[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

School of Law - Classes Offered at the John Felice Rome Center

Code	Title	Hours
PLAW 101	Comparative and Ethical Lawyering for the Rule of Law	3

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the

Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Psychology/Applied Social Psychology (BS/MA)

The five-year program in applied social psychology allows students to earn both the BS in Psychology (p. 593) and the MA in Applied Social Psychology (https://catalog.luc.edu/undergraduate/arts-sciences/psychology/psychology-applied-social-psychology-bsma/) degrees in five years. Completing both degrees in five years saves students approximately one year of study.

Graduates of the program obtain skills in basic and applied research methodology, advanced training in statistics and a strong knowledge base for theory and research in social psychology.

If you have additional questions about the program please contact Dr. Scott Tindale (rtindal@luc.edu) (Graduate Program Director).

CURRICULUM

The five-year degree in applied social psychology requires the completion of 120 hours of undergraduate coursework toward the BS in Psychology and the completion of 30 hours of graduate coursework toward the MA in Applied Social Psychology. Twelve hours of the graduate coursework also fulfill requirements for the undergraduate degree. The total number of required hours is 138. Successful completion of the MA degree also requires an empirical thesis.

Students must complete a majority of the requirements for the BS in Psychology (p. 593) and the University Core Curriculum (p. 1212) before applying to the five-year program. Recommended undergraduate courses include:

Code	Title	Hours
Recommended Courses		
PSYC 275	Social Psychology	3
PSYC 310	Lab in Program Evaluation	3
PSYC 321	Laboratory-Social Psychology	3
PSYC 362	Industrial/Organizational Psychology	3

PSYC 381	Advanced Statistical Analysis-Computer:Social Science	3
Total Hours		**15**

Students begin taking graduate courses in their senior year and complete the program in their 5th year.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be

included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Acquisition of research and publication skills that will allow students to pursue an applied job after completing the program

Psychology/International Affairs (BS/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BS/MA in Psychology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BS/MA in Psychology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BS, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

According to Graduate School guidelines, undergraduate students admitted to an accelerated BS/MA program will be able to apply up to 12 semester hours (four classes) earned toward the Bachelor's degree to satisfy the 30 semester hours (ten courses) required for the MA in International Affairs. The 12 hours must be 400- or 500-level graduate-level courses that they take in their senior year.

Required Core Classes: All students will take the following four International Affairs classes. These core courses, which will be offered on an annual basis, are designed to provide entering students from a variety of interdisciplinary backgrounds with a common experience in research methods, an introduction to comparative political systems and international relations, and a capstone experience.

Code	Title	Hours
Required BS Courses		
PSYC 101	General Psychology	3
PSYC 201	Psychology Advising and Career Development	1

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Public Health (BS/MPH)

Earn your bachelor's degree and master's degree in five years.

Grounded in the basic sciences with an emphasis on population health, the Bachelor of Science in Public Health (BSPH) program prepares students for positions in fields such as health education, epidemiology, and environmental health across nonprofit, industry, and government sectors. Inspired by Loyola's Jesuit tradition of social justice and freedom of inquiry, the Master of Public Health (MPH) program prepares students to improve population health and promote health equity with three MPH study tracks: Public Health Policy and Management, Epidemiology, and Global Health Equity.

CURRICULUM

Students accepted into this program take up to four 3-credit graduate-level MPH courses (12 credits total) during their senior year, including:

- MPBH 403 Introduction to Epidemiology
- MPBH 407 Public Health Policy: Concepts and Practice
- MPBH 414 Introduction to Global Health or MPBH 417 Global Maternal & Child Health

Plus one of the following courses:

- ENVS 480 Introduction to Geographic Information Systems
- MPBH 400 Determinants of Population Health
- MPBH 402 Public Health Practice and Management

BSPH/MPH students complete the remainder of their MPH curriculum within approximately 12 months after their senior year.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Beginning with courses in ethics, environmental sciences, biology, mathematics, social sciences, and the humanities alongside epidemiology, biostatistics, health behavior and health promotion, and public health policy gained in the undergraduate public health program, students will graduate with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking.

Secondary Education/International Affairs (BSEd/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BSEd/MA in Secondary Education and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSEd/MA in Secondary Education and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BSEd, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. In Loyola's Bachelor of Science in Secondary Education program, you'll earn a bachelor's degree in Secondary Education and a bachelor of science or bachelor of arts in an additional subject area. You'll obtain licensure to teach in English, History, Mathematics, Political Science, or Psychology. Students choosing Political Science or Psychology as their additional subject area are also required to complete a minor in History.

For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

According to Graduate School guidelines, undergraduate students admitted to an accelerated BSEd/MA program will be able to apply up to 12 semester hours (four classes) earned toward the Bachelor's degree to satisfy the 30 semester hours (ten courses) required for the MA in International Affairs. The 12 hours must be 400- or 500-level graduate-level courses that they take in their senior year.

Required Core Classes: All students will take the following four International Affairs classes. These core courses, which will be offered on an annual basis, are designed to provide entering students from a variety of interdisciplinary backgrounds with a common experience in research methods, an introduction to comparative political systems and international relations, and a capstone experience.

International Affairs MA Requirements		
Core		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives [3]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**83**

1. For Secondary Education and English majors only.
2. For Secondary Education with either English or Mathematics only.
3. Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

All of Loyola's Bachelor of Science in Education (BSEd) degrees use the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as their foundation. TLLSC is an approach that will help you stand out when you're searching for your first job.

The TLLSC curriculum focuses on hands-on learning. Your studies will be built around four Cornerstones—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

As you learn and grow, you'll progress through the three Phases (https://www.luc.edu/education/academics/areasofstudy/teachinglearningandleadingwithschoolsandcommunities/bsedprogramphases/)of the program. These phases will guide you through a comprehensive experience that will prepare you to make a difference with learners in diverse settings.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of

Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list (https://www.luc.edu/politicalscience/maia/electivecourses/). Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses (https://www.luc.edu/politicalscience/maia/electivecourses/) to see whether the course can serve as an elective.

College of Arts and Sciences

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

School of Law - Classes Offered at the John Felice Rome Center

Code	Title	Hours
PLAW 101	Comparative and Ethical Lawyering for the Rule of Law	3
PLAW 102	History, Theory and Practice of Rule of Law for Development	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

English Subject Area

Course	Title	Hours
Year One		
Fall		
TLSC 300A	Professional Learning Communities	0
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
UCWR 110	Writing Responsibly	3
CORE	Historical Knowledge Tier I	3
ENGL	English Major Course	3
UNIV 101	First Year Seminar	1
Submit required documentation and background check prior to program entry		
	Hours	**14**
Spring

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been

admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Social Work (BSW/MSW)

The School of Social Work BSW/MSW Accelerated Bachelor's/Master's program offers an excellent social work curriculum with a strong liberal arts base, and a wide range of opportunities for practical experience.

This program allows full-time students to complete both an undergraduate and graduate degree in social work in just five years.

CURRICULUM

During the fifth year, students will select one of two specializations offered in the MSW program. Students can choose from the Micro Practice Specialization or the Leadership, Mezzo, and Macro Practice Specialization.

Note: All BSW students must submit an application for the five-year program in their senior year.

Code	Title	Hours
BSW Requirements [1]		
SOWK 200	Introduction to Social Work	3
SOWK 301	Practice Skills with Individuals and Families	3
SOWK 302	Integrated Micro/Mezzo/Macro Theory and Practice	3
SOWK 303	Group Work Practice in Social Work: Micro/Mezzo/Macro	3
SOWK 305	Life Span Development, Human Behavior, Trauma, & Theory	3
SOWK 307	Social Work Policy and Community Intervention	3
SOWK 330	Field I and Simulated Experience	3.5
SOWK 340	Field II and Simulated Experience	3.5
SOWK 350	Preparation for Practice	3
SOWK 362	Field Seminar Foundation Level	1
SOWK 370	Power, Oppression, Privilege, and Social Justice	3
SOWK 380	Assessment of Client Concerns in Context	3

SOWK 390	Research and Evaluation in Social Work Practice	3

SOWK 652	Organizations, Program Development, and Evaluation	
SOWK 653	Community Organizing and Policy Practice	
Electives		
All students will choose to take two electives. Any 600 or 700-level course may be considered an elective.		6
Total Hours		**61**

[1] 15 credit hours are required for social science courses. (PSYC 101 General Psychology, SOCL 101 Society in a Global Age + 9 credits of social science electives)

[2] Course Options (p. 1979)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Micro Practice Specialization

Course	Title	Hours

Internship

Students complete one internship during the fifth year for a total of 600 hours. The internship is aligned with the student's area of specialization.

Specializations and Tracks

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1976)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1978)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1981)
  - Migration Studies Track (p. 1983)
  - Schools/Professional Educator License (PEL) Track (p. 1985)

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1212) area.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide

by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

MSW Program Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Police Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;

- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Sociology (BA/MA)

The Sociology Department offers a 5 year BA/MA degree, allowing you to begin graduate school in your senior year, and to finish the MA degree at the end of your 5th year. This is a wonderful opportunity to gain an advanced degree without the time and expense of the longer 2 year MA degree offered by most programs. This is approximately one year less than normally required to earn both degrees. Graduates of this program

will be well prepared to enter the labor force, a professional school or pursue a PhD.

CURRICULUM

Bachelor of Arts Degree (Years 1-4)

- 15 sociology courses x 3 hours = 45 out of 120 hours required to graduate
- Of the 15 sociology courses, only two may be 100-level; the student must take all required courses in the BA sequence: SOCL 205 Sociological Thought, SOCL 206 Principles of Social Research, SOCL 301 Statistics for Social Research, SOCL 365 Social Theory & Social Research.
- At least four of the fifteen courses must be graduate-level (400 or higher) courses taken in the senior year.
- Students who earn a grade of B or better in both courses will qualify for distinction in the undergraduate major, even though the courses also count toward the MA degree.
- If the student intends to do the applied MA track, she/he is advised not to take the undergraduate internship (SOCL 380 Internship) but to take the graduate internship instead (SOCL 494 Internship).
- *The BA/MA program requires four more sociology courses than the eleven normally required for a BA sociology major. The four extra courses must be graduate-level courses. Consequently, BA/MA students will have four fewer nonsociology electives than ordinary BA students.*

Master of Arts Degree (Year 5)

During the fifth year, students will take 6 graduate-level sociology courses (both elective and required) x 3 hours = 18 hours out of 30 hours required for the MA degree. Either a thesis or portfolio is required. Only one independent research/directed study course counted toward MA.

General Track

Code	Title	Hours

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

General Track MA Learning Objectives

This degree prepares students for positions as research staff in government, non-profit, and for profit sectors. The General Track also prepares students for application to Ph.D. programs.

Research learning outcomes:

- identify the broad theoretical orientations of the discipline
- frame sociological research questions
- synthesize social scientific literature
- select appropriate data sources
- collect and present data in accordance with ethical and professional standards
- use one or more data collection methods to carry out a research project, such as interviews, participant observation, surveys, or archival evidence
- analyze quantitative or qualitative data
- write a sociological research report

Track II: Applied Master of Arts (MA)
Applied Track MA Learning Outcomes

This degree prepares students for positions as program directors or staff in government, non-profit, and for-profit sectors.

Research learning outcomes:

- apply sociological knowledge to governmental, non-profit, or for-profit organizational activities

- contribute to the work of a governmental, non-profit, or for-profit organization through an internship
- frame a research question relevant to an organization
- select appropriate data sources
- collect and present data in accordance with ethical and professional standards
- use one or more data collection methods, such as interviews, participant observation, or surveys
- analyze quantitative or qualitative data
- write a sociologically-informed report that is relevant to an organization

Sociology/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Sociology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Sociology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

According to Graduate School guidelines, undergraduate students admitted to an accelerated BA/MA program will be able to apply up to 12 semester hours (four classes) earned toward the Bachelor's degree to satisfy the 30 semester hours (ten courses) required for the MA in International Affairs. The 12 hours must be 400- or 500-level graduate-level courses that they take in their senior year.

Required Core Classes: All students will take the following four International Affairs classes. These core courses, which will be offered on an annual basis, are designed to provide entering students from a variety of interdisciplinary backgrounds with a common experience in research methods, an introduction to comparative political systems and international relations, and a capstone experience.

Code	Title	Hours
Sociology BA Requirements		
Required Courses		
SOCL 205	Sociological Thought [1]	3
SOCL 206	Principles of Social Research	3
SOCL 301	Statistics for Social Research	3
SOCL 365	Social Theory & Social Research [2]	3
Electives		
Complete seven total electives; five must be from SOCL 210-SOCL 380. [3,4,5]		21
International Affairs MA Requirements		
Required Courses		
CORE		
INTA 475	Political Analysis I	3
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
Capstone Experience		3
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives [6]		
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		18
Total Hours		**63**

1. Any Sociology 100-level course is considered to be a prerequisite for SOCL 205 Sociological Thought, except by special permission of the instructor.
2. SOCL 205 Sociological Thought, SOCL 206 Principles of Social Research, and SOCL 301 Statistics for Social Research are prerequisites for SOCL 365 Social Theory & Social Research. These courses provide social science students with the theory and methodology background needed for more advanced work.
3. Only one semester of SOCL 380 Internship may be counted toward the major (although this is a six credit hour course, it counts as one course).
4. In choosing electives, majors should consult with their department advisor. One course from another social science may be substituted with departmental permission.
5. A list of all Sociology (SOCL) course descriptions can be found here (p. 2616).
6. Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Program Evaluation and Research	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate

major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields

- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Software Engineering (BS/MS)

The BS/MS programs in Information Technology, Software Engineering, and Computer Science are five-year programs that give academically successful Loyola undergraduates the opportunity to pursue the MS degree in Information Technology, Software Engineering, or Computer Science while completing their BS degree. The applicant can be pursuing any of the BS degrees offered by the Department of Computer Science, including the joint majors with Mathematics or Physics or the interdisciplinary Bioinformatics.

These programs reduce the total number of courses needed and the total time needed for the combined degrees.

Students may not automatically enroll in the BS/MS program during Freshman admission. They must specifically apply to the Graduate School, generally in their Junior year by using The Graduate Application Form (https://gpem.luc.edu/apply/). See Application Requirements (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-requirements) and Application Information (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-information) for more details.

CURRICULUM

The stand-alone MS programs each require 30 credits of graduate courses. This generally takes one and a half years to complete. BS/MS students must also take 30 credits of courses at the 400 level or greater. The main advantages come from the fact that some of the MS courses may be double-counted, applying to the BS also, and there can be a shift in some of the required MS courses based on what students took in the BS portion. In particular students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses for both their BS and MS degrees. Each must be a 400 level course taken in the student's senior year *in place* of a 300 level major course. Also, a student wishing to take 123 or more credits while an undergraduate, can have 3 of the extra credits be for a fourth 400 level COMP course, and count that toward the MS if the extra course is needed for *no* undergraduate requirement, from the university, college, core, major or minor. Hence a BS/MS student with 120 credits and 9 400-level COMP credits counted for the BS is required to take only 21 credits (instead of 30 credits) of additional 400-level courses. If a student takes a further 3-credit 400 level COMP course beyond the 120 credits needed for the BS, then only 18 further credits are needed. In either case, students can finish the program in five years. Some further special rules:

1. All students need to take COMP 271 Data Structures I as part of their undergraduate major.
2. Students pursuing an MS in Software Engineering or Computer Science must take COMP 313 Object-Oriented Design by their senior year.
3. Students may take at most 6 credits total of internship at the undergraduate and graduate level, COMP 391 Internship in Computer Science plus COMP 499 Internship.
4. A student with credit for a 300 level COMP course that was taught in a combined class with a 400 level course may not take the 400 level course later for separate credit without permission from the Graduate Program Director. In particular for students with credit for COMP 317 Social, Legal, and Ethical Issues in Computing, the MS requirement for COMP 417 Social and Ethical Issues in Computing is waived, to be replaced by 3 MS elective credits. Similarly, in programs requiring COMP 413 Intermediate Object-Oriented Development, COMP 313 Object-Oriented Design will satisfy the requirement, but still, the course will need to be replaced by 3 MS elective credits.
5. In MS programs with restricted electives lists with two or more courses required from a larger explicit list, one of the courses may be waived if the corresponding 300 level undergraduate course was successfully completed at Loyola. The course must still be replaced by a 3-credit MS program elective.
6. All further individual MS program requirements must be met with the inclusion of the allowed 400 level courses taken as an undergraduate.

REQUIREMENTS FOR COMPLETION OF THE BS/MS PROGRAM

After admission to the BS/MS program, a student may request to be registered in their senior year for up to four 400 level COMP courses, with three of them replacing undergraduate major courses, and a fourth *if* the student will graduate with at least 123 credits and not need the fourth course as a part of *any* undergraduate requirement. Students generally take the remainder of their 30 credits of 400-level MS classes during their fifth year. This schedule can be modified for students with AP or transfer credit who desire to finish the combined program in less than five years. Students in the program are expected to consult regularly with the Graduate Program Director to ensure that they are on track for completion of both the BS and MS degrees. The following are required to complete a BS/MS degree program:

- Successful completion of one of the BS degrees in the Department of Computer Science or Bioinformatics or a joint major with Mathematics or Physics
- The 400-level graduate courses, excluding those counted while an undergraduate, completed with a GPA of 3.0 or higher

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be

higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

Special Education/International Affairs (BSEd/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BSEd/MA in Special Education and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSEd/MA in Special Education and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BSEd, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

According to Graduate School guidelines, undergraduate students admitted to an accelerated BSEd/MA program will be able to apply up to 12 semester hours (four classes) earned toward the Bachelor's degree to satisfy the 30 semester hours (ten courses) required for the MA in International Affairs. The 12 hours must be 400- or 500-level graduate-level courses that they take in their senior year.

Required Core Classes: All students will take the following four International Affairs classes. These core courses, which will be offered on an annual basis, are designed to provide entering students from a variety of interdisciplinary backgrounds with a common experience in research methods, an introduction to comparative political systems and international relations, and a capstone experience.

Optional Courses		
TLSC 231	Integrated Teaching/Learning Science & Writing in Elementary Grades	
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	
International Affairs MA Requirement		
Core		

INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives [1]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**100**

[1] Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

All of Loyola's Bachelor of Science in Education (BSEd) degrees use the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as its foundation. It's an approach that will help you stand out when you're searching for your first job.

The TLLSC curriculum focuses on hands-on learning. Your studies will be built around four Cornerstones—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

As you learn and grow, you'll progress through the three Phases (https://www.luc.edu/education/academics/areasofstudy/teachinglearningandleadingwithschoolsandcommunities/bsedprogramphases/) of the program. These phases will guide you through a comprehensive experience that will prepare you to make a difference with learners in diverse settings.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list (https://www.luc.edu/politicalscience/maia/electivecourses/). Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses (https://www.luc.edu/politicalscience/maia/electivecourses/) to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Spring		
TLSC 300B	Professional Learning Communities	1
TLSC 380	Teaching, Learning and Leading with Schools and Communities Internship: Student Teaching	12
Must have passed any Content Area Tests prior to Sequence 8 Student Teaching		
Must pass edTPA		
Two (2) International Affairs Courses [1]		6
	Hours	**19**
Year Five		
Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
Spring		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**146**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that

indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Statistics/Applied Statistics (BS/MS)

CURRICULUM

AP Credit Policies (p. 465)

Total Hours		**78**

The BS degree has waivers for both Quantitative and Scientific core.

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

Theology (BA/MA)

The BA/MA program is jointly administered by the Theology Department Undergraduate Program and Graduate Program Directors.

BA Requirements

Curriculum

At least five (5) of the 12 courses required for the major must be at the 300-level or higher.

Code	Title	Hours
Doctrine Course [1]		
Select one of the following:		3
THEO 100	Christian Theology	
THEO 265	Sacraments and the Christian Imagination	
THEO 266	Church & Global Cultures	
THEO 267	Jesus Christ	
Bible, Hebrew Bible/Old Testament Course		
Select one of the following:		3
THEO 231	Hebrew Bible/Old Testament	
or THEO 232	New Testament	
THEO 302	Wisdom Literature and Psalms	
THEO 303	Pentateuch	
THEO 304	Israel Conquest to Exile	
Bible, New Testament Course		
Select one of the following:		3

THEO 232	New Testament	
THEO 311	The Meaning of Jesus Christ	
THEO 313	Gospels of Matthew, Mark & Luke	
Christian Thought Course		
Select one of the following:		3
THEO 317	Christian Thought: Ancient-Medieval	
THEO 318	Christian Thought: Reformation to Modern	
Non-Christian Religious Tradition Course		
Select one of the following:		3
THEO 107	Introduction to Religious Studies	
THEO 169	Taoism	
THEO 272	Judaism	
THEO 282	Hinduism	
THEO 295	Islam	
THEO 297	Buddhism

Select one of the following:		3
THEO 185	Christian Ethics	
THEO 186	Global Religious Ethics	
THEO 192	Topics in Moral Problems	
THEO 203	Social Justice and Injustice	
THEO 204	Religious Ethics and the Ecological Crisis	
THEO 293	Christian Marriage	
THEO 340	Foundations of Christian Morality	
THEO 342	Perspectives on Life and Death	
THEO 343	Contemporary Christian Sexuality	
THEO 344	Theology and Ecology	
Theology Capstone		
THEO 373	Theology Capstone [2]	3
Elective Courses		
Select five elective courses [3]		15
Any THEO 200-level or higher course		
CATH 296	All Things Ignatian: Living and Learning in the Jesuit Trad	
Total Hours		**36**

[1] Eligible students may substitute HONR 101 Western Traditions - Antiquity to the Middle Ages/HONR D101 Developments Western Thought I Discussion for Doctrine requirement.

[2] With prior approval from the undergraduate program director, students may replace THEO 373 Theology Capstone with THEO 353 Religious Traditions.

[3] With prior approval from the undergraduate program director, up to two elective courses may be taken outside the Department of Theology. Courses used for other Theology major requirements cannot be used as electives.

THEO 280 Theology & Interdisciplinary Studymay be taken to fulfill a major requirement, depending on the course topic. Please consult your department for more information.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Freshman		
Fall		
Doctrine Course (THEO 100)		3
Ethics Course (THEO 185)		3
	Hours	**6**
Spring		
Non-Christian Traditions Course		3
THEO 231 or THEO 232	Hebrew Bible/Old Testament or New Testament	3
	Hours	**6**
Sophomore		
Fall		
THEO 232 or THEO 231	New Testament (whichever one not taken) or Hebrew Bible/Old Testament	3
THEO 200-Level or higher Course		3
	Hours	**6**
Spring		
THEO 200-Level or higher Course		3
THEO 300-Level or higher Course		3
	Hours	**6**
Junior		
Fall		
THEO 300-Level or higher Course [1]		3
	Hours	**3**
Spring		
THEO 300-Level or higher Course [1]		3
	Hours	**3**
Senior		
Fall		
THEO 300-Level or higher Course		3
	Hours	**3**
Spring		
THEO 373	Theology Capstone	3
	Hours	**3**
	Total Hours	**36**

[1] Students may take THEO 317 Christian Thought: Ancient-Medieval or THEO 318 Christian Thought: Reformation to Modern in this term.

Transfer-Student Residency Requirement

At least 18 credit hours of THEO-BA requirements must be completed at Loyola

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1212) area.

THEO 280 Theology & Interdisciplinary Studymay be taken to fulfill a major requirement, depending on the course topic. Please consult your department for more information.

