certificate

Learn to do well, and good, with the support of the Business Ethics certificate program. The certificate explores ethical issues in business and the challenges of managing corporate ethics programs.

Curriculum

The certificate requires completion of three to four courses. Students applying for this certificate should have the U.S. equivalent of a BA or BS degree.

- **Degree-seeking MBA and other graduate business students:** Qualify for the certificate by completing three business ethics courses in the Quinlan School of Business. To add the certificate to your degree, contact the Graduate Programs Office at QuinlanGrad@luc.edu.
- **Non-degree-seeking students:** Qualify for the certificate after completing three business ethics courses and one additional Quinlan School of Business course that fits your interests and is approved for credit by the director of the program. All courses completed in the Business Ethics certificate program can be applied toward a Quinlan MBA degree. About the MBA # (p. 1679)

[1] Subject to approval for credit by the director of the program.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Develop an awareness of different ethical standards and perspectives as well as a tolerance for the conflicts and ambiguities within an organization to work respectfully, ethically, and professionally with people of diverse backgrounds, perspectives, and lived experiences.
- Develop, formulate and implement guidelines for personal and corporate decision-making.
- Understand principles of organizational relationships, and a sensitivity to the ethical concerns associated with dynamics like interpersonal influence, authority, and conflict.
- Demonstrate ability to think critically about managerial ethics, social responsibility, and environmental stewardship while articulating such concerns to various audiences—inside and outside of a business organization.

Cybersecurity Certificate

Never far from the day's headlines, data theft impacts business and consumers throughout our interconnected world. Due to a growing dependency on information security, businesses are hiring more cybersecurity professionals.

Quinlan graduate students have the unique opportunity to earn a certificate in cybersecurity from the highly ranked **University of Dallas** (UD) Gupta College of Business.

The online cybersecurity certificate is a graduate-level, five-course program that provides the foundational skills and knowledge for strategic cybersecurity management.

Curriculum

Courses are scheduled to enable completion of the certificate in as fast as 4 trimesters, with students beginning the course sequence in fall or spring. Sessions meet once per week for 12-weeks on the following schedule. All courses are online.

Courses

The following courses are required for the certificate:

- TECH 5F70 - Foundations of Cybersecurity **or** CYBS 5F70 - Information Technologies and Management
- CYBS 6350 - Data Protection
- CYBS 6355 - Compliance and Legal Issues
- CYBS 7350 - Operational Cybersecurity Management
- CYBS 7357 - Network Security

More information about the courses, including descriptions, can be found on the Quinlan School of Business (https://www.luc.edu/quinlan/academics/graduatecertificates/cybersecurity/) website.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. Earn Microcredentials
Upon successful completion of required coursework, students receive a verified University of Dallas microcredential (https://udallas.edu/minimasters/) in "Cyber Operations."

Microcredentials demonstrate mastery of in-demand skills to potential future employers. They can be displayed with a special digital badge from the University of Dallas on your LinkedIn account and resume. Through Acclaim (https://www.credly.com/organizations/university-of-dallas/badges/), your accomplishment can be verified by employers and hiring managers.

Executive MBA (EMBA)

In today's competitive business environment, you need a degree that sets you apart—and harnesses the power of your experience.

Our transformative 20-month program will help you hone your analytic capabilities, business knowledge, critical thinking, and management and leadership skills. Our executive MBA is ranked No. 23 in the nation, according to *U.S. News & World Report*, 2023.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Curriculum

As a student in Quinlan's EMBA program, you will participate in courses focused on building your leadership, management, decision-making, and analytic skills.

The advanced knowledge and skills the Quinlan EMBA helps you develop are invaluable to any business. Many companies recognize this and therefore sponsor EMBA training (either in part or whole) for promising managers, directors, and executives at our business school.

Learning Outcomes

Upon completion of the Quinlan Executive MBA (EMBA) program, graduates will have learned, achieved, or experienced the following:

Core Business Fundamentals:

- Exposure to and be academically rooted in core business fundamental coursework in the areas of accounting, finance, data analytics, economics, management, marketing, human resource management, and operations management
- Develop an ability to integrate and see the interplay of core business fundamental coursework

Entrepreneurship and Innovation:
Anticipate the challenges of leading and managing evolving business and markets Demonstrate an innovative, entrepreneurial approach to strategy and decision making

Global Perspective and Diversity:
Equip or enhance global perspective by recognizing international business issues Understand, appreciate, and leverage individual, team, and organizational diversity

Ethics and Values-Driven Leadership:
Be exposed to and rooted in ethics and values-related coursework Demonstrate ability to operationalize ethics and values-related frames into business strategy Distinguish self as a leader in business who exhibits personal integrity and an ability to apply ethical principles to business practice

Decision Making:
Achieve a capacity for an integrated critical analysis of business opportunities, processes, and problems Develop an ability to understand, synthesize, and accordingly activate quantitative and qualitative information to improve managerial decision making Apply knowledge to solve for real-world business issues and areas of practice Develop and execute strategic approaches to lead, manage, and operationalize businesses and organizations

Finance (MBA/MSF)

Loyola students may choose to combine an MBA (p. 1679) with a Master of Science in Finance (MSF) (p. 1667) to provide the breadth and depth of knowledge often required of finance professionals.

Curriculum

The dual degree in business and finance requires four fewer courses than if each degree were earned separately. Students completing the dual degree will earn an MBA (p. 1679) with a specialization in finance and an MSF degree (p. 1667).

A maximum gap of three years is allowed between the completion of one program and the start of the other.

[1] Prerequisite: ISSCM 400N Quantitative Methods I
[2] Corequisite: ACCT 400 Financial Accounting for Business Decisions
[3] Must complete MSF Core before capstone.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes for the MBA Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Learning Outcomes for the MSF Learning Outcomes

Our Master of Science in Finance program will provide you with specialized knowledge:

1. Learn the concepts of risk and return relationship, diversification, micro and macro structure of global capital markets, and tools for stock and bond portfolio optimizations.
2. Learn how to apply state-of-the-art techniques and models in the valuation of equities, fixed income, and derivatives securities such as options, interest and exchange rate swaps, collateralized debt obligations, among others.
3. Understand how to optimize a firm's financing and investment decisions in a global setting (debt-equity choices, asset-liability restructuring, capital budgeting, cost of capital, mergers and acquisitions, among others) to maximize its value and realize long-run growth opportunities.
4. Identify and assess a firm's risk from all sources both to mitigate threats using key risk management techniques (including options, swaps, and asset-liability duration) and exploit opportunities to realize competitive advantages.
5. Exhibit mastery of various statistical models and analytics, including simulation, econometrics, and financial mathematics to assess the financial consequences of actions by investors and firms.
6. Master emerging modeling techniques involving writing and implementing computer codes and pulling and working with data resources from different platforms, such as Bloomberg.
7. Learn effective communication skills aimed at shareholders, regulatory bodies, and the community at large.
8. Attain the knowledge needed to succeed in passing the examination requirements for professional certifications such as the Certified Financial Analyst (CFA), Certified Alternative Investment Analyst (CAIA), and Certified Financial Planner (CFP).
9. Incorporate transparency and social justice in all domestic and global financial decisions.

Finance (MSF)

You need a firm foundation to stay atop an ever-shifting global financial landscape. Our Master of Science in Finance (MSF) program will provide you with the understanding of financial principles and analytical skills to prepare you for a successful career.

Our curricula is closely linked to professional practice and vital industry connections. And industry leaders on our Financial Advisory Board ensure that our curriculum—and your MSF degree—remains relevant and cutting edge.

Curriculum

Completion of the Master of Science in Finance degree requires 12 courses, with additional prerequisite courses depending on academic background.

The curriculum is divided into three sets of courses: prerequisites, required courses, and electives. The required courses are designed to develop strong analytical and modeling skills. The electives enable students to explore topics in corporate finance, risk management, and asset management. Ethical decision-making is woven throughout the program, which will help position you as a responsible leader in your organization.

Prerequisites

The prerequisite requirement is met if you have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the prerequisite subject area within the last five years with a grade of B (or equivalent) or higher.

Healthcare Management MBA (MBA-HCM)

Quinlan's **MBA in Healthcare Management** develops professionals who are effective, responsible leaders with the knowledge, skill, and understanding to successfully manage and lead in any segment of the dynamic healthcare industry.

Whether you are in the hospital or non-hospital sector, we will strengthen your business knowledge, management skills, and leadership capacity to improve the healthcare delivery system.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Curriculum

Quinlan's executive MBA in Healthcare Management prepares professionals to strategically manage operations and lead change. Whether you are in the hospital or non-hospital sector, the program will strengthen your business knowledge, management skills, and leadership capacity to improve the healthcare delivery system.

Course Schedule for Loyola's Healthcare MBA

Our course schedule is designed for working professionals. Courses are offered over eight, 10-week quarters (the program is 24 months) and meet on Loyola's Water Tower Campus approximately twice per month with other weeks as asynchronous learning.

As a member of the Healthcare Management MBA program, you and your cohort will complete 51 credit hours (the equivalent of 17 graduate-level courses; some courses are 3 credit hours while some courses are 1.5 credit hours).

Learning Outcomes

Upon completion of the Quinlan Healthcare Management MBA (MBA-HCM) program, graduates will have learned, achieved, or experienced the following:

Core Business Fundamentals with a Focus on Healthcare:

- Exposure to and be academically rooted in core business fundamental coursework in the areas of accounting, finance, data analytics, economics, management, marketing, human resource management, and operations management
- Develop an ability to integrate and see the interplay of core business fundamental coursework

Decision Making:

- Achieve a capacity for an integrated critical analysis of business opportunities, processes, and problems in the healthcare industry
- Develop an ability to understand, synthesize, and accordingly activate quantitative and qualitative information to improve healthcare industry-related decision making
- Apply knowledge to solve for real-world healthcare industry issues and segments
- Develop and execute strategic approaches to lead, manage, and operationalize healthcare industry organizations

Ethics and Values-Driven Leadership:

- Be exposed to and rooted in ethics and values-related coursework
- Demonstrate ability to operationalize ethics and values-related frames into healthcare industry strategy
- Distinguish self as a leader in business who exhibits personal integrity and an ability to apply ethical principles to the healthcare industry

Global Perspective and Diversity:

- Equip or enhance global perspective by recognizing international healthcare-related topics and issues
- Understand, appreciate, and leverage individual, team, and organizational diversity
- Lead and be a member of cross-functional, multi-expertise healthcare industry teams

Entrepreneurship and Innovation:

- Anticipate the challenges of leading and managing an evolving healthcare marketplace
- Demonstrate an innovative, entrepreneurial approach to strategy and decision making in the healthcare industry

Human Resources (MBA/MSHR)

Loyola students may choose to earn a unique credential: Master of Science in Human Resources (p. 1671) (MSHR) and an MBA (p. 1679).

Curriculum

Students will earn an MBA with a specialization in human resource management and an MSHR degree.

A maximum gap of three years is allowed between the completion of one program and the start of the other.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes for the MBA Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Learning Outcomes for the MSHR Learning Outcomes

- Understand the theoretical and practical demands of HR professional career and human relations requirements of being an effective manager; both of which involve attracting, engaging, and retaining talented employees.
- Develop and administer human resource strategies, programs and policies in the specific functional areas including talent acquisition/staffing (including employment planning, recruitment, and selection), HR development and training, compensation and benefits, performance management, and employment relations.
- Understand how the practice of effective human resource management can positively impact the business and result in a competitive advantage to the organization.
- Utilize critical thinking skills which involve complex human behavior and motivation.
- Appreciate of the value and methods for sustaining employee diversity including a global perspective as it relates to human resources.
- Develop research, written, and oral communications skills by preparing in-depth case presentations and reports.
- Appreciate ethical perspectives and support sustainable outcomes with respect to all aspects of HR management.

Human Resources (MSHR)

An organization is only as good as its people. The Quinlan MS in Human Resources program will give you the analytical, team, and communication skills you'll need.

You'll be well-prepared to recruit, select, develop, and reward the employees that ensure your company's success every day. You'll also gain access to a strong alumni and human resources network in Chicago, and the mentor program run by Loyola's Institute of Human Resources and Employment Relations.

Learning Outcomes

- Understand the theoretical and practical demands of HR professional career and human relations requirements of being an effective manager; both of which involve attracting, engaging, and retaining talented employees.
- Develop and administer human resource strategies, programs and policies in the specific functional areas including talent acquisition/staffing (including employment planning, recruitment, and selection), HR development and training, compensation and benefits, performance management, and employment relations.
- Understand how the practice of effective human resource management can positively impact the business and result in a competitive advantage to the organization.
- Utilize critical thinking skills which involve complex human behavior and motivation.
- Appreciate of the value and methods for sustaining employee diversity including a global perspective as it relates to human resources.
- Develop research, written, and oral communications skills by preparing in-depth case presentations and reports.
- Appreciate ethical perspectives and support sustainable outcomes with respect to all aspects of HR management.

Human Resources and Employment Relations Certificate

Learn the foundations of recruiting, selecting, developing and rewarding employees through our Human Resources and Employment Relations certificate program.

This graduate-level, five-course certificate is ideal for students interested in the fundamentals of human resources management who have three or more years of professional work experience or have completed one HR course (graduate or undergraduate) within the last three years.

RELATED PROGRAMS

Master's

- Human Resources (MSHR) (p. 1671)
- Next Generation MBA (MBA) (p. 1679)

Curriculum

Students should have three or more years of professional work experience or have completed one HR course (graduate or undergraduate) within the last three years. All courses completed in the certificate program can be applied toward a Quinlan MBA Degree (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/) or M.S in Human Resources (p. 1671).

Code	Title	Hours
Prerequisite Course		
HRER 417N	Managing and Motivating in the Workplace	3
Required Courses		
HRER 413	Compensation	3
HRER 429	Human Resource Development	3
HRER 462	Employment Relations	3
HRER 463	Staffing	3
HRER 501	Performance Management	3
Total Hours		**15**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
HRER 413	Compensation	3
HRER 462	Employment Relations	3
	Hours	**6**
Winter		
HRER 429	Human Resource Development	3
	Hours	**3**
Spring		
HRER 463	Staffing	3
	Hours	**3**
Year 2		
Fall		
HRER 501	Performance Management	3
	Hours	**3**
	Total Hours	**15**

Learning Outcomes

Completion of the HRER certificate allows you to leverage knowledge and skills to work as a highly effective human resources management professional or as a manager who partners effectively with human resources departments to acquire, develop, and reward talented employees. Specific skills developed include: International human resources; Staffing; Compensation/benefits; Employment relations; Employee development; Analytical, team, and communication skills; Business ethics and social responsibility

Information Systems and Analytics (MBA/MSISA)

Loyola students may choose to combine an MBA (p. 1679) with a Master of Science in Information Systems and Analytics (p. 1674) (MSISA) to provide the breadth and depth of knowledge often required of information systems and business data analytics professionals.

Curriculum

Students completing the dual degree will earn an MBA with a specialization in information systems and an MSISA degree.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both

of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Information Systems and Analytics (MSISA)

The Master of Science in Information Systems and Analytics (MSISA) offers a unique blend of courses with a strong focus on data analytics–and it can be completed in one year.

This STEM-designated degree emphasizes important skills and tools in the information systems and analytics space such as SQL, Python, R, Tableau, database and data warehouse modeling, data mining, data visualization, and data storytelling.

The Quinlan School of Business also offers an MS in Business Data Analytics. Learn which of our analytics program best fits your needs through our analytics program comparison (https://www.luc.edu/quinlan/academics/graduatedegrees/ms/choosingabusinessdataanalyticsprogram/).

Related Programs

Master's

- Business Data Analytics (MSBDA) (p. 1661)

Curriculum

The 12-course curriculum of the Master of Science in Information Systems and Analytics prepares you to be a responsible leader in the fast-growing information systems and analytics fields.

Courses are offered in online, hybrid, and in-class formats. Students can complete all 12 courses in one year and completely online.

All MSISA students will be awarded the Business Data Analytics (BDA) Certificate (p. 1663) as well. The BDA certificate is a 5-course graduate Quinlan program, and all its courses are a part of the MSISA program.

Students with previous information systems coursework and part-time students should contact Nenad Jukić (njukic@luc.edu), the program director, for more information on how their courses would be sequenced.

Code	Title	Hours

INFS 791	Programming for Business Decision Making	3
INFS 797	Applications of Visualization	3
	Hours	**9**
	Total Hours	**36**

Learning Outcomes

At the completion of the program, graduates are expected to:

- Use data to drive strategic and tactical business decisions;
- Utilize sophisticated database, data warehousing, data mining, and data visualization methodologies and techniques to capture and apply data as a corporate asset;
- Demonstrate competence with various languages and tools, SQL, R, Tableau, and Python;
- Lead, supervise, and manage information systems projects of varying levels of complexity;
- Demonstrate effective communication skills with technical and non-technical individuals and groups;
- Show ability to effectively collaborate with and provide technical leadership to a variety of business units and organizations;
- Demonstrate a high level of technical aptitude in design, development, and use of information systems components;
- Integrate values and ethics into data analysis and information systems projects and solutions.

Law/Business (JD/MBA)

In a growing global economy, the career paths of business and law professionals have become increasingly convergent. The role of an attorney in the day-to-day management of businesses has become vital, as the modern business professional needs immediate access to sound legal advice.

The JD/MBA dual-degree program in business and law enables the student to complete both degrees with six fewer courses than would be required if the degrees were pursued separately. Students completing the dual degree will earn an MBA with a specialization in business law (p. 1679) as well as the JD degree (p. 1889).

CURRICULUM

- During the completion of the JD/MBA program, the equivalent of nine credit hours from each degree program are counted toward the other degree program. This feature enables the student to complete both degrees with fewer courses than would be required if the degrees were pursued separately.
- Students completing the dual degree will earn an MBA with a specialization in legal environment, as well as earning the JD degree. Students work with an advisor in each school to plan their respective programs of study.
- Generally, a total of 11 to 16 MBA courses are required for the completion of the MBA, plus the nine credit hours transferred from the School of Law.
- Students must complete at least 15 quarter hours (generally five courses) in the Quinlan School of Business before completing their law coursework in order to earn the "course sharing" benefits of the MBA/JD program.

Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes for the JD Learning Outcomes

You will be able to:

- Utilize skills derived from participation in supervised live-client experiences, externships, or litigation and transactional practice simulations, such as interviewing, counseling, negotiation, mediation, fact development and analysis, problem solving, design thinking, trial practice, document drafting, and collaborative work
- Determine your clients' needs and objectives
- Determine relevant facts and understand their relevance to your client's legal position
- Conduct legal research
- Analyze and apply relevant legal principles
- Find solutions to legal problems
- Communicate legal concepts clearly and effectively, both orally and in writing

Learning Outcomes for the MBA Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and

managing the quantitative and qualitative information necessary for effective managerial decision making.

- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Marketing (MBA/MSM)

Loyola students may choose to combine an MBA (p. 1679) with a Master of Science in Marketing (MSM) (p. 1677) to provide the breadth and depth of knowledge often required of marketing professionals.

CURRICULUM

The dual degree in business and marketing requires four fewer courses than if each degree were earned separately. Students completing the dual degree will earn an MBA with a specialization in marketing and an MSM degree.

A maximum gap of one quarter is allowed between the completion of one program and the start of the other program.

Learning Outcomes for the MSM Learning Outcomes

As a Quinlan MSM student, you will:

- Develop the creative and strategic skills you need to **lead and innovate** in the diverse, digital, and dynamic field of marketing
- Learn marketing strategies that **deliver brand growth and a competitive advantage** in a time of sweeping economic, environmental, and social change

- **Gain the technical business skills** that are essential in today's global economy
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote **positive social change**

You will also build a strong foundation in:

- Marketing finance
- Strategic planning
- Brand leadership
- Digital and social content development
- Leadership and ethics
- Database analytics
- Sustainable business leadership
- Global campaign development

Marketing (MSM)

Our Master of Science in Marketing (MSM) degree program integrates creativity with analytics and strategy with insight. You'll have the opportunity to accelerate your career in the dynamic fields of 21st century marketing.

Many students with undergraduate degrees in journalism, communications, advertising, and marketing enroll in the MSM program to advance their careers with additional credentials. Others with degrees in finance, economics, medicine, and engineering choose the MSM program as a pathway to career change.

Curriculum

The Masters in Marketing (MSM) program's strategic and creative curriculum builds the skills needed for strong brand management that addresses global challenges with thoughtful, actionable innovations for today's marketplace.

Three Tracks

MSM students choose one of the following three tracks:

- Digital Marketing Analytics (STEM-designated)
- Integrated Marketing Communications
- Supply Chain (STEM-designated)

All three tracks have a 12-course curriculum with one prerequisite course.

Digital Marketing Analytics Track

The STEM-designated Digital Marketing Analytics track is devoted to engaging emerging capabilities built on the foundation of creative, digital, and analytical marketing skill sets.

Combining business goals with marketing decisions, this increasingly critical marketing function leverages consumer, retail, and category trend data to help marketers make informed marketing and business decisions through database models, improved sales forecasting, and data-driven tactics that enhance consumer loyalty, market share, and profitability.

Track Curriculum

The Digital Marketing Analytics track's 12-course curriculum can be completed in 12-16 months.

Electives		**9**
Through electives, you can shape your education for your personal career path and interests. Electives can be concentrated in a particular area of study (e.g., finance, marketing, human resources management, etc.) or selected across several areas of interests.		
Total Hours		**33**

[1] Upon admission, students may be granted a waiver of prerequisite and introductory MBA courses (indicated in blue), based upon academic work completed in the last 5 years with students earning the grade(s) of "B" or higher within a discipline. Advanced means an elective course from the same area of study may be completed. 'Substitution means any course in any area may be used to fulfill the introductory course

Concentrations

You can choose to have a concentration by taking three courses in any one of the twelve disciplines through elective options (four courses needed for accounting). The concentrations available within the Next Generation MBA program are:

Accounting

The MBA with an accounting concentration paves the way for an exciting career in financial management, consulting, or your own business.

The MBA accounting concentration includes fundamental courses in ethics, leadership, and international business. Students may choose to customize their studies by focusing on select accounting concepts, procedures, and applications.

Elective Courses

Choose four of the following elective courses in order to complete the accounting concentration.

Code	Title	Hours
ACCT 402	Issues in Financial Reporting	3
ACCT 404	Financial State Analysis	3
ACCT 407	Tax Principles Applied to Individuals	3
ACCT 408	Tax Principles Applied to Entities	3
ACCT 409	Audit I -Audit and Assurance	3
ACCT 410	Audit II-Advanced Audit and Professional Ethics	3
ACCT 412	Special Topics in Accounting	3
ACCT 424	Managerial Accounting	3
ACCT 431	Tax Research	3
ACCT 432	State, Local and International Tax	3
ACCT 433	International Tax	3
ACCT 435	Internal Audit	3
ACCT 436	Forensic Accounting and Fraud	3
ACCT 437	Advanced Forensic Accounting	3
ACCT 439	Independent Study	1-3
LREB 445	Entrepreneurship Law	3

Business Ethics

The MBA with business ethics concentration emphasizes the importance of having a moral code and behaving ethically in the business environment.

Loyola's business ethics courses are designed to help you meet all challenges head-on. Our practical curriculum based on responsible leadership aims to make you accountable, ethical, and trustworthy. You will learn the business imperative for treating all stakeholders—including customers, employees, and the community—with respect and integrity.

Elective Courses

Choose three of the following elective courses in order to complete the business ethics concentration.

Code	Title	Hours
INFS 795	Ethics and Data Analytics	3
MGMT 441	Business Ethics	3
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
MGMT 448	Ethics in Finance	3
MGMT 479	Independent Study in Management	3

Derivative Markets

The MBA with a derivative markets concentration prepares you for job opportunities in top financial service companies.

Elective Courses

Choose three of the following elective courses in order to complete the derivative markets concentration.

Code	Title	Hours
FINC 553	Applied Portfolio Management	3
FINC 622 / ECON 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3

Entrepreneurship

The MBA with an entrepreneurship concentration lays the groundwork for your future as a successful business owner. Experts predict that entrepreneurial opportunities will continue to grow in virtually every field of business. A solid knowledge of entrepreneurship principals, laws, and applications will enable you to hit the ground running.

Loyola's entrepreneurship courses provide you with complete hands-on training, often in partnership with local businesses. We offer a global perspective and a practical curriculum that prepares you to exercise sound judgment in recognizing lucrative entrepreneurial opportunities.

Elective Courses

Choose three of the following elective courses in order to complete the entrepreneurship concentration.

Code	Title	Hours
MGMT 472	Organizational Change & Development	3
MGMT 480	Recognizing Entrepreneurial Opportunities [1]	3
MGMT 481	Entrepreneurship	3
MGMT 482	Entrepreneurial Marketing	3

MGMT 483	Strategic Entrepreneurship and Innovation Management	3
MGMT 485	Social Enterprise	3
LREB 445	Entrepreneurship Law	3

[1] Required

Finance

The MBA with a finance concentration is one of the most popular areas in business studies today. Interest is driven by professional opportunities in business, investment, and finance.

Loyola's MBA with a finance concentration is well known for its practical curriculum, hands-on application, and partnered delivery with established Chicago businesses. In addition to studying relevant trends and current issues, you will employ a global perspective and gain a solid understanding of international and emerging financial systems.

Elective Courses

Choose three of the following elective courses in order to complete the finance concentration.

Code	Title	Hours
FINC 452	Investment Management	3
FINC 453	Topics in Advanced Financial Management	3
FINC 455	International Financial Management	3
FINC 456	Management of Financial Institutions	3
FINC 553	Applied Portfolio Management	3
FINC 556	Investment Banking	3
FINC 599	Special Topics	3
FINC 620	Financial Mathematics and Modeling I	3
FINC 621	Financial Mathematics and Modeling II	3
FINC 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3
FINC 625	Applied Econometrics	3
FINC 628	Valuation	3

Human Resources Management

The MBA with human resources concentration can bolster your ability to manage and motivate a company's most valuable asset—it's employees.

Loyola's professors demonstrate the application of key practices in developing, managing, recruiting, and leading staff. Our strong focus on examining and understanding current issues impacting HR from a global perspective will put you at an advantage in the marketplace.

Elective Courses

Choose three of the following elective courses in order to complete the human resources concentration.

Code	Title	Hours
HRER 413	Compensation	3
HRER 418	Human Resources Law	3
HRER 422	Global HR Management	3
HRER 429	Human Resource Development	3
HRER 430	Organization Development	3
HRER 433	Group Process and Facilitation	3
HRER 442	Global Overseas Seminar	3
HRER 453	Incentive Pay and Employee Benefit Programs	3
HRER 462	Employment Relations	3
HRER 463	Staffing	3
HRER 490	Analytical Problem Solving	3
HRER 500	Special Topics in Human Resources and Employment Relations	3
HRER 501	Performance Management	3
HRER 502	Global Employment Relations	3

Information Systems Management

The MBA with an information systems concentration will advance your career in the arena of information technology. Every business relies on IT processes to stay competitive, improve efficiency, and enhance communication. Loyola's practical curriculum helps you develop advanced skills for improving organizational performance and consequently, profitability, allowing you to naturally progress into leadership or managerial roles.

Elective Courses

Choose three of the following elective courses in order to complete the information systems concentration.

Code	Title	Hours
INFS 485	Business Requirement Analysis	3
INFS 492	Database Systems	3
INFS 493	Strategic Use of Database Analytics	3
INFS 494	Data Mining	3
INFS 496	Systems Analysis and Design	3
INFS 499	Independent Study	3
INFS 592	Data Visualization	3
INFS 691	Principles of Analytic Programming	3
INFS 791	Programming for Business Decision Making	3
INFS 796	Data Warehousing	3
INFS 797	Applications of Visualization	3
INFS 798	Quality in Product Management	3
ISSCM 495	Forecasting Methods	3

International Business

The MBA with an international business concentration gives you the competitive edge in a distinctly global economy. A growing number of businesses are competing in the international market; advanced knowledge of global practices enhances your opportunities significantly at home and abroad.

Elective Courses

Choose three of the following elective courses in order to complete the international business concentration.

Code	Title	Hours
FINC 455	International Financial Management	3
HRER 422	Global HR Management	3
HRER 502	Global Employment Relations	3
MARK 465	International Marketing	3
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
SCMG 486	Global Logistics	3
Graduate Business Study Abroad		

Management

The MBA with a management concentration will give your career the boost needed to secure leadership, managerial, or executive positions. Our program provides you the advanced knowledge necessary for successful career advancement. A practical curriculum enhanced with a global perspective and strong business ethics foundation affords you a distinct competitive edge.

Elective Courses

Choose three of the following elective courses in order to complete the management concentration.

Code	Title	Hours
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
MGMT 448	Ethics in Finance	3
MGMT 472	Organizational Change & Development	3
MGMT 475	Cross-Cultural Dimensions of International Management & Marketing	3
MGMT 480	Recognizing Entrepreneurial Opportunities	3
MGMT 481	Entrepreneurship	3
MGMT 482	Entrepreneurial Marketing	3
MGMT 483	Strategic Entrepreneurship and Innovation Management	3
MGMT 485	Social Enterprise	3
MGMT 573	Business Strategy	3
MGMT 574	Corporate Strategy	3

Marketing

The MBA with a marketing concentration equips business managers with solid marketing skills to lead and grow brands and companies naturally.

Elective Courses

Choose three of the following elective courses in order to complete the marketing concentration.

Code	Title	Hours
MARK 461	Research Methods in Marketing	3
MARK 463	Sales and Strategic Leadership	3
MARK 464	Integrated Marketing Communication	3
MARK 465	International Marketing	3
MARK 467	Consumer Behavior	3
MARK 468	Digital Marketing	3
MARK 469	Independent Study-Marketing Management	3
MARK 561	Comparative Consumer Behavior	3
MARK 562	Database Marketing Strategy	3
MARK 564	Brand Equity and Marketing Strategy	3
MARK 566	Integrated Media Planning	3
MARK 567	Customer Relationship Management	3

Risk Management

The MBA with a risk management concentration offers you the opportunity to study in Loyola's newest discipline. Calculating and mitigating risk is top of mind for today's senior executives. This concentration focuses on the latest principles and practices for appropriately leveraging business opportunities. We offer you hands-on learning, often in partnership with recognized local businesses, as well as a global perspective on current issues.

Elective Courses

Choose three of the following elective courses (from at least two different disciplines) in order to complete the risk management concentration.

Code	Title	Hours
FINC 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3
FINC 628	Valuation	3

Supply Chain Management

The MBA with an supply chain management concentration teaches you advanced strategies to improve business performance and output. Our practical curriculum and hands-on approach contribute to effective and enhanced learning for you.

Elective Courses

Choose three of the following elective courses in order to complete the supply chain management concentration.

Code	Title	Hours
SCMG 481	Performance Improvement in Business Processes	3
SCMG 482	Lean Production Concepts and Practices	3
SCMG 483	Management of Service Operations	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
SCMG 489	Supply Chain Analytics	3
SCMG 589	Supply Chain Management Consulting	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.

- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Pharmacology/Business (MS/MBA)

The Department of Molecular Pharmacology & Neuroscience and the Loyola University Chicago Quinlan School of Business offer full time 2.5-year and part-time 4-year dual degree programs leading to a Master of Science (MS) in Pharmacology degree and a Master of Business Administration (MBA) degree. This program is especially designed for individuals who are planning a career in the pharmaceutical, biotechnology, or other health-related industries. The ability of our graduates to understand both the science and business aspects of developing and marketing a new product or therapy gives them a competitive advantage in obtaining a position in industry and advancing their careers. This dual degree program also allows students to earn the two degrees in a shorter period of time than completing each one separately.

Curriculum

Master of Science in Pharmacology Curriculum

The Master of Science in Pharmacology requires 30 credit hours, 3 of which will be shared with the MBA curriculum.

MBA Courses to follow in the suggested sequence.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units

to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes for the MBA Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.

- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Learning Outcomes for the MS Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods.
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease.
- Understand, assess, and draw conclusions from published research.
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use.
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions.
- Design and effectively present scientific presentations, write scientific papers and grants.
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity.

Supply Chain Fundamentals Certificate

With markets that move at the speed of ecommerce, global companies must have a high-performing supply chain and logistics system. Learn the fundamentals in our Supply Chain Fundamentals certificate program.

Master's

- Supply Chain Management (MSSCM) (p. 1687)

Combined

- Supply Chain Management (MBA/MSSCM) (p. 1686)

Curriculum

The certificate requires completion of five courses. Four of the courses are required, and one is elective.

Students should have completed one course in statistics (or can complete a statistics course at Loyola before beginning the certificate program) and have the U.S. equivalent of a BA or BS degree.

Code	Title	Hours
Prerequisite Course		
ISSCM 491	Managerial Statistics [1]	3
Required Courses		
SCMG 480	Intro to Operations Management [2]	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
Elective Courses		
Select one of the following: [3]		3
ISSCM 484N	Project Management	
ISSCM 495	Forecasting Methods	
SCMG 481	Performance Improvement in Business Processes	
SCMG 482	Lean Production Concepts and Practices	
SCMG 483	Management of Service Operations	
SCMG 489	Supply Chain Analytics	
Total Hours		**15**

1. This course may be waived if student has completed an equivalent course with a grade of "B" or higher in the last 5 years.
2. This course can be substituted, depending on academic background. If substituted, the student would take an additional elective course.
3. Select two if SCMG 480 has been waived.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
SCMG 480	Intro to Operations Management	3
Select one from list of Electives		3
	Hours	**6**
Winter		
SCMG 488	Inventory Management	3
	Hours	**3**
Spring		
SCMG 487	Purchasing Management	3
	Hours	**3**
Summer		
SCMG 486	Global Logistics	3
	Hours	**3**
	Total Hours	**15**

Learning Outcomes

At the completion of the program, graduates are expected to:

- Use advanced supply chain strategies and be able to implement these strategies in a variety of global business environments.
- Utilize sophisticated methodologies to improve or optimize operations across a wide range of industries.
- Execute advanced tasks associated with process design and improvement, transportation management, inventory management, and purchasing management.

Supply Chain Management (MBA/MSSCM)

Loyola students wishing to combine focused expertise in supply chain management with a breadth of business knowledge can enroll in a dual-degree program comprised of an MBA (p. 1679) and a Master of Science in Supply Chain Management (MSSCM) (p. 1687).

Curriculum

The dual degree program can be completed by taking courses from the MBA and MSSCM curriculum at the same time. Students completing the dual degree will earn an MBA with a specialization in supply chain management and an MSSCM degree.

A maximum gap of one quarter is allowed between the completion of one degree program and the start of the other program.

Learning Outcomes for the MSSCM

Learning Outcomes

- Goal 1: Technical Knowledge: Graduates will be proficient in advanced knowledge of supply chain management and methodologies for optimization, transportation, inventory, purchasing management, supply chain analytics, and risk analysis. This comprehensive skill set will enable them to become effective leaders capable of optimizing operations and making informed decisions in a dynamic business environment.
- Goal 2: Critical Decision Making: Graduates will become adept at assessing risks, identifying opportunities for improvement, and devising innovative strategies to enhance supply chain efficiency and overall performance. Equipped with strong critical thinking skills, graduates will be well-prepared to tackle the complexities and uncertainties inherent in supply chain operations, contributing to the success and competitiveness of the organizations they serve.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally and in writing.

Supply Chain Management (MSSCM)

The STEM-designated Master of Science in Supply Chain Management focuses on real world challenges related to moving goods globally – on time and on budget. This program will enable you to understand the issues and solve the complex challenges.

Curriculum

The Master of Science in Supply Chain Management's 12-course curriculum[1] prepares you to be a responsible leader in the supply chain field. Students may be required to take ISSCM 491 in addition to the courses below, depending on their academic background.[2]

Code	Title	Hours
Required Courses		
INFS 443	Business Analytics	3
ISSCM 495	Forecasting Methods	3
SCMG 480	Intro to Operations Management [3]	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
SCMG 489	Supply Chain Analytics	3
Ethics Requirement		
Select one of the following:		3
MGMT 441N	Business Ethics	
MGMT 446	International Business Ethics	
INFS 795	Ethics and Data Analytics [4]	
Electives		
Select three (or four, if SCMG 480 is substituted)		9
FINC 620	Financial Mathematics and Modeling I	
INFS 492	Database Systems	
INFS 493	Strategic Use of Database Analytics	
INFS 494	Data Mining	
INFS 592	Data Visualization	
INFS 791	Programming for Business Decision Making	
INFS 795	Ethics and Data Analytics [4]	
INFS 796	Data Warehousing	
INFS 797	Applications of Visualization	
ISSCM 484N	Project Management	
ISSCM 595N	Decision Analysis	
MGMT 573	Business Strategy	
or MGMT 574	Corporate Strategy	
SCMG 481	Performance Improvement in Business Processes	
SCMG 482	Lean Production Concepts and Practices	
SCMG 483	Management of Service Operations	
Capstone Course		

SCMG 589	Supply Chain Management Consulting [5]	3
Total Hours		**36**

1. Program requirements are subject to change based on course/instructor availability.
2. The prerequisite requirement is met if you have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the prerequisite subject area within the last seven years with a grade of B (or equivalent) or higher if the course is determined appropriate by their academic advisor.
3. This course can be substituted with a program elective by the approval of the academic director and depending on the academic background. Typically, you need to have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the subject area within the last five years with a grade of B (or equivalent) or higher if the course is determined appropriate by their academic advisor.
4. INFS 795 may be taken to fulfill the Ethics requirement **OR** the Electives requirement, not both.
5. All required courses must be completed prior to or concurrently with SCMG 589.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Term 1		
SCMG 480	Intro to Operations Management	3
Ethics course		3
	Hours	**6**
Term 2		
INFS 443	Business Analytics	3
Select one from Electives		3
	Hours	**6**
Term 3		
SCMG 487	Purchasing Management	3
SCMG 589	Supply Chain Management Consulting	3
	Hours	**6**
Term 4		
SCMG 486	Global Logistics	3
Select one from Electives		3
	Hours	**6**
Term 5		
ISSCM 495	Forecasting Methods	3
SCMG 489	Supply Chain Analytics	3
	Hours	**6**
Term 6		
SCMG 488	Inventory Management	3
Select one from Electives		3
	Hours	**6**
	Total Hours	**36**

Learning Outcomes

- Goal 1: Technical Knowledge: Graduates will be proficient in advanced knowledge of supply chain management and methodologies for optimization, transportation, inventory, purchasing management, supply chain analytics, and risk analysis. This comprehensive skill set will enable them to become effective leaders capable of optimizing operations and making informed decisions in a dynamic business environment.
- Goal 2: Critical Decision Making: Graduates will become adept at assessing risks, identifying opportunities for improvement, and devising innovative strategies to enhance supply chain efficiency and overall performance. Equipped with strong critical thinking skills, graduates will be well-prepared to tackle the complexities and uncertainties inherent in supply chain operations, contributing to the success and competitiveness of the organizations they serve.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally and in writing.

School of Communication

Located in one of the world's top communication centers, **Loyola University Chicago** provides an ideal setting for integrating study with practical application in the expanding fields of advertising, advocacy, digital media, film, multimedia journalism, public relations, and other areas of communication.

Students benefit from a distinguished scholarly faculty of experienced communication professionals in journalism, media studies, documentary film production, cultural communication and public advocacy.

Loyola's School of Communication offers state-of-the-art on-site production facilities, labs, and equipment, as well as proximity to Chicago's vast production community. Loyola is home to WLUW, a 24-hour FM radio station, *The Phoenix*, an award-winning student newspaper, and an extensive internship program.

The study of communication is one of the primary means for promoting the traditional goals of liberal education: understanding political rhetoric and social justice, participating in media advocacy and developing an ethical sensitivity so necessary in our time. Students at Loyola's School of Communication learn not just how to get a message out, but how to think critically and communicate ethically.

Graduate Programs

- Digital Media and Storytelling (MComm) (p. 1693)
- Global Strategic Communication (MS) (p. 1694)

School of Communication Policies

Graduate Student Academic Probation

Any graduate student whose cumulative GPA falls below 3.00 will be placed on probation. Students may also be placed on probation for not making progress toward degree completion. Any student whose cumulative GPA is 3.00 or better but who fails to show timely progression toward completion of his/her degree requirements may, at the discretion of his/her dean, be placed on probation. In such cases, the dean may require a contract defining the terms under which the student can remove him/herself from probation.

Any graduate student who achieves a term GPA of at least 3.33 during the probationary semester, while not yet achieving a cumulative GPA of 3.00, will be continued on probation.

Any graduate student who fails to achieve a term GPA of at least 3.33 for the probationary semester (unless he/she restores his/her cumulative GPA to a minimum of 3.00 at the end of that semester) will be dismissed for poor scholarship.

Residency Requirement (Required Hours in Residence)

In-residence hours refers to the course credit hours taken at Loyola University, the Rome Center, the Vietnam Center, or taken from any of the Loyola-sponsored study abroad programs through the Office for International Programs.

Graduate students are not allowed to take any of their program courses elsewhere.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

COMM 400 Designing for Digital Environments (3 Credit Hours)
Students will learn about the design and usability of websites from several perspectives: how they look, how they work, and how they are made. Students must be enrolled in the graduate program for MC in Digital Storytelling.
Outcomes:
Students will how stories are told through new media, understand how to analyze and critique them and create digital artifacts that demonstrate their role as effective and ethical producers and users of new media

COMM 401 Foundations of Global Strategic Communication (3 Credit Hours)
This course delves into two areas impacting communicators' success in the global arena: new media and culture. Through a blend of class discussions, interactive activities and guest speakers, students will study frameworks for strategic communication in a global environment and then apply these lessons in group and individual projects. Enrollment limited to students in GSCM-MS Program. Students are expected to understand fundamental concepts in strategic communication, be able to identify and explain the role of strategic communication in the global business context, understand the importance of dialogue and engagement, and have the ability to construct effective messages.

COMM 402 Organizational Leadership and Change Management (3 Credit Hours)
Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders. Enrollment limited to students in GSCM-MS Program. Students are expected to gain knowledge and leadership skills needed to help organizations chart a successful course through change. They are also expected to understand the major drivers of organizational change; the role leadership plays in anticipating, planning and navigating organizational change.

COMM 403 Strategic Communication Research Methods (3 Credit Hours)
This course is designed to provide students with a critical framework for evaluating communication research and first-hand experience in the research process. Specifically, we will examine how research questions, originating from client-specific interests, are translated into a research project. Enrollment limited to students in the GSCM-MS Program. Students are expected to know how to read and evaluate a research study, select appropriate research questions, develop measurements, draw a sample, collect and analyze data and interpret the results.

COMM 405 Story Development and Production (3 Credit Hours)
This course will give students a basic understanding of narrative theory and its evolution. It will also emphasize the idea that telling a good story begins with having something to say and a purpose for telling it to someone. Students must be enrolled in SOC Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will read, write and practice narrative techniques on electronic modes of communication while learning about narrative structure, content and form of delivery

COMM 406 Environmental Advocacy (3 Credit Hours)
Pre-requisites: COMM 100 and sophomore standing; Digital Media & Storytelling (DMST* Masters students and any students majoring in SES may also enroll
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Course equivalencies: XCOMM306/ESP 329/PAX 329
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the U.S. environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 410 Media Law for Inclusive Digital Storytelling (3 Credit Hours)
This course addresses how courts and lawmakers have addressed legal issues presented by digital media. Students must be enrolled in Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will learn some of the ways that blogger's rights, intellectual property, libel, privacy and threats pose challenges to internet legal regulations and social ethics

COMM 411 Strategic Communication Ethics and Law (3 Credit Hours)
This course explores various approaches to ethical decision-making and applies them to diverse aspects of strategic communication in professional settings. Students will learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various business situations, and clearly explain their analyses. Enrollment is limited to students in the GSCM-MS Program. Students will have learned fundamental ethical principles and decision-making processes, examined some of the most pressing ethical issues facing strategic communicators and applied course material to specific strategic communication decisions.

COMM 412 Communication Content Mining and Analytics (3 Credit Hours)
This course is for students interested in learning practical data analysis/data mining techniques in strategic communication. A useful takeaway from the course will be the ability to perform powerful data analysis using popular statistic packages (e.g., R, SPSS, Excel) and web analytics (e.g., Google Analytics). Enrollment limited to students in the GSCM-MS Program. Students are expected to increase their critical thinking ability to assess the quality of consumer information and the limitations of online data. They will become familiar with frequently used data analysis tools.

COMM 413 Writing for Strategic Communication (3 Credit Hours)
This advanced writing intensive course engages students in the strategic process of professional-level writing by focusing on communication objectives, cultural differences among audiences, techniques, style and mechanics. Students will learn the importance of planning, research, pre-writing, editing and rewriting in the writing process. Restricted to Global Strategic Communication Students
Outcomes:
The course also provides practical, real world writing experience in diverse formats for a wide range of audiences, including memos, proposals, creative briefs, executive speeches, op-eds, fact sheets, news releases, blogs and other social media

COMM 415 Data-Powered Digital Storytelling (3 Credit Hours)
This course focuses on how and where to discover compelling story ideas utilizing investigative methods to cultivate original points of view for digital presentations.
Outcomes:
Students learn to use records and data mining techniques to analyze information and cultivate stories to be told in digital formats

COMM 416 Special Topics in Digital Media & Storytelling (3 Credit Hours)
Pre-requisites: Restricted to MC-DMST students only
Students will build on the basics of telling a non-fiction, longform story: topic selection, story structure and character development.
Outcomes:
Students will develop independent work habits and become more confident as a content creator and storyteller

COMM 417 Media Planning (3 Credit Hours)
This course examines the advertising and marketing processes required to research, develop and implement an effective media plan for budgeting appropriate advertising time and space. Only BASD-ADPR and MS-GSCM students may enroll.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies and tactics to construct an advertising media plan

COMM 420 Digital Production: Storytelling with Impact (3 Credit Hours)
This lab-based course will introduce students to production techniques for digital storytelling. Students will acquire knowledge of videography, sound recording, video and audio editing, web design and interactivity.
Outcomes:
Students will find compelling stories, set scenes and use narrative techniques to craft influential stories designed for professional purposes in advertising, journalism or documentary production

COMM 421 Topics in Global Strategic Communication (3 Credit Hours)
This course will offer in-depth reading, case studies, and discussion in specialized areas dealing with current issues in global strategic communication. Enrollment limited to students in the GSCM-MS Program. Students will develop in-depth knowledge of a current issue or opportunity in global strategic communication, become acquainted with how and where local strategic communicators work, and examine the differences and similarities in how strategic communication is defined and practiced in different countries.

COMM 422 Global and Multicultural Audiences and Stakeholders (3 Credit Hours)
In this course students will investigate various audiences in today's global marketplace that organizations need to consider to remain relevant. The course will explore the concept of globalization and how, as a dynamic and uneven process, it requires practitioners to understand global and local audiences and those influenced by multiple cultures. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
The goals of the course are to learn to be sensitive to a variety of cultures; recognize particular values, needs, and behaviors; and craft messages that connect and engage

COMM 425 Digital Marketing and Analytics (3 Credit Hours)
This course will explore online audience behavior and measurement. Students will use analytics to understand user activities and to drive improvements in distribution performance. In the course of their development, students will come to understand intellectual property protection, self-publication, bandwidth issues, usability, file formats, social sharing, security, syndication and mobile delivery.
Outcomes:
The overall objective of this course is for students to understand digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content

COMM 429 Advertising and Public Relations Design (3 Credit Hours)
This course is for students who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio. Restricted to GSCM-MS students.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 430 2D Design for Print and the Web (3 Credit Hours)
This course will focus on visual theory, graphic design, photo editing, and web design. Restricted to Masters students enrolled in the Digital Media & Storytelling Masters program.

COMM 431 Campaign Development (3 Credit Hours)
To achieve maximum effectiveness, communication programs must be strategic. This course explores the four pillars of campaign development - research, planning, implementation and evaluation. Course material is amplified through study of strategic communication cases as well as development of a model client campaign. Enrollment restricted to students in the GSCM-MS Program. At the end of the course, students are expected to understand appropriate research methodologies for campaign use; be familiar with planning and implementation variables including budget, tactics and timelines; and be able to measure campaign results and link them to business goals.

COMM 432 Nonprofit Communication (3 Credit Hours)
This course examines the principles and best practices of strategic communication for nonprofit organizations. Increasingly, leaders of forward-looking nonprofits are realizing what their counterparts in the corporate world have long known: that strategic communication is critical to furthering their mission and goals. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
Students will learn and apply strategies that nonprofit organizations can use to effectively tell their story, implement a robust social media presence, identify potential partnerships and alliances with corporations and government agencies, strengthen fundraising efforts and prepare for possible crises

COMM 433 Corporate Communication (3 Credit Hours)
Pre-requisites: For GSCM-MS students, COMM 401; DMST-MC students may also enroll without pre-requisite
This course develops a multiple stakeholder approach to managing the communication function in corporations. Management topics include developing a communication plan, budgeting, creating a communications calendar, working with agencies and other external resources, project management and evaluation.
Outcomes:
At the end of the course, students are expected to understand how the communication function is organized in corporations and non-governmental organizations (NGOs)

COMM 434 Business-to-Business Communication (3 Credit Hours)
The robust business-to-business (B2B) sector provides enormous opportunity in the global marketplace. This course will explore B2B's unique set of challenges that strategic communicators need to consider in developing and delivering effective messages. Restricted to Global Strategic Communication Students.
Outcomes:
Students are expected to gain a working knowledge of the theories, concepts, and issues of in B2B communication

COMM 435 Public Affairs and Issues Management (3 Credit Hours)
The course explores how to predict and identify emerging issues, which can proliferate rapidly through digital and social media; accurately assess the potential threat posed by issues; and plan and implement effective response to prevent issues from growing into crises. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students will understand the role of the public affairs function in organizations, know how to monitor for and identify emerging issues and to build a firewall to make organizations less vulnerable to attack

COMM 436 Crisis and Risk Communication (3 Credit Hours)
This course explores both the practical and theoretical aspects of crisis communication through case studies, guest presentations and hands-on class exercises. It also examines real world organizational crises and how and why communication helped or harmed the situation. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students are expected to understand the key elements of crisis communication and have the basic skills, tools, and confidence needed to help manage an organizational crisis

COMM 437 Advertising/PR Multimedia Commercial Production (3 Credit Hours)
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll. Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts.
Course equivalencies: COMM 337/COMM 437

COMM 439 Video Documentary (3 Credit Hours)
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods. Restricted to students in the DMST-MS program.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 441 Global Strategic Communication Capstone (3 Credit Hours)
Students will synthesize & apply knowledge and skills from previous courses to demonstrate competence in a specialized area of strategic communication of greatest interest to them. Students will submit a comprehensive work, research project, media artifact, business plan, or any other comparable work approved by the instructor. In addition, students will develop fully annotated & professional quality final presentation. Enrollment is restricted to students in the GSCM-MS Program. Students are expected to become more knowledgeable in an area of specialization by exploring a specific type of strategic communication, engaging in research, building relationships with professionals and developing creative applications to demonstrate professional-level knowledge, understanding of practices, skills & competencies.

COMM 444 Social Media Advertising (3 Credit Hours)
This course covers the latest theories and practices of social media advertising. Students will be exposed to 1) evolving concepts and theories related to social media advertising, 2) case studies that discuss the strategies of social media campaigns, and 3) hands-on practices of digital technologies to implement social media campaigns. Only students in the BASD-ADPR and MS-GSCM programs can enroll.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Knowledge of theories relating to social media advertising, ability to create strategic plans on social media, skills for digital technologies in social media advertising campaigns, and understanding social media advertising ethics

COMM 450 Capstone II (3 Credit Hours)
Pre-requisites: COMM 400, 405, 410, 415, 420, 425, and 430
This course involves integration of new media tools and storytelling, culminating in a professional project that is conveyed to public audiences and widely distributed.

COMM 455 Animation (3 Credit Hours)
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works. Only DMST-MC students may enroll. All pre-requisites are waived.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 458 Newscasting and Producing (3 Credit Hours)
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 358/COMM 458

COMM 459 Advanced Post Production (3 Credit Hours)
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms. Restricted to students in the DMST-MC program.
Course equivalencies: X-COMM359/459/IFMS359
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 461 Health Communication (3 Credit Hours)
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work. Only MS-GSCM and ADPR BASD students may enroll.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 463 Intermediate Advertising Design (3 Credit Hours)
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print and for client presentations. Only students in the BASD-ADPR , MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 464 Mobile Advertising (3 Credit Hours)
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 470 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major. Restricted to students in the ADPR-BASD and GSCM-MS programs.
Course equivalencies: COMM 370/COMM 470

COMM 473 Digital Storytelling Abroad (3 Credit Hours)
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 373/COMM 473

COMM 479 Digital Sustainability (3 Credit Hours)
Pre-requisites: DMST and SES grad students can enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 491 Advertising/Public Relations Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the ADPR-BASD and GSCM-MS programs. Students must attend an internship orientation and submit application packet to instructor. If approved, student is enrolled in course.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 492 Multimedia Journalism Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the DMST-MC program.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 494 Film & Digital Media Internship (3 Credit Hours)
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 498 Directed Study for Graduate Students (1-3 Credit Hours)
Students may sign up for a one to three credit hour course to work independently in the student's area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials, a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication. Restricted to students in the DMST-MC, ADPR-BASD, and GSCM-MS programs.

COMM 700 Certificate: Digital Media Ethics (0 Credit Hours)
Loyola's Center for Digital Ethics and Policy certificate course explores codes of ethics and ethical decision making, legal limits of online speech, strategies to spot and deal with fake content, intellectual property and user generated content, understanding privacy concerns, ethical issues with big data, the ethics of deception online, among other topics.
Outcomes:
Participants will be able to understand ethical issues that are most likely to come up in their particular professional contexts and be able to take this knowledge back to their organization to help guide policy and procedure

COMM 701 Organizational Leadership and Change Management (0 Credit Hours)
Loyola's School of Communication offers a new certificate course custom-tailored for managers who want to accelerate the pace of successful change in their organizations. This course combines online learning with a focused 3-day program at Loyola, plus personalized coaching afterward. Participants will be able to shape their learning around their organization's needs.
Outcomes:
This course will help managers who want to accelerate the pace of successful change in their organizations, leading change on the front lines and managers whose supervisors have identified them as emerging leaders

Digital Media and Storytelling (MComm)

Create a Personal and Rewarding Experience.

Loyola University's Master of Digital Media and Storytelling program is for makers. Makers of all forms of digital content who desire the tools to turn their ideas into compelling, marketable stories they can share with the world. The two-year program prepares professionals for a career in digital media by teaching them the most important skills hiring managers need: How to write, shoot and edit powerful digital content.

One of the greatest strengths of our program is that students can shape their own experience. Prospective candidates should demonstrate an interest in digital media and/or storytelling in relation to:

- Journalism
- Advertising
- Public relations
- Documentary filmmaking

Digital Media and Storytelling Program Highlights

- Real-world curriculum equips students from diverse backgrounds with a broader, more in-depth skill set so that they can become productive members of communications teams in a variety of organizations.
- Create a digital portfolio in the heart of Chicago—Courses take place at Loyola's Water Tower Campus in Chicago, a world-class city that is recognized as a leading communications and business district.
- A capstone course that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public.

- Students can work with faculty to help determine the right career for them or how to become more marketable in their current area of employment.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 400	Designing for Digital Environments	3
COMM 405	Story Development and Production	3
COMM 420	Digital Production: Storytelling with Impact	3
	Hours	**9**
Spring		
COMM 425	Digital Marketing and Analytics	3
COMM 430	2D Design for Print and the Web	3
One course from List of Electives for DMST (p. 1694)		3
	Hours	**9**
Second Year		
Fall		
COMM 410	Media Law for Inclusive Digital Storytelling	3
COMM 415	Data-Powered Digital Storytelling	3
One course from List of Electives for DMST (p. 1694)		3
	Hours	**9**
Spring		
COMM 450	Capstone II	3
Two courses from List of Electives for DMST (p. 1694)		6
	Hours	**9**
	Total Hours	**36**

When Do Classes Meet?

Each course numbered COMM 400 Designing for Digital Environments or above is held one night per week. Most courses meet between 7:00pm - 9:30pm.

Full-time students take three courses per semester.

Part-time students take two courses per semester.

Learning Outcomes

Students who complete the graduate program in Digital Media and Storytelling will:

- Learn how to use state-of-the-art equipment in our Convergence Studio and technology labs.
- Learn audience engagement and analytics to understand user activities and to drive improvements in distribution performance. Students will learn digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content.
- Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public.

Global Strategic Communication (MS)

Whether you're a recent graduate looking to jumpstart your communication career, a communicator who wants to build or advance their career on the global stage or a mid-career professional seeking expanded skills and digital fluency to move into communication management, the M.S. in Global Strategic Communication may be the perfect graduate program for you.

It's a professionally-focused, interdisciplinary, non-thesis program designed to prepare graduates for successful careers in public relations, advertising, digital and social media, corporate communication, content marketing and related fields. It accommodates busy working

professionals with evening courses, online electives and full- and part-time options.

Curriculum

Degree Requirements

The program requires satisfactory completion of 36 credit hours (12 courses): eight required courses, including a capstone experience (24 credit hours); and four electives (12 credit hours). No thesis is required.

All required courses during fall and spring semesters are taught once a week from 7-9:30 p.m. at Loyola's Water Tower campus. In addition, one elective is offered online each summer.

A minimum cumulative GPA of 3.0 is required to remain in good standing in the program and to be eligible for graduation.

Code	Title	Hours
COMM 401	Foundations of Global Strategic Communication	3
COMM 402	Organizational Leadership and Change Management	3
COMM 403	Strategic Communication Research Methods	3
COMM 411	Strategic Communication Ethics and Law	3
COMM 413	Writing for Strategic Communication	3
COMM 421	Topics in Global Strategic Communication	3
COMM 431	Campaign Development	3
COMM 441	Global Strategic Communication Capstone	3
Four (4) Electives from List of Electives for GSC (p. 1695)		12
Total Hours		**36**

Length of Program

Full- and part-time options are available. Full-time students take three courses in fall and spring semesters and typically complete the program in two years. Part-time students take two courses in fall and spring semesters and have up to three years to complete the program. And the program is flexible – it's possible to switch between full- and part-time study.

Full-time students take three courses per semester. Part-time students take two courses per semester.

Curriculum

The curriculum is designed to help recent graduates successfully launch careers in communication and to enable professional communicators to take their careers to the next level. Courses emphasize acquiring expert knowledge and up#to-date digital and analytical tools, developing a global perspective and honing skills – such as critical thinking, creativity, problem solving, writing, business literacy, leadership and entrepreneurship – needed for a competitive edge.

The program's touchstones include an emphasis on strategic planning, consideration of multiple stakeholders, cultural relevance and sensitivity, social justice, effective use of digital channels and ethical decision making. Courses teach a combination of practical skills and "big-picture" knowledge intended to help students develop into skilled strategists, capable organizational leaders and ethical communicators.

In addition, multicultural and multinational examples, cases and perspectives are integrated throughout the curriculum to help students build or enhance a global perspective. The program also offers opportunities for study and immersion in China and London.

These are some of the topics examined in the program:

- As our economy further globalizes, how do we understand new stakeholders and create culturally sensitive and relevant messages and campaigns to engage them?
- Many corporations are embracing "profit with purpose" and building alliances with nonprofits, as well as optimizing their operations for their communities, employees and suppliers. Strategic communication campaigns tell these compelling stories.
- The Internet knows no boundaries: YouTube has become the globe's jukebox, and people around the world participate in revolutions via SMS text and Twitter. The Internet has created a new category of earned media – one that presents new opportunities but must be negotiated carefully because everyone is potentially an influencer.
- Digital messages can be measured with unparalleled precision. We can now use big data and other unobtrusive tools to find insights, and use web and social analytics to precisely measure the success of our communication programs.

Courses are taught by seasoned teachers and communication professionals who are digitally fluent and savvy in both media and business. Classes are small, personal and hands-on, include the Convergence Studio, state-of-the-art computer labs and exceptional infrastructure for learning and demonstrating digital communication skills.

Classes frequently partner with local nonprofits as pro bono clients, and students will have ample opportunities to do meaningful real-world projects. Whether it's developing a social media strategy or crafting an entire communication campaign, this work enriches student portfolios and enables students to shape and effectively express their personal brand.

Learning Outcomes

Students who complete the graduate program in Global Strategic Communication will:

- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media.
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Demonstrate the competencies to work as a professional in advertising or public relations.

School of Continuing and Professional Studies

The School of Continuing & Professional Studies (SCPS) at Loyola offers a suite of application-oriented graduate and post-baccalaureate programs that address emerging needs in the labor market. Our flexible and online programs are developed in partnership with industry experts for working adult learners who seek relevant workplace skills and knowledge.

Returning Rambler Scholarship

The Returning Rambler Scholarship covers 25% of a student's tuition rate for eligible students. Interested students should read more about the eligibility requirements and application process here: https://www.luc.edu/gpem/returningrambler/ (https://www.luc.edu/gpem/admission/returningrambler/).

Graduate Programs

- Foundations of Instructional Design Certificate (p. 1701)
- Information Technology Leadership and Strategy (MPS) (p. 1701)
- Instructional Design (MPS) (p. 1703)
- Professional Certificate in Instructional Design (p. 1707)
- Public Affairs and Management Certificate (p. 1708)
- Public Policy (MPP) (p. 1708)
- Public Policy/Law (MPP/JD) (p. 1709)
- Public Service Leadership (MA) (p. 1711)
- Urban Affairs (MA) (p. 1712)

Post-Baccalaureate Programs

- Paralegal Studies - Corporate Practice Certificate (p. 1703)
- Paralegal Studies - Customized Certificate (p. 1704)
- Paralegal Studies - Litigation and Corporate Practice Certificate (p. 1705)
- Paralegal Studies - Litigation Practice Certificate (p. 1706)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Instructional Design (INDN)

INDN 420 Instructional Design Theories and Models (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings.
Outcomes:
Differentiate/compare/contrast among learning theories, ID theories and ID models; Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories; Identify/describe motivational theories; Select/apply principles in practical learning situations

INDN 421 Design & Development of Instructional Materials (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course builds upon instructional design theories and best practices introduced in the Principles of Instructional Design course. It provides an overview of a variety of instructional tools and technologies and allows students to implement design principles in the development of instructional materials.
Outcomes:
Recall/describe/apply learning theories and methodologies to design/develop instructional materials; Recognize/describe/apply visual literacy strategies and accessibility standards to create instructional materials; Design/develop/implement instructional materials using multiple media

INDN 430 Performance Improvement in Organizations (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, learners will identify a problem/cause/solution to a performance problem within an organization using the Human Performance Improvement model. Learners will select a learning intervention and create an evaluation plan to assess its effectiveness. Learners will compare/contrast the instructional design process within a variety of organizations.
Outcomes:
Compare/contrast ID teams in organizations; Analyze data to identify performance gaps/causes; Select a performance intervention based on needs analysis; Compose an evaluation plan; Identify Change Management strategies for implementation

INDN 431 Fundamentals of Learning Analytics (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis.
Outcomes:
Explain learning analytics theory; identify recent trends; Use reporting tools to compile/isolate/summarize data; Differentiate between learning models; Align data models to assessments; Conduct predictive data analysis; Discuss ethics considerations

INDN 440 Applications of Human Centered Design Principles (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
Human-centered design places humans and their needs at the center of the design, compels us to take a holistic/thoughtful approach to our designs. This course uses these principles to examine the design process to create learning experiences that are inclusive and responsive. Learners will also craft their own design philosophy.
Outcomes:
Describe principles of human-centered design; Create a space for learning that incorporates principles of human-centered design; Critique the application and use of these principles; Formulate your own philosophy of design

INDN 490 Instructional Design Capstone (3 Credit Hours)
Pre-requisites: CIEP 470 Principles of Instructional Design, last semester of the program, program director approval; Corequisite: 8W1 remaining course requirements must be completed
Students will apply program outcomes to real-world settings in preparation for an ID career. The course combines research and service learning towards the creation of a project, portfolio and professional artifact. Students will partner with a SME to build a module tailored to their course or institution.
Outcomes:
Conduct a needs assessment, compose learning goals/outcomes, and create an evaluation plan by partnering with a subject matter expert; Create a training module incorporating SME content; Develop a professional portfolio

Master of Public Policy (MPP)

MPP 400 Policy Design and Analysis (3 Credit Hours)
Students will learn to analyze issues to determine if there is a role for government intervention, to evaluate public policy options that could address the identified problem, and to design programs that would target the specific issues. The role of political factors in affecting these decisions is also covered.

MPP 401 Analytical Tools in Public Policy (3 Credit Hours)
This class covers diverse modeling tools in public policy, drawing from fields such as economics, geography, demography, spatial analysis, risk analysis. decision theory. The emphasis is on applied analysis to address current public policy issues.

MPP 402 Cost Benefit Analysis (3 Credit Hours)
The course cover the basics of the CBA technique with applications in several policy areas. CBA is grounded in the policy evaluation framework, including discussion of ethical issues and the use of CBA information in policy and program decisions.
Outcomes:
Ability to conduct CBA analysis, understand its use in the policy process, including ethical issues

MPP 403 Public Budget and Finance (3 Credit Hours)
This course provides students with practical knowledge about the budget process and the tools to construct and analyze a public budget. General theories of public finance and the role of the budget as a political document are covered. Assignments will provide practice in the budgeting approaches covered in the readings.

MPP 404 Public Policy Process (3 Credit Hours)
This class provides an introduction to the major theories of the public policy process. We consider issues of problem definition, social construction, agenda setting, the role of government institutions and interest groups in determining policy outcomes.
Outcomes:
Students will understand how political considerations, institutions, and rules of government affect public policy outcomes

MPP 405 Statistical Methods & Analysis for Public Policy I (3 Credit Hours)
This course is an introduction to statistical modeling, and hypothesis testing for applied problems in urban affairs and public policy. This class will provide the foundation for thinking about casual relationships, determining differences among groups, and what might account for those differences.
Outcomes:
Students will learn to conduct basis statistical analysis and write literate data analysis reports

MPP 406 Statistical Methods & Analysis Public Policy II (3 Credit Hours)
Pre-requisites: MPP 405
This class develops the multiple linear regression model and extensions of it that are commonly used in the study of public policy. We investigate the relationships between the type of data available and the quantitative models to use, including logistic analysis and use of simultaneous equations.
Outcomes:
Students will learn to use the tools necessary to understand, critique, and conduct advanced statistics

MPP 407 Local Economic Development (3 Credit Hours)
Students will learn the current theories of local economic development, including the role of infrastructure, access to markets, workforce quality (human capital), technology development, the role of universities, and the value of networks among business actors. Students will use these theories to create a metropolitan benchmarking report and strategic plan.

MPP 408 Political Feasibility Analysis (3 Credit Hours)
Pre-requisites: Graduate Students Only
Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered.
Outcomes:
Ability to craft and implement a comprehensive political strategy to change public policy outcomes; Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies

MPP 409 Education Policy and Politics (3 Credit Hours)
Pre-requisites: Graduate Students Only
This seminar focuses on K-12 policy in the U.S. using a policy analysis framework. We evaluate alternative policy proposals related to different theories of equality and school quality. We examine market-driven, standards-based, human capital, fiscal, and community-based models of reform. The course concludes by examining the political context for reform.
Outcomes:
Develop analytical ability to identify the contemporary problems with education, what causes them, and what policy reforms could be used to address those problems

MPP 410 Special Topics in Public Policy (3 Credit Hours)
This seminar course will cover specialized topics in public policy in greater detail.
Outcomes:
Students will learn about current issues related to the topic, relevant theoretical approaches, and application of theories to the specific issue in order to develop policy solutions

MPP 411 Environmental Governance (3 Credit Hours)
Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

MPP 412 Urban Politics and Policy (3 Credit Hours)
The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.
Outcomes:
Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities

MPP 413 Intergovernmental Relations (3 Credit Hours)
This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not. Department consent required.
Outcomes:
Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments

MPP 414 Affordable Housing Finance and Policy (3 Credit Hours)
This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing. Department Consent Required.
Outcomes:
Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies

MPP 461 Education Law & Policy (3 Credit Hours)
This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law - such as school finance, governance, the balance between federal and state roles in curriculum. Department consent required for enrollment.
Course equivalencies: MPP 461/LAW 461
Outcomes:
Students will be able to: understand fundamental legal doctrines governing US education law, research legal and political issues in education policy; analyze education problems and develop policy options

MPP 499 Directed Readings (3 Credit Hours)
An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

MPP 500 Public Policy Evaluation (3 Credit Hours)
Pre-requisites: PLSC 476 or SOCL 414
This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research - including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

MPP 501 Public Policy Internship (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers. Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

MPP 502 Professional Development Skills (1 Credit Hour)
Requirement for MPP graduate students. The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

MPP 503 Public Policy Practicum (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests.
Outcomes:
Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment

MPP 606 Childlaw Legislation and Policy Clinic (3 Credit Hours)
Permission of instructor is required prior to registration. Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.
Outcomes:
Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally

Public Service Leadership (PSLD)

PSLD 400 Introduction to Public Service (3 Credit Hours)
Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making, and leadership; stresses critical thinking skills. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of ethics, values, and skills for organizational leadership in human service and public service agencies; Knowledge of theory, organizational functions and structures, leadership styles, and value-driven leadership

PSLD 401 Ethical Leadership in Public Service (3 Credit Hours)
Provides students with the framework for personal and professional ethical decision making applied in the context of diverse workplaces and international organizations. Through lectures, case studies in applied ethics, and specific assignments, students clarify their personal-professional values, assess their moral intelligence, and develop their ethical leadership integrity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of ethics, values, and applied ethics for organizational leadership in human services and public service agencies; Development of ethical and value-driven leadership skills

PSLD 402 Foundations of Global Strategic Communication (3 Credit Hours)
Globalization challenges almost every aspect of communication from creating and delivering messages to spreading ideas that cross language, time, and cultural barriers. The course focuses on using strategies communication planning and management to guide communication activities in organizations. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of critical communication skills and values; Understand the interplay between communication, technology, and culture

PSLD 403 Program Management and Development (3 Credit Hours)
There is an increasing demand for public service workers who can work with diverse communities through program management and development using strengths and empowerment perspectives and social and economic justice principles. This course builds on the ecological systems perspective that views program development as an arena for social change. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge and skills needed for planning new or adapting existing programs within the context of diverse communities; Develop skill set for program development and quality improvement

PSLD 404 Data, Visualization and Evaluation (3 Credit Hours)
Using Microsoft Excel, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Hands-on knowledge and experience managing and analyzing data sets; Best practices for presenting data to diverse stakeholders

PSLD 405 Design Thinking in Mitigating Complex Social Problems (3 Credit Hours)
Design thinking is a way of working with user-centered innovation to address problems where not all knowledge is available at the outset, i.e. the problem itself is unknown (wicked problems). Design thinking rests on principles such as user involvement, problem framing, experimentation, visualization, and diversity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Develop critical skills for management and innovation; Develop creative potential of individuals and enable them to deal with wicked problems

PSLD 420 Disaster Operations and Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership(PSLD-MA); DMEP-PSLD Sub-Plan
Introduction to emergency management theories and practices that are critical in the emergency management profession. Covers the phases of emergency management, human and political aspects, the importance of effective resource management, environmental concerns, and the threats and hazard identification and risk assessment process that is important to emergency management organizations. Introduces participants to issues related to managing personnel, including volunteers, workforce diversity, decision-making, leadership, and stresses critical thinking skills.
Outcomes:
Knowledge of theory, organizational functions and structures, phases of emergency management, resource management, ethics, politics, and threats and hazards; Develops ability to solve complex problems and engaged with a wide variety of organizations that support emergency management

PSLD 421 Emergency Planning and Implementation (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan
Incomplete data, mission information, or rapidly changing scenarios requires a pragmatic approach to reach an optimal solution. This course will introduce students to a decision-making process usable in any scenario. Students will learn to identify, gather, analyze, and process available information for use in a set, yet flexible process to identify and reduce risk, protect people and property, and maintain optimal business operations.
Outcomes:
Identify how to gather useful information to reach the best outcomes possible; Learn to identify risk and the methods to address situations with incomplete information; Develop an Intelligence Cycle, regardless of the situation, to address and mitigate current and future risk

PSLD 422 Disasters and Vulnerable Populations (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan
Disasters create lasting impacts for communities large and small. This course introduces students to emergency management concepts that ensure the needs are being met for citizens with access and functional needs, those living in areas with high social vulnerability, and other vulnerable populations throughout the community. Teaches students to include vulnerable populations in all phases of emergency management and provides students with the opportunity to learn critical communication and problem-solving skills.
Outcomes:
Understand the make-up of the community being served, ensure plans, processes, and disaster response includes vulnerable populations within the community; Knowledge of tools and resources available to assist in preparedness activities to ensure they involve the community in its entirety

PSLD 423 Integrated Social-Medical Issues in Emergency Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); DMEP-PSLD Sub-Plan
This course builds on existing leadership and public service knowledge with the application of emergency management principles under the shared perspectives of social-medical outlooks. It analyzes current trends and issues within emergency management through a social-medical paradigm and their impact on the public service models and leadership outcomes, including leadership challenges, ineffective communication and processes, and emergency response software, and their impact on medical and social infrastructure,
Outcomes:
Identify social and medical issues in EM practices; Apply the concepts of EM within a social-medical context; Describe EM social and medical organizations and structures and their relation to public service; Apply concepts of leadership to public service, EM, and other sectors

PSLD 430 Understanding and Mitigating Poverty (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan
This course examines the nature, extent, and causes of poverty and inequality in the US while relying on literature from sociology, political science, economics, psychology and other disciplines. It analyzes the anti-poverty initiatives and policies launched over the past five decades and examines the role of culture, discrimination and classism as well as policy issues.
Outcomes:
Understand key issues regarding causes and consequences of poverty; Describe approaches to understanding and providing solutions to poverty; Explore the dynamics of commitment to social change and anti-poverty initiatives through grantmaking

PSLD 431 Foundations of Social and Sustainable Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan
Addresses global design for economic and social development via the UN adoption of Sustainable Development Goals and targets. Examines policies and programs that aim to achieve inclusive, people-centered and sustainable development. Covers the basics of narrative policy analysis, measures and outcomes. Explores environmental, social, and economic concerns and their impact at local, national and global levels.
Outcomes:
Identify challenges in social and sustainable development especially in transition to renewable resource use in specific populations; Assess the complex overlap of current science, economics, and geopolitics underlying the overuse of resources, impact on population, and considerations of economic growth

PSLD 432 Gender Diversity & Sustainable Social Development (3 Credit Hours)
This course uses the UNWomen's approach to gender diversity and sustainable development to encompass the issues that hinder and those that contribute to the progress of women and gender diversity within sustainable development. The course reviews the environmental, social, and economic relevance and impact on gender. The specific topics will include, the intersectionality of gender and sustainability in the context of agriculture, forestry, water, health, investment and corporate social responsibility and each topic will highlight a specific region or nation. The course will provide an overview of the underlying intersectionalities of class, age, region within Asia, Latin America, and Africa. Restricted to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan.
Outcomes:
Describe sustainability and the significance of its interaction with gender; Critically review the history of global development agenda from a gendered perspective; Utilize interdisciplinary frameworks of gender inequity and sustainability; Assess variations in women's contributions to social development - historically, culturally, and politically; and Analyze women and gender within issues of Agriculture, Forestry, Water, Health and Investment in sustainable development

PSLD 433 Social Analysis Inequality Poverty and Development (3 Credit Hours)
This course will introduce students to some of these key concepts and debates to enable critical evaluation of how well sociological understandings of development inform the social analysis of exclusion, poverty and inequality, as well as what implications this might have for development policy especially when focusing on underserved communities. Restricted to students admitted into the MA in Public Service Leadership (PSLD-MA); ISDV-PSLD Sub-Plan.
Outcomes:
Describe the key concepts and debates surrounding poverty and inequality; Evaluate sociological understanding that inform the social analysis of exclusion; and Assess implications for policy regarding underserved communities

Foundations of Instructional Design Certificate

The Foundations of Instructional Design (FIND) graduate professional certificate provides foundational knowledge and skills in instructional design for educational and organizational professionals seeking to enhance their current positions. This includes K-12 teachers and higher education faculty as well as organizational trainers. The certificate program is grounded in SCPS's well-established Master of Professional Studies (MPS) in Instructional Design program, which prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

Curriculum

The 12-credit hour certificate includes courses offered in 8-week sessions in a fully online format with evening synchronous meetings. Upon completing the certificate, students can apply for admission into the MPS in Instructional Design program, where their four graduate-level FIND certificate courses will count toward that graduate degree's requirements.