MA Requirements

Curriculum

The Master of Arts in Theology requires 30 credit hours of coursework and a comprehensive examination. Students may choose to concentrate in one of four areas: Theological Studies, Biblical Languages and Literature, Biblical Studies, or Christian Ethics. There is also an option to add an Education minor.

Concentrations

Theological Studies

This concentration emphasizes exposure to the full range of theological investigation.

Code	Title	Hours
Required Courses		
Two courses in Biblical Studies		6
Two courses in Systematic or Historical Theology		6
Two courses in Christian Ethics		6
Four Graduate Electives		12
Total Hours		**30**

Biblical Languages and Literature

The concentration in Biblical Languages and Literature provides students with the initial language and biblical study necessary to apply to doctoral programs in Biblical Studies. Half of the coursework is in biblical Greek and Hebrew. This concentration requires an additional 6cr hours due to intensive language requirements.

Code	Title	Hours
Required Courses		
Four courses in Major Biblical Language (Hebrew or Greek)		12
Two courses in Minor Biblical Language (Hebrew or Greek)		6
Two courses in Old Testament		6
Two courses in New Testament		6
One course in Systematic or Historical Theology		3
One course in Christian Ethics		3
Total Hours		**36**

Biblical Studies

This concentration is suited to students with a particular interest in Biblical Studies, but does not incorporate the language study necessary for doctoral work in Biblical Studies.

Code	Title	Hours
Required Courses		
Five courses in Biblical Studies		15
One course in Systematic or Historical Theology		3
One course in Christian Ethics		3
Three Graduate Electives		9
Total Hours		**30**

Christian Ethics

This concentration is similar to the concentration in Theological Studies, but requires more coursework in Christian Ethics.

Code	Title	Hours
Required Courses		
Five courses in Christian Ethics		15
Two courses in Systematic of Historical Theology		6
Two courses in Biblical Studies		6
One Graduate Elective		3
Total Hours		**30**

Bioethics & Health Care Policy

The concentration in Bioethics and Health Care Policy is offered jointly with the Neiswanger Institute for Bioethics and Healthcare Leadership. This concentration is appropriate for students interested in pursuing a social ethical understanding of bioethics. Courses in this concentration address the history of bioethics including the issues of racism and eugenics; methods and approaches in medical ethics and bioethics (ethnography, narrative bioethics, feminist bioethics); and topics in bioethics such as reproductive medicine and reproductive justice, genetics, disability ethics, spiritual care ethics, end of life, and healthcare justice.

Code	Title	Hours
Required Courses		
BEHL 401	Clinical Topics in Bioethics	3
Two courses in Christian Ethics		6
Two courses in Biblical Studies		6
Three courses in Bioethics [1]		9
Two courses in Systematic or Historical Theology		6
Total Hours		**30**

[1] One course in Bioethics may be taken at the Neiswanger Institute.

Graduate Courses by Area

Theology courses are divided into sub-fields as follows. There are also directed readings and independent studies options that are open for application to particular areas of study.

Biblical Studies

Code	Title	Hours
THEO 401	Tutorial in Biblical Studies	3
THEO 403	Topics in Rabbinic & Medieval Literature	3
THEO 404	History of Israel	3
THEO 405	Formation of The Pentateuch	3
THEO 406	Basic Hebrew Grammar	3
THEO 407	Hebrew Exegesis	3
THEO 418	Theological Prophets-Ancient Israel	3
THEO 420	Seminar	3
THEO 421	Directed Reading in Bible Studies	1-3
THEO 422	Directed Reading in Bible Studies	3
THEO 424	The Synoptic Gospels	3
THEO 425	Luke-Acts & New Testament Church	3
THEO 427	St Paul's Contribution to Christianity	3
THEO 429	Person of Jesus in New Testament	3
THEO 515	Gospels in Early Christianity	3
THEO 517	Early Christian Letters	1-12
THEO 519	Latr Nt-Subapost Writ	3
THEO 523	Cultural-Religious Environment Early Christianity	3
THEO 527	Various Community Early Christianity	3

Theology

Code	Title	Hours
THEO 436	Christology	3
THEO 437	Mystery of God in Christian Theology	3
THEO 440	Seminar in Systematic Theology	1-12
THEO 441	Directed Reading in Systematic Theology	3
THEO 447	Philosophical Theology	3
THEO 449	Phenomenology of Religion	3
THEO 459	Contemporary Theology	1-12
THEO 460	Seminar in History of Theology	1-12
THEO 461	Directed Readings in History of Theology	3
THEO 464	Religion & Politics in Christian History	3
THEO 530	Seminar - Variable Titles	1-12
THEO 536	Christian Doctrine-Catholic Theology	3
THEO 560	Contemporary Authors	1-12
THEO 570	Fundamental Issues in Christian Ethics	1-12

Ethics

Code	Title	Hours
THEO 470	Foundations Crititical Issues Theological Ethics	1-12
THEO 475	Natural Law & Theological Ethics	3
THEO 477	Feminist Issues in Theology and Ethics	3
THEO 478	Issues in Medical Ethics	3
THEO 480	Seminar in Christian Ethics	1-12
THEO 481	Directed Readings Christian Ethics	3
THEO 573	Roman Catholic Ethics	3
THEO 575	Religious Ethics and Social Theory	3
THEO 580	Christian Social Ethics	3
THEO 585	Issues Applied Theology Ethics	3

Education Minor

Students seeking an MA in any of our four concentrations can pursue a minor in Education. This option is excellent preparation for those who plan to teach theology at the high school level, where candidates with a combination of academic theological training and teacher training are in high demand.

Required Courses

Code	Title	Hours
CIEP 414	Instructional Methods-Diverse Population	3
CIEP 423	Advanced Literacy Instruction in the Content Area	3
CIEP 425	Theory and Practice in Assessment	3
CIEP 458	Classroom Management	3

For those students who choose this option, the Theology Department will recognize two of these four required School of Education courses as fulfilling two electives in the MA program. The other two School of Education courses are in addition to the usual MA course requirements. Students frequently take these additional two courses during the summer.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students

in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

Theology/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Theology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Theology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

According to Graduate School guidelines, undergraduate students admitted to an accelerated BA/MA program will be able to apply up to 12 semester hours (four classes) earned toward the Bachelor's degree to satisfy the 30 semester hours (ten courses) required for the MA in International Affairs. The 12 hours must be 400- or 500-level graduate-level courses that they take in their senior year.

Required Core Classes: All students will take the following four International Affairs classes. These core courses, which will be offered on an annual basis, are designed to provide entering students from a variety of interdisciplinary backgrounds with a common experience in research methods, an introduction to comparative political systems and international relations, and a capstone experience.

Code	Title	Hours
Required BA Courses		
Entry Level Courses		
Doctrine		
Select one of the following:		3
THEO 100	Christian Theology	
THEO 265	Sacraments and the Christian Imagination	
THEO 266	Church & Global Cultures	
THEO 267	Jesus Christ	
Biblical Literature		
THEO 231	Hebrew Bible/Old Testament	3
or THEO 232	New Testament	
Religious Traditions and Practices		
Select one of the following:		3
THEO 107	Introduction to Religious Studies	
THEO 272	Judaism	
THEO 276	Black World Religion	
THEO 278	Religion & Gender	
THEO 279	Roman Catholicism	
THEO 281	Christianity Through Time	
THEO 282	Hinduism	
THEO 295	Islam

Elective Courses		
Select five elective courses [3]		9
Required MA Courses		
CORE		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Elective Courses [2]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**60**

1. With prior approval from the undergraduate program director, students may replace THEO 373 Theology Capstone with THEO 353 Religious Traditions.
2. Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.
3. With prior approval from the undergraduate program director, up to two elective courses may be taken outside the Department of Theology.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list (https://www.luc.edu/politicalscience/maia/electivecourses/). Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses (https://www.luc.edu/politicalscience/maia/electivecourses/) to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as Shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record

as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 4.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence.

LEARNING OUTCOMES

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

University Core

UNIVERSITY CORE CURRICULUM

The University Core curriculum includes 16 courses distributed across 10 Core Areas designed to reinforce learning of important skills, including communication, critical thinking, ethical awareness, information literacy, quantitative and qualitative analysis and research methods, and technological literacy. These courses have also been designed to promote students' understanding of the values of Diversity, Justice, and Faith and Spirituality which are central to Loyola's Jesuit education.

About the Core

ABOUT THE CORE

The Loyola's Core Curriculum plays a key educational role in every Loyola student's undergraduate experience. Designed to provide both breadth and depth to a student's program of study, the Core Curriculum introduces students to key concepts and modes of thought in a variety of areas of human intellectual endeavors.

The University Core introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Areas. Core coursework develops students' understanding through knowledge and experience in the Core Areas of Artistic Knowledge and Inquiry, Historical Knowledge and Inquiry, Literary Knowledge and Inquiry, Quantitative Knowledge and Inquiry, Scientific Knowledge and Inquiry, Societal and Cultural Knowledge and Inquiry, Philosophical Knowledge and Inquiry, Theological & Religious Knowledge and Inquiry, and Ethical Knowledge and Inquiry, plus written communication. Each course promotes at least one of the following skills, crucial to facing the challenges of contemporary society: communication, critical thinking, ethical awareness and decision-making, information literacy, quantitative and qualitative analysis and research methods, and technological literacy.

In addition to knowledge and skills development, Core courses integrate and promote values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world. Many courses in the Core were specifically designed to highlight the value of diversity. You may visit this page (p. 1220) for more information regarding efforts to increase diversity in the Core Curriculum.

To complete the University Core Curriculum, students will take 16 courses across ten Core Areas. Two courses are required in six of these areas (Historical Knowledge and Inquiry, Literary Knowledge and Inquiry, Scientific Knowledge and Inquiry, Societal and Cultural Knowledge and Inquiry, Philosophical Knowledge and Inquiry and Theological & Religious Knowledge and Inquiry) Students will begin their studies in these six areas with a foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the foundational course, students will have an array of options to further their studies by taking one of a variety of Tier II classes to pursue their particular interests in more depth. The other four areas (College Writing Seminar, Artistic Knowledge and Inquiry, Quantitative Knowledge and Inquiry, and Ethical Knowledge and Inquiry) require one course each. Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study. These Core waivers can be found here (p. 1220).

Please note that these requirements apply to students obtaining a bachelor's degree. Arrupe College students should check their Core requirements here (https://www.luc.edu/arrupe/academics/degrees/).

What's next? Head to the Core Curriculum Guide (p. 1213) to find out more about the specific Core requirements and learn about courses being offered.

Core Area and Courses

The Core Curriculum expands students' understanding of themselves and the world, reinforces the development of skills, and integrates essential values, through a breadth of learning in the liberal arts and sciences.

The University Core Curriculum includes 16 courses distributed across 10 Areas of Inquiry designed to reinforce learning of important skills, including communication, critical thinking, ethical awareness, information literacy, quantitative and qualitative analysis and research methods, and technological literacy. These courses have also been designed to promote students' understanding of the values of Diversity, Justice, and Faith and Spirituality, central to Loyola's Jesuit education.

College Writing Seminar

Area Goal: This Core Area of Inquiry will invite students to explore strategies for process-based drafting, research, and argumentation in academic writing.

Area Objectives: The complexity of contemporary global society requires that individuals demonstrate effective written communication and rhetorical skills to engage in dialogue, whether in their undergraduate courses, in their careers, or in civic and public discourse. Through this course, students will explore academic practices and strategies--including critical reading and thinking, rhetorical argumentation, the recursive writing process, and information/research literacy--that will develop their writing skills and offer them the opportunity to understand their responsibility to their readers, their sources, and themselves as writers.

CURRICULUM

Core College Writing Seminar (1 course required)

Code	Title	Hours
UCWR 110	Writing Responsibly	3

AREA LEARNING OUTCOMES

After completing the course in this Area, students will be able to:

- summarize, analyze, synthesize, and evaluate texts through informal and formal writing assignments.
- use a variety of sources to formulate and support a clear claim: this includes finding, evaluating, analyzing, synthesizing, and documenting sources appropriately.
- apply recursive and reflective processes in writing, including strategies for invention, drafting, organization, peer review, revision, and editing.
- articulate rhetorical strategies in a range of media and texts.
- write clearly and effectively, tailoring writing and rhetorical strategies to the goals and audience of a given project.

Artistic Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore artistic traditions and expressions.

Area Objectives: The study of art is essential for a complete education of the whole person because it fosters a search for truth, respect for the person, and encourages students to develop critical habits of the mind and ethical standards of behavior. "Art" is understood to encompass any and all forms of artistic expression, including but not limited to, dance, music, theater, film, and visual and plastic arts. The courses in this Core Area will provide students with the opportunity to engage in the arts through formal study or creative processes, and to explore non-linear modes of thinking, problem-solving, and expression. Students will have the opportunity to acquire collaborative skills through group problem solving and engaged dialog where applicable.

CURRICULUM

Courses (3 credit hours required)

In order to satisfy the Core Artistic Knowledge and Experience requirement, a student must successfully complete three credit hours. This may be accomplished by taking one three credit hour class or by taking a combination of one credit hour classes.

MUSC 142	Class Voice for Beginners	
MUSC 154R	Introduction to Opera in Rome	
THTR 100	Intro to Theatre Experience	
THTR 252	Theatrical Design I	
THTR 261	Beginning Acting	

AREA LEARNING OUTCOMES

After completing the course in this Area, students will be able to:

- analyze, interpret, create, or participate in the creation or performance of some forms of artistic expression as a means of exploring human experience and understanding the creative process.
- use critical and technical vocabulary to describe, analyze, and formulate an argument about artistic productions.
- assess how various forms of artistic expression shape the experience and response of the audience.
- evaluate works of art within their aesthetic, historical, or cultural contexts.
- recognize or participate in the artistic-cultural life of their communities.

Historical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the human experience from a historical perspective.

Area Objectives: History is a form of inquiry, critical thinking, and understanding that encompasses all aspects of human experience and illuminates how the past shapes the present and thus the future. Through these courses, students will explore historical and contemporary perspectives with a view to fashioning a humane and just world. Students will have the opportunity to examine a range of historical evidence in multiple forms such as documents, films, diaries, images, artifacts, empirical data, and oral and digital histories.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
HIST 101	Evolution of Western Ideas Institutions to 17th Century	
HIST 102	Evolution Western Ideas Institutions Since 17th Century	
HIST 103	American Pluralism [D]	
HIST 104	Global History Since 1500 [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for all Tier II Courses: HIST 101 Evolution of Western Ideas Institutions to 17th Century, HIST 102 Evolution Western Ideas Institutions Since 17th Century, HIST 103 American Pluralism, **or** HIST 104 Global History Since 1500. Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
ANTH 107	Ancient Worlds [D]	
CLST 274	World of Archaic Greece	
CLST 275	World of Classical Greece	
CLST 276	World of Classical Rome	
CLST 277	World of Late Antiquity	
HIST 208	East Asia Since 1500 [D]	
HIST 209	Survey of Islamic History [D]	
HIST 210	Introduction to Latin American History [D]	
HIST 211	United States to 1865	
HIST 212	United States Since 1865	
HIST 213	Introduction to African History [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- recognize the importance of chronology, sequential development, and geography in shaping history.
- explain processes of historical continuity and change.
- assess and explain the relationship between historical events and cultural, social, and political forces.
- interpret varied forms of sources as historical evidence.
- illustrate how human and societal values, as well as methods of analysis and interpretation, shape and are shaped by historical context

Literary Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore literary traditions and expressions.

Area Objectives: Through these courses, students will examine how literary expression manifests in different types of texts. The kinds of texts students can study are expansive: e.g., poems, plays, novels, stories, memoirs, essays, magazines, newspapers, and more in print and online formats. Students have opportunities to select courses that cover literature from a range of time periods, places, perspectives, cultures, languages, identities, and social positions that have generated and continue to generate rich literature. This range extends across literatures produced in a variety of languages by the many cultures and social groups of Africa, the Americas, Asia, Europe, and Oceania as well as the diasporas and migrations within and between these regions. Students will explore the forms that shape literary expressions; the creative processes that produce them; the concepts and terms that facilitate their interpretation; and the cultural, social, linguistic, and historical contexts in which they are produced.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
UCLR 100C	Interpreting Literature - Classical Studies [1]	
UCLR 100E	Interpreting Literature - English [2]	
UCLR 100M	Interpreting Literature - Modern Langs&Literatures [3]	

1 Taught by member of the faculty of Classical Studies, CAS.
2 Taught by members of the faculty of English, CAS.
3 Taught by members of the faculty of Modern Languages & Literatures, CAS.

Tier II

Requirement for all Tier II Courses: UCLR 100. Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
CLST 271	Classical Mythology	
CLST 271G	Classical Mythology - Women/Gender Focus [D]	
CLST 271R	Classical Mythology - Rome Focus	
CLST 272	Heroes & the Classical Epics	
CLST 273	Classical Tragedy	
CLST 273G	Classical Tragedy - Women/Gender Focus [D]	
CLST 279	Classical Rhetoric	
CLST 280	Romance Novel in Ancient World	
CLST 283	Classical Comedy & Satire

LITR 280	World Masterpieces in Translation [D]
LITR 283	Major Authors in Translation

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- identify, explain, and analyze carefully key components of various literary productions that deepen understanding of human experiences and creative processes.
- use critical and technical vocabulary to describe, analyze, and formulate an argument about literary productions.
- assess how various forms of literary expression shape the experience and response of the audience.
- examine multiple interpretive possibilities of any literary work.
- articulate the relationships of works of literature to the cultures and histories in which they were created and used.

Quantitative Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the major concepts and methods involved in the analysis of quantitative data.

Area Objectives: Through these courses, students will explore how one or more fields--mathematics, statistics, computing, and the social sciences--understand and analyze quantitative information. This involves reasoning by symbolic, numerical, or geometrical means, and determining various ways to solve problems while predicting possible consequences.

CURRICULUM

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		3
CJC 206	Statistics	
COMP 122 / MUSC 122	Introduction to Digital Music	
COMP 125	Visual Information Processing	
COMP 150	Introduction to Computing	
ISSCM 241	Business Statistics	
MATH 108	Real World Modeling with Mathematics	
STAT 103	Fundamentals of Statistics	

AREA LEARNING OUTCOMES

After completing the course in this Area, students will be able to:

- represent and interpret quantitative information symbolically, graphically, numerically, verbally, and in written form.
- describe the strengths and limitations of various types of quantitative models.
- describe the utility of quantitative methods for scientific inquiry or technological progress.
- apply quantitative methods to solve problems or model situations arising in scientific, political, social, or personal contexts.

Scientific Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the fundamental principles, concepts, questions, and methods of science.

Area Objectives: In the study of scientific knowledge and inquiry, students will explore how empirical questions are addressed using the iterative methods and tools of science. Students will also examine the scientific underpinnings of environmental processes. This Core Area will prepare students to make reasoned decisions and informed judgments about the role science plays for people, communities, societies, and life on Earth.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
ENVS 101	The Scientific Basis of Environmental Issues	3

Tier II

A requirement for all Tier II Courses: ENVS 101 The Scientific Basis of Environmental Issues. Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
ANTH 101	Human Origins [D]	
ANTH 103	Biological Background Human Social Behavior [D]	
ANTH 104	The Human Ecological Footprint	
ANTH 105	Human Biocultural Diversity [D]	
ANTH 106	Sex, Science and Anthropological Inquiry [D]	
BIOL 110	Liberal Arts Biology	
ENVS 207	Plants and Civilization	
ENVS 218	Biodiversity & Biogeography	
ENVS 223	Soil Ecology	
ENVS 224	Climate & Climate Change	
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 273	Energy and The Environment	
ENVS 283	Environmental Sustainability	
PHYS 101	Liberal Arts Physics	
PHYS 102	Planetary and Stellar Astronomy	
PHYS 106	Physics of Music	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- explain Earths' physical, chemical, and biological systems and the implications of their alteration by human activities.

- describe how scientific data are collected, analyzed, and interpreted using the Scientific Method and fundamental scientific principles and concepts.
- collect, analyze, and interpret scientific data to explore empirical questions.
- communicate scientific processes and results.
- articulate the philosophical or historical foundations of one or more contemporary scientific disciplines.

Societal and Cultural Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the study of society, culture, and people and the distinct disciplinary approaches within the social sciences.

Area Objectives: Through these courses, students will learn about various political, economic, and social systems across the globe and their interconnections, as well as the beliefs, rituals, structures, and values that constitute societies and cultures. In addition, students will learn about the experiences of underrepresented communities (e.g., related to socioeconomic status, ability, gender, sexual orientation, race/ethnicity, or religion) within a particular cultural and societal context, and how people shape and are shaped by society. Students will explore concepts such as power, privilege, oppression, inequality, and social justice, critical to fashioning a humane and just world.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
ANTH 100	Globalization and Local Cultures [D]	
PLSC 102	International Relations in an Age of Globalization [D]	
PSYC 100	Psychological Perspectives on the Experience of Globalization [D]	
SOCL 101	Society in a Global Age [D]	
WSGS 101	Introduction to WSGS from a Global Perspective [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for all Tier II Courses: ANTH 100 Globalization and Local Cultures, PLSC 102 International Relations in an Age of Globalization, PSYC 100 Psychological Perspectives on the Experience of Globalization, SOCL 101 Society in a Global Age or WSGS 101 Introduction to WSGS from a Global Perspective.

Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
ANTH 102	Culture, Society, and Diversity [D]

PSYC 238	Gender & Sex Differences & Similarities [D]	
PSYC 275	Social Psychology [D]	
SOCL 121	Social Problems [D]	
SOCL 122	Race and Ethnic Relations [D]	
SOCL 125	Chicago: Urban Metropolis [D]	
SOCL 145	Religion & Society [D]	
SOCL 171	Sociology of Sex and Gender [D]	
SOCL 250	Inequality in Society (effective Fall 2023) [D]	
WSGS 201	Contemporary Issues in WSGS [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- describe and analyze the key processes and components of cultural, economic, political, or social forces across time or place.
- summarize the various ways that people, groups, or communities shape and are shaped by cultural or social forces.
- analyze the various ways in which identities are formed through a complex interaction of biographical, societal, or cultural contexts.
- describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
- analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
- apply concepts from above to analyze contemporary or historical issues of inequality and justice.

Philosophical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore key philosophical questions and traditions.

Area Objectives: Through these courses, students will explore influential philosophical questions, positions, and methods of inquiry. Students will develop intellectual attitudes that enable them to identify and assess implicit presuppositions and formulate and defend responses to philosophical issues, including ethical issues.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
PHIL 130	Philosophy & Persons	3

Tier II

Requirement for all Tier II Courses: PHIL 130 Philosophy & Persons

Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
PHIL 267	Aesthetics - Civic Engagement	
PHIL 271	Philosophy of Religion	
PHIL 272	Metaphysics	
PHIL 273	Philosophy of Science	
PHIL 274	Logic	
PHIL 275	Theory of Knowledge	
PHIL 277	Aesthetics	
PHIL 277R	Aesthetics: the Aesthetic Experience in Rome	
PHIL 279	Judgment and Decision-Making	
PHIL 284	Health Care Ethics	
PHIL 286	Ethics and Education	
PHIL 287	Environmental Ethics	
PHIL 288	Culture and Civilization	
PHIL 288R	Culture & Civilization in Rome	
PLSC 100	Political Theory	
PSYC 280	Psychology of Judgment and Decision-Making	

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- describe the historical or conceptual development of major philosophical questions.
- explain the contributions major philosophical questions make to the understanding of ourselves as humans.
- articulate some of the major problems and range of responses central to philosophical inquiry, including questions concerning truth and knowledge, reality, moral values, or social justice.
- construct philosophical arguments, which means students will support their ideas with reasons, assess critically the underlying assumptions of their positions, and evaluate the strengths and weaknesses of alternative positions.

Theological & Religious Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore a range of theological and religious questions and traditions, taking into account the roles these questions and traditions can play in human life and quests for meaning.

Area Objectives: Through these two courses, students will engage in critical thinking and informed reflection on theology and religion. Students will gain familiarity with the basic content of, and modes of scholarly inquiry into, selected religious and theological systems.

CURRICULUM

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
THEO 100	Christian Theology	
THEO 107	Introduction to Religious Studies [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for all Tier II Courses: THEO 100 Christian Theology or THEO 107 Introduction to Religious Studies

Code	Title	Hours
Choose one of the following:		3
THEO 203	Social Justice and Injustice [D]	
THEO 204	Religious Ethics and the Ecological Crisis [D]	
THEO 231	Hebrew Bible/Old Testament	
THEO 232	New Testament	
THEO 265	Sacraments and the Christian Imagination	
THEO 266	Church & Global Cultures	
THEO 267	Jesus Christ	
THEO 272	Judaism [D]	
THEO 276	Black World Religion [D]	
THEO 278	Religion & Gender [D]	
THEO 279	Roman Catholicism	
THEO 281	Christianity Through Time	
THEO 282	Hinduism [D]	
THEO 293	Christian Marriage	
THEO 295	Islam [D]	
THEO 297	Buddhism [D]	
THEO 299	Religions of Asia [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

AREA LEARNING OUTCOMES

After completing the two courses in this Area, students will be able to:

- compare and contrast multiple answers to these questions that have been offered within the respective fields of Religious Studies and Theology: “What is religion?” and “What is the academic study of religion?”
- demonstrate knowledge, with attention to historical development, of the texts, beliefs, ethical understandings, and practices of at least one religious tradition, including the diversity of perspectives within that tradition.
- analyze the interdisciplinary intersections between religion and selected contemporary issues (e.g., ethical, social, political, economic, cultural issues, or other academic disciplines).
- explain some of the ways in which religious thought and practices can both reinforce oppressive structures and also enable possibilities for resistance, paying particular attention to various perspectives of marginalized and oppressed groups.
- critically reflect on religious perspectives, their own and those of others, and the implications of those perspectives.

Ethical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore topics in Ethics such as the nature of human flourishing, moral responsibility,

and justice through critical reflection on a range of ethical frameworks and methodologies.

Area Objectives: Developing a student's ethical awareness and reflection is central to the Core Curriculum. By completing the Core Ethics course, students will explore the differences and similarities between ethical frameworks, the complexities of ethical frameworks and their applications, and historical or contemporary issues that can be interpreted through the lens of ethical frameworks.

CURRICULUM

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		
PHIL 181	Ethics	3
PHIL 182	Social and Political Philosophy	3
THEO 185	Christian Ethics	3
THEO 186	Global Religious Ethics	3

AREA LEARNING OUTCOMES

After completing the course in this Area, students will be able to:

- describe and discuss the central features (e.g., concepts, constructs, and principles) that comprise different ethical frameworks or schools of thought.
- compare and contrast various ethical frameworks, for example, how these frameworks can be applied to living well and promoting the flourishing of others.
- identify central features of historical or contemporary ethical issues.
- apply an ethical framework or school of thought to analyze a historical or contemporary issue, defend their analysis by explaining how the framework/school is present, and the advantages and disadvantages of using it.

Requirements for Students Entering as Freshmen

All Loyola students who enter as freshmen* will follow the University Core Curriculum, which will entail completion of courses in the Core Areas (p. 1213).

In six of the Core Areas, students will take two courses: the first course will be a foundational or Tier I course that will provide an introduction to the main concepts and modes of thought common to that Area. Upon completing the Tier I course, students can choose from a wide array of Tier II courses that will allow students to pursue their academic interests and deepen their understanding in each Area.

For more details regarding Core requirements, please consult with your academic advisor.

*Please refer to the transfer credit policy for new (first time) freshman (https://catalog.luc.edu/undergraduate-academic-standards-regulations/transfer-credit-policy-new-first-time-freshmen/) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Requirements for Transfer Students

We strongly encourage all transfer students to work closely with their academic advisor to plan course selections to maximize the credit received from Loyola.

Loyola University Chicago is a participant in the Illinois Articulation Initiative (IAI), a statewide agreement that allows transfer students to complete the IAI General Education Core Curriculum (GECC) in lieu of a receiving institution's core curriculum. For more information on the Illinois Articulation Initiative, please visit their webpage (https://itransfer.org/).

STUDENTS WHO HAVE COMPLETED THE GECC REQUIREMENTS

At Loyola, all transfer students (**both in-state and out-of-state**) who have received an Associate of Arts (AA) or Associate of Science (AS) degree from a public community college, 4-year college, or university will have met Loyola's Core Curriculum requirements, with the exception of mission-specific courses. In addition, transfer students who attended an Illinois 2-year or 4-year institution, who enter Loyola without a degree but who have completed the IAI General Education Core Curriculum (GECC) requirements will also have satisfied Loyola's Core Curriculum requirements and only need to complete the mission-specific and Engaged Learning requirements as described below.

IN-STATE TRANSFER STUDENTS WHO HAVE NOT COMPLETED THE GECC

If you are a transfer student from an in-state school entering Loyola with **30 or more hours of credit** but have not satisfied the GECC requirements, you may choose to complete core requirements either by completing the GECC or Loyola's Core Curriculum. If you choose to complete Loyola's Core Curriculum, you can find descriptions of the various Knowledge Areas and courses that satisfy them on this webpage (p. 1213). If you choose to complete your core requirements through the GECC option, you will need to select Loyola courses that articulate with the approved GECC courses from your prior institution(s). In addition, you will be required to complete the mission-specific courses and Engaged Learning requirement as described below.

If you enter Loyola with **fewer than 30 hours of credit** your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1224) requirements. You can find complete descriptions of the various Core Knowledge Areas, and courses that satisfy them, on this webpage (p. 1213).

OUT-OF-STATE TRANSFER STUDENTS WHO HAVE NOT EARNED AN AA OR AS DEGREE

If you are a transfer student from an out-of-state school entering Loyola without an AA or AS degree, your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1224) requirements. You can find complete descriptions of the various Core Knowledge Areas, and courses that satisfy them, on this webpage (p. 1213).

MISSION-SPECIFIC CORE REQUIREMENTS

Transfer students who enter Loyola University having satisfied the general Core Curriculum requirements must complete mission-specific courses that are central to Jesuit education. These courses are not covered by the IAI/GECC. These mission-specific requirements may be transferred to Loyola or completed at Loyola, and include courses in the following Knowledge Areas:

- Philosophical Knowledge (p. 1217)
- Theological and Religious Studies Knowledge (p. 1218)
- Ethics (p. 1218)

Transfer students who enter Loyola University from either in-state or out-of-state institutions will complete their mission-specific requirements in accordance with the guidelines below:

For Transfer Students Entering with 30 or More Credit Hours

1. Students entering Loyola with 4 or 5 of the mission-specific Core courses will have completed the mission-specific Core requirements.
2. Students entering with 2 or 3 of the mission-specific courses will take the new transfer student course, either PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions.
3. Students entering with 0 or 1 of the mission-specific courses will take the new transfer student course (PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions) **plus** one of the mission-specific courses not completed; one of these must be an ethics course if they have not already taken a Core Ethics course

Code	Title	Hours
PHIL 181	Ethics	3
PHIL 182	Social and Political Philosophy	3
THEO 185	Christian Ethics	3
THEO 186	Global Religious Ethics	3

For Students Entering with Fewer than 30 Credit Hours

Students will be required to satisfy the same set of Core Curriculum requirements as students who enter as freshmen.

Transfer Credit Policy for New (First Time) Freshman

Students entering as freshman are not transfer students. Please refer to the transfer credit policy for new (first time) freshman (https://catalog.luc.edu/undergraduate-academic-standards-regulations/transfer-credit-policy-new-first-time-freshmen/) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Diversity and the Core

The current Core, which was launched in Fall 2012, introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Areas. In addition to the content of the specific Core Areas (p. 1213), Core courses integrate the understanding and promoting of values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world.

With regard to *understanding diversity in the US or world*, many courses in the Core were specifically designed to address this important value and allow students to develop the specific competencies that are shown below.

Demonstrate an understanding of diversity in the United States and the world.

***Competencies**: By way of example, Loyola graduates should be able to:*

1. Recognize that human diversity is complex and variegated.
2. Distinguish the various factors that inform and impact individual identity formation.
3. Comprehend how group identities are formed in a heterogeneous society.
4. Identify distinctive patterns of thought and behavior that contribute to the formation of a culture different from one's own.
5. Perceive the interdependence of cultures in domestic and global terms.

Currently one-third of all courses in the University Core Curriculum are diversity-designated, including all Tier 1 Societal and Cultural Knowledge and Inquiry courses. Courses with a Diversity Designation are indicated with a (D) next the course titles listed under Core Areas and courses (p. 1213) so that they can be easily identified.

The Loyola University Chicago Core Curriculum is a critical element in a student's transformative education that serves as a framework for learning, reflecting and experiencing, as Loyola students prepare for lives seeking knowledge in the service of humanity. The integration of diversity as a core value in this curriculum is an essential component of this enterprise.

Core and Your Major and Minor

Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study.

The following waivers concern Core Area requirements, not major or minor requirements. Please see your major or minor advisor for details about those requirements.

If you change majors or minors, you may have completed some Core Curriculum requirements prior to the change. Please check with your academic advisor for confirmation of your remaining Core Curriculum requirements.

College/School

College of Arts and Sciences: Majors

Program	Core Area Satisfied
African Studies and the African Diaspora (BA)	Societal/Cultural

Honors and the Core

100-level Honors

Upon successful completion of HONR 101 Western Traditions - Antiquity to the Middle Ages and HONR D101 Developments Western Thought I Discussion, the following Core requirements are waived: Philosophical Knowledge and Inquiry Tier 1 (3 credit hours); Theological & Religious Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 102 Western Traditions-Renaissance to Modernity and HONR D102 Developments in Historical Western Thought II Discussion, the following Core requirements are waived: Artistic Knowledge and Inquiry (3 credit hours); Literary Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 101, HONR D101, HONR 102, and HONR D102, the requirement for College Writing Seminar, UCWR 110 Writing Responsibly, is waived. HONR D102 is a Writing Intensive course.

200-level Honors Courses

Honors students who successfully complete all four 200-level Honors requirements, regardless of the letters attached to the course numbers, will receive four Core waivers as follows:

- Historical Knowledge and Inquiry Tier 2
- Societal and Cultural Knowledge and Inquiry Tier 2
- Literary Knowledge and Inquiry Tier 2
- Scientific Knowledge and Inquiry Tier 2

Please note: The letters (A, B, C, D) are irrelevant. You must complete ALL FOUR 200-level Honors course requirements before the four Core course waivers are applied. Students who leave the Honors program before completing their Honors 200-level requirements must appeal to the Director of Core Curriculum (Core@luc.edu) to determine whether any of their 200-level Honors courses can lead to Core waivers.

Education students in Honors are not required to take HONR 203; and Engineering students in Honors are not required to take HONR 204.

Honors students (entering Fall 2016 and later) can take a 200 or 300 level history course to fulfill their History Tier 1 requirement. To utilize this exception, the HIST course must be taken at a Loyola University Chicago campus and cannot be a transfer credit of any kind. Transfer credit for HIST 101, 102, 103, 104 can still be utilized to fulfill Tier 1 HIST requirement.

300-level Honors Capstone: Moral Responsibility

Upon successful completion of HONR 301 Honors Capstone: Moral Responsibility, the Core requirement for Ethical Knowledge and Inquiry (3 credit hours) is waived.

Be aware students will be required to fulfill the Quantitative Knowledge and Inquiry (3 credit hours); Historical Knowledge and Inquiry Tier 1 (3 credit hours); Philosophical Knowledge and Inquiry Tier 2 (3 credit hours); Scientific Knowledge and Inquiry Tier 1 (3 credit hours); Societal and Cultural Knowledge and Inquiry Tier 1 (3 credit hours); and Theological and Religious Knowledge and Inquiry Tier 2 (3 credit hours) outside of the Honors Program.

Engaged Learning in the Honors Program

All Honors students are required to take 3 credit hours of Engaged Learning coursework. These courses provide a core learning experience integrated into a course that engages students in learning outside the classroom. You can find more information on the Engaged Learning (p. 1224) page.

HONR 290 Literacy Center *does not* satisfy any requirements within the Honors program, but it can be taken to satisfy the Engaged Learning requirement.

Additional Information

Visit the Interdisciplinary Honors (p. 459) page for additional information about the program and requirements.

Engaged Learning

The Engaged Learning requirement supports the mission of Loyola University Chicago by embedding opportunities for students to explore the many different forms of experiential learning as part of their academic coursework. As of Fall 2012, all undergraduate students are required to complete at least one Engaged Learning course/s totaling at least three (3) credit hours prior to graduation.

Check out the course offerings below:

- Summer 2023 Academic Internship Courses (https://www.luc.edu/media/celts/Summer%202023%20AI%20Courses.pdf)
- Summer 2023 Research Courses (https://www.luc.edu/media/celts/Summer%202023%20Research%20Courses.pdf)
- Summer 2023 Service-Learning Courses (https://www.luc.edu/media/celts/Summer%202023%20SL%20Courses.pdf)
- Spring 2023 Research Courses (https://www.luc.edu/media/celts/Spring%202023%20Academic%20Internship%20Courses.pdf)
- Spring 2023 Service Learning Courses (https://www.luc.edu/media/celts/Spring%202023%20Service%20Learning%20Course.pdf)
- Spring 2023 Academic Internship Courses (https://www.luc.edu/media/celts/Spring%202023%20Academic%20Internship%20Courses.pdf)
- Fall 2022 Research Courses (https://www.luc.edu/media/celts/2022%20Fall%20Research%20Course%20List.pdf)

- Fall 2022 Service-Learning Courses (https://www.luc.edu/media/celts/2022%20Fall%20SL%20Course%20List.pdf)

Engaged Learning courses are those that provide all of the following:

- A structured learning experience integrated into a course that engages students in learning outside the classroom, such as in a community agency, professional organization, or in a research setting
- Critical reflection on that experience through various assignments in class
- Synthesis of the experience through a final project or learning portfolio (https://www.luc.edu/celts/programs/learningportfolio/).

Engaged Learning courses may be offered by either individual departments, academic programs, and the Center for Engaged Learning, Teaching, and Scholarship. This requirement may be satisfied by a course within the Core Curriculum, or in a student's major or minor, or through an elective course. Students may engage in these courses during the regular academic year, summer semester, J-Term, a capstone course or a study abroad experience.

Since a requirement of all Engaged Learning courses is for students to complete a final project or a learning porfolio, click here (https://www.luc.edu/celts/programs/learningportfolio/) to learn more about learning portfolios. Learning portfolios, often referred to as a ePortfolios, are high-impact tools for learning. They are a digital collection of students' demonstrated knowledge, competencies and skills represented through learning artifacts. Learning portfolios assist students to deepen critical reflections and integrate learning across course concepts, academic disciplines, and co-curricular experiences.

Upon designating a course as Engaged Learning, the course remains designated as Engaged Learning until notice is given otherwise. Academic departments and/or faculty instructors must communicate if a course changes (new course number, for example) or if a course retires the Engaged Learning designation; please communicate with the Director of Engaged Learning, Dr. Patrick Green (Executive Director, Center for Engaged Learning, Teaching, & Scholarship) at pgreen@luc.edu.

This brief video provides an overview of Loyola University Chicago's Engaged Learning University Requirement for Loyola Students. This overview explains the University requirement and shares resources

Academic Internships

For a course to be designated as "Academic Internship", satisfying the University Engaged Learning requirement, it must meet all the criteria below. Criteria for academic internship courses are based on research and best practices, the CAS Standards for Internships (2009), and the National Association of Colleges and Employers (NACE) Position Statement on U.S. Internships (2011).

1. *The academic course in which students engage in an internship clearly states the hours requirement (minimum of 100 hours of work).*
2. *The internship must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
3. *The internship experience has a clear position description with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the internship experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the University Engaged Learning Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Please Note: *Past internships are not considered for Engaged Learning credit. Students with an approved internship must enroll in an academic internship course that has been designated for Engaged Learning by the University's Engaged Learning Subcommittee of the Board of Undergraduate Studies (BUS). The academic internship course and the internship experience are done concurrently (in the same semester).*

College of Arts and Sciences

AFR 397 Capstone/Internship (3 Credit Hours)
This capstone course may be completed in a variety of ways. This includes an internship at a business or organization that is related to the program, or a study abroad semester related to the program. Internships require a minimum of 10 hours/week verified service hours over the 15 week semester, amounting to 3 credit hours. Students may also make a 300 level AFR course into a "Capstone" by adding an additional, in-depth research assignment approved by the course instructor and the program director. Director approval is required for this course.
Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies
This course satisfies the Engaged Learning requirement.

ANTH 396 Internship in Anthropology (3-6 Credit Hours)
Enrollment Requirements: Student's must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form. This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience

BIOI 398 Bioinformatics Internship (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOL 398 Internship in Biology (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biology-related job settings

CHEM 399 Internship in Biochemistry or Chemistry (2-3 Credit Hours)
A supervised field placement to give students training or work experience in aspects of biochemistry or chemistry that are not commonly available on campus. Students will work outside the classroom (e.g. industrial setting or national lab) applying and extending their biochemistry or chemistry skills, typically for at least 150 hours to receive 3 credits or for more than 100 hours for 2 credits. Permission of faculty advisor Students must complete a total of 3 credits to receive engaged learning credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biochemistry or chemistry related job settings

CLST 382 Internship in Classical Studies (3 Credit Hours)
Students complete a semester-long internship (100 hours minimum) that builds on their training in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience while applying theories and techniques gained from coursework

COMP 391 Internship in Computer Science (1-6 Credit Hours)
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Program Director, followed by final reports from the student and the employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Application of classroom skills to real-world situations

CJC 390 Capstone Experience Internship (1-6 Credit Hours)
Pre-requisites: CRMJ Majors and Minors, Psychology of Crime and Justice Minors, Forensic Science Majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in criminal justice agencies.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency and be able to identify and describe the link between their field experience and prior courses

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at Loyola's Fine Arts Galleries. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FRSC 390 Forensic Science Internship (3-4 Credit Hours)
Pre-requisites: FRSC 342; Forensic Science Majors Only
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

HIST 398 History Internship (3 Credit Hours)
This course provides three hours credit for students engaged in history related internships in the public and private sectors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to obtain an internship position, to learn on-the-job from an experienced practitioner in a wide variety of public and private sector settings, to draw links between their present situation and historical research, and to develop critical thinking and communication skills

HMSV 390 Supervised Fieldwork II (6 Credit Hours)
No course description is available
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: Global Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain practical experience in a professional work setting relevant to their future career paths and will engage in academic reflection on that experience

ITAL 395 Internship (3 Credit Hours)
The internship will enable students to gain practical experience in working in Italian government institutions in Chicago (such as the Italian Cultural Institute) or working in businesses or education.
Interdisciplinary Option: Italian Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will work 4-8 per week and reflect on their experience in conversations with supervising professor and other interns

MUSC 394 Internship in Music (1-6 Credit Hours)
Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses

PLSC 370 Fieldwork in Political Science-Internship (1-6 Credit Hours)
Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn about different forms of public service and the ethical responsibilities of civic engagement; Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand; Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

POST 395 Polish Studies Capstone (3 Credit Hours)
Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.
Interdisciplinary Option: Polish Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to integrate their coursework in the POST minor with their major concentration

PSYC 390 Internship in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshipinpsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

SOCL 380 Internship (3-6 Credit Hours)
Pre-requisites: Permission of instructor or chair
Supervised field experience for students working in a selected community organization, government agency, social agency, or business.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SPAN 395 Internship (3 Credit Hours)
The internship will allow students to work in a variety of settings using Spanish - business, education, government, or social service agencies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience in speaking and writing Spanish

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)
Pre-requisites: STAT 304 and 396; approval of the internship director
This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain first hand experience doing actuarial work in a real world environment

THEO 348 Supervised Ministry (3 Credit Hours)
Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THTR 394 Internship in Theatre (1-6 Credit Hours)
Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

WSGS 398 Women's Studies Internship (3 Credit Hours)
This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST398/WSGS398
Outcomes:
Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

Rome Campus

- GLST 370 Internship in Global Studies
- ITAL 395 Internship

Center for Engaged Learning, Teaching, & Scholarship/Office of the Provost

EXPL 390 Internship Seminar: Organizational Change and Community Leadership (3 Credit Hours)
This course is a seminar course focusing on organizational leadership and change through a 100 hour internship experience with a non-profit organization, government agency, or business organization, pre-approved by the Center for Experiential Learning.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Students will gain professional experience at an organization while reflecting on their work experience and applying theories of organizational leadership, civic engagement, community development, and leadership in the community

EXPL 393 Seminar in Integrative Leadership (3 Credit Hours)
This is a seminar course for students leaders in approved co-curricular programs (e.g., ABI leaders, student organization executive board, Loyola4Chicago leaders, etc.). Students in this course will complete at least 100 hours in a leadership experience in the context of integrative leadership theory culminating in a portfolio to demonstrate holistic leadership capacity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Develop understanding of leadership theories, reflection on actions, and integrative leadership theories; 2) Enhance connection to the institution through leadership experience, and academic and professional learning and development; 3) Produce an integrative professional portfolio

UNIV 392 Internship Seminar in Ignatian Praxis (3 Credit Hours)
Pre-requisites: Approval by the Office of Student Transitions and Outreach
Students in this internship course will complete at least 100 internship hours in Office of Student Transition and Outreach programs
Students reflect on their work experience in the context of Ignatian critical reflection and will put theory into practice.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Development understanding of reflection on actions and Ignatian traditions; 2) Enhance connection to the institution through internship work, and academic and professional learning and development; 3) Foster critical thinking and reflective writing skills

Institute of Environmental Sustainability

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS395/ESP395/NTSC395
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

Interdisciplinary Honors Program

HONR 290 Literacy Center (3 Credit Hours)
Pre-requisites: Students in or beyond their second semester; UCWR 110 or equivalent
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program. Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.
This course satisfies the Engaged Learning requirement.

HONR 370 Fieldwork in Honors - Internship (1-3 Credit Hours)
The main goal of this course is to provide students with valuable work experience in a professional field connected with their academic program. It allows students to apply and further develop their knowledge and skills through an internship in a non-academic setting. The course is also intended to serve as a "bridge" between college and career. This internship presents an opportunity for students to gain valuable professional experience as an intern in public or private institutions engaged in public service projects. HONR 370 will satisfy the "service" requirement for all Honors students.
This course satisfies the Engaged Learning requirement.

Parkinson School of Health Science and Public Health

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.