Certificate Requirements

Code	Title	Hours
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
INDN 421	Design & Development of Instructional Materials	3
INDN 430	Performance Improvement in Organizations	3
or INDN 431	Fundamentals of Learning Analytics	
Total Hours		**12**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
	Hours	**6**
Spring		
INDN 421	Design & Development of Instructional Materials	3
INDN 430 or INDN 431	Performance Improvement in Organizations or Fundamentals of Learning Analytics	3
	Hours	**6**
	Total Hours	**12**

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

1. Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
2. Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
3. Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.

Information Technology Leadership and Strategy (MPS)

This fully online and application-oriented master's degree will provide students with a professional background in Information Technology (IT) and technology related professions, including cybersecurity, software engineering, tech support, etc. to gain the leadership, strategic thinking, and critical thinking skills necessary for advancing in their career IT

leadership tracks within small, midsize, and large organizations, with an emphasis on eventually reaching executive positions in the IT field.

Curriculum

Thirty (30) credit hours are required to complete the degree.

Code	Title	Hours
Required Courses		
COMP 417	Social and Ethical Issues in Computing	3
COMP 477	IT Project Management	3
ITLS 445	Introduction to IT: Networking, Cloud & Security	3
ITLS 447	Cybersecurity Governance, Planning, and Incident Response	3
ITLS 449	Advanced Topics: Emerging Technologies	3
ITLS 451	Human-Centered Management	3
ITLS 453	Developing Strategic Plans	3
Three elective courses - 400-level or above [1]		9
Total Hours		**30**

[1] Electives will be selected from existing graduate courses (400 level or higher) at Loyola University Chicago. They will typically be chosen from SCPS (and may include courses in all graduate programs housed in SCPS) and the Computer Science Department. Electives will be determined in conjunction with the program director.

Electives

Code	Title	Hours
COMP 403	Operations Management	3

Summer		
ITLS 453	Developing Strategic Plans	3
COMP 477	IT Project Management	3
Choose one from the list of Electives		3
	Hours	**9**
	Total Hours	**33**

Learning Outcomes

Upon degree completion, graduates will be able to:

1. Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies.
2. Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework.
3. Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success.

4. Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies.

Instructional Design (MPS)

For educational enterprises as well as corporations, the need for those who can design effective and innovative learning experiences has never been greater, especially as online education and training becomes more prevalent in contemporary society.

A fully online and application-oriented degree, the Master of Professional Studies (MPS) in Instructional Design at Loyola University Chicago's School of Continuing and Professional Studies (SCPS) prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

The program offers students a sturdy foundation in instructional design as well as the tools and perspectives needed for flexible career paths and continuing professional development in the field. Rather than a focus on a narrower area of specialization within the field, our Instructional Design program provides a breadth of foundational knowledge and skills in different areas. As a result, you will be well positioned to work with technical specialists and subject matter experts and prepared to develop more specialized interests as you advance in your career.

Students who have earned their Foundations of Instructional Design Certificate (p. 1701) or Professional Certificate in Instructional Design (p. 1707)at SCPS can get a jumpstart on their MPS in Instructional Design, too, as both certificates can be applied toward degree requirements.

Curriculum

The MPS in Instructional Design comprises 30 credit hours. Courses are offered in an 8-week session format with online, evening options.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

1. Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
2. Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
3. Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.
4. Conduct research and predictive data set analysis to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices and performance gaps in an organization.

Paralegal Studies - Corporate Practice Certificate

Corporate Practice

The Corporate Practice Certificate[1] is designed to prepare students to work in areas of law that are important in the transaction of business, such as corporate maintenance, due diligence, contracts, commercial transactions, and regulatory compliance.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

[1] Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale. Click here (https://www.luc.edu/media/lucedu/paralegal/pdfs/Route%20to%20a%20Paralegal%20Career_Loyola%20SCPS.pdf) to learn more.

Curriculum

The Corporate Practice Certificate in Paralegal Studies requires the successful completion of 11 courses (22 semester hours).

Code	Title	Hours
All Certificates: Paralegal Core		
PLST 331	Introduction to Paralegal Studies	2

Select one from list of Electives		2
	Hours	**4**
Summer		
PLST 345	Law Office Computer Applications	2
	Hours	**2**
	Total Hours	**22**

Learning Outcomes

Upon completion of the certificate:

1. Prepare summaries of court decisions, statutes, and administrative regulations.
2. Develop legal arguments using court decisions, statutes, and administrative regulations.
3. Locate relevant legal sources from federal and state jurisdictions.
4. Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
5. Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
6. Assist attorneys who work for corporate clients document the organization and operation of business entities.
7. Retrieve information to conduct due diligence procedures for commercial and real estate transactions.
8. Draft contract provisions and coordinate the administrative process for contracts.
9. Help clients in regulated industries demonstrate compliance with government regulations.

Paralegal Studies - Customized Certificate

Students who wish to earn a customized certificate[1] may complete a specialized curriculum. This curriculum must be approved by the Director

and will include courses in legal research, legal ethics, and technology skills.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

[1] Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

Learning Outcomes

Upon completion of the certificate:

1. Prepare summaries of court decisions, statutes, and administrative regulations.
2. Develop legal arguments using court decisions, statutes, and administrative regulations.
3. Locate relevant legal sources from federal and state jurisdictions.
4. Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
5. Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.

Paralegal Studies - Litigation and Corporate Practice Certificate

This certificate combines the requirements of the Litigation Practice and Corporate Practice certificates[1] and is designed for students who wish to earn specialized credentials in both subject areas. Note that this certificate requires completion of a total of 28 semester credits, more than the other certificates.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

[1] Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

Curriculum

The Dual Litigation and Corporate Practice Certificate in Paralegal Studies requires the successful completion of 14 courses (28 semester hours). Each course is two credit hours.

3. Locate relevant legal sources from federal and state jurisdictions.
4. Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
5. Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
6. Draft court pleadings and maintain case files and databases.
7. Collect and organize information through investigation and the discovery process.
8. Help prepare the case for trial, and often assist attorneys at trial by coordinating the case material.
9. Assist attorneys who work for corporate clients document the organization and operation of business entities.
10. Retrieve information to conduct due diligence procedures for commercial and real estate transactions.
11. Draft contract provisions and coordinate the administrative process for contracts.
12. Help clients in regulated industries demonstrate compliance with government regulations.

Paralegal Studies - Litigation Practice Certificate

LITIGATION PRACTICE

The Litigation Practice Certificate[1] is designed to prepare students to work in civil litigation on the state and federal level. Special attention is given to strengthening legal technology skills. Electives offer students opportunities to explore different areas of law.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

[1] Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

CURRICULUM

The Litigation Practice Certificate in Paralegal Studies requires the successful completion of 11 courses (22 semester hours).

Professional Certificate in Instructional Design

The Professional Certificate in Instructional Design (PIND) graduate professional certificate provides a strong foundation in instructional design as well as the tools and perspective needed for flexible career paths and continuing professional development in the fast-evolving field. It prepares students to become generalist instructional designers equipped to work in a variety of industries and professional settings, including education and business environments.

Rather than focusing on a narrower area of specialization within the field, such as learning technologies, PIND delivers a breadth of foundational knowledge and skills in different areas. It prepares instructional designers to work with technical specialists as well as subject matter experts and also empowers them to develop more specialized interests as they grow in their profession.

Curriculum

The 18-credit hour certificate includes courses offered in 8-week sessions in a fully online format with evening synchronous meetings. Upon completing the certificate, students can apply for admission into the MPS in Instructional Design program, where their six graduate-level PIND certificate courses will count toward that graduate degree's requirements.

Certificate Requirements

Code	Title	Hours
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
INDN 421	Design & Development of Instructional Materials	3
CIEP 488	Participatory Action Research (PAR) in Schools and Communities	3
INDN 440	Applications of Human Centered Design Principles	3
INDN 430	Performance Improvement in Organizations	3
or INDN 431	Fundamentals of Learning Analytics	
Total Hours		**18**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
INDN 440	Applications of Human Centered Design Principles	3

INDN 421	Design & Development of Instructional Materials	3
INDN 430 or INDN 431	Performance Improvement in Organizations or Fundamentals of Learning Analytics	3
	Hours	**6**
Summer		
CIEP 488	Participatory Action Research (PAR) in Schools and Communities	3
	Hours	**3**
	Total Hours	**18**

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

1. Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12

schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
2. Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
3. Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.
4. Conduct research to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices in an organization.

Public Affairs and Management Certificate

As a working professional, you may have a degree in your field but now realize you need additional skills to advance into an administrative or managerial position. The certificate program in public affairs and management can give you that background in only one year of work. The program helps you to develop a set of core skills needed in government or nonprofit work, while providing some tailoring for your particular career needs.

Courses are offered in a mix of online and in-person formats. All in-person classes are taught at Loyola University's Water Tower Campus in the later afternoon or evening. Classes meet once a week for 2 and 1/2 hours for a 15-week semester.

Curriculum

To complete the Public Affairs and Management certificate, you will take **4 three-credit courses for a total of 12 credit hours**. These requirements could be fulfilled in one year at full-time status of two classes per semester or two years at part-time status of one class per semester.

All courses are divided into two categories, as seen below. Students take at least one course from each category. This guarantees exposure to perspectives to understand the environment in which you work (political/organizational category) and exposure to new technical skills (skills category).

You will determine your course selection in consultation with an advisor from the MUAPP faculty to reflect your needs based on career stage and goals. Earlier career individuals may want to acquire more skills; mid-career individuals may focus more on the political and managerial environment.

Course Offerings

An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
MPP 401	Analytical Tools in Public Policy	3
MPP 404	Public Policy Process	3
	Hours	**6**
Spring		
MPP 400	Policy Design and Analysis	3
MPP 403	Public Budget and Finance	3
	Hours	**6**
	Total Hours	**12**

Learning outcomes

Upon completion of the certificate, graduates will be able to:

1. Develop additional technical skills in public policy and data analysis appropriate for the individual's career advancement. These could include: budgeting and finance, policy analysis and design, program evaluation, GIS, project management, or scenario planning.
2. Understand the political factors that impact the environment of government agencies and nonprofit organizations.
3. Identify relevant actors, their motivations, sources of power, and processes that lead to policy outcomes through the lens of various management theories.

Public Policy (MPP)

Job growth, affordable housing, educational reform, environmental degradation—these are just a few of the significant challenges that face society today. The public policy program at Loyola can help students transform their interest in these types of problems into the ability to analyze and act upon them. The curriculum brings together knowledge about current government programs with the technical skills to assess how politics influence policy choices, how to design more effective programs, and how to evaluate the impacts of existing ones.

The Master of Public Policy (MPP) program at Loyola is a two-year professional degree focused on training students to assume leadership roles in government, non-profit organizations, or businesses. Part-time students typically finish in three years. Internships or capstone projects allow students to apply the skills developed in the program and gain work-related experience.

Curriculum

The MPP degree program requires 37 credit-hours of coursework—11 three-credit courses, plus a three-credit internship or capstone experience, and a one-credit professional development course.

Required Coursework

Code	Title	Hours
Core Requirements		
MPP 400	Policy Design and Analysis	3
MPP 401	Analytical Tools in Public Policy	3
MPP 403	Public Budget and Finance	3
MPP 404	Public Policy Process	3
MPP 405	Statistical Methods & Analysis for Public Policy I	3
MPP 406	Statistical Methods & Analysis Public Policy II	3

MPP 501	Public Policy Internship	3
or MPP 503	Public Policy Practicum	
Electives		
Select four from list of Electives		12
Total Hours		**37**

Electives

Students are required to take 12 hours of electives. Electives can be drawn from many departments across the university, including criminal justice, education, environmental studies, political science, public health, psychology, sociology and social work. These electives are where students can focus on their preferred field of policy. The following are some examples of optional courses:

Code	Title	Hours
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 412	Water Law & Policy	3
Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3
Criminal Justice		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
Economic and Community Development		
MPP 407	Local Economic Development	3
MPP 414	Affordable Housing Finance and Policy	3
Education		
ELPS 405	Introduction to Educational Policy Analysis	3
ELPS 412	Urban Education Policy	3
Immigration		
SOWK 730	Immigration Dynamics and U.S. Social Policy	3
SOWK 732	Migration, Social Justice, and Human Rights	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Hours	**9**
	Total Hours	**37**

Internship or Capstone Experience

For students without significant professional work experience prior to starting the program, an internship is required. Most students complete their internships in the summer between their first and second years. For students with professional work experience, a capstone project or policy clinic resulting in a major analytical report could be done instead.

Learning Outcomes

Upon completion of the MPP program, graduates will be able to:

1. Design policy interventions and apply criteria to assess the best option in each specific case
2. Understand a government budget and evaluate it from different stakeholder positions
3. Understand the political process at the federal, state and local government levels
4. Develop political messaging to advocate for policies and to build a political coalition of support for a program
5. Apply appropriate statistical procedures used in public policy research and practice
6. Design, conduct and critique program evaluations
7. Experience working in the public policy arena in government agency, non-profit, research, or private sector organization

Public Policy/Law (MPP/JD)

It's all about solutions. In the JD/Master of Public Policy program, you will learn to design effective solutions in the creation, implementation and enforcement of government policies. As an advocate in a variety of settings (legislative, judicial, or executive), you will use the tools of law in

public service. You will be equipped to work in multiple venues, including the courtroom, legislative offices, and public policy institutes on a wide variety of issues.

Graduates will be prepared to work in government agencies, nonprofit organizations, advocacy and lobbying positions, as well as private sector firms.

Curriculum

Students in their first year will take the required law school coursework. In their second and third years, they will take six credits of MPP courses each semester in addition to their law school requirements.

To earn a dual JD/MPP degree, you must complete a total of 89 credit hours, including 65 law school credit hours and 24 MPP credit hours. A minimum of 74 graded hours are required for this degree. With careful planning, you can earn both degrees in three years of study. You will spend your first year as a full-time law student. JD foundational course requirements and skills and experiential course requirements will be taken in the second and third years, concurrent with several MPP courses. A public service externship will be completed in either the summer following the first or second year.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

Upon completion of the joint JD/MPP degree program, students will be able to:

1. Design effective solutions in the creation, implementation and enforcement of government policies.
2. Work as an advocate in a variety of settings (legislative, judicial, or executive).
3. Use the tools of law in public service.
4. Understand the political process in development of policies, including the role of the judiciary with other branches of government and within the intergovernmental context.
5. Understand a government budget and evaluate it from different stakeholder positions.
6. Develop political messaging to advocate for policies and to build a political coalition of support for a program.

In addition to the above learning outcomes, the dual degree students will also be able to:

1. Design policy interventions and apply criteria to assess the best option in each specific case
2. Understand a government budget and evaluate it from different stakeholder positions
3. Understand the political process at the federal, state and local government levels
4. Develop political messaging to advocate for policies and to build a political coalition of support for a program
5. Apply appropriate analytical procedures used in public policy research and practice

Public Service Leadership (MA)

Addressing some of today's most complex and layered societal issues often requires a deeper skill set and more thorough knowledge base to drive decision-making and execute thoughtful plans. The MA in Public Service Leadership at Loyola University Chicago's School of Continuing and Professional Studies (SCPS) arms students to be justice-oriented agents of change in their respective communities as well as competent, capable, and ethical leaders who can push communities forward in enduring ways.

Through assignments, exercises, and discussions with your fellow students and expert faculty, you will consider different ideas and realities. You will discern your unique and particular gifts and find ways to put those attributes into the service of others. You will think thoughtfully and critically about your "reason for being," reflection that will help you achieve your personal and professional goals.

While MA in Public Service Leadership students choose one of the two track options to pursue—either Disaster Management & Emergency Preparedness or Global Social & Sustainable Development—our program broadens the concept of public service and laces specific emphasis on leadership in public service through governmental, non-profit, and human service organizations. Moving between the disparate but overlapping health/social sectors, students gain values and skills adaptable to a variety of organizations, including public-private partnerships.

Curriculum

The MA in Public Service Leadership comprises of 30 credit hours, 10 courses. Courses are offered in an 8-week session format with online, evening options.

Foundation Courses

Code	Title	Hours
PSLD 400	Introduction to Public Service	3
PSLD 401	Ethical Leadership in Public Service	3
PSLD 402	Foundations of Global Strategic Communication	3
PSLD 403	Program Management and Development	3
PSLD 404	Data, Visualization and Evaluation	3
PSLD 405	Design Thinking in Mitigating Complex Social Problems	3
Total Hours		**18**

Track Courses (Choose One Track)
Disaster Management & Emergency Preparedness Track

Code	Title	Hours
PSLD 420	Disaster Operations and Management	3
PSLD 421	Emergency Planning and Implementation	3
PSLD 422	Disasters and Vulnerable Populations	3
PSLD 423	Integrated Social-Medical Issues in Emergency Management	3
Total Hours		**12**

Global Social & Sustainable Development Track

Code	Title	Hours
PSLD 430	Understanding and Mitigating Poverty	3
PSLD 431	Foundations of Social and Sustainable Development	3
PSLD 432	Gender Diversity & Sustainable Social Development	3
PSLD 433	Social Analysis Inequality Poverty and Development	3
Total Hours		**12**

Learning Outcomes

After completing the required courses in this Program, students will be able to:

1. Describe components and levels of leadership across public sectors
2. Apply ethical reasoning to administrative design and decision-making in the current realm of public service leadership
3. Analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
4. Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
5. Collect and apply data in problem identification and problem solving
6. Differentiate between non-crisis leadership and leadership in emergencies among public, social and economic sectors
7. Apply fundamentals of communication appropriate to situation in both local and global situations.

Urban Affairs (MA)

The Master of Arts (MA) in Urban Affairs is an interdisciplinary degree program focusing on how cities work and the challenges they face, such as economic growth or decline, globalization and immigration, and the impact of the housing market on neighborhood stability. The curriculum brings together viewpoints and analytical tools from multiple fields to provide different perspectives on the causes of urban problems and their possible solutions.

The Urban Affairs program at Loyola is a professional degree focused on training students to assume technical or leadership roles in government, nonprofit organizations, or business. Students develop skills in coursework and gain work-related experience through internships or capstone policy clinics.

Curriculum

The MA in Urban Affairs requires 31 hours of coursework—10 three-credit courses, plus a one-credit Professional Development course where students attend a series of meetings covering critical professional skills such as resume and cover letter writing, informational interviews, self-assessments, and networking. Students also complete a required 3 credit hour internship or capstone policy clinic. Students can complete the program in 18-24 months.

Code	Title	Hours
Core Courses: Disciplinary Perspectives on Urban Areas		
Political Environment		
MPP 412	Urban Politics and Policy	3
or MPP 413	Intergovernmental Relations	
Sociology of Cities

Year 2		
Fall		
MPP 501	Public Policy Internship	3
SOWK 502	Power, Oppression, Privilege, and Social Justice	3
Select two from list of Electives		6
	Hours	**12**
	Total Hours	**31**

Learning Outcomes

Upon completion of the Master's degree, graduates will be able to:

1. Draw on a variety of disciplinary perspectives, such as politics, economics, sociology, and history, to understand the complexity of urban issues.
2. Identify sources of urban power and their impact on city conditions, on potential systematic biases, and how likely these biases could be overcome.
3. Analyze a city budget and evaluate it from different stakeholder positions.
4. Analyze urban issues using multiple technical approaches: statistical techniques; fiscal analysis; needs assessments, community impact studies, and program evaluations.
5. Experience working in the public policy arena in a government agency, non-profit, research, or private sector organization.

School of Education

Mission and Vision

Our Vision

At the School of Education of Loyola University Chicago, future education leaders will have a transformational experience, one that prepares them to address social inequalities in both their local and global communities through the power of education and research.

Our Mission

The School of Education at Loyola University Chicago, a Jesuit Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance equity in education in service of social justice, engaged with Chicago, the nation, and the world. In pursuit of our vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice.

Our mission is social justice, but our responsibility is social action through education and research. We fulfill our responsibility by preparing professionals to serve as teachers, administrators, counselors, psychologists, and policymakers who work across the human developmental continuum, and by conducting research on issues of professional practice in schools, families, and communities. In our immersive learning environment, students gain both second-to-none foundational knowledge and a strategic system-wide vision working alongside some of the top scholars and teachers in the nation. Through our rigorous curriculum, students learn to be comfortable with the uncomfortable, supported by our passionate and dedicated faculty, staff, and administrators. And they leave with lasting relationships with each other and an extensive alumni network of leaders in education across Illinois, the U.S., and the world.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Counseling Psychology (CPSY)

CPSY 400 Research Fundamentals: Family Studies (3 Credit Hours)
No course description is available

CPSY 406 Professional, Ethical, Legal Issues: Family & School (3 Credit Hours)
No course description is available

CPSY 407 Professional Field Experience: Family Studies (0 Credit Hours)
No course description is available

CPSY 417 Intro to Family Studies (3 Credit Hours)
No course description is available

CPSY 418 Theories of Family (3 Credit Hours)
No course description is available

CPSY 419 Family Communications (3 Credit Hours)
No course description is available

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 422 Group Dynamics: Theory/Practice (3 Credit Hours)
No course description is available

CPSY 423 Theory Counseling & Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development & Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 438 Program for Addicted Personality (3 Credit Hours)
No course description is available

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (0 Credit Hours)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 452 Educational Implication Social Psych (3 Credit Hours)
No course description is available

CPSY 453 Affective Development (3 Credit Hours)
No course description is available

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 455 Interpersonal Relations & Sexuality (3 Credit Hours)
No course description is available

CPSY 456 Personality Theory & Education (3 Credit Hours)
No course description is available

CPSY 457 Child Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to child development
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in children and prevent the development of psychological and academic problems

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 464 Adult Development & Counseling (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY464/PSYC450

CPSY 480 Mental Tests:School Age& Adult (3 Credit Hours)
No course description is available

CPSY 481 Mental Tests: Preschool (3 Credit Hours)
No course description is available

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 483 Advanced Projectives (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP483/CPSY483

CPSY 484 Neuropsychological Assessment (3 Credit Hours)
Pre-requisites: CPSY 461
This course introduces students to the administration and interpretation of neuropsychological tests.
Outcomes:
Students will be able to demonstrate knowledge of major neuropsychological assessment tools and their application to the assessment of neuropsychological conditions

CPSY 485 Career Assessment (3 Credit Hours)
This course introduces the career assessment process from theoretical, empirical and practical perspectives. The appraisal of aptitudes, interests, values, needs, and work environments will be studied.
Outcomes:
Students will be able to demonstrate knowledge of the nature, structure, function, and cross-cultural generality of work-related aptitudes, interests, needs, and values and prominent tools to assess each

CPSY 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CPSY 489 Achievement Tests (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP493/CPSY489

CPSY 490 Advanced Educational Statistics (3 Credit Hours)
No course description is available
Course equivalencies: RMTD481 / CPSY490

CPSY 495 Research Methods (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP495/CPSY495

CPSY 496 Computers in Educational Research (3 Credit Hours)
No course description is available

CPSY 497 Microcomputer Applications School or Agency (3 Credit Hours)
No course description is available

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 551 Writing for Publication (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY551/GNUR506

CPSY 552 Research in Self Esteem (3 Credit Hours)
No course description is available

CPSY 553 Language & Communication Devel (3 Credit Hours)
No course description is available

CPSY 554 Moral Development (3 Credit Hours)
No course description is available

CPSY 555 Seminar Human Development (3 Credit Hours)
No course description is available

CPSY 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (0 Credit Hours)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Curriculum, Instruction & Educational Psychology (CIEP)

CIEP 400 Fundamentals of Research: Special Education (3 Credit Hours)
No course description is available

CIEP 401 The Exceptional Child (3 Credit Hours)
This course is designed to provide a psychological and educational examination of exceptionality as related to school- age children and youth.
Outcomes:
Students will articulate defining characteristics of a range of disabilities as well as knowledge of a range of educational modifications made for students with special needs

CIEP 409 Evidence Based Interventions (3 Credit Hours)
This course is designed to provide students with an introduction to evidence-based interventions used in school psychological service delivery. Course content includes definitions of evidence-based interventions, process for identifying evidence-based interventions in school psychology, and a review of well-established evidence-based academic and behavioral interventions used in school based settings. Restricted to EDS students.
Outcomes:
Upon completion of the course, students will be able to: Define "evidence-based intervention" and differentiate this concept from similar concepts (eg, empirically-supported intervention, evidence-based practice, etc); Identify organizational websites that collect, evaluate, and disseminate evidence-based academic and behavioral interventions for children and adolescents that can be used in school-based settings (eg, What Works Clearinghouse, Doing What Works, Johns Hopkins Best Evidence Encyclopedia, and SAMHSA's National Registry of Evidence-Based Programs and Policies); Interpret the foundational criteria that are used to evaluate the quality of research to determine the strength of an intervention's evidence; Identify several well-established academic and behavioral evidence-based interventions for children and adolescents in school-based settings; Understand the strengths and limitations of developing and implementing evidence- based interventions with minority populations

CIEP 410 Legal Issues - Educating Exceptional Children (3 Credit Hours)
Legal issues relevant to the education of persons with disabilities are examined.
Outcomes:
Students will demonstrate and understanding of legal issues that pertain to students with disabilities as well as other relevant case law in education

CIEP 411 Inquiry Based Science Teaching (3 Credit Hours)
This course examines the theoretical background, practical knowledge, and skills essential for successful inquiry teaching. Candidates will be introduced to the teaching and learning about inquiry. Candidates will also be provided with opportunities to practice inquiry skills in peer teaching lessons. Focus will also be on inquiry in the curriculum and assessment of student learning. This course will also focus on the research findings about the teaching and learning of scientific inquiry in the middle and high school grades.
Outcomes:
Use his/her understanding of scientific inquiry as a guiding framework for the development of classroom demonstrations, laboratory activities, and instructional materials

CIEP 412 Special Topics in Special Education (3 Credit Hours)
Seminar in Special Topics in Special Education. Topics will vary from term to term.

CIEP 413 Psychopathology & School Mental Health (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology Program The purpose of this course is to develop a working knowledge of childhood/adolescent psychopathology from multiple theoretical perspectives. The interactions of individuals, families, communities, schools and mental health providers in either etiology and/or treatment planning will be considered.
Outcomes:
Students will gain knowledge of child/adolescent psychopathology in terms of diagnosis, prevention and intervention

CIEP 414 Instructional Methods-Diverse Population (3 Credit Hours)
This course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 414L Instructional Strategies Lab (0 Credit Hours)
No course description is available

CIEP 415 Models of Instruction (3 Credit Hours)
This graduate course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 416 SPED Administrator: Assessment of Atypical Child (3 Credit Hours)
This course is an introductory course in assessment principles and practices. It is designed to provide students obtaining certification as an administrator the foundation to understand the proper uses of assessment and data. Students will acquire a broad introduction to the topic of assessment. The introduction covers the knowledge of assessment principles and practices. This course will provide students the foundation to understand and discern the proper uses of assessment and data to make individual decisions and broad organizational decisions.

CIEP 417 Scientifically Based Research (3 Credit Hours)
No course description is available

CIEP 420 Multivariate Aspects of Research (3 Credit Hours)
No course description is available

CIEP 421 Reading Literacy Instruction-Elementary (3 Credit Hours)
This course focuses on the theoretical and practical applications of teaching reading to diverse populations in the elementary school. Emphasis will be on children's literature and research-based teaching strategies that are effective in developing literacy within a literate classroom environment.
Outcomes:
Students will be able to make informed decisions regarding the appropriate children's literature, materials, and instructional approaches to implement in elementary school literacy classrooms

CIEP 422 Assessing Literacy (3 Credit Hours)
This course emphasizes a wide range of assessment tools and practices that can be used to plan and evaluate effective reading instruction. Assessments may range from standardized tests to informal assessments and also include technology-based assessments.
Outcomes:
Students will be able to compare and contrast, use, interpret, and recommend appropriate assessment tools and practices to meet the needs of students in the literacy classroom

CIEP 423 Advanced Literacy Instruction in the Content Area (3 Credit Hours)
This course focuses on the theoretical foundations of content instruction in the context of reading and writing to learn in the content areas. Current research on reading, writing, and thinking as well as topical issues related to teaching practices and state and professional guidelines and standards will be examined.
Outcomes:
Students will develop a knowledge base of current reading/writing/thinking theories which can be applied to the teaching of content areas in either elementary or secondary classrooms

CIEP 424 Assessment, Diagnosis, and Evaluation in Reading (3 Credit Hours)
This course provides the research and practical applications of literacy assessment instruments to assess, diagnose, plan, evaluate, and revise effective instruction that meets the needs of all students, including those at different developmental stages and those from different cultural and linguistic backgrounds. Emphasis is on the communication of results of assessments to stakeholders.
Outcomes:
Students will be able to competently assess and diagnose the reading/literacy abilities of students experiencing some difficulties and provide and communicate a plan for effective instruction

CIEP 425 Theory and Practice in Assessment (3 Credit Hours)
This course addresses the purposes, methods, creation, and uses of assessments in a variety of learning contexts (e.g., classrooms, informal learning settings, workplace settings). The course will examine multiple assessment practices (e.g., testing, performance based, self-assessment, work based assessment). The course will also provide an introduction to the psychometrics of assessment.
Outcomes:
Candidates will be able to describe and explain the purposes, theories, and components of various assessment practices; Develop a variety of assessment practices to evaluate learning outcomes across different learning contexts; describe and explain the foundational aspects of psychometrics as it relates to assessment

CIEP 426 Analysis of Reading Materials (3 Credit Hours)
This course is designed to introduce the materials which are available for developmental, corrective and remedial literacy instruction with particular emphasis on the selection of appropriate materials to meet specific instructional needs.
Outcomes:
Students will be able to select materials that match the reading levels, interests, and cultural and linguistic background of their students

CIEP 428 Seminar: Development/Administration of Reading Program (3 Credit Hours)
This is an advanced course for reading professionals and administrators to study, discuss, and evaluate the most effective reading programs. Emphasis is on the developmental processes that support effective programs as well as the guidelines that administrators can implement to encourage best practice in literacy classrooms.
Outcomes:
Students will design a reading program that meets the needs of the students in a school setting

CIEP 429 Teaching Child and Adult Literature (3 Credit Hours)
This course introduces the English/language arts education student and the reading specialist student to the relevance and need for incorporating children's and young adult literature in the classroom and to the development and strengthening of literacy.
Outcomes:
Students will be knowledgeable about a wide range of children's and young adult literature to use in reading instruction for learners at different stages of reading development and from different cultural and linguistic backgrounds

CIEP 430 Practicum: Reading Disabilities (3 Credit Hours)
The focus of this course will be on the effective implementation of a school's literacy and reading improvement research action plan. Emphasis will be placed on the implementation of effective teaching strategies and support systems that will result in the development of literate learners and dynamic learning environments.
Outcomes:
Students will diagnose reading difficulties that exist at a school and develop an action plan to address them; Students will apply reading content, methodology, diagnosis and assessment strategies to create an effective plan

CIEP 431 Three Tier Prevention: Advanced Primary Supports (3 Credit Hours)
This course focuses on universal preventions, which serve as the first tier of three levels of intervention.
Outcomes:
Candidates will learn skills to assist them in (a) identifying and assessing problem behaviors; (b) designing and implementing behavior interventions; (c) designing learning environments that prevent and remediate problem behaviors, and (d) involving key stakeholders to develop agreed upon expectations and strategies to facilitate success for all students

CIEP 432 Three Tier Prevention: Secondary and Tertiary Supports (3 Credit Hours)
This course will focus on the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will learn skills to assist them in designing and implementing evidenced-based behavior interventions to targeted groups or individuals that improve lifestyle results (personal, health, social, family, work, recreation) for all children and youth by making problem behavior less effective, efficient, and relevant, and desired behavior more functional

CIEP 433 Self-Determination: Self-Management and Transition Planning (3 Credit Hours)
This course will focus on increasing student self-determination through the use of behavioral principles to understand and address problems in self-management. In addition, the course will introduce current perspectives on self-determination and quality of life issues as they relate to individuals transitioning through the life-span.
Outcomes:
Candidates will learn how to apply behavioral principles to develop and implement an individual self-management plan to reach a particular short-term goal

CIEP 434 Practicum I: Consultation and Collaboration-School Personnel (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of primary supports/interventions to enhance the capacity of schools to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership when planning and implementing primary preventions strategies at the school-wide level across all students and will involve appropriate key stakeholders (school personnel, students, families, community members) to develop agreed upon school-wide expectations and strategies to facilitate success for all students

CIEP 435 Practicum II: Consultation and Collaboration-Family and Community (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership by providing guidance and modeling to school personnel, family, and community member in the use of behavior interventions to improve the quality of life for all children

CIEP 437 Strategies Teaching Social Studies & Arts (3 Credit Hours)
This course is designed to help students examine the complex role of the teacher and to understand principles and methods of curriculum, instruction, and evaluation in schools. Class activities are organized within the content areas of social studies and an appreciation for the arts and include lesson planning, teaching models, the roles and responsibilities of teachers, and educational issues which impact the teaching profession.
Outcomes:
Students will be able to design an instructional plan, demonstrate effective teaching strategies, and articulate current issues in teaching and learning

CIEP 438 Math Elementary & Middle School Teacher (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. Students study geometry, measurement, data analysis and probability, algebra and number and operations.
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in elementary school classrooms

CIEP 439 Teaching Science in Elementary & Middle Schools (3 Credit Hours)
This course is designed to help teacher students develop the theoretical background, practical knowledge, and skills essential for successful science teaching.
Outcomes:
Students will understand and practice instructional models to effectively teach science to ALL students and assess their learning

CIEP 440 Critical Investigations in the Field of Curriculum (3 Credit Hours)
This course critically examines the foundations of curriculum from a critical lens on the field of curriculum. Students study controversial curriculum issues across schools and communities drawing from curriculum theory and policy in lived and specific historical contexts. It starts with the discussion of the history of the field, multiple definitions of curriculum, paradigms, and philosophies and then moves on to wonder about the prospects for the future. Students examine a broad range of historical documents and theoretical essays as they consider essential curriculum questions both in schools and communities.
Outcomes:
This course will educate students in historical and philosophical curriculum inquiry across schools and communities; Students explore curriculum issues in real and particular historical, philosophical contexts and apply them to contemporary curriculum discourses

CIEP 442 Culturally Sustainable Curriculum Development & Implementation (3 Credit Hours)
This course provides the basis for curriculum development and implementation in schools or other professional learning settings. Students will learn theories and practices of developing curriculum based on culturally responsive and sustainable frameworks and practice how to apply these principles in curriculum development. Students will design and implement social justice-oriented curriculum for schools and/or professional settings.
Outcomes:
Students will understand key curriculum development frameworks that integrate culturally sustainable pedagogy

CIEP 443 Evidence-Based Practices in Mathematics and Science Teaching (3 Credit Hours)
This course examines a variety of current theories and recent literature on Evidence-Based Practices in teaching and learning, while best practices will be discussed, analyzed, applied, compared and critiqued. Through a critical examination and analysis of the literature, candidates will learn how to implement best practices that focus on the developmental needs of young adolescents and provide them with effective educational instruction.
Outcomes:
Candidates will become researchers of their own practice and instructional content, which will lead them to become positive change agents for their own classrooms, and by extension, for the larger school community

CIEP 444 Social Justice, Service, Quality (3 Credit Hours)
No course description is available

CIEP 446 Middle School Theory and Practice (3 Credit Hours)
This course focuses on middle level philosophy and structure; student development and diversity; curriculum, instruction, assessment, and planning for the middle school classroom; and the creation of a positive learning environment for the graduate student in teacher certification.
Outcomes:
Students will develop knowledge of middle level philosophy as it applies to education, examine how these beliefs and values affect both teaching and learning, participate in observation studies and research analysis with early adolescents, and design a simulated interdisciplinary thematic unit based on the above understandings

CIEP 447 Technology Enhanced Instruction & Online Teaching (3 Credit Hours)
This course presents the practices for using technology as a tool for instruction and learning. This includes the integration of technology into classroom s and organizations for instruction al and learning purposes, the development of digital learning (e.g., videos, webinars, reusable learning objects), practices for online instruction and use of Learning Content Management Systems (LCMSs)
Course equivalencies: CIEP492/CIEP447
Outcomes:
Candidates utilize technology as a tool to promote learning outcomes; The candidates will learn to practice using various forms of technology enhanced instruction (eg videos, webinars, reusable learning objects); Candidates will also utilize effective practices for online instruction and use of learning content management systems

CIEP 448 Technology Enhanced Instruction II (3 Credit Hours)
This course presents models for instructionally sound use of various technologies including computer technology for K-12 settings. (Part II)
Outcomes:
The student will develop an instructional program based on local, State, and national standards for the use of computers and other associated learning technologies, integrating these plans across subject and content areas

CIEP 449 Practicum: School Technology (3 Credit Hours)
This course is designed to provide the opportunity for students to apply their knowledge and skills in instructional design, technology development, technology planning, evaluation, and professional development within a K-12 environment. Learners participate in monthly sessions with the practicum director and are required to contribute to the threaded discussion designed for this practicum.
Outcomes:
Learners will be able to work as a consultant within a school setting to provide a variety of support to administrators in developing a technology plan; Learners will be able to work as a consultant within a school setting to provide a variety of support to administrators in developing a technology plan; Learner will be able to provide professional development workshops to increase the technology knowledge and skills of teachers, staff and administrators

CIEP 450 Educational Psychology (3 Credit Hours)
The psychological bases of educational theories and practices related to human learning, development and psychological research are studied and critically examined.
Outcomes:
Students will demonstrate knowledge of leading learning theories, human development and assessment of learning as it pertains to evidence-based instruction and practice

CIEP 451 Psychology of Learning (3 Credit Hours)
The dual study of theory and research in human learning is presented, with an emphasis on behavioral and cognitive science models, as well as memory and retrieval systems.
Outcomes:
Students will demonstrate knowledge of validated learning theories in the behavioral and cognitive science domains

CIEP 452 Literacy Theory and Foundations (3 Credit Hours)
This is an advanced course in literacy research and theory, providing historical, cognitive, cultural, and technological foundations for teaching reading and related communication systems in elementary, middle, and secondary schools, and to adult populations of developing readers. The purpose of this course is to acquaint students with the most current research and theory that underlie best practices in literacy education.
Outcomes:
Students will be able to explain, compare, contrast, and critique the major theories and research related to the psychological, sociological, and linguistic foundations of reading and writing processes and instruction

CIEP 453 Emergent Literacy (3 Credit Hours)
This course focuses on the most current understanding of young children's literacy acquisition and development and on the best instructional strategies for teaching young children to read and write successfully.
Outcomes:
Students will be able to apply their understanding of current literacy acquisition research to make appropriate instructional decisions when teaching young children to read and write

CIEP 454 Writing as Literacy (3 Credit Hours)
This course introduces the concept of writing as literacy. It is designed to acquaint students with the most current understanding of writing in a variety of expressive and informative genres.
Outcomes:
Students will demonstrate an understanding of the idea of writers who can then be teachers of writing

CIEP 456 Leadership in Reading/Professional Development (3 Credit Hours)
Leadership and learning center this advanced practicum around opportunities for K-12 reading specialist candidate's professional literacy development and training based on school literacy goals, personal literacy interests, and ways to teach others about complex literacy processes.
Outcomes:
Students will be able to plan, implement, and evaluate professional development activities at their grade, school, and/or district level as well as support their own professional development and assist other teachers in identifying, planning, and implementing personal professional development plans

CIEP 457 Implementation Strategies, Planning, and Practices (3 Credit Hours)
Implementing innovations in schools, community and business organizations requires individuals to possess the knowledge and skills to work successfully as change agents. This course is a study of the science, theories, models and strategies that can be used across organizational settings to facilitate the implementation of innovative practices.
Outcomes:
Students will be able to utilize theories, models and strategies to facilitate the planning and implementation of innovations within organizational settings

CIEP 458 Classroom Management (3 Credit Hours)
This course is designed to help teacher candidates develop a classroom learning environment conducive to quality instruction and optimal learning. Topics include: establishing classroom procedures, rules and consequences; teaching social skills; facilitating student teams; and solving behavior problems. Students will design a classroom environment that encourages learning.
Outcomes:
Students will be able to demonstrate a variety of classroom management strategies appropriate to the needs of the students

CIEP 461 Practicum in School Psychology I (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 462 Ethics and Professional School Psychology (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology program. The course focuses on the professional, legal, and societal context in which school psychology practice takes place and the major functions and competencies of school psychologists.
Outcomes:
The expected outcomes of the course are an enhanced understanding of the roles and functions of school psychologists and models of service delivery

CIEP 463 Practicum Schl Psychology II (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 466 School Psychology Special Topics (3 Credit Hours)
This course is designed to provide students with the information on constructing a school-based, action-research project that addresses a problem of practice within a school system. Students will learn the fundamentals of defining a problem of practice in a school setting, developing a robust literature review, designing an evidence-based implementation plan to address the problem of practice, and designing data organization tools to evaluate the implementation plan. While much of the information provided can be used to develop any kind of action research or systems change project, there will be a focus on developing the Capstone Project. Through this course you will learn skills to address problems in schools and districts, as well as address the requirements for the Capstone. Students will receive primary assistance on their own Capstone Project with their project chair.

CIEP 469 Issues that Shape Teaching and Learning in Urban Schools and Communities (3 Credit Hours)
This course examines the social, economic, political, cultural and historical factors that impact communities and shape teaching and learning in urban settings. A field experience with a local community organization working on an educational initiative will provide students with the opportunity to participate in, research, and develop understandings around the relationship among organizations, communities, and schools.
Outcomes:
Students will be able to demonstrate a complex understanding of issues that face urban schools, their relationship to local communities and the educational resources that can be generated by partner ships between schools and communities

CIEP 470 Principles of Instructional Design (3 Credit Hours)
Through the development of an instructional product candidates will engage in the activities associated with each step of the ADDIE process. Emphasis is placed on a cognitive model of learning; however, other models/theories of learning may be applied. In addition candidates will use theories of instructional motivation, principles of instruction as well as instructional strategies relevant to the type of knowledge and cognitive domain level of their product to in order to enhance learning. Analysis, Design, Development, Implementation, Evaluation (ADDIE) process to develop an instructional product.
Outcomes:
Candidates will use the steps involved in systematic instructional design process

CIEP 471 Theoretical Foundations of ESL-Bilingual Education (3 Credit Hours)
This course introduces the integral theoretical, historical, political frameworks and ideological constructs that shape the contemporary educational practices for culturally and linguistically diverse students. Content delves into key principles, policies, and practices of language education, including the various models of bilingual education, English as a second language (ESL), English as a foreign language (EFL), and sheltered content instruction. The course builds background of language acquisition theories, key legal precedents, and educational and language policies that influence school programming, assessment, instruction, teaching, and learning.
Outcomes:
Participants will explain how students develop and maintain languages, describe the research basis for bilingual education, and demonstrate how various school stakeholders implement language policies and programs with bilingual students

CIEP 472 Methods and Materials for Teaching ESL/Bilingual Education (3 Credit Hours)
This course provides a comprehensive framework for teaching bilingual students across a range of educational settings and explores the various theories of language teaching and learning that have been promoted at different times. The content delves into various approaches to teaching in monolingual and bilingual instructional settings, as well as pedagogical strategies to support disciplinary learning, language development, and bilingualism/biliteracy. Course topics include instructional planning and implementation, as well as the selection of culturally, linguistically, and developmentally appropriate materials to enhance instruction, understanding, and achievement.
Outcomes:
Participants will design and implement instruction that responds to students' cultural and linguistic backgrounds, supports language development, fosters meaningful interaction with peers, and maintains rigorous expectations for disciplinary learning

CIEP 473 Instructional Leadership for Multicultural Schools (3 Credit Hours)
This course focuses on building capacity in schools to promote the learning, development, and achievement of students from diverse linguistic, cultural, and racial backgrounds, particularly framed within the context of a society faced with issues of poverty, discrimination, racism, and sexism. The course probes important topics such as teacher expectations, student identity construction, and utilization of the rich resources that students bring to educational settings from their homes and communities.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Participants will critically analyze their school settings for issues of race, class, culture, language, and gender and then design professional development efforts to promote change with teachers, leaders, families, and communities

CIEP 474 Assessment of Bilingual Students (3 Credit Hours)
This course prepares educators to utilize assessment to inform classroom instruction, specifically focused on authentic assessment of language and content. Targeting educators of bilingual students, the course emphasizes theoretical and practical study of instruments and procedures for assessing culturally and linguistically diverse students. Educators collect data and make instructional decisions based on students' abilities in English and other languages, which involves distinguishing between learning exceptionality and second language acquisition.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
Participants will design and utilize formal and informal methods of evaluation to assess students' social, emotional, cultural, linguistic, and academic development and achievement, including critical analyses of existing assessment tools for validity, reliability, and bias

CIEP 475 Curriculum Workshop (1-3 Credit Hours)
The course is designed to contextualize, introduce and/or deepen the understanding and appropriation of Ignatian/Jesuit Education/Pedagogy for people who are already engaged in it or planning to engage in it. The course is designed as a philosophy of education course emphasizing the philosophical approach and roots of Jesuit Education. The course can also assist people in the field of education that want to know about Ignatian Pedagogy or are looking for ways of recreating their pedagogical practice from the perspective of Jesuit Education. However, the course can also be accommodated to those looking for an applied approach to enrich and improve a specific pedagogical practice. In this case please indicate this intention to the instructor to make the necessary adjustments.

CIEP 476 Research in the Teaching of Literacy (3 Credit Hours)
In this course, students will survey recent research in the field of reading theory, reading instruction, and reading strategies, as well as research related to the reader, children's literature, and effective reading programs that will cover the scope of primary, elementary, middle school, and secondary schools levels of instruction.
Outcomes:
Students will identify an instructional need within the classroom and develop an action research plan that will address that need

CIEP 477 Prevention, Assessment & Intervention: Academic (3 Credit Hours)
Enrollment is restricted to Graduate students in School Psychology. To provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students experiencing academic difficulties. They will utilize and evaluate evidence based interventions and learn to effectively communicate this information orally and in writing to help teachers and parents develop, modify academic intervention plans.
Outcomes:
Candidates will be able to evaluate and utilize appropriate academic interventions and identifying evidence based practices

CIEP 478 Behavioral Intervention: Assessment & Support (3 Credit Hours)
The aim of this course is to familiarize students with the professional literature in consultation and to employ data-based decision-making in the design and delivery of consultative interventions.
Outcomes:
Students will be able to design and evaluate two consultation cases; one at the individual level and the second on a classwide-level

CIEP 479 School-Based Consultation (3 Credit Hours)
This course will provide an overview of the knowledge and skills necessary for school psychologists to engage in consultation, collaborative problem solving, and systems level intervention in educational settings. Course content will focus on the collaborative consultation processes, theory and issues related to these processes, as well as relevant research. Content will include adopting a systems level perspective with change being viewed from a preventative framework. Consultation from a cross-cultural view will also be emphasized. This course will also include the opportunity to observe, practice and evaluate the skills required to engage in school-based collaborative consultative services through applied case work, practice, role play, self-reflection, feedback and class discussion.

CIEP 480 Assessment School-Age Students & Adults (3 Credit Hours)
The emphasis of the course is on assessment skills and interpretation of individual cognitive measures with school-age children and adults.
Outcomes:
Students will be able to demonstrate proficiency in the administration and interpretation of a wide variety of commonly used measures of cognitive functioning

CIEP 481 Prevention, Assessment & Intervention: Early Childhood (3 Credit Hours)
Enrollment is restricted to Graduate Students in the School Psychology program. This course provides insight into the developmental assessment of infants & preschool children, and the planning and development of intervention goals.
Outcomes:
Students will gain proficiency in standardized and authentic assessment of language and social-emotional development, cognitive ability, motor skills, achievement, and adaptive behavior in young children

CIEP 482 Prevention, Assessment & Intervention: Behavior (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course is designed to provide students with an introduction to strategies for promoting positive behavior in the context of instructional environments through the use of applied behavior analysis principles and procedures. Course content includes multiple methods of behavioral assessment linked to intervention planning.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
The students will be able to use strategies for promoting positive behaviors for students in the schools and link their assessments to interventions

CIEP 484 Biological Foundation: Behavior in Schools (3 Credit Hours)
This is a seminar course on cognitive neuropsychological foundations in school psychology. The cognitive neuropsychological basis of educational theories and practices are studied and critically examined. Emphasis is given to current brain research, assessment based on the Cognitive Hypothesis Testing model (Hale & Fiorello, 2004) and resultant neuropsychological process assessment and how medications impact learning, social interactions, and behavioral functioning within the school setting. The course is for nonmedical professionals and provides a basic knowledge of cognitive neuropsychological principles of brain functioning, medications and psychopharmacological treatment.
Outcomes:
Students will demonstrate an understanding of the biological basis for behavior and how these issues relate to academic and behavioral challenges faced in schools

CIEP 485 Prevention, Assessment & Intervention: Social-Emotional (3 Credit Hours)
Enrollment is restricted to graduate students in School Psychology. The students will have an understanding of the theoretical foundations of emotional and behavioral disorders; the diagnostic/eligibility criteria for emotional and behavioral disorders; and the social and emotional assessment instruments and procedures. Students will be introduced to early identification and intervention strategies with regard to social/emotional/behavioral functioning.
Outcomes:
Students will be able to assess and link interventions to help students with social emotional needs in the schools

CIEP 486 Internship: School Psychology (3 Credit Hours)
This course provides university-based supervision for school psychology students completing a nine-month full-time experience conducted in an approved public school setting under a state-approved internship plan.
Outcomes:
Student apply skills in assessing students, consulting with school personnel and parents, counseling students as part of a state-approved internship plan

CIEP 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CIEP 488 Participatory Action Research (PAR) in Schools and Communities (3 Credit Hours)
This course will provide candidates with the knowledge and skills to use participatory action research (PAR) practices and approaches. Candidates will develop theoretical and practical knowledge related to a collaborative approach to research. The theoretical framework situates stakeholders in schools and community organizations as experts in their field and sees collaborative research between institutions of higher learning and schools and communities as an opportunity to authentically address germane problems and issues while promoting shared learning.
Outcomes:
This course emphasizes valuing the epistemic assets that local stakeholders bring to identifying and working toward solutions that benefit their missions and finding ways to bring attention to their work through research and publications

CIEP 489 Intro School-Based Network (3 Credit Hours)
No course description is available

CIEP 496 Educational Evaluation (3 Credit Hours)
This course provides students with an overview of program evaluation, particularly as it relates to the field of education. Throughout the course, students will be able to practice program evaluation. An assumption of this course is that "the pursuit of professional practice in evaluation requires developing a life of the mind for practice" (Schwandt, 2015, p. 143). Evaluation practices include considering the ethical issues surrounding the role of the evaluator, understanding the social and political dynamics of an evaluation context, determining which evaluation approach to use in a given context, identifying the various roles of the evaluator, developing an evaluation plan, generating and collecting data, valuing and making value judgments, and facilitating use of the evaluation.
Course equivalencies: RMTD406 / CIEP496

CIEP 498 Independent Study (1-3 Credit Hours)
In preparation for advanced degree writing and research, candidates will utilize readings, discussions, and appropriate computer applications to interpret, organize, display, and summarize quantitative study results. Course concepts include probability, normal distribution, tests of significance and correlation, simple regression, and multiple regression are among the tests that may be utilized.

CIEP 499 Directed Research (1-3 Credit Hours)
This course is Directed Research. Course Content, Course Objectives and Outcomes are collaboratively constructed with Research Student and Supervising FT SOE Faculty member. The Directed Research Projects are approved by SOE Program Area faculty and SOE Associate Dean of Academic Affairs.

CIEP 500 Child Development and Cognition (3 Credit Hours)
The purpose of this course is to provide students with a graduate level overview of the key theories of development and cognition. Students will learn about critical issues in development and learning that they will encounter and need to deal with working as psychologists in applied settings. Throughout the course students will be asked to analyze, reflect upon, and critique how theories learned may apply, or not, to those learners whose primary culture may be different from the majority through case studies, online discussion boards (or in-class discussions), and a critical analysis of comparative field site visits.

CIEP 501 Exceptional Learner II (3 Credit Hours)
The purpose of this course is to provide in depth understanding of ethical, professional, and collaborative service provision for children with special needs within a multicultural framework.
Outcomes:
Students will understand the current trends in service delivery for students with low incidence/significant disabilities (eg, partial participation, natural proportions) and the need to expand curriculum, instruction, and assessment strategies to meet individual learning styles and instructional needs

CIEP 502 Trauma Sensitive Schools (3 Credit Hours)
Students will explore literature on trauma sensitive schools and the intersection with race and discrimination. They will use Multi-Tiered systems of support to support students at each tier and support staff and families.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 503 Culturally Relevant Literature for Children & Adolescents (3 Credit Hours)
This course introduces participants to texts and classroom materials that authentically portray and reflect the cultural and linguistic diversity of classrooms and communities. The course focuses on analyzing materials for relevance and authenticity, learning about bilingual students through diverse stories, and using culturally relevant texts to support students' learning and development in classrooms.
Outcomes:
Participants will find, select, and utilize culturally relevant and authentic literature to support students' learning and development in culturally and linguistically diverse classrooms

CIEP 504 Applied Linguistics for Teachers (3 Credit Hours)
This course emphasizes the complex and dynamic role of language in teaching and learning, including implications for effective policy and practice in culturally and linguistically diverse classrooms. The course prompts participants to engage in applied linguistics research to solve problems of practice in the teaching of bilingual students.
Outcomes:
Participants will apply in-depth understandings of language acquisition and development to make informed decisions in practice with the goal to support the learning and language development of linguistically diverse students

CIEP 505 Literacy and Numeracy for Principals (3 Credit Hours)
Pre-requisites: ELPS 481; CIEP 442
The purpose of this course is to introduce principal candidates to the foundations of numeracy and literacy development across PK - 12 settings. Included will be a focus on the development of knowledge and skills required to provide leadership in PK - 12.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

CIEP 506 English Language Learning Practicum (3 Credit Hours)
The practicum experience serves to integrate learning from across the Masters program within authentic teaching and learning environments spanning PK-20 settings. The course involves formal observation, support, and evaluation during classroom teaching with bilingual students, guided by specific practicum assignments that center on backward design via data analysis, classroom environment, and instructional units of study.
Outcomes:
Participants will demonstrate competence, effectiveness, and responsiveness in daily classroom practice with bilingual students

CIEP 507 Language Demands and Development in Disciplinary Classrooms (3 Credit Hours)
Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students' language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students' multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students' language development, including contextual features, scaffolds, and procedures.
Outcomes:
Participants will: Describe the role of language(s) in teaching and learning, including how it develops; Distinguish the components of language (eg, phonology, morphology, syntax); Apply knowledge of language components in support of language development; Describe the language functions, features, and domains of disciplinary classrooms; Apply knowledge of language demands to support students' language development; Explain the interplay of home and school languages (eg, metalinguistic awareness); Apply knowledge of metalinguistic awareness in support of language development

CIEP 508 Social Justice for Multilingual Learners (3 Credit Hours)
This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students' diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.
Outcomes:
Participants will: Discern the central and active role of teachers as language policy actors and language decision makers in classrooms, schools, and communities; Reflect upon previous experiences with and perspectives on language learners, language education, and language diversity; Probe the role of language ideologies in institutional practices in education as a means to examine and deconstruct biases and assumptions; Explore the diversity of classrooms, schools, and communities, including cultural, linguistic, familial, academic, social, emotional, behavioral, and sociopolitical factors; Analyze historical and current practices in schools for multilingual students in line with research and theory of supporting and promoting equity for multilingual students; Define personal philosophies and professional goals for teaching multilingual students

CIEP 509 Literacy Teaching for Bilingual & Multilingual Students (3 Credit Hours)
Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level; bilingual or monolingual instructional setting, etc.) educators in this course are supported to move away from a monolingual paradigm in relation to literacy development in order to make strong and effective use of their students' literacy knowledge across languages. Participants will apply new learning to implement strategies (such as contrastive analysis, reading and writing opportunities in both languages, etc.) that supports the development and transference of literacy learning across languages.
Outcomes:
Participants will: Explain the relationships between oral language and literacy development and first and second literacy acquisition; Describe the relationships between literacy development, identity and motivation; Describe the different paths to literacy development specifically in relation to oracy and literacy in another language; Identify the ways in which knowledge of different orthographic systems can be beneficial to learning a new one; Apply knowledge of different orthographic systems to support students' literacy development through teaching strategies such as contrastive analysis; Apply knowledge of bilingualism to support students' literacy development across languages; Design strategies for teaching reading and writing that build on students' linguistic and cultural funds of knowledge; Identify the components of knowledge needed to become literate in another language and distinguish between those aspects of literacy that are common across all languages and those that are unique to certain languages; Create classroom environments and materials that support students' bi- or multilingual literacies and engage them in shared literacy events

CIEP 510 Accessing & Adopting General Education Curriculum (3 Credit Hours)
This course provides a review of standards for K -12 student learning with special emphasis on reading and mathematics.
Outcomes:
The student will be able to Assess the curricular, social-emotional/behavioral needs of students with diverse learning and curriculum needs, and develop pedagogical skills to address those differences

CIEP 511 Development Theory & Disabilities (3 Credit Hours)
The purpose of this course is to study the stages of physical, cognitive, social, and emotional development of infants, toddlers, young children, and adolescents with special attention to the similarities and differences among individuals with and without disabilities. The influence of sensory, cultural, and environmental issues on the developmental needs of children and adolescents will be explored. The Council for Exceptional Children (CEC) Ethical Standards for Special Educators and Teacher Preparation Standards will also be addressed.

CIEP 512 Special Education: The Profession (3 Credit Hours)
The purpose of this course is to examine, test, and clarify the student's commitment and understanding of the teaching profession.
Outcomes:
Students will reflect on their role in the classroom through journaling and sharing

CIEP 513 Ethics & Law for Administrators (3 Credit Hours)
This course will deal in depth with current and timely legal and ethical issues in the education of children with disabilities, diverse learners and other children identified as having additional needs in any area of instruction and development, focusing on the administration of special education services in public schools. The approach to and focus on these topics is designed for candidates seeking endorsement as Illinois State-approved Director of Special Education. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and the provision of a free appropriate public education in the least restrictive environment. The delivery of services to special needs children from early childhood through post-secondary transition will be addressed.
Outcomes:
The course will concentrate on statutory and regulatory compliance; fostering effective and productive relationships among administration, professional personnel, service providers and families in serving students with special needs; and timely, efficient, positive-focused dispute resolution

CIEP 514 Advanced Systems Consultation (3 Credit Hours)
As school psychologists who attend to issues of social justice, we sometimes find ourselves in positions where changes to systems need to be made in order to ensure that students' needs are being met. The purpose of this course is to explore systems change from the role of the school psychologist, including conducting a needs assessment and data-based decision-making, and the role of supervisors within school settings to support P-12 students and the professionals who serve them in evolving schools and districts.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 518 Theories and Practices of Partnerships (3 Credit Hours)
This course explores current issues, literature bases, and practical examples related community-based and practice-oriented partnerships focused on improving learning opportunities for youth, their parents/guardians, and various stakeholders in the community.
Outcomes:
Teachers are vital to the success of the students in their classrooms, but we must recognize that teaching and learning happen across many time and spaces, and are influenced by a multitude of factors, beyond the classroom

CIEP 519 Data-based Decision Making (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. The purpose of this course is for students to gain knowledge in universal behavioral and academic behavior data-based decision-making skills and ways to use these data to make informed curricular and intervention decisions that are of use to schools. The students will be able to use data-based and evidence-based decision-making in working with children and teachers in the schools.

CIEP 520 Doctoral Seminar (1 Credit Hour)
This course will provide doctoral students with an introduction and orientation to the Curriculum and Instruction EdD program as well as an introduction to the dissertation process. This course will focus on the methods and processes involved in developing a prospectus and review of the literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as a prospectus for their dissertation

CIEP 521 Curr Theory & Research with Schools & Communities: Positionalities, Perspectives, & Transformations (3 Credit Hours)
The purpose of this course is to advance students' understanding of contemporary theoretical underpinnings of curriculum. In this course, the curriculum is understood as both the explicit planned course of learning put before students, and the hidden or latent experiences that students encounter in school and community settings. Students become familiar with the theoretical orientation of research on curriculum and to be able to evaluate the worth of research related to curriculum issues.
Outcomes:
Students will pose a problem, a question or a series of questions that would address the problem, collect data to facilitate answering some or all of the questions, analyze the data, and produce a series of reports on the state of their research in school and community settings

CIEP 522 Curriculum Policy Across Schools and Communities (3 Credit Hours)
This course offers a critical examination of the intersections of curriculum politics, policy, and practice in schools and communities. The goal is to increase students' understanding of the complexities of educational policy in practice as a means to assist them in becoming effective leaders and practitioners who influence and implement curricular policy in service of social justice.
Outcomes:
Students will examine historical and current trajectories of curricular policy spanning educational contexts, using various theoretical frameworks to probe how policy layers, locales, and actors influence the design and implementation in practice

CIEP 523 Curriculum Improvement and School-Community Change (3 Credit Hours)
Recognizing that the growth and development of schools and communities are inextricably linked, this course develops candidates' understanding of curriculum and school reform as well as community improvement. It examines historic school reform and contemporary school change models in addition to school-based reform strategies intended to improve teaching and learning in schools. The course further examines contemporary community development strategies such as community organizing, community economic development, and social service approaches in order to grant insights into the role communities play as potential partners in school improvement.
Outcomes:
Students will assess current research on curriculum reform and community development and their implications for improving student learning and achievement in school settings; Students will work with a local community organization or community schools' site in order to gain insights into how school and community organizations partner together to strengthen learning and developmental outcomes

CIEP 524 Privilege, Power, and Possibilities: Teaching for Social Justice in Schools and Communities (3 Credit Hours)
This course examines social justice issues through a critical lens. Readings focus on the role of race, ethnicity, and cultural contexts in the development of curriculum over time. The course emphasizes teaching for social justice through culturally and linguistically responsive and sustainable instructional and assessment practices.
Outcomes:
This course has been designed for graduate students who want to explore frameworks, perspectives, contexts, and strategies that will help them translate social justice in instruction and assessment practices

CIEP 525 Leading for Social Justice in School Psychology (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an overview of individual, school-level, and national perspectives on leadership and systems change in school psychology, with an emphasis on strategies for bringing about socially just changes in schools.
Outcomes:
The intended outcome is the enhanced ability to lead for social justice as a school psychologist

CIEP 526 Assessment Culturally & Linguistically Diverse Populations (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course focuses on the socio-political issues that under-represented groups face in society including the historical misuses of tests in the placement of ethnic minority youth, and current legal and ethical standards for assessment and intervention with under-represented youth.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
To produce school psychologists who are aware of multicultural and diversity issues

CIEP 527 Ethics and Law for School Psychologists (3 Credit Hours)
Enrollment is restricted to Ed.D. Students in School Psychology This course focuses on the ethical standard for school psychologists. Students will explore the connection between the psychologist's vulnerabilities, ethical missteps and the development of ethical resilience.
Outcomes:
Students will identify and resolve ethical dilemmas and ethical violations in the practice of school psychology

CIEP 532 Seminar: Essential Curr Readings (3 Credit Hours)
In this course the students will read and discuss a number of books which have had a major influence on the K-12 curriculum in American schools, with an emphasis on Social Justice.
Outcomes:
The student will understand and apply the lessons of the authors to their own situations; The students will consider the various aspects of social justice in completing assignments and discussing readings

CIEP 533 Proseminar: Educational Psychology/School Psychology (0 Credit Hours)
A required two-semester series of seminars designed for all students pursuing the Ph.D. degree in educational psychology or school psychology which focuses on critical issues in the field and the planning of a colloquium series
Outcomes:
Students will have an enhanced knowledge base of critical topic that drive the school psychology and educational psychology literature

CIEP 535 System Consultation in School Discipline Reform (2 Credit Hours)
Pre-requisites: Degree in Education or Law Related Field
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535
Outcomes:
Students will analyze system level factors and data

CIEP 537 School Discipline Reform: Linking Law Policy and Practice (2 Credit Hours)
Pre-requisites: Degree in Education or Law-Related Field
The course will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice (e.g. racial and special education disparities, juvenile/criminal justice linkages and teacher).
Course equivalencies: CIEP 537 / LAW 686
Outcomes:
Participants will develop a three to five year action plan for school discipline reform

CIEP 540 Seminar Research Curriculum & Instruction (3 Credit Hours)
This course focuses on how current research in curriculum and instruction addresses key curricular questions such as, Does it work? For whom and under what conditions does it work? How does it work? Does a given theory hold?
Outcomes:
Students will be able to: 1) Understand key curricular questions and major areas of research in curriculum and instruction; 2) Evaluate a variety of professional articles and studies in terms of validity, methodology, findings, conclusions, alignment of various components with research question; 3) Synthesize research articles and studies into a coherent and appropriate literature review

CIEP 541 Seminar: Curriculum Issues (3 Credit Hours)
In this course students will study one aspect of current literature in the field of curriculum with intensity.
Outcomes:
Students will be able to apply the current research in an advanced curriculum situation; Students will be cognizant of current areas of curriculum research and be able to find references electronically

CIEP 542 Seminar Theories of Curriculum & Instruction (3 Credit Hours)
This seminar introduces advanced theories and theorists. The process of instruction is applied to a project or problem in an area of the students' choice.

CIEP 543 Seminar School Improvement (3 Credit Hours)
The course focuses on the theories, models, strategies and practices that are germane to school reform.
Outcomes:
The student will understand the dynamics of organizational change, reform, self -organizing systems, and continuous quality improvement

CIEP 544 Prevention, Assessment & Intervention: Advanced Skills (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course will provide students with in-depth hands on introduction to evidence-based cognitive behavioral treatments. The course will also focus on adaptations to match client presentation, ethnicity, culture, and socioeconomic status.
Outcomes:
The course will involve the modeling and practicing treatments such as CBT, which students will learn and demonstrate competently

CIEP 545 Systems Consultation (3 Credit Hours)
This is an advanced course for doctoral level students. The course has two separate but related prongs. First, the students will develop a working understanding of Organizational Development Consultation, demonstrating the skills necessary to perform the role of organization development consultant and in determining when and how to carry out this role.

CIEP 546 School Psychology Advanced Practicum (1-3 Credit Hours)
Enrollment is limited to Doctoral Students in School Psychology The purpose of this course is for students to complete a supervised advanced practicum in a clinical setting that can include schools, clinical or hospital environments.
Outcomes:
Supervised clinical experience in applied school psychology practice

CIEP 547 Clerkship: School & Educational Psychology (0 Credit Hours)
This is a non-credit doctoral level course that provides advanced experience in university teaching, research or direct service to children/adolescents.
Outcomes:
Students will demonstrate proficiency in an advanced area of academic training, based on supervised experience and evaluation by a site supervisor

CIEP 548 Family, School and Community Collaboration (3 Credit Hours)
Enrollment is restricted to students in the Graduate Education program. Blending leading consultation approaches and ecological theory, this course provides an overview of the conceptual frameworks undergirding family/school community collaboration in schools.
Outcomes:
Students who take this course will leave with an enhanced ability to work effectively with families and communities across a wide spectrum of topics and opportunities

CIEP 550 Seminar Educational & School Psychology (3 Credit Hours)
This course is an overview of current topics in school and educational psychology with an emphasis given to the development of a plan for a program of scholarly activity.
Outcomes:
Students will write a research proposal as an entry point for a research program in a particular domain

CIEP 556 Seminar: Problem Solving Thinking & Creativity (3 Credit Hours)
This course focuses on the knowledge base related to human problem-solving, thinking and creating through the presentation of a variety of approaches as they relate to instructional design.
Outcomes:
Students will demonstrate an advanced theoretical understanding of current models of human problem-solving, thinking and creativity along with an understanding of how these approaches drive instructional interventions

CIEP 557 Seminar Learning Theory & Teaching (3 Credit Hours)
This course focuses on the analysis of advanced readings in behavioral and cognitive instructional technology.
Outcomes:
Students will have an enhanced ability critically examine the literature in behavioral and cognitive instructional technology

CIEP 558 Seminar Theories of Intelligence (3 Credit Hours)
No course description is available

CIEP 559 Seminar Theories of Learning (3 Credit Hours)
This course connects current learning theories with curriculum development, instruction, and assessment practices in the schools. Candidates examine school-based implications of theory and research in such areas as multiple intelligences, developmental stages, and ethical/moral development. This course is neither a methods course (focused on developing a repertoire of teaching and learning activities) nor an educational psychology course (focused on applying experimental research to instruction). It is a seminar in which students read the work of current theorists and practitioners in human learning and explore how knowledge of current of current research can impact educational decisions and instructional practice.

CIEP 561 Practicum in Curriculum (3 Credit Hours)
This practicum is intended to help students integrate theoretical and research coursework with practice and to reflect on their own development as researchers and practitioners. Students are encouraged to reflect on their experiences in their programs and use this to examine how they have changed as researchers, practitioners, and people. This course format is hybrid and seminar based, meaning course activities will occur both as a class, and one on one with the instructor. Practicum/seminar meetings will help further develop students' personal and professional philosophy and vision that guide their work as a researcher and practitioner.