HSM 360 Healthcare Administration Field Internship (6 Credit Hours)
Pre-requisites: HSM 200, 310, 315, 330, 338, 345, 358, 368, 386 and FINC 301
This professional experience provides exposure to and experience in the healthcare environment. Under the supervision of a field preceptor and faculty advisor, students work with a healthcare organization integrating content gained through prior HCA coursework. Students develop and refine skills and practical knowledge by conducting a goal-based project(s) of value to the internship site. Project objectives are developed in concert between student, faculty, and preceptor. The experience involves three on-campus seminars, preparation of seminar deliverables plus a minimum of 196 on-site hours fulfilled on a weekly basis as mutually agreed between student and preceptor. The field experience as facilitated by Loyola University Chicago and the HCA Program concludes at the close of the semester and may or may not be compensated.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Apply healthcare administration theoretical knowledge, concepts, and skills to the practice setting; 2) Solve project challenges through the use of analytical and reflective tools; 3) Function as a collaborative team member; 4) Demonstrate critical thinking and refine communication skills; 5) Apply strategies of ethical reasoning to arrive at principled decisions in the Jesuit tradition; 6) Integrate supervisory, and faculty feedback to improve personal skills, knowledge, and effectiveness; and 7) Demonstrate the ability to work independently, thoughtfully, and resourcefully

PUBH 310 Public Health Internship (3 Credit Hours)
This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.
This course satisfies the Engaged Learning requirement.
Outcomes:
Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 399 Public Health Capstone Experience (3 Credit Hours)
This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

School of Business

BSAD 351 Business Internship-Engaged Learning (3 Credit Hours)
Pre-requisites: Junior standing, School of Business student, & "C-" or better in BSAD 220
Business Internship connects academic learning with the internship experience. Students will be challenged to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/experiential learning as related to career development will be addressed. Students must be working in an internship during the term of enrollment into BSAD 351.
This course satisfies the Engaged Learning requirement.

IBUS 370 Inernational Business Internship - Engaged Learning (3-6 Credit Hours)
Pre-requisites: Sophomore standing, Permission of Instructor
IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Developing a foundation on which a student may build a career; b) Understanding the role of the Jesuit tradition as it relates to leadership and service

School of Communication

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

School of Continuing and Professional Studies

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

School of Education

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

School of Nursing

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

School of Social Work

SOWK 330 Field I and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350; Corequisite: SOWK 362
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 340 Field II and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Senior standing, SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), SOWK 350, and SOWK 330 as pre- or co-requisite
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

Fieldwork

For a course to be designated as “Fieldwork”, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for field work courses are based on research and best practices in experiential learning:

1. *The field work (clinical placement, practicum) must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
2. *The academic course in which students engage in the field work clearly states the hours requirement (minimum of 100 hours of work).*
3. *The field work experience is with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the field work experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

ANTH 399 Fieldwork in Anthropology (1-6 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Application of anthropological concepts and methods to a specific field situation under the supervision of a faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn field techniques and data recovery and analysis techniques pertinent to the specific nature of their field experience

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

ENGR 391 Biomedical Engineering Capstone Design II (3 Credit Hours)
Pre-requisites: Restricted to Engineering Science majors; ENGR 381 during the same academic year, ENGR 342, concurrent enrollment in ENGR 343
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored medical device projects assigned in ENGR 381. Medical device product development or regulation topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 392 Computer Engineering Capstone Design II (3 Credit Hours)
Pre-requisites: Restricted to Engineering Science majors; ENGR 382 during the same academic year, ENGR 352, concurrent enrollment in ENGR 353
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 382. Computer engineering or professional development topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce computer engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 393 Environmental Engineering Capstone Design II (3 Credit Hours)
Pre-requisites: ENGR 383 (minimum C-)
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced. ENGR majors only.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

MLSC 302 Applied Team Leadership (3 Credit Hours)
Enrollment Conditions: MLSC 301 is required to enroll in this course. This course is restricted to ROTC students only. MLSC 302 section 001 is taken concurrently with MLSC 302 section 002, the laboratory component. MLSC 302 applies the fundamentals of Army Leadership, ethics, personal development, and tactics to the team and squad level. Students will receive specific feedback on your leader attributes and core leader competencies as you take on leadership roles in the ROTC program to develop into a capable and dynamic leader.
This course satisfies the Engaged Learning requirement.
Outcomes:
At the conclusion of this course, you will be capable of planning, coordinating, and leading a squad in a tactical mission during practical instructions in a field environment

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

WSGS 388 Women's Studies Practicum (3 Credit Hours)
This supervised field experience uses experiential learning at a wide variety uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which cab benefit gender equity.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST388/WSGS388
Outcomes:
Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

School of Business

See Academic Internships (BSAD 351 Business Internship-Engaged Learning)

MARK 201 Principles of Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing
This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

ISSCM 393 Requirements Analysis and Communication (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" or better in ISSCM 247
This course focuses on Information Systems requirements and related communication skills. Students will learn how to gather requirements for Information Systems from an organization's users and executives based on a general understanding of organizations and business goals. Students learn techniques of how to translate between organizational needs and requirements for systems and processes, and how to analyze, validate, and prioritize those requirements. A special focus of the course will be to improve business communication skills such as interviewing, listening, presenting and negotiating.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ISOM393 / MGSC393

School of Communication

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205, 362 , and Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester; contact instructor at cmcphil@luc.edu for details. Undergraduates only. All majors encouraged. 3.0 GPA required. COMM 210 or 211 strongly recommended. Open to undergraduate students only. A 3.0 GPA is required.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf. Pre-requisites: Department Consent.
This course satisfies the Engaged Learning requirement.

COMM 383 Radio Practicum (3 Credit Hours)
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.

COMM 384 Film & Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Requires Instructor Consent for all majors; DMST may also enroll with instructor consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section–director/producer, writer, cinematographer, editor, production designer, sound designer, publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ICVM384/IFMS384/COMM384
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

School of Education

CIEP M03 Student Teaching: Infants, Toddlers and PreSchoolers (6 Credit Hours)
This course (along with the related field experiences) serves as a continuation of the Methods courses and meets the requirements of a preprimary student teaching experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates will be provided with supervised applied experience in assessment and instruction with children in early childhood special education and will be prepared to work in an early childhood special education setting

CIEP M04 K-3 Student Teaching (9 Credit Hours)
Pre-requisites: CIEP M03
This course is the culminating experience of the Early Childhood Special Education Teacher Education Program. Candidates are placed in a classroom with an experienced cooperating teacher.
This course satisfies the Engaged Learning requirement.
Outcomes:
In addition to their planning and teaching responsibilities, student teachers also are expected to reflect on their experience, develop their planning and instructional skills, and compile a teaching portfolio

CIEP MU1 Student Teaching: Special Education (9 Credit Hours)
No course description is available
This course satisfies the Engaged Learning requirement.

CIEP MU5 Student Teaching: Elementary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the elementary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP MU6 Student Teaching: Secondary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the secondary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP M60 Secondary Methods: Social Studies (3 Credit Hours)
In this course students examine teaching and learning in the social studies in grades 9-12. Students explore a variety of methods for teaching each discipline within the social studies as distinct subjects and as elements of interdisciplinary courses. The course emphasizes curriculum planning, practice teaching in the social studies and fieldwork in schools and social studies-related organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will design curricula and demonstrate instructional strategies in the social studies that meet the needs of diverse learners and focus on deep engagements with social studies content

CIEP M64 Secondary Methods: Science (3 Credit Hours)
This course is designed to help pre-service teachers develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the high school level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to draw Teaching Science in the Elementary/Middle School connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

TLSC 380 Teaching, Learning and Leading with Schools and Communities Internship: Student Teaching (12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module.
This course satisfies the Engaged Learning requirement.

School of Nursing

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

MCN 273 Family Health Patterns I (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better; Must have taken and passed MSN 277L with a P; Must also enroll in MCN 273L
This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)
Co-requisites: Must enroll on MCN 273
No course description is available

MCN 374L Family Health Patterns II: Lab (3 Credit Hours)
Co-requisites: Must also enroll in MCN 374
No course description is available

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294
This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)
Must also enroll in MSN 277. This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360,with a C- or better; Must also enroll in MSN 377L
This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)
Must also enroll in MSN 377. This course builds on MSN 277L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues - clinical

School of Social Work

Public Performance

For a course to be designated as "Public Performance", satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for public performance courses are based on research and best practices in experiential learning:

- *The experience (e.g. musical performance, dramatic performance, art exhibit) is the culmination of a student's work presented publicly in a program or performance, as it is the extension of the classroom and applying knowledge gained in the classroom.*
- *The academic experience in which students engage in the performance work clearly states the hours requirement.*
- *The learning objectives related to the performance experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
- *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
- *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 313 Ballet V Advanced Ballet or 343 Advanced Majors Ballet. Students must be enrolled in Advanced Ballet to be eligible for enrollment in Pointe II. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with DANC 313 Ballet V or 343 Advanced Majors Ballet. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

MUSC 104 Gospel Choir (1 Credit Hour)
Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours.
Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC104/BWS 104
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; They reflect on their personal and collective artistic growth through the process

MUSC 106 Guitar Ensemble (1 Credit Hour)
Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 107 Chorus (1 Credit Hour)
University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance; They reflect on their personal and collective artistic growth throughout the performance process

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)
Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)
Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publicly at least twice each semester of the academic year. Admission through audition.
Interdisciplinary Option: African Studies and the African Diaspora, Black World Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC109/BWS 109
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 207 Chamber Choir (1 Credit Hour)
Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 246 Composition I (3 Credit Hours)
Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions

MUSC 320 Rehearsal and Performance (1 Credit Hour)
This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.
This course satisfies the Engaged Learning requirement.

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)
This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)
Pre-requisites: Music Major only
A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

PLSC 202 Mock Trial (3 Credit Hours)
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course. Prior Permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Mock trials are an activity that promotes critical thinking and reasoning; They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures

PLSC 203 Moot Court (3 Credit Hours)
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Moot court competitions are an activity that promotes critical thinking and reasoning; They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills; Students gain knowledge of legal argumentation and constitutional law

THTR 204 Playwriting (3 Credit Hours)
Pre-requisites: THTR 100 or THTR 203
This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)
This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 323 Rehearsal & Performance (1-12 Credit Hours)
Pre-requisites: permission of the instructor
This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester. Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)
This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will deepen their understanding of a design process via first hand experience in our theatre

School of Communication

COMM 335 City News Bureau (3 Credit Hours)
In this hard news reporting and writing course students cover events in Chicago and Cook County.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn ethical standards of accuracy, objectivity, fairness and balance

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

Service-Learning

For a course to be designated as “Service-Learning”, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for service-learning courses are based on research and best practices, the CAS Standards for Service-Learning (2009), and the Principles of Good Practice for Service-Learning Pedagogy (Howard, 1993).

1. *The academic course establishes the service expectation of 20+ hours of service to work in the community or in the environment, or on a community-based project connected to the content of the course.*
2. *Learning objectives related to the service experiences are clearly articulated.*
3. *There is a clear articulation of the community partnership or project and how it addresses community-defined priorities.*
4. *The syllabus assignments and final projects synthesize classroom- and community-based learning.*
5. *Activities and assignments encourage students to reflect on larger community issues, sustainability issues, social structures, and/or topics of social justice (e.g. perpetuating dependence vs. building capacity within the community).*

The Center for Engaged Learning, Teaching, & Scholarship publishes a listing of ALL approved service-learning classes each semester. This list can be found on the Service-Learning Program website (https://www.luc.edu/celts/programs/service-learning/forstudents/courses.shtml/).

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all

approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Undergraduate Research

For a course to be designated as “Undergraduate Research“, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for undergraduate research courses are based on research, best practices, and the CAS Standards for Undergraduate Research (2009).

1. *The field research course engages students on an original research project (not a simulation), either contributing to a faculty research project or engaging in an independent research project with a mentor*
2. *Students conduct research on an ongoing basis, working an average of 5 – 10 hours/week.*
3. *Students gain knowledge of or experience in discipline-specific language, research ethics, skills in research methodologies, and important scholarship.*
4. *The learning objectives related to the research experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a mentor who has expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*
7. *There is an outlet to disseminate the original research (e.g., symposium, conference, scholarly article) integrated into the course.*

In addition to classes approved for EL credit in the area of Undergraduate Research, research projects students pursue under an Independent Study or Directed Readings course-number may be approved for EL credit if they meet the criteria. Students should follow the process to request EL credit on the "Requesting EL Credit (https://www.luc.edu/celts/programs/engagedlearning/studentresources/requestingelcredit/)" page.

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

2. The Ramonat Seminar (http://ramonatseminar.com/) is an interdisciplinary, two-semester course that provides Loyola undergraduates with the unique opportunity to explore changing topics within American Catholic history, literature, and culture through hands-on research. Taught by a Loyola faculty member, the seminar is limited to 12 participants who pursue common readings in the fall semester and individual research projects in the spring semester. Unlike standard undergraduate courses, the Ramonat Seminar provides promising students, who will be named *Ramonat Scholars*, with resources for research, travel, and even publication in digital and print formats, all aimed at their general professional development.

UNIV 101

UNIV 101 First Year Seminar is a 1-credit, pass/no pass, extended-orientation course required for all first-year students at Loyola University Chicago. Each class consists of 22 students or fewer and is taught by a University faculty or staff member and an undergraduate Peer Advisor. The class meets for 50-minutes/week during the fall semester.

UNIV 101 First Year Seminar is a graduation requirement for all first-year degree-seeking undergraduate students. Students must pass UNIV 101 First Year Seminar during their first semester of enrollment at Loyola. Should a student not pass UNIV 101 First Year Seminar, they must re-enroll and pass the course during the subsequent semester.

For more information, click on any of the sections below:

Course Description, Goals, and Learning Outcomes

UNIV 101 First Year Seminar helps new students make a positive transition to Loyola University Chicago by helping them adjust to academic and student life. Students will develop relationships with their classmates, faculty/staff instructor, and Peer Advisor in order to foster an inclusive and welcoming community. To make the most of their experience at Loyola, students will participate in meaningful discussions, personal reflection, and engaging activities within and outside of the classroom to learn more about themselves, others, Loyola, and the City of Chicago.

Goals

1. Foster student academic success and the achievement of their academic goals
2. Connect students to Loyola University Chicago, our mission, and the City of Chicago
3. Support student wellbeing and sense of belonging at Loyola University Chicago

Learning Outcomes

As a result of engaging in UNIV 101 First Year Seminar, students will be able to:

1. Create an academic and co-curricular plan to make the most of their experience at Loyola.
2. Choose resources and opportunities, on- and off-campus, that help them achieve their academic, social, personal wellbeing, and career goals.
3. Describe how the Jesuit mission of Loyola University Chicago, and the City of Chicago, influence their experience at Loyola.

Section Types

Most students will enroll in a general section of UNIV 101 First Year Seminar, which consists of students from across campus with different majors and identities. In addition, some sections are available for students with specific majors, communities, and identities. These special UNIV 101 First Year Seminar sections may include:

Magis Sections, for Students Who Identify as…

- Asian students
- Commuters
- First-generation college students
- LGBTQ
- Pre-health
- Students of color
- Undecided/undeclared

Major Specific Sections, for Students Majoring in…

- Communications
- Engineering
- Helping Professions (Social Work, Education, etc.)
- Nursing
- Public Health
- Science, Technology, Engineering, or Math (STEM)

Program Specific Sections, for Students Involved in….

- Achieving College Excellence (ACE)
- First-Year Research Experience (FYRE)
- Interdisciplinary Honors Program
- Learning Communities
- NCAA Athletics
- Quinlan School of Business Honors Program
- Rambler Success Program (RSP)
- Student Diversity & Multicultural Affairs (SDMA) Mentorship Programs

GRADUATE AND PROFESSIONAL CATALOG

Graduate and Professional Catalog

2023-2024

Loyola University Chicago is an independent, Catholic and urban university with a Jesuit heritage, emphasizing the development of the intellectual, social and moral values, and character of its students. Dedicated to higher education and health care, the university has national, regional and international influence.

The Graduate and Professional catalog is issued annually, prior to the start of the Fall Term of the new academic year. Graduate students are governed by the degree requirements issued for the academic year in which they enter Loyola University Chicago, and by the Academic Standards and Regulations for their academic unit or school.

Graduate and Professional Academic Standards and Regulations (p. 2064)

Accreditation

Loyola University Chicago is accredited by The Higher Learning Commission and a member of the North Central Association. Contact NCA at (800) 621-7440/(312) 263-0456; or visit: https://www.hlcommission.org/.

Graduate and Professional Schools

- The Graduate School (p. 1244)
- Institute of Pastoral Studies (p. 1531)
- Marcella Niehoff School of Nursing (p. 1575)
- Parkinson School of Health Sciences and Public Health (p. 1606)
- Quinlan School of Business (p. 1635)

- School of Law (p. 1794)
- School of Social Work (p. 1915)
- Stritch School of Medicine (p. 1988)
- Dual Degree Programs (p. 1988)

Non-Discrimination Policy

Loyola University Chicago will not discriminate in its programs and activities on the basis of race, color, religion, national origins, sex, age, ancestry, marital status, sexual orientation, arrest record, military status or unfavorable military discharge, physical or mental handicap or disability.

Confidentiality of Education Records

Loyola University Chicago complies with the provisions of the Family Education Rights and Privacy Act of 1974 ("FERPA") when releasing personally identifiable information concerning students. FERPA stipulates that a student's education record is confidential information and must not be released without prior written consent of the student. FERPA does permit the release of "Directory Information." Directory information is information which would not generally be considered harmful or an invasion of privacy if disclosed. Students have the right to withhold "directory Information." However, the student should consider the consequences of such a request as Loyola University Chicago will honor the request, until removed in writing by the student. Loyola University Chicago has determined directory information to consist of a student's:

- Name
- Address(es) and telephone number
- University e-mail address
- Photograph
- Major and minor field(s) of study, including the college, division, department, institute or program in which the student is enrolled
- Dates of attendance
- Grade level (Such as freshman, sophomore, junior, senior or graduate level)
- Enrollment status (Undergraduate or graduate, full-time or part-time)
- Date of graduation
- Degree(s) received
- Honors or awards received, including selection to a Dean's list or honorary organization
- Participation in officially recognized activities or sports
- Weight and height of members of athletic teams

Rights Reserved

The President and officers of Loyola University Chicago reserve the right to change information, regulations, requirements and procedures announced in this catalog; to change the requirements for admission, graduation or degrees; to change the arrangements, scheduling, credit or content of courses; and to change the fees listed in this catalog.

The University reserves the right to refuse to admit or readmit any student at any time should it be deemed necessary in the interest of the student or of the University to do so and to require the withdrawal of any student at any time who fails to give satisfactory evidence of academic ability, earnestness of purpose, or active cooperation in all requirements for acceptable scholarship.

Catalog Disclaimer

This catalog is published for informational purposes. Although every attempt is made to ensure accurate information, the information provided should be used only as a reference and planning tool. While students are governed by the catalog that is in effect in the academic year in which they enter, students should not assume that the catalog is a contract between Loyola University Chicago and students. The Board of Trustees of Loyola University Chicago reserves the right to change, at any time, without notice, graduation requirements, fees and other charges, curriculum, course structure and content, and other such matters as may be within its control, notwithstanding any information set forth in this catalog. Students should always consult with their college advisors to confirm all information.

This Academic Catalog lists the approved courses for the plan of study during the published Catalog Year.

Final confirmation of all degree requirements is subject to department, school, and university approval.

The Graduate School

At Loyola University Chicago's Graduate School, we cultivate leaders—scholars who are motivated to make a real difference in the world. From academic fields to professional specialties, the Graduate School offers advanced study and research programs on the leading edge of a wide variety of disciplines in the humanities, natural and biomedical sciences, social sciences and the professions. The Graduate School's inception in 1926 has been marked by innovation, excellence, and commitment to teaching, research, and service. Over the years, the Graduate School has witnessed relatively steady growth and its programs have reflected the university's response to societal needs, university resources, and shifting academic environments.

The programs that today fall under the aegis of the Graduate School represent a combination of programs with deep roots and those that are relatively young in the school's range of offerings. Approximately 1,500 graduate students are enrolled in 25 PhD programs, two professional doctorate programs, 39 master's programs, 9 dual degree programs, 10 certificates, and 20 advanced bachelor's/master's programs. They work with more than 600 graduate faculty members on three campuses. We are a dynamic community of researchers and scholars united in a commitment to developing new knowledge, providing high quality training, enhancing professional credentials, and fostering creativity.

Because Loyola graduate programs have an ethics component, the University's Graduate School provides both the opportunity and the impetus for students from a wide variety of disciplines to conduct research that directly benefits humanity. The Graduate School serves the needs of students and faculty who work at the highest level of excellence in their field and fosters projects that build communities, promote social justice, address the complex problems confronting society, and promote global awareness.

Why Loyola University Chicago? Graduate students at Loyola learn from faculty members who are as committed to mentoring, instruction and intellectual discourse with students as they are to research and scholarship. Our setting in the heart of Chicago allows students to apply their knowledge through outstanding internship and field study opportunities at leading institutions and research settings throughout the metropolitan area. The rigorous intellectual environment at Loyola is informed by our commitment to serving our community and our world, in keeping with Jesuit values, a tradition that has typified Loyola University Chicago since its founding in 1870.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Biochemistry & Molecular Biology (BMB)

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (1 Credit Hour)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (2 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

BMB 600 Dissertation Supervision (0 Credit Hours)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given a letter grade.
Outcomes:
Development of the dissertation project, writing and defense of the dissertation

Bioethics & Health Care Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course provides an overview of the major areas of clinical biomedical ethics guided by extensive use of case discussions and analysis which will help to develop ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethics issues in settings such as long-term care, rehabilitation care, dentistry, and alternative medicine, and to develop moral frameworks for addressing these issues.

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.

BEHL 405 Research and Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants.

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important theories in bioethics and will examine major works by leading bioethics scholars to become more familiar with different approaches in the field.

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course provides an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field.

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.

BEHL 410 Ethics Consultation (1-3 Credit Hours)
This is a two-month course of online learning which includes a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.

BEHL 411 Public Health Ethics (3 Credit Hours)
This course introduces current ethical issues in public health research, practice, and policy.

BEHL 412 Organizational Ethics: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians, health system administrators, community advocates, etc.
Course equivalencies: IPS 652/BEHP 412/BEHL 412

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine's practice.

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership for Changing Healthcare Environment (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required Outcomes: This practicum will expose students to the practical applications of clinical ethics
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.

BEHL 422 Practicum in Organizational/Public Health Ethics (1-3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications. Identify elements of an effective oral presentation 2. Deliver an effective oral presentation 3. Judge the effectiveness of oral presentations
Course equivalencies: IDIM418/BMSC418
Outcomes:
1

BMSC 499 Research (2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (0 Credit Hours)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
IPBS PhD students will complete their degree work while registered for BMSC 600

Catholic Studies (CATH)

CATH 400 Catholicism in the Americas (3 Credit Hours)
This course examines social, political, and religious developments in the Americas from the colonial era with a particular focus on the years following the Second Vatican Council through the present day in order to explore a range of issues regarding the nature of religion, politics, and the role of the Catholic Church.

CATH 402 Catholic Church in Modern World (3 Credit Hours)
This course will examine the Church in the modern world-- with an emphasis on the relationship between Catholicism and democracy, placing particular stress on their relevance to contemporary American public life. In this context, Catholicism will be understood not only as a religious institution, but as the source of a tradition of communitarian social and political thought, while democracy will be understood not only as a form of government, but also as an ethos shaping American society. Authors and texts will include Alexis de Toucqueville, Orestes Brownson, Dorothy Day, John Courtney Murray, and relevant documents from Vatican II and the American hierarchy. The historic tension between Catholicism and democracy will be the subject of our conversation as will the possibilities for greater harmony between them. In particular, we will explore the possibility that Catholicism's communitarian orientation might serve as a corrective to American individualism and consumerism, while democratic institutions and practices might have something to offer Catholicism.

CATH 498 Integrative Project (3 Credit Hours)
This is a synthesis course in which the student, in consultation with a faculty member, will independently research and develop a project that integrates subject-mastery and skills that they have developed over the course of their studies.

CATH 499 Independent Study (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Catholic Studies not otherwise covered by course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Catholic Studies

Cell Biology/Neurobiology/Anatomy (CBNA)

CBNA 405 Neuroscience (3 Credit Hours)
The student gains a fundamental knowledge of gross and microscopic structure of the human nervous system. This also includes the organs of special sense. Integrated into this structural base are the major physiological, pharmacological, and neurological aspects of the nervous system. Laboratory sessions permit individual study of the structure of the human brain and spinal cord.

CBNA 415 Developmental Biology (3 Credit Hours)
The focus of this course is on the cellular mechanisms of differentiation, chiefly in vertebrate system. Topics include factors involved in commitment and induction, differential gene expression, role of growth factors, extracellular matrix, and cell-cell interactions.

CBNA 421 Cellular Biology (3 Credit Hours)
A course that provides knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology (this course is the same as the BMSC 312 in the Core Curriculum.

CBNA 425 Basic Ultrastructure (3 Credit Hours)
An introduction to the fundamentals of electron microscopy and to the ultrastructural basis of the cells and tissues of the body. The aims of the course to learn: (a) the basic operation of the electron microscope and auxiliary equipment; (b) specimen preparation techniques; and (c) and recognize the ultrastructure of cell constituents.

CBNA 431 Advanced Neuroscience (2 Credit Hours)
A multi-disciplinary approach to the study of the nervous system at an advance level, which includes participation by faculty of various basic science and clinical departments. Topics for presentation and discussion are drawn from all aspects of the nervous system structure and function. Special emphasis is placed on recent experimental developments in the field of neuroscience.

CBNA 440 Neuroimmunology (1 Credit Hour)
Advanced reading course providing an overview of the CNS-immune interactions.
Course equivalencies: X-CBNA440/NRSC440

CBNA 441 Signal Transduction (2 Credit Hours)
The study of the basic mechanisms of how hormone, neuroendocrine and growth factor messages are transduced into actions of the cell. Major signal transduction pathways within the cell will be explored (cross reference with Physiology 471)

CBNA 442 Anatomical Techniques (1 Credit Hour)
A survey course presentation of various anatomical techniques that are used in the research lab is presented.

CBNA 452 Introduction to Research (1-5 Credit Hours)
An introduction to the principles involved in conducting scientific research including hypothesis testing, experimental design and interpretation of data.

CBNA 464 Teaching of Anatomy III (2 Credit Hours)
A practical experience in the teaching of neuroscience to medical and graduate students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching neuroscience on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

CBNA 502 Introduction to Conservation Medicine and Ecosystem Health (1-2 Credit Hours)
An overview of the relevant current conservation of medicine issues. Lectures are teleconferenced to/and from Loyola University Medical Center, Brookfield Zoo, The University of Illinois College of Veterinary Medicine, and Loyola's Lakeside Campus.

CBNA 503 Neuroplasticity (2 Credit Hours)
This is a seminar course involving the study of neuro-anatomical and behavioral changes that occur in response to nervous system damage in adult and newborn animal models or humans.

CBNA 505 Chronobiology (2 Credit Hours)
An introduction to the temporal structure of biological systems as evidenced by rhythmic variation in metabolic phenomena.

Cellular & Molecular Oncology (CMO)

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (1 Credit Hour)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (1 Credit Hour)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (0 Credit Hours)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours.
Outcomes:
Allows completion of thesis research and defense, required for degree

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Clinical & Applied Mass Spectrometry (CAMS)

CAMS 401 Theory and Physics of Mass Spectrometry (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.
Outcomes:
At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity

CAMS 402 Chemistry of Protein Separation (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamentals of separating biological agents in solution for analysis by mass spectrometry.
Outcomes:
At the end of this course students will be able to: 1) Describe the composition of typical biological collections including blood and waste; 2) Describe best-practices for preparing collections for mass spectrometry; 3) Describe fundamentals of separating biomolecules according to size, charge and other physiochemical factors; and 4) Describe mechanisms and tradeoffs behind common approaches for separating biological samples via chromatography (liquid and gas)

CAMS 403 Introduction to Mass Spectrometry Instrumentation (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will introduce the mass spectrometry instrumentation that is utilized in clinical, pharma, and academia, including HPLC and other sample preparation instrumentation.
Outcomes:
At the end of this course students will be able to: 1) Describe the basic technologies and instrumentation currently used for mass spectrometry; 2) Understand the basics in how to operate this instrumentation (theory, no hands on); 3) Appreciate the similarities and differences in the different technologies, and in what situation each instrument would be most appropriate; and 4) Describe the instrumentation used in sample preparation

CAMS 411 Computation and Bioinformatics for Proteomics (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the governing principles of analyzing proteomics data, with a special emphasis on data derived from mass spectrometry (MS). Computational methods and tutorials will complement the theoretical material.
Outcomes:
At the end of this course students will be able to: 1) Describe key approaches for matching MS spectra to known proteins, as well as identifying and quantifying protein content in analyzes samples; 2) Describe methodologies and limitations thereof for labeling and quantifying proteins of interest; 3) Perform routine computational analyses of MS data using python; and 4) Describe best-practices for objective data analysis and reproducibility

CAMS 412 Clinical Considerations and Biomarker Development (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover fundamental concepts about the criteria for something to qualify as a biomarker and how they are analyzed by mass spectrometry from a variety of biological fluids and/or tissues. We will also discuss the broader uses of mass spectrometry in a clinical or hospital setting.
Outcomes:
At the end of this course students will be able to: 1) Compare and contrast aspects of good vs bad biomarkers and the utility of mass spectrometry for their detection in biological samples; 2) Describe best practices for sample collection and the limitations of using biological samples; 3) Describe current regulations and standards for biomarker use in the clinic; 4) Identify and describe biohazard safety issues when working with biological samples; 5) Describe analytical approaches for quantification of biomarkers; and 6) Describe the type of mass spectrometry assays typically used in a clinical or hospital setting

CAMS 413 Advanced Mass Spectrometry Approaches (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover advanced MS approaches to address specialized needs. These approaches will frequently require specific instrumentation, and bioinformatics approaches, but sometimes only involve changes to sample preparation and interpretation.
Outcomes:
At the end of this course students will be able to: 1) Understand the need for specialized mass spec approaches; 2) Appreciate the theory behind specialized mass spec approaches; 3) Describe the technical and practical considerations when utilizing specialized MS approaches; and 4) Be able to choose the correct advanced MS approach for a particular situation

CAMS 491 Mass Spectrometry Lab Rotation A (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to prepare samples that are "mass spec ready" from a variety of liquid and solid tissue biological samples. Students will learn quality control parameters and will produce high quality samples for use in the HPLC and mass spectrometer.
Outcomes:
At the end of this course students will be able to: 1) Process liquid and tissue biological samples for analysis by mass spectrometry; 2) Perform gel electrophoresis on prepared samples and excise selected gel bands; 3) Perform in in-gel digestions using standard enzymatic approaches; 4) Perform in-solution digestions using standard enzymatic approaches; 5) Quantify protein samples before and after digestion; and 6) Use column chromatography to generate high purity samples

CAMS 492 Mass Spectrometry Lab Rotation B (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to perform normal LC-mass spectrometer general upkeep including HPLC setup, mass spectrometer calibration, quality control, etc. Students will then learn the process of running mass spectrometers for two types of approaches: discovery and targeted mode.
Outcomes:
At the end of this course students will be able to: 1) Setup HPLC, mass spectrometer and software; 2) Perform normal instrument upkeep including calibration, quality control, solution changes; 3) Be able to troubleshoot common instrument issues; 4) Analyze sample on mass spectrometer for discovery (two group comparison); 5) Analyze sample on mass spectrometer for targeted quantification (in simple solution); 6) Use bioinformatics software packages to analyze data from mass spectrometers; and 7) Understand how to present mass spectrometry data

CAMS 493 Capstone Design - Applications in Mass Spectrometry A (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CAMS 494 Capstone Design - Applications in Mass Spectrometry B (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 170 or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 271
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 271
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 271
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 271
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 271
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: (COMP 231 OR (COMP 271 or COMP 402)) AND (MATH 131 OR 161) and (STAT 103 OR STAT 203 OR ISSCM 241 OR PSYC 304 OR instructor permission)
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 271
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 313 and COMP 264; COMP 374 recommended
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: (COMP 150 or COMP 170 or COMP/MATH 215) AND (COMP 264 or COMP 317 or COMP 343)
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 271
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 348 AND (COMP 264 or COMP 271)
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre- or co-requisites: COMP 271
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 447
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 271
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 271
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 347
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 338 or STAT 408)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
Pre-requisites: COMP 163 or COMP 271 or permission of Instructor
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170 or COMP 180 or Permission of Instructor
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

Computer Science and Education (CSED)

CSED 401 Intro to Programming & Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 430 Technical Administration of PC Cluster (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 431 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

Computer Science & Information Systems (CSIS)

CSIS 484 Project Management (3 Credit Hours)
The art and science of project management as applied to a variety of large and small project situations, in commercial, public, and private sectors. Coverage includes project life cycle management, project organization and leadership, proposals and contracts, and techniques for project planning, estimating, scheduling, and control.
Course equivalencies: X-CSIS484/ISOM484

CSIS 498 Telecommunications for Managers (3 Credit Hours)
This course introduces the basic concepts of data communications, telecommunications networks, and business applications of telecommunications technology, from a managerial perspective. Basic concepts covered include data communications hardware and software, transmission media, and network topology, with an emphasis on local area networks (LANs) and client server applications. Issues related to the management of LANs, wide area networks, and international telecommunications networks will be presented. The course will address technical and managerial issues related to the use of telecommunications for strategic advantage and its role in business organizations. Business cases involving the planning, designing, implementation, and management of communications networks in business organizations will be discussed.
Course equivalencies: X-CSIS498/ISOM498

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Program Evaluation and Research (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information, which is often present in everyday criminal justice practice. Students learn how to generate and interpret statistical output using SPSS-PC, and learn which statistical tools are appropriate for specific measures and research questions.
Outcomes:
To select the correct statistical tools and interpret output To write statistical information To conduct SPSS-PC

CJC 405 Professional Ethics (3 Credit Hours)
The course defines the ethical responsibilities and explores the ethical dilemmas faced by police, court, and corrections officials. Moral theories are discussed. Students critically analyze their own and others' beliefs. They learn how to think constructively about ethical dilemmas, and how to articulate the inherent ethical issues in the field of criminal justice.
Outcomes:
To analyze moral dilemmas and ethical situations that professionals may face

CJC 408 Applied Research in Criminal Justice and Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
This is a student-initiated research course, supervised by the instructor. Students will conduct applied research that informs the policies or practices of a stakeholder group or criminal justice agency. This course encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: CJC 401; Graduate Students Only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Varies by topic

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.

CJC 417 Forensic Science and the Criminal Justice System (3 Credit Hours)
Graduate Students Only. This course introduces the basic principles and applications of the biological, chemical, physical, medical and behavioral sciences currently practiced and the limitations of the modern crime laboratory. The course then explores uses of forensic science and the applicability to the criminal justice system. Current issues, examples, and presentations are integrated into course material.
Outcomes:
Understand the basic concepts, strengths, limitations and challenges of the forensic sciences discipline, the application of the forensic sciences to the management, operations, and policies of criminal justice system, from crime scene processing through adjudication

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 500 Directed Research (1-6 Credit Hours)
No course description is available

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A in CJC 409 and CJC 407
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting. Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper.
This course satisfies the Engaged Learning requirement.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the written comprehensive examination.

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory--for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 466 Eighteenth-Century Novel (3 Credit Hours)
This course includes prose fiction in the Restoration and earlier eighteenth century; the mid-century novels of Richardson, Fielding, and Smollett; the novel after 1760, including the Gothic novel and the sentimental novel; Sterne and Burney.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

Erikson Institute (ERIK)

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

Graduate School Seminar (GSSM)

GSSM 501 Teaching Effectiveness Seminar (0 Credit Hours)
Pre-requisites: Approval of the Graduate School
This seminar provides pedagogical support to funded graduate students serving as teachers of record.
Outcomes:
To enhance students' abilities to teach undergraduate courses and deepen their pedagogical toolkit

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Hebrew (HEBR)

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

History (HIST)

HIST 400 Twentieth Century Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 433 Modern European Nations (3 Credit Hours)
This course will analyze selected topics in the political, international, social, economic, and cultural history of particular European nations from the late eighteenth century to the present.
Outcomes:
Students will gain familiarity with the history and historiography of a single country within the larger context of modern European history and will sharpen their writing and analytical skills

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 451 History of The American West (3 Credit Hours)
This class focuses on the historiography of western and frontier history from the late 1980s to the present.
Outcomes:
Students will be introduced to the major contemporary historians of the western frontier; They will develop a perspective on the frontier process from 1500 into the 20th century and become familiar with major field sub-themes

HIST 456 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Management of History Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Latin American History to 1810 (3 Credit Hours)
This course introduces students to major themes in the colonial history of the region known today as Latin America from conquest to independence.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as an understanding of the major historiographical debates

HIST 497 Latin Amer Hist Since 1810 (3 Credit Hours)
This course introduces students to the major themes and trends in the development of Latin America from the Wars of Independence to the present.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as the major historiographical debates

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 523 Seminar in Medieval History (3 Credit Hours)
The topics and descriptions of this course vary according to interest of the instructor.
Outcomes:
Students will produce a major research paper related to the themes of the class

HIST 533 Topics in Modern European History (3 Credit Hours)
This course will introduce students to historical research using primary documents. The topics and themes of the research seminar will vary according to the interest of the instructor but will focus on Modern Europe.
Outcomes:
Students will produce a major research paper related to the themes of the course

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 583 Quantitative Methods in Social History (3 Credit Hours)
This course is an introduction to the use of social science theory and quantitative methodology in social history. It includes hands-on instruction in computer database and statistical analysis programs and has an individual research component.
Outcomes:
Students will demonstrate their ability to read critically works using quantitative techniques and will use these methods in their own research

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Infectious Disease & Immunology (IDIM)

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (0 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Students will 1) Understand the significance and clearly communicate the research problem; 2) Describe the approaches used and results obtained; 3) Draw conclusions and identify future directions

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (1 Credit Hour)
Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446.

ICB 446 Review Seminar (1 Credit Hour)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with the Scientific Literature Course 445 and is only offered during the spring semester.

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

ICB 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Interdisciplinary Studies (INDS)

INDS 400X TBA-Foreign Stdy (15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

Italian (ITAL)

ITAL 401 Italian Language and Culture (3 Credit Hours)
This course offers advanced students the opportunity to undertake an in-depth study of cultural debates that have emerged in Italy over the centuries. It examines transformations in Italian culture, and the challenges Italy has confronted in the face of societal changes through the study of a variety of written and visual texts. The course may examine other sources and media.
Outcomes:
By the end of the course, students will formulate their own hypotheses on the transformative periods and the role played by cultural figures and forces in promoting change; Students will explore a topic of their choice guided by the faculty member and will conduct a research project that will result in a final paper; ACTFL* achievement level desired: Advanced Mid to High

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Introduction to computational methods and error analysis. Topics include numerical solution of equations, interpolation and approximation, numerical differentiation and integration, numerical solution of ordinary and partial differential equations. Numerical methods in linear algebra, such as approximate solutions to the eigenvalue problem, will also be covered.
Course equivalencies: X-COMP409/MATH409

MATH 413 Algebra I (3 Credit Hours)
As the first part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, actions on sets, and Sylow theorems. Additional topics chosen from linear groups, category theory, homological algebra, and representation theory.

MATH 414 Algebra II (3 Credit Hours)
As the second part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on rings and fields. Topics include integral domains, vector spaces, modules, etc., Additional topics chosen from Galois theory, Dedekind domains, category theory, tensor products, homological algebra, and representation theory.

MATH 415 Topics in Linear Algebra (3 Credit Hours)
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
A first course in the foundations of analysis. Topics include measure theory, Lebesgue integration, Hilbert and Banach spaces, and complex analysis.

MATH 452 Analysis II (3 Credit Hours)
A second course in the foundations of analysis. Topics include the Fubini Theorem, differentiation, and linear and nonlinear functional analysis.

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: Graduate Student Status
An introduction to functions of a single complex variable. Topics include analytic functions, contour integrals, Cauchy integral formula, harmonic functions, Liouville's theorem, Laurent series, analytic continuation, and conformal mapping. Additional topics may include theorems of Picard and Rouché, the Riemann mapping theorem, Riemann surfaces, and the fast Fourier transform.
Outcomes:
Students will be able to: analyze limits and continuity for complex functions; evaluate contour integrals (by the fundamental theorem, by Cauchy integral formula, and by the residue theorem); and represent functions as Laurent series, classifying singularities and poles

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Introduction to Mathematical Modeling (3 Credit Hours)
A course in modelling. Mathematics has the power to describe the world and predict future events. This can be seen through its use in physics, economics, and biology. In this course students will learn how to harness the power of mathematics to model real world phenomenon. This will mainly be done using calculus and differential equations, but other mathematical tools will be used as well.

MATH 458 Topics in Optimization (3 Credit Hours)
This course presents the study of selected mathematical models and their application to applied problems. Topics in linear and mathematical programming, optimization theory, and game theory are examined.
Course equivalencies: X-MATH458/STAT458/428

MATH 460 Theory of Games (3 Credit Hours)
The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
General theory of topological and metric spaces, compact spaces, convergence and completeness in metric spaces, connected spaces.

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Microbiology and Immunology (MIIM)

MIIM 402 Microbes & Hosts (3 Credit Hours)
Pre-requisites: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor
Microbes & Hosts conveys important concepts in bacteriology, virology and immunology as well as the interactions of microbes with host organisms. Through a combination of didactic lectures and group discussions, students will come to appreciate fundamental processes which influence microbe-host interactions.
Outcomes:
Students will have a strong understanding of basic principles of microbiology, virology and immunology as well as an understanding of key concepts related to microbe-host interactions

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (2 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (4 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (1 Credit Hour)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor. They will defend their results in a public forum.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (1 Credit Hour)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students advance their knowledge of new neuroscience concepts and methods, gain experience in presenting in front of a group, and gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (1 Credit Hour)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

NRSC 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (1 Credit Hour)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (1 Credit Hour)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PHAR 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PHAR 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

PHYS 473 Energy and Sustainability (4 Credit Hours)
A course that investigates the role of energy in physical systems such as thermosphere and also various sources of energy.
Outcomes:
Ability to apply laws of thermodynamics to physical systems and apply material to high school science class

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Physiology (PIOL)

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PIOL 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Course equivalencies: BMSC600/MIIM600/PIOL600

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (3 Credit Hours)
Work on an individual research project under the supervision of a faculty member.

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

  - Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1451)

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Greek

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 170 or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 271
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 271
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 271
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 271
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 271
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: (COMP 231 OR (COMP 271 or COMP 402)) AND (MATH 131 OR 161) and (STAT 103 OR STAT 203 OR ISSCM 241 OR PSYC 304 OR instructor permission)
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 271
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 313 and COMP 264; COMP 374 recommended
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: (COMP 150 or COMP 170 or COMP/MATH 215) AND (COMP 264 or COMP 317 or COMP 343)
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 271
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 348 AND (COMP 264 or COMP 271)
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre- or co-requisites: COMP 271
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 447
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 271
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 271
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 347
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 338 or STAT 408)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
Pre-requisites: COMP 163 or COMP 271 or permission of Instructor
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170 or COMP 180 or Permission of Instructor
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory--for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 466 Eighteenth-Century Novel (3 Credit Hours)
This course includes prose fiction in the Restoration and earlier eighteenth century; the mid-century novels of Richardson, Fielding, and Smollett; the novel after 1760, including the Gothic novel and the sentimental novel; Sterne and Burney.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

History (HIST)

HIST 400 Twentieth Century Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 433 Modern European Nations (3 Credit Hours)
This course will analyze selected topics in the political, international, social, economic, and cultural history of particular European nations from the late eighteenth century to the present.
Outcomes:
Students will gain familiarity with the history and historiography of a single country within the larger context of modern European history and will sharpen their writing and analytical skills

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 451 History of The American West (3 Credit Hours)
This class focuses on the historiography of western and frontier history from the late 1980s to the present.
Outcomes:
Students will be introduced to the major contemporary historians of the western frontier; They will develop a perspective on the frontier process from 1500 into the 20th century and become familiar with major field sub-themes

HIST 456 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Management of History Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Latin American History to 1810 (3 Credit Hours)
This course introduces students to major themes in the colonial history of the region known today as Latin America from conquest to independence.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as an understanding of the major historiographical debates

HIST 497 Latin Amer Hist Since 1810 (3 Credit Hours)
This course introduces students to the major themes and trends in the development of Latin America from the Wars of Independence to the present.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as the major historiographical debates

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 523 Seminar in Medieval History (3 Credit Hours)
The topics and descriptions of this course vary according to interest of the instructor.
Outcomes:
Students will produce a major research paper related to the themes of the class

HIST 533 Topics in Modern European History (3 Credit Hours)
This course will introduce students to historical research using primary documents. The topics and themes of the research seminar will vary according to the interest of the instructor but will focus on Modern Europe.
Outcomes:
Students will produce a major research paper related to the themes of the course

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 583 Quantitative Methods in Social History (3 Credit Hours)
This course is an introduction to the use of social science theory and quantitative methodology in social history. It includes hands-on instruction in computer database and statistical analysis programs and has an individual research component.
Outcomes:
Students will demonstrate their ability to read critically works using quantitative techniques and will use these methods in their own research

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Introduction to computational methods and error analysis. Topics include numerical solution of equations, interpolation and approximation, numerical differentiation and integration, numerical solution of ordinary and partial differential equations. Numerical methods in linear algebra, such as approximate solutions to the eigenvalue problem, will also be covered.
Course equivalencies: X-COMP409/MATH409

MATH 413 Algebra I (3 Credit Hours)
As the first part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, actions on sets, and Sylow theorems. Additional topics chosen from linear groups, category theory, homological algebra, and representation theory.

MATH 414 Algebra II (3 Credit Hours)
As the second part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on rings and fields. Topics include integral domains, vector spaces, modules, etc., Additional topics chosen from Galois theory, Dedekind domains, category theory, tensor products, homological algebra, and representation theory.

MATH 415 Topics in Linear Algebra (3 Credit Hours)
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
A first course in the foundations of analysis. Topics include measure theory, Lebesgue integration, Hilbert and Banach spaces, and complex analysis.

MATH 452 Analysis II (3 Credit Hours)
A second course in the foundations of analysis. Topics include the Fubini Theorem, differentiation, and linear and nonlinear functional analysis.

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: Graduate Student Status
An introduction to functions of a single complex variable. Topics include analytic functions, contour integrals, Cauchy integral formula, harmonic functions, Liouville's theorem, Laurent series, analytic continuation, and conformal mapping. Additional topics may include theorems of Picard and Rouché, the Riemann mapping theorem, Riemann surfaces, and the fast Fourier transform.
Outcomes:
Students will be able to: analyze limits and continuity for complex functions; evaluate contour integrals (by the fundamental theorem, by Cauchy integral formula, and by the residue theorem); and represent functions as Laurent series, classifying singularities and poles

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Introduction to Mathematical Modeling (3 Credit Hours)
A course in modelling. Mathematics has the power to describe the world and predict future events. This can be seen through its use in physics, economics, and biology. In this course students will learn how to harness the power of mathematics to model real world phenomenon. This will mainly be done using calculus and differential equations, but other mathematical tools will be used as well.