CIEP 562 Student Teaching-Graduate Level (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 563 Graduate Special Education-Student Teaching (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 564 Student Teaching Graduate (1-3 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 571 School Discipline Workshop: Anti-Racism (0 Credit Hours)
As part of the Restorative Justice course, you must participate in an intensive on-campus weekend seminar on equity, anti-racism, and restorative justice. This seminar offers you the opportunity to network with other professionals and engage in exercises and skills-building related to the core principles and practices of restorative justice.
Outcomes:
Apply the principles of restorative practices to address challenges your school or district is facing; Develop an action plan to implement prevention-oriented alternatives to exclusionary school discipline practices in your respective setting

CIEP 586 Doctoral Internship: School Psychology (1 Credit Hour)
In collaboration with ISPIC and APPIC, the student will complete an advanced doctoral level 12 month supervised internship of 2000 hours.
Outcomes:
Students will follow a prescribed doctoral level internship plan to show advanced competencies as a school psychologist under the direction of a licensed clinical psychologist and certified school psychologist

CIEP 590 School Psychology - Supervision (0 Credit Hours)
The purpose of this course is to provide supervised teaching or field based experiences to SPYCH GRAD students. Students will learn to apply essential skills effectively to serve children in a school based setting.
Outcomes:
Develop specific school-based skills, competencies and points of views needed by professionals in the field of School Psychology

CIEP 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CIEP 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CIEP 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CIEP 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal.

CIEP 620 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of school discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies.
Course equivalencies: X-CIEP 620/LAW 683
Outcomes:
Develop a solid understanding of the fundamental legal principles and law that guide school discipline practices in public elementary and secondary schools, including constitutional law, federal and state statutory law and administrative regulations, and case law; Enhance understanding of the policy concerns that have arisen regarding school discipline practices and develop knowledge of alternative approaches

CIEP 625 Restorative Justice in Schools (2 Credit Hours)
This course begins with an immersion experience where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the immersion and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, connections between racial and restorative justice, and systems and structures to accommodate restorative practice within school life. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.
Outcomes:
Distinguish between restorative and punitive motivations, techniques, strategies, and outcomes; Define a restorative mindset within a trauma framework by explaining the components of repairing harm between individuals and within communities; Plan, facilitate, and reflect on proactive and responsive circles (including those focused on: community building, healing, understanding, peace and mediation, celebration); Plan, facilitate, and reflect on effective restorative conversations; Plan, facilitate, and reflect on generating effective restorative consequences through a restorative conversation; Describe the connection between anti-racism and racial justice with principles of Restorative Justice; Identify systems, structures, and stakeholders to support the implementation of restorative justice principles to achieve school or district wide culture change

Educational Leadership & Policy Studies (ELPS)

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 401 Documentary Research in Education (3 Credit Hours)
Documentary research in the field of education introduces graduate students to archival research and addresses issues related to the role and use of documents and public and private records.
Course equivalencies: RMTD401 / ELPS401

ELPS 402 Mission and Catholic School Leadership (3 Credit Hours)
This course explores how mission must be central to leadership and how all activities must align with that mission. Students will explore inputs, transformation processes and outputs as they relate to Catholic Ed leadership and school improvement.
Course equivalencies: RMTD402 / ELPS402

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 411 Special Education in the Catholic School (3 Credit Hours)
This course will examine moral and practical foundations of developing special education programs with the Catholic schools setting. This course will also explore the connection between Church documents and serving students with disabilities in This course is restricted to those enrolled in the Leading Inclusive Catholic Schools

ELPS 412 Urban Education Policy (3 Credit Hours)
This course uses a range of theoretical perspectives, theories and empirical research to analyze urban education policy. This course explores urban schools' and urban educational policy's evolution in response to changes in U.S. cities, urban teaching and school governance, and contemporary educational policies that are prevalent in urban school districts.
Outcomes:
1) Improved ability to critically evaluate ideas, arguments, and points of view regarding urban education policy; 2) Expanded knowledge of contemporary events, issues, movements and policies in urban education settings

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural and social factors that helped to shape educational policy and schooling in the United States.
Course equivalencies: X-ELPS444/HIST454
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 445 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

ELPS 446 Historical Foundations of Western Education and Social Policy (3 Credit Hours)
This course examines the development of Western education through an examination of changing concepts of what it means to be an educated person and the intellectual movements and socio-cultural contexts within which such notions have emerged.
Course equivalencies: X-ELPS446/HIST437
Outcomes:
Students will be able to demonstrate a historical understanding of the development of Western education

ELPS 447 History of Modern European Education (3 Credit Hours)
An examination of the development of national systems of education across Europe since the nineteenth century and an analysis of the development of cross-European educational initiatives in the context of the European Union.
Course equivalencies: X-ELPS447/HIST438
Outcomes:
Students will be able to demonstrate a historical understanding of the development of nationally specific and regionally focused educational policies and schooling systems

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding the Jesuit Jesus: Preparing for Prof. Life - Living Spiritual Exercises of St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership such as: Instructional Leadership, Equity and Justice; Collective Bargaining; Research in Educational Leadership; Instructional Leadership, Cultural Context for Informed Decision Making; The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 502 Fundamentals in College Teaching and Course Design (3 Credit Hours)
Students will assess their experiences in the IHE program based on the tenets of the Jesuit Examen. Students will write a culminating final capstone paper which they will present at a School of Education mini-conference. Students will write a final culminating paper that identifies experiences, people, and places in the program that have impacted them personally and professionally; Students will analyze their successes, failures, and mediocrity as students in the program and articulate the major takeaways from their learning.
Outcomes:
Students will reflect upon their IHE program experience utilizing the principles of the Jesuit Examen

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 510 Seminar in the Sociology of Education (3 Credit Hours)
This course is an advanced seminar that will focus on a specific topic in education that incorporates sociological perspectives and research literature. Students will read in depth on the course topic (reading both theoretical literature and case material), will develop their understanding of texts and the topic through intensive seminar discussion, and will conduct independent research leading to a thorough literature review or empirically-based research paper on a topic related to the course theme.
Outcomes:
Students who complete this course will greatly expand their familiarity with and command of research literature, theory and contemporary cases related to the course theme

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 540 Seminar in the History of Education (3 Credit Hours)
Pre-requisites: Previous history of education coursework, or permission of instructor
An in-depth examination of a selected topic or area of research in the history of education.
Course equivalencies: X-ELPS540/HIST560
Outcomes:
Student develops an advanced understanding of the seminar topic, knowledge of the scholarly literature on it, and the methods of historical inquiry that can be used to study it

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 555 Seminar Comparative Education (3 Credit Hours)
In-depth, cross-national analysis of a special topic in Comparative Education. As topics change, ELPS 555 is repeatable as long as a repeat is not on a topic covered previously.
Outcomes:
Students will demonstrate a sound grasp of the social, economic, and political forces shaping educational systems as they relate to the topic

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Doctoral Students in Administration and Supervision (4 Credit Hours)
A non-credit series of seminars taken over the two consecutive semesters to address the interests and needs of students during their doctoral residency. The topics include preparation for the comprehensive examination, planning and writing the dissertation and other topics planned by the students and faculty.
Outcomes:
Students will be able to demonstrate understanding of the various seminar topics presented

ELPS 595 Thesis Supervision (0 Credit Hours)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (0 Credit Hours)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 605 Master's Study (0 Credit Hours)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (0 Credit Hours)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Research Methods (RMTD)

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 401 Discourse Analysis and Documentary Research (3 Credit Hours)
This research methods course will examine a number of different discourse analysis techniques. It will also prepare students to conduct historical documentary research, all with a special emphasis on how these methods can be applied to educational research and policy analysis projects.
Course equivalencies: RMTD401 / ELPS401
Outcomes:
Students in the course will be able to critically evaluate the diverse range of approaches used to analyze discourse and conduct educational research using documentary sources

RMTD 402 Comparative Analysis (3 Credit Hours)
No course description is available
Course equivalencies: RMTD402 / ELPS402

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 405 Qualitative Research (3 Credit Hours)
This course explores the discipline and practice of qualitative research through the examination of various theories, genres and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to recognize and discuss theories and components of qualitative research, to analyze various qualitative studies in terms of design, validity and meaning orally an in written critiques, to conceptualize, design and write a proposal for a small qualitative study, to collect, code and analyze data appropriate to a qualitative study, and to write up a small qualitative study including conceptual framework, research question, methods and collected data

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence With Quantitative Methods (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Teaching, Learning & Leading (TLSC)

TLSC 400A Professional Learning Communities (0 Credit Hours)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners' discussing and making meaning of all learning and experiences in schools and communities.
Outcomes:
Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions

TLSC 400B Professional Learning Communities (1 Credit Hour)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners' discussing and making meaning of all learning and experiences in schools and communities.
Outcomes:
Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions

TLSC 401 Language, Learning & Development Theories in Practice (2 Credit Hours)
Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.
Outcomes:
Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 402 Community Immersion (1 Credit Hour)
This module is designed to engage teacher candidates in an authentic exploration of the inherent relationship between schools and the surrounding community. Teacher candidates are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities.
Outcomes:
Teacher candidates will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 403 Teaching for Social Justice and Equity (3 Credit Hours)
This module targets candidates' understandings of the School of Education's mission of professionalism in service of social justice, the core tenets of culturally responsive pedagogy, and the applications via backwards design and Universal Design for Learning. Candidates will explore their own identities as future teachers and consider how teachers' identities and experiences transfer into and influence instructional practice with students.
Outcomes:
Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc

TLSC 404 Constructive Learning Environments for Diverse Students (3 Credit Hours)
This module is designed for candidates to discern and utilize students' needs and design classroom environment and instruction to support learning and development. In this module, candidates hone knowledge and skills for working with students with special needs, specifically taking the lens on social, emotional, and behavioral needs.
Outcomes:
Candidates will demonstrate learning through the completion of a functional behavioral analysis (FBA) of one student within the specific environmental and instructional classroom context

TLSC 405 Analyzing Culturally Responsive Classroom Instruction (3 Credit Hours)
This module builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning.
Outcomes:
Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching

TLSC 406 Educational Policy for Diverse Students (3 Credit Hours)
This module specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs).
Outcomes:
Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 407 Individualized Assessment and Instruction for Diverse Students (3 Credit Hours)
This module is specifically designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural, and linguistic. Through the use of case study research to conduct individualized assessments with diverse students, candidates will be able to apply learning to the instructional context with culturally, linguistically, and cognitively diverse students, specifically working with a labeled English language learner (ELL) and a student with special needs.
Outcomes:
Through the use of case study research to collect individualized, authentic language and literacy assessments, candidates will apply learning through work a labeled English learner

TLSC 410 Language, Culture and Pedagogy in Bilingual Classrooms (3 Credit Hours)
This module deals with bilingual education, schools, classrooms and learners with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism.
Outcomes:
Candidates will engage with parents, families and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities

TLSC 420 Teaching Mathematics in Elementary Grade Classrooms (2 Credit Hours)
This module introduces teacher candidates (students) to developmentally appropriate instruction in mathematics in the elementary grades and how to use assessment data to inform instruction.
Outcomes:
Teacher candidates will develop, teach, and reflect upon mathematics instruction that develops conceptual understanding, targets the use of Specialized Content Knowledge, guides student problem solving through extended response questions, builds mathematical knowledge, strategies and explanation

TLSC 421 Teaching Science in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate Education Students Only
This module introduces candidates to the discipline of science, providing them experiences engaging in the teaching and learning of elementary science, and specifically works to help candidates integrate literacy into their science instruction. Candidates develop knowledge and skills needed to teach science through an inquiry approach and integrate literacy into their science teaching.
Outcomes:
Candidates will set and work towards professional development goals related to science content, science pedagogy, and science assessment; They will compile a portfolio of evidence to show they have worked towards their goals and reflect on how their understanding of science teaching and learning has shifted throughout the module

TLSC 422 Teaching Social Studies in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate School of Education Student Only
This module introduces candidates to the disciplines of the social studies, providing them experience in the teaching and learning of elementary social studies, and specifically helps candidates integrate literacy into their social studies instruction. Candidates develop knowledge and skills needed to teach social studies through an inquiry approach and integrate literacy into their social studies teaching.
Outcomes:
Teacher candidates will develop and implement an interdisciplinary social studies unit over the course of the module and will develop an essay of demonstrating their understanding of role social studies plays in the elementary school curriculum

TLSC 423 Foundations of Teaching Literacy (2 Credit Hours)
The purpose of this graduate foundations course is to provide pre-service teacher candidates with a solid foundation for effective literacy instruction in elementary and middle grade classrooms. Special emphasis will be placed on the major five elements of reading: phonemic awareness, phonics, vocabulary, fluency, and comprehension.
Outcomes:
Teacher candidates will develop the knowledge and skills base required for effective core curriculum based literacy instruction

TLSC 425 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 426 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.
Outcomes:
Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 430 Typical and A-Typical Development (2 Credit Hours)
This module further develops and deepens candidates' understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 431 Significant Disabilities and Life Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates will apply information related to students with significant support needs within individualize education plans

TLSC 432 Assistive and Adaptive Technology (2 Credit Hours)
This module further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 433 Transition Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 440 Language and Literacy (3 Credit Hours)
This module introduces candidates to the foundational knowledge for effective literacy instruction, including phonemic awareness, phonics, vocabulary, fluency, and comprehension. Candidates develop the knowledge and skills required for core curriculum based literacy instruction, then apply these skills and knowledge while designing and teaching lessons focused on supporting linguistically diverse students language and literacy development through the use of research based literacy strategies.
Outcomes:
Teacher candidates will learn to design and teach lessons, focusing on standard-based reading skills to linguistically diverse students through use of research based reading strategies

TLSC 441 Using Classroom Data in a Collaborative Environment (1 Credit Hour)
This module develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs.
Outcomes:
Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 442 Disciplinary Literacy (3 Credit Hours)
This module supports candidates in developing their knowledge and skills related to literacy in discipline specific contexts, with an emphasis on culturally responsive texts, evidence based strategies, data based decision making skills, and new literacies to target all students' literacy needs, including those with linguistically diverse backgrounds. Additionally, teacher candidates will collect, represent, and analyze classroom data, and use this analysis to adjust literacy instruction for students, as well as target individual students' needs. Teacher candidates will design and teach disciplinary literacy lessons using data based decision making, as well as technology during lesson delivery.
Outcomes:
Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts; They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery

TLSC 443 Adolescent Literacy Instruction (3 Credit Hours)
This course focuses on developing effective instructional practices that promote the ongoing development of adolescent literac(ies) including essential reading skills, critical literacy skills, multimodal literacy skills, and disciplinary literacy skills. Foundational in the premise that all adolescents have and can develop a variety of literacies that facilitate reading the word to read the world, teacher candidates will develop a repertoire of strategies for building essential reading skills and developing academic language informed by CCSS and WIDA standards. They will also learn how to bring together their content knowledge, understandings of academic language and literacy, criticality, and the importance of using multimodal texts to create lessons that address the needs of all learners, including emerging bilinguals.
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity)

TLSC 450 Teaching and Learning in an Area of Specialization (3 Credit Hours)
This module further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.
Outcomes:
Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 451 Teaching and Learning with a Global Framework (3 Credit Hours)
Teacher candidates will work with PreK-12 teachers to develop and implement a trans-disciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates for teaching in schools that offer an International Baccalaureate program.
Outcomes:
Teacher candidates assess their instruction using a global framework in this module and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 455 Secondary Content Methods: Curriculum, Instruction and Assessment in Secondary Content Areas (6 Credit Hours)
This 6-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas.
Outcomes:
This course module focuses on current bodies of knowledge in the field of Science Education; Candidates must demonstrate understanding of A Framework for K-12 Science Education and the Next Generation Science Standards], as well as current literature; They will also critically evaluate curriculum, instructional and assessment practices in a variety of diverse classroom and community settings, with a focus on equity

TLSC 456 Language & Literacy in the Secondary Content Area (3 Credit Hours)
This 3-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas - language and Literacy.

TLSC 460 Developing Rigorous and Relevant Instruction and Assessment (2 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 461 Designing and Implementing Rigorous and Relevant Instruction (3 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 470 Student Teaching for Change (7 Credit Hours)
This module represents the candidate's full-time student teaching experience. It serves as the culmination of candidate's full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 470A Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates full-time student teaching experience. It serves as the culmination of candidates full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete part of the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter

TLSC 470B Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates' full-time student teaching experience. It serves as the culmination of candidates' full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 471 Curriculum Processes in the IB Primary Years Programme (3 Credit Hours)
This course focuses on developing an understanding of the International Baccalaureate Organization and its curriculum with a particular focus on the Primary Years Programme.
Outcomes:
Candidates will create a presentation focusing on how the PYP curriculum supports and promotes aspects of the International Baccalaureate learner profile

TLSC 472 Teaching and Learning in the IB Primary Years Programme (3 Credit Hours)
This course focuses on unit and lesson planning within the International Baccalaureate Primary Years Programme curriculum.
Outcomes:
Candidates will be able to design and carry out transdisciplinary global instruction for diverse learners

TLSC 473 Assessment and Learning in the IB Primary Years Programme (3 Credit Hours)
Pre-requisites: TLSC 471 & 472
In this course, candidates examine a PYP unit and the summative assessment used to assess students' understanding of the central idea and PYP essential elements.
Outcomes:
Candidates will develop an assessment plan using the PYP unit planner

TLSC 474 Professional Learning IB Primary Years Programme (1 Credit Hour)
Pre-requisites: TLSC 471 & 472
In this course, candidates implement an IB Impact on Student Learning project in which they implement a PYP unit.
Outcomes:
Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results

TLSC 475 Curriculum Processes in the IB Middle Years Programme (3 Credit Hours)
This course focuses on developing an understanding of the International Baccalaureate Organization and its curriculum with a particular focus on the Middle Years Programme.
Outcomes:
Candidates will create a presentation focusing on how the MYP curriculum supports and promotes aspects of the International Baccalaureate learner profile

TLSC 476 Teaching and Learning in the IB Middle Years Programme (3 Credit Hours)
This course focuses on unit and lesson planning within the International Baccalaureate Middle Years Programme curriculum.
Outcomes:
Candidates will be able to design interdisciplinary global instruction for diverse learners

TLSC 477 Assessment in the IB Middle Years Programme (3 Credit Hours)
In this course, candidates analyze the MYP community project and the MYP personal project. Candidates become familiar with the DP Theory of Knowledge, Creativity, Arts & Service, and the extended essay.
Outcomes:
Candidates develop an assessment plan using the MYP unit planner

TLSC 478 Professional Learning IB Middle Years Programme (1 Credit Hour)
Pre-requisites: TLSC 475 and TLSC 476
In this course, candidates conduct an IB Impact on Student Learning project in which they implement the MYP unit designed in TLSC 476 and TLSC 477. Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results.

TLSC 480 Teaching for Change Field Seminar (1 Credit Hour)
This module introduces teacher candidates' to learning and development through observation, investigation, and analysis of teaching practice and student learning in secondary-level classrooms. Candidates will complete a classroom profile assignment and develop a related action plan for enhancing a constructive classroom environment. Recognize the role of choice, motivation, and scaffolded support in creating a low-risk and positive social environment; (5F) Identify significant components of healthy learning environments (e.g., where students, teachers, and families feel safe, mutual respect, connected, and demonstrate high levels of self- efficacy). (4A, 4E) (IB)
Outcomes:
EU7K7 - Summarize the connection between teacher expectations and attitudes and student academic achievement, inclusion, and excellence; (3H)

Catholic Principal Preparation Program (MEd)

Central to the mission of the Church is the work of Catholic schools. The National Standards and Benchmarks for Effective Catholic Elementary and Secondary Catholic Schools (NSBECS) state that "An excellent Catholic school has a qualified leader/leadership team empowered by the governing body to realize and implement the school's mission and vision." The need for well-prepared leaders for Catholic schools is documented in numerous arenas as well as the challenges that face these leaders.

The Loyola University Chicago (LUC) Catholic Principal Preparation Program is...

- designed to prepare future principals to meet the complex challenges of leading today's Catholic schools.
- uniquely designed to ensure each principal candidate becomes a mission-driven, faith-based instructional leader within the Catholic School context.

There is an out of state disclaimer regarding licensure for those students who do not reside in nor work in Illinois.

The Unique Coaching Model

This coaching model is based on the foundation of a "support team" to ensure candidates have the breadth of experiences to be able to lead. The support team is comprised of the candidate, the university faculty supervisor, the coordinator of coaches, the internship mentor principal, and the internship coach. The internship coach is a veteran Catholic school administrator with a proven record for leading effective Catholic schools.

Features of the Program

- Focused in-depth coursework with coaching and immediate application for transforming Catholic schools to create increased student outcomes within a faith-based context.
- Program designed by Loyola's School of Education and community partners to ensure that all candidates acquire a solid foundation to be a Catholic school principal who is a mission-driven, faith-based instructional leader.
- Optional two-week summer course at Loyola University's Rome campus to develop global leadership perspectives.

Curriculum

A two-year program (including Summers) that leads to a Master's Degree in Administration & Supervision and Illinois Principal Licensure eligibility, course work will focus on the unique aspects of the principalship of Catholic schools. There are eleven courses (33 semester credit hours) total with 2 one-semester internships and 9 classes of coursework with embedded field experiences and assignments. Courses will focus on instructional leadership, enrollment management, marketing and development. Catholic Identity is infused throughout the coursework.

Courses

Code	Title	Hours
Required Courses		
ELPS 406	Foundations Using Data for Continuous Improvement	3
ELPS 407	Leading for Data-based Decision Making	3
ELPS 408	Leading for Diversity	3
ELPS 471	MTSS for Instructional Leaders	3
ELPS 474	Curriculum Development for Instructional Leaders	3
ELPS 481	Mission Driven Leadership for Principals	3
ELPS 482	School Supervision for Principals	3
ELPS 484	School Law, Policy Formation, and Community Involvement	3
ELPS 483	Human and Fiscal Resource for Principals	3
Required Internship Courses		
ELPS 566	Principal Internship One	3
ELPS 567	Principal Internship Two	3
Total Hours		**33**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
ELPS 481	Mission Driven Leadership for Principals	3
ELPS 482	School Supervision for Principals	3
	Hours	**6**
Spring		
ELPS 471	MTSS for Instructional Leaders	3
ELPS 474	Curriculum Development for Instructional Leaders	3
	Hours	**6**
Summer		
ELPS 483	Human and Fiscal Resource for Principals	3

ELPS 484	School Law, Policy Formation, and Community Involvement	3
	Hours	**6**
Year 2		
Fall		
ELPS 406	Foundations Using Data for Continuous Improvement	3
ELPS 566	Principal Internship One	3
	Hours	**6**
Spring		
ELPS 407	Leading for Data-based Decision Making	3
ELPS 567	Principal Internship Two	3
	Hours	**6**
Summer		
ELPS 408	Leading for Diversity	3
	Hours	**3**
	Total Hours	**33**

Continuous Enrollments

Master's students in administration and supervision are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion, principal candidates will ...

- possess the knowledge, skills, and dispositions to be highly effective principals to promote the spiritual, academic and social-emotional growth of their students.

Catholic School Leadership (MEd)

Central to the mission of the Church is the work of Catholic schools. The National Standards and Benchmarks for Effective Catholic Elementary and Secondary Catholic Schools (NSBECS) state that "An excellent Catholic school has a qualified leader/leadership team empowered by the governing body to realize and implement the school's mission and vision." The need for well-prepared leaders for Catholic schools is documented in numerous arenas as well as the challenges that face these leaders.

The Loyola University Chicago (LUC) Catholic Principal Preparation Program is...

- designed to prepare future principals to meet the complex challenges of leading today's Catholic schools.
- uniquely designed to ensure each principal candidate becomes a mission-driven, faith-based instructional leader within the Catholic School context.

There is an out of state disclaimer regarding licensure for those students who do not reside in nor work in Illinois.

THE UNIQUE COACHING MODEL

This coaching model is based on the foundation of a "support team" to ensure candidates have the breadth of experiences to be able to lead. The support team is comprised of the candidate, the university faculty supervisor, the coordinator of coaches, the internship mentor principal, and the internship coach. The internship coach is a veteran Catholic school administrator with a proven record for leading effective Catholic schools.

FEATURES OF THE PROGRAM

- Focused in-depth coursework with coaching and immediate application for transforming Catholic schools to create increased student outcomes within a faith-based context.
- Program designed by Loyola's School of Education and community partners to ensure that all candidates acquire a solid foundation to be a Catholic school principal who is a mission-driven, faith-based instructional leader.
- Optional two-week summer course at Loyola University's Rome campus to develop global leadership perspectives.

Curriculum

Two-year program including Summers that leads to a Master's Degree in Educational Leadership and Illinois Principal Licensure eligibility, course work will focus on the unique aspects of the principalship of Catholic schools. A total of eleven courses (33 semester credit hours) with 2 one-semester internships and 9 classes of coursework with embedded field experiences and assignments. Courses will focus on instructional leadership, enrollment management, marketing and development. Catholic Identity is infused throughout the coursework.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
ELPS 481	Mission Driven Leadership for Principals	3
ELPS 482	School Supervision for Principals	3
	Hours	**6**
Spring		
ELPS 471	MTSS for Instructional Leaders	3
ELPS 474	Curriculum Development for Instructional Leaders	3
	Hours	**6**
Summer		
ELPS 483	Human and Fiscal Resource for Principals	3
ELPS 484	School Law, Policy Formation, and Community Involvement	3
	Hours	**6**
Year 2		
Fall		
ELPS 406	Foundations Using Data for Continuous Improvement	3
ELPS 566	Principal Internship One	3
	Hours	**6**
Spring		
ELPS 407	Leading for Data-based Decision Making	3
ELPS 567	Principal Internship Two	3
	Hours	**6**
Summer		
ELPS 408	Leading for Diversity	3
	Hours	**3**
	Total Hours	**33**

Continuous Enrollments

Master's students in administration and supervision are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the program, graduates will demonstrate the knowledge, skills and dispositions to be highly effective Catholic school leaders, promoting the spiritual, academic and social-emotional growth of their students.

Clinical Mental Health Counseling (EdS)

The education field needs professionals who can meet client concerns from diverse cultural perspectives. The EdS degree in Clinical Mental Health Counseling prepares professionals who are knowledgeable about cultural influences on human development.

As of Fall 2023, students who wish to pursue this degree should apply to the M.Ed. in Community Counseling (https://catalog.luc.edu/graduate-professional/education/community-counseling-med/).

Curriculum

Completion of the EdS degree program requires 60 semester hours of graduate study focused in two major areas: (1) counseling core and (2) specialty area. This includes 1,000 clock hours of practicum and internship experience (taken for nine semester hours of credit). Students must also take and pass a written comprehensive examination during their final semester of study. There is no thesis requirement.

For more information about the following items, please refer to the Counseling Student Handbook 2022-2023 (https://www.luc.edu/media/lucedu/education/pdfs/2022.MASTERSHANDBOOK.CPSY.pdf)

Comprehensive Assessment

Comprehensive proctored examination is required. See program handbook for details. Comprehensive examination deadlines for the Spring Exam is December 1. See School of Education Academic Calendar for comprehensive exam dates.

Licensure

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

The curriculum of the EdS program meets current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The EdS may meet requirements for states whose licensure requires 60 hours.

The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam may be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are must consult the professional regulation boards of other states to determine the appropriate course work required. Students should also stay apprised of licensure requirements throughout the program.

Practicum Sites

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain APA-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at 312.915.6378

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Understand the knowledge bases of the counseling professions.
- Capable of applying the knowledge base of their disciplines in an ethical, reflective, and culturally-responsive manner.
- Evaluate research, appreciate the contribution of empirical inquiry to the solution of applied problems, and apply research findings to their practices.
- Knowledgeable of the social-cultural contexts of human development.
- Evaluate the outcomes of their interventions with empirically sound methods
- Participate in continuing professional education and supervision in their future professional lives and who involve themselves in activities of their professional associations.
- Committed to social justice in scientific and practice settings.

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

Community Counseling (MEd)

The education field needs professionals who can meet client concerns from diverse cultural perspectives. The MEd in Community Counseling prepares professionals who are knowledgeable about cultural influences on human development.

Curriculum

Completion of the MEd degree program requires 60 semester hours of graduate study focused in two major areas: counseling core and a specialty area. This includes 700 clock hours of practicum and internship experience (taken for six semester hours of credit). Students must also take and pass a comprehensive examination during their final semester of study. Students have five years from acceptance to complete the program.

For more information about the following items, please refer to the Counseling Program Handbook (https://www.luc.edu/media/lucedu/education/pdfs/2021.MASTERSHANDBOOK.CPSY.pdf)

Students should present transcript evidence of successful completion ("B" or better) of an introductory statistics course or its equivalent. Ideally, students will have completed this course prior to the start of the program.

This program meets Illinois requirements for LPC/LCPC (counseling compact included).

Track Course #5		3
	Hours	**6**
	Total Hours	**60**

Program Length

Full-time students complete the program in two years, including at least one summer. Part-time study is also available.

Continuous Enrollments

MEd students in Community Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Comprehensive Assessment

A proctored examination is required. See program handbook for details. Comprehensive examination application deadlines are as follows (see the School of Education Academic Calendar for comprehensive exam dates)

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards prior to enrolling at Loyola to determine the appropriate coursework required. Students should also stay apprised of licensure requirements throughout the program.

Practicum Sites

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training, but through site selection can begin to acquire population-specific competencies

in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain American Psychological Association-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at (312) 915-6378.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Understand the knowledge bases of the counseling professions.
- Capable of applying the knowledge base of their disciplines in an ethical, reflective, and culturally-responsive manner.
- Evaluate research, appreciate the contribution of empirical inquiry to the solution of applied problems, and apply research findings to their practices.
- Knowledgeable of the social-cultural contexts of human development.
- Evaluate the outcomes of their interventions with empirically sound methods
- Participate in continuing professional education and supervision in their future professional lives and who involve themselves in activities of their professional associations.
- Committed to social justice in scientific and practice settings.

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

Curriculum and Pedagogy in Higher Education Certificate

The Certificate in Curriculum and Pedagogy in Higher Education is designed for higher education instructors who want to improve their pedagogical practice as well as those with future plans to teach in institutions of higher education. The program is completely online, allowing students to complete their coursework from anywhere around the world.

You'll be prepared to effectively teach adult learners in the post-secondary student populations. This certificate develops pedagogical and curricular skills based on the Jesuit principles of context, experience, reflection, action, and evaluation. This is the only Jesuit institution to offer such a certificate.

By engaging in reflective, action-oriented classrooms with a focus on social justice – we prepare visionary graduates to make a difference in their worlds through the implementation of socially just pedagogical practices.

Curriculum

The program consists of four required core courses along with a final capstone project. All of following coursework is completed fully online.

Core Courses

Code	Title	Hours
ELPS 430	Curriculum and Pedagogy in Higher Education	3
ELPS 432	Multiculturalism for Social Justice in Higher Education	3
ELPS 433	Student Development in Higher Education	3
ELPS 502	Fundamentals in College Teaching and Course Design	3
Total Hours		**12**

Final Capstone Project

Students must also complete the final capstone project that will:

- Identify the experiences, people, and places in the program that have impacted them personally and professionally
- Analyze their program experiences and articulate the major takeaways from their learning
- Examine, apply, and address the impact of the certificate program on their practice as a social justice educator

Students must complete the final capstone project in conjunction with the last required course they take in consultation with Dr. Valerie Roberson (Program Chair).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

- Provide the tools to effectively teach future global and local leaders and influencers
- Learning undergirded by the Jesuit tenet of cura personalis, care for the whole person
- Gain an understanding of the ways in which the strengths, challenges, and issues that adult learners face impact teaching and learning
- Develop pedagogical and curricular skills based in Ignatian pedagogical principles
- Develop skills in effectively working with diverse adult learners

Curriculum, Culture, and Communities (EdD)

The EdD in Curriculum, Culture, and Communities (3Cs) is designed within a social justice framework across schools and communities to prepare educators, community organizers, faith-based leaders, nonprofit leaders, and others to take on new challenges as socially-just educators and researchers in institutions of higher education, schools, and communities. The targeted audience of the program will be:

- Current teachers
- Those seeking positions in preparing future teachers in the university (teacher educators)
- Non-profit organization leaders and educators (CSI resource coordinators, stakeholders, community activists)
- Faith-based organization leaders and educators (including priests, pastors, sisters, and other laypeople)
- Professions that involve education and professional development in their organizations (medical professionals, social work, legal, law enforcement, environmental studies, etc.)
- University staff/professionals

Enduring Understandings & Program Outcomes

MEd & EdD in 3Cs is founded upon six enduring understandings (EUs)

EU1: Theories and Practices about Curriculum, Pedagogy, and Policy

Students will develop understandings of curriculum, pedagogy, and policy and apply knowledge on transformative curriculum and pedagogy for innovative policy in the local, state, national, and international educational contexts to advocate with and for students, families, and communities.

EU2: Ecology of Communities

Students will understand that effective educators comprehend the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as well as relationships, practices, and systems. Further, students will understand that effective educators seek to engage multiple stakeholders toward creating that promote equity and social justice of society's most vulnerable groups.

EU3: Research, Evaluation & Change Practices

Students will understand and use appropriate and rigorous research methods (e.g., qualitative, mixed, quantitative) and research types (e.g., basic, action, evaluation) to investigate critical questions that contribute to the development and improvement in instructional practices, transformative curriculum, and the improvement of relationships across school, community and university settings. Emphasis will be placed on the use of participatory and collaborative research approaches.

EU4: Critical perspectives on Language, Culture, and Literacy

Students will understand and apply an approach to language and literacy that is heteroglossic, a view of language and literacy as dynamic, and an understanding of the acquisition of language and literacy as a process that occurs within and is influenced by cultural systems and structures including (but not limited to) those of the family, the school, and the surrounding community.

EU 5: Collaboration and Partnership

Students will understand that effective teaching and learning is situated in local and globalized communities and incorporates assets of students, families, and broader communities into learning. Students will understand that transformative learning engages in collaborative, mutually beneficial, and sustainable relationships among school, communities, and multiple stakeholders to ensure the academic success and social & emotional learning of all students.

EU6: Principles and Practices of Social Justice

Students will develop their ability to apply principles and practices of a social justice lens in relation theories and practices of schools and communities by focusing on transformative teaching and learning, university-school-community collaborations, mitigating inequities and disrupting power structures and practices that have contributed to the marginalization of communities and people around the world through research and pedagogy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Curriculum

Completion of the EdD in 3Cs requires

1. 60 semester hours of which 42 must be completed at Loyola University,
2. a comprehensive assessment after the successful completion of the coursework, and
3. a dissertation and oral defense.

Code	Title	Hours
Required Core Courses		
CIEP 440	Critical Investigations in the Field of Curriculum	3

1 RMTD 400 Introduction to Research Methodology is a prerequisite for RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods

2 RMTD 404 Introduction to Educational Statistics is a prerequisite of RMTD 421 Educational Research II: Building a Body of Evidence With Quantitative Methods

3 At least 6 semester hours of required elective courses.

4 The total of 33 Semester hours should be completed with advisor's approval among recommended elective courses. Transferred courses, if eligible, will be counted as electives upon advisor's approval.

Suggested Sequence of Courses

Upon completion of below coursework, students will enroll in Doctoral Study and Dissertation Supervision until defense of the dissertation.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Total Hours	**60**

Length of the Program

Typically, full-time students can complete the coursework between two and three academic years depending on summer enrollment. The dissertation takes another 1.5 to 2 years. Assuming normal progress, it is reasonable to expect part-time students who have completed all prerequisites and enroll in six semester hours during each Fall, Spring, and Summer semester could complete coursework in approximately three academic years and dissertation in approximately 2 years. Time for degree completion, including the dissertation, is four to six years.

Course Transfer

With the advisor's approval, students may apply credits from a master's degree or prior coursework. The three scenarios include:

1. If a student completes a Master's degree in a designated Loyola program they may be able to transfer up to 30 credit hours to the doctoral program.
2. If a student completes a Master's degree at an accredited institution, not Loyola they may be able to transfer up to 18 credit hours to the doctoral program.
3. If a student has a Bachelor's plus 5+ years of professional experience, they should complete a Master's as part of their coursework towards earning a doctorate in the program.

Continuous Enrollments

Doctoral students in 3Cs (Curriculum, Culture, and Communities) are required to maintain the status of continuous enrollment during their

program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Comprehensive Assessment

Candidates must write a scholarly literature review that is assessed by their dissertation committee prior to developing their proposal.

Candidacy

The requirements for doctoral candidacy are

1. successful completion of all specifically required coursework;
2. successful completion of all comprehensive assessment,
3. approval of the dissertation proposal by the approved dissertation committee and Institutional Review Board (IRB).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Develop the skills and competencies needed to be a transformative educational leader for community-university-school partnerships.
- Advance pedagogical knowledge and pedagogical content knowledge in the professions (e.g., education, faith-based, legal, medical, law enforcement) to best serve all people, particularly those who are in high needs.
- Work collaboratively with community and school partners to solve problems using participatory approaches for research, evaluation, and change.
- Analyze historical and current practices in schools and communities for multilingual students and their families in line with research and theory of supporting and promoting equity for multilingual populations.
- Value the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as they work to develop relationships, practices, and systems within schools and communities.
- Synthesize issues of power, privilege, and equity through a lens of LUC's mission of social justice and Ignatian Pedagogy and analyze how they operate in curriculum, community, and local and global societies.

Curriculum, Culture, and Communities (MEd)

The MEd in Curriculum, Culture, and Communities (3Cs) is designed within a social justice framework across schools and communities to prepare educators, community organizers, faith-based leaders, policy-makers, and others to take on new challenges as socially-just curriculum specialists in institutions of higher education, schools, and communities.

MEd in 3Cs is designed for an applicant who has less than 5 years of professional experience with BA/BS. Applicants with BA/BS with 5+ years of professional experience are eligible to apply for both MEd and Ed.D. in 3Cs. Those students who complete an MEd in 3Cs will have an option to matriculate into an Ed.D. program if they are in good academic standing.

Enduring Understandings & Program Outcomes

MEd & EdD in 3Cs is founded upon six enduring understandings (EUs)

EU1: Theories and Practices about Curriculum, Pedagogy, and Policy

- Students will develop understandings of curriculum, pedagogy, and policy and apply knowledge on transformative curriculum and pedagogy for innovative policy in the local, state, national, and international educational contexts to advocate with and for students, families, and communities.

EU2: Ecology of Communities

- Students will understand that effective educators comprehend the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as well as relationships, practices, and systems. Further, students will understand that effective educators seek to engage multiple stakeholders toward creating that promote equity and social justice of society's most vulnerable groups.

EU3: Research, Evaluation & Change Practices

- Students will understand and use appropriate and rigorous research methods (e.g., qualitative, mixed, quantitative) and research types (e.g., basic, action, evaluation) to investigate critical questions that contribute to the development and improvement in instructional practices, transformative curriculum, and the improvement of relationships across school, community and university settings. Emphasis will be placed on the use of participatory and collaborative research approaches.

EU4: Critical perspectives on Language, Culture, and Literacy

- Students will understand and apply an approach to language and literacy that is heteroglossic, a view of language and literacy as dynamic, and an understanding of the acquisition of language and literacy as a process that occurs within and is influenced by cultural systems and structures including (but not limited to) those of the family, the school, and the surrounding community.

EU 5: Collaboration and Partnership

- Students will understand that effective teaching and learning is situated in local and globalized communities and incorporates assets of students, families, and broader communities into learning. Students will understand that transformative learning engages in collaborative, mutually beneficial, and sustainable relationships among school, communities, and multiple stakeholders to ensure the academic success and social & emotional learning of all students.

EU6: Principles and Practices of Social Justice

- Students will develop their ability to apply principles and practices of a social justice lens in relation theories and practices of schools and communities by focusing on transformative teaching and learning, university-school-community collaborations, mitigating inequities and disrupting power structures and practices that have contributed

to the marginalization of communities and people around the world through research and pedagogy.

Curriculum

Completion of the MEd in 3Cs requires 30 semester hours of coursework. No comprehensive assessment is required.

Code	Title	Hours
Required Core Courses (12 Credit Hours)		
CIEP 440	Critical Investigations in the Field of Curriculum	3
CIEP 469	Issues that Shape Teaching and Learning in Urban Schools and Communities	3

Length of the Program

Typically, students coursework takes two academic years.

Course Transfer

All MEd in 3Cs coursework is transferred as part of their coursework towards earning a doctorate in the program.

Continuous Enrollments

Master's students in 3Cs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Develop the skills and competencies needed to be a transformative educational leader for community-university-school partnerships.

- Advance pedagogical knowledge and pedagogical content knowledge in the professions (e.g., education, faith-based, legal, medical, law enforcement) to best serve all people, particularly those who are in high needs.
- Work collaboratively with community and school partners to solve problems using participatory approaches for research, evaluation, and change.
- Analyze historical and current practices in schools and communities for multilingual students and their families in line with research and theory of supporting and promoting equity for multilingual populations.
- Value the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as they work to develop relationships, practices, and systems within schools and communities.
- Synthesize issues of power, privilege, and equity through a lens of LUC's mission of social justice and Ignatian Pedagogy and analyze how they operate in curriculum, community, and local and global societies.

Director of Special Education Endorsement

The director of special education endorsement (DOSE) program within the SOE sees the professionals of the future as thoughtful persons able to analyze situations, set goals, plan and monitor actions, evaluate results, and reflect on their own professional thinking.

The SOE uses transformative education as a tool for challenging and inspiring students to improve the world around us. We view transformation on a continuum from a highly personal process (requiring risks, vulnerability, and trust) to the transformation of supports, services, and outcomes for our students, community partners, and those whom they serve. Each point on this continuum requires both reflection and a commitment to interdisciplinary and transdisciplinary collaboration that challenges our perceptions and decision-making. Programs incorporate Ignatian pedagogy and traditions, including the four processes of knowing: attention, reflection, judgment, and action and commitment. Transformative education does not have the narrow learning of a knowledge base as its outcome, but rather it prioritizes the notion of disruptive knowledge, a means or process of questioning knowledge and the valuing of learning more. The SOE prepares our candidates to critique the knowledge base and to question knowledge through a social justice lens, and simultaneously to use and contribute to knowledge for just purposes (Learn more about Transformative Education (http://blogs.luc.edu/socialjustice/files/2012/02/trans_ed.pdf)).

Curriculum

The Director of Special Education Endorsement program provides 12 credit hours toward the 30 hours required by the Illinois School Board of Education (ISBE) for the endorsement. Applicants will complete 150 hours of field experience that are embedded in the program coursework. Students must complete the Director of Special Education (234) exam before being eligible for the endorsement from ISBE after completing coursework and field experience.

All students must pass ILTS 234 exam.

Code	Title	Hours
CIEP 510	Accessing & Adopting General Education Curriculum	3
CIEP 537	School Discipline Reform: Linking Law Policy and Practice	2
ELPS 468	Problems in Finance and Business Management	3
ELPS 472	Administration of Special Education and Pupil Services	3

After admission, you will be contacted by your advisor who will complete a transcript review to ensure that you have the 18 credits from your Masters or Doctoral program that are applicable to this endorsement as laid out by the Illinois State Board of Education (ISBE) (https://www.isbe.net/Pages/Professional-Educator-License-Administrative-Endorsements.aspx). It is possible that after this review, you may need to take more courses in addition to the 4 courses required by the program to ensure you meet ISBE's requirements for the endorsement. These reviews will be completed before the Fall semester begins.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 537	School Discipline Reform: Linking Law Policy and Practice	2
ELPS 468	Problems in Finance and Business Management	3
	Hours	**5**
Spring		
CIEP 510	Accessing & Adopting General Education Curriculum	3
ELPS 472	Administration of Special Education and Pupil Services	3
	Hours	**6**
	Total Hours	**11**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Earn ISBE Director of Special Education Endorsement
- Fast career advancement
- Learn from the best transformative leaders in local schools & districts
- Gain immediately applicable skills
- Complete the program in just 1 year

- Work on your endorsement while working full-time
- Rolling admissions[1]

[1] Please note that this program utilizes a cohort model. Twelve students will make a cohort and a cohort is capped at 15 students. Enrollment in the program is contingent upon meeting the cohort minimum. If the minimum is not filled, the program will not be enrolling for that year.

Educational Leadership - Principal Preparation (MEd)

Hone your leadership skills as a school principal.

You want to tackle the hard topics and have a deep passion for addressing social justice and equity issues pervasive in school systems. Loyola's master of education in administration and supervision for school leaders program will give you the skills and know-how to tackle these challenges.

CURRICULUM

Choose one of our three masters in education administration and supervision program pathways to support your career goals:

- MEd Degree Plus ISBE Principal Endorsement Option
- MEd Degree without Principal Endorsement Option

The program can be completed in two years, including summers, and requires continuous enrollment.

Courses

Code	Title	Hours
Required Courses		
ELPS 406	Foundations Using Data for Continuous Improvement	3
ELPS 407	Leading for Data-based Decision Making	3
ELPS 408	Leading for Diversity	3
ELPS 471	MTSS for Instructional Leaders	3
ELPS 474	Curriculum Development for Instructional Leaders	3
ELPS 481	Mission Driven Leadership for Principals	3
ELPS 482	School Supervision for Principals	3
ELPS 483	Human and Fiscal Resource for Principals	3
ELPS 484	School Law, Policy Formation, and Community Involvement	3
Required Internship Courses		
ELPS 566	Principal Internship One	3
ELPS 567	Principal Internship Two	3
Total Hours		**33**

MEd Degree Plus ISBE Principal Endorsement Option

- Must be a practicing teacher or administrator with at least two years of work experience in your field
- Must be continuously enrolled
- Will earn ISBE Principal Endorsement with pending exam 195/196 (https://www.il.nesinc.com/TestView.aspx?f=HTML_FRAG/IL195_TestPage.html)
- 33 semester hours of completed coursework (6 credit hours per semester, summers included)
- 2 semesters of internship facilitated by world-class district leaders

MEd Degree without Principal Endorsement Option

- Must have at least two years of work experience in your field (not for profit or community organization)
- Must be continuously enrolled
- Degree-seeking only. No ISBE Principal Endorsement.
- 33 semester hours of completed coursework (6 credit hours per semester, summers included)
- 2 semesters of internship facilitated by world class district leaders

International and Graduate Students

The full sequence of courses will be followed to fulfill SOE requirements for a Master's Degree in Administration and Supervision. A Principal Endorsement will not be issued to out-of-state students or international students who do not hold an IL Professional Educator License and/or meet all ISBE requirements for endorsement.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1

ELPS 567	Principal Internship Two	3
	Hours	**6**

Summer		
ELPS 480	Residency Seminar for MEd Administration & Supervision	3
	Hours	**3**
	Total Hours	**33**

Continuous Enrollments

Master's students in Administration and Supervision programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

You'll learn how to facilitate data-driven decision making in your school community, and engage in tangible, real-world internship experience to put these ideas into practice.

Educational Leadership-Principal Preparation EdD

As a principal, you'll have the opportunity to lead a school community and create programs and initiatives with a last impact on students, tackling equity issues along the way.

You have the experience teaching in the classroom, now it's time to hone your leadership skills with an advanced degree in administration and supervision with principal preparation.

BY THE NUMBERS

100% of our alumni pass the content exam for ISBE licensure for principal preparation

100% employment placement among graduates

CURRICULUM

This program is for students who already have a Master's degree and are seeking principal licensure. The program is 72 credit hours (48 credit hours of completed coursework and 24 transfer hours from completed Master's work).

The program program can be pursued part-time. All classes are held online.

Code	Title	Hours
Required Licensure Courses		
ELPS 406	Foundations Using Data for Continuous Improvement	3
ELPS 407	Leading for Data-based Decision Making	3
ELPS 408	Leading for Diversity	3

RMTD 406	Educational Evaluation	3
CIEP 488	Participatory Action Research (PAR) in Schools and Communities	3
ELPS 620	Dissertation Research	3
Total Hours		**48**

Program Features

- Successful completion of capstone project under the supervision of Full-time ADSU Faculty
- Two semesters of internship experience
- Earn ISBE Principal Endorsement
- Must be a practicing teacher or administrator with at least two years of work experience in your field
- Must be continuously enrolled in program

Program Length

Most students complete the program in four years. Students take two courses per semester and are able to complete the required coursework in less than three years (including summer enrollment). The length of time for the capstone project depends upon the topic and the diligence of the student. Candidates for the Doctor of Education degree (EdD) have a maximum of seven years to complete the degree.

If students are unable to work on the degree for a period of more than one semester, they should request an official leave of absence from the program. Students who need more time to complete the degree must file for an official extension of time; the student's advisor will then recommend either a leave of absence or an extension.

Continuous Enrollments

Doctoral students in administration and supervision are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Suggested Sequence of Courses

Course offerings are contingent upon enrollment.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the

start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Hours	**6**
	Total Hours	**48**

[1] 24 transfer credits from conferred master's degree coursework + 33 hours of principal endorsement courses (11 courses) + 15 hours of research courses (5 courses) are required for a total of 72 credit hours for program completion.

Illinois Licensure Requirements

Candidates in all programs leading to Illinois licensure are required to pass an Illinois Test of Academic Proficiency (TAP), the appropriate endorsement exam, and a State Criminal Background Check.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

You will benefit from Loyola's comprehensive EdD program that focuses on four core areas: partnerships with districts and communities, scholarly inquiry, facilitation of greater access to quality schooling, and commitment to continuous improvement.

By earning your Administration and Supervision Principal Endorsement EdD at Loyola University Chicago, you will develop a wide range of skills, including the ability to:

- Implement tactics designed to positively transform schools and improve student performance
- Facilitate data-driven decision making across a spectrum of specific areas in your school
- Promote the success, health, and welfare of all students and teachers in your school building
- Embrace continuous improvement through data use, technology, values, equity, diversity, digital citizenship, and community
- Apply tools and strategies to address social justice and equity issues that may exist within your school

Educational Leadership-Superintendent Preparation (EdD)

Become a change agent in education, leading schools as an innovative district leader.

Are you a teacher leader, Chief School Business Official, principal or school leader who is ready to take on a district leadership role? With Loyola's EdD in Administration and Supervision with superintendent endorsement, you'll be well-equipped to successfully and ethically manage and navigate curricular, programmatic, and budgetary decisions in both urban and suburban school district settings. You will be ready to implement innovative solutions and impactful organizational change in school communities and districts.

CURRICULUM

All Courses will be delivered ONLINE in HYBRID model – combination of asynchronous and synchronous class sessions. Courses will be delivered on Monday Evenings using two different course slots. Asynchronous learning modules, embedded field-based experiences and group projects will support synchronous class meetings. All EDLD courses are taught and facilitated by faculty with terminal degrees, leadership expertise, ISBE Principal, and Superintendent Endorsement credentials.

EdD with Superintendent Endorsement Program: 24 transfer credit hours + 33 hours Loyola credit hours for endorsement + 15 credit hours for research courses = 72 hours total

Code	Title	Hours
ELPS 461	Issues in School Law	3

RMTD 404	Introduction to Educational Statistics	3
RMTD 406	Educational Evaluation	3
Total Hours		**48**

Program Features

- Two years of school supervisory or administrative experience and a Type 75 General Administrative or ISBE Principal Endorsement on PEL
- Successful completion of the Superintendent Certification Exam required by ISBE
- 72 hours of coursework; 24 credit hours from a master's degree may transfer
- Study Abroad. Complete ELPS 465 Workshop (Variable Topics) – Two-week Residency course in Rome, Italy
- Successful completion of two (2) District-Level Internship courses
- Successful completion of Capstone Project under the supervision of fulltime ADSU faculty

Program Length

Students have a maximum of seven years to complete the degree. Most students complete the required coursework in less than three years, including summer enrollment. Completion time for the capstone project varies.

Continuous Enrollments

Doctoral students in administration and supervision are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Suggested Sequence of Courses

The Ed.D. Superintendent Preparation Program is comprised of three distinct phases: professional inquiry and equity studies; continuous improvement studies: system, community, self and reflective practice; and doctoral scholarly capstone in practice.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Program Requirements

For Superintendent Endorsement

- Successful Completion of Loyola's ISBE Approved Course Sequence – 33 credit hours (includes internship)
- Successful Completion of Supervised Yearlong Internship - PK - 12
- Successful Completion of IPA or AA Learning Modules: Principal Evaluators Training
- Passing Score on IL's Superintendent Exam #225.
- Submitted Proof of 2 years of experience working full time as a principal, director of special education, or chief school business official, or other administrative position while holding a valid administrator license.

For EdD

- Advanced Standing/Transfer Credit: 24 credit hours with grades of B or better - EDLD transcript review required
- Successful completion of Loyola's ISBE Approved Course Sequence - 48 credit hours of transformative district leadership curriculum.
- Successful Completion of written Capstone Project – Problem of Practice
- Successful Oral Defense of approved Capstone Project – Problem of Practice

Program Format

The EdD in Educational Leadership - Superintendent Endorsement Certificate program is an online program - all courses, including field supervision, are offered online. All advising and coaching sessions for leadership development and support will be hosted online for district leadership candidates.

Illinois Licensure Requirements

Candidates in all programs leading to Illinois licensure are required to pass an Illinois Test of Academic Proficiency (TAP), the appropriate endorsement exam, and a State Criminal Background Check.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

Loyola's Superintendent Endorsement Program is designed to:

- Prepare district leaders who will successfully construct and apply knowledge to positively impact the lives of individuals, families, organizations, and school communities;
- Provide diverse learning opportunities for district leadership candidates to develop and demonstrate collaboration and communication skills to work with diverse communities and to build partnerships;
- Cultivate, supervise and assess field-based learning opportunities to analyze problems of practice and use multiple administrative frameworks and leadership lens' to develop meaningful solutions;
- Develop a professional knowledge base that integrates both practical and research knowledge, links theory to systemic and systematic inquiry, and emphasizes the generation, transformation, and use of professional knowledge and practice to address educational inequities in our field.

Elementary Education (MEd)

The MEd in Elementary Education is designed for individuals looking to make a difference in the lives of children.

The program is designed for maximum flexibility to complete coursework on your schedule with courses offered in the evening using a hybrid format, allowing you to keep working while pursuing your degree.

In this program, you will focus on inclusive education and develop pedagogical and advocacy skills to promote equity and social justice for all learners in your classroom. Graduates receive a Professional Educator License (PEL) with elementary and ESL endorsements with the potential to add bilingual, learning behavior specialist (LBS1), and middle grades endorsements.

This program is designed for individuals seeking to secure an initial teaching license to teach in elementary schools, whether that be in general education, special education, or ESL and bilingual education. An integral component of our teacher preparation program is classroom experience where candidates engage directly with students and educators while developing their pedagogical expertise.

Curriculum

Completion of the MEd degree program in Elementary Education requires 42 semester hours. Upon successful completion of the program, candidates are eligible for an Illinois Professional Educator License with endorsements in elementary education and an English-as-a-Second Language (ESL) endorsement.

Coursework listed in order taken in program of study (42 credit hours)

All courses are hybrid, meaning that some class sessions are held in-person while other sessions are conducted on-line. Cohorts will meet one evening per week across the semester; this will be established prior to the start of the cohort.

Program Length

This is a 2-year program beginning in the summer, designed for flexible options for you to complete your coursework and fieldwork in a variety of ways. With a blend of in-person and online sessions, as well as evening coursework, the program allows working professionals to seek out their degree and teaching licensure while remaining in current positions. Students will receive placement in school settings for fieldwork alongside related coursework. Students have five years from acceptance to complete the program.

Continuous Enrollment

Master's students in Elementary Education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduation Requirements

- Maintain overall GPA of 3.0 for graduation
- Complete student teaching experience
- Complete all degree requirements
- Complete comprehensive assessments

Licensure Requirements

- Complete coursework with related fieldwork
- Complete student teaching experience
- Complete required assessments

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning OUtcomes

You will utilize information from theories and related research-based practices when making decisions and taking action in your classroom, using data to drive instruction and assess teaching and learning effectiveness. You will gain extensive experience engaging with diverse populations, including students labeled as emergent bilinguals.

Elementary Education with Dance Endorsement (MEd)

The MEd in Elementary Education with Dance Endorsement is designed for individuals looking to make a difference in the lives of children through dance instruction and is offered in partnership with Chicago Public Schools (CPS) Residency Programs

The program is designed for maximum impact to complete coursework with evening and online options, allowing you to be employed as a CPS teacher resident while pursuing your degree.

In this program, you will focus on inclusive education and develop pedagogical and advocacy skills to promote equity and social justice for all learners in your classroom. Graduates receive a Professional Educator License (PEL) with elementary and ESL endorsements along with a Dance endorsement based on 18 credit hours of existing dance coursework required to enter the program.

This program is designed for individuals seeking to secure an initial teaching license and to teach dance in elementary schools.

An integral component of our teacher preparation program is classroom experience where candidates engage directly with students and educators while developing their pedagogical expertise. To gain this experience, candidates will be employed as full-time CPS teacher residents and provided a resident stipend of $40,000 by CPS.

Curriculum

Completion of the MEd degree program in Elementary Education with Dance requires 38 semester hours. Upon successful completion of the program, candidates are eligible for an Illinois Professional Educator License with endorsements in Elementary Education, English-as-a-Second Language (ESL) and Dance.

All courses are hybrid, meaning they meet for half of the contact hours in-person and half online.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Summer I		
TLSC 401	Language, Learning & Development Theories in Practice	2
TLSC 403	Teaching for Social Justice and Equity	3
TLSC 404	Constructive Learning Environments for Diverse Students	3
TLSC 406	Educational Policy for Diverse Students	3
TLSC 407	Individualized Assessment and Instruction for Diverse Students	3
TLSC 422	Teaching Social Studies in Elementary Grade Classrooms	2
	Hours	**16**
Fall		
TLSC 420	Teaching Mathematics in Elementary Grade Classrooms	2
TLSC 421	Teaching Science in Elementary Grade Classrooms	2
TLSC 440	Language and Literacy	3
TLSC 442	Disciplinary Literacy	3
TLSC 450	Teaching and Learning in an Area of Specialization	3
	Hours	**13**

Spring		
TLSC 460	Developing Rigorous and Relevant Instruction and Assessment	2
TLSC 461	Designing and Implementing Rigorous and Relevant Instruction	3
TLSC 470A	Student Teaching for Change	1-6
	Hours	**6-11**
Year 2		
Summer I		
TLSC 470B	Student Teaching for Change	1-6
	Hours	**3-6**
	Total Hours	**38-46**

Program Length

This is a 1-year program beginning in the summer, designed for you to complete your coursework and fieldwork with a blend of in-person, online and evening courses. The program allows candidates to seek out their degree and teaching licensure while employed in a paid full-time teacher residency through CPS. Students have five years from acceptance to complete the program.

Continuous Enrollment

Master's students in Elementary Education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Comprehensive Assessment

All teacher candidates complete a Professional Practice Profile (https://www.luc.edu/media/lucedu/education/pdfs/teach_professional_practice_profile.pdf) during student teaching. The Professional Practice Profile consists of two components. This includes an essay on the conceptual framework in the School of Education, Professionalism in Service of Social Justice, and a reflection on collaborative relationships in education.

Graduation Requirements

- Maintain overall GPA of 3.0 for graduation
- Complete student teaching experience
- Complete all degree requirements
- Complete comprehensive assessments

Licensure Requirements

- Complete coursework with related fieldwork
- Complete student teaching experience
- Complete required assessments

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

You will utilize information from theories and related research-based practices when making decisions and taking action in your classroom, using data to drive instruction and assess teaching and learning effectiveness. You will gain extensive experience engaging with diverse populations, including students labeled as emergent bilinguals.

Elementary Education with Theater Endorsement (MEd)

The MEd in Elementary Education with Theater Endorsement is designed for individuals looking to make a difference in the lives of children through theater instruction and is offered in partnership with Chicago Public Schools (CPS) Residency Programs

The program is designed for maximum impact to complete coursework with evening and online options, allowing you to be employed as a CPS teacher resident while pursuing your degree.

In this program, you will focus on inclusive education and develop pedagogical and advocacy skills to promote equity and social justice for all learners in your classroom. Graduates receive a Professional Educator License (PEL) with elementary and ESL endorsements along with a Theater endorsement based on 18 credit hours of existing theater coursework required to enter the program.

This program is designed for individuals seeking to secure an initial teaching license and to teach theater in elementary schools.

An integral component of our teacher preparation program is classroom experience where candidates engage directly with students and educators while developing their pedagogical expertise. To gain this experience, candidates will be employed as full-time CPS teacher residents and provided a resident stipend of $40,000 by CPS.

CURRICULUM

Completion of the MEd degree program in Elementary Education with Theater requires 38 semester hours. Upon successful completion of the program, candidates are eligible for an Illinois Professional Educator License with endorsements in Elementary Education, English-as-a-Second Language (ESL) and Theater.

Coursework listed in order taken in program of study (38 credit hours).

All courses are hybrid, meaning they meet for half of the contact hours in-person and half online.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Candidates will apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students.
- Candidates will hold high expectations and build on the assets of diverse students.

- Candidates will utilize information from theories and related research-based practices when making decisions and taking action in their professional practice.
- Candidates will use data to drive instruction and assess teaching and learning effectiveness.
- Candidates will use research and evidence-based practices to design and deliver theater instruction that includes the alignment of goals, objectives, assessments, and instructional strategies to meet the individual needs of students.
- Candidates will integrate the teaching of theater across multiple content areas and in ways that use a variety of methods to do so.

Higher Education (EdD)

Earn an education doctorate as preparation for an executive-level administrative career in higher education.

The EdD in Higher Education focuses on supporting problem-posing research and the critical development of a practitioner-scholar for executive-level administrative leadership within postsecondary contexts. This hybrid-delivery, weekend format program focuses on coursework that draws from students' significant professional/lived experience connected to theoretical frameworks and concepts, providing additional skills, competencies, and knowledge needed to be social justice change-agents. Through a dissertation project, students will carry out a mode of inquiry that connects theory and practice, and fosters analytic actions around a critical issue in the field of higher education.

Curriculum

With 24 transfer credit hours from a previous graduate degree, completion of the EdD degree program requires an additional 48 semester hours of graduate credit at Loyola University, Chicago. Students are also required to complete a capstone project at the conclusion of coursework and a dissertation study to complete the degree.

Program Length

This program is offered as a cohort where all students enroll in 6 credit hours per semester, including summer sessions. Students can complete coursework in 3 years. The length of the dissertation study can add an additional 6 to 18 months depending on the pace of the student.

Continuous Enrollment

EdD students in Higher Education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence (https://www.luc.edu/education/studentexperience/resources/academicpolicies/) may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion, our students will be able to:

- Apply scholarly knowledge and research skills to address complex problems of practice
- Lead constructive conversations that shape equity-minded policies across multiple levels of an organization
- Partner with diverse constituents to shape sustainable institutional change for inclusive excellence
- Integrate theoretical and conceptual understandings with practice-based solutions

Higher Education (MEd)

The MEd in higher education prepares individuals to become leading practitioner-scholars, promoting access, equity, and social justice within postsecondary contexts.

Loyola's master's degree in higher education is a rare combination, offering content around student affairs and higher education administration rather than specializing in one or the other. Combining these two areas means you'll be better able to serve and support college students.

Curriculum

Completion of the MEd in higher education requires 36 semester hours, an internship, and a final capstone project. The degree is structured in a supportive cohort model, and classes take place on campus at Loyola's downtown Water Tower Campus.

	Hours	**9**
	Total Hours	**36**

Program Length

Full-time students can complete the program in two years, while part-time students can finish their degree in three - four years dependent on the number of courses taken each term.

Summer courses are optional, and students have the opportunity to take courses during a two-week summer study abroad program in Rome, Italy.

Continuous Enrollments

Master's students in Higher Education are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Certificate Opportunities

In addition to their program curricula, students are encouraged to explore opportunities to gain enhanced credentials through our Curriculum and Pedagogy in Higher Education Online Certificate (p. 1754). This interdisciplinary certificate has stackable credit opportunities in conjunction with the MEd in Higher Education program. By earning this certificate, student will be able to get ahead of the curve and meet the constantly evolving field of education.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will be well-versed in topics applicable to creating policies and practices that advance student life and experience in higher education including – social justice and education, critical theory and pedagogy, contexts of activism in education, identity formation, student development, agency, experiences of racially minoritized students, undocumented student experiences, academic labor, international higher education, democracy and education, and community college issues.

Instructional Coaching Certificate

Teacher leaders are crucial for the success of the entire school. Often they are not given formal training. This certificate aims to empower teacher leaders to support and guide their colleagues to improve teaching and learning through instruction, curriculum, and using information and data. This certificate will also focus on effective methods of leading professional learning.

Curriculum

With the Instructional Coaching Certificate at Loyola University Chicago, you will gain the knowledge and skills you need as a teacher leader to help your colleagues improve their teaching and learning through instruction, curriculum, and using information and data.
Courses for this fully online coaching certificate are taught by dedicated faculty who have direct experience in school settings. They are focused on excellence in curriculum and instruction strategies and have years of experience guiding and supporting students just like you through the coaching certificate program.
Over the course of the coaching certificate online, you will create an implementation plan for instructional coaching at your school.

Open to teachers and teacher leaders, the Instructional Coaching Certificate can be pursued on a part-time basis. The coaching certificate program consists of four 3-credit courses, which are all offered online.

To enroll in the coaching certificate online at Loyola Chicago University, you must have a teaching license, credential, or certificate or comparable credential as well as two years of teaching experience.

Continuous Enrollment

Students in certificate/endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Program Structure

The program consists of four 3-credit courses, all offered online in English. Over these courses, candidates will create an implementation plan for instructional coaching within their schools. Candidates will also develop the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management all through an inclusive, continuous improvement lens. Upon completion of this program, candidates will understand how to develop supportive, confidential, and trustworthy relationships with teachers, distinguish between coaching and evaluating, explore conferencing and feedback loops, facilitation, presentation, and best practices in professional learning.

Program Faculty

Our dedicated Administration and Supervision Faculty are experts in their fields who will support students throughout each stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

International Higher Education (MEd)

Join a community of global scholar-practitioners and make a difference in international higher education. The IHE MEd program at Loyola's School of Education offers a rigorous curriculum rooted in Social Justice and critical thinking.

Curriculum

The IHE M.Ed. is designed to be completed in two years, including summers. Most of the courses take place online in an asynchronous format; the study abroad courses take place in person at Loyola's John Felice Rome Center and in Mexico. Program requirements include 36 semester hours and completion of a final electronic portfolio. All courses must be completed within the predetermined curricular sequence.

Travel & Visa

Securing the necessary visas to travel along with related expenses are the student's responsibility.

Cohort Model

Our program has been set up as a cohort because we find that students benefit greatly from joining a learning community and from networking and bonding with one another during the course of their program. Once a cohort is formed, the students participate together in all of the required courses leading to the MEd degree.

As part of a global cohort program, students in the IHE MEd receive the following benefits:

- A 20 percent tuition discount across the entirety of the program
- Exemption from proof-of-immunization and proof-of-health-insurance requirements that apply to Chicago-based students.

Continuous Enrollments

Master's students in international higher education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

A student may petition the IHE Program Director to be allowed to take a course out-of-sequence, yet remain a cohort member. Only one course may be taken out of sequence during a cohort student's course of study. We cannot guarantee that seats will be available in an out-of-sequence course, nor that all required IHE courses will be offered in an online format. Taking a course out of sequence may result in a student being unable to complete the degree in two years. Permission to take a course out of sequence will be granted at the discretion of the Program Director.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will be a reflective leader, able to work in diverse cultural contexts to better understand, analyze, evaluate, and advance the missions and programs of higher education institutions around the globe. You'll also be adept policy analysts, able to conduct data-driven decision making and develop and undertake effective, high-quality assessments and program evaluations.

Language, Culture, and Curriculum (MEd)

This program seeks to develop expert educators capable of serving in a variety of settings, including English as a Second Language (ESL), English as a Foreign Language (EFL), Teaching English to Speakers of Other Languages (TESOL), Bilingual Education, and general education classrooms with students labeled as English learners (ELs).

Classrooms and communities are more diverse than ever before, with a multitude of languages and cultures enriching the possibilities for learning and instruction. This increasing linguistic diversity has prompted much-needed attention to the large and growing sub-group of students labeled as English learners or *emergent* bilinguals. Spanning urban, suburban, and rural areas across the United States and beyond, educational stakeholders recognize the need for *all* teachers to integrate and support students' languages and cultural backgrounds into curriculum and instruction.

With this context in mind, we designed the Language, Culture, and Curriculum program at Loyola University Chicago to equip all teachers with the pertinent understandings and pedagogical practices to push forward emergent bilinguals' learning and language development across settings, including literacy, mathematics, science, social studies, world languages, and fine arts classrooms with children, adolescents, and adults. Since students develop and use language while engaged in learning, all educators can enhance their practice by adding lenses on language and culture to their curriculum.

Commitment to Social Justice

Reflecting our deep commitment to social justice, this program promotes equity for emergent bilinguals. We embrace as asset- based approach, recognizing that all students have resources that must be integrated into rigorous and engaging instruction to create inclusive and welcoming learning communities. We challenge institutional constructs that marginalize students and focus on developing teacher expertise and advocacy to leverage change in their unique contexts. To accomplish this, the backward designed curriculum first focuses on classroom practice before considering application in schools and communities. Graduates leave with the ability to support emergent bilinguals in their classrooms, while promoting broader change for equity and justice.

Loyola faculty designed this program with the classroom teacher in mind. The 10-course Master's degree program can be completed in 1.5 years while teaching, drawing from your current expertise and directly applying

learning to your daily practice. Reflecting the responsive approach that we emphasize in our curriculum, we recognize the knowledge and experience that you bring to the program and make course learning applicable to your setting. The curriculum focuses on solving problems of practice, with each course centering on an authentic project that directly connects to and informs your teaching. There course projects consist of meaningful applications of your learning that immediately enhance and support your classroom practice with students.

To meet the widespread demand for well-prepared teachers of emergent bilinguals, we have an online cohort option that allows completion of the degree program from anywhere in the world on flexible time schedules. Mirroring the content of our in-person cohort offering in the Chicagoland area, we meticulously designed the asynchronous online curriculum to be purposeful and authentic, allowing the top-notch professors and experts in the field of EL/Bilingual Education to respond to your goals and needs as teachers in diverse contexts across the globe. The project-based focus allows for targeted online learning and support, rather than busywork and endless discussion boards.

Program Overview

In addition to completing your Master's degree from Loyola University Chicago, the coursework also meets the requirements for the English as a Second Language (ESL) endorsement and the Bilingual Endorsement in the state of Illinois. If you work in one of the 43 states that has reciprocity agreements with the state of Illinois, both the ESLand Bilingual endorsements can transfer to your teaching license if first attached to the Illinois license. We look forward to supporting your learning and professional development in the Language, Culture, and Curriculum program.

Program Benefits

- Enhance your expertise and practice to work in settings including ESL, EFL, TESOL, bilingual, and general education.
- Earn your Master's degree, which includes required coursework for the ESL endorsement and the bilingual endorsement.
- Develop in-depth expertise to support the learning and language development of all students with targeted focus on emergent bilingual learners.
- Complete coursework online from anywhere in the world or take courses in-person on our Chicago campus.
- Immediately apply your leaning to your classroom practice via the project-based approach that prioritizes both you and your students' growth.
- Engage in collaborative learning with other educators via structured cohorts that move through the strategically sequenced 10-course program together.
- Complete the degree program in less than 1.5 years by taking two courses per semester – ideal for the busy classroom teacher looking for flexibility and applicability.

Program Faculty

Our dedicated Teaching and Learning Faculty (https://www.luc.edu/education/directory/) are experts in their fields who will support students throughout each stage of the program.

Program Advisor

Amy Heineke (https://www.luc.edu/education/directory/profiles/heinekeamyj.shtml/)

Faculty Expertise

- Curriculum foundations-practice-policies
- Field-based teacher education and teacher advocacy
- Collaborative school-community partnerships
- Language, literacy, and culture
- Culturally responsive practice and curriculum reform
- Spirituality & transformative curriculum leadership
- Disciplinary expertise: Math, Science, ELA, Social Studies, Elementary Ed, Special Ed, and Early Childhood

International Students

International Students: Educators from countries around the world are encouraged to apply to Loyola's Language, Culture and Curriculum Master's Program to develop their asset-based linguistically and culturally responsive practice and explore new ideas. Courses focus on theories, concepts, and skill development applicable to schools with bilingual and multilingual student populations in any context.

For more information on taking part in this program as an international student, please visit: International Students (https://www.luc.edu/undergrad/letsgetstarted/international/).

Curriculum

The program requires 30 credit hours, consisting of 10 classes and a comprehensive portfolio, which is embedded in program coursework. Courses are taken one at a time spanning 6-8 weeks, meaning that students only focus on the content and project for one course at any given time.

Degree Requirements

Required Courses (30 credit hours)

Code	Title	Hours
CIEP 471	Theoretical Foundations of ESL-Bilingual Education	3
CIEP 472	Methods and Materials for Teaching ESL/Bilingual Education	3
CIEP 473	Instructional Leadership for Multicultural Schools	3
CIEP 474	Assessment of Bilingual Students	3
CIEP 503	Culturally Relevant Literature for Children & Adolescents	3
CIEP 504	Applied Linguistics for Teachers	3
CIEP 506	English Language Learning Practicum	3
CIEP 507	Language Demands and Development in Disciplinary Classrooms	3
CIEP 508	Social Justice for Multilingual Learners	3
CIEP 509	Literacy Teaching for Bilingual & Multilingual Students	3
Total Hours		**30**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Summer		
CIEP 508	Social Justice for Multilingual Learners	3
CIEP 503	Culturally Relevant Literature for Children & Adolescents	3
	Hours	**6**
Fall		
CIEP 471	Theoretical Foundations of ESL-Bilingual Education	3
CIEP 507	Language Demands and Development in Disciplinary Classrooms	3
	Hours	**6**
Spring		
CIEP 474	Assessment of Bilingual Students	3
CIEP 509	Literacy Teaching for Bilingual & Multilingual Students	3
	Hours	**6**
Year Two		
Summer		
CIEP 472	Methods and Materials for Teaching ESL/ Bilingual Education	3
CIEP 504	Applied Linguistics for Teachers	3
	Hours	**6**
Fall		
CIEP 506	English Language Learning Practicum	3
CIEP 473	Instructional Leadership for Multicultural Schools	3
	Hours	**6**
	Total Hours	**30**

Clinical Experiences

Students will complete clinical experiences integrated within individual courses. For students who are not currently teaching, additional clinical hours may be required outside of coursework.

Comprehensive Assessment

The comprehensive portfolio for this program will be completed throughout the program. The professional portfolio includes the focal project from each practice-based course, including:

- Personal philosophy for teaching emergent bilingual students
- Community study and culturally relevant library list
- Parent guide to federal, state, and local language policies
- Classroom displays for students' metalinguistic awareness
- Student case study and assessment portfolio
- Literacy and biliteracy student intervention plan
- Disciplinary unit plan with language lens
- Co-planning and co-teaching unit of study
- Applied linguistics problem and action plan
- Professional development plan for school change

Continuous Enrollments

Master's students in Language, Culture, and Curriculum are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Licensure

Students interested in pursuing the MEd in Language, Culture, and Curriculum are not required to hold a teaching license.

Students will need to hold a valid teaching license should they wish to formally attach the ESL endorsement that is a part of this larger Master's degree program.

This program will provide the coursework needed to receive an ESL endorsement if candidates hold an Illinois teaching license. The endorsement is for the grade range of the license with the exception of the middle grades. Adding the middle grade ESL endorsement may require additional course work if the middle grade endorsement is not currently on the license.

Applicants licensed to teach outside of the state of Illinois may be able to receive the ESL endorsement through the Language, Culture, and Curriculum program through reciprocity agreements.

- The following states have reciprocity agreements with Illinois: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

For more information, please visit: Illinois Licensure (https://www.luc.edu/education/academics/illinoisstatelicensure/)

Length of Program

Students complete the program in 1.5 years, takings two classes each semester for five semesters (i.e., Spring, Summer, Fall, Spring, Summer). Should the need arise to deviate from the cohort, students have five years from acceptance to complete the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Holistically support students' social, emotional, cultural, linguistic, and academic development and achievement.
- Actively engage in the design and implementation of educational policies, programs, and services for emergent bilinguals.
- Align curriculum and instruction with the cultural and linguistic goals and resources of families and communities.
- Plan and implement classroom instruction and assessment that integrates language into rigorous literacy and content area teaching.

- Find and utilize culturally and linguistically relevant literature, materials, and technology to support learning, literacy, and biliteracy.
- Involve parents, families, and communities in meaningful ways to support students' learning, development, and achievement.
- Promote equity for emergent bilinguals via leadership and advocacy work both inside and outside of schools.

Leading Inclusive Catholic Schools Certificate

Catholic schools are responding to the call to open their doors to students with disabilities in increasing numbers yet are in need of supports and guidance in order to effectively build more inclusive environments. This certificate program aims to build both the knowledge and experiential base of Catholic school principals and teacher leaders to develop school-wide systems, structures, and practices to support all learners. For many Catholic school leaders, professional preparation in the areas of exceptionality, special education law and procedure, and interventions/accommodations has been limited. In order to increase the knowledge base in these areas, the Certificate in Leading Inclusive Catholic Schools has been created. This program will be offered online through a cohort model.

Curriculum

Prerequisites

This program is open to Catholic school principals and teacher leaders. Individuals are eligible to enroll with:

1. an Illinois Professional Educator License (with either teacher or principal endorsement) or the comparable credentials from another state, and
2. two years' leadership experience in a Catholic school.

Courses

Code	Title	Hours
ELPS 411	Special Education in the Catholic School	3
ELPS 471	MTSS for Instructional Leaders	3
CIEP 401	The Exceptional Child	3

This certificate program is a three-course program that leads to a certificate in Leading Inclusive Catholic Schools. Typically, students will take one class per semester.

Continuous Enrollments

Students in endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Associate Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Measurement and Quantitative Methodology Certificate

This program offers a curriculum for training students to have expertise in applying measurement and quantitative techniques in a research setting. Students will be able to choose an emphasis of measurement or quantitative methods and will receive a certificate upon completion of the requirements to validate their skills and efforts. This graduate-level program will prepare students for a variety of career opportunities that require training in measurement and/or quantitative techniques.

This program accommodates students with varying levels of quantitative background, thus allowing them to join the program at the level that is appropriate for them. It is particularly beneficial for current students at Loyola who have taken basic quantitative courses and want to enhance their skills and highlight their expertise in contributing to methodological aspects of research when applying for jobs.

CURRICULUM

This certificate program is a five-course (15 credit hours) program that leads to a certificate in Measurement & Quantitative Methodology.

Code	Title	Hours
Core Curriculum		
The core courses include 2-3 courses, depending on the student's research background. Students who have taken courses in quantitative research can waive/transfer in a maximum of six credits to cover the core courses of this certificate program and start with elective courses. The waived courses can only be the core courses.		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	3
Elective Courses		
After completing the core courses, students will take elective courses based on their needs and interests. They can choose either measurement or quantitative methods oriented courses. Students who have taken some of the elective courses will have to choose different elective courses to fulfill the requirements of the certificate program.		
Select 2-3 courses: [1]		6-9
Measurement Oriented		
RMTD 430	Psychological Measurement	
RMTD 530	Seminar in Tests & Measurements	
Quantitative Methods		
Choose one of the following:		
RMTD 403	Survey Research	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 488	Meta-Analysis	
STAT 388	Topics [2]	
Total Hours		**15**

[1] Students who took two core courses will choose three elective courses; students who took three core courses will have to take two elective courses.

[2] This course is an option for pre-Master's students admitted to the program.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Sequence 1		
Fall		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 488	Meta-Analysis	3
	Hours	**9**
Spring		
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	3
RMTD 483	Multivariate Statistics	3
	Hours	**6**
	Total Hours	**15**

Continuous Enrollments

Students in endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Associate Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

Upon the completion of the certificate, students will be prepared to:

- Have theoretical knowledge of measurement/psychometric theories and quantitative methods.
- Understand the assumptions of different quantitative techniques and learn to handle the violations of these assumptions.
- Select and apply appropriate measurement and quantitative methods to answer research questions.
- Use computer software to implement a wide range of quantitative analyses.
- Interpret statistical evidence appropriately.

Organizational Evaluation Certificate

This certificate program prepares students for roles as evaluators and change agents in a range of organizations such as schools and school districts and non-profit agencies. Evaluation refers to a systematic process that involves collecting data about organizations and their programs for enhancing knowledge and decision making to promote organizational learning and development. This graduate-level certificate program is ideal for current students and professionals who are looking for career opportunities in or are currently employed in, school districts, social service organizations, private foundations, research firms, and human resources or training departments.

Curriculum

This certificate program is a five-course (15 credit hours) program that leads to a certificate in Organizational Evaluation.

Code	Title	Hours
Core Courses		
The core courses include 2-3 courses, depending on the student's research background.		
RMTD 406	Educational Evaluation	3
RMTD 407	Introduction to Evaluation Theory	3
CIEP 466	School Psychology Special Topics	3
Elective Courses		**6-9**
Students will choose two to three courses from the following lists in consultation with the assigned advisor based on prior coursework and experience. Students who have taken elective courses as part of their program requirements will be allowed to transfer a maximum of six credits to the certificate.		
Statistics		
RMTD 404	Introduction to Educational Statistics	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
Research Methods		
RMTD 403	Survey Research	
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods	
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	
RMTD 430	Psychological Measurement	
RMTD 440	Mixed Methods Research	
RMTD 470	Case Study Research	
CIEP 488	Participatory Action Research (PAR) in Schools and Communities	
Total Hours		**15**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
RMTD Elective		3
	Hours	**3**

Spring		
RMTD 406	Educational Evaluation	3
	Hours	**3**
Summer I		
RMTD 407	Introduction to Evaluation Theory	3
	Hours	**3**
Summer II		
CIEP 466	School Psychology Special Topics	3
	Hours	**3**
Year 2		
Fall		
RMTD Elective		3
	Hours	**3**
	Total Hours	**15**

Transferring Credits

Students who have taken elective courses as part of their program requirements will be allowed to transfer a maximum of six (6) credit hours to the certificate.

Continuous Enrollments

Students in certificate/endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Associate Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon the completion of the certificate, students will be able to:

- Understand evaluation as a field of professional practice.
- Conduct all aspects of a systematic inquiry, utilizing a variety of research practices, as relevant to the substantive area.
- Engage in reflective practice.
- Demonstrate interpersonal competence.

Principal Endorsement

Designed by Loyola's School of Education faculty along with community partners, the Administration & Supervision Endorsement only pathway ensures all candidates acquire the skills necessary to be effective, justice oriented, school principal. Through focused, in-depth coursework, candidates gain skills, perspectives, and knowledge for immediate application towards positively transforming schools, and improving student performance.

LEARNING OUTCOMES

- Fast career advancement
- Learn from the best transformative leaders in local schools & districts
- Gain immediately applicable skills
- Complete the program in just 2 years
- Rolling admissions

School and Community Counseling (MEd)

At the intersection of school and community life, an opportunity for you to support students and their families. Are you ready to work as a licensed professional counselor in schools or at community organizations? Our nationally recognized faculty are experts in social justice and ready to work with you to confront racism, achievement gaps, and other discrimination in our education system.

Curriculum

Completion of the MEd degree program requires 60 semester hours of graduate study focused in two major areas: counseling core and a specialty area (school and community). This includes 700 clock hours of practicum and internship experience (taken for six semester hours of credit). Students must also take and pass comprehensive examinations during their final semester of study. Students have five years from acceptance to complete the program.

For more information about the following items, please refer to the Counseling Student Handbook 2022-2023 (https://www.luc.edu/media/lucedu/education/pdfs/2022.MASTERSHANDBOOK.CPSY.pdf)

Undergraduate Prerequisites

Students should present transcript evidence of successful completion ("B" or better) of an introductory statistics course or its equivalent. Ideally, students will have completed this course prior to the start of the program.

[1] Practicum/Internship requires 700 hours of supervised experience in a setting relevant to both community counseling and school counseling practice.

Additional Education Courses

School Counseling licensure in Illinois requires a teaching certificate or additional course work in education. Students in the M.Ed. program in School and Community Counseling who do not hold teaching certificates must complete the following additional course work to be license-eligible in Illinois. These courses are:

- CIEP 401 The Exceptional Child
- CIEP 414 Instructional Methods-Diverse Population
- ELPS 460 School Administration (or equivalent)

Program Length

Full-time students complete the program in two years, including summers. Part-time study is also available.

Continuous Enrollments

MEd students in School and Community Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Comprehensive Assessment

Students will complete exams in school counseling and community counseling. See program handbook for details. Comprehensive examination application deadlines are as follows (see the School of Education Calendar for comprehensive exam dates)

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards prior to enrolling at Loyola to determine the appropriate coursework required. Students should also stay apprised of licensure requirements throughout the program.

The school counseling licensure exam must be taken in the semester prior to beginning CPSY 441 Internship, in the spring semester. The ISBE website (https://www.isbe.net/Pages/Professional-Educator-License.aspx) provides information on dates on which exams are given, fees, and registration procedures. Both exam TAP and school counseling) are administered by ISBE, not Loyola, and you must register with ISBE to take them.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

In addition to mastering counseling techniques for patients with a wide variety of life experiences, you'll also gain real-world experiences through your practicum and internship. With Chicago as your classroom, you'll have firsthand experiential learning opportunities at the Chicago Public Schools and level-one trauma centers, researching action-oriented projects that have an immediate impact on the community.

School Counseling (MEd)

Support students as their school counselor, with a special emphasis on lifting up underserved and disenfranchised populations. Earn your professional license as a school counselor in a program committed to breaking barriers and disrupting the current inequities in our educational system.

Curriculum

Completion of the MEd degree program requires 48 semester hours, 700 clock hours of practicum/internship experience, and a comprehensive examination.

For more information about the following items, please refer to the Counseling Student Handbook 2022-2023 (https://www.luc.edu/media/lucedu/education/pdfs/2022.MASTERSHANDBOOK.CPSY.pdf)

Undergraduate Prerequisites

Students should present transcript evidence of successful completion ("B" or better) of an introductory statistics course or its equivalent. Ideally, students will have completed this course prior to the start of the program.

CIEP 478	Behavioral Intervention: Assessment & Support	
Total Hours		**48**

Additional Coursework

The school counselor endorsement in Illinois requires a teaching endorsement or additional coursework in education. Students in the MEd program in School Counseling who do not hold a teaching license must complete the following additional coursework to be eligible in Illinois. These courses are:

- CIEP 401 The Exceptional Child
- CIEP 414 Instructional Methods-Diverse Population
- ELPS 460 School Administration

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

ELPS 460	School Administration [3]	
	Hours	**3**
	Total Hours	**48**

1. Students who do not have a teaching license would take CIEP 401 The Exceptional Child instead of an elective.
2. Students who hold a teaching license take an elective, not CIEP 401 The Exceptional Child.
3. This course is only required for students who do not have a teaching license.

Program Length

Full-time students will complete the program in two years, including at least one summer. Part-time study is also available. Students have five years from acceptance to complete the program.

Continuous Enrollments

MEd students in School Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Comprehensive Assessment

A school counseling exam is required during your practicum/internship. See program handbook for details. Comprehensive examination application deadlines are as follows (see the School of Education Academic Calendar for comprehensive exam dates)

Practicum

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at 312.915.6378

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards

prior to enrolling at Loyola to determine the appropriate coursework required. Students should also stay apprised of licensure requirements throughout the program.

Students seeking school counseling licensure without a teaching endorsement must take the school counseling licensure exam in the semester prior to beginning CPSY 441 Internship, in the spring semester. The ISBE website (https://www.isbe.net/Pages/Professional-Educator-License.aspx) provides information on dates exams are administered, fees, and registration procedures. The school counseling is administered by ISBE (not Loyola), and you must register with ISBE to take the exam.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You'll be ready to work in an elementary or secondary school setting, applying skills in research evaluation and implementation of interventions for student success. You'll also be adept at collaborating with multiple parties within a school context (e.g., students, parents, teachers, administrators, community, etc.).

School Discipline Reform Certificate

The School of Education at Loyola University offer an online certificate in School Discipline Reform for professionals committed to serving their students and their communities by understanding, shaping, and implementing prevention-oriented approaches to school discipline. This part-time program is designed to equip education professionals-superintendents, principals, other school and district-level administrators, school attorneys, discipline deans, school psychologists, school social workers, counselors, and other educators - with the tools and skills to needed to lead comprehensive initiatives to reduce the use of suspensions and expulsions and their adverse impacts on vulnerable students.

Curriculum

Students may obtain the online certificate by successfully completing the four (4) two-credit hour courses in one to two years.

Courses

The specific course sequencing will be tailored to each student in consultation with their academic advisor.

Code	Title	Hours
CIEP 535	System Consultation in School Discipline Reform	2
CIEP 537	School Discipline Reform: Linking Law Policy and Practice	2
CIEP 620	Legal Issues in School Discipline	2
CIEP 625	Restorative Justice in Schools	2
Total Hours		**8**

Suggested Sequence of Courses

Courses can be taken in any order with the exception that students start with CIEP 571 School Discipline Workshop: Anti-Racism and must take CIEP 537 School Discipline Reform: Linking Law Policy and Practice in their final semester. Below is a suggestion, which can be adjusted based on student need and course offerings.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 571	School Discipline Workshop: Anti-Racism	0
CIEP 535	System Consultation in School Discipline Reform	2
CIEP 620	Legal Issues in School Discipline	2
	Hours	**4**
Spring		
CIEP 537	School Discipline Reform: Linking Law Policy and Practice	2
CIEP 625	Restorative Justice in Schools	2
	Hours	**4**
	Total Hours	**8**

Required Anti-Racism Workshop

All students will begin the program with a required workshop in anti-racism (CIEP 571 School Discipline Workshop: Anti-Racism).

Required Immersion Seminar: Restorative Justice in Schools

Students are required to attend an intensive in-person seminar on Restorative Justice. The retreat offers students the opportunity to network with other professionals and engage in lively discussions and exercises related to the core principles and practices of restorative justice.

Learning Outcomes

This certificate program equips participants to:

1. Understand fundamental legal principles and law that guide school discipline practices;
2. Review and analyze school and district-level discipline data and conduct a root cause analysis;
3. Develop and conduct a needs assessment related to school discipline in their respective settings;
4. Plan, facilitate, and reflect on the effective restorative dialogue and a variety of proactive and responsive circles;
5. Apply the principles of restorative and anti-racist practices to address a challenge that their schools or districts are facing;
6. Demonstrate knowledge regarding a variety of research-based practices that can be implemented to prevent and respond to behavior within a framework of multi-tiered systems of support (e.g., universal/tier 1; secondary/tier 2 and tertiary/tier 3); and
7. Develop an action plan to implement prevention-oriented alternatives to exclusionary school discipline practices in their respective settings.

School Psychology (EdD)

Ready to support students' mental health and address social inequities in schools. The Ed.D. program in School Psychology utilizes a scientist-practitioner model as the foundation for the coursework students are asked to complete. The scientist-practitioner model is also combined with a systems-change lens to enhance one's understanding of using data-based decision-making and evidence-based practice to address issues of social justice and inequity. The courses in this program have been developed to attain these objectives and provide candidates with the necessary tools to lead for change in schools and communities. To accomplish these overarching objectives, there is a clear focus on assisting candidates to acquire the skills to:

1. Think systematically within the education system
2. Analyze and interpret systems-level data
3. Implement and evaluate evidence-based practices
4. Develop leadership potential
5. Further knowledge of inequity within the larger educational community and develop skills to become agents of change

See important statements and positions from the School Psychology faculty (https://www.luc.edu/education/academics/areasofstudy/schoolpsychology/)

Curriculum

The EdD program of studies consists of a total of 72 graduate semester hours. The program is designed for practicing school psychologists who are interested in obtaining a doctoral degree with a focus in data-based decision making and systems change in schools. We also offer a mental health focus, which requires additional courses to obtain an LPC (Licensed Professional Counselor) credential. This program is designed as a cohort model with entering students moving through the program together. It is delivered fully online with courses being offered primarily asynchronously, with some synchronous classes, and it is thoughtfully designed to meet the needs of working professionals.

More information can be found in the EdD in School Psychology Handbook (https://www.luc.edu/media/lucedu/education/pdfs/SPSYEdDHandbook2022-23.pdf).

	Total Hours	**36**

Transfer Credit

Each student will have the opportunity to transfer a maximum of 36 semester hours of previous coursework towards the required 72 semester hours. Upon being accepted to the EdD program, each student will meet with the School Psychology Program Director to review transcripts to determine which, if any, courses can count toward the EdD program.

Capstone

Each student will complete a Capstone Project in lieu of a dissertation. Candidates are responsible for the initiation and completion of their Capstone Project and our faculty serve as supports to help candidates complete their Capstone. The process that all candidates must follow for successful completion is delineated below. All candidates must begin the Capstone process during the Spring semester of Year 1.

Program Length

Students can complete all coursework in two years while attending part-time. Students will take two courses each Fall semester of the program, two courses each Spring, and two courses each summer. You'll take courses together, as a cohort and follow the same course sequence.

Continuous Enrollments

Doctoral students in School Psychology are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You'll learn how to implement and evaluate evidence-based practices, knowing that your job as a school psychologist is not simply about assessment and placement, but to also address issues of inequity. You'll focus on consultation, education, and intervention.

School Psychology (MEd/EdS)

The School Psychology program is a dual degree program (MEd/EdS) that equips you to be a school psychologist with the tools to advocate for the best interests of students and their families – confronting the inequities of our education system along the way. You'll learn skills and strategies to support students both in and outside the classroom, enabling them to have the most successful learning experience possible.

See important statements and positions from the School Psychology faculty (https://www.luc.edu/education/academics/areasofstudy/schoolpsychology/)

Curriculum

Completion of the MEd/EdS degree program in school psychology requires 66 graduate semester hours, including a full-time internship and two comprehensive portfolio examinations. No thesis is required. The program has conditional approval from the National Association of School Psychologists (NASP (https://www.nasponline.org/)) and aligns with the Illinois State Board of Education (ISBE (https://www.isbe.net/)) School Psychology Standards.

An MEd degree in educational psychology is earned after the first year of study, leading to entrance to the EdS portion of the program. The EdS degree is earned after the third year of study. Students may transfer in a maximum of six graduate semester hours.

More information about this program can be found in the School Psychology EDS Handbook (https://www.luc.edu/education/academics/degreeprograms/specialistdegrees/mededsinschoolpsychology/).

Course Requirements

The courses are designed to provide a sequential learning path to prepare to become a licensed school psychologist.

Code	Title	Hours
CIEP 409	Evidence Based Interventions	3
CIEP 410	Legal Issues - Educating Exceptional Children	3

ELPS 432	Multiculturalism for Social Justice in Higher Education	3
RMTD 422	Single Subject Design	3
Total Hours		**66**

Continuous Enrollments

Master/Doctoral students in School Psychology are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

The Educational Specialist (Ed.S.) program of study in school psychology at Loyola University Chicago provides a sequential set of experiences that have been carefully planned with reference to the standards of the National Association of School Psychologists (NASP), as well as the certification requirements promulgated by the Illinois State Board of Education. The program is designed to emphasize a curriculum that provides for basic knowledge in psychology, an organized sequence of courses and experiences, and a program developed in response to the training needs demanded by the current roles and functions of school psychologists. Although some graduates go on to obtain advanced doctoral degrees in school psychology and related areas, the majority of the specialist degree recipients obtain employment in the public schools. Therefore, the specialist degree program of studies emphasizes those skills and objectives that we believe best prepare the candidate for employment immediately upon completion of the program.

The primary goal of the Loyola University Chicago program is to train professional school psychologists with a strong basic theoretical knowledge base in psychology and the essential competencies to provide school psychological services in the schools. We emphasize the social justice responsibilities of school psychologists, including how to advocate and promote equity, access, respect and fairness for all students, particularly those who are marginalized. In order to reach this goal, the Loyola University Chicago program of studies includes a combination of theoretical and application components tied together within the context of a carefully planned sequence of courses and field experience offerings.

You will gain a comprehensive set of knowledge and skills that align with the National Association of School Psychologist's 10 Domains of Professional Practice (https://www.nasponline.org/standards-and-certification/nasp-2020-professional-standards-adopted/nasp-2020-domains-of-practice/):

- Domain 1: Data-Based Decision Making
- Domain 2: Consultation and Collaboration
- Domain 3: Academic Intervention and Instructional Supports
- Domain 4: Mental and Behavioral Health Sciences and Interventions
- Domain 5: School-Wide Practices to Promote Learning
- Domain 6: Services to Promote Safe and Supportive Schools
- Domain 7: Family, School and Community Collaboration
- Domain 8: Equitable Practices for Diverse Learners
- Domain 9: Research and Evidence-Based practice
- Domain 10: Legal, Ethical and Professional Practice

Secondary Education (MEd)

Earn a degree and certification to teach at the high school level at Loyola, a longtime partner of Chicago-area schools.

As a high school teacher, you will have the opportunity to support and influence students at a critical, formative time in their life. Here at Loyola, earn a master's degree through an immersive curriculum that places you directly in Chicago's classrooms, learning from other teachers and making a difference for students right away.

Curriculum

Accredited by the Council for the Accreditation of Educator Preparation (CAEP (http://caepnet.org/)) and by the Illinois State Board of Education (ISBE (https://www.isbe.net/)), Loyola's MEd in secondary education requires 36 semester hours. Upon successful completion of the program, candidates are eligible for an Illinois Professional Educator License with endorsements in their specific major grades 9–12, and an English-as-a-Second Language (ESL) teacher.

	Hours	**9**
Year 2		
Summer		
TLSC 470B	Student Teaching for Change	4
	Hours	**4**
	Total Hours	**37**

Length of Program

Candidates complete the program in one year (Summer, Fall, Spring, and Summer). This is a full-time, field-based program. Students have five years from acceptance to complete the program.

Continuous Enrollments

Master's students in Secondary Education are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

This program follows a cohort model, enrolling a group of students who attend all of the required courses leading to a degree together. In this model, students benefit from networking and building professional relationships with one another during the course of their program. Once a cohort is formed, the students remain together for the duration of their program. The development of the cohort is contingent upon reaching the required numbers of enrolled students.

Licensure Requirements

Candidates must meet all Licensure Requirements (https://www.luc.edu/education/academics/illinoisstatelicensure/) including the Educational Teacher Performance Assessment (edTPA), which demonstrates expertise in content areas and pedagogy, as well as a reflection on classroom and clinical experiences.

Learning Outcomes

You will utilize information from theories and related research-based practices when making decisions and taking action in your classroom, using data to drive instruction and assess teaching and learning effectiveness. Plus, you will gain extensive experience engaging with diverse populations, including students labeled as English language learners, and have the opportunity to earn secondary endorsements in the following subject areas:

- Biology, Chemistry, Physics
- English
- Math
- History, Political Science, and Psychology

Superintendent Endorsement

Online - Superintendent Endorsement Certificate

Loyola's Online Certificate Program for a Superintendent Endorsement was developed in partnership with the Carnegie Project on the Education Doctorate (CPED) and an Administration and Supervision (ADSU) Advisory Board composed of active superintendents in the Chicagoland area. All members of the ADSU Advisory Board are also alumni of Loyola University of Chicago. Loyola University Chicago's Superintendent Certificate program embraces CPED's vision to prepare school district

leaders to become well-equipped scholarly practitioners who remain steadfast stewards of the profession and meet the educational challenges of the 21st century. Our Catholic and Jesuit mission is integral to the SOE commitment to research and teaching excellence. We seek to insert ourselves on the side of the poor, the marginalized, and those seeking social justice. We are uniquely positioned to use academic and professional resources to apply critical knowledge and improvement practices to promote justice for Chicago's educational community.

Loyola's Online Superintendent Endorsement is grounded in four core principles:

1. A commitment to partnerships with districts and communities
2. Scholarly inquiry to advance transformative district leadership practices
3. Support of candidate development of a critical lens to dismantle and restyle organization to provide greater access to quality schooling for all students
4. Cultivation of candidate commitment to improving and furthering district, school, familial, and community capacities.

LUC seeks to prepare district-level leaders to be responsive and adaptive, viewing superintendent candidates as apprentice professionals from the time they enter the program and fostering their development of reflective learning and transformative leadership skills. Because superintendent candidates are in school districts observing, learning, and honing their own skills in Chicagoland's diverse school districts, candidates gain extensive experiences engaging with diverse populations, including diverse learners, special needs and English learners (ELs) programs. The curricula is aligned with the NELP (2018), ELCC (2011), and ISBE Standards (2016).

We strive to purposefully dismantle traditional boundaries between institution-based and field-based scholarly work and service; to build trust and deep, lasting relationships with our partners in education; to understand that we must work not for communities but to be of those communities; working shoulder to shoulder with partners, communities and families, sharing their commitment and responsibility to address their needs, priorities, and goals from a social justice perspective. The Online Certificate in Superintendent Preparation Program is comprised of two distinct phases: Professional Inquiry and Equity Studies; and Continuous Improvement Studies: System, Community, Self, and Reflective Practice.

Curriculum

All Courses will be delivered ONLINE in HYBRID model – combination of asynchronous and synchronous class sessions. Courses will be delivered on Monday Evenings using two different course slots. Asynchronous learning modules, embedded field-based experiences and group projects will support synchronous class meetings.

Code	Title	Hours
ELPS 461	Issues in School Law	3
ELPS 464	Workshop: Superintendency	3
ELPS 465	Workshop (Variable Topics) (Instructional Leadership: Cultural Context Informed Decision Making (Rome Center))	3
ELPS 468	Problems in Finance and Business Management	3
ELPS 472	Administration of Special Education and Pupil Services	3
ELPS 475	Human Resource Administration for the School District Leader	3
ELPS 485	Instructional Leadership: Equity and Justice	3
ELPS 560	Seminar in School Administration	3
ELPS 562	Practicum School Administration	3
ELPS 562	Practicum School Administration	3
ELPS 571	Seminar in Current Issues in School Supervision	3
Total Hours		**33**

Program Requirements for Superintendent Endorsement

- Successful Completion of Loyola's ISBE Approved Course Sequence – 33 credit hours (includes internship)
- Successful Completion of Supervised Yearlong Internship - PK - 12
- Successful Completion of IPA or AA Learning Modules: Principal Evaluators Training
- Passing Score on IL's Superintendent Exam #225.
- Submitted Proof of 2 years of experience working full time as a principal, director of special education, or chief school business official, or other administrative position while holding a valid administrator license.

Program Format

The Superintendent Endorsement Certificate is an online program which means that all courses, including field supervision, are offered online. All advising and coaching sessions for leadership development and support will be hosted online for district leadership candidates.

School of Environmental Sustainability

Empowering the Next Generation of Environmental Leaders

Graduate programs in the School of Environmental Sustainability equip students with the knowledge and skills to find sustainable solutions to environmental challenges. At SES you can:

- Expand your professional impact and strengthen your interdisciplinary expertise through our Master of Science in Environmental Science and Sustainability program. Learn the skills needed to join the growing number of researchers and environmental science and sustainability specialists, while earning a degree that can advance your professional standing.
- Examine research questions in pressing environmental issues such as environmental conservation, environmental economics, invasive species, climate change, and sustainability.
- Analyze the intersection of environmental science, social justice, business practices, economic structures, and legal systems.
- Explore the United Nations' Sustainable Development Goals and Ecosystem Assessment Report that address global and interdisciplinary aspects of environmental sustainability in science and society.
- Design your own personal curriculum to gain practical knowledge and skills in this rapidly expanding career field.
- Learn from experts and researchers working together in a truly interdisciplinary team.

Program Outcomes

The SES graduate programs prepare students for careers in the sustainability field and to live integrated, environmentally sustainable lives with careers in positions such as:

- Research Associate
- Grants Manager
- Sustainable Supply Chain Manager
- Energy and Sustainability Researcher
- ESG Coordinator/Analyst
- Environmental Policy Analyst
- Project Manager
- Sustainability Manager
- Communications Manager
- Environmental Educator

SES graduates work in nonprofits, businesses, cultural and educational institutions, and government agencies such as:

- Midwest Energy Efficiency Alliance
- Natural Resources Defense Council
- EPA
- Environmental Defense Fund
- WWF
- Citizens Climate Lobby
- City of Chicago
- Chicago Botanic Garden
- The Field Museum

Graduate Programs

- Environmental Law and Policy Certificate (p. 1791)
- Environmental Science and Sustainability (MS) (p. 1791)
- Geographic Information Systems (GIS) Certificate (p. 1794)
- Sustainability Assessment and Planning Certificate (p. 1794)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

ENVS 401 Sustainable Systems - Natural Science Perspectives (3 Credit Hours)
This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them. Restricted to GRAD students.
Outcomes:
Students will be able to make logical connections between environmental science and sustainability and evaluate data and primary literature in learning best practices for making evidence-based decisions

ENVS 402 Sustainable Systems - Social Science Perspectives (3 Credit Hours)
This required core course examines theoretical perspectives on and practical examples of sustainable development at both global and local/regional scales. Restricted to GRAD students.
Outcomes:
Students learn concepts of sustainable development and system ,resilience, including history, contested meanings, strengths, and limitations of each; How change towards sustainability occurs at multiple scales using social sciences research

ENVS 410 Introduction to Environmental Law & Policy (3 Credit Hours)
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources. Restricted to GRAD students.
Outcomes:
Understand how the natural environment is controlled, managed and promoted through the legal system

ENVS 411 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk. Restricted to GRAD students.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 412 Water Law & Policy (3 Credit Hours)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 413 Energy Law & Policy (3 Credit Hours)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 420 Conservation Biology (3 Credit Hours)
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change. Restricted to GRAD students.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 422 Invasive Species (3 Credit Hours)
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause. Restricted to GRAD students.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 423 Environmental Microbiology (3 Credit Hours)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration. Restricted to Graduate Students in the ENSS-MS program.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 425 Sustainable Agriculture (3 Credit Hours)
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored. Restricted to GRAD students.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 426 Agroecosystems (3 Credit Hours)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad. Restricted to GRAD students.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 427 Food Systems Analysis (3 Credit Hours)
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change. Restricted to GRAD students.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 430 Restoration Ecology (3 Credit Hours)
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types. Restricted to GRAD students.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 432 Industrial Ecology (3 Credit Hours)
Pre-requisites: ENVS 363/463
Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.
Course equivalencies: ENVS 332/ENVS 432
Outcomes:
Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment

ENVS 433 Introduction to the Circular Economy (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Restricted to graduate students.
Outcomes:
Understand role of design in creating a sustainable future; Understand and apply: (1) circular design methods; (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 435 Ecological Economics (3 Credit Hours)
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Restricted to GRAD students.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications; Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

ENVS 436 Design for Circular & Sustainable Business (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. ENVS 436 Restricted to graduate students.
Outcomes:
Understand the role of design in creating a sustainable future; Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 438 Climate Change and Human Health (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. Restricted to GRAD students.
Outcomes:
1) Outline fundamental public health concerns associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 451 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders. Restricted to GRAD students.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 452 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 453 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 454 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 451, 452, and 453; GRAD students
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 463 Sustainable Business Management (3 Credit Hours)
Pre- or co-requisites: ENVS 410
To introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, moral, business, & economic cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 464 Sustainability Management in the Global Context (3 Credit Hours)
Pre-requisites: ENVS 464; ENVS 463 recommended
This study abroad course takes students to international destinations to learn about business and sustainability management in the global context. Students hear presentations from local experts on sustainability in government, nonprofit, & for-profit entities, visit entities that have adopted sustainability practices, & visit local cultural sites.
Course equivalencies: ENVS 364/ENVS 464
Outcomes:
Students will understand sustainability perspectives outside the US, practical examples of circular operations and strong sustainability, and global, regional, and local sustainability concerns

ENVS 467 Mammalogy (3 Credit Hours)
Pre-requisites: Graduate students only
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 469 Field Ornithology (3 Credit Hours)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior. Restricted to GRAD students.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 480 Introduction to Geographic Information Systems (3 Credit Hours)
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations. Restricted to GRAD students.
Course equivalencies: ENVS380/UNIV410
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; describe ethical issues germane to GIS; prepare/analyze GIS data in research; apply GIS in community-service projects

ENVS 481 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 480
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 482 Remote Sensing (3 Credit Hours)
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction. Restricted to GRAD students.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 483 Human Dimensions of Conservation (3 Credit Hours)
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study. Restricted to GRAD students.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 484 Conservation Economics (3 Credit Hours)
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture. Restricted to Grad students.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 487 Principles of Ecotoxicology (3 Credit Hours)
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels. Restricted to GRAD students.
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems

ENVS 488 Applied Environmental Statistics (3 Credit Hours)
Tools and methods for analyzing combined social and ecological datasets. Emphasis on learning advanced quantitative statistics and applying this to project work. Students required to include both ecological and social data analysis in their projects - working with computer programs and output written in R/R-Studio, and interpreting output from these programs. Restricted to Graduate students.
Outcomes:
Learn to analyze and apply data sets to social and ecological projects

ENVS 489 Ecological Risk Assessment (3 Credit Hours)
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced. Restricted to Graduate students.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 491 Independent Environmental Research (1-4 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Post-baccalaureate students only.
Outcomes:
Dependent on the specific research project and goals

ENVS 495 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester -or summer-long internship with a civic, business, governmental, or academic group providing hands on experience in work on environmental issues. Post-baccalaureate students only.
Outcomes:
Students demonstrate, through daily activity logs and comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 496 Research (3-12 Credit Hours)
Restricted to GRAD students.

ENVS 498 Special Topics (1-12 Credit Hours)
Pre-requisites: Post-baccalaureate students only
Specific titles and contents vary from semester to semester. Variable credit hours.
Outcomes:
Dependent on the specific course content and goals

ENVS 498L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes a lab component. Variable credit hours. Post-baccalaureate students only.
Outcomes:
Dependent on the specific course content and goals

ENVS 499 Directed Readings (1-3 Credit Hours)
Directed by an SES faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme. Post-baccalaureate students only.
Outcomes:
Students demonstrate comprehension, ability to apply information from scientific literature and synthesize information to produce cogent, synthetic analysis of their topic based on these readings

ENVS 595 Thesis Supervision (0 Credit Hours)
Students will make supervised progress towards completion of their theses. Restricted to SES, GRAD students.

ENVS 605 Master's Study (0 Credit Hours)
Restricted to GRAD students.

Environmental Law and Policy Certificate

This certificate program offers essential knowledge of critical issues in environmental law and policy. Students expand their understanding of the roles of government, industry, nonprofit organizations, and other institutions involved in environmental regulation, advocacy, consulting, and compliance.

Curriculum

Code	Title	Hours
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3

Learning Outcomes

- Understand how the legal process works as it relates to the environment, and how the process creates challenges and benefits to making good decisions
- Learn how the natural environment is controlled, managed and promoted through the US legal system through the key foundations of environmental law principles and how they have been applied and developed over time
- Gain appreciation for how environmental law and policy can impact social justice

Environmental Science and Sustainability (MS)

The SES Master of Science in Environmental Science & Sustainability takes a whole-systems, interdisciplinary approach to global environmental and sustainability challenges. The program offers a choice of two tracks, Research and Professional, and can be pursued by students of any academic background.

Students in both tracks will complete 30 credit hours of instruction, including 6 credit hours in two core courses. Research Track students will pursue an original, in-depth research project, culminating in the writing and defending of a thesis. Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

The SES Master of Science in Environmental Science & Sustainability takes a whole-systems, interdisciplinary approach to global environmental and sustainability challenges. The program offers a choice of two tracks, Research and Professional, and can be pursued by students of any academic background.

Students in both tracks will complete 30 credit hours of instruction, including 6 credit hours in two core courses. Research Track students will pursue an original, in-depth research project, culminating in the writing and defending of a thesis. Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

The SES Master of Science in Environmental Science & Sustainability takes a whole-systems, interdisciplinary approach to global environmental and sustainability challenges. Students in both tracks will complete 30 credit hours of instruction, including 6 credit hours in two core courses. Research Track students will pursue an original, in-depth research project, culminating in the writing and defending of a thesis. Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

MS in Environmental Science & Sustainability: Research Track Curriculum

Research track students will complete 30 hours of coursework and research with an SES research faculty, culminating in a final written thesis and defense.

Required Courses

- ENVS 401 Sustainable Systems - Natural Science Perspectives
- ENVS 402 Sustainable Systems - Social Science Perspectives

Electives

Work with your thesis advisor to choose from our many courses to best advance your individual interests.

Choose from our robust set of courses in environmental science and sustainability, including at least two from more than 45 courses we offer in environmental science and quantitative methods. You will also be able to choose from more than 20 of the courses we offer in Sustainable Society and Business.

Natural Science and Quantitative Courses

Code	Title	Hours
ENVS 420	Conservation Biology	3
ENVS 422	Invasive Species	3
ENVS 423	Environmental Microbiology	3
ENVS 425	Sustainable Agriculture	3
ENVS 426	Agroecosystems	3
ENVS 427	Food Systems Analysis	3
ENVS 430	Restoration Ecology	3
ENVS 435	Ecological Economics	3
ENVS 438	Climate Change and Human Health	3
ENVS 451	Introduction to Sustainability Concepts & Impacts	3
ENVS 452	Sustainability Assessment & Reporting I	3
ENVS 453	Sustainability Assessment & Reporting II	3
ENVS 454	Sustainability Plan Development & Reporting	3
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
ENVS 482	Remote Sensing	3
ENVS 484	Conservation Economics	3
ENVS 487	Principles of Ecotoxicology	3
ENVS 488	Applied Environmental Statistics	3
ENVS 489	Ecological Risk Assessment	3
ENVS 491	Independent Environmental Research (upon approval)	1-4
ENVS 495	Environmental Internship	3
ENVS 498	Special Topics (upon approval)	1-12
ENVS 498L	Special Topics with Lab (upon approval)	1-4
ENVS 499	Directed Readings (upon approval)	1-3
BIOL 495	Special Topics	1-4
BIOL 416	Limnology Lec/Lab	4
BIOL 418	Aquatic Insects Lecture & Laboratory	4
BIOL 470	Biostats & Exp Design Lec/Lab	4
MPBH 400	Determinants of Population Health	3
MPBH 401	Environmental Health	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3

PSYC 461	Attitude and Attitude Change	3
PSYC 486	Methods of Program Evaluation	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 446	Knowledge, Power & Expertise	3
SOCL 463	Sociology & Natural Environment	3

Thesis Research

Devote 12 credit hours to designing and conducting your research thesis work under the guidance of your thesis advisor and thesis committee.

Research track students are required to complete and defend their thesis to graduate.

MS in Environmental Science & Sustainability: Professional Track Curriculum

Professional track students will complete a concentration in one of the following areas as part of their 30-credit-hour graduation requirement.

Required Courses

- ENVS 401 Sustainable Systems - Natural Science Perspectives
- ENVS 402 Sustainable Systems - Social Science Perspectives

Concentrations

Environmental Law and Policy

This Concentration provides essential knowledge in relevant areas of environmental law and policy for professionals who want to better understand the role of government, industry, non-profit, and other

institutions involved in environmental advocacy, consulting, and compliance.

Code	Title	Hours
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3

Geographic Information Systems (GIS)

This Concentration provides essential knowledge on Geographic Information Systems (GIS) - a compilation of sophisticated, multidimensional software and tools used to capture, store, analyze, manage and present geospatial data. This curriculum provides essential training in the fundamental principles and concepts behind contemporary geographic mapping technology needed to solve complex geospatial problems commonly encountered in environmental sciences, urban planning, social sciences, public health, as well as business, engineering, and many more fields.

Code	Title	Hours
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
ENVS 482	Remote Sensing	3

Sustainable Assessment & Planning

This Concentration delivers valuable skills for professionals who want to better understand how organizations can - and do — measure, regulate and report their own natural resource use. Students will develop essential skills used by sustainability professionals in government, industry, non-profit, and other institutions striving to improve and document their sustainability impact.

Code	Title	Hours
ENVS 451	Introduction to Sustainability Concepts & Impacts	3
ENVS 452	Sustainability Assessment & Reporting I	3
ENVS 453	Sustainability Assessment & Reporting II	3
ENVS 454	Sustainability Plan Development & Reporting	3

Sustainable Business

Code	Title	Hours
ENVS 433	Introduction to the Circular Economy	3
ENVS 435	Ecological Economics	3
ENVS 436	Design for Circular & Sustainable Business	3
ENVS 463	Sustainable Business Management	3

Electives

SOCL 412	Qualitative Methods in Social Research	3
SOCL 446	Knowledge, Power & Expertise	3
SOCL 463	Sociology & Natural Environment	3

Learning Outcomes

- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals.
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature.
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public.
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis.

Geographic Information Systems (GIS) Certificate

Geographic information systems are compilations of sophisticated software and tools used to capture, store, analyze, manage, and present geospatial data. The GIS certificate program provides training in the use of contemporary geographic mapping technology to solve complex geospatial problems commonly encountered in environmental sciences, urban planning, social sciences, public health, business, and engineering.

CURRICULUM

Code	Title	Hours
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
ENVS 482	Remote Sensing	3

LEARNING OUTCOMES

- Understand the practical, conceptual, and technological application of GIS, including ethical issues germane to GIS; research through the use of GIS data; and use of GIS in community-service projects.
- Understand various spatial relationship concepts and their applications, including identifying methodological challenges and understanding the use of spatial data to make sound arguments in spatial problem solving and planning and policy.
- Understand the fundamental principles of remote sensing theory, including understanding the properties of light and platforms used to analyze it; understanding the concepts of landscape patterns; producing thematic maps; and becoming proficient in using ERDAS Imagine to analyze digital satellite images and scanned aerial photographs.

Sustainability Assessment and Planning Certificate

Students in the certificate program in sustainability assessment and planning develop valuable skills to help organizations measure, regulate, and report their natural resource use and environmental impact. Students learn to apply approaches that sustainability professionals in government, industry, nonprofit, and other sectors use to document and improve sustainability practices.

Curriculum

Code	Title	Hours
ENVS 451	Introduction to Sustainability Concepts & Impacts	3
ENVS 452	Sustainability Assessment & Reporting I	3
ENVS 453	Sustainability Assessment & Reporting II	3
ENVS 454	Sustainability Plan Development & Reporting	3

Learning Outcomes

- Understand the foundations of sustainability science and its economic and ethical values.
- Learn common methods for gathering data on an organizations' baseline environmental footprint (water, energy, food, transportation, landscaping, waste, etc.) and the most effective strategies for improving environmental sustainability.
- Gain experience in these skills by crafting sustainability assessments, calculations, project pitches, and sample reports.

School of Law

Academic excellence. Service for others. A focus on values and ethics.

It adds up to a superior legal education at Loyola University Chicago's School of Law. Combined with top-notch, accessible faculty who provide support and encouragement to students, Loyola University Chicago's legal education prepares you for a successful career as a practitioner, judge, legislator, administrator, business person or other endeavors.

The Loyola University Chicago School of Law curriculum:

- Provides you with the substantive knowledge required for effective and responsible participation in the legal profession
- Fosters your appreciation of the increasingly complex, global, diverse and interdisciplinary nature of law and legal practice
- Promotes your development in a range of lawyering and professional skills
- Provides substantial opportunities for your participation in real-life practical experiences and pro bono activities

- Develops your understanding of the fundamental values of the legal profession
- Promotes the Jesuit values of social justice and service to others
- Instills the idea of law as a learned profession that requires a lifelong commitment to learning, leadership and professional development
- Serves the School of Law academic mission (https://www.luc.edu/law/about/mission/)

Graduate Programs

- Advocacy Certificate (p. 1875)
- Business Law (LLM) (p. 1876)
- Child and Family Law (LLM) (p. 1877)
- Child and Family Law Certificate (p. 1878)
- Child Development with the Erikson Institute (MJ/MS) (p. 1878)
- Children's Law and Policy (MJ) (p. 1878)
- Competition and Consumer Protection Law Certificate (p. 1879)
- Compliance and Enterprise Risk Management (LLM) (p. 1880)
- Compliance and Enterprise Risk Management (MJ) (p. 1881)
- Compliance Studies Certificate (p. 1882)
- Health Law (LLM) (p. 1883)
- Health Law (MJ) (p. 1884)
- Health Law Certificate (p. 1886)
- International and Comparative Law (SJD) (p. 1887)
- International Law and Practice Certificate (p. 1887)
- LLM Program for International Lawyers (LLM) (p. 1888)
- Law (JD Full time) (p. 1889)
- Law (Weekend Part-Time JD) (p. 1891)
- Law/Business (JD/MBA) (p. 1675)
- Political Science/Law (MA/JD) (p. 1420)
- Privacy Law Certificate (p. 1895)
- Public Interest Law Certificate (p. 1895)
- Public Policy/Law (MPP/JD) (p. 1709)
- Rule of Law for Development (PROLAW MJ) (p. 1898)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Law (LAW)

LAW 100 Well-Law for Students (2 Credit Hours)
The purpose of Law School is to equip students for the practice of law. We now know, however, that for many, the law school experience comes at a high cost to their personal wellness. The goal of this course is to provide students with the introductory knowledge and tools necessary to begin to manage the stresses of school, work, and life in healthy ways. The blended learning design includes content accessed asynchronously along with live online interaction. The on-demand content consists of course readings, group discussions, wellness and meditation videos, and other self-care resources.

LAW 101 Intellectual Property and Technology Licensing (2 Credit Hours)
Depending on the section, this course emphasizes either the management of intellectual property or the business and contractual aspects of intellectual property. Both sections are geared toward the future corporate practitioner.

LAW 102 Statutory Interpretation (2 Credit Hours)
This course is designed to assist students to develop a coherent method of statutory (and regulatory) interpretation. Basic issues considered are: plain meaning; textualism; context; intent; purpose; and coherence with other statutes and applicable law. Several brief writing assignments are required. The final paper is a judicial opinion in which students are asked to interpret a statutory provision in the context of the facts of a case to which the statute has been applied.

LAW 105 Argument and Persuasion (3 Credit Hours)
Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise in that context by considering scholarly works relevant to that subject. We will consider what judges and theorists of judging say that judges do, or think they are doing, when they interpret the U.S. Constitution or resolve other questions of law through interpretation. We will also consider how an understanding of these matters impacts upon what lawyers can or should do in framing their arguments. In the final part of the course, students will apply the knowledge they have gained in the first two parts of the course by studying the opinions, briefs, and oral argument transcripts in selected Supreme Court cases. The selected cases will present distinct problems in advocacy. Students will be asked to evaluate the effectiveness of the arguments actually made in the cases and consider whether other arguments might more profitably have been made. Papers will be required.

LAW 107 Illinois Litigation Racism, Injustice & Poverty (2 Credit Hours)
This course will explore why well over fifty percent of the cases pending in Illinois courts involve taking liberty, money, or homes from poor people and how race factors into this reality. While the course will explore the interrelationship of racism, injustice, and poverty, the course will be focused on training students to try cases is these courts and win cases for poor people. The objectives of this course are to (1) to prepare Loyola students to represent poor people in Illinois courts and (2) excite their imagination about social and legal change, while empowering them to see the law as a vehicle for change.

LAW 108 American Indian Law: Indigenous Justice (3 Credit Hours)
This course examines the legal, regulatory, ethical, policy and pragmatic aspects of indigenous cultural heritage and the role of anthropology and archaeology in the United States and globally. Topics include cultural resource management in public and private contexts, participation of stakeholders, and expert anthropological knowledge in legal contexts and public participation. Topics include: the Native American Graves Protection and Repatriation Act (NAGPRA); cultural patrimony; museums; the role of government; the role of the courts; the role of the United Nations; postcolonialism; decolonizing methodologies; social justice issues; tourism, environmental and cultural relationships; oral sources; case studies and other ways of knowing the past that are embedded in law and policy.

LAW 110 Labor and Employment Law in the Education Workplace (2 Credit Hours)
.This course, which meets once a week for two hours, will explore in depth labor and employment issues in the 21st century education workplace. Students will form teams -- representing individual employees, the union, and management- and advocate their respective positions in a variety of contexts, including collective bargaining, unfair labor practice proceedings, teacher discipline and dismissal proceedings, and contract grievance arbitration. Current events and contemporaneous developments will provide the backdrop for the course materials and class activities. Topics will include: tenure, reduction-in-force and seniority rights, and teacher accountability and evaluation of professional personnel under new education reform legislation; public sector bargaining trends in Illinois and nationally; the 2012 Chicago Public Schools teachers strike; LGBT issues, free speech, and workplace right of privacy.

LAW 111 Practical Skills Boot Camp (1 Credit Hour)
Loyola has prepared you to think like a lawyer. In this intensive Boot Camp legal practice seminar, learn to be a lawyer. This seminar will help bridge the gap as you transition from law school into private practice. You will gain the personal skills, practical skills, and business sense to succeed in your legal practice from day one. Among other things, you will learn to think and behave like a practicing attorney. You will learn how to create professional correspondence, organize your practice, interact with colleagues and staff, and build a consistent book of work. You will also learn substantive litigation and transactional skills that will enhance the quality of your legal practice from day one. And you will hear from prominent attorneys in the community as to what they look for in new lawyers and what makes a successful new lawyer.

LAW 112 Operationalizing Treaties (2 Credit Hours)
Operationalizing Treaties probes the relationship between multilateral treaty implementation and economic, social, and institutional development at the domestic level. Particular attention will be devoted to treaties involving arms control, the environment, human rights, labor, and transnational crime for which economic considerations offer limited motivation for state compliance. A central theme of the course is the relation of treaty operationalization to national development.

LAW 113 Civil Procedure (4 Credit Hours)
An introduction to and analysis of the concepts and doctrines that govern the procedure followed in civil litigation, with a focus primarily on litigation pre-trial, reflecting reality. For example, various aspects of jurisdiction to bring suit, choice of law (Erie), as well as pre-trial process, including joinder of claims, parties, and discovery and motion practice are covered. Emphasis is placed on practice in the federal trial courts.

LAW 114 Advanced Legal Analysis (1 Credit Hour)
The class will strengthen students' analytical and reasoning skills. By the end of the course students will have a better understanding of how to read and extract information from cases, and synthesize multiple cases into law, as well as apply that law to new fact patterns.

LAW 117 Philosophy of Law (3 Credit Hours)
Philosophy of Law: Legal and Moral Issues of Economic Sanctions.
This course will start with a brief overview of economic sanctions in the contexts of international relations and global governance, and will then look closely at the issues of effectiveness and humanitarian impact. Throughout the course we will draw on materials from a number of sanctions regimes, including South Africa, Cuba, Iraq, and Iran. We will examine a number of ethical topics, looking at the issues of intent, consent, and moral agency in the context of economic sanctions. We will also look at a number of legal issues: whether sanctions come into conflict with international human rights law, such as the International Covenant on Economic, Social, and Cultural Rights; the problem of extraterritoriality; and the recent cases coming out of the European Courts on asset freezes, such as the Kadi case.

LAW 118 International Art Law (1 Credit Hour)
This one credit course will explore the international legal aspects involved in the art industry. For this one credit course, the materials will focus on the acquisition and ownership of art that crosses borders. Specific questions will include commissioning works of art, acquiring works of art privately through foreign dealers or galleries, or by way of auction, and the questions of competing title that arise over works of art or cultural property proceeding from war or peace time looting.

LAW 120 The Constitutional Challenge to the Affordable Care Act (1 Credit Hour)
This course gives students an opportunity for an in-depth consideration of the constitutional challenge to the Affordable Care Act (ACA) of 2010, which the Supreme Court is scheduled to decide in June. Topics include: the history of the passage of the ACA, political and popular mobilization against the ACA, the litigation history of the constitutional challenge, media coverage of the challenge, the Supreme Court's ruling on the issue, and possible implications of the challenge. Students will be responsible for periodic short writing assignments, at least one in-class presentation, and active participation in class discussion. Those who have not completed Constitution Law will be required to attend one additional session on Commerce Clause doctrine. The course will be offered on a pass-fail basis. The class will meet every other week. This course will be taught at Chicago Kent College of Law.

LAW 121 Advanced Constitutional Law (3 Credit Hours)
This course will focus on the history and substance of equal protection under the Constitution. First, we will explore the relationship of the original Constitution to slavery, and slavery's role in shaping law and constitutional doctrine. Next, we will study the Reconstruction amendments and the unusual circumstances of their adoption. Lastly, we will focus on the development of equal protection doctrine from its beginnings after Reconstruction to the present.

LAW 122 Constitutional Law (4 Credit Hours)
An introduction to the United States Constitution. Subjects include the role of the United States Supreme Court, federalism, separation of powers, and individual rights under the Constitution. Particular attention is paid to judicial power and judicial review, national legislative power including commerce power, commerce clause limitations upon state power to regulate, and presidential power and authority in both international and domestic affairs. In addition, the course covers individual rights under the equal protection and due process clauses of the 14th Amendment to the Constitution.

LAW 123 Advanced Partnership Tax (1-2 Credit Hours)
Partnerships continue to be a favored form for conducting business because of their flexibility and flow through status for tax purposes. This course examines a variety of advanced partnership taxation topics including entity classification, drafting income allocations under § 704(b) and (c), allocation of partnership liabilities, disguised sales and other gain deferral provisions, sale and acquisition of partnership interests, and the treatment of distressed partnerships, if time permits.

LAW 124 Rapid Response Refugee Clinic (2 Credit Hours)
This one-time experiential offering will pull students into the fast-moving world of refugee law, policy, and practice. Students will join a lecture, held once a week, as they take on refugee cases in a "pop-up clinic" setting. Three day-long weekend clinical sessions will be held throughout the semester.

LAW 125 Sexuality and the Law (2 Credit Hours)
No course description is available

LAW 126 Corporate Compliance Programs (2 Credit Hours)
This is a Skills course. The course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an "effective" compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 127 Law and Psychology (2 Credit Hours)
For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.

LAW 128 Interprofessional Writing and Communication for Hlth Literacy & Hlth Equity (1 Credit Hour)
Students from various disciplines including communications, law, medicine, nursing, public health, and/or social work will learn the fundamental components for good writing and communication with patients. With a focus on low health literacy populations, students will review various documents that patients need to understand for making decisions about their health and wellness, for realizing their health care rights, as well as for ensuring their safety while using health care products. Students will have an opportunity to identify poor communications illustrated within medical appointment details and medication instructions, informed consent documents, medical power of attorney forms, arbitration agreements, and healthcare marketing material. Students will write collaboratively, and problem solve through simulated exercises and hypotheticals to determine how their respective professions can work together for addressing issues of low health literacy and in doing so enhance health equity. Relevant learning outcomes and skill development include: interprofessional teamwork, analysis, as well as written and oral communications.

LAW 130 Transactional Skills Seminar (2 Credit Hours)
The course will examine the lawyer's role in business transactions by looking at examples of two decidedly different transactions - the negotiation of commercial real estate leases and the structure of the purchase, ownership, and operation of a corporate aircraft. The practical skills and knowledge acquired by examining these examples can be applied to virtually all commercial transactions. The class will consider the art of negotiating those transactions - and will focus on the role of the lawyer in those negotiations. We will consider a variety of negotiating strategies and how to deal effectively with opposing counsel who may, or may not, share your particular strategy. In addition, the class will examine a corporate aircraft transaction - with a myriad of parties and opposing interests and regulations - with the goal of appreciating the juggling and balancing necessary to achieve the best result possible. Along the way, we will look at how there is not ONE way to do things, rather there are many ways and many strategies. The rules and processes taught in law school are there to provide guidance; they are not hard and fast rules about the way that a transaction must be done. That's one of the benefits of being a transactional lawyer - the rules are set by the parties as they negotiate. Students will be evaluated on the basis of classroom participation and attendance, a paper, and , in lieu of final exam, a one-on-one negotiation session with the instructor. Regular attendance is expected; if a student cannot attend class, please notify the instructor.

LAW 131 Illinois Criminal Law and Policy (2 Credit Hours)
The course will focus on a substantive review of Illinois criminal law, its origins and evolution. It will also focus on policy decisions and trends that drive changes in criminal laws. While the focus of the course is Illinois centric, the statutes and policies reflect national criminal law and policy trends.

LAW 132 Contracts (4 Credit Hours)
An analysis of the formation, transfer and termination of contract rights and duties, and the legal and equitable remedies available upon breach of contract. This is a Juris Doctor Required course.

LAW 133 Judicial Practicum (2-3 Credit Hours)
The objectives of the course are to hone research skills, learn judicial writing skills, observe the rules of civil procedure in action, follow judicial ethics, and learn the appropriate etiquette in working with a judge and judicial law chambers staff. Students will work in a judicial chambers for 2 or 3 credits (110 hours or 165 hours of work respectively) and also complete the weekly course. The course will focus on building the skills to make this a successful experience by providing research, writing, and ethical scenarios and to translate the experience for future career planning. Students will present on a topic approved by the course instructor related to the judiciary.

LAW 134 Complex Federal Criminal Practice Seminar (2 Credit Hours)
From the convening of a grand jury to the disposition of charges, federal criminal prosecutions involve a series of complex investigative and prosecutorial topics. This class will explore complex issues involved in federal criminal law including corporate criminal liability, the prosecution of public corruption cases, involving foreign and domestic initiatives, and organizational prosecutions utilizing RICO. Taught by an experienced trial attorney, Ms. McClellan (currently an Assistant United States Attorney) the class will analyze issues surrounding the prosecution and defense of complex criminal matters. In the context of corporate criminal matters, the issues analyzed will involve the expansion of the principles surrounding corporate liability, internal and external investigations and whistle blowers after the Dodd-Frank Act. With regard to prosecutions of public corruption, the course will focus on domestic political/public corruption and foreign anti-bribery initiatives pursuant to the Federal Corrupt Practices Act. Complex criminal prosecutions aimed at organizations utilizing RICO statutes and similar remedies will be reviewed and analyzed for their efficacy. The course will focus on issues that arise in the prosecutive stage of these complex matters, beginning with the charging decisions through the disposition of the case. Questions of trial strategy will be examined, as well as, alternatives to trial, comparing and contrasting the remedies available when the defendant is an institution as opposed to an individual.

LAW 135 Copyright (3 Credit Hours)
No course description is available

LAW 136 Law & Catholic Social Thought (2-3 Credit Hours)
On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity." Did you ever wonder what this means? What is the justice that Loyola claims to support? There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. For each of these schools of thought there is a whole body of literature that addresses the basic questions of jurisprudence: What is law? What is justice? And what is the relationship between the two? What are rights? And where do they come from? How are law and morality alike, and how are they different? Is law simply the exercise of coercive power or is it something more? There is, in fact, an older school of thought from which these others are derived - a tradition that matches them in depth and rigor. The Judeo-Christian tradition has been thinking about questions of law and justice for well over two millennia. Moreover, since the late 19th century, with the advent of industrialization and urbanization and the new social problems brought on by these phenomena, the Catholic Church has been offering its reflections on questions of law and justice in a body of thought known as Catholic Social Teaching. This literature is composed of papal letters (called encyclicals), documents from the Second Vatican Council, and other magisterial texts. In the course we will read samples of this literature as we think about contemporary problems and possible legal solutions: poverty, racism, capital and labor, globalization, war and peace, environmental deterioration, the family, marriage and sexuality, cultural and religious pluralism. The course will not, however, simply be an historical review of abstract concepts and ideas within the tradition. Law is a practical art, and legal concepts and theories have meaning in application. They are best understood when their consequences are laid bare. Thus, in conjunction with the various documents from Catholic Social Teaching described above, students will also read a number of cases that will help them examine the meaning of these ideas in concrete terms. The aim of this two credit course is philosophical analysis and critical reflection. To this end, students will be required to submit a 2-4 page reflection paper every other week. The goal is for students to emerge from the course not only with a better understanding of law and justice, but with an appreciation for what their own beliefs might mean in the practice of law. The option of a third course credit is available for students who are willing to write an additional paper of at least 20-pages.

LAW 137 International Arbitration: Public and Private (2-3 Credit Hours)
This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules, multi-lateral treaties, and arbitration provisions. Through review of relevant court decisions, you will develop an appreciation for the interplay between the arbitral authority and the national courts. You will learn when and why to enter into arbitration agreements as well as how to initiate proceedings and select arbitrators, present evidence and contest and enforce awards. This seminar will be interactive with some mock exercises, including negotiating, drafting, and oral advocacy in addition to class discussion.

LAW 138 Cannabis Law (2 Credit Hours)
This course surveys state and federal approaches to regulation of cannabis. Focus includes medicinal benefits of cannabis, costs of recreational cannabis as well as costs of prohibition, jurisprudential analyses of cannabis law and regulation, the War on Drugs, and the racist history of cannabis prohibition. Course goal: prepare lawyers to respond productively to ongoing challenges to regulation and decriminalization of cannabis. Paper class.

LAW 139 The Art of In-House Counseling (3 Credit Hours)
This course will introduce students to the evolving history, roles and responsibilities of in-house legal counsel. Students will investigate the skills and characteristics that contribute to successful and effective practice as an in-house counsel and explore the similarities and differences between in-house legal practice and outside legal practice. Topics covered during the course will include: the relationship between in-house counsel and his/her client; in-house counsel's role in adding value to his/her organization; advising and counseling clients; fact gathering and investigation; managing an in-house counsel to address a variety of situations in which an in-house counsel would be expected to act. Students also will observe experienced, practicing in-house counsel address similar situations and analyze the factors and considerations that contribute to effectively addressing the situations. Students will be expected to regularly attend and participate in class. There will not be a final exam in this course. Students will be evaluated on the basis of a final project (which will involve a class presentation and a written assignment or assignments) and class participation.

LAW 140 Criminal Law (3 Credit Hours)
This course introduces the elements of crime by teaching principles that apply to many crimes. These principles include the nature of criminal acts and of criminal fault, as well as defenses such as self-protection. Homicide and other specific crimes may also be discussed, as may theories of punishment. The primary materials are statutes -- in particular, the Model Penal Code and/or the Illinois Criminal Code. This is a Juris Doctor Required course.

LAW 143 Environmental Justice: Race, Class and the Environment (3 Credit Hours)
This course explores the disproportionate environmental burdens borne by communities of color and low-income people in the United States and the role of law in contributing to these inequities and in addressing them.

LAW 144 Criminal Law Seminar (2 Credit Hours)
Criminal Law Seminar: Sentencing This course examines the modern sentencing system in the states, the federal criminal justice system and internationally. It includes such topics as: the origins and development of sentencing laws and policies; the purposes of punishment; the modern sentencing reform movement; the role of discretion in sentencing and its regulation; mandatory minimum sentencing; sentencing guidelines; race and sentencing; capital punishment; and alternative to incarceration.

LAW 146 Mass Incarceration (2 Credit Hours)
The class covers the rise of the carceral state from the 1970s onward, with a particular focus on the disproportionate impact on Black and Brown people. We trace the roots of the carceral state to slavery and its end, and then move into the war on drugs and war on crime. We will spend the semester exploring the causes of the carceral state (or mass incarceration), its consequences, particularly with respect to families and children and public health, and then we focus on how to address changes to it. Readings vary from poems and law review articles by people who have been formerly incarcerated to scholarship by historians and activists, and political scientists, and a few cases from the Supreme Court. We will have a few guest speakers throughout, as well. There are two short reflection papers assigned (6 pages each) and students are expected to participate in class discussion.

LAW 147 Economics, Empirical Studies & the Law (2 Credit Hours)
This course teaches students to apply economic reasoning and empirical analysis to understanding legal issues. This course highlights the relevance of an economic approach to the foundations of the American legal system, including property, torts, contracts, criminal law, constitutional law and civil procedure. The use of law and economics is not confined to any particular world view or policy position, this course emphasizes the broad range of analytical tools that law and economics and empirical legal studies gives lawyers and legal scholars.

LAW 149 International Intellectual Property Law (3 Credit Hours)
Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined.

LAW 150 Applied Civil Procedure (3 Credit Hours)
This course will give students practical experience with common pre-trial civil litigation tasks they will encounter in private practice. The instructor's principal goals is to expose students to the "nut and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. Specifically, this course will address: (i) conducting faculty investigations preceding and during litigation; (ii) drafting initial pleadings, such as complaints, answers, affirmative defenses and counterclaims; (iii) drafting and responding to written discovery requests; (iv) locating and producing documents/electronically-stored information, as well as the practical considerations pertaining thereto; (v) preparing for depositions of corporate representatives under Federal Rule of Civil Procedure 30(b)(6); (vi) handling discovery disputes; and (vii) negotiating and drafting settlement agreements. The instructor stresses both the requirements of the applicable procedural rules as well as more subjective topics such as civility when dealing with opposing counsel, courtroom demeanor and interaction with clients and more senior attorneys.

LAW 151 Housing Law and Policy in United States (2 Credit Hours)
The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

LAW 152 Property (4 Credit Hours)
The study of the legal principles governing intellectual property, personal property and real property, including the study of conveyancing, co-ownership, donative transfers, eminent domain, estates and future interests, landlord-tenant, land use controls and title assurance.

LAW 153 Wills and Trust Drafting (2 Credit Hours)
Pre-requisites: Estates
This is a Skills course. This is a hands-on, participative skills course in which students will learn how to properly structure and draft basic wills and trust documents, both testamentary and living. Practical tools, such as, engagement letters and client questionnaires, will be discussed and developed to give insight into the active practice of estate planning which the student can utilize in the work world. Estates is a prerequisite. Estate and Gift Tax is not a prerequisite. Students who take this class may NOT take estate planning. You may take Wills and Trust Drafting OR Estate Planning, but not both. Final grade will be based on class participation and drafting assignments over the course of the semester. Class size is limited to 16.

LAW 154 Natural Law and Natural Rights (3 Credit Hours)
The purpose of this course is to introduce students to the role of natural law in the development of the law, with an emphasis on the position of natural rights in American Law and International Law. The specific context of our examination will be the natural rights of the human person. Three interrelated objectives of this course are (1) to develop an understanding of what the natural law is and what it is not; (2) to dispel the skepticism (myths) about the role of natural law; and (3) to demonstrate the critical role in the evolution of natural human rights in American Law and International Law. Several particular rights will be examined to sharpen the focus of our investigation and discussion. Our readings will consist of primary and secondary sources complied into a reader that will be made available in electronic form. Thee is one required book that will have to be purchased, viz. Heinrich Rommen's "The Natural Law."

LAW 155 Law and the Subprime Debacle (2 Credit Hours)
Beginning in late 2007, a rash of defaults in subprime mortgages triggered a historic credit crisis. This crisis has now resulted in a historic global economic contraction. This class will examine the role of law in precipitating and propagating the crisis. Financial regulation, corporate governance, globalization, and housing law will be examined to determine the role of each in creating the crisis and amplifying the crisis. Specific solutions will be offered. Finally, an institutional assessment of law and regulation will be undertaken to consider broader reforms.

LAW 156 Abolition and Movement Lawyering (2 Credit Hours)
This class is designed to be a space for reimagining our world, and how we, as lawyers and future lawyers, can work to dismantle the systems of White supremacy and oppression that incarcerate, punish, and harm Black and brown people in the U.S. while failing to prevent, address, or repair harm or facilitate accountability. Abolition is not just about the dismantling or absence of systems, but as Ruth Wilson Gilmore states, abolition is about presence. Movement lawyering/community lawyering is about taking direction from directly impacted communities and from organizers, as opposed to imposing our leadership or expertise as legal advocates. What can we work to build that is life-affirming instead of life-destroying, that is in solidarity and not another manifestation of the underlying problems? This class will discuss the difference between reform and abolition, the history of abolitionist organizing in Chicago, and the historical and current role of lawyers in social movement.

LAW 157 Persuasion (3 Credit Hours)
Starting with basics from the Greeks, this course develops oral persuasion skills, including effective performance, writing for speaking, and handling difficult speaking situations. Assignments will include presenting persuasive speeches, persuading tough audiences (such as clients), and analyzing famous speeches for what made them effective. Students will give a short speech at almost every class and critique one another, so attendance is mandatory.

LAW 159 Tax Policy and Inequity (2 Credit Hours)
The objective of this course is to explore the history, evolution, and racial impact of tax policy in the United States. Students will explore the various theories of taxation's role in modern day society; examine the purpose and intent of tax on incomes, consumption, "sins" and assets; highlight the role interest groups play in tax policy and discuss the disparate impact such policy has on communities of color (namely black and brown). Students will be tasked with learning and discussing the intricacies of federal and state and local tax law. They will also write a tax policy that seeks to encourage and/or discourage a societal behavior, which will be discussed and analyzed from various stakeholders' perspectives.

LAW 160 Education Policy and Practice: Counseling the School District (3 Credit Hours)
This course will allow those interested in the practice of education law to become familiar with typical and unique issues that require contact between school districts and their attorneys. Students will work individually and in teams to identify resolutions to school district issues. The relationship between attorneys, boards and administration will be investigated. In class sessions are three hours per week to cover practical situations and to develop skills tailored to the practice of education law. The course will focus on typical scenarios, as well as the increasing number of, and breadth of, issues requiring legal assistance.

LAW 162 Torts (4 Credit Hours)
A basic course in the substantive law governing compensation for injuries to property and to the person. Considered are intentional wrongs, negligence, malpractice, products liability and strict liability; invasions of personal integrity and emotional well-being; injury to tangible and intangible rights in property; liability insurance and alternatives; and damages. Other risk-bearing alternatives are considered and contrasted with the traditional common law theories. This is a Juris Doctor Required Course.

LAW 164 Mergers and Acquisitions (3 Credit Hours)
This course will introduce students to the issues that arise in merger and acquisition transactions. Students will study the legal framework within which merger and acquisition transactions and the negotiation and documentation of such transactions take place. Students will analyze the considerations involved in selecting various structural alternatives for merger and acquisition transactions, examine the dynamics of the merger and acquisition transactions negotiation process, investigate the various stages of merger and acquisition transactions and focus on the lawyer's role in adding value to such transactions. Students will also have the opportunity to study, evaluate, draft and/or negotiate various types of documents that are commonly encountered in merger and acquisition transactions (such as, confidentiality agreements, employee retention agreements, investment banker engagement letters, letters of intent and purchase and sale agreements.) There will be a take-home final examination. Students taking this class would benefit by having previously taken Business Organizations and Securities Regulation; these classes are not, however, required to take the course.

LAW 165 Comparative Products Liability (2 Credit Hours)
Comparative Products Liability will use products liability as the vehicle to learn comparative law in general, and, in particular, to learn about how product-related harms are dealt with in the U.S., EU, the UK, and Italy. The course will include an Introduction to Products Liability & Safety Law but will also analyze Products Liability Law in the U.S. prior to section 402A of the Restatement and in the EU, UK, and Italy prior to the EU Products Liability Directive; the Adoption of Strict Liability in the U.S. and Europe; Strict Liability in Europe after the Directive; some Basic Rules under the 402a, the EU Directive, the CPA & Italian Law; and finally, a discussion of The Future of Products Liability and Safety.