MATH 458 Topics in Optimization (3 Credit Hours)
This course presents the study of selected mathematical models and their application to applied problems. Topics in linear and mathematical programming, optimization theory, and game theory are examined.
Course equivalencies: X-MATH458/STAT458/428

MATH 460 Theory of Games (3 Credit Hours)
The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
General theory of topological and metric spaces, compact spaces, convergence and completeness in metric spaces, connected spaces.

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (8 Credit Hours)
Course will involve research presentations and other forms of professional development. Graduate student standing in Social Psychology.
Interdisciplinary Option: Women & Gender Studies

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (3 Credit Hours)
Work on an individual research project under the supervision of a faculty member.

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women's and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Bioinformatics

GRADUATE PROGRAMS

- Bioinformatics (MS) (p. 1348)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Bioinformatics (MS)

NON-THESIS

Students gain real-world experience in an internship environment and are exposed to a breadth of course work in the field. Students will be able to pursue employment (e.g.in the biotech industry, research institutions, and government agencies), or further advanced degrees (e.g. PhD or MD).

THESIS

Students are trained in conducting hypothesis-driven independent research including experimental design, analysis and interpretation of results, as well as scientific writing and presentation. At the conclusion of their studies, students are primed for research positions in the private and public sector and competitive PhD programs.

CURRICULUM

Degree Requirements

Students pursuing the Master of Science in Bioinformatics must complete 30 credit hours. Six (6) courses worth a total of 17 credit hours make up the Core Curriculum requirements, and students select a *Non-Thesis* or *Thesis* track to complete the remaining 13 credit hours required.

Code	Title	Hours
Core Curriculum		
BIOL 488	Bioinformatics	3
COMP 483	Computational Biology	4
STAT 437	Quantitative Bioinformatics	3
BIOI 500	Advanced Bioinformatics	3
BIOI 501	Bioinformatics Seminar	1
Select one of the following:		*3*
BIOI 565	Exploring Proteins	
CHEM 465	Special Topics in Biochemistry (Proteomics)	
Track Requirements (see below)		**13**
Total Hours		**30**

Non-Thesis Track

Master of Science in Bioinformatics students in the Non-thesis track complete a Bioinformatics Internship and four (4) approved electives.

Code	Title	Hours
BIOI 498	Bioinformatics Internship [1]	1
Select four from the following		*12*
BIOL 402	Microbiology	
BIOL 482	Advanced Molec Genetics	

BIOL 495	Special Topics (Genomics; Infectious Diseases;Metagenomics)
CHEM 423	Medicinal Chemistry
CHEM 465	Special Topics in Biochemistry (Advanced Enzyme Kinetics and Mechanisms; Plant Biochemistry)
COMP 406	Data Mining
COMP 413	Intermediate Object-Oriented Development
COMP 439	Distributed Systems
COMP 453	Database Programming
COMP 460	Algorithms & Complexity
COMP 471	Theory of Programming Languages
COMP 479	Machine Learning
COMP 488	Computer Science Topics (Introduction to Natural Language Processing)
STAT 406	Stochastic Processes
STAT 407	Statistical Design
STAT 408	Applied Regression Analysis
STAT 410	Categorical Data Analysis
STAT 421	Math Modeling & Simulation
STAT 488	Topics in Statistics (Biostatistics)
Total Hours	**13**

Thesis Track

Master of Science in Bioinformatics students in the Thesis track complete one (1) approved electives as well as design and conduct thesis research under direction of faculty.

Code	Title	Hours
BIOI 494	Bioinformatics Research Design	1
BIOI 499	Bioinformatics Research	8
BIOI 595	Thesis Supervision	1
Select one of the following:		**3**
BIOL 402	Microbiology	
BIOL 482	Advanced Molec Genetics	
BIOL 495	Special Topics (Genomics; Infectious Diseases; Metagenomics)	
CHEM 423	Medicinal Chemistry	
CHEM 465	Special Topics in Biochemistry (Advanced Enzyme Kinetics and Mechanisms; Plant Biochemistry)	
COMP 406	Data Mining	
COMP 413	Intermediate Object-Oriented Development	
COMP 439	Distributed Systems	
COMP 453	Database Programming	
COMP 460	Algorithms & Complexity	
COMP 471	Theory of Programming Languages	
COMP 479	Machine Learning	
COMP 488	Computer Science Topics (Introduction to Natural Language Processing)	
STAT 406	Stochastic Processes	
STAT 407	Statistical Design	
STAT 408	Applied Regression Analysis	
STAT 410	Categorical Data Analysis	
STAT 421	Math Modeling & Simulation	
STAT 488	Topics in Statistics (Topics in Biostatistics)	
Total Hours		**13**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

CURRICULUM

Degree Requirements

Students pursuing the Master of Science in Bioinformatics must complete 30 credit hours. Six (6) courses worth a total of 17 credit hours make up the Core Curriculum requirements, and students select a *Non-Thesis* or *Thesis* track to complete the remaining 13 credit hours required.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

In Loyola's M.S. in Bioinformatics program you will gain fundamental skills that will help you be an inquisitive scientist.

- a solid foundation in biological, computational, chemical, and statistical concepts and theory;
- the facility to interpret primary scientific literature;
- the capacity to employ statistical and computational methods to investigate and solve problems within the life sciences;
- the ability to conduct bioinformatics study in industry and/or the research environment; and
- science-related oral and written communication skills.

Biology

Graduate Programs

- Biology (MS) (p. 1353)
- Medical Sciences (MA) (p. 1354)

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Biology (MS)

Our faculty members are well-respected leaders in their fields and publish extensively. They also attract a significant amount of external grant support which allows them to pursue research projects that are at the forefront of modern biology. Students receive individual attention as they pursue their own research and work toward their master's degree.

The MS in Biology degree program focuses on the development of experimental and intellectual skills required for vigorous research. Our program is research/thesis-based and takes most students two to three years to complete.

Students are assigned an advisor to help them develop an individualized curriculum. Once a curriculum is selected, students join the labs of their thesis directors and begin their research.

Curriculum

The Master of Science in Biology requires 30 hours of coursework and a formal research thesis.

Course Requirements

To become an official candidate for the MS degree, students must earn 30 credit hours and show satisfactory performance in course work and thesis research.

Code	Title	Hours
Required Courses		
BIOL 470	Biostats & Exp Design Lec/Lab [1]	4
BIOL 500	Scientific Logic [2]	3
BIOL 510	Instructions in Teaching Biology	1
BIOL 511	Biology Teaching Practicum [3]	2
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
BIOL 422	Research (hours vary, students will earn 3-9 hrs over course of program)	1-6
Graduate level BIOL electives		*9-15*
BIOL 402	Microbiology	
BIOL 405	Advanced Development	
BIOL 409	Advanced Genetics	
BIOL 410	Advanced Cell Biology	
BIOL 413	Advanced Immunology	
BIOL 415	Advanced Parasitology	
BIOL 416	Limnology Lec/Lab

BIOL 495	Special Topics	
BIOL 595	Thesis Supervision	0
Total Required Hours		**30**

1. BIO 470 must be completed with a grade of B or higher to demonstrate proficiency in experimental design and analysis.
2. BIO 500 must be completed with a grade of B or higher to demonstrate proficiency in scientific writing and reading scientific literature.
3. University-funded students must take BIOL 511 Biology Teaching Practicum twice (4 credit hours). Grant-funded or externally-funded students take BIOL 511 Biology Teaching Practicum once (2 credit hours).

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
BIOL 500	Scientific Logic	3
BIOL 510	Instructions in Teaching Biology	1
Elective		0-5
	Hours	**7**
Spring		
Electives or Research		0-6
BIOL 511	Biology Teaching Practicum [1]	2
	Hours	**8**
Year Two		
Fall		
BIOL 470	Biostats & Exp Design Lec/Lab [2]	4
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
Electives or Research		0-3
	Hours	**9**

Spring	
Electives or Research	6-7
Hours	**6**
Total Hours	**30**

[1] Students on University Scholarships must take BIOL 511 Biology Teaching Practicum two times. Unsupported students, students supported through an advisor's grant, and students supported by their own grants take BIOL 511 one time.

[2] BIOL 470 Biostats & Exp Design Lec/Lab is offered every other year and alternates with BIOL 500 Scientific Logic.

Thesis Requirements

Research is the focus of the master's degree program at Loyola University Chicago. Faculty engage students in ongoing studies and students are well-supported when taking on new projects and challenges. Students work with their thesis advisors to develop and conduct a specialized research project. Based on this work, students write and defend a master's thesis. Students in the MS program must write and present a thesis outline to their faculty committee. The proposal outline must be approved by February 1 of the student's first year in the program. Following this approval, students will write and defend the master's thesis. The final thesis will be deposited in a publicly accessible database in accordance with Graduate School policy.

Learning Outcomes

Upon completion of the MS in Biology, students will be able to demonstrate

- Proficiency in experimental design and analysis.
- Proficiency in scientific writing and reading scientific literature
- Communication skills in both teaching and presenting research
- The ability to critically think, analyze data and write scientifically
- The ability to interact as an independent researcher

Medical Sciences (MA)

The Master of Arts in Medical Sciences program is a special master's program (SMP) that prepares students to build a compelling medical school application. MAMS is a record enhancement program and not a career changer program, and as such, all pre-medical prerequisites must be completed. Our graduate post-baccalaureate is known for the rigor and quality of our coursework leading to a master's degree. Also, we have a long-term commitment to advising our students and assisting them at every stage of the medical school application process. We are dedicated to promoting the personal and professional development of each student, facilitating their entry and assuring their future success in Medical School. We maintain a student-centered, non-competitive environment that allows each student to capitalize on their strengths as they build their medical school credentials. We are guided by the Jesuit values of "seeking knowledge in the service of humanity; preparing to live in a shared, global community; and building on the desire to always do and become more."

In support of our mission, Loyola's MAMS program:

- Provides students with a high-quality educational experience from dedicated faculty recruited from some of the best medical schools in the US.
- Offers substantial office hours contact with faculty.
- Provides premedical advising upon entry to the program, through post-graduation, on every aspect of a student's medical school application. Students enjoy a full-time pre-medical advisor who works solely with MAMS students.
- Provides support for medical school applications with letters of recommendation.
- Fosters an active community in which students support each other through collaborative learning and group study.
- Facilitates access to Chicago-area hospitals and clinics with opportunities to work with underserved populations, sensitizing students to social justice issues, especially regarding the availability of medical care.
- Offers professional development seminars to familiarize students with individual medical schools, to strengthen their medical school applications, and to discuss ethical issues and social justice efforts with experts in the field.
- Values diversity in our student, professional and social communities.

Curriculum

To receive the MA in Medical Sciences degree, students must complete 30 credit hours in a curriculum drawn each year from courses listed below. However new courses are added on a routine basis and students should confirm course selections with their MAMS advisor.

Courses

Code	Title	Hours
BIOL 401	Medical Literature and Ethics	3
BIOL 408	Writing for the Medical Professions	3
BIOL 409	Advanced Genetics	3
BIOL 410	Advanced Cell Biology	3
BIOL 413	Advanced Immunology	3
BIOL 452	Human Anatomy and Physiology I	3
BIOL 453	Human Anatomy and Physiology II	3
BIOL 455	Advanced Neuroscience	3
BIOL 466	Advanced Biochemistry	3
BIOL 495	Special Topics	3
Total Hours		**30**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
BIOL 401	Medical Literature and Ethics	3
BIOL 409	Advanced Genetics	3
BIOL 410	Advanced Cell Biology	3
BIOL 452	Human Anatomy and Physiology I	3
BIOL 455	Advanced Neuroscience	3
	Hours	**15**

Spring		
BIOL 408	Writing for the Medical Professions	3
BIOL 413	Advanced Immunology	3
BIOL 453	Human Anatomy and Physiology II	3
BIOL 466	Advanced Biochemistry	3
BIOL 495	Special Topics	3
	Hours	**15**
	Total Hours	**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

By completing the program and implementing advice received from the program, students will have strengthened their medical school candidacy by demonstrating to medical schools that:

- They can succeed in rigorous science courses
- They can secure and maintain a volunteer position in a hospital or clinic
- They embody the characteristics of professionalism and leadership necessary in the medical profession.

Chemistry and Biochemistry

The Department of Chemistry provides graduate students in our MS and PhD programs a unique atmosphere, with state of the art instrumentation, accomplished professors, and motivated researchers. Much of the current research transcends traditional boundaries to include fields such as surface chemistry of organic electronic materials, quantifying physiological processes via synthesis of optical probes, applied information theory to thermodynamic systems, and metal analysis in retina causing cataract development. Weekly seminars and the annual Denkewalter Lecture (https://www.luc.edu/chemistry/events/denkewalterlecture/), which brings the winner of either the American Chemical Society's Pure Chemistry or Eli Lilly awards (https://www.acs.org/content/acs/en/funding/technical-divisions.html) to campus, provide opportunities to learn about recent advances from respected academic and industrial scientists.

Graduate Programs

- Chemistry (MS) (p. 1357)
- Chemistry (PhD) (p. 1358)

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Chemistry (MS)

The Graduate Chemistry program at Loyola University Chicago encompasses the traditional fields of specialization, including: *Analytical Chemistry, Biochemistry, Chemical Education, Inorganic Chemistry, Organic Chemistry and Physical Chemistry*

For students who enroll in our course-based Master of Science program, you will enjoy the small class sizes found in our upper level courses and access it provides to your instructors. Students with a strong interest in research can choose to obtain a thesis-based master's in a diverse range of subjects. Our MS students receive the academic rigor and laboratory instrumentation access associated with our PhD program in a flexible and condensed schedule expected of a master's program.

Curriculum

The Master of Science in Chemistry requires 30 credit hours. Students may choose a course-based or thesis-based program, depending on their future goals.

Master of Science in Chemistry (Course-Based)

Required Coursework

Code	Title	Hours
CHEM 401	Chemistry Methodology and Communication	3
Select four from the following		*12*
CHEM 424	Molecular Characterization Part A	
CHEM 435	Special Topics in Physical Chemistry	
CHEM 445	Special Topics in Inorganic Chemistry	
CHEM 455	Special Topics in Analytical Chemistry	
CHEM 465	Special Topics in Biochemistry	
CHEM 480	Chemistry for Teachers I	
Chemistry Research (no more than 3cr hours)		
400 Level Chemistry Electives [1]		15
Total Hours		**30**

[1] Elective courses can be distributed or in a specialized area as determined by student. A list of all 400 level Chemistry courses can be found here (p. 1355).

Master of Science in Chemistry (Thesis-Based)

Required Coursework

Code	Title	Hours

CHEM 435	Special Topics in Physical Chemistry (Survey of Modern Physical Chem)	
CHEM 435	Special Topics in Physical Chemistry (Surface Chem and Analysis)	
CHEM 435	Special Topics in Physical Chemistry (Thermodynam/ Protein Structures)	
CHEM 435	Special Topics in Physical Chemistry (Computational Chemistry)	
CHEM 605	Master's Study	0
CHEM 595	Thesis Supervision	0
Total Hours		**30**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Thesis Requirement

In addition to coursework, students in Thesis-based MS in Chemistry will write and defend a research thesis. Once students have completed coursework and are solely working on the thesis they will be enrolled in the appropriate study or supervision course to maintain good standing in the university.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Chemistry (PhD)

Doctoral study in Chemistry at Loyola University Chicago is designed to develop within students the foundational skills for industrial work, academic research, and teaching careers in diverse learning communities. The department of chemistry offers opportunities for graduate study in sub-fields of chemistry such as Physical & Surface Chemistry, Medicinal Chemistry, Theoretical Chemistry, Biochemistry and Chemical Education.

Curriculum

The PhD in Chemistry requires 60 credit hours earned through 6 (six) required courses and 42 credit hours of research in their sub-field, as well as an entrance examination, comprehensive examination, and dissertation. Students may choose a specialization in Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry, or Physical Chemistry.

Code	Title	Hours

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

PhD Students will complete entrance exams, a comprehensive exam and then propose and defend research towards the dissertation.

Graduate Level Chemistry Courses

To fulfill course requirements, students can choose from graduate chemistry courses per specialization listed below.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Child Development (PhD) with Erikson Institute

The PhD in Child Development is offered in partnership between the Erikson Institute and the Graduate School at Loyola University Chicago. Students examine how factors such as culture, social class, and social relationships influence human development from infancy through early and middle childhood. Among others, PhD graduates can consider careers in research, applied child development research, program design and evaluation, college teaching, program administration, and policy analysis.

Curriculum

The PhD in Child Development requires 42 credit hours of coursework, a qualifying paper, and a dissertation. Students enroll in courses both at Erikson Institute and at Loyola simultaneously.

Required Coursework

Code	Title	Hours
ERIK E421	Social and Emotional Development I	3
ERIK E426	Cognitive Development	3
ERIK E477	Seminar Children-At-Risk	3

ERIK E479	Teaching & Learning: Linking Theory & Research to Practice	3
ERIK E481	Seminar Social & Cultural Contexts	3
ERIK E482	Program Evaluation and Implementation Science	3
ERIK E489	Special Topics in Child Development	3
ERIK E486	Teaching Internship	3
ERIK E485	Research Internship	3
ERIK E497	Doctoral Study	0
ERIK E499	Dissertation Supervision	0
Select Two Graduate Electives from Loyola [1]		*6*
Select Three Graduate Methods or Statistics Courses at Loyola [2]		*9*
Total Hours		**42**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

1 Loyola coursework is frequently taken in the School of Education or Psychology department. Students may speak with Graduate Program Director for assistance.

2 A list of approved methods and statistics courses will be made available by the Graduate Program Director.

Qualifying Paper

Upon completion of coursework, students will complete a qualifying paper to demonstrate readiness for candidacy.

Dissertation

Guided by a committee of faculty members, students will execute a substantial original piece of research to advance knowledge in the field of child development. After a public oral defense, the final dissertation will be deposited in a publicly available database per Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the PhD in Child Development, students are expected to understand and apply:

Theory

- basic tenets of influential child development theories and emerging theoretical and conceptual frameworks (e.g., behavioral genetics and developmental neuroscience)
- theoretical and conceptual frameworks utilized in empirical child development research
- processes and mechanisms that promote development and change
- the use of scientific methods to inform and advance theory

Context

- the transactional nature of development and how it interacts with all ecologies within which children are located (e.g., homes, schools, neighborhoods)
- inequities in resources (historical and current) and structural oppressions and how these impact child development
- strengths-based approaches to child development and the impacts that deficit lenses have

Research Methods

- Quantitative and qualitative research methods and how each can be applied to relevant questions in child development
- Univariate and multivariate data analytic techniques, including: correlation and regression (e.g., hierarchical multiple regression and logistic regression), factor analysis (e.g., exploratory, confirmatory) and ANOVA (e.g., repeated measures, MANOVA)
- Up-to-date approaches for analyzing mediation, moderation and interdependence and for interpreting results of these analyses.
- Specific analytic techniques for answering specific types of research questions and for drawing appropriate inferences from results.
- Explain the strengths and limitations of measurement (e.g., reliability, validity) and designs (e.g., correlational, experimental, quasi-experimental; cross-sectional vs. longitudinal), quantitative and qualitative methods and analysis strategies to the study of child development

Intervention

- the landscape of interventions for children and families (e.g., home visiting, early childhood education), and how such programs are developed and evaluated
- research designs for assessing intervention effectiveness (e.g., appropriate application of quasi-experimental, experimental (RCT) and non-experimental research)
- critical elements in intervention research and implementation science (including issues such as fidelity, attrition, dosage and local adaptations)
- ethical and responsible conduct of intervention research (including attention to research with vulnerable populations)
- empirical and theoretical foundations of interventions (either existing or newly designed), including hypothesized mechanisms of change, cultural appropriateness, and research for assessing effectiveness of a specific intervention

Classical Studies

Graduate Program

- Classical Studies Certificate (p. 1364)

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATIN (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Classical Studies Certificate

The Post-Baccalaureate Certificate in Classical Studies offers students who have completed a Bachelor's degree the opportunity to achieve the fluency in reading ancient Greek and Latin required to pursue graduate study in Classics or related fields such as ancient history, archaeology, art history, philosophy, theology, or medieval studies. Coursework at the post-baccalaureate level also introduces some of the scholarship of Classical texts in which graduate study engages. Post-baccalaureate students become able to clarify their professional goals while they sharpen their technical skills and become better qualified to advance on the path they choose.

Linguistic preparation is a critical factor in students' success in the early years of their graduate programs. Committed and otherwise well-qualified students who have been able to begin serious language study only toward the end of their undergraduate careers face a competitive disadvantage. The Post-Baccalaureate Certificate is a credential with which to surmount it.

Loyola's program is shaped in terms of competence attained, rather than a fixed period of study. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Curriculum

The Post-Baccalaureate Classical Studies Certificate has three tracks: Greek and Latin, Greek, or Latin. Each option requires 6 courses (18 credit hours) to complete.

Greek and Latin Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in both Classical languages with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Greek author-courses and at least 6 credit-hours in 300-level Latin author-courses. We recognize some students will have attained intermediate or advanced competence in both languages before their post-baccalaureate study and will need only two semesters of target-level work; some may have had the opportunity to become proficient in one Classical language but have weaker preparation in the other; and some may need to begin their study of both languages and will need additional coursework to complete the Certificate. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Code	Title	Hours
Two 300-level LATN Courses		*6*
Two 300-level GREK Courses		*6*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**18**

Greek Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in Greek with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Greek author-courses and 6 credit-hours in composition or directed studies. We recognize some students will have attained intermediate or advanced competence in Greek before their post-baccalaureate study and will need only two semesters of target-level work, others may need more time; Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Code	Title	Hours
Four 300-level GREK Courses [1]		*6*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**12**

[1] Two of these courses are typically Greek Composition or a Directed Study.

Latin Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in Latin with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Latin author-courses, and 6 credit-hours in composition or directed studies. We recognize some students will have attained intermediate or advanced competence in Latin before their post-baccalaureate study and will need only two semesters of target-level work, others may need more time; Our

program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Code	Title	Hours
Four 300-level LATN Courses [1]		*6*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**12**

[1] Two of these courses are typically Latin Composition or a Directed Study.

Course descriptions for Undergraduate Classical Studies courses can be found here (p. 305) and for Graduate Classical Studies courses can be found here (p. 1360).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Greek and Latin Track

Course	Title	Hours
Year One		
Fall		
LATN 300-Level Course		3
GREK 300-Level Course		3
CLST Elective		3
	Hours	**9**
Spring		
LATN 300-Level Course		3
GREK 300-Level Course		3
CLST Elective		3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Achieve fluency in reading ancient Greek and/or Latin.
- Sharpen technical skills (reading scholarly articles, writing, presenting orally, etc.).
- Clarify professional goals (help you know what you want to do next).
- Gain knowledge of scholarship of classical texts.