LAW 166 Education Law Practicum (1-4 Credit Hours)
This seminar addresses substantive education law issues and skill development tailored to the practice of education law. Topics to be explored may include systemic reform litigation in education law, special education litigation, school discipline reform, the role of implicit bias in school decision-making, litigation related to trauma-informed practices, bullying litigation, and receiving feedback. This seminar may optionally be paired with a field placement in the area of education law. Placement options include local organizations, school districts, law firms and government agencies. Students must separately register for the field placement component for 1-3 credits (Law 166-002). No permission is required for the seminar portion of this class. Students may enroll in this seminar without registering for the field placement component. Students registering for the field placement component (166-002) must enroll in the seminar component (166-001).

LAW 170 Race and Real Estate (2 Credit Hours)
The objective of this course is to understand the laws and policies, politics and financial systems in our country that established and sustained segregation, creating our cities' black slums, ghettos and urban neighborhoods. The course would address federal, state and local legal systems, with particular emphasis on Illinois and Chicago. It would cover the Fair Housing Act as well as the Kerner Report; FHA policies, including the Underwriting Manuals that led to redlining; zoning laws and urban planning; public housing and HUD's HOPE VI program; the legality of restrictive covenants; as well as case law related to each of these areas. And finally, this course would address where this has led us to today: the policies, laws and regulations that have attempted to reverse segregation, and those that continue to allow discrimination to continue by exploiting and financially devastating minority neighborhoods.

LAW 171 Comparative Criminal Procedure (1-2 Credit Hours)
Comparative Criminal Procedure focuses on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutors role and plea bargaining, the role of defense counsel, the role of evidentiary and constitutional rules of exclusion of evidence, and, as an example of the substantive criminal law, the law or rape. Course materials include a short, thoughtful critique of the American system, "Trials without Truth", by Professor William Pizzi of the University of Colorado; and a course pack of law review articles. The format is a mixture of lecture and classroom discussion, including role play exercises in witness examination and argument, at trial and at motions to suppress. Three Italian guest lectures are expected to participate as in the past: a prominent magistrate; a defense lawyer/law professor, and a prominent literature/film scholar whose focus will be on the current status of women in Italian society (relevant to our consideration of the law of rape).

LAW 173 Advanced Education Law Practicum (1-4 Credit Hours)
This course is for students who have already completed the Education Law Practicum seminar course and field placement. Students will build on the knowledge and skills gained through the Education Law Practicum by engaging in a second field placement, either with an organization or firm where they have been placed previously or with a new education law-related placement. More information about available placements is available on Pearson. The application form is available here. The seminar component of this class will be conducted in-person for 6-8 sessions; the days and times will be selected based on instructor and student availability. This course includes an instructional component that includes seminar discussions and individual meetings with a faculty member to develop skills, enhance understanding of ethical and other practice issues, and discuss cases and legal issues in students field placements. The class aims to deepen students knowledge of current legal and policy issues related to educational inequity, with a focus on race, ethnicity, disability, gender, and their intersection and the role of lawyers in addressing educational inequities. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may participate in Loyola's Educational Advocacy Project as an alternative to an external field placement. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor.

LAW 175 Natural Resource Law (3 Credit Hours)
This is the broad survey course on Natural Resources Law. We will explore the protection and multiple uses of natural resource systems; regulation of federal public lands; forests; the National Park System; the Wilderness Preservation System; tribal lands; fish and wildlife management (including the Endangered Species Act and other sources of protection for fisheries and marine mammals); and rangelands. There will be a take-home final exam and in-class presentations.

LAW 176 International Trade Law (1-3 Credit Hours)
The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world and how the proliferation of mega-regional trade agreements and trade wars and COVID-19 have affected the global trading regime. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper requirement in the course will develop writing and argument skills.

LAW 177 Introduction to Chinese Law (1-3 Credit Hours)
This variable-credit course provides students with an overview of the modern Chinese legal and political systems and lawyering in China. With an economy and society undergoing rapid change, China is facing many challenges as it makes the transition from a socialist to market economy with Chinese characteristics. The course is divided into two components (with a little Chinese culture, language, and survival tips sprinkled in as appropriate). Spring semester component (1 credit): Adopting a "law-in-action" approach, this course will introduce students to the philosophical and historical foundations of Chinese law and China's present legal system, sources of law, and legal/political institutions; it also will explore specific substantive areas of law in modern China, including constitutional law, civil and criminal law and human rights. Beijing campus summer component (1 credit, compulsory for 1Ls): introduction to Chinese commercial law, focusing on laws applicable to US companies doing business in China, and the pitfalls of which international legal practitioners should be aware when representing clients doing business in China or with China companies. Specific substantive areas of law include FDI, operational issues, due diligence, IP and dispute resolution. Note: students enrolled in the two-credit option may interview for one of two summer internships at Sheppard Mullin Richter & Hampton's Beijing campus. Other Beijing internships may be available. [Study Abroad China]

LAW 178 Antiracism Under Law (2 Credit Hours)
This course will examine the role of the law in replicating our nation's racial hierarchy as manifest across indicia of socio-economic well-being. The class will also analyze various legal means for disrupting this hierarchy. In particular the court will assess the underlying legal dynamics of all material racial disparities along with legal solutions for the diminution of such disparities. The course will take a social justice approach to the continued influence of race on social well-being. As such, the course will focus on the legal system's ability to secure broad-based and sustainable human development, and to actualize the full potential of the entire US population. The course will consider theories suggesting that law should promote the common welfare and secure liberty for all.

LAW 179 The Law of Jury Selection (2 Credit Hours)
This course will focus on the various legal and practical considerations that attorneys must face both during and following the jury selection process. The course will cover: constitutional issues; what must be proven to establish bias; the role of trial consultants (particularly in high profile cases); challenges to the array, challenges for cause and peremptory challenges; timing and procedural limitations; the significance of group dynamics; questioning techniques and the use of questionnaires; problems at trial and during deliberations; and the extent to which the parties may be entitled to examine prospective jurors in various areas of inquiry (such as occupation, education, knowledge of the case, legal and government experience, religious and educational beliefs). Students will participate in mock voir dire, prepare a draft questionnaire, and complete a final paper (7-10 pages).

LAW 180 Comparative Consumer Law (1 Credit Hour)
This course will be taught by Illinois Attorney General Lisa Madigan, assisted by Dean Jean Gaspardo. The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks ["too big to fail"] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private remedies in compensating victims of consumer fraud and abuse. The statutory and common law protections for consumers, under Illinois law will be compared with the consumer protection regimes in Italy and in other countries. This is a Perspective Elective course.

LAW 181 Supreme Court Seminar (4 Credit Hours)
The aim of this seminar is to provide students with a deeper understanding of the Supreme Court of the United States, its personnel and work, and the important role it plays in American government and society. Students will consider the processes by which Justices are appointed to the Court; the standards and processes the Court uses to choose cases for review and decision on the merits from among the multitude decided each year by the lower courts, leading to the creation of precedents of national applicability; the ways in which advocates endeavor to persuade the Court that it should (or should not) grant review in a particular case; and the ways in which the so-called "merits cases" (those in which review has been granted) are briefed, argued, and decided. A substantial part of the semester will be devoted to the study of a small number of cases currently pending before the Court, either as candidates for review or for decision on the merits. Students will learn about the work of the Court by studying briefs that were actually filed and transcripts or recordings of oral arguments. The class will also discuss cases by simulating the Court's conference. Students will be required to write a series of short papers and a judicial opinion in one of the merits cases to be discussed.

LAW 184 Advanced Litigation Skills (2 Credit Hours)
Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

LAW 185 Business and the Law (2 Credit Hours)
The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting. The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation, partnership or limited liability company) and the alternative ways of structuring a business acquisition or merger. The second segment, entitled "The Ethical Practice of Business Law" will explore the pressures on new lawyers to conform to an existing culture, how lawyers get into trouble, and how business law can be practiced in an ethical manner. The third segment, entitled "Developing a Financial Mindset" will introduce planning tools (e.g., the time value of money, compound interest) and the planning process in the context of both personal financial planning and business planning. Certain classes may be taught with other professors and practicing lawyers. There will be no final exam in this course. Students will be required to take a mid-term exam and to submit a short final paper. Class participation may also be taken into account. Students will also be expected to read the Wall Street Journal on a daily basis. This course is available to first-year students only.

LAW 186 Advanced Issues in Family Law (2 Credit Hours)
Learn everything you need to know to be a successful associate in a domestic relations firm. Most family law firms have little or no training programs. Theoretical knowledge of the law is not enough to step into a firm and start practicing. This course is designed to teach you all of the practical basics Partners want you to know as an Associate family law attorney. This course addresses the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes. Topics will focus on developing the skills necessary to excel in domestic relations practice such as strategic planning for a dissolution of marriage case, complex financial analysis, developing and maintaining the attorney client relationship, and practical drafting skills. This is a Skills course.

LAW 189 Employment in the Gig Economy (3 Credit Hours)
No course description is available

LAW 190 Legal Writing I (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.

LAW 190R Basic Legal Research (0 Credit Hours)
This course is an introduction to the tools and sources of legal information you will need during your first year of law school and beyond. This course is a pass/fail component of Legal Writing I.

LAW 192 Legal Writing II (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.
Course equivalencies: LAW 192 / LAW 591

LAW 193 Diversity and Inclusion: A Professional and Social Responsibility (2 Credit Hours)
This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings--all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course. There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

LAW 194 Bar Exam Writing Skills (1-2 Credit Hours)
The Bar Exam Writing Skills courses focus on refining your memorization, analytical and writing skills and all skills that are necessary for the bar exam. Whether you need practice writing essays or synthesizing the facts and law and producing a legal work product, these courses will help you master your test-taking skills. This is a Bar course.

LAW 195 International and Comparative Antitrust (2 Credit Hours)
This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgements in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed. Assessment: Class participation (10%), two small class presentations (10% each, in total 20%), 6500 words essay (70%). Note: For the purposes of this module students may be required to watch Hollywood movies and YouTube clips!

LAW 196 Alternative Dispute Resolution Workshop (1 Credit Hour)
One credit workshop focusing on dispute resolution in an employment setting. Workshop takes place over two days. Both the first and second day of the workshop involve resolution of an EEO complaint in full length simulations -- the first day using mediation, and the second day resolving the dispute using arbitration. Students are expected to read and research in preparation for both days of the workshop. Participation in the one credit workshop requires attendance in an evening Human Resources and Employment Relations (HRER) course. Students will be assigned to teams and will begin working with HRER team members at this evening session. Each workshop day is followed by a debriefing session. All participants will be observed and evaluated by employment attorneys skilled in ADR. Enrollment is limited to students simultaneously enrolled in Professor Sacha Coupet's other ADR course and students who are seeking an intensive mediation and arbitration experience in addition to that provided by the foundational ADR course.

LAW 197 Advanced Business Organizations including a Comparative Perspective (2 Credit Hours)
This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors' elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students with a better understanding of American law of corporations. The course covers the most recent legislative and regulatory initiatives as well as the most recent case law pertaining to Corporate Governance.

LAW 198 The Fundamentals of School Law (2 Credit Hours)
This course provides an overview of statutory, administrative and case law affecting Illinois school districts. Legal issues addressed include: powers and duties of the school board; compliance with open records and open meetings laws; teacher tenure, evaluation, reduction-in-force, and for cause dismissal; collective bargaining and labor dispute resolution; legal aspects of supervision, teacher/school liability, common law and statutory immunities; mandated child abuse reporting. Student issues include state law requirements pertinent to residency; discipline, drugs/weapons offenses, suspension and expulsion; federal and state student confidentiality laws.

LAW 199 Business Valuation (2 Credit Hours)
Attorneys play an active role in business transactions every day in connection with mergers and acquisitions, estates and gifts, divorce, filings with the SEC, etc. This includes attorneys who are in private practice or in with a company. Understanding business valuations and financial statements form a cornerstone of most of these transactions. In fact, the business world today and the financial work involved demands that today's lawyer understand the value and financial reporting of a business. This course will help attorneys to better understand the methodology and techniques involved in business valuations. This will also include basic financial statement analysis. Topics will include the proper standards for valuation, valuation methodology, cash flow analysis, financial analysis techniques, financial reporting issues, international standards, and specific uses of valuations.

LAW 200 Emerging Issues in Public International Law (1 Credit Hour)
Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. NOTE: This course is available as a 5th credit (ungraded) and only to Loyola University Chicago students because it continues as a research practicum in Chicago after the program. Non-Loyola students are welcome to sit in on the lectures.

LAW 201 Academic Tutor (2 Credit Hours)
Academic tutors assist first-year students with their doctrinal courses. This assistance includes holding office hours, reviewing outlines, and conducting skills workshops. Tutors are selected through an interview process. Academic Tutors receive up to two hours of ungraded credit for each semester in which they tutor.

LAW 202 Human Trafficking Seminar (2 Credit Hours)
The sexual exploitation and trafficking of minors has reached a crisis point, both in the United States and abroad. The United States Congress has responded to this ever-increasing threat by passing extensive legislative enactments aimed at deterring this pernicious activity, providing severe - and often controversial - punishment for those who engage in it. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim advocates and pretrial service officers, may appreciate the laws on the proverbial books, but often lack familiarity with the sophisticated means employed by organized criminal group and the role of public corruption involved in the large-scale exploitation of children. They also misunderstand the rationalization through which individuals engaged in the exploitation of children tend to self justify their conduct, and have never confronted the statistical realities challenging the belief in meaningful rehabilitation of sex offenders. Put simply, although the complex and inter-related legislative anti-exploitation and anti-trafficking framework is now the firmly established law of the land, its theoretical and practical nuances are widely misunderstood, and indeed are all too frequently not understood at all, by the very professionals entrusted with the difficult task of protecting humanity's most vulnerable. This seminar will start with the statutory analysis rendered more comprehensible through the vehicle of real-world examples from the experience of Judge Kendall who will explain the history and present-day reality of the federal response to child exploitation. The seminar will analyze the various laws that govern the roles of the stakeholders: prosecutors, defense attorneys, judges, immigration officials, pretrial services officers, and victim advocates. The seminar will further explore all of the victim issues that make these cases complex and challenging. Students will explore victims' needs, rights, and opportunities for redress including restitution and expungement of criminal records. Students will hear first hand from federal agents who have prosecuted human trafficking cases; will see and hear the evidence presented to federal juries, will hear from a victim of the crime, and will learn from those victim advocates who seek to redress the harms inflicted upon victims. The seminar will span two days and have multiple speakers and employ an interactive question and answer format. Students will be required to submit a 15 page paper on a topic of interest from the seminar for a final grade. This is a Skills course.

LAW 203 Bar Examination Workshop (0 Credit Hours)
This class is designed to help students develop writing skills that are essential for success on the essay portion of Bar Examination. It is structured as an intensive, interactive writing workshop.

LAW 204 Adoption Law Seminar (2 Credit Hours)
This is a seminar course that will give the student an overview and basic understanding of the fundamental legal principles of adoption, as well as the different types of adoption, such as domestic agency, private, international, foster care and relative. Related issues in reproductive technology will also be explored including surrogacy, donor gametes (egg and sperm donation) and embryo donation. The class will feature role-playing as well as guest speakers to give the student different perspectives on adoption and reproductive technology. Students will draft the pleadings for a simple adoption, attend adoption court, and argue the merits of a contested case.

LAW 205 Video Game Law (2 Credit Hours)
This seminar will examine the varied legal issues that have spawned (and continue to spawn) in the video game space. Still a relatively new industry that continues to evolve at a breakneck pace, video games require lawyers to address substantive areas of law in new ways, particularly copyright and trade. This course will be taught at IITChicago-Kent Law School.

LAW 206 Sex Trafficking: International Comparative Law (1 Credit Hour)
This class will examine the ways countries attempt to regulate sex trafficking. This class will compare and contrast the Nordic and Dutch models of sex trafficking legislation. This class will engage a comparative analysis of each of the aforementioned nation's attempts to regulate sex trafficking, as well as relevant statistics.

LAW 207 Internet Speech Seminar (2-3 Credit Hours)
The course will explore First Amendment jurisprudence as applied to Internet communications as well as the regulation of Internet content in such contexts as incitement, speech that promotes or facilitates criminal acts, true threats, matters relating to national security, obscenity, indecency, and child pornography. Other topics covered include on-line defamation, including immunities under Section 230 of the Communications Decency Act and claims involving anonymous communications, privacy interests, data mining, on-line profiling, as well as regulatory and statutory approaches to privacy protections. Some attention will be paid to copyright and trademark claims, disputes relating to domain names, and the Digital Millennium Copyright Act. This course will be a 2 hour course with an examination. Students interested in writing a paper may do so for an additional hour of credit. This is a Perspective Elective course.

LAW 208 Advanced Criminal Law (2 Credit Hours)
In this course, you make the choices that lawyers make in real-world cases. We break down how to apply statutes to fact patterns in a repeatable, step-by-step method, using excerpts from the Model Penal Code. We also hone skills such as eliminating errors in writing. Finally, we question some of the core values underlying our laws. There is no exam, and the grade is based primarily on class participation and on a final presentation in which you discuss a topic of your choice.

LAW 209 Law, Life and Jesuit Spirituality (2 Credit Hours)
Drawing from their legal and personal experiences the students will actively participate in this seminar styled course which examines complementary articles, films, Jesuit documents and Sacred Scripture as objective criteria for their personal reflection and class discussion. The goal of the course is to formulate and hone the skills of reflection, meditation and contemplation as means of developing a spirituality garnered from a Jesuit perspective. Students will be expected to present and lead classroom discussion, submit a brief weekly reflection paper, and present a summary at the end of the course. (Costello)

LAW 210 Evidence (4 Credit Hours)
An evaluation of the rules used to present information to a fact finder in a trial. The three primary units are the rules of relevancy, the rules governing witnesses, and the rule against hearsay. In addition, time is spent on privileges, writings, and demonstrative evidence. The Federal Rules of Evidence provide the focus. This is a Bar course.

LAW 212 Civil Rights (2 Credit Hours)
Pre-requisites: Constitutional Law
The course will focus on the post Civil War constitutional amendments (13th, 14th and 15th Amendments) and the various federal civil rights statutes that have been enacted thereafter in both the 19th and 20th centuries. These laws as a whole are designed to guarantee that all Americans receive equal treatment under law.

LAW 213 Canon Law and Catholic Health Care (2 Credit Hours)
According to the Catholic Health Association of the United States, there are Catholic health care systems and facilities in all 50 states, providing acute care, skilled nursing and other services including hospice, home health, assisted living and senior housing. Over 15% of all hospital beds are operated by Catholic health care systems. Catholic health care supports over 20% of the hospitals in 24 States, and more than 30% of all hospitals in eight States. Catholic health care must comply with both civil law and ecclesiastical law. Knowledge of the Church's own legal system, known as canon law, and how it interacts with civil law is essential for lawyers and administrators responsible for the management of ecclesiastical entities such as Catholic hospitals and health care systems. Examples of specific issues would be in the areas relating to Catholic identity, sponsorship, mergers and joint ventures involving Catholic health care institutions; incorporation and tax-exempt status of religious organizations; the acquisition and sale (alienation) of ecclesiastical property; wills, estates, bequests and gifts involving ecclesiastical goods; liability for clergy and employee misconduct; immigration law aspects of foreign religious workers; and the interface between government regulations and the Church's ethical and religious directives. Moreover, the Ethical and Religious Directives for Catholic Health Care Services issued by the United States Conference of Catholic Bishops present the theological principles that guide the Church's vision of health care. This course will examine in detail the two-fold purpose of the Ethical and Religious Directives: first, to affirm the ethical standards of behavior in health care that flow from the Church's teaching about the dignity of the human person, and second, to provide authoritative guidance on certain moral issues that face Catholic health care today. Canon Law and Catholic Health Care should be of particular interest for law students and business students interested in the management of Catholic health care institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law and Catholic health care.

LAW 214 Race and the Law (2-3 Credit Hours)
This course covers interdisciplinary, critical perspectives on race and racism and the roles of law and history in shaping the meanings of race in the United States. We will study the histories of the major racialized groups in the United States: African Americans, Indians, Latinos/Latinas, Asian Americans, and Whites. We will also study the differing implications of enslavement, conquest, colonization, and immigration. We will explore how race and racism play out in selected areas such as equality, education and crime and explore significant current events and findings such as: important studies of implicit bias; the Voting Rights Act and allegedly race-neutral restrictions on voting; disparate treatment of minorities in the criminal justice system; and demographic changes and their implications. I expect each student to complete a 25-page research paper on a subject of her choice related to the course. I will work with you to develop a topic and to organize your research in productive ways. Your final grades will be based primarily on your papers, together with your preparation for and participation in class. I.E., you must also do the reading for the course to get anything out of it. There is no final exam in this course. This is a Skills course.

LAW 215 Domestic Violence Practicum (1-3 Credit Hours)
The Domestic Violence Law Practicum provides students with a live-client experience (LCE) through the provision of legal advice and brief services to families served by supervised visitation-exchange centers as part of the Justice for Families program. Student LCE work will be supervised by an experienced domestic relations attorney. Students who participate will be required to attend a seminar designed to complement the LCE work. Students will gain experience with a range of lawyering skills including client counseling, case planning, and written and oral advocacy. The practicum will provide students with training on the substantive law of domestic violence, family law and other areas of law that are likely to impact clients served by the supervised visitation centers. Supervised visitation center clients will sign up for advice an counseling sessions with law students on weekends and possible weeknight appointments. Parents who are utilizing any of the supervised visitation centers will need advice and brief service regarding modification or adjustments to the visitation related remedies in their Order of Protection. Any motions which follow this limited pro se support are filed on a self-represented basis and will not include student court appearances. Referrals for legal representation will be offered in instances in which this is appropriate.

LAW 216 Women and Leadership (2 Credit Hours)
Women & Leadership is a one credit, seven week seminar course for law students that examines the obstacles (internal and external) that prevent women from reaching leadership positions in proportional numbers. Over the course of seven weeks, students engage in dialogue in response to assigned readings and self-assessment tools. Students also hear from female leaders working in different areas of legal practice who will discuss their experiences and the decisions that helped shape their careers. Grading is based on participation and a final paper.

LAW 217 International Climate Change Policy (1 Credit Hour)
Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and approaches to involving the developing world in climate change mitigation.

LAW 219 The Challenge of Green Energy (2 Credit Hours)
This seminar will take an interdisciplinary approach to the intersection of environmental and energy issues. It will introduce students to a variety of solutions to the problem of pollution from the energy sector. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequestration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

LAW 220 First Amendment Rights (3 Credit Hours)
This course examines the history, theory, and jurisprudence of the First Amendment, with particular emphasis on the speech, press and religion clauses.

LAW 221 Administrative Law (3 Credit Hours)
This course examines the rules by which federal administrative agencies operate, including the source of administrative authority and procedures governing the exercise of that authority, and considers problems of delegation, agency rulemaking, adjudication and enforcement powers, judicial review of administrative action, and due process requirements.

LAW 222 Housing Discrimination (2 Credit Hours)
This class will introduce you to U.S. housing laws and policies with a focus on fair housing and fair lending. The class will provide an overview of civil rights litigation strategies and compliance with federal regulations from the perspective of a variety of participants in the housing market, including lawyers, developers, tenants, banks, government officials, and fair housing organizations. In addition to addressing housing policies and the intersection between segregation, housing discrimination and gentrification, the class will also examine leading cases in fair housing litigation. It will also focus on alternative dispute resolution of housing discrimination cases, and students will participate in a mock fair housing mediation. The class will be conducted in an open discussion format. There will be opportunities during the semester to focus on housing issues that the class finds most interesting and explore those more in depth.

LAW 223 Climate Change Law & Policy (2 Credit Hours)
Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and efforts to involve the developing world in climate change mitigation. The class will also focus on U.S. law and policy, including regulation of greenhouse gases under the Clean Air Act and other statutes, federal litigation, and state and regional efforts to mitigate climate change. Finally, we will cover adaptation efforts at various levels of government, as well as geoengineering. Assessment will be based on in-class exercises, regular class participation, seminar papers, and presentations.

LAW 224 Student Initiated Capstone Project II (1-4 Credit Hours)
This variable credit course may be repeated for a maximum of four credits.

LAW 226 Negotiating and Drafting a Retail Lease (2 Credit Hours)
This course will examine the basics of retail leasing by studying a sample lease. Students will learn both the Landlord's and Tenant's perspective of a lease by negotiating and drafting lease provisions for both parties. Each week the students will participate in a mock negotiation of the provisions studied the previous week. The only text for this course will be a sample lease which will be provided by the instructor.

LAW 227 Transportation Law (2 Credit Hours)
Transportation and logistics is a multi-trillion dollar industry. Every item you purchase or use in your everyday life was delivered by a truck or other mode of transportation (rail, ocean, air). America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various policy forms that exist. This course will be taught at Chicago Kent College of Law.

LAW 228 Sexual Harassment Law (2 Credit Hours)
This course focuses on the development of legal theory, precedent, and governmental regulation of sexual harassment in the workplace, educational institutions, and public accommodations. Students will learn about the continuing evolution of sexual harassment law regarding male-on-male harassment, unionized workplaces, intersectionality of race and gender, and vicarious liability. Skills used by attorneys who practice in this area will be discussed, including litigation, alternative dispute resolution, policy development, investigation, and training. Additionally, the class will take a critical look at conceptions and misconceptions regarding this legal issue in other arenas such as culture and politics.

LAW 230 Negotiable Instruments (3 Credit Hours)
The course examines the law of commercial paper (negotiable instruments payable in money) as codified in Articles 3 and 4 of the Uniform Commercial Code. The formal requisites of the various types of instruments are considered, as are the rights and liabilities of the several parties to such negotiable contracts. The concept and legal significance of holding in due course is treated in depth. Approximately one-third of the course concentrates on the mechanics of bank collection of checks and the related law as incorporated in Article 4 of the Code. This is a Bar course.

LAW 231 Secured Transactions (3 Credit Hours)
This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property (both tangible and intangible) as collateral to secure payment or performance obligations. Course materials cover creation of the security interest, effectiveness of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure. Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical considerations that should inform their work with the UCC. Article 9 is also tested for the bar exam, so this course will have some immediate pay-offs for law students, irrespective of their intended career path. I will use anonymous polling software to facilitate class discussions. Class time will be split between lectures that give the essential principles of each topic we study and interactive question periods as we work through hypothetical problems contained in the text book.

LAW 232 Bar Exam Fundamentals (2 Credit Hours)
Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep.

LAW 233 Bankruptcy (3 Credit Hours)
This course will provide a comprehensive survey of basic bankruptcy law. We will devote roughly equal time to consumer bankruptcy and business bankruptcy. Throughout the course, we will touch on the economic, political, and ethical issues underlying bankruptcy's competing goals: providing overextended consumer and business debtors with a fresh start and satisfying creditors' claims in an orderly, fair way. There are no prerequisites. Students' grades will be based on classroom participation and a take-home final exam. (Krivinskas-Shepard) This course will provide a comprehensive survey of basic bankruptcy law. There are no prerequisites. Students' grades will be based on a take-home final exam. (Rosenberg)

LAW 234 Comparative Domestic Violence (1 Credit Hour)
This course will examine the dynamics of domestic violence and compare and critique how different countries' laws recognize and respond to the problem. The course also will explore the theoretical frameworks for understanding domestic violence as a violation of international human rights and the role and responsibility of governments to respond to the problem.

LAW 235 Employment Discrimination (3 Credit Hours)
An in-depth study of the national policy opposing discrimination in employment and the ways in which this policy is addressed by federal and state law. While the focus is Title VII of the 1964 Civil Rights Act, numerous other sources of worker protection are examined, both substantively and procedurally.

LAW 236 Entertainment and Sports Law (2 Credit Hours)
This seminar will introduce students to the real world(s) of sports and entertainment law, examining the separate and distinct bodies of law and practices of both, while giving due to the many commonalities between the two fields, from intellectual property to professional contracts. As legal issues in both sports and entertainment law frequently appear in the headlines, this course will address up-to-the minute issues, while covering the seminal topics and cases within each, both in litigation and transaction. Guest lecturers may participate, as their schedules permit. As there will be efforts made to accommodate guests relevant to this course, the syllabus will be in flux. Further, attendance and class participation are required, making up a significant portion of the grade along with a take-home final examination. Reading assignments can be significant on a weekly basis relevant to the upcoming week's topic.

LAW 237 International & Comparative Law (1-2 Credit Hours)
This one credit course explores issues in family law from an international and comparative perspective. The course examines the legal relationship among families and the state, with special emphasis on how human rights doctrine has shaped the role of government in family life. The course compares and contrasts primarily American and European family law on a number of issues, including regulation of marriage, divorce and human rights within the family. Within the short time that we will be meeting, we will address through reading, film and extensive discussion how concepts of "family" emerge within public policy and law, how cultural norms shape rules for entry to and exit from marriage, and how human rights law impacts families and the individuals within the family.

LAW 238 Comparative Law Seminar (2-3 Credit Hours)
Comparative Law Seminar: Chile. This seminar will introduce students to comparative legal research in the context of Chile. Each student selects a topic on which to do comparative research. Classroom sessions will introduce students to the civil law tradition, the basis of law in Chile. Through our sister law school in Chile, Universidad Alberto Hurtado, students spend the week of spring break in Santiago experiencing the Chilean legal system and conducting interviews with individuals who are expert in the area in which they are researching. Students make a classroom presentation and write a paper on their topic.

LAW 240 Criminal Procedure:Investigation (3 Credit Hours)
This course provides a general overview of the criminal justice process, and focuses on the constitutional and other legal requirements that affect law enforcement practices and procedures. Specific topics may include confessions and interrogations, identification procedures, arrest, search and seizure, surveillance, police entrapment, and the right to counsel. This is a Bar course.

LAW 241 Criminal Procedure: Adjudication (3 Credit Hours)
This course is designed to provide a detailed examination of the criminal judicial process, pre-trial to post-trial, and includes an examination of: prosecutorial discretion, right to bail, pre-trial motions, double jeopardy, plea bargaining, discovery, jury selection, various trial issues, appeals, and post-trial remedies. This is a Bar course.

LAW 242 International Criminal Law (1-3 Credit Hours)
This course will explore the main differences in European and American Criminal Law and Procedure. It will feature a discussion of the Amanda Knox case, and discuss the different aspects of trial procedure in both systems.

LAW 244 Cyberlaw (2-3 Credit Hours)
The emergence of the Internet and digital technologies that enhance human abilities to access, store, manipulate, and transmit information has brought with it a host of new legal issues that lawyers preparing to practice in the 21st century will need to understand and address. This survey course will introduce and explore specific problems in applying law to issues arising on the Internet. Topics expected to be covered include the bounds of jurisdiction, privacy, governance and regulation, online commercial transactions, content protection (through intellectual property, contract, and technological means), and cybercrime. There are no prerequisites. Grades for the course will be based on a take home exam and class participation.

LAW 245 Family Law (3 Credit Hours)
This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, divorce, division of property incident to divorce, maintenance, custody, visitation, child support, adoption, termination of parental rights, and ethical issues. (R. Anderson) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, tax law, and ethical issues. (S. Coupet) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, reproductive technologies, adoption, and termination of parental rights. (K. Baker)

LAW 246 Advanced Mediation Advocacy Practicum (1-4 Credit Hours)
Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law. This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required. This course counts as a Skills and Live Client Experience course.

LAW 247 Constitutional Torts & Section 1983 (3 Credit Hours)
This course provides an in depth study of 42 USC sec. 1983, the most widely used statute for protecting civil rights and redressing violations of the constitution. Among the topics covered are the elements and defenses to a cause of action, municipal liability, absolute and qualified immunity for public officials, state action, monetary relief, injunctive remedies, causation, choice of forum, and attorney's fee shifting.

LAW 249 Human Trafficking: Advancing Protections for Children Practicum (1-2 Credit Hours)
Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors. The seminar will begin with an overview of a history of anti-slavery statutes and case law to provide a foundation for contemporary international human rights and domestic laws addressing human trafficking. Students will be introduced to various frameworks, including criminal justice, public health, gender-based, human rights, and abolitionist, to combat human trafficking. Students will analyze current research in the field, and explore interventions utilized by both legal, social and public health providers. Assignment and exercises will include mock interviews, critical analysis of legislation, and a final project addressing ways to advance the movement to combat child trafficking in the United States. Scholars and practitioners in the field will provide occasional guest lectures. Section 002 (1-2 credits) The live client experience (LCE) component of this course is available for a select number of students who are interested in augmenting the seminar with experiential work (legal research, advocacy, direct services) that intersects with child trafficking. This can include working on projects at the Center for the Human Rights of Children (CHRC), or placement at an off-site organization providing legal services to human trafficking survivors. Applications for Section 002 are required, and student selection will depend on the number of positions available at selected external sites and CHRC (minimum 6). Participants will be selected by Katherine Kaufka Walts, Director, Center for the Human Rights of Children. While students with a demonstrated interest in this topic will be prioritized, no prior training or experience is required. Note: 1L students are not eligible for LCE credits.

LAW 250 Estates (3 Credit Hours)
This course is a study of the basic legal devices available for transmission of wealth at death: intestate succession, the will, "non-probate" transfers, and trusts. Recurring themes include the special role of lawyers representing clients in these matters, the advantages and disadvantages of different wealth transmission techniques, and the social ramifications of our wealth transmission policies and laws. This is a Bar course.

LAW 251 Commercial Real Estate Transactions (2 Credit Hours)
Commercial Real Estate Transactions focuses on the basic principles of commercial real estate acquisition, financing, and development (including leasing). The course follows a mixed use commercial development project through acquisition (letter of intent through purchase contract and closing) and development (leasing/sale of condominium units). The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course emphasizes the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 252 Personal Injury Law and Advocacy (2 Credit Hours)
This course will include an overview of Personal Injury Law and include the intake of a new case to its final resolution. The course will include not only the law and rules, but the implementation of them. Students will participate, in a meaningful way. in various court exercises and will be challenged to understand and persuasively present their client's case. Advocacy will be discussed in detail and students should be expected to be pushed beyond their previous level of skill and comfort and learn to become "trial lawyers" rather than simply personal injury lawyers. Students will learn what it is like to "mix it up a bit" in the adversarial forum of trial work.

LAW 253 Real Estate Conveyance (2-3 Credit Hours)
A study of problems and documents encountered in residential real estate transactions, including listing agreements, preparation of contracts, closing documents and real estate tax pro-rations. There will be some coverage of the subjects related to financing and title clearances including surveys and title insurance. The course may also include some basic coverage of condominiums, co-operatives and Illinois land trusts. The text is George Lefcoe, Real Estate Transactions, Finance and Development (LexisNexis, 6th ed. 2009). There are used good condition copies available from various sources. In addition, there are also loose leaf and electronic versions. The grade will be based on a final two-hour open book exam given during the regular exam period. This is a Bar course.

LAW 254 Consumer Law (2-3 Credit Hours)
The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent Supreme Court rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage. The course is especially recommended for students interested in public interest law.

LAW 255 Business Skills for Name, Image, and Likeness and the Law (1 Credit Hour)
While Name Image Likeness (NIL) is primarily associated with sports, it touches a broad spectrum of individuals; businesses, retailers, fashion designers, magazines and museums; and agencies and organizations that represent musicians, athletes, artists and businesses. This course will examine the intersection of multiple disciplines through exercises in the NIL landscape.

LAW 256 Comparative Issues in Law and Religion (2 Credit Hours)
This course will examine the way the three Abrahamic Faiths (Islam, Judaism and Christianity) consider legal and policy issues. For instance we will look at the three faiths regarding various issues surrounding human rights and life and death issues such as: justified uses of war and violence; conscientious objection; end of life issues; capital punishment; criminal responsibility for causing death; positive duties to the poor and needy; and how the common good is described by the three religions. How do the three faiths envision translating their perspectives on the issues into civil law, and what are the proper limits on enacting religious perspectives into positive law?

LAW 257 Freedom of Information (1 Credit Hour)
This is a Perspective Elective course.

LAW 258 International Cross-Cultural Negotiation and Communication Skills (1 Credit Hour)
This course will introduce students to practical cross-cultural negotiation and communication skills useful in international settings. The course will address the work of Geert Hofstede and the 6D cultural dimensions model as well as the writings of Edward T. Hall regarding high and low context communicators. Learning objectives include: understand basic interest-based negotiation theory; apply negotiation techniques to engage in a problem-solving conversation; identify culture clusters based on the Hofstede 6D model; understand personal cultural preferences in comparison to a country of interest; and use appropriate questions, listening skills and other communication strategies to increase understanding and obtain results that meet client needs and interests. Students will learn though assigned readings, simulated negotiations, feedback, and guest speaker(s).

LAW 259 Workways of the U.S. Supreme Court (1 Credit Hour)
This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has chosen to structure its work within those constraints. The course will pay particular attention to the Court's case selection process and the ways in which lawyers succeed in getting their clients' cases to the Court. Justice Ginsburg will discuss the landmark cases of the current 2017-2018 court term; the workways of the Court; and the road to her appointment to the U.S. Supreme Court. Judge Ann Williams, Senior U.S. Circuit Judge of the United States Court of Appeals for the 7th Circuit, will participate in the Conversation with Justice Ruth Bader Ginsburg discussing her ascent to the Supreme Court.

LAW 260 Comparative Criminal Procedure (1 Credit Hour)
The criminal justice process in the United States is shaped by the Constitution and Bill of Rights, statutes, rules and case law. This course will examine the role of these guiding principles in the various stages of the criminal justice process, such as the means by which information is gathered during an investigation, the circumstances under which an individual can be detained, and the type of evidence that can be used at trial. The course will focus on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutor's role and plea bargaining; the role of defense counsel; and the role of evidentiary and constitutional rules of exclusion of evidence. We will compare our criminal justice process to that of Italy and other countries, and Italian officials will participate as guest lecturers to talk about their own experiences with the Italian system. The course will also cover a comparison of procedure for civil law issues. The Amanda Knox trials in Italy will be used as a case study in addressing these procedural comparisons. This is a Perspective Elective course.

LAW 262 Genetics Law and Policy (2 Credit Hours)
This course will examine a variety of legal, policy, scientific, social, and ethical issues relating to genetics and genomics. This course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials within the casebook. Topics to be covered include the intersection of law and science generally; genetics research and bioethical issues in human subject research; commercialization, ownership, and patenting; genetic testing and reproduction; gene therapy research and gene editing; access and liability issues; clinical applications of genetics research; and genetic privacy.

LAW 264 Contract Negotiation and Drafting (2 Credit Hours)
The purpose of this course is to provide exposure to contract drafting and negotiation to students with an interest in transactional law. During the course of the semester we will examine the purpose and process of drafting documents. We will also spend time discussing the business side of transactional law and how best to work with and counsel clients. In some instances, we will start with form documents borrowed from prior transactions (precedent) and we will revise these documents to reflect the particular facts and circumstances surrounding our transaction. In other instances we will work through drafting a document from scratch. Finally, we will spend time reviewing and revising existing documents and discussing the logistics of working through a variety of business transactions. The course will include numerous drafting exercises and some negotiation. By the end of the semester, students should have a basic understanding of how and why contracts are drafted and negotiated. In addition, each student should be able to draft a precise and practical document for a basic business transaction. (Dunck) Information Technology The purpose of this course is to provide contract negotiation and drafting experience to students in a "real life" setting. The students will be placed in teams and will all receive the same background facts and precedent "form" documents in order to negotiate and draft an executable agreement relating to software development, license, implementation and support and maintenance that reflects each team's negotiations. Prior experience in information technology or business is NOT required. During the course of the semester, we will work through the purpose and drafting of various provisions in the agreement. By the end of the semester, students should have a basic understanding of the structure of a business transaction in general and an IT agreement in particular. Students will be comfortable with the purpose of recitals, representations and warranties, covenants, including limitation of liability and indemnification issues. (Ross)

LAW 265 Black Traditions in International Law (1-2 Credit Hours)
International Law has neglected the experiences and perspectives of African Americans, in particular, and of black peoples more generally. Yet, international law was central to justifying black subjugation through slavery, colonialism, and their aftermaths today. The purpose of this course is to uncover those hidden histories. In doing so, Black Traditions in International Law will express and foreground the goals, histories and thoughts of black struggle that are not represented in journals, books and other materials of international law that we use to teach international law today. The premise of the proposed course is that Black traditions have long offered visions of global order that challenge the color blindness embedded in accounts of international law. Black traditions counter visions of international law that order the world in accordance with predominantly European and white conceptions of hierarchy and order. They challenge distortions black and non-white peoples as inferior and therefore fair game for subjugation and dehumanization through practices such as slavery and colonialism and the continuing legacies of these practices to date. Learning (c) To unearth the various ways is obscured or how it becomes invisible in international law and what international lawyers are doing about it.
Outcomes:
(a) To demonstrate the centrality of international law both as a site that legally justified black disempowerment but also as a resource for black empowerment including through efforts by African Americans today through United Nations processes such as those established under the United Nations Convention on the Elimination of Racial Discrimination; (b) To demonstrate how racial differences have been mobilized to create and sustain inequality in a wide variety of places through rules of international law and why this is very important for understanding how domestic law intersects with race

LAW 266 Intl Law Review Executive Editors (1-3 Credit Hours)
Students enroll in this course to receive credit for their work as Executive Editors on the International Law Review.

LAW 267 International Law Review Senior Editors (1-2 Credit Hours)
Students enroll in this course to receive credit for their work as Senior Editors on the International Law Review.

LAW 268 International Law Review Members (1 Credit Hour)
Students enroll in this course to receive credit for their work as Members on the International Law Review.

LAW 270 Business Organizations (4 Credit Hours)
This course gives brief treatment to agency and covers partnership as an alternative to the corporate form. Principal emphasis is on the law as it applies to the organization and functioning of corporations. The course focuses on structure and mechanics, capitalization, distributions, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation. This course counts as a Bar course.

LAW 273 Refugee Law and Policy: Welcoming the Stranger (2 Credit Hours)
Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about the treatment of child asylum seekers in the United States-namely, the treatment of children as adults in miniature and the "othering" that facilitates this deviant practice.

LAW 274 International Arbitration (1 Credit Hour)
This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence, availability of interim measures, the grounds for vacating an award, and the means of enforcing an award.

LAW 275 Spanish for Lawyers (2 Credit Hours)
The course is designed for law students who are looking to supplement their existing knowledge of the language with Spanish that focuses on the legal field. Its main objective is to develop adequate communication skills that will allow you to advise Spanish-speaking clients on issues related to criminal, property, civil, labor, administrative, tax, commercial, and litigation law. We will work with real documents and texts, analyzing cases, as well as reinforcing knowledge of both Spanish in the legal field as well as of different branches of law in the judiciary system. Coursework will be carried out in groups, and a system of continuous evaluation will be implemented using assignments and projects. The course will also include a cultural component, the aim of which will be to understand, contextualize, and handle effective exchanges with Spanish-speaking clients. Passage of basic Spanish language competency exam is a prerequisite. This is a Skills course.

LAW 276 Criminal Law Practicum (1-3 Credit Hours)
This 2 to 4 credit course will help students develop a broader understanding of the criminal justice landscape. Students will be exposed to practical and substantive issues, garner a better understanding for what it means to practice criminal law, and be exposed to current and historical policies that have helped to shape our criminal justice systems. This course includes a mandatory weekly classroom seminar as well as either a field placement or research component. Students who pursue the field placement option will work in an approved agency under the supervision of practicing attorneys. Students must secure unpaid externships on their own using each agency's own hiring procedures for law students. Past field placements have included the Cook County State's Attorneys Office, The Law Office of the Public Defender - Cook County, and Office of the State Appellate Defender, as well as various legal aid agencies and law firms that have criminal law as a practice area. Approved field placements are available on the Pearson system (https://law-luc.12twenty.com/Login). You may also contact the course instructor at bkantor@luc.edu for additional options or if you have questions about the placement component. Field placement students should register for section 1 seminar (one credit hour) & as well as section 2 (live client experience). Students seeking live client experiential (LCE) credit must enroll in the field placement section 2. Students must complete 55 hours at their placement for each hour of live client credit sought. Accordingly, students may register for up to 3 credit hours of section 2 if they anticipate completing 165 hours at the placement over the course of the semester. Students do not need to have a field placement to participate in this course. Students who do not to work at an approved field placement site will conduct in-depth research on an approved criminal law or policy matter during the semester. Students who pursue the research component will present their findings to the class at the end of the semester. Research students only need to register for section 1 (for 2 credit hours). Whether the student elects to do a field placement or research, each student will have the opportunity to observe courtroom proceedings during the semester. This is a graded course. There is no final exam.

LAW 277 Intellectual Property Litigation (2 Credit Hours)
This advanced intellectual property seminar course uses a simulated litigation format to implement the fundamental concepts introduced in the survey IP class. The goal is to provide students with "real-world" intellectual property litigation experience. Students will be divided into plaintiffs and defendants and will participate in various aspects of a theoretical dispute including prefiling investigations, discovery, claim construction for patents, and summary judgment. Through this process the course will cover both practical and substantive aspects of pre-trial intellectual property litigation practice.

LAW 278 International Law (2 Credit Hours)
This course will examine the origins and sources of public international law, its relationship to U.S. Law and its relationship to global governance. Substantive focus will include the law of treaties, diplomatic & consular immunities, the U.N. Charter system, international criminal law, human rights law, and the use of force. This course is only offered in the Rome Program.

LAW 279 International Data Protection and Artificial Intelligence Law (1 Credit Hour)
This course will explore data protection, informational privacy, and cybersecurity laws around the world, and their intersection with civil rights. We will focus on laws that regulate technologies that can be used unfairly and discriminatorily, as in artificial intelligence, as well as policy strategies to promote fair and safe AI.

LAW 280 Federal Income Tax (3 Credit Hours)
This course introduces and analyzes the basic concepts underlying the law of federal income taxation. Topics include gross income, identification of the taxpayer, deductions, and timing of income, characterization and recognition. These concepts are developed through the study of the Internal Revenue Code, Treasury Regulations and case law. Students who might be interested in pursuing the Tax Certificate MUST take this course in the Fall of their 2nd year. Prof. Kwall's section of this course is only open to first year full-time students who are rising to second year full-time status.

LAW 281 Corp & Partnership Tax (3 Credit Hours)
Pre-requisites: Federal Income Tax (mandatory); Business Organizations is recommended
This course is intended to follow Federal Income Tax. It focuses on the income tax consequences associated with the three principal business forms: the corporation, the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 282 Law and Accounting (2 Credit Hours)
This course is intended to provide an understanding of basic accounting principles and their practical application in connection with the practice of law. There are no prerequisites and no requirement of a business background. Topics covered include fundamental principles of accounting for business enterprises; how to analyze and understand an income statement, balance sheet, and statement of cash flow; basic concepts of revenue recognition; conventions for capitalization versus expenses; and how to recognize possible manipulation of financial and accounting statements. Recent high profile accounting scandals such as Enron and WorldCom will also be explored.

LAW 283 Global Challenge of Human Trafficking (1 Credit Hour)
This course provides a comprehensive, introduction to the transnational federal laws and law enforcement efforts launched in response to human trafficking -- this global human rights challenge. The course will use a text written by the professor and a colleague who have the distinctive perspective of two individuals who have spent their careers in the trenches investigating, prosecuting, and adjudicating these intricate and commonly emotional cases. The course will offer open debate about human trafficking by stripping it of its unhelpful, constricted definitions, and by candidly discussing the state of the law, the criminal justice process, and the treatment of offenders and victims. The course examines today's system of federal anti-trafficking laws in relation to the global efforts to eradicate this pervasive human rights violation. It will explore the unique challenges posed by transnational investigations; the current state of the U.S. government's transnational anti-trafficking efforts; the myriad domestic and international legal instruments designed to enhance transnational enforcement efforts; and finally will explore alternatives to the criminal justice efforts including the rise of supply chain laws seeking to hold global corporations responsible for failure to police the manufacture of their products and the use of their services. Taught by United States District Court Judge Virginia M. Kendall.

LAW 285 International Law Review Associate Editor (1 Credit Hour)
Students enroll in this course to receive credit for their work as Associate Editors on the International Law Review.

LAW 286 Constitutional Law Seminar II (3 Credit Hours)
This seminar examines further the constitutional heritage of the English-speaking peoples with a view to understanding the Constitution of the United States. A series of short papers is required. (No prerequisites)

LAW 287 Separation of Powers (3 Credit Hours)
This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislatives branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the "political branches"). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. The goal of the course is to provide students with a fundamental understanding of the separation of powers doctrine in the American system of government. They will be expected to show that mastery through classroom participation, oral research presentations, and the submission of final written papers.

LAW 289 Advanced Legal Research: Spec Topics (1 Credit Hour)
Advanced Legal Research: Foreign & International This course is designed to meet the growing demand for research competency in the area of Foreign, Comparative, and International Law (FCIL). Students in the class will be introduced to resources specific to FCIL that will be useful in practice and academic settings. These resources include the European Union's EUR-LEX database, the United Nations iLibrary, the Foreign Law Guide, and Westlaw China. This course will also teach students to devise and implement efficient research strategies and introduce students to information centers outside of LUC that are particularly strong in the area of FCIL. In sum, upon completing this class, students should be able to identify a legal issue requiring FCIL research, craft an efficient investigative strategy, and select the most appropriate tools for their research. Advanced Legal Research: Litigation This section of Advanced Legal Research will focus on research resources used by litigators. We will spend part of our time reviewing and expanding upon the legal research skills and techniques that students learned in First Year Legal Research. We will spend the rest of our time exploring more-advanced research topics and tools such as dockets and briefs, jury instructions, jury verdict reporters and litigation analytics. There is no final exam; grading will be based on research exercises assigned throughout the semester and class preparation and participation. An advanced legal research class specifically intended for those going into transactional practice will be offered in the spring. These two classes will overlap, but students may take both. Advanced Legal Research: Transactional Law In this section of Advanced Legal Research we will focus on research sources most likely to be encountered in transactional practice. We will spend part of the semester reviewing and reinforcing the legal research skills and techniques that students were introduced to in First Year Legal Research, especially as they pertain to transactional practice. We will then delve more deeply into topics particular to transactional practice like SEC research, company research and locating precedent documents for contract drafting. Grading will be based on weekly quizzes and a series of short assignments. There is no final exam.

LAW 290 Advanced Legal Research (1 Credit Hour)
In this course, you will explore more sophisticated and advanced areas of legal research, including judicial, administrative, legislative, and subject-specialized research resources. You will also learn about non-legal research resources which can be of value to attorneys.

LAW 291 Communications Law (3 Credit Hours)
This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

LAW 292 Law and Technology (3 Credit Hours)
This survey course presents students with the range of legal issues arising from the intersection of technology and the law. The course is highly interactive and will explore topics such the implications of internet ubiquity and jurisdictional analysis, First Amendment/free speech, electronic discovery, digital copyrights, trademarks and domain names, cyber crime, electronic privacy, e-commerce, and Internet governance. There are no prerequisites for this course. Grades for the course will be based on a mock Rule 16 conference, and in-class exam and class participation.

LAW 293 Advanced Writing for Legal Practice (1-3 Credit Hours)
This skills-based course simulates a legal practice environment. Students complete a series of writing projects related to simulated case files or legal problems. Students are permitted to take multiple sections of this course, as different sections incorporate different practice areas and experiences. Advanced Legal Writing: Business Practice This course emphasizes and builds effective writing and communications skills in the transactional, business practice setting. The course will focus on a range of formal and informal documents and communication formats: drafting contract provisions and letters to clients and counterparties in transactional and pre-contentious settings; reviewing, interpreting, and editing the (often imperfect) contracts submitted by opposing counsel; preparing transaction task lists, due diligence memoranda or other internal communications for use by colleagues; and presentations to a board of directors or other client audience supported by written materials including PowerPoint visuals with substantive content and impact. Some attention will be given to ethics and professionalism in written content, including in the context of engagement letters with clients, declination letters with prospective clients, and conflict waivers among clients. Several sessions will also focus on special considerations when working and communicating with clients and counterparties in or from other countries where the laws, customs, practices, and language are different from our own. In-class sessions will typically be used for lecture and discussion to develop concepts and facts from selected readings and materials, which students will then incorporate in brief written assignments before the next class. There may be occasional in-class brief, flash quizzes based on the assigned readings to launch our discussions. Students will be graded based on written assignments, quizzes and exercises, and class participation. Advanced Writing for Legal Practice: Illinois Civil and Criminal Litigation The preparation of a case for trial calls upon a powerful kind of thinking that is useful in any field of law, as well as necessary to present the case at trial. This course provides specific training in advanced legal writing to build strength and maturity in the kind of analysis that a trial lawyer performs. The course focuses on the development of skills necessary for particular writing assignments that arise in the course of civil and criminal litigation. Students learn how to perform these skills through in-class discussion of the assignments and through the writing necessary to complete the assignments. Because practice in oral advocacy highlights ways in which a lawyer's writing can be improved, this course will call on you to participate in oral advocacy exercises as well as undertake the specific writing assignments. The course covers a wide range of skills, including the drafting of legal memoranda and pleadings, the preparation and presentation of motions, opening statements and closing arguments, the development of outlines to examine or interview witnesses, the use of discovery tools, and the application of a structured approach to settlement negotiations.

LAW 294 International Human Rights (1-3 Credit Hours)
This course offers an introduction to the theory and practice of international human rights law. Through course readings and rigorous discussion, students will learn about international and domestic laws and institutions responsible for the creation and operation of the human rights regime. The course will examine sources of international human rights laws including treaties, customary international law, and domestic law. The course will evaluate international mechanisms involved in human rights protection including the United Nations, regional mechanisms (such as the Inter-American, European and African systems) and various national courts and hybrid tribunals tasked with enforcing international human rights law. In addition to legal theory, the course will help students understand the practice of human rights law with an eye toward understanding the place of the United States in the support of and adherence to human rights norms.

LAW 296 Legal Writing Tutors (1-2 Credit Hours)
Legal Writing tutors work with students in the first-year writing program. They attend all classes of their Legal Writing section, hold regular office hours, and help students develop their research and writing skills.

LAW 297 Legal Technology (1 Credit Hour)
This course will introduce students to a wide variety of law office technologies, including law firm use of everyday software programs like Adobe Acrobat and Microsoft Word, Excel, and Outlook, plus law-firm-specific programs for document automation and assembly, time and billing, case management, e-discovery, and others as time permits.

LAW 298 Contracts in Complex Commercial Transactions (2 Credit Hours)
The objective of this course is to familiarize the student with contracts as used by sophisticated parties. Accordingly, this course will explore "real-world" contracts actually entered into by "real-world" companies -- the Coca-Cola's, Microsoft's, and HP's of the world. Through this course, the student will attain a certain facility with agreements, their organization and structure, their language, and their provisions (and the interaction of these provisions). The course will pay considerable attention to how courts have treated various contractual provisions. The examination of actual contracts will begin with non-disclosure agreements and will proceed into employment agreements, services agreements, and agreements for the sale of goods. Topics will also include merger-and-acquisition agreements. In addition, readings will include comments from leading practicing attorneys (from law firms such as Sidley, Kirkland, and Cravath, and from legal departments at companies such as Microsoft, Accenture, and JP Morgan), and there is the possibility that, from time to time, some of these (or other) experienced practitioners may join us for class.

LAW 299 Critical Legal Studies Seminar (3 Credit Hours)
Critical Legal Studies posits that the influence of the social construct of race in America is ubiquitous, including in law. Moreover, it suggests that so-called color blind law-making is unlikely to address the most important means by which race continues to operate to oppress many persons in America. Finally, it teaches that racial reform occurs only in accordance with the interests of those with political and economic power. This course will survey the key scholarly works that form the basis for these precepts and seek to test these positions against the reality of race in America today.

LAW 301 Police Accountability (3 Credit Hours)
This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime.

LAW 302 Intellectual Origins of "Othering" in the Law of Nations (2 Credit Hours)
Today, many nations and peoples with formal legal equality are not, in practice, treated equally in international relations. One reason for this is that some nations and peoples were once unequal under prevailing law and legal theory. This course surveys key Western political and legal thought that led to "othering," or legal inequality, in the "Law of Nations," which was a general body of law that eventually became what we today call "international law." After setting out key concepts and themes, the course traces the evolution of thought regarding: the nature of human societies, the interrelationship of human societies, the rights and rules of war, and the acquisition and possession of land by peoples and nations. As necessary, students will be required to review relevant geopolitical history that both influenced and resulted from this evolution. A note of caution: this course will encounter detestable concepts, such as the persistent idea that some humans were "natural slaves," "infidels," "savages," or "barbarians" unworthy of equal legal or moral status or treatment. These concepts played a significant role in legal and moral justifications for colonization and other subjugation, including dispossessing indigenous peoples of their native lands. During the course, students will be required to independently research (at least 1 book or 3 significant scholarly articles) and consider the influences of this history on a contemporary issue in the U.S. or international legal system. The final grade will be determined by a student's effort in completing short reflection papers for each reading assignment, and the quality of a final seminar reflection paper that considers the course as a whole in relation to the student's independent research.

LAW 305 Global Law Seminar and Field Study (3 Credit Hours)
This seminar examines the laws and legal system of a different country each year and consists of a semester-long class and a required field study and service component over spring break. Past countries of study have included Tanzania, India, Thailand, South Africa, and Turkey. This unique team-based experience actively engages students in the learning process. Students, working in teams under faculty direction, conduct research, make class presentations, organize the field study and service components of a course, develop group research proposals, and produce scholarly papers, several of which have been published.

LAW 306 Intellectual Property Colloquium (1 Credit Hour)
This a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. Students are selected based on an application that is available at: www.chicagoip.com.

LAW 307 Immigration Documentation Workshop (2 Credit Hours)
Co-requisites: - Immigration Law
Permission Required

LAW 308 The Death of the Death Penalty: The Ultimate Punishment in the Twilight Zone (2 Credit Hours)
This seminar will briefly review the use of the death penalty in our country's history and then take an in-depth look at the experience of Illinois with capital punishment.

LAW 309 Intro to Comparative Law (3 Credit Hours)
This course will provide an introduction to the "civil law" legal systems (which include almost all of Western and Eastern Europe and Latin America, as well as, portions of Africa and Asia). The course will begin with the roots of the Civil Law in Rome around 450 BC and subsequent developments, including its preservation by Byzantine Jurists in the Corpus Juris Civilis, and its revival by scholars in medieval Italy. The various events and influences that led to the modern Civil Law will be considered. Differences between the modern Civil Law and Common Law approaches and attitudes toward law will be covered. (Perspective Elective course) Note: Students who have taken Comparative Law (LAW 172) may not enroll in this course.

LAW 310 Courtcraft Excellence in Advocacy (1 Credit Hour)
Courtcraft is the foundation and the discipline which makes for excellence in advocacy. It is a holistic approach to advocacy which harnesses together at least four principles: purpose, preparation, presentation and persuasion. Courtcraft should never be an option for the would-be advocate. It is not a luxury, but an essential grounding without which no law student can begin to call himself/herself an advocate. Like any skill, advocacy can be taught. Few of us are born advocates. Most need training and guidance. Courtcraft develops and enhances all that the student of law has been taught and prepares him/her for excellence in advocacy. Our courtcraft programme is not founded simply on theory or academia. It is based on our own many years of experience as advocates appearing almost daily in court. Purpose Your role as a lawyer and advocate. Your duty to your client, the court, the profession. Preparation The examination of witnesses, preparing opening/closing speeches and submissions, written advocacy. Know your client, your case, your tribunal. Presentation Your communication skills, your style, your manner, your public speaking ability, your advocacy. Persuasion Your knowledge of people and culture, your approach, your game plan, your conclusions. In addition to these four overlapping principles above, our programme includes training in the important and developing techniques for the handling and examination of experts, and professional and vulnerable witnesses. It includes awareness of diversity, prejudice and mental and physical well-being in the profession. Our programme revolves around a scripted trial, tailored to the four principles. It is a two way initiative. Essential to the success of the programme is the input of attendees who will take part in the trial as advocates and witnesses. Our experience has always been that we take away from you as much as we hope you take away from the programme.

LAW 311 Advanced Evidence (2 Credit Hours)
This course offers an in-depth study of three important areas in the presentation of evidence at trial: character (e.g., habit, routine and prior bad acts, as well as traditional character traits), hearsay, and expert testimony. Although not a "techniques" course, students will be called upon to participate actively in the class discussions and simulation.

LAW 312 Street Law (3 Credit Hours)
Second- and third-year students teach about law and the legal system in Chicago area elementary and high schools. Students attend a weekly seminar and teach classes in their assigned school. In some schools, students have the option of preparing high school students for a mock trial competition. For that experience, prior or current enrollment in Trial Practice is advisable, but not required. This is a Skills and Comprehensive Simulation course.

LAW 313 Illinois Civil Litigation Practice (2 Credit Hours)
This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and summary judgment motion practice. Because so many graduates are now thrown directly into the courtroom either as solo practitioners or litigation associates, the course has been designed to be immediately useful the first time you go to court. This is a Skills and Bar course.

LAW 314 Pharmacology Journal Club (1 Credit Hour)
Pre-requisites: B.S. degree in biology, chemistry, biochemistry or similar science field
In this multi-disciplinary pass/fail course you will be guided through the following objectives. Gain confidence in presenting scientific data to an audience. Learn to direct a time-limited discussion in a professional and collegial manner. Learn to work through an article independently to understand complex experimental design. Learn to work collectively to help clarify complex experimental design. Learn to critically evaluate an experimental design and voice a critique in a constructive manner that includes potential alternatives. Understand how new cutting edge techniques are employed to answer scientific questions. Stay current on new findings of broad interest to the scientific (Pharmacology) community. Learn to apply Socratic teaching methods. Learn to utilize electronic technology rather than printed material to conduct meetings. Applicants with an undergraduate degree in any other discipline must show strong performance in basic courses in biology and chemistry.

LAW 315 Cybersecurity (3 Credit Hours)
In a seminar format, this course will introduce tenets of cybersecurity as it unfolds in multiple contexts: from legal, business, economic, and technical perspectives. This course takes an interdisciplinary approach to explain how cybersecurity law has developed and the challenges all attorney face in this rapidly developing area. This class also provides theoretical and practical introductions to the distinctions between privacy and cybersecurity, technical foundations needed to understand the challenges of securing complex systems, and an introduction to the legal concepts that motivate cybersecurity law and policy. This class also introduces processes and frameworks used by private and public institutions to manage cybersecurity programs as industry standards and best practices, and will help students engage in discussion about cybersecurity from a risk management perspective, essential both to business decisions and court outcomes.

LAW 316 Hedge Funds (2 Credit Hours)
Pre-requisites: Business Organizations
There are over two trillion dollars invested in hedge funds-investment giants that move and shape today's international financial markets. Yet many do not understand their significance or their complex workings. This course is designed to give you a practical understanding of hedge funds and the documentation that supports the formation and operation of these funds. We will examine the regulatory, compliance and business issues surrounding hedge funds and provide tools for successful fund implementation. We will also explore practical concerns with the Investment Advisers Act of 1940 and the Investment Company Act of 1940 as well as current changes to the regulatory scheme, including Dodd-Frank. Securities Regulation is not a prerequisite but will be helpful.

LAW 317 Legislation and Political Thought (2 Credit Hours)
This class will provide an in-depth exploration of legislative process and procedure on the state level, the legislative institution and the impact of electoral politics on lawmaking. Through the use of case studies and guest speakers who are part of the process, students will learn the many components of lawmaking and how all come together in today's political culture. This is a Skills course.

LAW 319 Jurisprudence I (3 Credit Hours)
This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights by manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified. Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20 page research paper due at the end.

LAW 320 Jurisprudence II (3 Credit Hours)
This seminar addresses the philosophical underpinnings, moral standards and political presuppositions of legal regimes that are distinct from those studied in Jurisprudence I. A series of short papers is required. (No prerequisites) This course counts as a Perspective Elective course.

LAW 322 Comparative Health Law and Bioethics (1 Credit Hour)
The field of health law offers a fascinating platform from which to compare foreign legal systems. By understanding the wide variation in how different nations approach controversial issues of health law and bioethics, students will develop the skills necessary to critically evaluate their own countries' policies from an international perspective. This is a Perspective Elective course.

LAW 323 Business Skills for New Lawyers (1 Credit Hour)
Currently, the legal marketplace requires new lawyers to have more skill sets than just the traditional one's law schools have provided in the past. To be competitive, 21st century lawyers will require a level of knowledge and proficiency in new areas including, but not limited to, fundamental financial matters, marketing and communication, and how to add value for clients. This course is an introduction to necessary business skills for new lawyers.

LAW 324 State Constitutional Law (2-3 Credit Hours)
This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

LAW 325 Conflict of Laws (3 Credit Hours)
Conflict of Laws considers what law to apply when two or more states or other jurisdictions have connections to a dispute. Suppose that a court has concluded that it has subject matter and personal jurisdiction, so it can "speak law" or "speak rights" to the parties before it (as the term "jurisdiction" suggests) but faces two or more sovereigns whose law arguably might apply. At its most basic, this course addresses the next question: which sovereign's law should the court speak? The course explores this and related questions in many contexts and the various methods that courts and scholars have proposed and adopted to answer them. We consider contrasting points of view regarding choice of law, jurisdiction, and recognition of foreign judgments, asking which policies best promote fairness and harmony both nationally and internationally and meet the federal constitutional requirements of due process of law and full faith and credit for the judgments of other states. A remarkable aspect of this course is the way it cuts across time and many practice areas, probably first introducing you to some of those areas and inviting you to wrestle both with historical legal questions and cutting-edge, or even future, issues.

LAW 326 Reviewing and Righting Wrongful Convictions (2 Credit Hours)
The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted. In addition to the seminar component, the course will provide students experience addressing and advising the Minnesota Conviction Review Unit (CRU.) The Minnesota CRU is one of a handful of state-wide conviction review units in the country. In the wake of the murder of George Floyd, community members, legislatures, and policy makers sought ways to address the harms created by the criminal legal system. The CRU formed in 2020, when its partnership with the Great North Innocence Project led to grant funding from the U.S. Department of Justice. That same year, Attorney General Keith Ellison created an advisory board composed of diverse legal and community experts with direct experience in the Minnesota criminal legal system. Students in the course will work directly with the Minnesota CRU to assist the CRU in designing protocol and a prioritization of the hundreds of cases it has been asked to review. Students will not be involved in direct representation of any individuals, nor in the investigation of any individual claims. Rather, students will assist in reviewing and identifying the claims presented for review, and devising a system for their review. Students will work on the issues in small groups during every class. Assessments will be conducted in the following manner: Students will ask to write two short (3 pages) response papers during the semester; students' participation will also be considered; finally, the preparation and development of the experiential work will also be considered and weigh heavily in the grading.

LAW 327 Law and Cultural Property (2 Credit Hours)
This seminar examines a range of topics that fall under the umbrella of "cultural property," including claims to tangible and intangible property by individuals, discrete cultural and national groups, and indigenous and native peoples. The seminar is interdisciplinary and draws upon a diverse set of reading materials, including legal sources such as cases, statutes, and treaties; stories from the popular press; and articles written by academics from a variety of fields.

LAW 329 Access to Justice Practicum (2-4 Credit Hours)
This course will examine important issues around access to civil justice, including the history of civil legal aid, current delivery systems and funding models, increased self-representation of litigants in the court system, and potential solutions to bridge the gap between the growing need for civil legal assistance and available resources. To most effectively explore these issues, the course is divided into three components: bi-weekly seminars, several experiential activities and a research project. Each is described briefly below. (1)The bi-weekly seminars will provide necessary framework and context for the experiential learning activities and the research projects. Our seminar will begin with an overview of the challenges of ensuring access to civil justice, with each subsequent seminar analyzing more specific and complex access-oriented issues related to everything from the various actors in the civil justice system to innovations in the delivery of legal services. (2)Each student will complete a research project with course faculty providing supervision. Completed research projects will assist the Illinois Supreme Court Commission on Access to Justice and other legal and judicial system stakeholders. To be successful in these projects, students will be expected to complete legal research, in-depth legal reasoning and policy analysis. Depending on class size, these projects may be assigned to students to work in pairs. In addition to the written work-product, students will present and answer questions about their research to a panel of access to justice experts at the last class of the semester. (3)Finally, at various intervals throughout the semester, and as identified in the syllabus below, students will be asked to complete a series of experiential activities that will be incorporated into class discussions. These experiential activities will increase students' understanding of access to justice issues. Students will be required to spend 120 hours completing the experiential activities and research project assigned during the semester. This is an Experiential Learning and Skills course.

LAW 330 Remedies (3 Credit Hours)
This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a "capstone course," because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year students. This is a Bar course.

LAW 331 Telecommunications Law (3 Credit Hours)
This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

LAW 332 Music Law (2 Credit Hours)
This course examines the legal aspects of the music business. We will cover the esoteric language, deal structures, and issues in the music business. Topics include copyright related to music and recordings, music publishing, recording agreements, artist representatives, intra-group agreements and business structure, live performance and touring, and the impact of new technologies on the music industry. Guest speakers will address the class from time to time, including talent agents, talent buyers and managers, recording artists, music publishers, an artist's web guru, record company executives, and performing rights organizations.

LAW 333 Law and Economics (2-3 Credit Hours)
This course will explore the application of economic principles to legal doctrines. The economic approach to law seeks (1) to explain, at least in part, why certain legal rules exist; (2) determine the consequences of legal rules by identifying the incentives created by a legal framework; and (3) provide guidance about how legal rules should be structured or ambiguities interpreted. The course is intended to enable the student to develop an understanding of the economic implications of legal rules, how economic concepts can be incorporated into legal rules, and how economic analysis fits into litigation. Topics covered will include the economics of property, torts, contracts, crime and punishment, and more.

LAW 335 Labor Law (3 Credit Hours)
Labor Law provides students with a comprehensive review and study of United States labor history and policy, with an emphasis on the National Labor Relations Act and its amendments (NLRA), as well as the rights and obligations of individuals, employers and unions under the NLRA, unfair labor practices under the NLRA, the National Labor Relations Board and its enforcement and policy-making powers, a thorough review of how employees select and de-select a bargaining representative (a union), the collective bargaining process, and the role of arbitration in effectuating national labor policy. The course also includes related constitutional, preemption and state law issues.

LAW 336 Expert Witness Theory and Practice (2 Credit Hours)
The expert witness is a powerful weapon in a trial attorney's arsenal. Expert Witness Theory & Practice gives students the opportunity to learn about expert witnesses and work with experts in a mock trial environment. During this two credit hour course, students will learn who can be an expert, what an expert can testify about, the pretrial disclosure requirements for experts, differences between Illinois and federal law regarding experts, and the fundamentals of direct and cross-examination of experts. Students will then participate in simulations including a discovery deposition and a mock trial where students will present and cross-examine psychology graduate students serving as expert witnesses. Students will be graded on their performance of these exercises as well as written exercises and classroom participation. The mock trial will serve as the final examination for the course. Completion of Trial Practice or Evidence is highly recommended. This course qualifies as an Experiential Learning and Skills course.

LAW 337 Employment Law (2-3 Credit Hours)
The law governing the employment relationship is not limited to the union management confrontation of traditional labor law and the proscriptions of employment discrimination statutes. Both common law claims and other statutes have become major sources in challenging, e.g., drug testing, plant closings, lie detectors, whistleblowers, wrongful discharge. This course explores those legal problems. This is not a duplication of either Labor Law or Employment Discrimination; neither is a pre-requisite. The course focuses on the total configuration of statutes regulating employment as well as the emerging common law principles affecting employment relationships.

LAW 338 U.S. Foreign Trade and Customs Law (2 Credit Hours)
The goal of this course is to provide students with an overview of International Trade and U.S. Customs law, in its domestic and international contexts. Students should be prepared to learn about the history and current role of international trade organizations; U.S. government agencies and their roles in international trade; U.S. Customs law and compliance issues. Students will receive an overview of antidumping law and the litigation of antidumping and U.S. Customs issues at the U.S. Court of International Trade and the U.S. Court of Appeals for the Federal Circuit. The role of NAFTA and other free trade agreements in international trade will be discussed, in both legal and political settings. The class will also cover compliance issues that arise under U.S. Customs law, and how a client's non-compliance can incur penalties from the U.S. government and affect overall client profitability.

LAW 339 Biodiversity and Ecosystem Management (2 Credit Hours)
This course will review the issues impacting biodiversity and ecosystems in the 21st century, as well as the policy choices that federal, state, and local governments have made to address these concerns. We will cover biodiversity law, ecosystem management methods, and the emerging relationships these areas have with climate change law and renewable energy development. The grade will be based on a 20-25 page paper, presentation of that paper, and class participation.

LAW 340 Patent Law (2-3 Credit Hours)
Pre-requisites: Intellectual Property is recommended, but not required
This course is designed to expose students to legal issues concerning patents. The substantive law governing patents, including how they are obtained and enforced, is addressed. The format of the class includes lecture/discussions, as well as problem-solving and practical/clinical exercises. No technical background is required (although students should be aware that some patent cases may involve technical subject matter).