Computer Science

Graduate Programs

- Computer Science (MS) (p. 1371)
- Computer Science (PhD) (p. 1373)
- Information Technology (MS) (p. 1374)
- Networking and Information Security Certificate (p. 1375)
- Software Engineering (MS) (p. 1376)
- Technology Management Certificate (p. 1377)
- Web Programming Certificate (p. 1378)

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 170 or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 251 or COMP 271
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 271
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 271
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 271
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 271
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 271
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: (COMP 231 OR (COMP 271 or COMP 402)) AND (MATH 131 OR 161) and (STAT 103 OR STAT 203 OR ISSCM 241 OR PSYC 304 OR instructor permission)
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 271
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 313 and COMP 264; COMP 374 recommended
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: (COMP 150 or COMP 170 or COMP/MATH 215) AND (COMP 264 or COMP 317 or COMP 343)
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 271
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 348 AND (COMP 264 or COMP 271)
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre- or co-requisites: COMP 271
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 447
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 271
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 271
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 347
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 338 or STAT 408)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
Pre-requisites: COMP 163 or COMP 271 or permission of Instructor
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 150 or COMP 170 or COMP 180 or Permission of Instructor
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

Computer Science (MS)

The Master of Science in Computer Science provides a broad background in the practical and theoretical foundations of Computer Science appropriate for those interested in research or in advanced career opportunities.

The M.S. in Computer Science offers the following areas of specialization:

- No Concentration (Default)
- Artificial Intelligence
- Cybersecurity
- Computer Systems
- Thesis Track

Related Programs

Master's

- Information Technology (MS) (p. 1374)
- Software Engineering (MS) (p. 1376)

Curriculum

The Master of Science in Computer Science requires a total of 30 credit hours (typically 10 courses). To achieve depth and breadth, Computer Science students must complete the following to obtain the required 30 credits to graduate:

Code	Title	Hours
COMP 417	Social and Ethical Issues in Computing [1]	3
COMP 460	Algorithms & Complexity [1]	3
Track/Major Requirements		**12**
No Concentration (Default)		
Major Requirements		
COMP 413	Intermediate Object-Oriented Development	
Select three of the following:		
COMP 410	Operating Systems	
COMP 433	Web Services Programming	
COMP 436	Markup Languages	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 443	Computer Networks	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Artificial Intelligence		
Major Requirements		
COMP 479	Machine Learning	
Select one of the following:		
COMP 429	Natural Language Processing	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics	
Select two of the following:		
COMP 406	Data Mining	
COMP 429	Natural Language Processing	
COMP 458	Big Data Analytics	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics	
Cybersecurity		
Major Requirements		
COMP 401	Computer Security	
Select three of the following:		
COMP 431	Cryptography	
COMP 440	Computer Forensics Investigations	
COMP 445	Internet of Things Device and Application Security	
COMP 447	Intrusion Detection and Computer Forensics	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
COMP 488	Computer Science Topics	
Computer Systems		
Major Requirements		
COMP 410	Operating Systems	
Select three of the following:		
COMP 405	Database Administration	
COMP 413	Intermediate Object-Oriented Development	
COMP 439	Distributed Systems	
COMP 443	Computer Networks	
COMP 451	Enterprise Networking	
COMP 462	Advanced Computer Architecture	
COMP 464	High-Performance Computing	
COMP 472	Compiler Construction	
General Elective Courses		12
Total Hours		**30**

[1] Either required course above can be substituted with another graduate course under the discretion of Graduate Program Director if students had their equivalent in their undergraduate program.

Prerequisite/Preparation Courses

All of these courses must be taken if you do not have a four-year undergraduate degree in a related field, and will not be counted towards the MS degree requirements.

Code	Title	Hours
COMP 400A	Object-Oriented Programming	3
COMP 400B	Data Structures I	3
COMP 400C	Data Structures II	3
COMP 400D	Computing Tools and Techniques	1
COMP 400E	Discrete Structures	3

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director.Students may not use an introductory course to satisfy a foundation or elective requirement.

Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.

- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived with discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

General Electives

General electives can be any COMP 400 (p. 1365)-level class, except the preparation courses listed above. The elective course options are common for all programs, differing only in the total number of credits required. There are numerous options for independent study, including a programming project, research, or a service-oriented project. Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship to fulfill electives.

Thesis Tracks

MS in Computer Science students may elect to craft a master's thesis. Course work is strongly recommended over the thesis option, especially for those not planning on a research-oriented career. Many students pursuing the thesis option would be considering a PhD program.

Students wishing to do a thesis should discuss this option as early as possible with the Graduate Program Director. These may involve research in purely theoretical computer science (for example, development or analysis of algorithms), the development of a software package, or instrumentation, measurement, and analysis of existing systems (for example, studying network performance). Because of this wide range, there is no one formal course in research methods. Courses in the electives list contain a significant component of area-specific integrated research methods material. Students interested in writing a thesis are strongly urged to seek advising as early as possible as to which electives will be the most appropriate for the student's proposed area of research.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

1. Identify a faculty advisor and select a tentative topic or area of research.The existing program allows you to take up to 6.0 hours of COMP 490 Independent Project. You will typically begin your research program in such a course, though you may also identify an advisor and select a tentative topic as part of a conventional classroom.
2. Secure permission to pursue the thesis option from the Graduate Program Director. The Graduate Program Director, in consultation with you and your chosen advisor, recommends a thesis committee to the Graduate School. The committee will consist of at least three faculty members; normally the committee director will be the advisor.
3. Once required courses are concluded and a thesis committee is approved, you maintain full-time status by enrolling in the zero-credit-hour COMP 605 Master of Science Study or COMP 595 Thesis Supervision.
4. You will then prepare a formal research proposal, in consultation with your advisor. This proposal must be submitted to your committee for review. Any research involving human subjects will required IRB approval or exemption *before* the Graduate School approves your proposal. After this step you are now ready to "conduct research" for the project.
5. Upon completion of your thesis, you will be required to formally defend your research. Schedule this with your committee. Your thesis should be in nearly final form. Typically you should give the committee three weeks to read the final draft of the thesis before the defense date. Once approved by your committee, the GPD will submit the ballot for Graduate School approval and the student will submit their thesis for publication in the university eCommons.

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students will gain a broad background in the practical and theoretical foundations of Computer Science.

Students in a specific concentration will gain mastery in that area, which students who pursue the thesis option will gain deep expertise in their research area.

Computer Science (PhD)

The PhD in Computer Science is a new research-focused doctoral program with the objective to help students develop proficiency in conceptualizing and implementing computer models and tools that address societal needs. This proficiency will enable students to analyze and review critically the scientific work in their area of interest and in the broader field of computer science.

Curriculum

The PhD in Computer Science requires 60 credit hours of coursework and a dissertation.

Required Coursework

Code	Title	Hours
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
COMP 460	Algorithms & Complexity	3

Four Electives		*12*
Three Doctoral Qualifying Courses [1]		*9*
COMP 429	Natural Language Processing	
COMP 445	Internet of Things Device and Application Security	
COMP 458	Big Data Analytics	
COMP 462	Advanced Computer Architecture	
COMP 471	Theory of Programming Languages	
COMP 472	Compiler Construction	
COMP 474	Software Engineering	
COMP 476	Automata & Formal Languages	
COMP 479	Machine Learning	
COMP 487	Deep Learning	
Dissertation Research		*21*
Advanced Electives		*9*
Total Hours		**60**

[1] To establish qualifications for research, students must take three courses covering any three of the four pillars of computer science (theory, systems, software, and artificial intelligence). A grade of A is required in all three courses for successful qualification for doctoral candidacy.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Research and Dissertation

The doctoral program culminates in a dissertation that makes an original contribution to the discipline. Along the way, doctoral students are expected to write peer-reviewed conference and journal articles, engage in community outreach, develop their pedagogical skills, and pursue increasingly complex research projects. Students are also expected to open-source their research projects. The final dissertation must be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the PhD in Computer Science, students will be able to demonstrate:

- Fundamental understanding of the principles, major research findings and current open problems in their area of emphasis
- Effective scientific communication skills
- Proficiency in critical thinking (including social impact)
- Appropriate use of the scientific method
- Technical writing proficiency
- Original scholarship and the ability to conduct independent research
- Understanding of equitable and inclusive computer science pedagogy
- Understanding of the grant proposal development process and various funding agencies

Information Technology (MS)

The Master of Science in Information Technology is designed for current and aspiring professionals in charge of developing, implementing, operating, and managing information systems in a variety of organizations.

Students in this program will gain a broad technical understanding of current and emerging technologies in the industry, familiarity with systems engineering concepts, and a solid foundation in net-centric computing. They will also have a firm grasp of current and future effects of the convergence of the telecommunications, media, and information technology sectors.

Courses may be taken in person or online.

The M.S. in Information Systems offers the following tracks of specialization:

- Data Management
- Technology Management
- IT Security
- Enterprise Networking

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Curriculum

The Master of Science in Information Technology requires a total of 30 credit hours (generally ten 3 credit courses). To achieve depth and breadth, Information Technology students must be complete the following:

Code	Title	Hours
COMP 417	Social and Ethical Issues in Computing [1]	3
Select Three Courses in a Track [2]		**9**

Data Management (DM) Track

COMP 405	Database Administration	
COMP 406	Data Mining	
COMP 425	Rapid Applications Development	
COMP 453	Database Programming	
COMP 488	Computer Science Topics	
Technology Management (TM) Track		
COMP 403	Operations Management	
COMP 404	Organizational Development	
COMP 420	Software Systems Analysis	
COMP 477	IT Project Management	
IT Security (IS) Track		
COMP 401	Computer Security	
COMP 440	Computer Forensics Investigations	
COMP 447	Intrusion Detection and Computer Forensics	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
Enterprise Networking (EN) Track		
COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 451	Enterprise Networking	
Select six graduate level COMP Electives [3]		*18*
Total Hours		**30**

1 This course can be substituted with another graduate course at the discretion of Graduate Program Director if students had the equivalent in their undergraduate program.

2 Courses can be substituted at the discretion of the Graduate Program Director. Substitutions will usually be limited to special-topics courses (COMP 488 Computer Science Topics) which have learning outcomes closely related to other courses in the track in question.

3 Electives can be any COMP 400 level class (p. 1365), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship.

Preparation Courses

The following courses are required if you do not have a four-year undergraduate degree in a related field.

- COMP 400A Object-Oriented Programming
- COMP 400B Data Structures I

Students may not use an introductory course to satisfy a foundation or elective requirement. Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.
- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived under the discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director. Students may not use an introductory course to satisfy a foundation or elective requirement.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students will gain familiarity with the broad outlines of computer technology, and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Networking and Information Security Certificate

This certificate program is focused on the increasingly important area of network security within the broader field of information technology. The coursework includes broader courses like Computer Networks and Network Security, plus more specialized courses on Intrusion Detection, Wireless Security, and Computer Forensics.

Related Programs

Certificate

- Technology Management Certificate (p. 1377)
- Web Programming Certificate (p. 1378)

Curriculum

Required Courses

Code	Title	Hours
COMP 447	Intrusion Detection and Computer Forensics	3
Select Two Electives		*6*

COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 488	Computer Science Topics	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Outcomes for all Certificate Programs

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.

Outcomes for Networking and Information Security

- Students will be able to manage and address security concerns in networks, including wireless networks.
- Students will acquire the skills to monitor and secure computers and network environments.
- Students will have a fundamental understanding of computer forensics, and be able to design and implement a forensics examination.

Software Engineering (MS)

The Master of Science in Software Engineering caters to students interested in software engineering,software development, and other contemporary topics of long-term value to the industry. Most early careers in the industry are based on either software development or managerial aspects of software development. This degree places more weight on software development. For those seeking a greater focus on managerial aspects, we offer the M.S. in Information Technology (p. 1374).

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Related Programs

Master's

- Computer Science (MS) (p. 1371)
- Information Technology (MS) (p. 1374)

Curriculum

The Master of Science in Software Engineering requires a total of 30 credit hours. To achieve depth and breadth, Software Engineering students must complete the following:

Code	Title	Hours
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
Three Courses from Restricted Elective Groups		**9**
Group 1 (at least one course)		
COMP 424	Client-Side Web Design	
COMP 433	Web Services Programming	
COMP 434	Enterprise Software Development	
COMP 437	Intro Concurrent Programming	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 460	Algorithms & Complexity	
COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Group 2		
COMP 410	Operating Systems	
COMP 412	Open Source Computing	
COMP 420	Software Systems Analysis	
COMP 436	Markup Languages	
COMP 441	Human-Computer Interaction	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
General Elective Courses [1]		*15*
Total Hours		**30**

[1] Electives can be any COMP 400 level class (p. 1365), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship.

Prerequisites/Preparation Courses

All of these courses must be taken if you do not have a four-year undergraduate degree in a related field.

Code	Title	Hours
COMP 400A	Object-Oriented Programming	3
COMP 400B	Data Structures I	3

COMP 400C	Data Structures II	3
COMP 400D	Computing Tools and Techniques	1

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director. Students may not use an introductory course to satisfy a foundation or elective requirement.

Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.
- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived under the discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

If a student enters the program with an academic record of success in a a course similar to COMP 413 Intermediate Object-Oriented Development, or if the student can demonstrate programming experience with the concepts of COMP 413 Intermediate Object-Oriented Development, then the Graduate Program Director may substitute for the COMP 413 Intermediate Object-Oriented Development requirement a course in Group 1 or 2 that has COMP 413 Intermediate Object-Oriented Development as a prerequisite.

The department may substitute newly created permanent courses as members of either Group 1 or Group 2. Similarly, COMP 488 Computer Science Topics offerings may also be designated as members of either Group 1 or Group 2. Students are responsible for verifying any such substitutions in advance with their Graduate Program Director.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students will gain familiarity with software development in a wide range of application contexts, using a range of programming languages and tools.

Technology Management Certificate

This certificate program is focused on preparing students for leadership roles in managing the organizational impacts of technological change. The coursework includes broader courses like Organization Change and Development, plus more specialized courses on Project Management and modeling with Operations Management.

Related Programs

Certificate

- Networking and Information Security Certificate (p. 1375)
- Web Programming Certificate (p. 1378)

Curriculum

The Certificate in Technology Management requires 9 credit hours.

Code	Title	Hours
Select three of the following:		*9*
COMP 403	Operations Management	
COMP 420	Software Systems Analysis	
COMP 477	IT Project Management	
COMP 488	Computer Science Topics (Organizational Change and Development)	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.

Outcomes: Technology Management

- Students will acquire a better understanding of the structure of an organization and how this impacts and is impacted by technology acquisition.
- Students will develop models to support business decisions.

- Students will be able to identify IT system requirements and build a design or plan and execute a project to satisfy those requirements.

Web Programming Certificate

This certificate program is focused on mastering programming skills required to create and support applications on the web, including mobile web development, and specialized courses on client-side web programming, and a server-side applications course.

Related Programs

Certificate

- Networking and Information Security Certificate (p. 1375)
- Technology Management Certificate (p. 1377)

Curriculum

The Certificate in Web Programming requires 9 credit hours. For students entering with limited background, CPST 342 Introduction to Web Application Development should be completed first.

Code	Title	Hours
Select three of the following:		*9*
COMP 422	Software Development for Wireless and Mobile Devices	
COMP 424	Client-Side Web Design	
COMP 441	Human-Computer Interaction	
COMP 425	Rapid Applications Development	
CPST 342	Introduction to Web Application Development [1]	
Total Hours		**9**

[1] Offered by the School of Continuing Professional Studies.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.

Outcomes: Web Programming

- Students will acquire proficiency in object-oriented programming.
- Students will be able to develop applications incorporating a variety of both client-side and server-side technologies, using appropriate protocols.
- Students will design interfaces that promote ease of user interaction in a variety of platforms.

Criminal Justice and Criminology

The department of Criminal Justice and Criminology offers a master's degree that prepares students to excel in today's evidence-based criminal justice system. A supportive environment accommodates the diversity of our students' lives with evening classes, option of part-time or full-time status, and flexible tailoring of electives. The department is well-connected to local and federal agencies. Graduates have been placed in all areas of the criminal justice system including state and county agencies, and federal agencies such as the FBI, Secret Service, Federal Probation, Homeland Security, Federal Pretrial Services and DEA. Graduates also have been admitted into PhD programs or law schools.

Graduate program

Criminal Justice and Criminology (MA) (p. 1380)

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Program Evaluation and Research (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information, which is often present in everyday criminal justice practice. Students learn how to generate and interpret statistical output using SPSS-PC, and learn which statistical tools are appropriate for specific measures and research questions.
Outcomes:
To select the correct statistical tools and interpret output To write statistical information To conduct SPSS-PC

CJC 405 Professional Ethics (3 Credit Hours)
The course defines the ethical responsibilities and explores the ethical dilemmas faced by police, court, and corrections officials. Moral theories are discussed. Students critically analyze their own and others' beliefs. They learn how to think constructively about ethical dilemmas, and how to articulate the inherent ethical issues in the field of criminal justice.
Outcomes:
To analyze moral dilemmas and ethical situations that professionals may face

CJC 408 Applied Research in Criminal Justice and Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
This is a student-initiated research course, supervised by the instructor. Students will conduct applied research that informs the policies or practices of a stakeholder group or criminal justice agency. This course encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: CJC 401; Graduate Students Only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Varies by topic

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.

CJC 417 Forensic Science and the Criminal Justice System (3 Credit Hours)
Graduate Students Only. This course introduces the basic principles and applications of the biological, chemical, physical, medical and behavioral sciences currently practiced and the limitations of the modern crime laboratory. The course then explores uses of forensic science and the applicability to the criminal justice system. Current issues, examples, and presentations are integrated into course material.
Outcomes:
Understand the basic concepts, strengths, limitations and challenges of the forensic sciences discipline, the application of the forensic sciences to the management, operations, and policies of criminal justice system, from crime scene processing through adjudication

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 500 Directed Research (1-6 Credit Hours)
No course description is available

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A in CJC 409 and CJC 407
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting. Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper.
This course satisfies the Engaged Learning requirement.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the written comprehensive examination.

Criminal Justice and Criminology (MA)

The Master of Arts in Criminal Justice and Criminology provides students with a cutting edge education that will prepare them to assume leadership roles in criminal justice and related agencies as well as to pursue more advanced educational opportunities.

Curriculum

The Master of Arts in Criminology and Criminal Justice requires 30 credit hours of coursework, consisting of four required courses, five elective courses, and a culminating experience. In order to demonstrate cumulative proficiency, students are required to either pass Applied Research in Criminal Justice & Criminology or complete a thesis. By default, all students are placed in the non-thesis option unless they select and are approved for the thesis option. Students who began the program prior to Fall 2022 have the option of taking the Comprehensive Exam, and may speak with the Graduate Program Director for more information.

Coursework Requirements

Code	Title	Hours
Required Courses		**13**
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
CJC 403	Program Evaluation and Research *	3
CJC 404	Applied Data Analysis and Interpretation *	4
Select Five Electives [1]		**15**
CJC 405	Professional Ethics	
CJC 415	Mental Illness and Crime	
CJC 416	International Criminal Justice	
CJC 417	Forensic Science and the Criminal Justice System	
CJC 499	Independent Study	
CJC 500	Directed Research	
CJC 502	Practicum in Criminal Justice	
Variable Topics Electives- Maximum of 2 in each area		
CJC 410	Advanced Topics in Criminology	
CJC 411	Advanced Topics in Policing	
CJC 412	Advanced Topics in Courts	
CJC 413	Advanced Topics in Corrections	
CJC 414	General Special Topics	
Culminating Experience Course		
CJC 408	Applied Research in Criminal Justice and Criminology [2]	2
or CJC 501	Thesis Research	
Total Hours		**43**

* Student must earn a grade of **B** or better in order to graduate (a B- or below will not fulfill this requirement), and class must be repeated if grade below a B is earned.

[1] In consultation with the Graduate Program Director, students may select graduate level electives among those offered within the Department of Criminal Justice and Criminology as well as from other programs such as Social Work, Psychology, Women's Studies and Gender Studies, Public Policy, or Sociology.

[2] Students choosing the thesis track will complete a research thesis and take CJC 501 Thesis Research, while students who choose a non-thesis option will complete a major research/policy paper and take CJC 408 Applied Research in Criminal Justice and Criminology.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Thesis Option

Students who have aspirations to pursue research in their career, or pursue a PhD, should consider the thesis track. Optimally, students should complete CJC 403 during the fall semester of their first year in the graduate program. In order to be approved for the thesis option, students must receive permission from the Department of CJC's Graduate Committee. The following requirements must be met:

- Completion of CJC 403 (Program Evaluation and Research Methods) with a grade of A- or better (no exceptions);
- Submission of a class paper to demonstrate writing skills that are acceptable to the Department of CJC's Graduate Committee; and,
- Submission of a thesis approval form that provides a brief description of the proposed research question, the proposed methodology, and a detailed timeline.

Once a student has selected the thesis option, they will sign a written agreement acknowledging that they cannot switch back to the non-thesis option if it becomes too difficult or takes longer than anticipated.

Students will work with their thesis chairperson to complete an acceptable draft of their thesis proposal. The thesis proposal draft will consist of a detailed literature review, research questions or hypotheses, research design, analysis plan, and a discussion of the strengths and limitations of the proposed research.
If data collection involves human participants, students must follow all of the requirements established by Loyola's Institutional Review Board (IRB) for the Protection of Human Subjects. Students cannot submit an IRB application until their thesis proposal is officially approved.
Once the formal thesis proposal has been approved, students will then work towards the completion of the research and composition of the thesis. Once final draft is reviewed and approved by entire committee, the student will make a formal presentation (defense) of the thesis and submit it to a publicly available database per Graduate School policies.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Data Science

GRADUATE PROGRAMS

- Data Science (MS) (p. 1381)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Data Science (MS)

Students earning a MS in Data Science will gain a wide variety of skills needed to work with many different types of data, and to analyze, visualize, and extract useful information from data in a variety of ways. They will apply those skills in various contexts, especially during their capstone consulting class or thesis work. This 30-credit program has two tracks (thesis and non-thesis), can be completed full-time or part-time, and includes courses from Computer Science, Statistics, and Mathematics.

CURRICULUM

The Master of Science in Data Science requires 30 hours of coursework and a capstone project. Students may elect to conduct research and write a thesis instead of the capstone.

Non-thesis Track

Code	Title	Hours
Statistics Requirements		**6**

	Total Hours	**31**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

LEARNING OUTCOMES

- The ability to manage large data sets in preparation for data science analysis.
- A working knowledge of statistical techniques and computer algorithms, and the ability to apply these methods to a wide array of real-world problems.
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible and ethical research.
- The ability to program in both the R and Python programming languages.
- Complete a project demonstrating competence in the field of data science.
  - Non-thesis track: Students will be required to complete a real-world data science project prior to graduating from this program, either through our consulting course, an internship, an independent study, or other appropriate project
  - Thesis track: Students will be required to undertake a research project culminating in a thesis

Digital Humanities

GRADUATE PROGRAMS

- Digital Humanities (MA) (p. 1383)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

Digital Humanities (MA)

The Master of Arts in Digital Humanities program at Loyola University's Center for Textual Studies and Digital Humanities (CTSDH) combines theoretical and practical courses. Its aims are ultimately practical and professional, training new digital specialists for the growing knowledge and information economy and today's research in humanities disciplines. .

Because the nature of much Digital Humanities work is constructive and project-based, students in the MA program will be given hands-on training in the workshop or seminar-based classes, such as training in text editing and markup, programming, interface design, project management, and digital archive construction. The MA program also explores theoretical, critical, social, and ethical contexts for thinking about Digital Humanities research and applications, including issues of data ethics, design justice, archive theories, public humanities, and digital preservation. The Master of Arts in Digital Humanities program was designed with partner departments including Computer Science, English, and History for students with interdisciplinary interests. We encourage students with interests at the intersection of culture and technology to consider this degree, which allows one to elect courses from the various partner departments.