LAW 341 Educational Advocacy Lab (2 Credit Hours)
This experiential course explores the intersections between racism, poverty, disability, mental health, gender, and juvenile justice through the lens of education law. As part of their work in this class, law students will participate in simulations and exercises as well as conducting intakes with parents and students who seeking assistance from a free legal helpline for K-12 families facing educational barriers in school. The goal of the intakes is to identify families' legal issues relating to education and support advocacy related to children's educational rights in discipline, special education, bullying, language access, and school enrollment. These intakes will help elucidate the topics covered in the seminar portion of the class which grapples with how school systems historically oppressed low-income students of color and students with disabilities, the laws that were put in place in an attempt to mitigate these harms, and the practices that continue to disproportionately disengage vulnerable populations from school. By the end of the course, you should be able to: 1) describe the laws that protect students in K-12 schools; 2) conduct a culturally competent intake; and 3) illustrate ways that one can effectively advocate for educational equity in schools. This Educational Advocacy Lab course is a prospective elective course and is open to 1Ls, 2Ls, 3Ls, and 4Ls.

LAW 342 IP Bytes (1 Credit Hour)
Students in this course will be writing blog posts and/or editing blog posts for Loyola's IP Bytes blog under supervision of Prof. Ho.

LAW 343 Aviation Law (2 Credit Hours)
This course will serve as both an introduction to the laws of aviation and space in their broadest sense, as well as a survey of legal issues associated with, and bearing on modern aviation and space issues against the backdrop of fundamental business principles. It will incorporate all areas of law covered in the first-year law school curriculum to cover the basic legal frameworks of aviation and space law, including: international treaties; federal and state statutes; federal and state regulations; government regulation of aircraft including drones, air carriers, pilots, airspace, and airports (including land use); choice of law issues relating to all aviation and space related litigation; and case law. Current international space law in U.N. resolutions, treaties, and customary law will be identified as will the legal theory and principles used in the advancement of civil, military, and commercial space activities. Recent developments and more specific topics in space law will be covered, including: property rights and claim of sovereignty over outer space and celestial bodies, Outer Space Treaty requirement applicable to new proposed activities in space, commercialization and privatization of low earth orbit, orbital debris--legal issues and governance, intellectual property, and export control laws as applicable to space activities. Materials will consist of a textbook, as well as cases, statutes, treaties, regulations, and policy statements. Based on availability, guest speakers, employed in key aviation and space related positions internationally, will share perspectives, wisdom, and experiences.

LAW 346 State & Local Taxation (2-3 Credit Hours)
Pre-requisites: Federal Income Tax (Law 280) Recommended: Corporate and Partnership Tax (Law 281)
State and local taxes in the United States are numerous, diverse and constantly evolving. These taxes are also the source of some of the most significant controversies in tax practice today. This course explores the federal and state constitutional and statutory frameworks that underlay state and local income tax (corporate and personal), sales and use taxes, and as time permits, the other significant types of state and local taxes (property taxes, capital based franchise taxes and gross receipts taxes, etc.). While there is a special focus on Illinois, the course is designed to equip a tax practitioner with the tools to approach and understand the tax regimes in most states and localities.

LAW 347 Title IX Compliance in Higher Education (2 Credit Hours)
Students will learn the historical foundations and regulatory evolution of Title IX of the Education Amendments Act of 1972, tracing Title IX and its related regulations from their civil rights origins through the contemporary application of Title IX to admissions, athletics, sexual harassment, and employment. The course invites students to examine and critique all aspects of this important and controversial law, while also introducing the practical knowledge and skills needed by lawyers and education administrators to ensure (or challenge) Title IX compliance in higher education.

LAW 348 Law & Poverty (3 Credit Hours)
This course concerns those areas of civil law which most affect low income persons: landlord/tenant, federal housing, welfare, social security, Medicaid, Medicare, unemployment compensation, and civil rights. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal services to low income persons. This is a Perspective Elective course.

LAW 349 Environmental Law (3 Credit Hours)
An introductory course aimed at introducing the major federal environmental statutes and the types of analytical and practical problems encountered in the practice of environmental law and in environmental litigation. The course is devoted to reading and discussion of statutes, cases, articles, and problems in the various environmental media: air, water, and land disposal of waste. The course examines the environmental justice implications of these statutes. Some technical science and economics concepts are included.

LAW 350 Land Use (2-3 Credit Hours)
This course explores land use controls such as zoning and subdivision regulations as exercised by local and state governmental units. The course analyzes the history of land use controls and explores topics such as flexibility and discretion, improper influence and corruption, alternative land use control schemes, suburban zoning and racial/economic exclusion, environmental protection by land use schemes, and growth control. In the process of exploring land use controls, the course analyzes the local institutions and procedures, constitutional issues, and the question of when an improper taking of property occurs in our legal system.

LAW 352 Real Estate Seminar (2 Credit Hours)
The seminar will focus on recent Illinois zoning and land use cases. Land use and zoning is one of the most important substantive law areas applicable to real estate development. Each student will select a recent reported case concerning subject property in the Chicago area. The instructor will assign the cases leaving students free to propose suitable alternatives. Students may trade cases with other students. Once case assignments have been finalized, the student assigned the cases will visit the site(s), perhaps taking photographs or videos. To the extent possible, the parties and their counsel will be interviewed. No library research should be necessary. However, all students will read the court's opinion, and the student reporting on the case will also read the briefs of the parties. Each student will be given one full class period (50 minutes) to present an oral report to the seminar, beginning at the sixth week of classes. All members of the seminar will be required to attend these reports. After reporting and discussing the case with the seminar, each student will write a paper about the case not to exceed 15 double spaced pages (12 point type). After the case assignments have been finalized, I will conduct a number of classes about basic land use and zoning. Students will be required to read assignments in John Nolon and Patricia Salkin, Land use in a Nutshell (West, 2007). Lots of new and used paper versions of this book are available in addition to electronic copies. Enrollment is limited to 14 people, and the consent of the instructor to enroll is required. There will be no final exam. The grade will be based on the oral report and paper. This is a Skills course.

LAW 353 Bankruptcy Litigation Skills Seminar (3 Credit Hours)
This course will explore principles of Federal Bankruptcy Law, with particular emphasis on corporate reorganization under Chapter 11 of the Bankruptcy Code. The course will involve simulated law practice problems and other exercises to provide a hands-on approach to bankruptcy issues.

LAW 354 American Legal History (2 Credit Hours)
Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

LAW 355 Privacy Law (2 Credit Hours)
This course is designed to give students an in-depth introduction to the law of data and information privacy around the world as well as practical experience regarding how data privacy issues arise and are resolved. The course will follow a lecture and discussion format focusing on fundamental principles of data privacy and how they apply to various jurisdictions around the world with a particular focus on the United States and Europe. Along the way, students will be given a series of small assignments tied to the substance of the class material and structured around privacy-related problems with which a practicing privacy attorney might be faced.

LAW 356 Storytelling and Presentation Skills for Lawyers (2 Credit Hours)
This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Students will prepare and deliver an original opening statement at the beginning and end of the course.

LAW 357 Bar Exam Multistate Workshop (1-2 Credit Hours)
This unique workshop will help to prepare students for the Multistate Bar Examination (MBE). The MBE contains 200 multiple choice questions in the areas of constitutional law, contracts, criminal law and procedure, evidence, property and torts. In most states, including Illinois, the MBE constitutes one-half of the entire bar exam. Each workshop will focus on three of the substantive areas tested on the MBE. Students will receive test taking strategies, guidance in answering commonly tested questions, practice answering questions and analysis of their performance. This is a Bar course.

LAW 358 The Quest for Racial Justice in the Long 1960s (3 Credit Hours)
This course will consider the legal and social history of the quest for racial justice in the aftermath of Brown, primarily as it was experienced in the Fifth Circuit, which covered the entire of the Deep South and the Panama Canal Zone at that time.

LAW 360 Products Liability Seminar (2-3 Credit Hours)
This seminar will cover the fundamentals of products liability law and the complex evidentiary issues and strategy choices that lawyers face in products litigation. It will also address the effectiveness of the tort system to deal with injuries caused by products, the impact of tort reform on the evolution of products law, and the influence of political processes on product regulation. The course will meet for two hours each week. Students may submit a paper for an additional hour of credit. The grade for the course will be determined by a two hour examination. This is a Perspective Elective and Bar course.

LAW 361 Insurance Law (2 Credit Hours)
This course offers a basic study of the legal aspects of insurance. Problems common to all types of insurance are considered, including problems of policy interpretation, rights and liabilities of parties and companies, and the regulation of the insurance industry. In addition, special problems raised by particular types of insurance policies are considered. Course covers the comprehensive overview of laws, standards, concepts and remedies related to insurance, including: interests protected by insurance; selection and control of risks; insurable interest; the principle of indemnity; types and classifications of insurance; making, dealing with and termination of insurance contracts; agency, underwriting and claims handling; insurance regulation; subrogation; and extra-contractual liability.

LAW 362 Workers Compensation (2 Credit Hours)
This course will study the rights and responsibilities of injured employees and their employers under workers' compensation and occupational diseases statutes. Third-party actions also are examined.

LAW 363 Water Resources Law (2-3 Credit Hours)
This seminar examines the legal regime that governs the allocation and management of surface and ground water in the United States and on international rivers and aquifers. The class will cover the two basic allocation regimes in the United States -- riparian rights and prior appropriation -- and a variety of current topics. These include the capacity of the legal system to adapt to global climate change, the emergence of a human right to water, the impact of environmental laws on the right to divert water, the management of the Great Lakes, and the special rights of Indian Tribes. This course will be taught at Chicago Kent College of Law.

LAW 364 Women and Jewish Law (3 Credit Hours)
This course will examine the primary issues of Jewish Law affecting women, particularly as they pertain to family law. Among the topics that will be highlighted are marriage, divorce, sexual relations, and child rearing responsibilities. The course will involve an examination of both the classical Jewish law texts on these topics (in English) as well as a discussion of more current positions on the issues covered. Students need not have any background or religious affiliation to take this class.

LAW 365 Chinese Law Practicum (1 Credit Hour)
Sequel to Introduction to Chinese Law to include specific skill sets in Chinese Commercial Law for use in an internship for American Law Firm doing business in China to set up China Based Presence for a Multi-national corporation doing business in China. Must complete two credits in Introduction to Chinese Law (LAW 177) and receive instructor permission. This is an Experiential Learning course.

LAW 366 Immigration Law and Policy (2 Credit Hours)
This course is a survey of U.S. immigration law with an emphasis on immigration policy and current developments. This class is intended to provide a foundation on which to understand immigration law as it currently exists. Topics include the history and legal foundations of U.S. immigration law and will cover family and employment-based immigration benefits, criminal immigration provisions, grounds of inadmissibility, detention/removal, refugee and asylum law, and U.S. citizenship.

LAW 367 Adv Electronic Discovery Skills (1 Credit Hour)
Electronic discovery ("e-discovery" or "eDiscovery" for all the hipsters that joined the practice after 2008 including Professor Tilot) is a discipline required to work with digital evidence during litigation, arbitration, and investigations. It is arguably the most complex part of modern civil litigation in the United States. Fast paced advancement in information technology and the resulting tsunami of digital evidence have proven to be profoundly challenging to the judicial system. The enormous volumes of data generated by litigants and the resultant costs of eDiscovery drive litigation and settlement strategy. The law, the courts and legal practitioners have all had to adjust. Both knowledge of eDiscovery and practical application of eDiscovery are differentiators for many clients choosing counsel and for law firms hiring litigation attorneys. This course will provide you with practical skills that will help you advocate for your clients and be cognizant of the challenges that eDiscovery can create from a litigation and cost perspective. These are must-have skills for litigators regardless of the area of practice. Law 367 will focus on early stage eDiscovery practice. Development of an eDiscovery strategy and negotiation of discovery protocols are two particularly challenging and vitally important aspects of litigation practice. The decisions and concessions made during these early stage tasks ripple throughout the course of a lawsuit. Law 367 will focus on developing the legal acumen and practice skills necessary to successfully navigate these two areas. The purpose of the course is twofold, providing students with a practical understanding of: ¿ eDiscovery concepts that are critical to discovery planning and successful conduct of party negotiations including Meet & Confer Sessions (Rule 26(f) Conferences) ¿ The impacts that early eDiscovery decisions have on case strategy and downstream outcomes

LAW 368 Higher Education Law (2 Credit Hours)
The administration of each college and university in the United States undeniably intersects with the American legal system in multiple ways. Indeed, in today's increasingly regulated and politically charged context, the enterprise of higher education may now be more impacted by the law than ever before. Students in this course will learn how foundational concepts across traditional legal areas (e.g., administrative law, civil rights, torts, intellectual property, etc.) apply to the unique domain of "higher education law" and will explore hot topics such as student discipline, free speech, diversity & inclusion, sexual misconduct/Title IX, and faculty and student unionization - to name a few. Course format will be entirely online, with most weeks taught synchronously and occasional class content delivered asynchronously.

LAW 370 Securities Regulation (3 Credit Hours)
This course will introduce students to the issues that arise in securities regulation and securities related transactions. The first half of the course will cover the 1933 Securities Act, which addresses the initial distribution of securities to the public. The analysis of what is a security will be undertaken in connection with the 1933 Act. The second half of the course covers the 1934 Securities Exchange Act, which is a multifaceted statute. Students will analyze this statute and topics, including the following: (i) the regulation of stock exchanges, over-the-counter market and broker dealers; (ii) extension of credit in securities transactions; (iii) proxy solicitation and tender offers; (iv) insider trading; and (v) anti-fraud, particularly Rule 10b-5. Students will also have the opportunity to study and evaluate various types of documents that are commonly encountered in securities transactions and study defensive tactics to tender offers in connection with the 1934 Act material. Students taking this class would benefit by having previously taken Business Organizations. There will be two exams: one in March covering the 1933 act and one in May covering the 1934 act. These exams will be weighted equally.

LAW 371 International Business Trans (1-3 Credit Hours)
An introduction to the legal aspects of international business. The course emphasizes what lawyers need to know to represent clients doing business in the 21st century. It covers international treaties like the Convention on International Sales of Goods (CISG), international letters of credit, international commercial terms, conflicts of laws, international trade policy, the Foreign Corrupt Practices Act, international corruption, international arbitration, and import and export issues and how to draft international agreements. Students will actually draft an international distribution agreement, and will also deal with drafting issues for international agency agreements, international licensing agreements and international franchise agreements. A focus will be on advising clients who are doing international business, in order to help them engage in best practices and avoid pitfalls. (Moses)

LAW 372 International Law and Practice (3 Credit Hours)
This course introduces the structure of the international legal system, examining the sources of international law; the roles of states, individuals and other actors; methods of dispute resolution; and the status of international law in the U.S. The course examines topics of substantive law, including the use of force. Finally, the course examines how international law affects, and can be used in, domestic practice.

LAW 374 Extraterritorial Law Enforcement (2 Credit Hours)
This seminar will focus on the legal and operational issues associated with investigating and prosecuting extraterritorial criminal activities. Topics will include the emergence of transnational crime, United States extraterritorial criminal jurisdiction, and the tools used to investigate and prosecute individuals located outside of the United States and offenses occurring outside the United States. The course will discuss extraditions, undercover operations, evidence, and renditions. Students will be evaluated on class participation, a short mid-semester paper, and final exam.

LAW 375 Antitrust (3 Credit Hours)
This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 376 Student Initiated Capstone Project I (1-4 Credit Hours)
Student Initiated Capstone Project: Engaged Learning (comprehensive simulation and skills) This variable credit course may be repeated for a maximum of four credits. This course is limited to 3L students or rising 3Ls unless exceptional circumstances apply to allow 2L enrollment.
The student-initiated capstone project provides students an opportunity to synthesize and apply substantive knowledge, legal analysis, skills and professionalism to a complex legal issue and receive feedback that facilitates their move to practice. Students may propose the provision of project-based legal assistance to a public, non-governmental or professional organization or another proposal that allows students an opportunity to exercise planning, project-management, problem-solving and other skills in a real-world setting, while at the same time developing the capacity for self-directed learning. Project requirements: Students must submit a written proposal for review and approval to the Associate Dean for Academic Affairs in the semester prior to enrollment in the course setting forth the following: - A description of the project, including its purpose and potential impact on the organization on whose behalf the project is being undertaken; - An implementation work plan, including time line and progress benchmarks; - The number of students participating in the project; - A plan for faculty supervision (student must seek out and secure the participation of a faculty adviser); - Memorandum of understanding from the relevant organization (if applicable); - The specific knowledge, skills and values that would be needed to bring the project to successful completion; - Proposed deliverables, which should include a mechanism for student reflection on the capstone experience; - Proposed criteria for evaluating student performance. Examples of approved Capstone projects: SUFEO (Stand Up For Each Other) suspension advocacy project, Dialogue De Novo a Loyola Law community and legal interview podcast, and Legislative Advocacy Supporting the LGBTQ+ Community project.

LAW 377 Intellectual Property Law (3 Credit Hours)
The course is an introduction to the law of intellectual property. This course is a pre-requisite for advanced courses in IP, but also a good survey of the area for students interested in pursuing other legal careers. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominate focus on the course is on trademark, patent and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 379 Data Breach Notification Laws (2 Credit Hours)
This course introduces students to state and federal data breach notification laws and the policies and procedures surrounding those laws. Students will learn about the requirements placed on corporations and other institutions to notify customers in case of breach. They will become familiar with the process for providing notice. The course is especially useful for students interested in corporate law, health law, intellectual property, and in matters of technology, privacy and data security in the legal sphere.

LAW 380 Estate & Gift Tax (3 Credit Hours)
The course examines the basic components of the federal transfer tax system (estate tax, gift tax and generation skipping tax), and as their interrelationship. The course emphasizes the structure of the federal transfer tax system and includes suggestions for revision. Students who intend to take Estate Planning must complete this course. Federal Income Tax is highly recommended.

LAW 381 International Arbitration Workshop (1 Credit Hour)
This course is designed to introduce the law student to the basics of advising and representing clients in international arbitration. The course will consider the basics of negotiating and drafting arbitration clauses such as the use of standard arbitration clauses, choice of the arbitral institution, seat of arbitration, number of arbitrators, language and the applicable law. It will then turn to the fundamentals of party representation in international arbitration such as nomination and appointment of arbitrators, written advocacy, document production, witness testimony and oral argument. The course will pay particular attention to the cross-cultural challenges and ethical issues pertaining to in international arbitration advocacy.

LAW 382 International Tax Law (3 Credit Hours)
Pre-requisites: Federal Income Tax or Permission Required This course focuses on U.S. income tax issues with respect to the foreign activities of U.S. taxpayers and U.S. activities of foreign taxpayers
Particular emphasis is placed on the corporate taxpayer. Foreign tax systems are not addressed specifically except to highlight differences from the U.S. system. Specific topics include the foreign tax credit, sourcing rules, the "effectively connected" doctrine, the concept of trade or business in the U.S. Code section 482 allocations, subpart F income, and tax treaties.

LAW 384 Tax Controversy Practice and Procedure (2 Credit Hours)
Pre-requisites: Federal Income Tax
This course covers procedures and strategies for representing clients and resolving Federal civil tax controversies arising from Internal Revenue Service audits and appeals, including litigation. The course also includes a discussion of tax penalty provisions and the ethical issues faced by advisors in structuring tax motivated transactions and resolving tax controversies.

LAW 385 Nonprofits (3 Credit Hours)
Nonprofit organizations play a crucial part in the U.S. economy. Among other things, they account for almost 10 percent of the wages paid in the United States, and they account for more than 5 percent of the country's GDP. This class will go over the laws that govern this nonprofit activity, including the organization and operation of nonprofit organizations under state law, the rules governing federal tax exemption and charitable deductions for donors, and the laws that govern noncharitable nonprofit organizations. By the end of this class, you should have basic knowledge that you will need to advise nonprofit boards of directors of their legal obligations and ensure that nonprofit organizations comply with relevant federal and state laws.

LAW 386 Advanced Corporate Tax (3 Credit Hours)
This course follows Corporate and Partnership Tax. The principal focus is on taxable and nontaxable acquisitions of a corporate business.
The first part of the course focuses on taxable asset sales and stock sales; the second part explores and analyzes the detailed statutory and common law requirements with respect to "non-taxable" acquisitive reorganizations (mergers, stock/asset acquisitions), "nontaxable" divisive reorganizations (spinoffs, split-offs, split-ups) and other nontaxable corporate adjustments (recapitalizations, reincorporations). Please note: Corporate and Partnership Tax is a pre-requisite for this course.

LAW 387 International Environmental Law (3 Credit Hours)
International Environmental Law introduces some of the legal and policy responses to global environmental degradation. The course begins with an introduction to the international legal framework within which international environmental law has developed and provides an overview of the major environmental problems confronting the international community. The course then examines a variety of global environmental problems and the legal regimes that have developed to address these problems. The emphasis throughout the course is on the relationship among environmental protection, economic development, and social development (the three pillars of sustainable development) and on the conflicting goals and priorities of affluent countries (the Global North) and middle- and low-income countries (the Global South). The North-South divide will serve as the key analytical framework through which the course will examine global environmental governance - with particular emphasis on environmental justice and on the perspectives and concerns of historically marginalized states and peoples.

LAW 388 Global Access to Medicine: A Patent Perspective (2 Credit Hours)
This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

LAW 389 Public Interest Law Seminar (1-2 Credit Hours)
2L, 3L, and 4L students may enroll in the Public Interest Law Seminar for 1-2 credits. The seminar is a survey of social justice issues, including mass incarceration and the prison industrial complex; inequities relating to education, the environment, health care, and housing; economic justice and labor rights; voting rights and public participation; and migration and immigration, among other topics. Additionally, the course examines how the topics discussed impact communities and intersect with various social identities and systems of oppression. The Public Interest Law Seminar is required to obtain a Public Interest and Social Justice Certificate. At the time of enrollment in the Seminar, students shall have completed or be in the process of completing the 30 required volunteer service hours. In addition, at the time of enrollment in the Seminar, students shall have completed or be in the process of completing a clinical program, practicum, or externship. During the Seminar, students will either write a publishable article on a public interest topic or complete a project related to the public interest. The length of the paper or hours committed to the project will depend on whether the student is enrolled for 1 or 2 credits.

LAW 390 Financing An Aging Population (2 Credit Hours)
This class will highlight planning opportunities for attorneys practicing in elder law and estate planning to offer to their clients. Foundational topics include basic income tax concepts, basic gift and estate tax concepts, basic estates, trusts and probate concepts, and basic retirement planning concepts. Then, the course highlights the statutory planning tools available for individuals as they age, including special needs trusts, reverse mortgages, long term care insurance, and other methods for funding a healthy quality of life during retirement, and for funding as large a legacy as possible upon death. The contract and fiduciary issues with surrogate decision-making, as well as the clinical assessment of diminished mental capacity, will also be discussed.

LAW 391 Professionalism (2 Credit Hours)
Exposure to attitudes and characteristics which act as the basis for success as a true professional in the practice of law. The class will present perspectives on how to succeed as a new lawyer, given expectations and competitive environment. The class will expose the traits identified by others that will equip law students to grow into lawyers who have true professional and personal success. The experience will aim to provide a framework of skills that are considered indispensable for professional success that are not otherwise the focus of attention in the traditional law school curriculum. Subjects such as civility, self-awareness, resilience, the setting of focused values, duties of confidentiality and competence, and other strategic goals will be explored. In sum, this course will be an experience in reflection, goal setting, and exposure to the realities awaiting the post-law school experience in the legal profession.

LAW 392 Consumer Law Review Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 393 Estates and Trusts (4 Credit Hours)
This course is being offered in collaboration with Chicago Kent School of Law and will be taught at Chicago Kent.

LAW 394 Consumer Law Review Senior Editor (1-2 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 395 Consumer Law Review Executive Editors (1-3 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 396 Consumer Law Review Members (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 397 Elder Law (2 Credit Hours)
This class provides the doctrinal foundation in elder law. The class is taught through the lens of bar-related areas of the law. Fiduciary and Agency law concepts are used to discuss ethics issues, discrimination issues, durable powers of attorney, and other methods for planning for an individual's incapacity. Public and Constitutional law concepts are used to discuss an individual's right to consent to or deny medical treatment, the court's jurisdiction in adjudicating adult guardianship, and the governmental benefits available to elderly individuals. Property laws are used to discuss various housing choices available in retirement, and Contract and Tort laws are used to discuss nursing homes, private insurance, and other financial contracts. Additionally, Consumer and Bankruptcy laws are used to discuss financial exploitation while Evidence and Criminal laws are used to discuss physical and emotional abuse of the elderly. Other important issues with aging populations will be discussed.

LAW 398 Negotiations (2 Credit Hours)
This course examines the negotiation process engaged in by lawyers. It is intended to increase a student's understanding of that process and to develop his/her skills as a negotiator. Experts in various fields discuss negotiations as they apply in those areas of the law. Students engage in mock negotiations in a variety of contexts, such as divorce, real estate, contracts, commercial law, labor law, and criminal law. Not all instructors cover each of these areas of substantive law, and different instructors emphasize different areas of substantive law. Must have completed 40 credit hours; if you take Mediation or Negotiations, you cannot take Alternative Dispute Resolution. If you have taken the Mediation & Other ADR Procedures Clinic, you cannot take this class. This course will be taught at Chicago Kent College of Law.

LAW 399 Financial Wellness for New Lawyers (1 Credit Hour)
The purpose of this course is to prepare students for the opportunities and personal financial challenges they will encounter during their legal careers. My goal is to show each student that strong financial habits are crucial and beneficial for all types of attorneys and all levels of income. Students will learn that it is possible for all of us to obtain financial freedom, which translates into the power of choice. When we have the power to choose, we have the power to live a life that conforms to our personal values, including the strong values instilled upon us at Loyola. When we are not encumbered by poor financial choices, we are free to choose our professional focus, to share our talents with the disadvantaged members of our community, and to work on passion projects. Importantly, we can choose to spend more time with loved ones.

LAW 400 Corboy Fellows I (3 Credit Hours)
Corboy I is a graded course available to students in their first year of the Corboy Fellowship program. Instructor permission is required for enrollment. In the Corboy I course students earn 3 graded units in the Fall and 3 graded units in the Spring which includes mandatory participation in the evidence/trial practice boot camp at the start of each semester in addition to successful completion of course work in trial practice as required by the syllabus provided by the instructor. In the Fall semester of the course students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. In the Spring semester of the course students build upon the basic trial advocacy skills developed in the Fall through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. Each Fellow is required to apply their learned skills in a local, regional, national or invitation mock trial competition. The Corboy I course satisfies the requirements for Trial Practice I (LAW 411 or LAW 416) and Trial Practice II (LAW 412). Credit: Graded 3 units Fall; Graded 3 units Spring Permission is Required.

LAW 401 Corboy Fellows II (2 Credit Hours)
Corboy II is a non-Graded course available to students after their first year in the fellowship program. Only students that have successfully completed the Corboy I course are eligible to enroll in the Corboy II course with instructor permission. In the Corboy II course students earn a maximum of 4 hours of ungraded credit for participation in mock trial competitions. Non-graded 2 units Fall; Non-graded 2 units Spring Permission Required

LAW 402 "Say Her Name:" Intersectional Feminism & Police Violence (4 Credit Hours)
Drawing on literature from criminology, Critical Race Theory, social ethics, and feminist/womanist thought, this seminar will apply an intersectional lens to state violence, from mass incarceration to police shootings of racialized people. This course will introduce students to the foundational concepts of Critical Race Theory and Intersectional Feminism. The course will reflect on the legal and intellectual context out of which white supremacy, white heteropatriarchy, hypermasculinity, and economic exploitation pervade our understanding of normativity as law and order. Students will map and critically examine the multiple trajectories along which the moral and legal authority of the state and its justifications for violence against its most vulnerable are engendered by the convergence of racism, sexism, and classism under the guise of normality, social order, common good, and even the will of God. Further, we will explore how to develop social interventions that disrupt these normative patterns of racialized state violence and facilitate the elimination of racially based, gender biased structures and practices in order to facilitate critical pedagogy, moral leadership, legal practice, and social movement organizing.

LAW 403 Business Entity Formation (3 Credit Hours)
Pre-requisites: Business Organizations
Business Entity Formation provides an opportunity for students to form various types of business entities including partnerships, limited liability companies and corporations. Students apply the legal doctrine learned in Business Organizations and other courses to a series of progressively more sophisticated simulation exercises and prepare the documents necessary to create and organize the entities. Students utilize information gathering, planning, counseling and negotiating skills in the development of the documents.

LAW 404 Client Counseling (3 Credit Hours)
This class will focus on the attorney client relationship, from interviewing perspective clients to counseling clients throughout the representation process from the perspective of the advocate. In addition to interviewing and counseling skills this course will focus on negotiation skills in the context of negotiation process that occurs between lawyer and client, and with opposing counsel from the perspective of the advocate. The goal is for students to gain an understanding of the best practices for client interviewing, counseling, and negotiation. As a part of this focus, students will learn a variety of models, strategies, tactics and conceptual frameworks to use when they analyze legal matters, counsel clients, and negotiate with their attorney counterparts in a matter. The course will emphasize communication and problem-solving skills with particular attention to communication, cognitive and emotional obstacles to effective negotiation and counseling. The course will also address public policy, legal and ethical issues that arise during legal representation. Interviewing, counseling, and negotiation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve in-class exercises and role-playing simulations in small groups. Over the course of this class, you will have the opportunity to serve as advocates, clients, and observers. Every student will be assigned a role for each exercise and will be expected to contribute meaningfully to the learning experience through their role.

LAW 405 Business Practice Transactional Skills (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course This course will promote skills essential to successful lawyers in business transactional practice: evaluating facts; understanding the central business objectives of clients as well as the goals of other parties to the proposed transaction or relationship; issue spotting and problem solving; and developing, advocating for, and implementing responsive strategies. Three parallel case studies will run through the course, illustrating the application of each topic to different types of client organizations: a Fortune 500 industrial company, an entrepreneurial family-owned business, and a medium-sized not-for-profit organization. The class will be presented with a series of problem simulations built around diverse, realistic business situations for these mock clients. Topics may include structuring; due diligence; letters of intent and similar preliminary documentation; suggesting changes to sample transactional documents that protect and advance clients' objectives; and deal implementation. The course will use traditional learning techniques as well as simulations throughout the semester to explore the role of the transactional lawyer in both a familiar, domestic U.S. context and an increasingly global marketplace. More than ever, business lawyers are afforded the opportunity - and the challenge - of coordinating and planning projects abroad in markets unfamiliar to them, as well as advising international clients with in-bound investments in the lawyer's home market. There are frequent occasions to interact with people whose experience, way of doing business, and goals are different from our own. They may be clients, partners, or counterparties. The professional opportunity in law practice is to become progressively adept at discarding jargon and misconceptions and bridging expectations among transactional participants and their advisors. The course will use primarily real estate project fact situations, since most students can easily imagine and relate to client objectives involved in buying, selling, leasing, or otherwise occupying real property, and since in the international aspects of the course the approaches to property rights and occupancy are so fascinatingly different country to country. But the course's learning points will also have general application in other types of commercial transactions. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. Students will be graded based on written assignments and exercises and class participation. There is no final examination for this course. (Hagy)

LAW 406 Mediation Advocacy (2-3 Credit Hours)
This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators. The problem solving skills you will learn in this class can be tremendously helpful whether you are representing a client in a mediation, negotiating a deal in a business or government setting, or settling a case in a pre-trial conference with a judge. Clients appreciate lawyers with these skills because they are able to preserve business and family relationships while still obtaining results that protect client interests at a reasonable cost. Conflict management skills are also highly valued in non-traditional legal careers. The course will also prepare you to represent a client in positional negotiations where the mediator provides an evaluation of the case. Mediation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve role-playing simulations. Over the course of this class, you will have the opportunity to serve as mediators, represent clients, be clients, and give feedback as observers.

LAW 407 Immigration Detention Project (2 Credit Hours)
The objectives of the course is to provide students live client experience in the form of a week-long experiential immersion program where students will provide direct representation, advocacy, and support to detained immigrants in geographic locations in the US where the need is greatest. The program will include an online course on a Saturday or Sunday in February, providing students a basic understanding of US immigration law and policy related to the needs of detained immigrants at the designated site (e.g. how to conduct a bond hearing, credibly fear interviews for asylum applicants) , followed by a hands-on live workshop (3 hours). The workshop will provide students an introduction to live-client skills including trauma-informed interviewing, vicarious trauma, and also include travel logistics. Reading materials will also be assigned in advance as part of the online course. Participants will travel over spring break in March to provide on-site representation in collaboration with national partners, and spend the last afternoon together to reflect on their week. Faculty and practitioners will supervise students, with one practitioner per four students. Some cases may require ongoing representation, which will be coordinated through the Immigration Law Practicum (Law 470). During the fall term, participants will organize a public forum to share their experience and reflections, and to identify opportunities for other students and practitioners to engage in social justice advocacy on behalf of immigrants both in Chicago and nationwide.

LAW 408 Restorative Justice Workshop (1 Credit Hour)
In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

LAW 409 Negotiation Weekend Workshop (1 Credit Hour)
This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn basic negotiation principles and skills and apply them during a series of simulated negotiations where they will play the roles of counsel and clients. The course will explore the negotiation process from negotiation planning to the execution of a final agreement. The course will cover concepts including, but not limited to, needs and interests, BATNA, information-gathering, dealing with emotions and option development. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail. Students may register for the Negotiation Weekend Workshop to receive one credit. It is an option to also register for the Client Counseling Weekend Workshops to receive a total of two credits for participating in both weekends. Registration in both courses is not a requirement and each course does stand-alone.

LAW 410 Legal Writing III (2 Credit Hours)
This course focuses on persuasive written and oral communication skills which are necessary for critical analysis and the competent representation of all clients. Students will explore all sides of an argument, provide evaluations of the merits of particular cases, and persuade the reader/listener of the student's position. Pre-requisites: successful completion of Legal Writing I and II. This is a Juris Doctor Required course.

LAW 411 Trial Practice I (3 Credit Hours)
Pre-requisites: Evidence
This graded 3 unit course offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course of the semester.

LAW 412 Trial Practice II (3 Credit Hours)
Pre-requisites: Evidence and Trial Practice I
Law 412 Trial Practice II, Section One This graded 3 unit course offers the opportunity to build upon the basic trial advocacy skills developed in the Trial Practice I course through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the written and oral motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a two bench trials and a jury trial during the course of the semester. Law 412 Trial Practice II, Section Two TRIAL PRACTICE II: A SECURITIES FRAUD TRIAL This semester-long course provides a unique opportunity to try a securities fraud case to verdict culminating in a full-day mock jury trial as the final. Students in this class, limited to 8 students, will try one complex civil case: a private claim of securities fraud alleging that the Defendants operated a Ponzi scheme in violation of Rule 10b-5 under the Securities Exchange Act of 1934. Students will work with a complex case file, including deposition transcripts, sworn statements, an expert report, investment offering materials, correspondence, bank records, and accounting records. Students will create their own summary and demonstrative exhibits to better inform and persuade the jury, and learn how to persuasively use courtroom technology to use exhibits at trial. Leading up to trial, the students will submit brief written motions in limine and responses; these and other pretrial matters will be addressed at a pretrial conference the week before trial. This course satisfies the Trial Practice II requirement.

LAW 413 Current Issues in Criminal Justice (2 Credit Hours)
During this seminar we will analyze and discuss how the criminal justice system is attempting to deal with today's challenges. Topics that might be covered include measures to deal with the gang problem in Chicago; life sentences for juveniles; methods for addressing claims of actual innocence; and the pros and cons of the plea bargaining process. The course materials will include assigned articles and lectures by guest speakers involved in the issues being reviewed. Grades will be based on a paper relating to one of the topics and participation in the seminar.

LAW 414 Professional Responsibility (3 Credit Hours)
This course, required of all students focuses on ethical questions in the practice of law, and examines the basic premises underlying the lawyer-client relationship and the duties assumed by the members of the legal profession, including duties to clients, the public, the courts, and other professionals. Materials consist of the ABA Model Rules of Professional Conduct, and other pertinent standards regarding lawyers' ethics. This is a Juris Doctor Required course.

LAW 415 Trial of a Business Dispute (2 Credit Hours)
This course will focus on trials and arbitrations of complex commercial disputes, including breach of contract and fraud claims. Students will develop skills examining witnesses, deliver opening/closing, discussing specific pre-trial and trial issues relevant to business disputes, and conduct a full trial of a breach of contract or fraud action.

LAW 416 Trial Practice I (Intensive) (3 Credit Hours)
Pre-requisites: Evidence Corequisite: Evidence, Summer term only
This intensive eight day course is a 3 unit graded course that offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course.

LAW 417 Advanced Business Law (3 Credit Hours)
This course teaches corporate business law and negotiation skills through a simulated class in which Northwestern and Loyola law students represent either a US pharmaceutical company or an African agricultural production company. The two companies are interested in working together to exploit a new technology and the form of their collaboration will consist of drafting and negotiating a non-disclosure agreement, letter of intent, a joint venture agreement, a licensing agreement, and a long-term supply contract. The negotiations will take place through written exchanges and live negotiations that will be conducted via zoom.

LAW 418 Pre-Trial Litigation (2 Credit Hours)
This course integrates a theoretical and practical approach to the pretrial components of litigation. Students gain an understanding of the purpose of pleadings, pretrial motions, depositions, and settlement conferences, and extend their knowledge through practical experience. The second portion of the course complements the courses in trial practices by investigating the psychology of courtroom communication and its related effects. Overall, students should develop a more well-rounded perspective of the pretrial aspects of litigation.

LAW 419 Business Skills in Sports and Entertainment Law: The Introductory Skill Set (2 Credit Hours)
This course will use current trends, current business practices and the experience of current practitioners in the Sports & Entertainment Industry to introduce, examine and understand Business Skills which are necessary for success in these fields. The use of past deals, structures and documentation from current practitioners will give insight, strategy and the thought process of the facets and nuances to complete a transaction. Engagement via technology or classroom presentation from practitioners in Sports & Entertainment will provide context to course material and provide students a "real world perspective" of the Business Skills necessary for success. Students will be required to draft legal documents and create oral presentations to demonstrate their ability to apply concepts presented during the course.

LAW 421 Political Feasibility Analysis (3 Credit Hours)
Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered. Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies.
Outcomes:
Ability to craft and implement a comprehensive political strategy to change public policy outcomes

LAW 422 Federal Litigation Practice (2 Credit Hours)
A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

LAW 424 Professional Identity Formation (1 Credit Hour)
Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the practice of law. The course objectives include the education and development of professionals prepared to enter the workplace with the tools needed to successfully engage and manage diverse environments with the ability to think critically about various legal issues, problems and solutions and how they impact different groups of people and communities differently based on identity, privilege and oppression. This course is only open to incoming first year Juris Doctor students.

LAW 425 Feminist Jurisprudence (2 Credit Hours)
This is a cross-disciplinary course open to law students and students in related graduate disciplines including gender studies and social work. The course will involve a critical exploration of the law from a feminist perspective, The class will examine the role of law and lawyers historically and currently in challenging gender discrimination in the United States and globally. Students will be encouraged to creatively analyze how legal training can contribute to the pursuit of social justice and civil rights.

LAW 426 Special Education Law and Advocacy (2-3 Credit Hours)
This course will be offered as a 2-credit course, online only, in Spring 2019. This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will assume the roles of parent/student advocate, school administrator, third-party mediator, and school service provider in a variety of online activities, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 427 Public Interest Law Reporter Executive Editor (1-3 Credit Hours)
Students enrolled in this course receive credit for their work as the executive editors of the law school's Public Interest Law Reporter.

LAW 428 Pub Int Law Reporter Associate Editors (1 Credit Hour)
Students enrolled in this course receive credit for their work as the associate editors of the law school's Public Interest Law Reporter.

LAW 429 Pub Int Law Reporter Members (1 Credit Hour)
Students enrolled in this course receive credit for their work as the members of the law school's Public Interest Law Reporter.

LAW 430 Legislation (2 Credit Hours)
This course considers the dominant role state and federal legislation plays in today's legal system. Topics covered include legislative theory'; key concepts of legislative drafting; sources of legislative uncertainty; the changing theories, tools (including the oft-maligned canons of statutory interpretation), and practices of statutory interpretation; and the role of courts in interpreting statutes. The greatest part of the course will focus on matters of statutory interpretation including the tools courts rely upon when interpreting statutes.

LAW 431 Documenting and Negotiating Finance Transactions (2 Credit Hours)
Pre-requisites: Students taking this class will be expected to have taken Business Organizations
This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course. This is a Skills course.

LAW 433 Critical Legal Studies (2 Credit Hours)
Critical theory attempts to answer the age old question, "what is law?," by asserting that law is the reflection of the political values of the dominant group within society. After a brief introduction to the more traditional theories of justice; such as natural law, legal positivism, and legal realism, students will take up the challenge of Critical Legal Studies. Subjects covered include an economic analysis of law; gender and sexual orientation; and critical race theory. Other possible topics include an evaluation of law and economics; the emergence of Sharia law; and the role of feminism in the 21st century. This course will be taught at Chicago Kent College of Law. (It may be taken as either a regular course with an exam at the end, or as a seminar with a paper in lieu of the exam.)

LAW 434 Federal Criminal Law (2 Credit Hours)
Most criminal law is state law. When should the federal government get involved? This course answers the question by looking at both the legal arguments and the underlying policy goals of Supreme Court Justices. Along the way, it explores several major federal crimes: blackmail, government corruption, organized crime, drug dealing, fraud, and money laundering.

LAW 435 Deposition Advocacy Workshop (2 Credit Hours)
This Skills and Comprehensive Simulation Program is designed to teach students about Illinois and Federal deposition practice. Topics covered will include: effective deposition questioning strategies and techniques; thorough deponent preparation; efficient and technical use of exhibits; proper objections; methods of rehabilitating your witness; ethical considerations; and how to deal with the most difficult opposing counsel. This class will have lectures, but primarily focus on in class participation and interaction. The grade for this course will be based on individual mock deposition performances, in class participation, and overall contribution to self-critique and classmate critique.

LAW 436 Comparative Constitutional Law (1 Credit Hour)
The course will explore comparative constitutional law topics that are pertinent to issues in the United States. Topics considered will include the protection of fundamental rights, such as freedom of speech and religion, as well as matters such as the structure of constitutional review; the composition, attributes, and functioning of the tribunals that conduct that review; the proper role of foreign, transnational and international law in constitutional decision making; and the division of authority between central and regional or local authorities.

LAW 437 Public Interest Law Reporter Senior Editors (1-2 Credit Hours)
Students enrolled in this course receive credit for their work as the senior editors of the law school's Public Interest Law Reporter.

LAW 438 Dispute Resolution Skills Teams (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 440 Criminal Procedure Capstone (3 Credit Hours)
This course provides critical enrichment to students who are currently taking or have already taken at least one criminal procedure course. We examine how the criminal law works in practice in a variety of ways¿by looking at case studies, by studying empirical scholarship, and by hearing some of the difficulties and challenges from guest speakers.

LAW 441 Trial Practice - Modern Trials (3 Credit Hours)
Pre-requisites: Trial Practice I or Trial Practice Intensive
Trial Practice - Modern Trials is a three-hour, graded credit advanced trial practice class designed to teach students the skills necessary to effectively try cases using computers to present evidence and visuals for jury addresses. Modern juries receive the majority of their information from television and computer screens - a courtroom should be no different. The course builds on the basic trail skills acquired in other Trial Practice classes with a real world approach to simulate modern trials as closely as possible. In the first few weeks of the semester, students learn how to use PowerPoint and a dedicated courtroom presentation program called "Sanction" as tools to better engage juries by presenting materials electronically. The remainder of the semester is spent trying cases-first in a workshop setting where students receive hands-on advocacy instruction, followed by trying two full mock-trials in the federal courthouse courtrooms with built-in computer monitors and projectors. The skills acquired in this class are now a necessary for any aspiring trial lawyer as many federal courts function exclusively through the electronic presentation of evidence. The course will be taught by Assistant United States Attorneys Michael Ferrara and Abbie Peluso (both Loyola alums).

LAW 443 Immigration Law and the Workplace (2 Credit Hours)
An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Other laws protecting workers, such as labor and comprehensive immigration reform. This course will focus on the obligations of US employers, both under IRCA and beyond and the implications of illegal immigrant employment. It will examine pitfalls that await an employer who tries to comply with the law and analyze the penalties that can be assessed against an employer who discriminates against workers because they appear foreign. It will also review the civil and criminal penalties against employers who knowingly employ unauthorized workers, sometimes exploiting them with substandard working conditions, reviewing cases that have been brought against employers. This is a seminar class limited to 20 students. Attendance is mandatory. Students will be assigned to a team and each week, the team will be expected to report on various aspects of this issue, with assigned readings. The last five weeks of class will be devoted to student presentations on relevant issues. Students will choose topics of interest and, with approval, will give a presentation, write a paper and submit a research file. No exam.

LAW 444 Land Use Seminar (2 Credit Hours)
Pre-requisites: Land Use (LAW 350) or comparable land use survey course is a prerequisite
Advanced seminar that provides students with the opportunity to concentrate on issues of their choice related to historic or contemporary development patterns in urban America. Flexible scheduling available.

LAW 445 Humanitarian Law and Conflict (2 Credit Hours)
This seminar examines the international rules regulating armed conflicts and other armed violence. Topics include the rights and responsibilities of states and individuals under international law, armed conflict identification and classification, the law of the sea, and rules regulating the conduct of fighters and other aspects of armed hostilities, and international human rights law. The course is designed to prepare students for competitions and/or future practice in these areas of law, such as in a government/military or non-governmental organization setting. The final grade is determined by group projects that include answering scenario-based humanitarian law questions and a research project to be selected and completed by assigned student groups. LLM students may enroll in this course with permission.

LAW 446 Mini MBA for Law Students (1 Credit Hour)
Since the onset of the global financial crisis, the role of the lawyer has expanded. Law firms and their clients alike expect new lawyers to not only understand the law but the basics of accounting and finance as well. This intensive pass/no pass course in accounting and finance is designed to help prepare law students for the demands of a career within a law firm. Topics covered include: How to read and analyze financial statements How to calculate returns on investments How to value companies How to structure securities Goal: To prepare law students for careers in a changing economy in which lawyers will be expected, and even obligated, to understand the intricacies of the business world. Description: This Unique program was designed to bring the world of finance and accounting to aspiring lawyers. It seeks to offer law students an overview of business concepts most relevant to legal professionals and relates these concepts to a broad array of practice areas. The course progresses in order of difficulty beginning with basic elements of accounting and concluding with more advance concepts related to securities pricing. Agenda Financial Statements: Analyzing financial statements has been a tsk traditionally performed by investment bankers and accountants. However, with accounting scandals threatening to erode confidence in corporate America, attorneys are taking on a prominent role in preparing and analyzing financial statements. Including the Balance Sheet, Income Statement, and Cash Flow Statement, this course is designed to give students an overview of accounting techniques and their relevance. Financial Analysis: The process of analyzing financial statements is involved in virtually every business decision. As corporate managers and bankers rely more on the advice of their inside and outside counsel, it is now imperative that an attorney better understand basic business decision making tools. This course will allow students to understand different methods of analyzing financial statements, what they are used for, and who uses them. Issues in Financial Reporting: In the wake of the massive corporate accounting scandals such as Enron, WorldCom, and Parmalat, the importance of detecting such fraud has taken on new proportions. No longer a matter reserved exclusively for accounts and financial analysts, accounting fraud is a concern of most attorneys who must be able to detect and report any suspicious of questionable reporting practices. This course is designed to equip students with the basic skills to determine signs of corporate accounting fraud along with guidance on what to do when confronted with such matters. Corporate Finance: With Issues related to corporate finance becoming more relevant today than ever, the role a lawyer plays in structuring transactions, negotiating deal terms, and coordinating the underwriting process is becoming increasingly important. This course provides the basic tools to understand, apply and challenge most aspects of financial management. Valuation: Valuation forms the cornerstone of nearly every business transaction. Whether it involves mergers and acquisitions, leveraged buyouts, venture capital, or real estate, a solid understanding of valuation will ensure an equitable transaction. Attorneys play an active role in these transactions but all too often become entrenched in the purely legal aspects of them. This course will help students to better understand the methodology and techniques behind various forms of valuation and in turn, better serve the needs of their clients. Securities: Attorneys play a vital role in capital formation and deal structuring for companies of all sizes. This course is designed to offer students a better understanding of the financial instruments they help structure. Topics covered will include stocks bonds, and derivatives. Additionally, the course will explore these concepts in the context of real cases drawn from recent transactions. Students will be responsible for class participation and a review project.

LAW 447 Federal Indian Law (3 Credit Hours)
Federal Indian law examines the jurisdictional balance between tribes, states, and the federal government. The course explores the historical development of Indian law, highlighting its relevance to contemporary tribal sovereignty. Topics covered include criminal law, natural resources, taxation, and gaming.

LAW 448 Comparative Education Research (1 Credit Hour)
This unique course will immerse students in a comparative analysis of early education law and policy in Italy and the United States. The specific focus of the class will be the world-renowned approach to preschool education developed in Reggio Emilia in northern Italy. The preschools in Reggio Emilia are widely regarded as the best in the world. The "Reggio" approach to early education is built on a particular understanding of the biological and social nature of children, and the role of the state in developing its young. Accordingly, the class will begin with an exploration of the neuroscience undergirding the Reggio approach and how this science informs: educational objectives and methods; the architecture of the educational environment, the connections between school and community and the legal and political structures surrounding children. Throughout the class, the "Reggio" approach will serve as a benchmark for understanding and assessing the law and policy of early childhood education in the United States. The class is one-credit. Students will be required to participate actively in class exercises and projects, and to write a 10-15 page analytical or research paper that addresses any issue raised by the class.

LAW 449 Negotiations Seminar (3 Credit Hours)
Negotiating effectively is one of the most important qualities of a successful lawyer. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is a highly rewarding and interactive course. The course syllabus consists of assigned readings, simulations, and written assignments almost every class, and attendance at one video debrief where we will analyze your skill set.

LAW 450 Independent Study: Mock Trial Witness (1 Credit Hour)
In this course students participate as witnesses and bailiff/timekeepers during a mock trial, moot court or dispute resolution competition. Students must complete their assigned role as determined by the instructor. Students are required to read, review and learn material in order to perform role. Students are required to adhere to competition rules for the particular role assignment.

LAW 451 Estate Planning (3 Credit Hours)
Pre-requisites: Estate and Gift Tax; Estates is highly recommended
This seminar attempts to simulate the day-to-day practice of an estate planner. The topics range from the initial client interview to the formulation of sophisticated estate plans for those with substantial property, such as a successful business. The goal is to provide exposure to a broad range of client situations with supervised formulation and implementation of estate plans. Students generally work in teams of two or three and submit several drafting assignments throughout the semester. You may not also take Wills and Trust Drafting.

LAW 453 Legal Writing Tutors - Senior Tutors (1-2 Credit Hours)
Pre-requisites: Legal Writing Tutor (LAW 296)
No course description is available

LAW 454 Religious Liberty Seminar (2 Credit Hours)
Pre-requisites: Constitutional Law
One of our first Freedoms: the freedom to worship in the way of one's conscience is arguably the foundation of liberty in the United States. This course will concern itself with the First Amendment's protections and limitations on our religious liberty by an examination of both historic and current issues in religious freedom whether involving personal behavior, medical issues or political activity tinged with religious issues. In addition to constitutional protections federal and state legislation concerning religious liberty will also be examined. A presentation and paper on topic in the area from each student will be required.

LAW 456 Mediation Seminar (1-2 Credit Hours)
Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works. This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation. Mediation techniques and skills are extremely beneficial to attorneys. It makes them more effective problem solvers when dealing with a case; it helps them communicate more effectively with opposing counsel; and it helps them in their interviewing skills so that they can better understand the needs and interests of their clients.

LAW 457 Business Legislation Practicum (1 Credit Hour)
Pre-requisites: Business Organizations completed or taken concurrently; and permission of instructor
Each student enrolled will choose a current project of the Institute of Illinois Business Law and work with the members of that project sub-committee. The Institute has been located at Chicago-Kent for the past four years, under the Directorship of Prof. Philip Hablutzel. Over the past 30 years, the Institute and its predecessor has written all the major business statutes in Illinois. Each year, the Institute has six to eight law reform projects in various states of drafting or submission to the Illinois General Assembly. One or more students will work with a project sub-committee and do legal research and other assistance. The time commitment is four hours per week. Supervision will be by Prof. Hablutzel and the project chair. Students will be required to perform four hours of fieldwork each week. This course will be taught at Chicago Kent College of Law.

LAW 458 Canon Law Seminar (2 Credit Hours)
Canon law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the Christian faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

LAW 459 Intro to English Legal Profession (1 Credit Hour)
This lecture series is a mandatory preparatory course for students who have been selected to participate in the annual London Comparative Advocacy Program. It explores a variety of issues pertaining to the English history and its legal professions. Topics include the history of the common law, the development of the English legal profession, English civil and criminal procedure, the modern legal professions and the history of London. (Permission is required) This is a Perspective Elective course.

LAW 460 Humanitarian Law in Practice (2 Credit Hours)
Pre-requisites: Humanitarian Law and Conflict
This seminar meets for four hours each week during the first half of the spring semester. It is a scenario-driven course that further deepens a student's knowledge, understanding and practical application of international humanitarian and human rights law. Students are required to prepare group presentations on assigned legal topics (Thursdays) and then participate in scenario-based, role-playing exercises that require practical application of the law (Saturdays). The final grade is determined by contributions to and performance during student group presentations on assigned international humanitarian and human rights law topics and role-playing practical exercises.

LAW 461 Education Law and Policy (2-3 Credit Hours)
This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination. This course counts as a Perspective Elective course.
Course equivalencies: MPP 461/LAW 461

LAW 462 Transnational Law (2 Credit Hours)
This course is designed to introduce 1L students to the many specialized areas that a practitioner of "international law" must consider in an era of globalization. No prior knowledge of international law is required. The course will discuss situations of current interest in the world, illustrating the inter-relationship of public international law (relations among states, individuals, NGOs and others), the law of international business and finance, comparative law (the common law and civil law traditions), institutions and procedures for the settlement of cross-border disputes, and U.S. law that bears on issues that involve one or more other countries. Specific topics to be covered will probably include modern piracy, WikiLeaks, money laundering, human trafficking, and the like. This is a Perspective Elective course.

LAW 463 Mindfulness and Well-Being (1 Credit Hour)
Are you stressed? Would you like improve your focus and memory? Prioritizing a healthy brain is important not only because learning the law is intellectually challenging, but also because lawyers suffer from anxiety, stress and substance abuse at an alarming rate. The objectives of this course include learning how mindfulness meditation, food choices, exercise, and various stress reduction techniques can improve brain health and well-being. You will practice meditating regularly both in class and on your own and will be introduced to science that demonstrates how mindfulness meditation can physically change your brain in a short period of time. This course will also cover using mindfulness to heal from technology and other addictions. You will also learn how mindfulness practice builds a variety of human capacities and skills that can be consciously applied with clients, colleagues, staff, opposing counsel, judges, juries and others. We will make these connections throughout the course using readings, meditation (together and apart), videos, class discussion, in-class exercises, personal journaling and guest speakers. You will also learn about recent advances in scientific research on the human microbiome, the mind-gut connection, and how to improve your well-being and brain performance through eating an anti-inflammatory diet. We will also explore the impact of exercise, gratitude practices, and quick stress reduction techniques. Students will also examine the stress response, brain biases (including implicit racial bias), and techniques to improve emotional intelligence in stressful conflict situations. Developing these skills will help you gain resilience to flourish in a demanding profession and bring your best self to serve your clients and communities. (Disclaimer: I am not a therapist, or a certified nutritionist, and I encourage students with mental health concerns to seek/continue treatment as needed with their therapists and/or physicians. The university Wellness Center also provides services and guidance for students with mental health concerns.)

LAW 464 Information Technology and Human Rights Practicum (1-3 Credit Hours)
In light of the ongoing digital transformation, societies are more reliant than ever on innovative technological solutions and ICT to address modern-day challenges. At the same time, this can raise fundamental rights issues in the digital space that confront companies and require highly skilled legal counsel to guide companies in their risk and impact assessments, due diligence and compliance processes, and government relations. The course examines timely human rights issues pertaining to digital technologies (especially ICT) in the areas of data privacy, content regulation, and other on- and offline fundamental rights issues in a US, transatlantic and international context. The goal is to provide students with the knowledge and tools to advise corporate clients on how to navigate these cutting-edge legal challenges. There are many highly topical and timely human rights issues pertaining to digital technologies and ICT confronting companies and their legal counsel, that this course will cover. Challenges around these emerging issues dominate the headlines almost on a daily basis and include biases in artificial intelligence, privacy issues in cross-border data transfers and innovative technologies (i.e. IoT, digital identity), disinformation and election integrity, government access to personal data (on public policy grounds, including public health, national security, etc.), hate speech and other harmful online content, cyberattacks (including during armed conflicts), and internet shutdowns. The course also features an optional practicum component (for one additional credit hour) providing interested students with the opportunity to become engaged in a real-life project on the topic with a relevant entity involving ICT companies and intersecting in a systemic and impactful way with human rights issues in IT, domestically or internationally. The class will be held synchronously via Zoom every Saturday from 9.30am to 11.30am CST. This will enable live class discussions with students and the instructor. Guest speakers from the industry, international organizations, law firms, and/or civil society may occasionally join the class discussion. For any questions about the course, please email Dr. Caroline Kaeb at ckaeb@luc.edu; Dr. Kaeb is a policy officer on digital issues at the European Commission in Brussels and you can find more information about Dr. Kaeb's profile at https://www.luc.edu/law/faculty/facultyandadministrationprofiles/kaeb-caroline.shtml

LAW 465 Strategic Counseling for International Corporate Clients (2 Credit Hours)
The course is designed to introduce students to legal issues faced by international organizations planning to invest in the U.S.A. The course is based on a practical approach and will familiarize students with the legal framework attorneys consider when counseling clients on various options of foreign commercial activity in the U.S.A. Students will identify legal issues based on a client's actual business plan, and develop the best strategy to meet the client's investment goals. The simulation of the challenges of today's international corporate practice develops the students' strategic counseling skills. The course will analyze the traditional vehicles of investments in the U.S., including supply/agency/distribution agreements and establishments of U.S. operations. Students will examine the legal implications of various forms of business enterprise (sales or distribution company; manufacturing operations) in terms of liability tax, labor and employment, and immigration issues. The class will explore other methods of foreign investment, including acquisitions and joint-ventures, and their legal consequences, and will conclude with a look at U.S. regulation of foreign investment and issues in dispute resolution. This is a Skills course.

LAW 466 Tax Controversy Intensive (2 Credit Hours)
Pre-requisites: Federal Income Tax
This course offers students the opportunity for a hands-on approach to developing their skills and knowledge of the procedures and dispute resolution strategies involved in federal tax controversies. This intensive course will offer experience with pre-controversy planning techniques such as: pre-filing motions, conflict resolution with the IRS through both examination and appeals, and preparing for tax court litigation. Students will be engaged in a series of real-time scenarios for identifying issues, drafting responses and preparing memos related to both corporate and individual tax disputes. Experienced tax attorneys will guide students through a series of mock procedures and interactions with the IRS, and assist the students in developing and improving their analytical and writing skills. Through a mix of panel presentations and guests lectures, students will gain an understanding of the types of challenges that can arise in the day-to-day world of tax controversy from the perspectives of the tax attorneys and IRS compliance and enforcement specialists.

LAW 467 Advocacy Competition Supplement (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 468 Comparative Education Law (1 Credit Hour)
This course begins with an exploration of the legal and political structure of American education, including issues such as: (1) the role of government in mandating education; (2) the relationship between state and religion in the educational process; (3) the governance of educational institutions and the shaping of curriculum; and (4) the rights and responsibilities of teachers and students. The American legal system's resolution of these difficult issues are then compared to the resolution of these same issues by legal systems in other countries. Finally, students are asked to question the fundamental assumptions underlying the American educational system based on their understanding of different assumptions underlying the educational systems in other nations. Students are required to help to facilitate class discussions and to prepare a paper that analyzes critically an issue raised in the class. This is a Perspective Elective course.

LAW 469 Advanced Torts: Perspectives on Tort Law (3 Credit Hours)
This course has several objectives. It offers the student an opportunity to study several important torts topics not usually covered in the first year, such as products liability, misrepresentation, and business torts. It also offers an opportunity to consider whether tort law is a just and efficient way to resolve disputes and provide remedies for personal injuries and other types of harm. Perspective readings on tort reform evaluation will be included . Students also will conduct research on a topic of the student's choice and present findings to the class. The grade will be based on the quality of the presentation and a two-hour take home exam.. This is a Perspective Elective and Bar course.

LAW 470 Immigration Practicum Advancing (1-4 Credit Hours)
Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component. The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Topics include family-based petitions, persons fleeing persecution, unaccompanied children, forced family separation, providing trauma informed services, intersection of family law and immigration law, and deportation defense. The course includes in-class simulations and role-plays. One course is NOT required to take the other. Students are expected to work at their extern field placement site a minimum of 55 hours in order to earn 1 academic credit hour, or 110 hours in order to earn 2 academic credit hours. Instructors may vary across terms, and are experienced professionals with diverse areas of practice in immigration law. You are required to complete assigned readings before class. Readings will also be posted to TWEN. If you are interested in pursuing externship credits, please contact the Director of the Immigration Law Practicum, Katherine Kaufka Walts.

LAW 471 Teaching Assistants (1-3 Credit Hours)
Course enrollment requires permission of the instructor or Academic Dean. Teaching assistants receive academic credit for serving in a tutor capacity for identified courses not otherwise within the jurisdiction of the academic tutor program.

LAW 472 Structured Finance (2 Credit Hours)
Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets. As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and regulatory acts such as Dodd-Frank and ERISA. This course uses an actual securitization transaction to illustrate the interplay of these bodies of law. The course also looks at the greater legal implications of these transactions on the financial markets in the wake of the financial crisis. 2L and 3L students that have an interest in corporate or transactional law, general business law or finance should consider this course I shall assign homework problems for most classes, which we shall discuss in the next class. The course grade will be based on participation in this class discussion and on the results of a take-home examination. This course also counts as an elective course for the Certificate in Transactional Law.

LAW 473 Class Actions (2 Credit Hours)
Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert). Students will be given a hypothetical class action highlighting key issues and tensions within class, and brief and argue their positions on (1) class certification and (2) class settlement approval.

LAW 474 Diversity in the Law (1 Credit Hour)
Diversity in the Law is an interdisciplinary, weekend course for students who are interested in law, diversity and how to work across different cultures and other kinds of diversity to provide exceptional legal services to any corporation, governmental entity, community, or international client. Through short readings, role play, and team building activities, students will acquire the basic skills necessary for professionals to work effectively in cross-cultural situations. This course also emphasizes a critical examination of how issues such as race, class, gender, sexual orientation and disability intersect with the legal system and barriers to diversity in the legal profession. This course welcomes students who desire to effect change and who have the potential to act as leaders and role models in their communities, law firms, and companies. Students will be required to complete a group project and a short, reflection writing on diversity in the law during the course. This course will be pass/fail and final grades will be based on performance in class and completion of the group project and reflection piece.

LAW 475 Multistate Bar Exam Fundamentals (2 Credit Hours)
This is a Bar course.

LAW 476 Art Law (3 Credit Hours)
Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

LAW 478 Real Estate Transactions (2-3 Credit Hours)
Real Estate Transactions focuses on the basic principles of commercial real estate transfer, development, finance and leasing. The course follows a multi-party commercial development project through acquisition, financing and leasing. The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course also addresses the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 479 International Litigation (2-3 Credit Hours)
This course examines the litigation of international disputes in U.S. This is a perspective elective designed for 1Ls but available to all students. It covers the familiar civil procedures in the international context including choice of forum, choice of law, personal jurisdiction, subject matter jurisdiction, discovery, enforcement of judgments. It also covers topics unique to international litigation such as sovereign immunity, the act of state doctrine and foreign compulsion. The course also includes select topics in international litigation in foreign courts and an introduction to international commercial arbitration.

LAW 480 Business Planning (3 Credit Hours)
Business Organizations is a prerequisite for Business Planning, but is recommended for Business Planning: Transactions. Business Planning: Transactions A business lawyer needs to know, or at least be generally familiar with, many areas of law. Therefore, the purpose of this course is to teach many legal issues, including: (1) the organization of a business (e.g., the types of legal entities including "C" corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of a minority shareholder in a privately owned business, and understanding balance sheets and income statements; (ii) the financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iii) certain key day-to-day transactions (including intellectual property, environmental law, labor law, real estate law, and sales of personal property as regulated by Article 2 of the UCC); (iv) buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) the financially trouble business (including workouts and the rudiments of securitization). There is a large handout, but the substance of the course is contained primarily in the lectures. Therefore, regular attendance is expected. There is no prerequisite for this course but some prior exposure to business law (e.g., Business Organizations) is desirable.

LAW 481 Employee Benefits Law (3 Credit Hours)
No course description is available

LAW 482 Advising Not-For-Profit Organizations (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well. Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net revenues (having no private shareholders or owners), and often are formed and operated to qualify for Federal income tax exemption under Section 501(c)(3) or other provisions of the Internal Revenue Code. Nonetheless, they have many of the same operational needs and characteristics of any other business. They occupy space (whether owned, leased, or hosted by others). They purchase and consume goods and services from vendors and suppliers. They manage and cope with attendant risks. Interestingly, commentators suggest that not-for-profits can be more complex to manage, and to advise, than a for-profit business. The organization may have funding constraints, staff constraints, and knowledge constraints, particularly when coping with transactions or situations that arise only occasionally or where the organization is governed or operated in whole or in part by volunteers. Not-for-profit facilities and operations can be uniquely complex (think for example about a museum, a zoo, a hospital, or a cathedral), and their diverse sources of governmental and private funding can come with extensive conditions, restrictions, and reporting requirements. They may even be offered (or accept) donated goods or services in kind, gifts that come with their own implications. This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will use a combination of traditional lecture and discussion, case study simulations, and guest speakers, as well as individual meetings with students on directed work. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. Each student will be invited to select and imagine a mock client organization with a not-for-profit mission suited to the student's interest and will have the opportunity to identify and explore individual topics relevant to not-for-profit transactions, operations, and governance. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. In these ways, the course emphasizes skills relevant in any transactional project, for-profit or otherwise. Students will be graded based on class participation, written assignments and exercises, and a paper and presentation resulting from research and study on their chosen mock client and individual study topics. There is no final examination for this course. (Hagy)

LAW 483 Federal Tax Clinic I (2-4 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite. This is a Skills and Live Client Experience course.

LAW 485 Journal of Regulatory Compliance Executive Editor (1-3 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 486 Federal Tax Clinic II (1-2 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites. This is a Skills and Live Client Experience course.

LAW 487 Law Journal Members (1 Credit Hour)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors and Senior Editors. Each Law Journal Member must also prepare and submit an original note or comment of publishable quality.

LAW 488 Journal of Regulatory Compliance Senior Editor (1-2 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 489 Journal of Regulatory Compliance Associate Editor (1 Credit Hour)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School, Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 490 Law Journal Executive Editors (1-3 Credit Hours)
Law Journal Executive Editors are ultimately responsible for the publication of the Loyola University Chicago Law Journal. They oversee the selection, editing, cite checking, page-proofing and proofreading of articles chosen for publication in the Journal. They also oversee Law Journal Members and Senior Editors in the performance of their responsibilities. Law Journal Executor Editors are also responsible for planning and hosting the Law Journal's annual symposium conference.

LAW 491 Law Journal Senior Editors (1-2 Credit Hours)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors. Law Journal Senior Editors are also responsible for other tasks assigned to them by Executive Editors that contribute to the operation of the Journal.

LAW 493 Disabled Adult Guardianship Project (3 Credit Hours)
This course offers 3 graded experiential learning credits for weekend JD students and students whose non-traditional schedules do not allow them to participate in a legal clinic or externship. The Disabled Adult Guardianship Project allows 711-license eligible law students the opportunity to represent real clients seeking guardianship of disabled adult family members. The course requires three two-hour lecture components covering the requisite substantive areas of law as well as biweekly office hours for individual casework instruction. Lectures include client interviewing, case management procedures, substantive issues in the Probate Division, hearing advocacy, as well as best practices for working with diverse populations. To be inclusive of more law students, this course is designed to accommodate remote participation as needed given all client meetings and court appearances will be held on Zoom. Students must be eligible to appear in Court under Supreme Court Rule 711. Students who have successfully completed a minimum of 43.0 credit hours at the School of Law may enroll in the course.

LAW 494 Law Journal Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Loyola University Chicago Law Journal.

LAW 496 Client Counseling & Negotiation (2 Credit Hours)
This course is designed to develop skills used by lawyers in their roles as client interviewer, counselor and negotiator. Emphasis is on class participation. The first hour of each class is devoted to lecture/discussion of the covered topics. During the second hour, students participate in practice problems which emphasize the skills taught in the first hour. Students are graded on the following: written paper, one videotaped out of class problem, and class participation. Because of the heavy emphasis on class participation, the class is limited to 18 students.

LAW 498 Corporate Governance Law and Practice (2 Credit Hours)
Pre-requisites: Business Organizations
In this course students will study and analyze the law and practice of corporate governance law for publicly-held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed Finally, the course will address practical element of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 499 Trial Practice I Applied (1-3 Credit Hours)
This graded 3 unit course requires instructor permission to enroll. Students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. Students are required to participate in the mandatory evidence boot camp at the start of the semester. Each student is required to apply their learned skills in one or more local, regional, national or invitation mock trial competition. This course satisfies the requirements of Trial Practice I (LAW 411 or LAW 416).

LAW 500 Introduction to the Case Study Method and the Basics of Legal Writing (1 Credit Hour)
This course teaches incoming Loyola students the skills essential for success in law school. Students will learn how to read cases, prepare for class discussions, and take notes, as well as how to prepare for and answer final examination questions. Students will also learn fundamental legal writing skills and will draft a legal memorandum. Oral argument will also be introduced. NOTE: This course is only for INCOMING FIRST YEAR STUDENTS.

LAW 501 Collaborative Law Workshop (2-3 Credit Hours)
This course will provide students insight and practical knowledge of alternative dispute resolutions. This course focuses on the attorney's ability to understand the differences in the practice of mediation and the more recent development of the Collaborative law process and understand the application of each. Students will learn through didactic as well as skill-centered methods, giving each the opportunity to practice skills through role play and "fishbowl" exercises. We will cover the basics of mediation and Collaborative practice while emphasizing useful derivative skills that will serve students well in their future law careers. A client-centered approach, the primary goal of this class is to expose students to effective communication methods and skills that lead to settlement without litigation. Guest lecturers will bring their specific areas of expertise to the class so that students will be able to see first-hand the application of the processes we will be studying and be able better to emulate them. The final grade will awarded based partly on a 10 page critical paper and more significantly from class participation. This is an Experiential Learning course.

LAW 502 Patent & Trademark Searching (1 Credit Hour)
This course will be a one-semester, six session course that will cover the technical aspects of in-depth searching on open Web sources for sufficient background information in anticipation of filing for patent and trademark protection.

LAW 504 Lawyers as Leaders (2 Credit Hours)
No course description is available

LAW 506 Patent Prosecution Seminar (2 Credit Hours)
During the Patent Prosecution Seminar, students will learn the requirements needed to procure a patent and navigate through the different stages of the patent examination process with the U.S. Patent and Trademark Office. Skills that are developed during the Seminar include conducting an Inventor Interview, drafting claims of a patent, responding to an Office Action, conducting an Examiner Interview, and drafting a petition or preliminary response for an Inter Partes Review proceeding. After taking the seminar, students are confident in their skills to procure a patent on behalf of clients.

LAW 507 The Art of the Presentation (1 Credit Hour)
Lawyers are always giving presentations, both formally and informally. From interviewing to meeting with senior attorneys to engaging with clients to advocating for one's client in court, it's essential for a new lawyer to know how to speak confidently and persuasively. Students will learn how to become positive, clear, and articulate speakers and presenters. Topics include: how to create excellent formal presentation's summarizing one's work, how to engage others in the networking and interviewing processes, how to handle difficult conversations in the workplace, how to understand one's role and add value during formal and informal meetings, and how to be eloquent and efficient while conveying information to attorneys, clients, and the court.

LAW 508 Predatory Lending (3 Credit Hours)
This course will examine the origins and dimensions of predatory lending, defined as mortgage loan origination fraud and foreclosure rescue fraud. Emphasis will be given to the development of the sub-prime mortgage market, facets of predatory lending and various methods to curb it. This course will include background lectures and discussion, case study and analysis, and written and oral advocacy exercises related to actual cases. This course will be taught at DePaul University College of Law.

LAW 509 Federal Courts (2-3 Credit Hours)
This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this way, the law of the federal courts consists of doctrines that either facilitate or frustrate litigants in achieving their substantive goals in the federal (and state) courts. The aim of the course is to provide students with a basic framework for thinking effectively about these problems. This course may be offered only every other year.

LAW 510 Graduate Fellowship Independent Research (1-4 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit. The scope and subject is arranged between the student and the faculty member.

LAW 511 London Comparative Advocacy Prgrm (1 Credit Hour)
Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space. This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take "Introduction to the English Legal Profession" (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring semester after the conclusion of the trip to London. Students are required to submit a 20 page research paper by a deadline in May on a topic approved by the instructor.

LAW 513 Construction Law (2 Credit Hours)
Construction law draws upon many areas of law from contracts to torts to insurance and land use. This course allows students to understand how they interact and work together. It will focus on the legal issues common to the construction industry from transaction considerations to litigation. We will examine the parties involved in a construction project, project delivery systems, negotiation of contracts, scheduling and delays, insurance and bonding considerations, mechanics liens, defects, claims procedures, remedies, warranties, and termination. Students will gain practical experience in drafting construction contracts as well as writing complaints for a construction dispute. Readings will include state and federal cases and statutes, with a focus on Illinois law. In addition, this course will look at current construction projects and disputes going on in Chicago.

LAW 514 Media Law (2 Credit Hours)
This course will teach students the fundamentals of traditional media law with a particular focus on the intersection between injury law and constitutional speech and press protections. This area of study poses intriguing questions about the American balance between the rights of individuals to protect their reputation and privacy and the rights of those who speak via media - whether traditional mainstream news reporters or citizens using social media platforms such as Facebook or Google Glass. In the words of former New Republic counsel Scott Gant, "we're all journalists now." As a result, it is almost inevitable that even lawyers whose practice does not focus on media will confront questions about rights and liabilities arising from client speech. In addition to discussing defamation and privacy doctrine, we will cover statutory regimes that apply to public speech, such as the privilege to protect sources and rights of access to government institutions and documents, and consider whether and how those statutes apply to both old and new media speakers. We will conclude with a comparative survey of media law. The United States takes a dramatically different approach to speech questions than other countries, and as speech increasingly crosses geographic boundaries, choice of law questions in speech cases are multiplying.

LAW 517 Advanced Legal Writing: Responsible Email and Letter Drafting (2 Credit Hours)
This course will address advanced legal writing issues that extend beyond drafting legal briefs and memoranda to prepare the student for common legal writing assignments involving correspondence and e-mail. Specifically, this course will address professional e-mail etiquette, the analytical e-mail in comparison to the formal legal memorandum, productive communications with opposing counsel (including maintaining civility and professional decorum), and preserving client interests in dealing with non-parties.

LAW 518 Advanced Mediation and Courthouse Practicum (1-3 Credit Hours)
This course is for students who have already taken and passed the Mediation Certification & Courthouse Practicum. Students in this course will further develop and build upon their mediation skills by mediating actual long model cases at the Center for Conflict Resolution, as well as short model cases at the Cook County courts. Students will turn in written case summaries and assessments after the mediations and use the classroom time to discuss and learn from each other's mediation experiences. This is a 1-3-credit course. Grading is based on participation in mediations, class discussions and written work. Professor permission is required. This is a Skills and Experiential Learning course.

LAW 519 National Security Law (2 Credit Hours)
This course examines the current constitutional and statutory framework guiding government institutions tasked with national security responsibilities, as well as their historical roots. It covers such themes as the allocation and interplay of power between the Congress and the President on matters of war making, emergency powers, intelligence gathering, targeted killing, indefinite detention, Military Commissions, and the looming prospect of a statutory schema for addressing the rising threat of domestic terrorism. Conventional wisdom overweighs 9/11 and its aftermath as the anchor point for examination of this field of law. In fact, and as the course explores, its roots must be traced from 19th century conflicts with native peoples to slavery and the Civil War, and then coursing through industrial and social strife in the early 20th century, Cold War anti-Communism and the 1947 National Security Act, to the ongoing War on Terror - foreign in the wake of 9/11 to which paralleling concerns of domestic forms now proliferate, with each draw on organizing tenets involving the othering of minorities. To the extent that "national security law," can be said to cogently exist as a discreet field, it operates from the underpinnings of a complex mix of legal and political theory under the penumbra of Emergency Powers or, more classically, The State of Exception made famous by Weimar jurist and political theorist Carl Schmitt, with antecedents in the work of John Locke and Thomas Hobbes. The mix is inextricably intertwined with U.S. foreign policy concerns and their historical fluctuations. These theoretical considerations therefore frame and inform the course's interrogation of the legal structures and doctrines. It also engages with the topic of how ideas of membership and belonging have shaped our judgments as a world power nation-state about who and what counts as an external threat.

LAW 520 Advanced Legal Writing for the Practice of Law (2 Credit Hours)
Disability Law Using disability law as a backdrop, this course will help students refine their research, writing and advocacy skills. In the first half of the course, students will gain an understanding of substantive disability law by analyzing caselaw involving the Americans with Disabilities Act and its 2008 amendments. In the second half of the course, students will apply this knowledge in the context of a hypothetical disability law case by writing an objective memorandum and brief on a topic chosen by the instructor. In addition to writing multiple drafts and working one-on-one with the instructor, students will also have an opportunity to talk with judges about their perspectives on effective advocacy.

LAW 521 International Sales Law (1 Credit Hour)
The primary subject of this one credit International Sales course will be the United Nations Convention on Contracts for the International Sale of Goods (the "CISG"), a treaty which has been adopted by both the United States and Italy. In addition to exploring key sections of the CIST, the course will focus on important similarities and differences between the CISG and United States domestic sales law under the Uniform Commercial Code.

LAW 522 Election Law (2-3 Credit Hours)
In an era of computer-aided gerrymandering, foreign interference in our elections, increasingly unchecked campaign finance, systematic voter suppression, and (as yet unsupported) assertions of voter fraud, the study of election law seems more relevant than ever. This is a 2 credit course on election law co-taught by an experienced election law litigator, Ruth Greenwood, and Prof. Matthew Sag. Prof. Ruth Greenwood is the Senior Legal Counsel for Voting Rights & Redistricting for the Campaign Legal Center. Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both constitutional and statutory. Consequently, this course provides a good foundation for students interested in constitutional or statutory litigation. This course is available to 1L students as a perspectives elective.

LAW 524 Sales (3 Credit Hours)
Sales is an advanced contracts course and offers an opportunity to develop drafting, contractual and statutory interpretation, and client counseling skills. Students will gain an in-depth understanding of the law governing sales of goods and Article 2 of the UCC.

LAW 525 Law, Politics, and Society (2 Credit Hours)
This seminar focuses on the relationship between law, politics, and society in one particular area - the criminal justice system. Drawing on a variety of sources, including court decisions and empirical studies, we will examine how the criminal law works, "on the ground." The seminar is organized in the following manner: after a brief introduction to some socially created bases for popular notions of criminality and lawbreaking, we will focus on socio-legal studies in six areas: criminal courts and criminal justice personnel, criminal trials, prosecutors, defense attorneys, the police and punishment. Issues we will consider include the disparity between what the law says and what happens in reality; the role of race, class, and gender in the decisions made by those whose job it is to enforce the criminal law; the role the criminal justice system is intended to play in society, and finally whether the criminal justice system lives up to the goal of balancing the interests of justice, order, and liberty.

LAW 527 International Arbitration Oral Advocacy (1 Credit Hour)
This course is designed to introduce participants to the oral advocacy skills useful for witness examination in international arbitration evidentiary hearings. Through PowerPoint presentations, the instructor will introduce fundamental concepts in eliciting witness testimony especially in cross-examination. Students will play the roles of counsel and witnesses in simulation exercises practicing cross-examination and redirect examination skills. The current Vis International Commercial Arbitration competition case materials will be used as the fact pattern for the exercises and will be supplied in advance so students can carefully review and prepare before the class sessions. Readings will be recommended from the book International Arbitration Advocacy co-authored by the instructor, Susan L Walker. A copy will be on reserve in the law school library and copies are available online at Amazon.com. This is a Skills and Experiential Learning course.

LAW 528 Contract Drafting (2 Credit Hours)
This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, and due diligence and will be required to prepare the first draft of the operative document for a transaction.

LAW 529 Bankruptcy Practicum (2 Credit Hours)
This course will prepare students to practice in bankruptcy law upon graduation. A brief introductory segment will provide a broad overview of bankruptcy law. The class will then focus upon active case files in an effort to illustrate and animate the basic doctrine of bankruptcy law through actual case files, pleadings motions and appeals. Cases selected for review will focus on current hot practice areas in both consumer and business bankruptcy proceedings. Students will need to draft pleadings and motions in order to pass and grades will be determined based upon a take-home final. There is no prerequisite.

LAW 530 International Law Colloquium (2 Credit Hours)
This seminar will examine select topics in contemporary international law practice and scholarship. Approximately every other week, the course will feature presentations of papers or works in progress by a leading international law scholar or practitioner. Students will submit short written comments of each paper in advance of its presentation. These comments will be sent to the speaker and the two hour session will be devoted to discussion of the paper and these comments.

LAW 532 Leadership in the Practice of Law (1 Credit Hour)
Pre-requisites: Must have completed one year of law school
This course will, over 7 two-hour sessions, explore how in many of the possible aspects of a lawyer's career one can move beyond counseling and competency in professional practice to setting and achieving visionary goals that inspire progress in private, public or non-profit sectors.

LAW 534 Privacy Security and Data Protection Workshop (2 Credit Hours)
Privacy is a relatively new and rapidly growing area of law that now affects nearly all industries. The privacy field poses a variety of legal challenges as government regulators attempt to keep up with privacy issues. Class will focus on real world legal problems that start-ups and technology companies face as they consumer and utilize data in order to innovate. Students will gain practical experience in identifying key legal issues related to privacy, security and data protection while developing an understanding of best practices utilized for compliance. Students should take this course if they have any interest in working with or in the tech, health or any other data driven discipline.

LAW 535 Advanced Writing Workshop (1 Credit Hour)
This course focuses on the development of skills necessary for particular writing assignments that arise in the course of a civil lawsuit or a criminal prosecution. While writing well in litigation is important in itself, it also contributes to a litigator's skill as an oral advocate. Moreover, practice in oral advocacy contributes to a litigator's effectiveness as a writer. For this reason, this course will require the student to participate in oral advocacy exercises as well as undertake specific writing assignments. The course is designed the student with a strong sense of the overall strategy necessary to be effective in the development and presentation of a case. It will cover a wide range of skills, including the drafting of complaints, the preparation and presentation of motions, opening statements and closing arguments, the careful researching of local rules, the drafting of memoranda, the development of techniques for examining witnesses, the use of discovery tools and the application of a structured approach to settlement negotiations. In addition to the writing associated with these skills, the course will focus on the aspects of these skills that support an overall litigation strategy. This is a Skills course.

LAW 536 Legislative Drafting (1-2 Credit Hours)
The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment. The course will be taught by legal professionals with extensive experience in legislative drafting and litigation. The students will gain practical skills by learning from two practicing litigators who experience the effects of unintended consequences every day.

LAW 537 Human Rights in the Global Economy (2 Credit Hours)
Human rights issues have come to the fore front around the world, in courts and legislatures, in corporate board rooms, in the corridors of the United Nations and the international trade and financial institutions. This emergence and universalization of human rights has arisen as the promotion and globalization of free markets through trade liberalization, flows of foreign direct investment and finance across national boundaries has intensified. This course will examine how the growing influence of the international human rights framework is implicated in settings such as the overseas manufacturing operations of companies like Apple, in extractive industry mining activities such as those involving "blood" diamonds, and in China's huge infrastructural projects particularly in Africa. These case studies and more will be examined in light of the history and theoretical origins of human rights such as rights to food, housing, health, education, cultural expression, political participation, and prohibitions of discrimination and violence. The course will examine a variety of responses to these case studies as they relate to the legal framework under major international and regional human rights treaties and how international, regional, and domestic courts, (including federal courts under the Alien Tort Statute), and other actors have interpreted them. No prerequisite is required.

LAW 538 Critical Race Theory (2 Credit Hours)
Critical Race Theory teaches analytical tools to study how law can create and cure racism. The course re-examines the first year curriculum (e.g., torts, contracts, criminal law, property, and civil procedure) to show that the law is conscious of race, and to explore how seemingly neutral application of the law can have devastating consequences for racial minorities.The course puts Critical Race Theory in conversation with other critical approaches like feminist theory and class studies. Our course goal is to address the following question: What would the legal landscape look like if society were to account for (and address) racial oppression?

LAW 539 Affordable Housing Law & Policy (2 Credit Hours)
The course will a provide an historical overview of federal housing statutes and programs to lay the groundwork for understanding how these programs and their successors are being utilized today to preserve and construct affordable rental housing. Case studies analyzing the legal organizational and financing structure of mixed income public housing developments in Chicago will demonstrate how public-private partnerships work in practice. Supreme Court and lower court cases that have impacted the course of affordable housing will be analyzed particularly in relation to the Fair Housing Act of 1968. The course will conclude with a review of employment opportunities in this field and how most effectively to pursue them.

LAW 540 Community Law Center Clinic III (2 Credit Hours)
Pre-requisites: Must have previously taken Community Law Center Clinic I
This course is open to returning Community Law Center Clinic I students seeking 2 credit hours. .

LAW 541 Energy Law (2 Credit Hours)
This course offers a basic overview of the legal framework within which the production, distribution and sale of energy takes place. It is offered as part of the Program in Environmental and Energy Law but is open to all students. After a brief introduction to scientific concepts of energy and the history of energy technology, the course will survey the major sources of energy. The traditional sources have been oil, natural gas and coal converted to consumer products such as electricity and gasoline. Newer sources include nuclear and solar energy. Each source and delivery system has its own network of property rules and contract relationships. National energy policy will be reviewed and the impact of interregional competition on the regulation of energy will be studied, as will constitutional and economic concepts affecting the pricing of energy. Particular emphasis will be placed on energy issues in environmental law.

LAW 542 Trademark Law Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property or Instructor Permission
No course description is available

LAW 543 Advanced Tax (2 Credit Hours)
Pre-requisites: Personal Income Tax
This seminar examines the tax and business planning aspects of mergers and acquisitions, including taxable and nontaxable transfers of businesses and real estate. Transactions covered include installment sales, earn-outs, options, technology transfers, reverse mergers and like-kind exchanges. Particular attention will be given to planning whether to use asset sales or stock sales, structuring financing for acquisitions and techniques for compensating investors. The seminar will also explore the taxation of partnerships, S corporations and limited liability companies and their special application to corporate and real estate acquisitions.

LAW 545 Advising Not For Profit Organizations in Real Estate and Business Trans Settings (2 Credit Hours)
This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. There will be a particular emphasis on transactions and involving ownership, leasing, use, and operation of real estate, which (just as with many for-profit businesses) is typically the largest single category of capital investment and the second largest category of repeat expense (after total personnel costs) for many not-for-profit organizations. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context.

LAW 546 Anatomy of a Deal (1 Credit Hour)
This weekend course will provide an introduction to the essential skill set you will need as an entry-level M&A deal lawyer. This is increasingly important, in light of growing client unwillingness to pay junior associate rates for attorneys to learn on the job. Facing an ever more competitive recruiting environment, it will be crucial for you to come out of the gate armed with the appropriate skill set for your chosen practice area. This course is designed to prepare you to speak intelligently in interviews and hit the ground running on the job. To this end, the focus of the class will be the basics of a typical M&A transaction, including how to perform due diligence and how to review and draft resolutions, share purchase agreements, third-party opinion letters, and other closing documents commonly assigned to junior associates. You will also study sample form agreements that appear in many different types of deals, including share purchase agreements, debt documents, confidentiality agreements and escrow agreements. When appropriate, we may invite guest lecturers to join us to provide real life insights into the transactional law practice.

LAW 547 International Patent Law (2 Credit Hours)
The management of large international patent portfolios (comprising patent applications filed in several jurisdictions), and an understanding of law and treaties affecting those portfolios, is fundamental to international patent practice. We will discuss the basics of filing and prosecuting patents under the Patent Cooperation Treaty (PCT), including issues that may arise when prosecuting a US application under the PCT. We will also consider other multinational patent treaties commonly used in foreign patent application filings that affect the management of international patent portfolios and US patents. We will take a comparative look at several aspects of U.S. and foreign patent laws, and will consider current controversies surrounding patents in the international arena, e.g., regarding access to medicines and the patentability of business methods and other controversial subject matter. Patent Law is a prerequisite. This requirement can be waived only with the permission of the instructor. This course will be taught at Chicago Kent College of Law.

LAW 548 Public Interest Boot Camp (1 Credit Hour)
Loyola is offering a full-day Boot Camp for students who are or will be working at public interest organizations. The one-credit Boot Camp will focus on a wide range of issues intended to make your public interest work experience more productive and successful. Discussions will focus on topics such as what organizations expect from law students, how to more effectively handle assignments, what resources are available to help with research and drafting, and how to better deal with, and possibly avoid, some of the pitfalls associated with public interest practice. Emphasis will be placed on professionalism, identifying certain basic institutional do's and don'ts. Law student attendees will receive instruction in how to navigate and use Illinois Legal Aid Online, an extraordinary research tool for the legal aid community. They will also have the opportunity to participate in interactive exercises and review form documents, which will better equip them to take on assignments such as interviewing clients, drafting complaints or answers, and preparing discovery documents. The Boot Camp will also feature a panel discussion, with participants from various public interest organizations, who will address such topics as training, supervision, types of assignments, feedback, and handling those situations in which law students seem to run into trouble. There will be ample opportunity during the Boot Camp to ask questions. The Boot Camp will be led by Jack Block. Professor Block, currently an Adjunct Professor at Loyola, has extensive public interest experience which includes serving as Deputy Director of the Legal Assistance Foundation, heading the Pro Bono Committee at the law firm of Sachnoff & Weaver (now Reed Smith), and chairing the Legal Aid Committee of the Chicago Bar Association. He has received a number of awards, including Loyola's Public Interest Convocation Award. Students enrolled in the extern course/intensive field placement during the spring semester or summer semester may count their attendance at this important event against the number of hours required for course credit OR they may earn one hour of course credit. Students who want one hour of credit must register for the course. Students who want hours credited toward their externship hourly requirement must confirm their attendance with Professor Jack Block. Questions about the program should be emailed to jacklblock@gmail.com.

LAW 549 Antitrust & Intellectual Property Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property, Copyright or Antitrust Law or instructor permission
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 550 Search and Seizure: 4th Amendment Law and Practice in Illinois (2 Credit Hours)
A practical skills course on 4th Amendment/Search & Seizure law as it applies in Illinois, and how the most common issues are litigated in criminal cases. The class explores applicable Illinois statutes, Illinois Supreme Court rules, and federal and state case law that sets forth the prevailing legal basis for individuals' rights against unreasonable search and seizure. Taught by a Cook County Assistant State's Attorney and with question and answer sessions with a defense attorney and law enforcement; the course takes a balanced look at both the prosecution and defense approaches to Motions to Quash and Suppress, the bread and butter of pretrial litigation and the chief avenue for deciding 4th Amendment issues. After learning the legal basics, students will be tested on their ability to identify and analyze Search & Seizure issues in various scenarios and argue for or against 4th Amendment violations, as well as, practice some basic motion writing and oral arguments.

LAW 551 Electronic Discovery and Problem Solving (2 Credit Hours)
Pre-requisites: Civil Procedure, Criminal Law, Constitutional Law
Electronic discovery ("e-discovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts). Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and ethical obligations of parties and counsel when preserving, collecting, reviewing, and producing electronically stored information. The result is a fundamental change in litigation practice. For example: the enormous costs of e-discovery drive settlement strategy in commercial litigation; divorce and trade-secret cases hinge on the contents of a party's cloud email account; product liability and personal injury cases focus on output from the Internet of Things; prosecutors and criminal defense attorneys fight to balance the wealth of evidence available from mobile phones with privacy rights; legal privilege protections are diminished because it is difficult to find attorney/client communications among large volumes of email; technology-savvy attorneys use their expertise to contest the authenticity and probative value of key pieces of evidence based on arcane metadata; parties seek arbitration or trial venues based on the protections and burden of local discovery rules; international reaction to US cyber-snooping hindered the ability of US litigants to obtain information from foreign parties; and, attorneys and litigants are sanctioned with alarming frequency for failure to properly manage e-discovery. Mastery of e-discovery is a differentiator for clients choosing counsel and for law firms in the hiring of new attorneys.
Law 551 is a survey course, to familiarize students with foundational concepts, and to delve into some of the more challenging questions that e-discovery poses. It will also look at creative and strategic ways that lawyers use digital evidence to advance their cases. The course will include a combination of lecture, discussion, and practical application, allowing students an opportunity to explore issues and practice their advocacy and problem solving skills. Readings will consist of case law, statutory and regulatory guidelines, ethical guidelines, research, and white papers. Grading will be based on class participation, a mid-term exam and a theme paper.

LAW 552 Political Civil Rights (1 Credit Hour)
The purpose of this course is to provide students with a survey of current and emerging issues in American civil rights litigation. It defines civil rights broadly and incorporates issues related to food justice as well as traditional doctrines addressing discrimination based on race, gender and other identities. As a start, the materials on racial discrimination serve as an anchor. The foundational framework for our civil rights laws is directly related to our racially discriminatory laws. For that reason, the course starts with landmark cases and historical developments impacting the social and legal treatment of blacks and other communities of color. Additionally, it asks students to think about what law is, what law is doing, and what it should be. The coverage, then, expands to the diverse areas of civil rights laws. Throughout, students will learn the contours of each doctrine, the principles that form it and their practical relevance. This begins with a discussion of racial discrimination as the catalyst for civil rights jurisprudence in America. The Civil Rights Act and relevant doctrines of the 14th Amendment are important to understanding the development of civil rights litigation. Ongoing and emerging issues affecting gay, transgender, women, nonconforming individuals, and poor classes are also covered as vibrant parts of civil rights jurisprudence. To this end, the course's materials are divided into three parts: the first part deals with foundational and historical issues that impact today's jurisprudence. Chapters in this first section examine the road to Brown and the struggle for desegregation in school systems nationally. It also discusses pre and post Reconstruction cases and statutes still relevant today. The second part examines in detail the cases and laws that make up the modern civil rights landscape. As such, it starts with the Civil Rights Act and a close examination of Title VII, Tile IX and Title VI. This section also includes cases that make up the voting rights canon as well as chapters on disability law, language minorities, and gender discrimination. The third section delves into a study of emerging issues in the twenty-first century. In these materials, relevant issues include the struggle for sustainability as civil rights issues, food justice, gender identity, sexual orientation, and same sex marriage.

LAW 553 Sex Trafficking (3 Credit Hours)
This seminar will explore sex trafficking as a structural problem of intersectional inequality and sexualized violence. This class will combine theory with a comprehensive overview of legal doctrine in areas of substantive criminal law and procedure. Students will also read several articles addressing intersectional feminism and critical race theory approaches to law, hierarchy, and vulnerability.

LAW 554 Family Law Practicum (1 Credit Hour)
Students in this practicum will administer a skills component of the traditional Family Law foundational course, focusing specifically on the drafting of an antenuptial agreement in a complex case hypothetical. Practicum students will serve as clients in the drafting exercise. In this capacity, students will meet face-to-face with the collective group of student attorneys representing each client and engage in ongoing, timely and detailed electronic communication with student attorney teams throughout the course of the skills exercise. Practicum students will also assist in evaluating the client counseling facet of the exercise, and in reviewing each prenup for its substantive terms. Each practicum student will spend approximately 40 hours engaged in work related to the exercise. Students may enroll in this practicum only with permission from the instructor.

LAW 555 Children and the Law (2 Credit Hours)
This course adopts a novel Critical Youth Theory approach to address a range of legal claims grounded in substantive due process from a child-centered perspective. We will explore the various ways in which child-centeredness shapes the legal discourse and how centering children invites us to think differently about legal problem-solving. Topics include: Voting, Right to Identity, Climate Crises, Global Perspectives on Children, Gun Violence, Poverty among others.

LAW 556 Alternative Dispute Resolution (2-3 Credit Hours)
This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical. Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures, simulations, role-playing, and outcome-based actual case studies. This is a Skills course.

LAW 558 Comparative Freedom of Speech (1-2 Credit Hours)
This course will explore the first amendment provisions dealing with free speech, freedom of association and religion with particular emphasis on free speech and association in a time of terror. We will also study the European counterpart protections with significant stress on civil and criminal defamation.

LAW 559 Education Litigation: Dilemmas in Education Equity (2 Credit Hours)
This course examines the results of civil rights education cases brought on behalf of African American, Latino, and other minority students. Students will examine applicable legal precedents and statutory frameworks, classroom level implementation, and experts' analyses of data and outcomes for five subject areas - student assignment, English Language Learner Programs, tracking (gifted and remedial), special education, and discipline. Students will work in teams and individually to present research and response papers related to the five subject matters.

LAW 560 International Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit for a project related to an international law subject. The scope and subject is arranged between the student and the faculty member.

LAW 561 Design Thinking and Early Childhood Education (2-3 Credit Hours)
This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration. In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality on a topic or issue relevant to the class. We hope to accomplish the following primary learning objectives in the class: - First, we hope that each student will acquire a deep and comprehensive understanding of the fundamental legal and political concepts and doctrines that inform early childhood education in America. - Second, we hope that each student will develop the ability to conduct a comparative analysis of the legal and political structures surrounding early childhood education in America, Italy, Finland and throughout the world. - Third, we hope that students will develop a profound appreciation for the various pedagogical approaches to early childhood education, including the approach founded in Reggio Emilia, Italy. - Fourth, we hope that students will obtain an awareness of the role of brain research and developmental psychology in the different legal, political and pedagogical approaches to early childhood education. - Fifth, we hope that the students will challenge the fundamental assumptions underlying early childhood education in America. - Sixth, we hope that the students will achieve great insight into a particular area of early childhood education, which they will disseminate through a published paper. - Seventh, we hope that the students will enhance their abilities to collaborate in productive group work, to practice design thinking, and to construct knowledge through meaningful professional relationships. - Eighth, we hope that the students will appreciate the role of documentation in making visible the process of their own learning and the learning of the group. - Ninth, we hope that students will reflect on their own educational development and learning strategies. - Finally, we hope that the students will be inspired to pursue policy initiatives in the area of early childhood education.

LAW 562 Leadership (2 Credit Hours)
The purpose of this course is to develop and understanding of human behavior in changing organizations, and the managerial awareness, tools and methods that are available to increase effectiveness. The course surveys principles and theories about individuals and groups at work, motivation and interactive drives and processes for satisfying needs, organization strategies for effectively utilizing people and creating the environment to achieve goals of people and companies. New models of leadership, teams, organization structure are studied as the product of today's transforming organizations. Some elements of organization development methods are incorporated to show how OC practitioners work.

LAW 563 Tax and Budget Policy (2 Credit Hours)
This seminar will cover the following topics: the legislative process in enacting budgets and tax legislation at the State and Federal level; how tax legislation affects the budget process; the political and legal issues in the legislative process of tax and budget laws; the intended and unintended consequences of legislation (e.g., the alternative minimum tax and the estate tax); the relationship of tax and budget policy to social and economic issues (Social Security, Medicare, health care, pollution issues, poverty, housing); comparison of tax and budget policy in the U.S. to other countries; and issues of fairness and compliance in tax and budget policy. This course will be taught at Chicago Kent College of Law.

LAW 564 Animal Law and Policy (2-3 Credit Hours)
Animals (meaning comprehensively for this purpose non-human mammals, birds, reptiles, fish, and insects) are central to our world in a myriad of ways. Historically, and still today (not without controversy and for better or worse depending both on degree and on your perspective), animals were and are a major source of food, as well as a tool of production as farm labor, transportation, policing and security, military activities, and entertainment and education, an object of scientific and medical research, and work as service and support animals. Animals are also key components - and participants - in our ecology and environment; after all, they have been on the planet in one form or another 500 million years before the first humans are believed to have emerged (and, even then, Darwin might point out that we have them to thank). Moreover, companion animals have been sources of friendship, companionship, and love throughout centuries and especially in modern society where they are often viewed as family members and not as possessions. These attachments, and public concern for the welfare of animals, also result in a determination to protect animals (although arguably in some contexts but not others) from neglect and abuse. For all of these reasons, animals intersect with virtually every aspect of legal concept and practice: property law, contracts, tort, criminal law, environmental law, wills and trusts, constitutional law, international law and trade, and more. And, like every area of law, animal law continues to evolve through legislative and regulatory action, judicial decision, and societal sentiment. That change can be complex, involving considerations of both human and non-human safety and wellbeing, ethical and moral beliefs, and economic interests. In this course, together we will explore themes across the spectrum of how the law touches and treats animals in our society, in our economy, in our homes, and in the wild. We will use a textbook as a starting resource, supplemented by materials from primary and real-world sources and contexts, as points of discussion and discernment. Each class member will also select an individual topic in an area of personal interest to develop in further depth and to share with the class to expand our knowledge. Coursework on which the performance assessment is based will be composed of a series of objective or short-answer written assignments throughout the course, a concise paper and class presentation on the student's chosen individual in-depth topic, a brief take home final examination that also serves as a summative reflection on the course, and class participation.

LAW 565 Commercial Real Estate Transactions (3 Credit Hours)
This course addresses foundational topics in commercial real estate transactions, including sales and purchase, leasing, financing, and distressed properties. The course also provides an introduction to skills in negotiation and drafting and incorporates a substantial simulation component, including one Saturday all-day deal simulation workshop (the date of the workshop will be announced in the first class meeting). This course will be taught at Chicago Kent College of Law.

LAW 566 Blockchain & the Law (2 Credit Hours)
No course description is available

LAW 567 History of the Federal Judiciary (3 Credit Hours)
People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I (i.e., legislative) courts and court officials. The instructor will evaluate students by a final examination as well as classroom participation.

LAW 568 European Union Law (1-3 Credit Hours)
This seminar will provide a survey of the key Treaty provisions and legislation of the European Union (EU) and the key institutions of the EU that enforce these provisions. The course will focus on the so-called four freedoms of EU law - the free movement of goods, services, people, and investments. The course will also discuss the progress of the EU towards its long term goal of the completion of a single European market and discuss selected areas of the substantive law of the EU including competition law (antitrust). Students will prepare a paper on a mutually agreeable topic and submit an outline, first draft, and final version as well as present their topic in class toward the end of the seminar.

LAW 569 Securities Enforcement (2 Credit Hours)
This course will examine the enforcement of the federal securities laws from the perspectives of both the Securities and Exchange Commission and defense counsel. We will examine the SEC's investigative process, including the taking and defending of testimony; and will examine selective types of securities fraud investigations, including accounting fraud, insider trading, and offering frauds. We will also evaluate the role of auditors and in-house counsel in detecting and preventing securities fraud; remedies available to the SEC; the settlement process; and collateral actions by other civil and criminal authorities. The required weekly reading will consist of recent enforcement cases, rulemaking, related statutes, law review articles and other commentary. Most classes will begin with a student presentation on a securities law-related topic of their choosing. Guest instructors may be used to address specific topics throughout the semester. This is a Bar course.

LAW 570 Civil RICO and Pragmatism (2 Credit Hours)
This seminar will explore the Racketeer Influenced and Corrupt Organizations Act (RICO), which was enacted to combat organized crime but with the allure of triple damages and attorney's fees has been used in all manner of business and contract disputes. This expansive trend has met resistance from many federal judges, most notably Richard Posner of the Seventh Circuit Court of Appeals, sometimes referred to as the "tenth Supreme Court justice." We will examine Judge Posner's economics and "pragmatic"-based methods of deciding RICO cases. Is this what Congress intended in enacting RICO? Or has he usurped the legislative role? This course will be taught at Chicago Kent College of Law.

LAW 571 Topics in International Law (2 Credit Hours)
This seminar will explore in depth several current topics in public international law, for example, human rights, the use of force, humanitarian law in a world confronted by terrorism and torture, international criminal law, protecting the environment including outer space and the polar regions, and the right to consular access by aliens in death penalty cases. The seminar is designed to provide students with a foundation upon which to think about and research these issues, and the way that domestic law is often implicated in the formation and reformation of foreign policy. Students will be expected to sign up to present their own assessments of the developing law in several areas, one of which will likely become the basis of their seminar paper. During the first three weeks of the course, the instructor will present a brief overview of the international legal structure - its sources and limitations, and how it operates - as well as a philosophical foundation for a system of human rights. The overall goal of the course is to get future international lawyers to think beyond doctrine as they seek to gain a better understanding of the relationships among law, policy, and politics in the ever-evolving field of international law. This course will be taught at Chicago Kent College of Law.

LAW 572 Special Education Dispute Resolution (1 Credit Hour)
This one credit hour weekend course will provide students with an intensive simulated experience in the various processes of resolution of special education disputes. Areas addressed will include some or all of the following: contested IEP meetings, manifestation determination reviews, resolution meetings, mediation, and due process hearings. Assuming the roles of parent legal advocate and school district counsel, students will develop a practical working knowledge of federal and Illinois statutes and regulations governing special education dispute resolution; develop a legal understanding of, and working familiarity with, student special education records and documents; and learn how to interview and prepare clients, witnesses, school personnel, experts, and others for their respective roles in the dispute resolution process. This course counts as a Skills and Comprehensive Simulation course.

LAW 573 Terrorism Prosecutions: Civil Rights & Executive Power in Theory and Practice (2 Credit Hours)
This class will examine how terrorism cases are investigated, prosecuted, defended and punished. It will address how suspected terrorists are targeted and captured, including surveillance methods and interrogation techniques, as well as the questions of whether these measures are effective and potentially undermine well-established and deeply in-grained constitutional liberties and culture. It will cover classified evidence in the adversarial process -- including how it is gathered, how it impacts charging decisions and trial strategies, and how courts manage it in adversarial proceedings. In addition to drawing out these issues as they operate in civilian courts, the course will also examine judicial alternatives, including the use of military tribunals or national security adjudicative systems in other constitutional democracies, as well as extra-judicial and judicially pre-emptive measures such as preventative detention, designations and the freezing of assets. Overarching issues that will animate our exploration will be the need for emergency rules and powers, the role(s) of the courts and counsel, and how well the U.S. legal system faces the challenge of balancing rule of law and civil liberty principles with the national security concerns in countering terrorism, both internationally and domestically. This is a non-exam course. Grades will be based (i) short written impression statements on assigned weekly readings which will be used as prompts for class discussion; (ii) classroom participation, and; (iii) a 15-20 page paper on a topic of choice in the field. The class will include participation by guest speakers, including scholars and practitioners in the field. This is a Skills course.

LAW 574 Canon Law on Ecclesiastical Administration (2 Credit Hours)
While the Catholic Church ultimately exists for spiritual purposes, religious institutions must operate in the real world of human resources, leadership development, strategic thinking, communication, marketing, property and finance. Canon law is the Church's own legal system that regulates ecclesiastical administration. In order to function effectively in this environment, knowledge of the Church's legal system and how it interacts with civil law is essential for lawyers and administrators responsible for the management of ecclesiastical entities such as Catholic hospitals, universities, social service agencies, dioceses and parishes. Examples of specific issues would be in the areas relating to Catholic identity, sponsorship, mergers and joint ventures involving Catholic schools and health care institutions; incorporation and tax-exempt status of religious organizations; the acquisition and sale (alienation) of ecclesiastical property; wills, estates and bequests involving ecclesiastical goods and offerings for Masses; liability for clergy and employee misconduct; immigration law aspects of foreign religious workers; and the interface between government regulations and the Church's ethical and religious directives. Canon Law and Ecclesiastical Administration should be of particular interest for law students and business students interested in the management of health care and educational institutions, as well as for those interested in comparative law. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law and ecclesiastical administration.

LAW 575 Futures, Swaps, & Other Derivatives (2 Credit Hours)
No course description is available

LAW 576 The Corporation and the Constitution (2 Credit Hours)
This class will investigate the origin in law of the corporate form and explore the challenges presented by the modern corporation, both from the standpoint of its legal structure as a business organization formed by law, and the rights and privileges afforded corporations under case law that interprets the corporation as a jural "person." Readings will be considered from colonial charters to the recent U.S. Supreme Court decision in Citizens United v. FEC (2010). There will be special emphasis on the contracts and commerce clauses of the Constitution, as well as the 14th Amendment. This course is not so much concerned with corporate responsibility as it is with corporate governance and accountability. We will explore the concept of limited liability, trace the evolution of legal personhood, examine the original public purpose requirement of the corporate entity as contemplated in law, and consider the role of public law in the world of the self-regulating market.(Class will meet at Chicago Kent Law School.)

LAW 578 Student Disciplinary Hearing Workshop (1 Credit Hour)
This one credit weekend course will provide students with an intensive simulated experience in conducting a student disciplinary administrative hearing. Assuming the roles of counsel for the student and counsel for the school district, workshop participants will prepare for and represent their respective clients in a school expulsion hearing. Participants will develop an understanding of the constitutional principles of due process, freedom of speech, and search and seizure as they pertain to students in the public school setting; as well as Illinois School Code statutory provisions regarding student discipline, suspension and expulsion.
In the course of preparing for the culminating disciplinary hearing, participants will gain a working familiarity with student codes of conduct and student school records and documents, and they will hone their skills in interviewing and preparing clients, witnesses, and school personnel for their respective roles in the discipline process and administrative hearing. Students will also deliver opening and/or closing statements and conduct direct and cross-examinations of witnesses and, through this process, will enhance skills applicable to a variety of court and administrative hearing settings. This is a Skills and Experiential Learning course.

LAW 579 Practice Fundamentals: Interviewing Skills (1 Credit Hour)
Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say."[1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]"[2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or low-level representatives of government institutions, including court and agency clerks. Happily, the listening and interviewing skills a young attorney acquires during these experiences will pay off when she tackles witness interviews and her first on-the-record interview, the deposition. This course will introduce students to theories of interviewing and listening in a variety of legal contexts. More important, students will try their hands at different types of interviews to hone this experiential skill. We will meet for an hour each week, and our time will be spent roughly as follows: a 10-minute introductory discussion about the week's reading, followed by a 30-minute "workshop" during which groups or pairs of students will conduct interviews using case study materials distributed in class. We will conclude by reflecting on the interview experience. Because each student will serve as both interviewer and interviewee each week, we will be able to consider the conversation from both the lawyer and the client points of view. The course is a survey of different types of interviews young lawyers are most likely to conduct: beginning with a general overview and moving to practice-specific interviews about potential litigation or corporate work. We will then move to a conversation that directly results from the initial interview: review of an action plan with the client. From client interviewing, we will consider adapting these skills in three other contexts relevant to the beginning lawyer: witness interviews, adversary conversations (pre-negotiation or logistical negotiation) and finally, an introduction to depositions. Throughout, we will develop an awareness of the ethics and social considerations likely to arise in various communications contexts.

LAW 581 Electronic Payment Systems and Commercial Paper (3 Credit Hours)
In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It delves into provisions of the Uniform Commercial Code affecting negotiable instruments, electronic funds transfer, and (if time allows) letters of credit (Articles 3, 4, 4A, and 5); the role of institutions such as the Federal Reserve; federal legislation typified by the Electronic Fund Transfer Act, the "Check 21" Act, and the Truth in Lending Act; federal regulations affecting banking and funds transfers, such as Regulations CC, E, and J; and, critical international banking practices and principles.

LAW 584 Mediation Certification & Courthouse Practicum (4 Credit Hours)
Students in this course will be trained to become certified mediators and then develop their mediation skills through hands-on experience mediating in court. The course starts with a mandatory intensive mediation skills training conducted by the Center for Conflict Resolution (CCR) at the beginning of the semester. The course will thereafter meet once a week as part of CCR's certification process to discuss, practice and improve upon student mediation skills. Students who meet all of CCR's certification requirements will be certified as CCR volunteer mediators and mediate actual cases in Cook County courts, while continuing to meet in class to discuss and build on what they learn in the mediations. Upon completion of this course and the CCR certification process, students will be able to continue volunteering as mediators for CCR, as long as they continue to meet CCR's volunteer requirements. Instructor Permission Required. Spots are limited so students are encouraged not to delay seeking permission to register for the course. To apply, email Professors Block and Eatherton. Preference will be given to students who have already completed a mediation or negotiation course, whose fall schedules are compatible with the court mediation schedule, and who are in their final year of school. Those who do not get a spot may request to be put on the waitlist. Enrollment Requirements: Restricted to J.D. and LL.M. students

LAW 585 Lawyering the Purchase and Sale of Commercial Property (3 Credit Hours)
This is an advanced seminar intended to give students a working familiarity with the anatomy of a commercial real estate sale, using a case study and typical documents, and provide a real world introduction, from a practitioner's perspective, to: (1) the substantive law that applies to commercial real estate (and mortgage financing); (2) the business objectives of buyers and sellers as they analyze and negotiate purchase documents, conduct due diligence (survey, title and environmental, etc.) and negotiate mortgage loans; and (3) the mechanics of closing the deal. The course will focus on Illinois law, but the instructor will point out points on which state law may differ, and how that might affect the deal terms. The "text" for the course consists of a portfolio of legal documents (letter of intent, purchase agreement, brokers agreement, title report, survey, mortgage documents and all closing documents - deeds, assignments, affidavits, escrow instructions, etc.). In addition to the actual documents, course reading materials will include excerpts from statutes, treatises, practitioners' guides, and, occasionally (but rarely), court cases. The goal of the proposed course is to provide as nearly as possible, given the constraints of a classroom setting, the quality and substance of the experience a first-year associate would ideally have in a law firm in reviewing, negotiating and drafting a purchase agreement and closing documents, conducting due diligence (emphasis on title and survey) and quarterbacking the closing, all under a supportive, mentoring partner (i.e., the instructor). Students will volunteer to be seller's counsel or buyer's counsel. For the duration of the course, students will review, analyze and participate in discussions from their chosen perspectives. The culmination will be a mock closing, with a couple of last-minute surprise glitches to keep things interesting. Prerequisites for the course are Contracts and Property. Students who have taken courses in Real Estate Law, and/or Secured Transactions would be at an advantage.

LAW 586 Community Law Center Clinic Veterans Practicum (2-4 Credit Hours)
Pre-requisites: 44 credit hours completed
The Veterans Practicum is a cross-disciplinary effort in partnership with the School of Social Work designed to better address veterans' social and legal needs. Senior law students will use 711 license to represent veterans and their families in a myriad of civil legal matters under the supervision of the director, Emily Vaughan. Students who enroll in this course must be available to be for office hours one morning or one afternoon each week (Monday-Friday). The Practicum also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that will be required of them in their casework.

LAW 587 Arbitration Workshop (1 Credit Hour)
This is an Experiential Learning and Skills course.

LAW 588 Legal Issues in Student Discipline (2-3 Credit Hours)
The legal issues surrounding student discipline in public elementary and secondary schools involve the intersection of Constitutional and statutory law with the administrative hearing process. By developing a working knowledge of the school disciplinary process, course participants will build analytical and substantive skills applicable to a wide variety of practice areas. The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT and special needs children; and the legal tenets governing school districts' responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined. Throughout the term, students will engage in hands-on learning activities, interactive exercises, and practical applications of the concepts and principles of the course. The culminating experience of the course will involve participation in a simulated student disciplinary hearing. Experiential Learning Opportunity: With instructor approval, a limited number of students taking the course will have the opportunity to serve as advocates for students facing expulsion from public schools. Students will work under the supervision of the course's faculty to conduct client intakes, develop a defense strategy, conduct discovery, prepare witnesses, and advocate for students at a school expulsion hearing. Students may serve in this capacity as part of the course or for an additional credit, and they may earn Experiential Learning credit. Instructor permission is required to enroll in this portion of the course, and preference will be given to 2L students (no 711 license required). This course counts as a Skills course. This course may count as an Experiential Learning course with instructor approval. Experiential Learning Opportunity: With instructor approval, a limited number of students taking the course will have the opportunity to serve as advocates for students facing expulsion from public schools. Students will work under the supervision of the course's faculty to conduct client intakes, develop a defense strategy, conduct discovery, prepare witnesses, and advocate for students at a school expulsion hearing. Students may serve in this capacity as part of the course or for an additional credit, and they may earn Experiential Learning credit. Instructor permission is required to enroll in this portion of the course, and preference will be given to 2L students (no 711 license required).

LAW 589 Externship Long Distance (2-3 Credit Hours)
Students who have completed their first year of law school may receive two or three hours of credit per semester for supervised work done in chambers under the supervision of a member of the judiciary and his or her clerks. The externship course includes a classroom component which has been designed to compliment and support the field placement. The course is taught on Tuesday, Wednesday and Thursday evenings from 5:00pm - 6:00pm. Students may elect the day of the week they wish to attend the class at the time they apply for the externship. Applications are available on the law school website and in the offices of the Director of Experiential Learning.

LAW 590 Wrongful Conviction Seminar (1-2 Credit Hours)
This weekend course is designed to provide students with an overview of the issues and case law related to wrongful convictions. Students will gain an understanding of the dynamics of wrongful convictions and this burgeoning area of law. The course will also provide the opportunity for each student to research one recent case of wrongful conviction. 40% of the grade in this course is based on class participation. 60% is based on a research paper.

LAW 591 Housing and Development Law (2 Credit Hours)
This seminar class will address current issues and relevant case law in various housing and real estate development issues including such topics as fair housing, HUD organization and FHA mortgage programs, public housing, low-income tax credits, community and economic development and affordable housing. This class will be a true seminar with a different topic discussed each week. Class participation is critical and the final grade will be based on participation as well as final paper.
Course equivalencies: LAW 609 / LAW 709

LAW 592 Independent Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn one or two units of ungraded credit. The scope and subject is arranged between the student and the faculty member. It is expected that for each hour of academic credit the student will produce a scholarly work of publishable quality of approximately 30 pages in length. The project that is the subject of the Independent Research must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the associate dean.) This is a Non-Graded Course.

LAW 593 Graduate Fellowship Extern (1-4 Credit Hours)
Students may earn externship credit for working at an approved externship site. This program is designed to offer students practical experience.

LAW 594 Directed Study (1-2 Credit Hours)
A student may earn up to two units of ungraded credit for undertaking a research project for a faculty member. The scope and subject is chosen by the faculty member, who exercises control over the project. It is expected that for each hour of academic credit the student will engage in substantial legal work for at least fifty-five (55) hours during the semester. The project that is the subject of the Directed Study must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the Associate Dean.)

LAW 595 Community LawCtr Clinic I (4 Credit Hours)
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school. Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the student's own time. Any student who has completed the first year of law school can enroll in the clinic course. Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 596 Community Law Center Clinic II (3 Credit Hours)
Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 597 The Use of Force in International and Domestic Law (2 Credit Hours)
This course introduces students to constraints on the use of force in international and U.S. domestic law. International law topics include: (1) a brief introduction to international law and legal theory; (2) the United Nations Charter and limits on the use of force between states; (3) the difference between armed conflict and law enforcement matters; (4) rules regulating the conduct of fighters during an armed conflict; (5) human rights law, and; (6) the law of the sea. Domestic law topics include: (1) the general relationship between international law and the U.S. legal system; (2) the allocation of authority to use and limit the use of force under the U.S. Constitution; (3) domestic law regulating the conduct of armed hostilities, and; (4) domestic statutes regulating the use of the armed forces for domestic law enforcement and other emergencies. The final grade is determined by a take-home final exam, class preparation and participation, and contributions to in-class group work.

LAW 598 Appellate Advocacy Honors Program (2 Credit Hours)
The Appellate Advocacy Honors Program is the classroom component of Loyola's Moot Court Program. Students will learn effective appellate advocacy through lectures and workshops. Work completed in the classroom will not only prepare students for their competitions, but also strengthen written and oral advocacy skills for legal practice. This is a Skills and Comprehensive Simulation course.

LAW 599 Externship Intensive Field Placement (1-3 Credit Hours)
Externship - Intensive Field Placement - Chicago (1-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work or who have obtained their Illinois Supreme Court Rule 711 license. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to assist students as they transition to the practice of law. There is no final examination in this course. This course is offered each semester. Externship: Intensive Field Placement - Washington, DC (2-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to prepare students who expect to practice law in the DC area with their transition to the practice. There is no final examination in this course. There is no final examination in this course. This course is offered only during the summer semester.

LAW 601 Child, Family, and the State (2 Credit Hours)
This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

LAW 602 ChildLaw Trial Practice (Intensive) (3 Credit Hours)
This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission. This is a Skills and Experiential Learning course.

LAW 603 Interdisciplinary Seminar on Domestic Violence (3 Credit Hours)
This seminar explores issues of family violence, with an emphasis on domestic violence, through an interdisciplinary lens. An overview of the laws, public policy, and psychosocial approaches and trends addressing family violence issues. The course seeks to provide an opportunity for students in different disciplines to learn about the theories, philosophies, ethics, and practices of the range of professions that must confront family violence issues, and the impact of decision making in one forum on the practices and decisions made in another forum. Student are challenged to consider the strengths and weakness of the responses of various disciplines, and their interaction. Students that are interested in a live-client experience working at the Domestic Violence Legal Clinic should enroll in the Domestic Violence Practicum (LAW 215) class instead of this seminar.

LAW 606 Legislation and Policy Clinic (2-4 Credit Hours)
The ChildLaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. (Instructor permission required.)

LAW 608 Juvenile Justice (2 Credit Hours)
In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare? Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

LAW 610 Intnl Children's Human Rights (1-2 Credit Hours)
In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

LAW 613 ChildLaw Fellows Seminar (1 Credit Hour)
This seminar serves as a capstone opportunity for ChildLaw Fellows to contextualize their interdisciplinary legal education and to explore their roles as advocates in working in and reforming the complex and evolving systems that affect children and their families.

LAW 615 Child and Family Law Mediation (2 Credit Hours)
This course will explore the use of mediation in disputes involving children and families. Students will survey various models and uses of mediation and related dispute resolution processes in the following contexts: divorce, custody and visitation issues; child protection; juvenile delinquency; balanced and restorative justice; adult guardianships; youth violence prevention and peer mediation; and special education. Further, students will consider the impact of domestic violence and other impairments on the child and family mediation process. In addition to reviewing basic mediation skills, students will participate in classroom exercises designed to develop their ability to think critically about issues, as well as apply mediation strategies to dispute resolution scenarios. This is an Experiential Learning course.

LAW 617 Policy Practicum: Issues in Childlaw (1-3 Credit Hours)
Instructor Permission Required

LAW 620 Childlaw Clinic (1-4 Credit Hours)
The Civitas ChildLaw Clinic represents children in a variety of settings including child protection (abuse and neglect), family separation (custody and visitation), education, and other kinds of cases involving children and youth. Students typically work on at least two cases during the course of a semester, under the supervision of at least one member of the Clinic faculty. The Clinic also includes a weekly seminar that addresses relevant substantive law, advocacy skills, and ethical issues in the representation of children. Students will learn about the law governing their areas of practice and gain experience with a range of lawyering skills, including client interviewing and counseling, case planning, and written and oral advocacy. While the subject matter of the Clinic's cases focuses on children's issues, students should expect to develop skills transferrable to any practice setting. The course is open to all students eligible for a student practice license under Illinois Supreme Court Rule 711, and no prior experience in working with children is required. Instructor permission is required for enrollment, and the application for the course can be found here: https://www.luc.edu/media/lucedu/law/experiental/pdfs/childlaw-clinicapplication_fillable.pdf. Professor Bruce Boyer (bboyer@luc.edu) serves as the Clinic Director, and Professor Stacey Platt (splatt@luc.edu) serves as Associate Director. Students receive four credits for their first semester enrolled in the course; students repeating the Clinic for a second semester receive three credits, with other credit options available with permission of the instructor. This is a Skills and Live Client Experience course.

LAW 623 Advanced Domestic Relations Law Practicum (4 Credit Hours)
This is a selective enrollment year long course that is made up of three primary components: (1) teach students the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes, (2) provide students with the opportunity to assist pro se litigants in Cook County Courtrooms, and (3) allow students the opportunity to prepare a proposal to make the process more efficient for litigants by building on the success of an existing process. In the Fall portion of the course, students will have three credit hours of classroom instruction focusing on the practice of family law. In the Fall students will also have the equivalent of one hour per week of Courtroom observations. In the Spring portion of the course, the hours will flip. Students will have one hour per week of classroom instruction which will focus on addressing any difficult issues the students are facing in the Courtroom portion of the class as well as guiding the improvement project. Students will also have three hours per week of Courtroom time assisting Pro Se litigants and applying the knowledge from the Fall Semester. General course topics will focus on developing the skills necessary to excel in domestic relations courtrooms such as strategic planning for a dissolution of marriage case, complex financial analysis, developing and maintaining the attorney client relationship, practical drafting skills, and negotiation skills. THIS COUNTS FOR 1 CREDIT OF EXPERIENTIAL OR SKILLS.

LAW 624 Advanced Domestic Relations Law Practicum II (1-3 Credit Hours)
Pre-requisites: Advanced Domestic Relations Law Practicum I This is an Experiential Learning and Skills course
This course is a continuation of Practicum I. In this semester students will work directly with domestic relations judges and with pro se litigants to resolve contested divorce matters.

LAW 625 Mediation Workshop (1 Credit Hour)
Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment. This is a Skills and Experiential Learning course.

LAW 626 Mediation Practicum (1-2 Credit Hours)
This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

LAW 631 ChildLaw Graduate Extern (1-3 Credit Hours)
Students seeking credit for successful completion of an experiential learning opportunity (externship) may register for up to 3 credits. Students are responsible for securing an externship placement that focuses on issues impacting children and families. Prior to accepting the placement, a student must receive prior approval from the Academic Director of Child and Family Law Programs. Students must commit to work 60 hours per credit at the approved internship site. At the end of the externship, students must submit a short paper describing the nature of the work performed and how the externship experience advanced their understanding of child and family law.

LAW 641 Childlaw Directed Study (1-3 Credit Hours)
Students have the option of working individually on a research project with a faculty member on a credit/no credit basis. An interested student must first identify a faculty member willing to supervise the project and submit an abstract of proposed work to the faculty member. The project must relate to issues of child and/or family law. If the faculty member agrees to supervise the project for the requested credit hours, he or she will work with the student to develop a supervision schedule to ensure successful completion of the project.

LAW 643 Children's Legal Rights Executive Journal Editor (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 644 Chldrn Leg Rights Jrnl Assoc Editors (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 645 Children's Legal Rights Journal Senior Editors (1-2 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 651 LL.M. Childlaw Paper (3 Credit Hours)
Students enrolled in the Child and Family Law LLM degree program must enroll in this course in order to graduate. Working with a thesis supervisor, students have the option of completing a research paper of publishable quality. Students and their supervisor work together to agree on a topic and supervision schedule.

LAW 652 LL.M. Paper Completion-Childlaw (1 Credit Hour)
Students who are unable to complete their thesis in the LLM ChildLaw Paper course in a timely manner must enroll in this course. Depending on the status of research and writing completed during the LLM ChildLaw Paper course, the faculty supervisor will, in consultation with the student, agree on the required number of credits needed for successful completion of the course requirement.

LAW 654 Current Issues in Children's Law Seminar (2 Credit Hours)
This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

LAW 663 Children's Summer Institute (3 Credit Hours)
The focus of this year's class is on the safety nets in place - and needed - to support children and families and prevent entry into our child welfare and juvenile justice systems. Over the course of the week, students from different graduate programs will engage in an interdisciplinary exploration of a series of complex questions involving children's best interests, and the policy and practice considerations and challenges impacting government decision making when it comes to reimagining our current structures. Instructor Permission Required

LAW 664 Special Education Law (2 Credit Hours)
This course primarily covers the law of special education provided in the Individuals with Disabilities Education Act. ("IDEA"). Additionally, the course will also cover specific laws that are relevant to special education such as the Americans with Disability Act, Federal and State educational records statues and mental health and privacy laws. A primary emphasis of the class will be to teach students about the process under which students are identified as eligible for special education services and provided with educational services under Individualized Education Plans ("IEPs"). The class will focus on the following topics: special education case law, legislation, and regulations; utilizing evaluations, tests and measurements in determining eligibility in special education, and in the preparation of Individualized Educational Programs and Section 504 Plans; issues of juvenile justice; behavior and discipline for students with disabilities; negation and dispute resolution strategies and options; due process hearings; and current challenges in this evolving area of law. Students are required to attend class. Participation is a critical element of the class experience and will be a portion of the student's grade. Additionally students will be required to write one ten page paper on a topic approved by the instructor and participate in teams to develop IEP's.

LAW 665 Introduction to the Study of Law and Legal Systems (2 Credit Hours)
This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then lean to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies.

LAW 667 Introduction to Children's Law , Policy and Practice (2 Credit Hours)
Pre-requisites: Introduction to the Study of Law and Legal Systems This required course is designed to give students an introductory overview of the law as it affects children
It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families. The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.)

LAW 668 Leadership Development (4 Credit Hours)
One of the distinguishing features of the Online MJ in Children's Law and Policy is its focus on the development of leadership skills for child advocates across a range of disciplines and organizations. This required cornerstone course begins with an introduction to different types and styles of leadership before turning to a more practice-based preparation for leadership in such areas as operations, human resources, finance, and communications.

LAW 669 Education Law and Policy (3 Credit Hours)
Pre-requisites: LAW 665, 667 & 668
This course explores some of the challenging legal and practical issues confronting education in America, including the uncertain boundaries between public and private education, the constitutional and statutory rights of students, including equal access and treatment, the increasingly fluid constitutional and statutory rights of teachers, and the structure of educational governance, including the role of the federal government, local control, school board powers and even strategic planning.

LAW 670 Child Welfare Law and Policy (2 Credit Hours)
Pre-requisites: Law 665, 667 and 668
This course focuses on federal and state legal and policy efforts to protect children from abuse, neglect and other forms of maltreatment. Topics include mandatory reporting laws, liability issues, the general structure and content of child protection laws, including permanency planning termination of parental rights. Students will explore the concept of the best interest of the child in a legal context and review laws and research aimed at promoting children's welfare.

LAW 671 Juvenile Justice Law and Policy (3 Credit Hours)
This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

LAW 672 Family Law and Policy (3 Credit Hours)
The focus of the course is on the rapidly changing legal, social, and scientific landscape of family law. The course covers traditional areas such as marriage formation and dissolution, support, child custody and the role of the child's attorney, as well as emerging areas such as same-sex marriage, collaborative law, and defacto and equitable parenthood.

LAW 673 Mental Health Law and Children (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 and LAW 668
Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of the law and policies.

LAW 674 Law, Poverty and Public Benefits (2 Credit Hours)
According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

LAW 675 Legislation and Law Reform (2 Credit Hours)
This course introduces students generally to the legislative process and more specifically to federal and state laws and policies that affect children and families. Students will have an opportunity to draft model legislation, critique existing or proposed legislation, and learn techniques for educating lawmakers and policies makers about children's needs and the importance of research and data in formulating child-centered and effective laws an policies.

LAW 676 Conflict Resolution in Child and Family Law (2 Credit Hours)
One of the newest trends in children's law is the effort to find ways to resolve disputes without resort to the adversary system. Examples include restorative justice initiatives in schools and the juvenile justice systems, collaborative decision-making in family law, and mediation in the health care and child protection contexts. in this course students learn about the various types of alternative dispute resolution (ADR) (e.g., mediation, negotiation, collaborative dissolution) through a series of case examples and practical exercises.

LAW 677 ChildLaw Thesis/Capstone (4 Credit Hours)
Students are expected to complete either a thesis or capstone project of substantial depth that explores a specific area of children's law and policy and that integrates subject matter and/or leadership skills learned in the M.J. curriculum. The project is completed in close cooperation with a faculty advisor. Students are required to present their thesis or capstone project to faculty and fellow students during their graduation (Educational Immersion) weekend.

LAW 678 International Children's Rights (2 Credit Hours)
Pre-requisites: Introduction to the Study of Law and Legal Systems; Introduction to Children's Law and Policy; and Leadership Development
No course description is available

LAW 679 Children's Health Law and Policy (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 & LAW 668
The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parents patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

LAW 680 ChildLaw MJ Independent Study (1-4 Credit Hours)
Pre-requisites: LAW 665, LAW 667, LAW 668 Research paper/project to be approved by a Child Law faculty member and Director before enrolling
The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults. The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience. The format will be informed by the student's knowledge from the field of social work of the psychological development of adolescents and their needs, supported by current research. The goal of the course is to begin a project which will be fully completed at the end of the thesis capstone course in the Master's in Jurisprudence Degree.

LAW 681 Child Law Seminar Series (1 Credit Hour)
The course will run 14 weeks, with seven live lectures and seven weeks of assigned readings to introduce you to each live lecture topic. There is one Module for each topic. Each lecture will be presented by different legal experts and scholars on emerging topics in child and family law. Students will be expected to participate either in every live class or to listen to the archive if synchronous attendance is not possible. Students will be asked to write a 3-5 page (double spaced) reflective paper at the end of the term choosing from ONE of the lecture topics. The paper should describe how the lecture enlarged or changed the student's understanding of the topic, or in the alternative, how it influenced or changed your professional practice in child advocacy or in related fields.

LAW 682 Education Immersion Weekend Seminar (ChildLaw) (2 Credit Hours)
In addition to the required curriculum, students are required to travel to Loyola's Chicago campus at least once during their tenure in the program for an Education Immersion Weekend (EIW). During the weekend, students gather in person to workshop or present their thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni.

LAW 683 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance' policies, the role that school discipline plays in the `school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts' responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.
Course equivalencies: X-CIEP 620/LAW 683

LAW 684 System Consultation in School Discipline Reform (2 Credit Hours)
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535

LAW 685 Restorative Justice (2 Credit Hours)
This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

LAW 686 School Discipline Reform: Linking Law, Policy and Practice (2 Credit Hours)
Pre-requisites: LAW 683 (Legal Issues in School Discipline) and LAW 684 (System Consultation in School Discipline Reform)
This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).
Course equivalencies: CIEP 537 / LAW 686

LAW 687 Introduction to Legislative and Policy Advocacy (3 Credit Hours)
The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments' ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. The These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making. Students will also learn how to conduct racial equity impact assessments and how the absence of this work has impacted policy decisions in the United States in the past.

LAW 688 International Family Law (1 Credit Hour)
This one-credit class serves as an introduction to international and comparative family law. Over the course of the class, students will examine selected international and regional instruments as well as domestic laws governing private family matters. Topics include marriage, dissolution of marriage, family formation, child custody, domestic violence, international adoption, and the intersection between immigration and family law.

LAW 689 Family Law (3 Credit Hours)
This 3-credit elective course in family law specifically designed for post J.D. students provides an overview of the laws and court decisions in the United States that have shaped family life and the institutions of marriage and parenthood, with a special emphasis on the role of the legal system as it affects children's rights and welfare within these institutions. With a base line understanding of the general principles of constitutional law in family law cases, students then turn to an exploration of thematic topics, including evolving standards for child custody and the factors in custody decisions, including race, religion and domestic violence and the formation of multiple- parent families and child custody. We also explore corporal punishment and other parental decisions of child rearing, including emerging issues of children's privacy in the age of social media and the increasing recognition in family law of children's rights to be heard in decisions affecting their welfare.

LAW 690 Financial Aspects of Divorce (3 Credit Hours)
The Financial Aspects of Divorce is a 3 credit course designed for students practicing in the area of family law that will cover what a practitioner needs to know from both theoretical and pragmatic perspectives. The course will explore the historical background of divorce law and the jurisdictional limitations on resolving financial issues in divorce litigation. We will study the establishment, modification and enforcement of child support and spousal maintenance obligations. We will examine numerous aspects of property distribution, including determining the marital or nonmarital character of property, equitable distribution of marital property, valuation and treatment of specific types of property such as real estate, retirement accounts and business interests, and dissipation of marital assets. The course will also include discussions of financial discovery and awards of attorneys fees in divorce litigation.

LAW 691 Domestic Violence: Theories, Policies and Societal Impact (3 Credit Hours)
Domestic Violence (Theory, Polices and Societal Impact) will provide students with an understanding of the evolution of domestic violence theory; an overview of what acts constitute domestic violence; myths surrounding the causes of domestic violence; common misconceptions regarding the types of people who abuse and are abused; the various state and federal laws that affect domestic violence arrests, police liability, prosecution, and services; and the impact of domestic violence in family law, child welfare, and immigration proceedings. Through weekly modules incorporating readings, lectures, videos and supplemental materials, students will become familiar with the many components (social and legal) of this complex subject.

LAW 692 Special Education Law and Advocacy (2 Credit Hours)
This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will form teams assuming the roles of parent/student advocate, school administrators, and school service providers in a variety of simulated activities throughout the semester, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 706 Advanced Care Planning and Client Counseling (3 Credit Hours)
This capstone course focuses on the legal and practical challenges relating to the provision of health care at the end of life, with a particular emphasis on patients' authority to direct treatment once they are no longer able to communicate their own wishes directly. Students will learn the substantive law of patient rights and advance care planning, work with physicians to understand ethical challenges in end-of-life care, engage in client representation for patients living with HIV/AIDS, and develop model policies for an Illinois healthcare institution. The legal skills practiced in this course are transferrable to the practice of law in any setting. This is a Skills and Experiential Learning course. Students must be eligible for a 711 license to participate.

LAW 707 Health Law Writing Competition (1 Credit Hour)
Working closely with a supervising faculty member, each student will write a 20-30 page independent research paper for submission to a national student writing competition in health law. Papers may be on any topic related to health law or policy.

LAW 709 Health Care Disparities (2 Credit Hours)
Health care disparities is a capstone course that will focus on three major topics in this broad area of public health, providing students with the opportunity to plan and execute projects that will require the drafting of a white paper and a community needs assessment and implementation plan, as well conducting interviews of key thought leaders. Topics for the 2015 course include responding to the medical needs of veterans in the light of the crisis in the Veterans Administration, addressing teenage pregnancy in Latino populations, and crafting innovative approaches to the growing need for community mental health programs. Classes will be discussion based and various group presentations will be integrated into class sessions as well. The course will stress a variety of legal and public policy approaches to the issues at hand.
Course equivalencies: LAW 609 / LAW 709

LAW 710 Health Law: Patients and Populations (3 Credit Hours)
This course provides a broad survey of the most fundamental legal issues surrounding the delivery of health care in America. No prior knowledge of health law is required. Major topics include state and federal regulation of health care providers and institutions; tort liability in the context of medical care; patient and provider rights and obligations; public and private insurance systems; and basic issues in bioethics and public health. By the end of this course, students should understand both the current state of American health law, and the social forces that have shaped its historical development.

LAW 711 Corporate Transactions in Health Law (2-3 Credit Hours)
This course addresses key corporate and regulatory concepts impacting the delivery of health care. The course focus will be transactional, with students first gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies. The course will examine health care transactions from the perspectives of a hospital, physicians and other providers. It is recommended that students take Health Law: Business & Finance and Business Organizations prior to taking this course.

LAW 713 Health Law Directed Study (1-3 Credit Hours)
Pre-requisites: none
Open to: LLM, MJ, SJD, and DLaw students. LLM, MJ, SJD, and DLaw students may earn credit for participation in a targeted research tutorial. The scope and subject are chosen with the guidance of a faculty member who directs the students. (JD students can research in the health law field, but must register for the JD Directed Study.) This is a Non-Graded Course.

LAW 714 Health Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Health Law degree program may earn externship credit for working at an approved health law externship site. This program is designed to offer students practical experience to further develop lawyering skills and health law expertise. Students may receive up to three credits. This is a Non-Graded course.

LAW 715 Bioethics, Law & Policy (2-3 Credit Hours)
This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology. This course counts as a Perspective Elective course.

LAW 717 Mental Health Law (2 Credit Hours)
This course introduces students to the cases, statutes, and legal doctrines relating to the rights, treatment, and commitment of persons with mental illness, developmental disabilities, or intellectual disabilities. Topics covered include: confidentiality of mental health records, forms of surrogate decision-makers (i.e. guardianship, powers of attorney), mental health treatment for minors, right to refuse treatment, special education, and the Americans with Disabilities Act (ADA). Students will discuss real-life cases and examples to compare and contract application of the law and policies.

LAW 718 Food and Drug Law (3 Credit Hours)
This course provides an overview of the regulation of a variety of health care and medical products overseen by the Food & Drug Administration, including foods, dietary supplements, pharmaceuticals, medical devices, and tobacco products. The course will explore topics regarding premarket research and development, clinical trials, review and approval, and post-marketing monitoring and reporting. Legal concepts of agency rulemaking, products liability, commercial free speech, human subjects research, state regulation and preemption, civil and criminal remedies, and enforcement mechanisms will also be explored. A science background is not required for this course.

LAW 719 Health Care Labor Law Sem (1 Credit Hour)
This course serves as an introduction to labor and employment in the health care industry. Topics covered will include union representation, supervisory status, harassment and discrimination, independent contract relationships, employment at will, and wage and hour standards.

LAW 720 Health Care Payment and Policy (2 Credit Hours)
Health Care Payment and Policy is a course which focuses on the roles of payers, purchasers, providers and consumers in the shifting arena of health care coverage. Throughout the course, we will consider the Affordable Care Act and the regulations implemented over the past decade to implement that law and set in motion the health care industry's move to value-based care. The first part of the course will explore the development of health insurance, the growth of managed care models and the role of employers in shaping health benefits. The second portion of the course will explore the evolution of Medicare and Medicaid. The final portion of the course will consider the ongoing transition to value-based care payment and delivery models. This will include an evaluation of new payment models such as Accountable Care Organizations and Patient Centered Medical Homes. Students will also examine value-based strategies that drive better quality outcomes, enhance patient experiences and lower health care costs, including those needed to improve health and wellness of individuals and address the social determinants of health across communities.

LAW 722 Health Care Innovation & Regulatory Compliance (1 Credit Hour)
The health care sector features rapid changes in technology, business models, patient needs, and payor requirements. Innovation can create potential risk under legal frameworks that were not designed with a modern health system in mind. While it is important to identify these legal risks, clients often want lawyers to go a step further to design legally-compliant solutions to facilitate innovation. This course will help students learn practical skills to evaluate and manage legal risk for novel or developing health care concepts. These skills may include: evaluating exposure under anti-fraud laws like the Anti-Kickback Statue to scenarios where no safe harbor applies, understanding implications of different uses or transfers of Personal Health Information, understanding the role of coverage policies (Medicare, Medicaid, commercial), and evaluating FDA guidance concerning Software as a Medical Device. For example, students may be asked to write an Advisory Opinion request or other request for guidance from an applicable Federal or State agency regarding an innovative model, or a draft policy memo identifying applicable legal risks and potential.

LAW 723 Law and Public Health (2 Credit Hours)
This course explores the role of law and government regulation in the area of public health. The public health process (measurement, problem definition, strategy, design, implementation and evaluation) is explored in reference to current issues that are both timely and expositive of the ways in which law and regulation shape public health practice at the local, state, federal and international levels. Topical areas for analysis and discussion are drawn from the primary environments of public health; biological, physical, social, individual behavior, and national/international health systems. Students are required to work on group projects, and write a research paper.

LAW 725 Antitrust Health Care Field (1 Credit Hour)
This course will cover the full range of antitrust issues affecting the activities of all participants in the healthcare field, including different types of healthcare service providers (hospitals, physicians, and ancillary service providers), payors (government and commercial), and suppliers of products to providers and their patients. Following an introduction to the antitrust laws generally, the course will specifically address the competitive issues posed by mergers and joint ventures involving competing healthcare providers or payors, the formation and operation of provider networks (including Accountable Care Organizations) and managed care contracting, the activities of trade associations and group purchasing organizations, medical staff privileges and credentialing, single firm conduct, and specific statutory provisions (e.g., Robinson-Patman Act), exemptions and immunities.

LAW 726 Health Law Competition Team (1 Credit Hour)
This course is to be taken by students selected to compete on Loyola's health law competition teams. A JD student representing Loyola at either the L. Edward Bryant, Jr. National Health Law Competition OR at the Maryland Health Law Regulatory & Compliance Competition may register for one ungraded credit. This course will count for skills credit.

LAW 727 Annals of Health Law Executive Editors (1-3 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Executive Editors are solely responsible for the management of the entire process of publication of the Annals, including selecting the staff, communicating with authors, and performing final edits on all articles before publication. Additionally, Executive Editors oversee the planning of the annual symposium, maintain the website, and work on other special projects. These selected positions require immense dedication and responsibility. Executive Editors must possess superior legal knowledge and editing/writing skills. Additionally, the abilities to manage, delegate and supervise others are essential. This is a Non-Graded course.

LAW 729 Health Care Litigation and Medical Malpractice (2 Credit Hours)
This course will cover key areas of health care litigation. Students will explore the substantive and procedural law of medical negligence litigation and learn about pretrial matters such as drafting pleadings, motions and deposing experts. Students will have the opportunity to develop trial techniques including preparing direct and cross examinations. They will also be able to participate in a medical negligence mock trial. Additional topics will include compliance and internal investigations, licensing procedures, technology litigation, managed care litigation, and ERISA preemption. This is a Skills course.

LAW 730 Health Justice Policy Practicum (2-3 Credit Hours)
Government Health Policy is a two-credit seminar course that focuses on background and current perspectives concerning key health regulatory matters dealt with by government authorities. Broad considerations involving access to service, cost containment and quality improvement will serve as foundational themes in exploring legal and policy matters, from both a domestic and international perspective. While an array of subjects impacting health delivery will be covered, special emphases will be placed on public and private health insurance policy and regulation. There is no text for the course but a series of readings from current literature will be required. Students' grades will be based on three papers and presentations.

LAW 731 Medicare and the Affordable Care Act (1 Credit Hour)
The U.S. Medicare program is a health insurance program for the aged, severely disabled and people with end stage renal disease. As a major federal entitlement program, the Medicare program raises a host of legal issues for beneficiaries of the Medicare program and the providers and suppliers who provide health care services to these beneficiaries. This course is a survey of the important legal issues that health lawyers are likely to face in representing Medicare beneficiaries, providers and suppliers. This course also provides an overview of how the Medicare program affects the regulation of health care organizations and professionals. I

LAW 732 Health Care Fraud and Abuse (1 Credit Hour)
This course will examine the three major Federal laws governing healthcare fraud and abuse: the Stark law, the Anti-Kickback Statute, and the False Claims laws. Students will learn how to navigate through the complex maze of statutes and regulations. In addition, the public policy concerns which underlie each law will be discussed in great detail throughout the semester. The goal of the course is to equip the future lawyer with the tools necessary to properly identify healthcare fraud and abuse issues, and to effectively advise their clients on these issues.

LAW 733 Annals of Hlth Law Senior Editors (1-2 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Senior Editors prepare each article for publication. They generally supervise the editing work of Annals members. They manage and oversee the cite-checking process. This is a Non-Graded course.

LAW 734 Annals of Health Law Members (1 Credit Hour)
Pre-requisites: none
Open to: JD students by permission only. The members of the Annals of Health Law are responsible for editing and cite-checking article submissions, including providing substantive recommendations. They generally assist the Senior Members with the preparation of articles for publication. Members must be organized, detail-oriented, and dedicated to their role in the Annals publication process. They must possess superior cite-checking and editing skills. Additionally, each member must write an article of publishable quality for Advance Directive, the Annals online counterpart. This is a Non-Graded course.

LAW 739 Health Information Privacy and Technology (1-2 Credit Hours)
This course covers the Health Insurance Portability and Accountability Act and the statutory and regulatory framework for the privacy and security of health information. Students will learn about the historical basis of privacy and global comparisons. Topics will include data privacy, security, oversight, and breaches of protected health information.

LAW 741 Health Law: Business and Finance (3 Credit Hours)
In a survey format, this course will introduce tenets of healthcare business, and how operations and business status introduce potential legal issues. In order to explore these issues, we will introduce the variety and types of healthcare businesses and organizations and their attendant financial operations, as well as the types of relationships and situations that give rise to potential lawsuits (including fiduciary trust relationships between physicians and patients and insurers and their customers, and the government and its citizens or residents).

LAW 742 Health Law LLM Thesis Project, Term 1 (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the campus LLM program.

LAW 745 Access to Health Care (2 Credit Hours)
Access to Health Care is a seven-week course exploring the legal, political, environmental, financial and medical issues surrounding access to health in the United States and internationally, with particular emphasis on people who are experiencing poverty and the uninsured. The course is complemented with a required spring break field study to an impoverished region in the United States or abroad.

LAW 748 Public Health Law (3 Credit Hours)
No course description is available

LAW 749 Anti-Kickback Law and False Claims Act Seminar (1 Credit Hour)
This seminar will serve as an introduction to health car fraud and abuse, with a focus on the federal anti-kickback law and the False Claims Act.

LAW 750 Health Law LLM Thesis Project, Term 2 (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the campus LLM program.

LAW 751 LL.M. Paper Supervision (3 Credit Hours)
Open to: LLM students only with permission. LLM students who do not complete the LL.M. Paper within the requisite period of time must register for this class each semester until the paper has been accepted by the advisor. This is a Non-Graded course.

LAW 752 Comparative Health Law (1-2 Credit Hours)
This course explores the health care system and relevant laws of the host country in which it is being taught. Generally offered in China, the course will explore the evolution and development of the Chinese health system from the days of the bare foot doctor to the national health reforms initiated under President Hu, guaranteeing all Chinese citizens equal access to basic health insurance. The course will consider public health policies in China with a focus on infectious disease prevention and control integration of traditional medicine with Western medicine, birth control and family planning, environmental health, smoking, food safety and the impacts of aging on health. Comparisons will be drawn between China and other Asian countries as well the United States and Canada. This is a Perspective Elective course.

LAW 754 Health Justice Lab (3 Credit Hours)
This interprofessional and experiential course will bring together students from law, public health, and medicine to explore racism and its impact on health.

LAW 755 Health Justice Project (3-4 Credit Hours)
The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend to other client matters throughout the semester. Students must be available to participate in a mandatory orientation prior to the start of the semester. LAW 755-022 Student attorneys will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred by HJPs health partners, issue spotting, engaging in legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with HJP partners, and be responsive to supervising attorneys.

LAW 756 Interdisciplinary Health Advocacy (2 Credit Hours)
This course is taken in conjunction with the Health Justice Project course and provides students with an opportunity to participate in an interdisciplinary team to address health problems of low-income patients. Students partner with medical residents and doctors to explore communication and ethical issues among disciplines and actively participate in precepting and grand rounds with medical and social work partners. (Permission is required.) This is a Skills and Experiential course.

LAW 757 Advanced Health Justice Project (2-4 Credit Hours)
Students who have successfully completed the Health Justice Project clinic may enroll in the Advanced Health Justice Project, in which they will continue to represent clients and complete projects to improve the health and well-being of vulnerable low income families and individuals in Chicago through holistic, collaborative, and systemic advocacy. Faculty permission required.

LAW 759 International Products Liability (2 Credit Hours)
This course will focus on international tort issues, including products liability, medical malpractice, and the role of torts in terrorism.

LAW 760 Disability Law (2 Credit Hours)
In this class we will explore the disability rights movement and the laws, including the ADA, the Fair Housing Act, and the Individuals with Disabilities Education Act, that inform and advance the movement. The class will also discuss the philosophy of disability rights theory that aims to transform societal thinking on disability away from a construct of charity and pity and toward a construct of power and civil rights. Taught by a disability rights attorney, the class will also feature a handful of guest lectures by other disability rights attorneys.

LAW 761 Health Justice Policy (3 Credit Hours)
Students who successfully complete Health Justice Project or Introduction to Health Justice are eligible to become advanced participants in the policy clinic. Students enrolled in the Advanced Health Justice Policy course may engage in policy work. Students will participate in bi-monthly supervisory meetings. (Permission is required.) This is a Skills and Experiential course.

LAW 764 Global Public Health Law (1 Credit Hour)
This course will explore mechanisms for global governance in the area of public health focusing on the roles of the United Nations, the World Health Organization, the World Bank and Global and regional trade organizations. Broad topical areas will be used as vehicles to coalesce individual sessions concentrating on health system development, infectious disease reporting and prevention, chronic illnesses, particularly obesity and diabetes, as well as global tobacco control. A focus of the course will be on the exploration of legal rights and policy development for migrant and indigenous populations. This is a Perspective Elective course.

LAW 765 Constitutional Issues in Health Law (2 Credit Hours)
The Supreme Court's recent decision upholding the major provisions of the Patient Protection and Affordable Care Act has brought new attention to the intersection between constitutional law and health care. This seminar gives students the opportunity to engage deeply with some of the most compelling constitutional issues of our time, including the use of federal spending powers to expand state Medicaid programs; the health insurance mandate as a regulation of interstate commerce; federalism conflicts in the medicalization of marijuana; medical providers' free speech rights; compelled commercial speech in the tobacco industry; religious objections to controversial medical procedures; cruel and unusual medical treatment of prisoners; as well as substantive due process challenges relating to public health, end of life care, and reproductive autonomy.

LAW 766 Advanced Health Justice Policy (2 Credit Hours)
Students who successfully complete Health Justice Project or Introduction to Health Justice are eligible to become advanced participants in the policy clinic. Students enrolled in the Advanced Health Justice Policy course may engage in policy work. Students will participate in bi-monthly supervisory meetings. This is a Skills and Experiential course.

LAW 768 Topics in Long Term Care (2 Credit Hours)
Provides students with an overview of key legal and policy issues in the diverse and growing field of long term care. In the context of the seminar long term care will be cast broadly as an area that deals with diverse populations that have profound and ongoing health/social needs including disabled populations and the elderly. While much of the course will focus on statutory and regulatory law, significant emphasis will be placed on evolving public policies in long term care that impact programmatic developments in quality assurance ,insurance coverage and the regulation of institutional and community actors. Specific areas of focus will be selected for each term for review and analyses including diseases of aging, prevention of abuse and neglect, uses of telehealth, senior housing policy and end of life care. Materials from the United States, Canada, the EU and Japan will be referenced. Students will be required to write two memoranda and participate in a group project.

LAW 769 Health Justice Advocacy (3 Credit Hours)
The Health Justice Advocacy course is a live-client clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice. Students practice and hone their ability to investigate facts, interview, issue spot, and advocate on behalf of a client. Students may address a variety of legal matters related to the client's health, including medical debt forgiveness, advance care planning, housing conditions and public benefits denials. Students also gain experience collaborating on an interprofessional level and an understanding of legal systems that affect poverty and health. This course is ideal for a student embarking on a public interest, social justice or health law career. This course is only open to 1Ls during the Spring as a Perspective Elective course. Faculty permission required for all other students during the spring.

LAW 770 Doctoral Dissertation Research I (2 Credit Hours)
Pre-requisites: none
Open to: SJD and DLaw students only. Candidates will be required to rework the doctoral proposal s/he submitted with his/her admission application into a 30-40 page summary paper which shall serve as a roadmap for the first draft of the dissertation. Students must also make a presentation on an aspect of their research to a group of doctoral students and advisors. This is a Non-Graded course.

LAW 772 Doctoral Dissertation Research II (2 Credit Hours)
Pre-requisites: Doctoral Dissertation Research I
Open to: SJD and DLaw students only. Candidates must draft a detailed dissertation outline, have it evaluated by his/her advisor, and incorporate any necessary changes into a final outline. Once the dissertation outline is approved, the first draft of the dissertation should be completed and submitted to the advisor. This is a Non-Graded course.

LAW 773 Doctoral Dissertation Supervision (0 Credit Hours)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
Open to: SJD and DLaw students only. The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues, reviewing the working draft and approving the final product. Dissertations should represent important contributions to the field, (minimum length 150 pages and double spaced) but specific format and content needs to be clarified between the candidate, the advisor, and the committee. Once clarified, the suggested format must be followed. Once the dissertation has been completed, it must be presented at an open forum to be attended by interested members of the law school community. Students must enroll in this course during both fall and spring semesters of his/her second year. This is a Non-Graded course.

LAW 776 Law and the Life Sciences (2 Credit Hours)
This course will examine a variety of legal, policy, and ethical issues impacting advancements in the life sciences. Topics will be explored using an interdisciplinary approach, drawing upon a diverse set of reading materials. Topics to be covered include the intersection of law and science, genetics, stem cell research, biotechnology, nanotechnology, neuroscience, and synthetic biology. A science background is not necessary. The course is a 2-credit course with a final paper (8-10 pages) and presentation, including two short reaction essays during the semester. It will examine a variety of legal, policy, scientific, social, and ethical issues at the forefront of advancements in the life sciences. The course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials spanning various legal fields such as food and drug law, antitrust law, consumer protection law, environmental law, intellectual property law, and bioethics. Topics to be covered include the intersection of law and science, human subjects' research, wearable medical apps, genomics and genetic enhancement, nanotechnology and nanobiotechnology, neuroscience, and synthetic biology. The core focus of the course will be on exploration of these issues for purposes of developing solid academic legal research and writing.

LAW 777 Doctoral Dissertation Supervision and Completion (0 Credit Hours)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues and reviewing the working draft. Students must enroll in this course during the fall semester of his or her second year. Open to: S.J.D. and D.Law students only

LAW 778 Law and Science (3 Credit Hours)
This course will focus on the intersection of science and health care, with a focus on development of treatments, drugs, and devices and the trial and testing process.

LAW 779 Current Topics in Pandemic Law and Policy (2 Credit Hours)
This course examines the legal and ethical foundations of pandemic and emergency preparedness, intervention, and evaluation in the context of the ongoing SARS-CoV-2/COVID-19 pandemic. Using open-access resources developed by health law experts, students will study the pandemic from multi-doctrinal (e.g., constitutional, criminal, administrative, health, employment, privacy, and civil rights) perspectives.

LAW 780 Corporate Health Care Litigation (1 Credit Hour)
This course will cover key concepts in common areas of health care litigation with a focus on practical skills. Topics covered will include medical staff bylaws, medical staff disciplinary proceedings, state and federal qui tam actions, and medical restrictive covenants. In addition to learning the substantive law surrounding these types of litigation, students will also perform exercises, including oral arguments, in class.

LAW 793 Administrative Law and Health Care Regulation (2 Credit Hours)
Administrative Law (Law 221) is a pre-requisite.

LAW 797 Risk Management, Patient Safety & Quality (2 Credit Hours)
Students will utilize reading materials, case studies, hospital risk management scenarios and data sets provided in class to apply knowledge to specific RM and patient safety scenarios and to use critical thinking skills to solve problems. Through the readings and case study analysis students will learn to identify legal, ethical, administrative, compliance, risk management and patient safety issues and to reach resolutions for the problems presented, even when a clear legal response may not be available or in the best interests of the patient. We will be learning how to respond to a variety of risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed. We will also discuss how these perceptions of key stakeholders are in conflict and how those conflicts can be managed. Finally, students will also learn how principles of risk management have changed since the 1998 IOM Report and how the changes in our current health care system will further challenge both patients and providers. This report called for increased focus on systemic failures and moving away from a culture of blame and shame to a culture of transparency and learning. With the passage of the ACA and not efforts to repeal and replace we will also discuss how risk management, safety and compliance are likely to further change as our health care delivery system evolves.

LAW 798 Health Care Compliance (2 Credit Hours)
This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs. Readings will derive from various sources. There is no required book. Case law, legislation, regulations, government reports and legal articles will be available on Sakai. As in any graduate-level course, thinking about and discussing the issues with an open and creative mind is actively encouraged.

LAW 799 Health Law Colloquium (2 Credit Hours)
This a unique course offered once a year to a select group of students from Loyola and DePaul. Enrolled students read and discuss draft articles of nationally renowned professors in the field of health law. They must also write a three page memo (double spaced) with comments on the article that will be useful to the professor. The articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of health law is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at DePaul and the other three in-person classes will be a Loyola. Please be sure that your schedule allows you to arrive at either law school by 4 p.m. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes and write comment memos as described above. Students must apply to the supervising professor at the law school they attend in order to be sure that they understand the nature of the course. Email the instructor to assure to arrange for this interview.

LAW 800 M.J. Introduction to Business & Law (3 Credit Hours)
This course is taken in the first semester of study to gain an overview of the structure and functioning of our legal system. The class introduces the basic law school curriculum from a business law perspective including: Constitutional Law; Contracts Law; Torts Law; Civil Procedure; Criminal Law; and, the UCC. Students are also introduced to legal analysis and reasoning, including how to read and analyze written judicial opinions and statutes. This course also provides an overview of the laws that affect businesses day-to-day including ethical business conduct policies, consumer protection, human resources and employment issues, real estate, intellectual property and corporate governance.

LAW 801 Introduction to Legal Studies and Legal Writing (4 Credit Hours)
This course introduces legal research methods and principles of legal writing in the first semester of the program. Through a series of exercises on relevant topics, students will refine their writing skills. By researching and writing on varied issues, students learn to apply legal research techniques. Students read and analyze legal authority and learn how to apply legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Computerized research techniques are included in the course.

LAW 803 Business Organizations (3 Credit Hours)
Pre-requisites: Introduction to Business Law
This course is taken in the second semester of study and introduces agency law, partnership law, corporate law and the LLC. Principal emphasis is on the law as it applies to the organization and functioning of business entities, including the duties and obligations of managers of such entities. The course focuses on structure and mechanics, capitalization, distribution, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation.

LAW 806 Introduction to Business Law Clinic for International LLM Students (1-2 Credit Hours)
This course is designed to introduce international students to clinical work with for profit and not for profit businesses in the Chicagoland area, developing their counseling and drafting skills.

LAW 808 Governance, Ethics, & Compliance (3 Credit Hours)
This capstone class emphasizes the importance of legal compliance and ethics to the mission of the corporation and the business entrepreneur. Students will write a paper undertaking a legal case study of losses sustained by actual business (in reputation or otherwise) from acting in an unethical or illegal manner. The role of the corporation and the business leader in society is examined.

LAW 809 MJ Business Planning (2 Credit Hours)
This course teaches planning issues in connection with: (i) The organization of a business (e.g., the types of legal entities including: corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of minority shareholder in a privately owned business; (ii) The financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iv) Buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) The financially troubled business.

LAW 810 MJ Corporate Tax (2 Credit Hours)
This course is intended for those with familiarity with federal income taxation. It focuses on the income tax consequences associated with the three principal business forms; the corporation; the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 811 MJ US Corporate Governance (2 Credit Hours)
In this course, students will study and analyze the law and practice of corporate governance law for publicly held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on he impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed. Finally, the course will address practical elements of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 812 Financial Institution Regulation (2 Credit Hours)
The course has two objectives. First, it will examine and analyze the current bank regulatory system. Consideration will be given to the function and regulation of depository institutions, as well as, that of various classes of affiliated entities such as those involved in the issuance of securities, insurance and merchant banking. Second, the course will examine the mechanics of key bank operations including, syndicated lending, underwriting and the securitization of debt securities.

LAW 813 Financial Institution Regulation II (2 Credit Hours)
Pre-requisites: MJ Financial Institute Regulation
This course will examine the regulatory regime applicable to securities broker-dealers and futures commission merchants. Primary focus will be on the substantive content of the Securities Exchange Act of 1934 and the Commodity Exchange Act of 1970, and the regulations promulgated thereunder. Secondarily, the course addresses the self-regulatory agencies responsible for overseeing the securities and commodities trading system.

LAW 814 Business Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Business Law degree program may earn externship credit for working at an approved business law externship site. This program is designed to offer students practical experience to further develop lawyering skills and business law expertise. Students may receive up to three credits.

LAW 815 Advanced Appellate Advocacy (3 Credit Hours)
This course is intended for LL.M. students, but J.D. student may be permitted to take the class with instructor permission. The course begins where traditional legal writing and advocacy courses leave off, teaching advanced legal research strategies, brief writing, oral argument technique, and the components of appellate procedure. Students will be required to compose appellate briefs and to deliver oral arguments.

LAW 816 Racial Justice Seminar Series (3 Credit Hours)
This course exposes students to seven unique and emerging racial justice in health care or compliance. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political, business or health care challenges. This course is structured over 13 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice.

LAW 817 Compliance and Securities Regulation (3 Credit Hours)
This course will focus on the basic principles of the Securities Act of 1933, which sets forth the requirements for registration of all securities sales unless an exemption is available. The course will cover the concept of what is a security, the registration requirements of Section 5 of the '33 Act, the exemptions from registration, particularly the intrastate offering exemption (Section 3 (a)(11) and Rule 147); Section 4(1) and 4(2) (and Regulation D) regarding private offerings; Rule 144A "big boy" transactions and certain other exemptions; the timing and rules for preparation of registration statements and prospectuses under Section 5; key aspects of Regulation S-X; the consequences of the failure to register (Sections 11, 12, 13 and 17); jurisdiction; and other similar topics.

LAW 818 MJ Securities Regulation II (2 Credit Hours)
Pre-requisites: Securities Regulation II
This course will focus on the aftermath of becoming a public company, including reporting responsibility under the Securities and Exchange Act of 1934; proxy solicitations under SEC regulations; tender offers and the Williams Act; compliance with the Sarbanes-Oxley Act of 2005; responsibilities of officers and directors of public companies; secondary market disclosure and Regulation FD; the impact of the Dodd-Frank Act of 2010; and Section 10b of the '34 Act and Rule 10b-5; and, the impact and operation of the Private Securities Litigation Reform Act and class action lawsuits.

LAW 820 Compliance and Culture (2 Credit Hours)
Seeking a name change plus change to study of the importance of corporate culture with compliance, best practices in the compliance industry and lessons learned from corporate scandals. This course will continue to provide the students with experience in dealing with "compliance issues" across multiple industries. The course will be organized as a series of hypotheticals presented to the students who will work through issue spotting regulatory and compliance concerns, developing an audit plan for the issues, protocols, identifying needed policies and procedures, and establishing corrective actions for remediation. Corporate Compliance, Law 839 or Health Care Compliance Law 910 are preferred prerequisites.

LAW 821 International Business Transactions (2 Credit Hours)
This course serves as an introduction to the background and legal framework of international business transactions. Students will: - study the business and legal issues that impact international business transactions; - gain insight into the dynamics of structuring international business transactions; - learn about the role that lawyers and legal professionals play in international business; - examine key legal topics that often arise in international business transactions; and - explore careers in international business law.

LAW 823 Privacy and Security of Corporate Information (2 Credit Hours)
This course provides an overview of compliance issues and requirements in information management, including information technology and record keeping requirements.

LAW 824 Where Business Meets Law (3 Credit Hours)
Pre-requisites: Business Organizations In this course, students will focus on contract drafting, communications, transactions analysis, matter management, negotiation and client service
We will use simulations, role playing, in-class negotiations and a five week drafting and negotiation lab to introduce you to the basic work of a transactional lawyer. The goal of this course is to offer you a basic primer on the actual practice of transactional law.

LAW 825 Business Law Center Clinical & Seminar (2-4 Credit Hours)
The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Tuesday, 10:00am - 12:00 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 3 hours per week per credit hour, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional manner, regularly attend the seminar classes and participate in various seminar exercises. Recommended courses, in order of preference, are Business Organizations, Federal Income Tax and Corporate & Partnership Tax. Class is limited to 14-16 students and instructor permission and an application is required. This is a Skills and Live Client Experience course.

LAW 826 Business Law Clinic II (1-3 Credit Hours)
Pre-requisites: Business Law Clinic and Seminar I, Permission Required
Business Law Clinic II is a continuation of Business Law Clinic I. Student clinicians will continue working with for profit and not for profit businesses in the Chicagoland area. Learning from their experience in Clinic I, Clinic II students have the opportunity to further develop their counseling and drafting skills. Clinic II student clinicians have the same hourly requirements as Clinic I, however, there is no seminar component.

LAW 827 Succession Planning For The Family Business (3 Credit Hours)
This Capstone Course is limited to twelve, 3Ls who have completed Estate & Gift Tax and Advanced Corporate Tax. For the first half of the semester, the capstone students will be part of the Estate Planning class taught by Prof. Rhodes during which time they will learn the fundamentals of estate planning. After spring break, the Capstone students will have their own specialized classes co-taught by Professors Kwall and Rhodes that focus on family business planning. The Capstone Course is intended to serve as a "bridge to practice" for future lawyers representing entrepreneurs of successful multi-generation, family-owned businesses. These clients expect to be serviced by a lead professional who can integrate business, income tax, and estate planning objectives. Although the Tax Certificate program offers a rich curriculum in income tax and estate tax, these courses only provide the building blocks to comprehensive planning. This Capstone Course is designed to equip students with the integrative understanding necessary to meet the demands of the mature entrepreneur who will expect his/her business planning, retirement planning, and death planning to be led by a lawyer with foresight, judgment and a big picture perspective. The Capstone Course students will focus on a case study that raises a myriad of income tax and estate planning issues. Students will diagnose and analyze existing tax problems and develop a variety of options including a transfer of the business to a younger generation, a sale of the business to unrelated parties, or a reorganization of the business. The students will work in teams and each team will be expected to produce a detailed planning outline explaining the problems, alternative solutions and the issues they present that can be used to educate the client and develop a course of action. There will not be a final exam. As to grading, 50% will be based on the first half of the semester and 50% will be based on the second half of the semester. This is an Experiential Learning course.

LAW 828 LLM Externship Field Placement (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in any campus based LLM program may earn between one to three externship credits for working at an approved LLM externship site. This externship is designed to offer practical experience to further develop law related skills and expertise in various legal fields. A maximum of 3 credit hours can be attained during the LLM program. This is an Experiential Learning course.

LAW 829 Global Compliance (2 Credit Hours)
This course will offer students the opportunity to study significant areas of law from foreign jurisdictions that impact doing business abroad or foreign companies doing business in the U.S. A selection of areas of law that will be covered include the UK Bribery Act, European Union privacy regulation, technology transfer laws (including U.S. import-export controls), national security issues associated with doing business in certain companies, and developing laws of emerging markets in Asia.

LAW 831 Business Planning (4 Credit Hours)
Business Planning is a case studies oriented course in which students use skills learned through substantive lectures to draft and edit crucial business planning documents individually and/or in teams. Issues covered include the structure of corporate structures, fiduciary duty, valuing, capitalizing and organizing a corporation, drafting shareholder agreements and buy/sell agreements, sale of a business and similar issues in regard to LLCs and partnerships. Assignments include drafting legal and planning memoranda, drafting articles of incorporation and by-laws, and marking up forms to accomplish a specified purpose.

LAW 832 Contracts (3 Credit Hours)
This course describes the basic anatomy of a contract, including the key components of contracts and how they are organized. The course then uses multiple exercises to teach how to review, negotiate, and draft provisions of business contracts. Students will also learn how to manage risk through careful drafting.

LAW 833 Securities Regulation for Lawyers (2 Credit Hours)
This course will provide attorneys with an overview of securities regulation as well as case studies and practical drafting exercises designed for the securities attorney.

LAW 834 Transactional Skills (2 Credit Hours)
This course is designed to provide the new transactional attorney with an overview of key transactional skills, including drafting, client counseling, and negotiation.

LAW 835 Compliance Training Methods (3 Credit Hours)
This course is designed to provide students with practical experience in developing training and education material. An emphasis will be placed on explaining complex regulations and laws to a workforce. The course will also explore varying pedagogical methods for delivering compliance education.

LAW 836 Compliance Seminar Series (1 Credit Hour)
This course is designed to provide an overview of recent developments in corporate compliance. The course will feature bi-weekly guest speaker on topics of interest to the compliance community. Students will be assessed through short written responses to each lecture and a final essay.

LAW 837 Breach Incident Management and Reporting (3 Credit Hours)
A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

LAW 838 European Union Privacy Law (3 Credit Hours)
European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

LAW 839 Corporate Compliance (2 Credit Hours)
This course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an effective compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 841 Intntl Commercial Arbitration & the CISG (1-3 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present tow oral arguments: one at the law school before a panel of moot alumni, and one before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, eight students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest by mid-April to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course.

LAW 842 International Commercial Arbitration (1-2 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present an oral argument before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, a second oral argument is held at the law school, after which students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course

LAW 844 Advanced Trial Practice (3 Credit Hours)
This course will teach students the law and techniques used during the trial process. The course will instruct students and require them to simulate jury selection and voir dire, opening statements, witness examinations, exhibits, objections, and closing statements.

LAW 845 The Foreign Corrupt Practices Act (3 Credit Hours)
This course will examine the FCPA in-depth from the perspective of U.S. companies doing business in foreign jurisdictions and interacting with public officials and regulatory bodies. The course will also examine how companies that might consider themselves a "U.S.-only" business could find themselves with FCPA risk. The course will examine both the law and enforcement actions. The course will also review ways to incorporate FCPA risk into a compliance program so that a company's workforce is educated on FCPA risk and examine how to remediate potential non-compliance with FCPA.

LAW 847 Business Law Graduate Directed/Independent Study (1-3 Credit Hours)
Open to campus based LLM or MJ students. Students will work under the supervision of a member of the Loyola law faculty for purposes of completing scholarly work as defined by the supervising faculty member. This may include but is not limited to assisting a faculty member on an article for publication or on the development of new teaching methods particularly those using technology as part of instructional practices, or producing a scholarly proposal or paper, relating to business law topics, which can be counted as preliminary work towards the completion of a the LLM or MJ thesis requirement. Students may receive up to three credits.

LAW 853 Intellectual Property Survey (3 Credit Hours)
The course is an introduction to the law of intellectual property designed for competition lawyers and other professionals in the field. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominant focus on the course is on trademark, patent, and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 856 Advanced Alternative Dispute Resolution (3 Credit Hours)
The course will focus on the substantive and procedural elements of the various forms of alternative dispute resolution techniques in the United States. The class will cover arbitration, negotiations, mediation, mini-trials, non-binding arbitration using legal assistance, and the role of counsel in each of these processes. A significant amount of class time will deal with mediation as well as both administered and non-administered arbitration. The class will address established principles of arbitration law, the various types of arbitrations, the rules governing arbitration, the role of counsel in the processes, as well as the power, responsibilities and ethical requirements of both mediators and arbitrators. The course will combine a traditional lecture format with practical experience designed to provide the student with a strong substantive basis in mediation and arbitration, as well as clinical experience with several mock mediations and arbitrations interspersed during the course term.

LAW 857 Leadership and Strategy (3 Credit Hours)
As a leader or manager in your organization, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best. And, you have to do this in a way that preserves the organization's financial health and protects it from legal risks. Your professional success depends directly on your ability to make the right strategic decisions, and effectively lead and inspire individuals, teams and projects. This course is designed to enhance your ability to do this. This course also will enable students to examine varied approaches to leadership that are based on personal and organizational mission, vision and values. Students will have an opportunity to explore their own values and approach to leadership and accountability.
Outcomes:
By the end of this class students will be able to: Model the characteristics and skills of visionary leaders; Critically define and analyze business problems and formulate data- and information-driven business decisions; Articulate the responsibility leaders have to all stakeholders and the application of ethical principles to business practices; Successfully participate in and lead multi-functional team projects; and Demonstrate proficiency in the various forms of communication

LAW 858 Cybersecurity Management (3 Credit Hours)
This course will introduce students to the key legal, business and ethical issues related to cybersecurity. Students will gain familiarity with a framework for approaching cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures to maintain the integrity of computers, systems and data.

LAW 859 Environmental Enforcement and Compliance (2 Credit Hours)
This class will provide an overview of corporate compliance principles applied in the environmental context, as well as to provide a general overview of federal environmental law compliance. This course will examine the principles of an "effective" corporate environmental compliance program and will provide a framework for students to identify, prevent, detect, respond and correct any environmental non-compliance.

LAW 860 LLM Tax Seminar (2 Credit Hours)
In the LLM Tax Seminar, tax LL.M. students will research a topic in tax deeply and write a thesis on that topic.

LAW 863 Consumer Protection Law (2 Credit Hours)
The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage.

LAW 864 Federal Criminal Trial Advocacy (2 Credit Hours)
Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem - which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation. The class will be divided into three parts: 1) Investigation 2) Suppression Hearing and 3) Trial.

LAW 865 Corporate Compliance (2 Credit Hours)
This course will familiarize law students with the world of corporate compliance focusing on competition law issues, and provide basic skills to be employed in a corporate compliance department. Students will obtain a basic understanding of the legal principles related to compliance, or preventive law, and learn the interplay between compliance and ethics. They will become familiar with the principles of Chapter 8 of the United States Federal Sentencing Guidelines, which describe the fundamental rules for creating an effective compliance program. They will be able to understand and articulate how compliance and ethics failures impact on the success or failure of a business.

LAW 866 Antitrust & Intellectual Property (2 Credit Hours)
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 867 Chinese and Indian Competition Law (2 Credit Hours)
The People's Republic of China promulgated its Anti-Monopoly Law (AML) in 2008 following nearly a decade of study, drafting, debate, and revision. The AML is a unique and important competition law given China's status as both a socialist market economy and the world's second largest economy. This course will provide a survey of the development of the AML, its principal provisions, its unique method enforcement by three different government agencies, the early track record of enforcement, and the continuing questions regarding the effectiveness and fairness of the AML.

LAW 868 U.S. Antitrust Law (2 Credit Hours)
This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 872 International Merger Regulation (2 Credit Hours)
This course provides an overview of the laws and legal issues related to the review and regulation of mergers from an antitrust and competition law perspective. Although the course will draw primarily from the experiences in the United States and Europe, we will discuss and compare many jurisdictions around the world and the challenge of applying multiple merger laws to the same merger. We will start by distinguishing mergers from other types of business conduct which implicate antitrust and competition laws and address the question of why mergers are treated differently. The course will then address basic principles used in the substantive review of mergers. We will start by identifying the economic rationale supporting the prohibition of mergers and the basic economic theories used to distinguish permissible mergers from impermissible mergers. We will then ask whether these theories apply across jurisdictions. We also will devote several sessions to the procedural context of merger review. We will discuss the basic question of why mergers need to be scrutinized in advance and the efficiencies of this approach. We will also address the complexities of securing merger review clearance for a multinational transaction in a world of differing, overlapping and sometimes conflicting merger laws. That discussion will inevitably lead us to the issue of extraterritoriality: To what extent may a jurisdiction apply its merger laws to a transaction occurring outside of that jurisdiction? The course will conclude with a discussion of the internationalization of merger review. This will include various proposals at convergence, harmonization and the creation of a supra-national merger review authority. It will also involve a discussion of the various institutions which are trying to address the issues created by a world of differing, overlapping and sometimes conflicting merger laws such as the International Competition Network, UNCTAD and the WTO.

LAW 874 Environmental, Social, and Governance (ESG) (3 Credit Hours)
"LAW 874 will examine the relationship between corporate Compliance and the emerging corporate governance principles known as Environmental, Social and Governance (ESG). ESG represents a set of operating principles assist business entities as they strive to be both profitable and socially responsible. The ESG model has grown in use and popularity over the past decade and now is considered essential for many businesses. This course will examine the application of Compliance principles as outlined in the Federal Sentencing Guidelines to the ESG framework. It will examine discreet elements of each principle, such as climate change, sustainability and emission standards for Environmental; workers and human rights, equality and fairness and diversity and inclusion for Social and board independence, fair compensation and ethics and compliance for Governance. It will trace the roots of the ESG movement from the Triple Bottom Line to sustainability to Corporate Social Responsibility to ESG. It will also examine the fundamental purposes of corporations and whether the Friedman Model from the Chicago School remains viable. We will also consider various reporting models for ESG elements and their impact upon corporate governance and investing. Upon completion of LAW 874 (ESG) students will: understand ESG, its fundamental elements and the context of its existence; recognize the relationship between Compliance and ESG; apply reporting methodologies relating to ESG; develop best practices for corporate governance and ESG

LAW 878 Orientation Program for International LLM Students (1 Credit Hour)
Introduction to Core Concepts of Common Law and Studying Techniques for International LLM Students This online summer course is limited to international LLM students. The orientation is an immersive preparation for students and lawyers trained abroad who will learn what to expect from their law school courses and how they can meet the expectations of their professors. We will introduce core common law concepts and structure of US legal institutions. Students will hone their written and oral communication skills and train practice skills critical to success in law school.

LAW 879 Crisis Management and Compliance (3 Credit Hours)
The Collaborative Crisis Management course will provide students with an understanding of what role the compliance function plays to identify, minimize and respond to risks created by a corporate crisis. Students will gain this understanding through role-play, assignments, class participation and examination

LAW 880 Introduction to the Law of the United States I (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 881 Legal Research and Writing I (2 Credit Hours)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.

LAW 882 Legal Research and Writing II (2 Credit Hours)
This course is required for international students in the LL.M. and U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.

LAW 883 Introduction to the Law of the United States II (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. It is taught as a 1-credit hour course in the spring semester (I) and in the fall semester (II). This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 884 Doctoral Dissertation Research and S.J.D. Colloquium I (0 Credit Hours)
This course will consist of three distinctive components: 1. Doctoral Research: Candidates will learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will discuss their research with their peers and others and elicit feedback on drafts of their work at various stages.

LAW 885 Doctoral Dissertation Research and S.J.D. Colloquium II (0 Credit Hours)
Pre-requisites: (LAW 884) Doctoral Dissertation Research and S.J.D
This course will allow further development of the three distinctive components from part one of this course: 1. Doctoral Research: Candidates will continue to learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will continue to learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will continue to discuss their research with their peers and others and elicit feedback on drafts of their work at various stages. Colloquium I

LAW 886 Doctoral Dissertation Supervision (0 Credit Hours)
Pre-requisites: (LAW 885) Doctoral Dissertation Research and S.J.D
This course will allow candidates to focus on developing their dissertation and building on the preliminary research they conducted during the first year. Candidates will continue to meet, either in person or by remote means, with their Advisory Committee twice a year. Colloquium II

LAW 887 Doctoral Dissertation Supervision and Completion (0 Credit Hours)
Pre-requisites: (LAW 877) Doctoral Dissertation Supervision II
This course will allow candidates to continue to develop and complete the dissertation.

LAW 899 Online LLM Thesis Project (4 Credit Hours)
Students are expected to complete a thesis project. The project is completed in close cooperation with a faculty advisor. This the first course for students completing their LLM thesis. This course will focus on creating a detailed outline, introduction, and writing a partial draft and final draft.

LAW 900 Introduction to Legal Study and Legal Writing (4 Credit Hours)
This foundation course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure of the American court system. Students then learn to read and brief cases, synthesize cases, and develop basic legal writing and analysis skills. Through multiple short writing assignments, students learn to construct a legal office memorandum, the final course requirement. The course utilizes health law cases and problems and provides students with background for future health law studies. This course is open to online Master of Jurisprudence students in the Health Law and Business Law programs.

LAW 901 Introduction to Legal Research (1 Credit Hour)
This course provides an overview of the legal research process. The student will learn basic legal research skills with a focus on online legal sources. Students will search for health law cases, statutes, regulations and law journal articles. They will learn how to use citators to verify that a case or statute is still good law and also learn the proper form for citation of legal authorities.

LAW 902 Introduction to Health Law and Policy (3 Credit Hours)
This course is designed to expose students to the legal issues that arise from the relationship between and among patients and health care providers. Primary areas include: conflicts between cost effective and high quality health care; access to care; individual and institutional liability; public and private regulation; accreditation and licensure; hospital/medical staff relationships; patient rights, with a special focus on informed consent; and other legal issues in the acute care setting.

LAW 903 Health Care Financing (2 Credit Hours)
Students explore the general principles and techniques of financial management and accounting as applied to health care organizations. Considerable focus is placed upon definition, history, and methods by which providers of health care services are reimbursed by third parties.

LAW 904 Health Care Regulation and Policy (2 Credit Hours)
This course looks at patient representation issues in the context of judicial advocacy and public policy formation and explores patient rights in the context of federal opinions and strategies they utilize. The role of government in health care is explored through a review of major government health programs, particularly Medicare and Medicaid, with a focus on the fundamentals of legislative and administrative processes in health policy development and implementation. Issues to be explored will be drawn from the wide array of health matters in which governments are involved.

LAW 906 Health Care Contracts (2 Credit Hours)
This course provides an overview of the health care related contracts. Fundamental principles of contract law, illustrated primarily through a study of issues and cases drawn from the healthcare industry, are discussed and explored in this course. Students will learn how to spot important issues (beyond the dollars) and interpret contracts commonly used in the health care setting.

LAW 907 Bioethics & Social Justice (2 Credit Hours)
Students investigate issues arising from advances in biological science and technology and learn about their impact on the legal rights and of patients, health providers, and government policy makers. Issues explored range from legal and ethical dilemmas in the treatment of individuals to broader societal issues addressing the allocation of health care resources.

LAW 909 Risk Management, Patient Safety and Quality (2 Credit Hours)
This course is designed as a general survey course to provide you with an introduction to the concepts associated with managing risk, promoting quality and enhancing safety in the health care industry. The course begins with a general description of traditional risk management and then proceeds to discussion the various aspects of risk management, patient safety and quality that influence the delivery of health care.

LAW 910 Health Care Compliance (2 Credit Hours)
This course will progress from the basics of a compliance program, including the compliance operations and the Code of Conduct, to specific issues facing the healthcare industry such as anti-kickback, Stark, False Claims Act, and civil monetary penalties; conflicts of interest and governance; tax; coding and billing; privacy, technology, data, and security; and the link between regulatory issues and quality of care. Students will be assigned projects to show them how to implement in a practical setting the various laws, regulations, and standards as well as understand the enforcement environment. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 911 Writing Fundamentals (1 Credit Hour)
Students will review basic writing mechanics including grammar and punctuation. They will enhance their writing skills by editing passages, producing written assignments, and doing focused writing exercises. Students will also learn to develop sound arguments by practicing the art of logical flow. The goal is to help students to produce clear, well-organized, grammatically correct prose. This course will also offer some guidance regarding how to approach the thesis project.

LAW 912 Liability & Dispute Resolution in Health Care (2 Credit Hours)
In this course students will take an in-depth look at both the substantive and procedural law of medical negligence litigation and ways to avoid litigation through communication and resolution processes and the use of other alternative means of reconciliation following harm. Students will also review and discuss the motivations behind medical malpractice litigation and will include detailed discussions about the comprehensive, principled, and systematic approach to the prevention and response to patient harm including communication and resolution programs such as the Michigan Model, CANDOR, and the BETA HEART program. Students will discover, during the course, the impact of medical harm and litigation on patients, families, caregivers and society. Case-based videos involving actual patient harm events and demonstrating the power of empathic communication are used throughout the course.

LAW 916 Telemedicine (2 Credit Hours)
This class will explore the evolution of Telemedicine to Telehealth. It will begin by describing the legal and regulatory framework which governs all Telehealth encounters and the reimbursement and coverage parity issues which have, for years, limited growth in this critical aspect of health care. The course will also cover the impact of state licensing compacts, the challenges associated with technology, HIPAA and privacy concerns and how Telehealth can serve to reduce health care disparities and issues associated with access to needed health care services for geriatric and other patients.

LAW 917 Public Health and the Law (2 Credit Hours)
"Public Health Law is a two-credit survey course that covers core legal issues encountered in regulation and public policy affecting population health. The course will provide students with an overview of topics that concern regulatory theory, administrative law, legislation, and individual rights' concerns. As public health authorities are confronted with ever complex challenges, the role of law is pivotal in both directing regulatory responses, as well in shaping strategies to combat perceived abuses of government power. Few areas of law and policy are as dynamic as public health law as the field plays a central role in major, ongoing areas of population health such as Covid-19, opioid abuse, climate change, disaster preparedness and response, etc. The course will focus on four themes: (1) the structure and powers of public health agencies in confronting traditional and evolving health threats, (2) the challenge of balancing individual rights against population health concerns, (3) the role of civil litigation in influencing changes in public health with a focus on legal settlements in the areas of tobacco and opioids, (4) international and comparative law approaches to meeting cross border health challenges. The course is taught online and combines several live class sessions with programmed modules. Students will be required to make several in-class presentations that will be the basis of three required essay assignments.

LAW 918 Health Care Privacy and Security (2 Credit Hours)
This course is an overview of Health Information Law and Policy as it pertains to data security and privacy of electronic health records here in the United States. Students will examine how individual health information is collected, maintained, and transferred in this electronic information age, and the ramifications when such information is improperly protected, stolen, and misused.

LAW 919 Medical Records Billing and Coding (2 Credit Hours)
Today's healthcare professional needs a working knowledge of the business side of medicine; specifically medical record documentation, coding and billing. Non-compliance with rules and regulations on medical record documentation can result in refunds to health insurers, civil penalties, criminal proceedings, and/or exclusion from federal health care programs. Poor medical record documentation also puts patients at risk. This course will provide students with an in-depth knowledge of the legal role of the medical record, specifically in the context of obligations for the organization of the medical record and its support for reimbursement of services. Medical records must meet all State and federal legal, regulatory and accreditation requirements along with the Medicare Conditions of Participation at 42 CFR §482.24. Upon completion of this course, the student will have an understanding of the components of the medical record, the types of coding used by different providers, the methods of reimbursement based upon the provider type and risks associated with non-compliance.

LAW 920 Health Law Seminar Series (1 Credit Hour)
This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 921 Health Insurance and Health Care Regulation (2 Credit Hours)
This course is designed around the regulation of health insurance companies in the United States with an eye toward the coming changes brought about by the Affordable Care Act. Although the Affordable Care Act (ACA) is federal, its implementation is reliant on the states. This course will address how the current regulatory system will adapt to the new federal health care scheme.

LAW 922 Advanced Health Care Compliance (2 Credit Hours)
Pre-requisites: LAW 910 - Health Care Compliance (Online) or LAW 798 - Health Care Compliance (Chicago-Based)
This course explores advanced concepts in health care compliance. This course will present a complex health care compliance scenario each module which the student must analyze and comment upon. The scenarios will cover a broad array of regulatory subject matters which must be analyzed in the context of compliance program principles.

LAW 923 Privacy Program Management (2 Credit Hours)
This course explores advanced concepts in privacy and security law and is designed as a continuation of either of the introductory privacy courses (LAW 918 or LAW 823). This course will present a complex compliance privacy and security scenarios each module which the student must analyze and comment upon. LAW 918 or LAW 823 is a prerequisite

LAW 924 Conducting Internal Investigations (2 Credit Hours)
This course will cover practical techniques in responding to suspected non-compliance as well as liability exposure in how investigations are handled. The course will also discuss resolution of identified non-compliance and methods for discharging an organization's legal obligations to correct non-compliance, including self-disclosures and refunds. Additionally, the course will cover responding to government inquiries and audits. LAW 910 (Health Care Compliance) or LAW 839 (MJ Corporate Compliance) are preferred prerequisites but are not required.

LAW 925 Drafting Policies and Procedures (3 Credit Hours)
This course is designed to provide practical experience in drafting operational policies from compliance regulations. Having clear policies and procedures is an essential element of an effective compliance program. The course will explore liability associated with how policies are drafted as well as non-compliance with an institution's policy commitment. The course will teach skills and techniques for turning complex regulations into accessible policies for the workforce. LAW 910 Health Care Compliance) or LAW 839 (MJ Corporate Compliance) are preferred prerequisites but are not required.

LAW 926 Human Subjects Protection (2 Credit Hours)
This course will cover the law of protecting human subjects in clinical research. Federal agencies require institutions conducting research to have a study approved by an Institutional Review Board (IRB), obtain informed consent from the human subject, and self-disclose to the government various events. The course will review the regulations governing IRBs, the content of informed consent forms, the monitoring of research studies, and the disclosure of unanticipated events and significant non-compliance. The course will look at enforcement cases as well as tort liability. Financial relationships between investigators and sponsors will also be covered. LAW 958 (Life Sciences, Research and the FDA) is a preferred prerequisite but is not required.

LAW 927 Food and Drug Law (2 Credit Hours)
This course will cover advanced topics in the law governing development and approval of devices, drugs, and biologics under the jurisdiction of the U.S. Food and Drug Administration. The course will review regulatory obligations for both manufacturers and providers conducting FDA-regulated clinical research. The course will also cover enforcement of non-compliance and how organizations develop compliance infrastructure to manage the highly detailed FDA regulations. LAW 958 (Life Sciences, Research & the FDA) is a preferred prerequisite but is not required.

LAW 928 Health Care Field Study (1-2 Credit Hours)
This course provides online students a unique opportunity to participate in a trip to study the health care system in a particular location.

LAW 929 Enterprise Risk Management (2 Credit Hours)
Enterprise Risk Management (ERM) provides a comprehensive framework for making strategic decisions, taking into consideration concepts of both value creation and value protection. The approach looks at strategies for managing risk, uncertainty and growth and their relationship to total value. This course will cover the specific skills and techniques necessary to manage risk across increasingly complex organizations and to align business strategies with goals and culture.

LAW 930 Leadership and Management Seminar Series (3 Credit Hours)
This course is comprised of a series of lectures on topics in leadership and management by different experts in the field. Every other week students attend a live synchronous class on a leadership or management topic. Topics vary each term and are intended to cover hot topics and essential skills in leadership and management. The course is open to students in online business and health law programs.

LAW 931 Applied Learning Simulation (1 Credit Hour)
This course presents a simulated legal and/or compliance scenario in which students participate during an Education Immersion Weekend. Students must participate in the entire simulation exercise to earn course credit. Additionally, students must complete a short assignment upon completion of the simulation. Sample topics including privacy breaches, compliance program violations, and developing policies and providing compliance training

LAW 949 MJ Thesis Completion (4 Credit Hours)
MJ students who do not complete their thesis projects within the grace period must register for this course in order to get credit for completing the thesis.

LAW 951 MJ Thesis Project Term One (2 Credit Hours)
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online MJ program.

LAW 952 MJ Thesis Project Term Two (2 Credit Hours)
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online MJ program.

LAW 955 Administrative Law and Health Care Regulation (3 Credit Hours)
The course focuses on the role of federal and state agencies and government branches in regulating health care. Students will learn the fundamentals of administrative law through a health care lens. Topics covered will include government rulemaking, investigations, and enforcement. Students will learn how to locate and understand the interplay of sources of administrative law and analyze statutes and regulations.

LAW 956 Health Care Payment and Policy (2 Credit Hours)
This course covers the types of health care payors and the relationships between them, including HMOs, PPOs, CMPs, Medicare and Medicaid, and other managed care arrangements. Topics will include utilization review, ERISA, agency doctrine and payor operational and contracting issues. Students will become familiar with managed care and analyze healthcare plans and policies. (LLM only or with permission)

LAW 957 Corporate Health Care Transactions (2 Credit Hours)
This course overs the business and legal issues that arise in health care transactions and the business and regulatory environment surrounding transactions. Topics covered will include organizational operations, the contents and role of organizational documents, and the application of tax laws to transactions. Students will analyze organizational documents and prepare presentations on issues presented by transactions (LLM only or with permission.)

LAW 958 Clinical Research Compliance (2 Credit Hours)
This course serves as an introduction to the growing area of health law known as "life sciences". The theme for this course centers on the research and development of pharmaceutical drugs and devices and the role of the FDA in regulating this process. Topics covered will include genomics, personalized medicine, the FCPA, basic patent and intellectual property issues, and financing. Students will learn to analyze the FDA approval process (LLM only or with permission.)

LAW 959 Physician Regulation & Practice Management (2 Credit Hours)
This course is designed to introduce students to the laws, agencies, and other bodies that license, regulate and discipline physicians. Topics covered will include licensing proceedings and hearings and health care entity policies addressing these issues (LLM only or with permission.)

LAW 960 Fraud and Abuse - Stark Intensive (3 Credit Hours)
This course covers federal physician self-referral law, commonly known as stark law, and fraud and abuse law. Students will learn about the statutes, regulations and advisory opinions that define the parameters of physician referrals and anti-kickback laws, analyzing case studies for fraud and self-referral issues. Students will also familiarize themselves with the laws, regulations and government regulatory actions designed to combat false claims and other types of fraudulent activities. (LLM only or with permission.)

LAW 962 Antitrust Law (2 Credit Hours)
This course will provide an overview of the antitrust laws and will illustrate the antitrust issues that face businesses on a daily basis. The antitrust enforcement authorities believe that preserving competition provides the best mechanism for allocating economic resources, and that preventing unreasonable restraints of trade will benefit consumers by yielding high-quality, low priced goods and services and result in greater innovation. We will examine the value of competitive markets and the role antitrust law plays in addressing problems posed by mergers and acquisitions, joint ventures, monopolies, and other competitive collaborations across a wide variety of industries (including various aspects of the health care industry). We will also assess the antitrust implications of certain contracting practices such as exclusive dealing, non-compete clauses, and the impact of various other strategic business decisions. The subject matter is organized topically and will entail a discussion of competition theory and the practical application of those antitrust principles to everyday fact patterns, with a special emphasis on providing students real-world experience as they analyze antitrust issues routinely faced by antitrust practitioners.

LAW 970 Drafting (1 Credit Hour)
This course is designed to give students practical experience drafting revising, an analyzing contracts and other such documents. Students will analyze sample contracts for health law transactions, such as mergers, acquisitions, joint ventures and physician contracts and also draft portions of these documents. (LLM only or with permission.)

LAW 971 Tax Exempt and Financing Intensive (1 Credit Hour)
This course focuses on basic federal tax-exemption law as it applies to health care, with a particular focus on 50(c)(3) status and its implications. Areas to be covered include private benefits, increments, excess benefit transactions, community benefit and the impact of the federal health reform legislation. Additionally, this course will examine mechanisms for financing health care transactions, exploring the roles of private and public financing in health care. (LLM only or with permission.)

LAW 995 LLM Thesis Project Term One (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on choosing a topic, creating a thesis statement, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online LLM program.

LAW 996 LLM Thesis Project Term Two (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online LLM program.

LAW 998 LLM Thesis Completion (3 Credit Hours)
LLM students who do not complete their thesis projects within the grace period must register for this course in order to get credit for completing the thesis.

ProLaw (PLAW)

PLAW 101 Comparative and Ethical Lawyering for the Rule of Law (3 Credit Hours)
This course will develop the students' knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal traditions: common law, civil law, Islamic law, customary law and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. Finally, the course will encourage students to consider the ethical dimension of cross-systems rule of law advising.

PLAW 102 History, Theory and Practice of Rule of Law for Development (3 Credit Hours)
This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any field outside of law.

PLAW 103 Theory and Practice of Assessments in Rule of Law Advising (2 Credit Hours)
This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

PLAW 104 International Development Architecture (3 Credit Hours)
This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors, development institutions have been seeking to gather resources from the private sector to supplement official development aid.

PLAW 105 Sustainable Development Through International Commerce and Investment (2 Credit Hours)
International commercial transactions and investments can serve as the vehicles for sustainable development that respects economic, social, environmental, and other important values of the parties involved. Modern-day corporations have enormous resources and, when properly deployed, significant capabilities to promote sustainable development. This course explains the life cycle and range of international transactions and investment - from procurement of goods and services and licensing of technology to large infrastructure and public-private partnership projects. It sets out how properly structured transactions can promote prudent and sustainable development in developing and emerging economies. It describes how private companies, investors, regulators, financiers, governments, NGOs, and other stakeholders can work for the mutual benefit of the communities and countries involved as well as responsible long-term goals.

PLAW 106 Design of Rule of Law Programs and Proposal Preparation (2 Credit Hours)
This course will build the understanding and skills of students in project design and the preparation of written proposals related to rule of law assistance, which can be carried out either in the context of an internationally financed assistance arrangement or as a nationally-driven and self-financed initiative. Building on the needs assessments PROLAW course, the course will position project design as it fits into the overall project lifecycle, as well as its relationship with results-based management. The course will allow the student to understand the theory behind and the methods for conducting problem, stakeholder and risk analyses, designing a logical intervention including project objectives, outcomes, outputs and activities, setting a budget, performance indicators, and means of measuring project progress, and applying theory of change and other logical framework tools. In the second half of the course students will out their newly acquired knowledge and skills to use by preparing a full written project proposal. The course will examine donor thinking behind requirements and how to respond to them, examine current thinking concerning the effectiveness of the project approach to rule of law reform and consider the meaning of innovation, such as problem-driven iterative approaches.

PLAW 107 Rule of Law in Conflict Prevention and Peacebuilding (2 Credit Hours)
This course explores the relationship between rule of law, conflict prevention, mitigation and peacebuilding for development. Drawing from ongoing case studies and international practice, the course examines the drivers of conflict, the dynamics and changes in the social fabric during conflict and how rule of law addresses those challenges. Focus is on justice as foundational to establishing the security and institutional legitimacy necessary for human development. The course will examine how unaccountable and ineffective law enforcement and governance institutions contribute to conflict. Given an understanding of the context, course discussions will seek to identify practical modalities for strengthening rule of law and justice reform, including transitional justice. Course materials include case studies, evidence-based analyses and commentary. Students will be called upon to apply the course learning to a specific conflict affected context. Drawing on other courses in the program such as assessment, program design, implementation and oversight, students will identify opportunities for rule of law engagement in conflict contexts and propose relevant strategies and adaptive programming.

PLAW 108 Legal Systems and Methods (3 Credit Hours)
This course aims at providing those PROLAW students with first degrees in other than law with a framework for understanding the central features, branches, functions and notions of law and the evolution of legal systems and their influence on systems of governance. After a general introduction on legal methods and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and societal values in different branches of the law. Students will learn key law-related skills such as legal reasoning, analysis, planning and problem solving and how law influences advising, negotiating and mediation.

PLAW 110 Principles of International Economic Law (3 Credit Hours)
Principles of International Economic Law is a required PROLAW course covering selected topics in the law governing international business transaction, international trade law, alternative dispute resolution, and international litigation. It is an asynchronous online course with two modules per week of recorded video lectures, required readings, and follow up assignments with feedback from the instructors. The course is also available as an elective for JD and other LLM students with permission of instructor.

PLAW 250 Research and Writing on the Rule of Law (3 Credit Hours)
.This course is designed to assist lawyers and other professionals working with the law in developing the techniques of researching and writing in relation to rule of law development. The primary objective of this course is to enable students to apply research skills, which will be instrumental for conducting in depth studies on rule of law development topics for major papers during the PROLAW Program and for the final capstone project. With a focus on development issues, substantial emphasis is given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal and policy analysis, policymaking, and implementation of rule of law development research studies. Students will also gain expertise on how to research and analyze issues from other disciplines that contribute to the processes and dynamics of legal and institutional reform. This knowledge is foundational for developing theories of change and is critical to formulating strategies, plans, and analyses of rule of law advocacy and reform programs.

PLAW 251 Rule of Law Thesis Supervision and Completion (3 Credit Hours)
Open to LLM students only by permission provided by Program Director.

PLAW 252 PROLAW Completion (0 Credit Hours)
Open to: Students within the LLM and MJ programs in Rule of Law for Development (PROLAW program). Students who do not complete their capstone project or thesis paper within the requisite period of time set by the PROLAW Program must register for this course. Permission to register is required.

PLAW 253 Rule of Law Capstone Project (2-3 Credit Hours)
The Rule of Law Capstone Project is the culmination of the student's academic and personal experiences in the PROLAW program. In carrying out the Capstone Project, students will have the opportunity to consolidate everything they have learned in the PROLAW curriculum and reinforce their practical experience in applying this knowledge and skills through a final multi-faceted exercise. The final outcome of this course will enable each student to demonstrate in relation to a specific real-world law and governance reform process that he or she is capable of using what was learned in PROLAW to produce useful and professional documentation and communicate this content to clients and stakeholders effectively. In some cases, students may develop or have a preexisting relationship with an external organization, which provides an opportunity for the student to work on their particular topic. Students may alternatively decide to conduct research and determine the need and feasibility of a possible initiative to address the problem they identify. Likewise, students can also choose to develop a project to implement an existing agenda or initiative at the national or international levels. Each student will be supervised by a Capstone Project advisor.

PLAW 907 Rule of Law Project Management, Monitoring & Evaluation (3 Credit Hours)
This course will analyze the main principles, tasks and tools commonly used to manage a rule of law project, particularly in comparison to other types of project management. Topics will include the control of the timing of various steps in implementation (start up, work planning, activities, monitoring and evaluation, reporting, and close out), human resource management, stakeholder management, procurement, inventory, and budgeting. The course will also address common challenges including managing a project with weak design or insufficient budget, managing conflicts, dealing with emergencies and mid-course corrections, and the key requirements for successful project management, teamwork, accountability, leadership, substantive knowledge and skills, and cultural literacy. Students will have an opportunity to apply their knowledge and skills by working through a model project in teams and producing a sample deliverable on time, on budget, and according to specifications.

Advocacy Certificate

Setting the bar for courtroom-ready skills.

You will benefit from a wealth of expertise as distinguished academics and experienced attorneys teach courses in trial advocacy, appellate advocacy, and dispute resolution. And you'll sharpen your practical skills through externships and clinics. Earning an Advocacy Certificate means you have developed the litigation and dispute resolution skills that will set you apart.

Requirements

To earn the Certificate in Advocacy, you must complete 18 credits from a menu of designated advocacy courses and participate in an advocacy program extracurricular event. You must have an average cumulative GPA of 3.0 or above, or an average grade of B or better in each course of your advocacy certificate curriculum, in order to receive the certificate.

Advocacy Certificate coursework and activities are designed to achieve key learning outcomes and competencies.

Required Courses

[1] Completion of three graded credit hours of Corboy Fellowship or Trial Practice I Applied may substitute for Trial Practice I or Trial Practice II. Completion of six graded credit hours of the Corboy Fellowship or Trial Practice I Applied may substitute for both Trial Practice I and Trial Practice II.

Extracurricular Event

Additionally, you must attend at least one event sponsored by the Advocacy Center, including, but not limited to: conferences, lectures, colloquia, or advocacy competitions (volunteering).

Applying for Your Certificate

After completing all requirements, during your final semester you must complete an online application (https://luclawschool.formstack.com/forms/loyola_university_chicago_school_of_law_application_for_certificate_in_advo for the Certificate in Advocacy. You are required to submit your online application according to the following deadlines:

- Winter graduates: December 1 (Extracurricular Event Attendance can be submitted with your online application or as an amendment by December 15 to ggerardi@luc.edu)
- Spring graduates: March 1 (Extracurricular Event Attendance can be submitted with your online application or by as an amendment by May 1 to ggerardi@luc.edu)

You should submit your online application pursuant to these deadlines even if you are currently enrolled in certificate coursework and/or if you have yet to attend an approved Extracurricular Event. You are required to present a draft of your application to the Registrar during your graduation interview and this Sample Certificate in Advocacy (https://www.luc.edu/media/lucedu/law/centers/advocacy/pdfs/sample_certificate_in_advocacy.pdf) may be helpful in that regard. The Advocacy Center Assistant Director will approve your online application and submit it to the Law School Registrar's Office upon completion of your last semester of schooling.

Please contact the Advocacy Center Assistant Director, Gina Gerardi, at ggerardi@luc.edu with any questions related to the Certificate in Advocacy.

Business Law (LLM)

Professional growth is key to career advancement. The Master of Laws (LLM) in Business Law is a post-JD master's degree program designed for attorneys hungry for greater opportunity. You'll build your insights through interaction with faculty, legal thought leaders, jurists and business professionals.

Knowing what's important to the business community will enhance your learning about regulatory and transactional practice and help you develop advanced skills for advising corporate clients.

Curriculum

Beginning each fall, you can complete the program in just one year on a full-time basis and in two years on a part-time basis. Courses are offered at Loyola's Water Tower Campus. Or, you may choose to take select online courses, after consulting with your advisor.

Degree Requirements

To earn an LLM in Business Law degree, you must complete 24 credits hours, including a thesis paper. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions through our student information system (https://locus.luc.edu/psp/cs92prd/?cmd=login) through guest access.

Learning Outcomes

- Explain all types of business organizations;
- Describe the valuing, capitalization, and organization of a corporation;
- Draft agreements for clients across industries

Child and Family Law (LLM)

What defines a family? How are children's rights evolving? The practice of child and family law requires both a sensitive manner and a discerning legal mind. The Master of Laws (LLM) in Child and Family Law degree program is designed to sharpen and inform both needs. We offer a comprehensive study of the latest in child law trial practice and legislation, international rights for children, adoption law, and domestic violence.

The opportunity to work closely with nationally-recognized faculty members and experienced practitioners in the field means you'll be well-versed in this evolving discipline.

Curriculum

Tailored to meet your background, interests, and professional ambitions, the program may be completed fully online, fully on-campus, or as a hybrid in one year or two years, depending on your pace. The curriculum is designed for maximum flexibility to meet your individual interests and needs. Students in the LLM program may elect to concentrate their studies in traditional family law, child law, or a combination of each.

Courses

You choose from a range of courses including family law, elder law, family finances law, legal marketing, child custody, adoption law, juvenile justice, child welfare, and international child rights. You may wish to create an emphasis within either family law or child law.

Code	Title	Hours

Family Law Concentration

You can choose from a range of courses including family law, elder law, family finances law, and legal marketing

Children's Law Concentration

Loyola's comprehensive curriculum includes child welfare, juvenile justice, child custody, adoption law and international child rights.

Degree Requirements

To earn an LLM in Child Law degree, you must compete a total of 24 hours, including the 3 credit hour LLM thesis. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions through our student information (https://locus.luc.edu/psp/cs92prd/?cmd=login) system through guest access.

Learning Outcomes

You will be able to:

- Conduct complex and specialized legal research and analysis
- Participate in scholarship that contributes to the greater understanding of law and policy as it affects children and families
- Explain how child development and family dynamics influence child and family law and policy
- Compare perspectives on issues facing children and families in a global environment
- Describe the historical, socio-economic and cultural context in which child and family laws, policies and practices are developed and implemented
- Identify and articulate areas in which laws and policies should be improved to promote positive outcomes for children, families and communities
- Identify the unique legal and ethical needs and circumstances of child and adolescent clients

Child and Family Law Certificate

Prepare to defend those least able to defend themselves

If justice for children and their families is driving your passion for the law, the Certificate in Child and Family Law can help focus your studies and your career.

Loyola offers an extensive array of courses in child and family law, including child welfare, domestic violence, juvenile justice and education law. And your participation in the community through legal clinics will provide the "hands-on" experience to help you advocate for those most in need.

Curriculum

There are three requirements for the Child and Family Law Certificate: coursework; practical experience; and extracurricular activities.

You must complete at least 12 credit hours, including two required courses and two electives, in the child and family law curriculum and must receive a grade of B or better in each course.

Courses

Code	Title	Hours
Required Courses		
LAW 601	Child, Family, and the State	
Select One		
Domestic Violence		
Education Law and Policy		
Juvenile Justice		
Electives		
LAW 166	Education Law Practicum	
LAW 198	The Fundamentals of School Law	
LAW 204	Adoption Law Seminar	
LAW 249	Human Trafficking: Advancing Protections for Children Practicum	
LAW 426	Special Education Law and Advocacy	
LAW 602	ChildLaw Trial Practice (Intensive)	
LAW 606	Legislation and Policy Clinic	
LAW 608	Juvenile Justice	
LAW 615	Child and Family Law Mediation	
LAW 620	Childlaw Clinic	
LAW 663	Children's Summer Institute	
LAW 664	Special Education Law	
LAW 678	International Children's Rights	
LAW 679	Children's Health Law and Policy	
LAW 689	Family Law	
LAW 717	Mental Health Law	
LAW 760	Disability Law	

Practical Experience

To earn the certificate, you must complete at least one experiential learning requirement. This experience may be satisfied through participation in the ChildLaw Clinic,[1] ChildLaw Policy and Legislation Clinic,[1] or other "hands-on" experience in the field of child and family law. Volunteer/internship/employment experiences must be approved in advance.

[1] One semester of Clinic experience cannot be used to satisfy both the coursework and practical experience requirements. Students, however, may meet both requirements by taking two semesters of either of the two Clinics, or alternatively, by successfully completing one semester each of the Civitas Child Law Clinic and the ChildLaw Policy and Legislation Clinic.

Extracurricular Activities

Additionally, you must participate in six or more activities sponsored by the Civitas ChildLaw Center, including attendance at conferences, symposia, the weekly Coffee Talk Series, etc. Participation as a member of the Children's Legal Rights Journal counts as one extracurricular activity. Students should keep a record of their fulfillment of this requirement, which will be verified by the Program Coordinator. Students should meet with the Coordinator over the course of law school to confirm that their activities meet this requirement.

Applying for your Certificate

After completion of all requirements, you must complete an application (https://www.luc.edu/media/lucedu/law/registrar/pdfs/certificate/Application%20for%20Certificate%20in%20Child%20and%20Family%20Law.pdf) for the Certificate in Child and Family Law.

Child Development with the Erikson Institute (MJ/MS)

Loyola offers an online MJ in Children's Law in conjunction with Erikson Institute's MS in Child Development degree with specialized online training in children's law and policy. Students are eligible to receive dual degrees after completing 38 credits in the Erikson MS in Child Development program and 18 credits in the Loyola online MJ in Children's Law over 3 years.

For more information on the MS in Child Development, visit Erikson Institute (https://www.erikson.edu).

This program has been discontinued. No new admits are being accepted.

MJ in Children's Law Requirements

Code	Title	Hours
LAW 665	Introduction to the Study of Law and Legal Systems	2
LAW 667	Introduction to Children's Law , Policy and Practice	2
LAW 663	Children's Summer Institute	3
LAW 668	Leadership Development	4
Law Course Electives		8

Students should consult Erikson Institute (https://www.erikson.edu) for MS in Child Development requirements.

Children's Law and Policy (MJ)

Advocating for children and families takes more than a good heart. You need a firm understanding of the law and an ability to function effectively in the legal system.

The Master of Jurisprudence (MJ) in Children's Law and Policy is a degree program tailored to help nonlegal professionals better serve children and families. Whether your field is social work or education, health care or law enforcement, a deeper knowledge of family law enables you to make a difference while it prepares you for a leadership position.

Curriculum

The online MJ program is designed to be completed in 2 calendar years by taking 4-6 credits in each of 6 consecutive terms (including summers). In terms 3-5, you will complete six elective courses of your choosing.

Code	Title	Hours
Required Courses		
LAW 665	Introduction to the Study of Law and Legal Systems	2
LAW 667	Introduction to Children's Law , Policy and Practice	2
LAW 668	Leadership Development	4
LAW 677	ChildLaw Thesis/Capstone	4

	Total Hours	**30**

Education Immersion Weekends

In addition to the required curriculum, you are required to travel to Loyola's Chicago campus at least once during your program for an Education Immersion Weekend (EIW). During the weekend, students gather in person to workshop or present their thesis/capstone project, attend workshops, participate in graduation activities, and meet with faculty, students and alumni.

Degree Requirements

To earn your degree, you must complete 30 credit hours of coursework, including the Capstone Project and one Education Immersion Weekend. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions through our student information system (https://locus.luc.edu/psp/cs92prd/?cmd=login) through guest access.

Learning Outcomes

You will be able to:

- Articulate substantive and procedural laws of relevance to child-serving professionals
- Participate in various forms of legal research, including electronic research
- Analyze statutes, rules, and cases in the field of child and family law
- Write analytically sound and persuasive documents (letters, memoranda, reports, etc.) appropriate to the goals of child-serving professionals
- Analyze and apply professional leadership skills

Competition and Consumer Protection Law Certificate

Competition is vital to the global economy

Consumers and competitors rely on antitrust and consumer protection laws to promote and protect competition. Loyola's competition and consumer protection law curriculum will empower you to understand and advocate for checks and balances on economic power. Your coursework will complement the extracurricular activities and practical experience you will gain as part of the certificate program.

Curriculum

There are three requirements for the JD Certificate in Competition and Consumer Protection Law: coursework; practical experience; and extracurricular activities.

Coursework

To be eligible for the JD Certificate, you must complete at least 12 credits in the competition and consumer law curriculum, including two required courses, and must receive a grade of B or better in each course. Students should monitor their progress on the Competition and Consumer Protection Law Certificate Application by completing curricular counseling each year.

Courses

Code	Title	Hours
Required Courses		**5-6**
LAW 254	Consumer Law	
LAW 375	Antitrust	
Electives		**6-7**
LAW 126	Corporate Compliance Programs	
LAW 164	Mergers and Acquisitions	
LAW 176	International Trade Law	
LAW 185	Business and the Law (Online) [1]	
LAW 221	Administrative Law	
LAW 233	Bankruptcy	
LAW 244	Cyberlaw	
LAW 270	Business Organizations	
LAW 333	Law and Economics	
LAW 355	Privacy Law	
LAW 371	International Business Trans	
LAW 377	Intellectual Property Law	
LAW 592	Independent Research (the topic must be approved by the Institute's Director)	
LAW 718	Food and Drug Law	
LAW 725	Antitrust Health Care Field	
LAW 838	European Union Privacy Law (Online) [1]	
LAW 866	Antitrust & Intellectual Property	

[1] Subject to administrative approval for campus JD students to enroll in these courses.

JD students may also be able to count other campus or online coursework toward the JD Certificate in Competition and Consumer Protection Law with permission of the Institute's Director or Associate Director.

Practical Experience

Each student must complete a Consumer Protection/Antitrust Law Externship or clinical or work experience. All clinical experiences and volunteer/employment experiences must be approved in advance. Pre-approved paid work, work as a research assistant, or volunteer work all count toward the experiential requirement. Alternatively students may hold Consumer Law Review positions.

Extracurricular Activities

Second and third year students must attend at least 2 competition and consumer protection law events per academic year, including speakers and conferences.

Applying for Your Certificate

After completion of all requirements, you must complete an application (https://www.luc.edu/media/lucedu/law/centers/antitrust/pdfs/Application_for_Certificate_Competition_Law.docx) for the Certificate in Competition and Consumer Protection Law. Submit your application to the Institute's Associate Director for approval, who will then submit the application to the Registrar.

Compliance and Enterprise Risk Management (LLM)

Government and industry operate in a complex world of rules. Your skills in navigating the latest regulations and related compliance can help you map a strong career opportunity.

The Master of Laws (LLM) in Compliance & Enterprise Risk Management is a post-JD master's degree program tailored for attorneys seeking to develop or sharpen a special expertise in transactional law or compliance. You'll learn the practical skills for advising clients on best practices across a wide range of industries. Should you choose to focus in compliance, through our accredited program you will be eligible to receive a Certificate in Compliance, enabling you to sit for compliance industry examinations.

Curriculum

Coursework (https://www.luc.edu/media/lucedu/law/academics/cerm_llm_course_overview.pdf) offers in-depth training in compliance, including courses in business planning, securities regulation, corporate compliance, and the Foreign Corrupt Practices Act. You can complete the program online in two years as a part-time student. The program begins three times each year in the fall, spring, and summer.