CURRICULUM

Required Courses

The MA in Digital Humanities requires coursework totaling 30 credit hours and the completion of a capstone project. Students take six (6) core seminars in addition to a faculty-led practicum and two electives within the field of their choosing. In a student's final semesters they will

work with faculty members to design and build their own digital research project.

Seminar topics range from an introduction to the methods and methodology of the field, to special topics in public history, design, research methods, textual criticism, human-computer interface, and web application development. Courses emphasize both discussion of the theories that shape and define the field of Digital Humanities as well as hands-on project building. Coursework is designed to provide technical skills to humanities students, as well as humanistic scholarly research methods to those with a technical or computer science background.

Code	Title	Hours
Core Curriculum		*18*
DIGH 401	Introduction to Computing	
DIGH 402	Digital Humanities Design	
DIGH 403	Introduction to Web Application Development	
DIGH 405	Special Topics in Digital Humanities	
COMP 417	Social and Ethical Issues in Computing	
ENGL 413	Textual Criticism	
Two 400-Level Electives Chosen with Advisor [1]		*6*
DIGH 500	Digital Humanities Practicum	3
DIGH 501	Digital Humanities Project	3
Total Hours		**30**

[1] Electives can be any 400-level course but do check to see if there are course prerequisites. Suggested departments for elective course offerings include English, History, Communications, Environmental Sustainability, Women's and Gender Studies, and Theology. Students who have met necessary pre-requisites may be eligible to take other 400-level Computer Science classes, with approval from the Chair of Computer Science. Please confer with the Graduate Program Director for assistance.

Evaluation

Each student will produce a capstone project in one of their final courses (DIGH 501 Digital Humanities Project under the direction of an advisor; the capstonewill demonstrate knowledge and skills gained in coursework and will address one or more key problems in digital humanities research or applications.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

English

Mission and Goals

The Department of English at Loyola University Chicago seeks to promote the university's mission to encourage freedom of inquiry, the pursuit of truth and care for others through teaching, scholarship and service of the highest caliber.

In its teaching, the Department of English seeks to provide students with an education of the highest quality in the English language, in literature written in English and in critical and creative writing, judiciously combining breadth with depth, tradition with contemporaneity. It seeks to attract the best possible students from diverse geographical, professional, racial and ethnic backgrounds; it encourages minority and foreign applicants and those returning to school after an interruption of their academic lives. It encourages students throughout their programs so as to enable them to progress expeditiously to their degrees and to gain the maximum benefit from their experience.

Through the work of its faculty, the Department of English also strives to participate in and contribute to the wider community of scholarship, research and pedagogical theory and practice in the disciplines of literary and critical studies; in creative and critical writing; in comparative literature; in gender, ethnic and cultural studies; in teacher training; and in linguistics.

The Department of English also seeks to serve the larger university and greater Chicago community through public event programming, collaborative projects with secondary schools and other colleges and universities, and general assistance.

Graduate Programs in English

The Department of English's interdisciplinary M.A. and Ph.D. programs each offer courses across three broad historical areas, with a special emphasis in textual studies

- Maintain a curriculum and examination structure that facilitates the advanced study of literature in English in its cultural context, as experienced in any one of our three broad historical areas and textual studies: Medieval and Renaissance Literature, Nineteenth-Century Studies, Modern Literature and Culture, and Textual Studies and Digital Humanities
- Allow students to learn relevant literary and social history as well as acquire training in careful textual analysis
- Provide students with training in research and bibliographic methods, acquaint them with basic issues in the area of textual criticism, develop their reading and analytical skills, and offer study in the history and theory of literary criticism
- Promote interest in and knowledge about the linguistic contexts in which literary works exist
- Strive by example, precept, and encouragement to enable students to improve their research writing skills, to apply these skills professionally outside the classroom and to become publishing scholars
- Prepare students to become effective teachers, equipping them to teach composition and literature courses at the college, university and advanced secondary-school level, and assisting them to develop their teaching potential through experience tutoring in the Writing Center, teaching composition and assisting in the teaching of literature courses in the department
- Support scholarly development of the faculty and students by promoting teaching and research assistantship programs that bring faculty and students together inside and outside the classroom to work on pedagogical and scholarly issues of mutual interest
- Strive to assist students in finding professional employment that makes effective use of the skills and knowledge acquired in their training, both inside and outside the academic community

Graduate Programs

- English (MA) (p. 1387)
- English (PhD) (p. 1388)

ENGLISH (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 466 Eighteenth-Century Novel (3 Credit Hours)
This course includes prose fiction in the Restoration and earlier eighteenth century; the mid-century novels of Richardson, Fielding, and Smollett; the novel after 1760, including the Gothic novel and the sentimental novel; Sterne and Burney.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

English (MA)

Curriculum

Program Requirements

The Master of Arts in English requires 30 semester hours of coursework and a written examination. The program is designed so that a full-time student can complete these requirements in a year and a half of study.

Required Courses

Code	Title	Hours
ENGL 400	Intro to Graduate Study [1]	3
Select Three Courses in Literary Studies Courses *(p. 1388)*		*9*
Select One Course in Critical Theory		*3*

ENGL 492	American Romanticism	3
ENGL 493	American Realism	3
ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Part-time students must complete all requirements for the degree within four years.

If you are required to take certain undergraduate courses as a condition of admission, they have priority over all other program requirements. Undergraduate courses cannot be applied to the MA.

MA Qualifying Examination

All students will take a four-hour written examination at the end of their course work. The exam is given during the last week of second summer term in August, and the first day of exam week in December and May. The exam will be prepared and graded by a four-member MA examining committee using a standard set of questions, each testing a particular skill. Faculty teaching graduate seminars in any one year will submit a short list of required readings (literary, critical, and theoretical) from their courses. From that list, the examining committee will form a master list of major texts to be used by students in answering the exam questions. The short lists will be shared with students prior to the exam, the master list will not.

The exam will be graded as High Pass, Pass, Low Pass or Fail. The minimum requirements for the MA degree will be a Low Pass on the exam and a B average in all course work. MA students who fail the exam may retake it once, at the conclusion of the following semester. PhD students who fail the exam may also retake it once, but only to complete the MA degree: they will not be allowed to continue in the program.

The MA exam serves as both a requirement for the master's degree and a qualifying exam for students intending to proceed toward the PhD. The Committee on Graduate Programs will consider the performance of such students in all facets of the MA program; however, the MA exam is designed as a key indicator of students' ability to continue work toward the PhD

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Evaluate and apply the principles of a range of critical theories and/or textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works.

English (PhD)

Curriculum

The PhD requires a total of 60 credit hours of coursework, a qualifying written and oral examination, and a dissertation. According to Graduate School regulations, work on the PhD must be completed eight years from the time you have begun coursework applicable to the degree; if you entered with an MA, you will have six years from the time of beginning course work for the PhD.

Required Coursework

Code	Title	Hours
Required Courses		*9*
ENGL 400	Intro to Graduate Study	
ENGL 402	Teaching College Composition	
ENGL 502	Independent Study-Doctoral Qualification	
Select two of the following: [1]		**6**
Textual Studies Courses		

ENGL 412	History of the Book to 1800
ENGL 413	Textual Criticism
ENGL 415	Media and Culture
Critical Theory Courses (at least one)	
ENGL 410	Contemporary Literary Criticism
ENGL 420	Topics in Critical Theory
ENGL 422	Postcolonial Theory
ENGL 423	Marxist Literary Theory
ENGL 426	Feminist Theory and Criticism
ENGL 427	Dramatic Theory

[1] At least one course must be in critical theory. Students should confer with Graduate Program Director when selecting courses to ensure that they are the best fit for their course of study.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Field-Specific Requirements

Doctoral students in English who have completed the MA degree will enter one of the following three specialized fields and must meet the course requirements defined for that specialization. Students will be free to change their field at any time, provided that they are able to fulfill the course requirements for the new field. Students may choose to specialize in Medieval and Renaissance Literature, Nineteenth-Century Studies, or Modern Literature and Culture. Students will complete at least six (6) courses in their specialization, at least one (1) course in each of the other two specializations, and seven (7) 400-level elective courses of their choosing. ***Note that several of these requirements will be partly or wholly fulfilled by all students as a part of their MA study.***

If a student has been required to take certain undergraduate courses as a condition of admission, those courses have priority over all other program requirements. Undergraduate courses cannot be counted towards the PhD degree requirements.

Medieval and Renaissance Literature Courses

Code	Title	Hours
ENGL 440	Topics in Medieval Literature	3
ENGL 441	Old English Language & Literature	3
ENGL 443	Middle English Literature	3
ENGL 444	Medieval Drama	3
ENGL 447	Chaucer	3
ENGL 450	Topics in Early Modern Literature & Culture	3
ENGL 455	Shakespeare	3
ENGL 456	Early Modern Drama	3
ENGL 457	Seventeenth-Century Literature	3
ENGL 458	Milton	3

Nineteenth-Century Studies Courses

Code	Title	Hours
ENGL 470	Topics in Romanticism	3
ENGL 471	Poetry of Romantic Period	3
ENGL 475	Topics in Victorian Literature	3
ENGL 476	Victorian Poetry	3
ENGL 477	Victorian Prose	3
ENGL 478	Victorian Novel	3
ENGL 490	Topics in American Literature	3
ENGL 491	Early American Literature	3
ENGL 492	American Romanticism	3
ENGL 493	American Realism	3

Modern Literature and Culture Courses

Code	Title	Hours
ENGL 480	Topics in Modernism	3
ENGL 481	Modern Poetry	3
ENGL 482	Modern Drama	3
ENGL 483	Modern Novel	3
ENGL 484	Literature and Culture of the Jazz Age	3
ENGL 485	Contemporary Literature	3
ENGL 487	Postcolonial Literature	3
ENGL 488	20th Century Literature in English	3
ENGL 489	Magic Realism	3
ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Research Tool

Prior to taking the Ph.D. qualifying examination, students pursuing a Ph.D. must demonstrate a reading knowledge of a language other than English, by passing a translation examination, by taking a graduate-level course in a foreign language and receiving a grade of B or higher, or by showing proof that one passed a graduate-level course or an exam as a graduate student at another institution. Languages accepted are French, German, Spanish, Italian and Latin (though others may be approved by the Graduate Program Director). Students are encouraged to discuss completion of this requirement with the Graduate Program Director soon after entering the program.

PhD Qualifying Examination

The PhD examination includes a written and an oral component. The written exam consists of three three-hour papers covering fields chosen by the student in consultation with his or her examining committee and the director of graduate programs. With the approval of their examiners, students must define three fields of the following kinds:

- An area of **critical theory**
- An **author**
- The **literature of an historical period and/or genre,** which may be additionally be focused on a particular **subgroup**

Students may include up to three fields of the last type, but only one field of any other type. Examples of fields of the third type might include:

- 17th-century British poetry
- Early modern women's writing
- Postcolonial drama
- African-American literature, 1914–1959
- Contemporary working-class fiction of the US
- Modernist poetry
- Women's autobiography

Any or all of the exam fields may be related to the student's dissertation topic; however, some breadth across fields is expected. And although the selection of texts within each field will be influenced to some extent by the student's particular interests and approach, he or she will also be expected to demonstrate a general mastery of the field.

Field descriptions and reading lists are worked out by the student in consultation with his or her examining committee and must be approved by the examiners and by the Graduate Program Director well before the written examination is scheduled. (Exams are given in November, February, and April each year.) The Graduate Program Director will provide you with a packet of materials detailing all exam-related procedures. ***Reading lists are due several months before the exam date, and field statements are due one month prior to the exam. Students cannot schedule their exam times until the field statements have been submitted.*** The written examination is followed by a two-hour oral examination that is based on, but not limited to, the written portion.

Dissertation and Defense

Students advance to doctoral candidacy once they have completed all course requirements, fulfilled the Foreign Language requirement, passed the Ph.D. qualifying examinations, established a dissertation committee, and successfully proposed their dissertation (ideally within 6 months of completing the qualifying exams).

The selection of dissertation topic, director, and committee (two additional faculty readers) is made in consultation with the Graduate Program Director. Once a student has a committee and a successful proposal, their progress will be monitored by their dissertation director, who will report on your work to the Graduate Program Director.

When your dissertation is completed, you will give a Final Public Presentation and Defense of your project, followed by a question-and-answer session led by your dissertation committee. Reader's copies are due to the committee one month prior to the defense, with a reader's ballot for each member. Once these ballots are submitted, the Graduate Programs secretary will announce the defense publicly. At the defense, students need to present the chair of the committee with the Graduate School ballot for approval of the dissertation.

Students should check the Graduate School calendar for deadlines on format check and submission of the dissertation and degree conferral timelines

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Use a variety of research methods (e.g., close reading, textual criticism, linguistic analysis, archival, biographical) and interpret the findings in order to produce a sustained analysis of one or more literary works.

History

Graduate Study in History

With strengths in Public History, United States, and European Social and Cultural History with specialties in Urban history, Digital history, Women's and Gender history, and Transnational history, the Loyola History Department offers master's programs in history and public history; a master's program in public history and library information science (jointly with Dominican University); and a doctoral program in history and public history.

Led by a diverse and nationally-acclaimed faculty, our curriculum is designed to develop a deep understanding of the human past and to provide students with insight into the world in which they live through a perspective of time and change. Loyola History graduate students also have excellent opportunities for learning and exploration outside of the classroom.

Infused by our Jesuit mission, we support study that deepens our understanding of the human condition, reflects a shared commitment to a just and humane society, and puts knowledge to work in the world.

Graduate Programs

- History (MA) (p. 1393)
- History (PhD) (p. 1394)
- Public History (MA) (p. 1396)
- Public History Program with Dominican University (MA/MLIS) (p. 1397)

History (HIST)

HIST 400 Twentieth Century Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 433 Modern European Nations (3 Credit Hours)
This course will analyze selected topics in the political, international, social, economic, and cultural history of particular European nations from the late eighteenth century to the present.
Outcomes:
Students will gain familiarity with the history and historiography of a single country within the larger context of modern European history and will sharpen their writing and analytical skills

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 451 History of The American West (3 Credit Hours)
This class focuses on the historiography of western and frontier history from the late 1980s to the present.
Outcomes:
Students will be introduced to the major contemporary historians of the western frontier; They will develop a perspective on the frontier process from 1500 into the 20th century and become familiar with major field sub-themes

HIST 456 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Management of History Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Latin American History to 1810 (3 Credit Hours)
This course introduces students to major themes in the colonial history of the region known today as Latin America from conquest to independence.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as an understanding of the major historiographical debates

HIST 497 Latin Amer Hist Since 1810 (3 Credit Hours)
This course introduces students to the major themes and trends in the development of Latin America from the Wars of Independence to the present.
Outcomes:
Students will demonstrate an understanding of the broad themes in the area's history as well as the major historiographical debates

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 523 Seminar in Medieval History (3 Credit Hours)
The topics and descriptions of this course vary according to interest of the instructor.
Outcomes:
Students will produce a major research paper related to the themes of the class

HIST 533 Topics in Modern European History (3 Credit Hours)
This course will introduce students to historical research using primary documents. The topics and themes of the research seminar will vary according to the interest of the instructor but will focus on Modern Europe.
Outcomes:
Students will produce a major research paper related to the themes of the course

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 583 Quantitative Methods in Social History (3 Credit Hours)
This course is an introduction to the use of social science theory and quantitative methodology in social history. It includes hands-on instruction in computer database and statistical analysis programs and has an individual research component.
Outcomes:
Students will demonstrate their ability to read critically works using quantitative techniques and will use these methods in their own research

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

History (MA)

The Department of History supports graduate study in Public History and US and Social and Cultural History with specialties in Urban history, Digital history, and Women's and Gender history. We offer master's programs in history and public history. History master's students work closely with faculty in and out of the classroom as they train to become academic historians, public historians, teachers, archivists, museum professionals, and researchers as well as possess sufficient preparation to pursue other career pathways.

Curriculum

The Master of Arts program requires 30 credit hours, a comprehensive exam, and a research tool. This degree may be completed en route to the PhD with agreement of the Graduate Program Director.

Code	Title	Hours
Required Courses		
HIST 400	Twentieth Century Approaches to History	3
Two Research Seminars (one in major field)		*6*
Select Three Courses in Major Field		*9*
Select Three Courses in Minor Field		*9*
Select One 400-level elective [1]		*3*
Total Hours		**30**

[1] 400 level history courses can be found here (p. 1390).

Major and Minor Field

Students in the MA program are required to select a major field in United States history. In addition, they will choose a minor field in United States, Public, and Gender and Women's history. Thematic minor fields (such as race and ethnicity of colonialism and empire) may be created with the

approval of the Graduate Program Director. Students may also select a minor field from another discipline with approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to fulfill the minor.

Research Tool Requirement

All master's level students must demonstrate competence in a research skill (oral history, public history media, or a reading knowledge of a foreign language, for example) appropriate to their major field. They are expected to master this skill before advancing beyond 18 credit hours. Coursework taken to master a language, oral history, or public history media does not apply toward graduation.

Comprehensive Examinations

Toward the end of their graduate program, students must pass a take-home written examination in the major field. The student will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the committee. In addition, students satisfy the examination requirements in the minor field through earning nine credit hours with at least a B (3.0) average.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the Master of Arts in History, graduates will be able to:

- Use the historical method to solve historical and historiographical problems while applying the perspectives of class, race, gender, etc. to historical events and trends;
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession;
- Perform historical research in archives and libraries and evaluate the provenance, context, validity, and biases of these sources from the past;
- Apply the necessary research skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity, context, and biases of secondary source literature produced by other scholars;
- Demonstrate the ability to deploy multiple forms of communication (written, oral, and new media) to discuss their own historical scholarship and graduate-level knowledge of their chosen fields.

History (PhD)

The Department of History supports graduate study in Public History and US and Social and Cultural History with specialties in Urban history, Digital history, and Women's and Gender history. We offer a doctoral program in history and public history. History doctoral students work closely with faculty in and out of the classroom as they train to become academic historians, public historians, teachers, archivists, museum professionals, and researchers as well as possess sufficient preparation to pursue other career pathways.

Curriculum

PhD in History Course Requirements

The PhD in History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in major and minor fields, and writing and defense of a dissertation. Students will select a major field in United States history or Non-US (Trans-national Urban) History, and two minor fields in consultation with the Graduate Program Director.

Code	Title	Hours
HIST 400	Twentieth Century Approaches to History	3
Two 500-level research seminars (one must be in Major Field)		*6*
Six Major Field courses		*18*
Three courses in First Minor Field		*9*
Three courses in Second Minor Field		*9*
Four Directed Studies or Electives		*12*
HIST 598	Dissertation Proposal Seminar	3
Total Hours		**60**

Advanced Standing

Students who enter the PhD in History after completion of a master's degree in history will have slightly adjusted coursework requirements.

Code	Title	Hours
Required Courses		
HIST 400	Twentieth Century Approaches to History (if equivalent not taken for Master's degree)	3
One 500-level research seminar in Major Field		*3*
Three Major Field courses		*3*
Three Minor Field courses		*9*
One Directed Study or Elective		*3*
HIST 598	Dissertation Proposal Seminar	3
Total Hours		**24**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

PhD in Public History/American History Coursework Requirements

The PhD in Public History/American History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in both Public History and American History major fields, a Public History Portfolio, and writing and defense of a dissertation. Public History/American History PhD students have two major fields, thus they do not have any minor field examinations.

Code	Title	Hours
HIST 400	Twentieth Century Approaches to History (if equivalent not taken for Master's program)	3
HIST 403	Professional Lives of Historians	3

One 500-level US History Research Seminar		*3*
HIST 555	US Social & Intellectual History	
HIST 558	Studies in American Cultural History	
HIST 584	U.S. Local History	
Six US History Courses		*18*
Seven Public History Courses		*21*
Three Directed Study or Elective Courses		*9*
HIST 598	Dissertation Proposal Seminar	3
Total Hours		**60**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Research Tools

Students must demonstrate competency in two research tools.

United States History Research Tools

- One tool must be within public history and may include HIST 483 Oral History: Method and Practice or HIST 479 Public History Media. When taken for the research tool requirement, History 483 and History 479 *cannot* be counted toward the minor field in Public History. In special circumstances, students may petition the Graduate Program Director to substitute another research tool in place of the public history research tool requirement.
- The second research tool requirement may be fulfilled in two ways: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

Non-United States History Research tools

- A reading knowledge of two foreign languages appropriate to the student's major field. The first language requirement should have been met at the MA level.
- A reading knowledge of one foreign language appropriate to the student's major field and demonstrated mastery of a special skill required by the student's doctoral research. Either the language or the skill should have been completed at the master's level. HIST 479 Public History Media and HIST 483 Oral History: Method and Practice may fulfill the special skill requirement. When taken for the research tool requirement, History 479 and History 483 *cannot* be counted toward the minor field in Public history. With the approval of the Graduate Program Director, students may demonstrate mastery in the following areas: statistics, computer science, GIS and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

Public History/American History research tools

- One tool must be within public history and may include HIST 479 Public History Media or HIST 483 Oral History: Method and Practice.
- The second research tool requirement may be fulfilled in two ways: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director. Paleography may be taken at the Chicago Inter-University Consortium for Advanced Studies in Renaissance and Early Modern History at the Newberry Library (http://www.newberry.org/).

Comprehensive Examinations

Near the end of their graduate coursework, PhD students must pass a take-home written examination and a two-hour oral examination in their major field. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam.

For the major field examination in **US history**, students should choose two of the three designated chronological areas:19th Century America, or 20th Century America.They should also choose two thematic areas for the examination. Thematic areas include: Urban, Women/Gender, Sexuality, Indigenous America, Religion, African-Americans/Race, American West, Immigration/Ethnicity, Labor, Environmental, or Legal. Other thematic fields are possible with the approval of all committee members.

In addition, students satisfy the **minor field examination** requirements by passing a take-home written examination in which they will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the committee. Those who select a minor field outside of history must successfully pass a comprehensive examination in that discipline. The **Public History minor field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be either the Public History Program Director. Students must schedule an exam date during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to the oral exam. Students entering the PhD Program with Advanced Standing take only one minor field exam. The other minor field requirement is satisfied by the successful completion of three courses (nine credit hours) with at least a B (3.0) average.

For the major and minor field examinations in areas **outside of US history** (such as medieval, modern Europe and other thematic fields with a Transnational Urban focus), students should work closely with their committee members to create reading lists with a broad chronological sweep and a set number of thematic areas.

PhD students in the Public History/American History Program must take two series of comprehensive exams, one for each major field. The **Public History major field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be either the Public History Program Director. Students must schedule an exam date

during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to oral exam. Usually, students take their Public History oral exam before moving on to take their exams for American History.

The **American History major field** examination, taken near the end of their graduate program, is a take-home written examination and a two-hour oral examination. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam. The designated chronological areas are nineteenth-century U.S. history and twentieth-century U.S. history. They should also choose two thematic areas for the examination. Thematic areas include Urban, Women and Gender, Sexuality, Indigenous America, Cultural, African Americans and Race, American West and Borderlands, Immigration and Ethnicity, Labor, Environmental, and Legal. Other thematic fields are possible with the approval of all committee members.

Public History Portfolio Requirement
The portfolio, which represents the capstone of the Public History major field, documents the achievements of master's students and thereby identifies their strengths, weaknesses and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the student's faculty advisor annually, and the final version will be submitted to the faculty committee a minimum of two days prior to the oral exam. Successful completion of the portfolio is required for admission to PhD candidacy for the Public History/American History program.

Dissertation

Students will develop a dissertation field within their major field. For students in the Public History/American History program, their dissertation will be in their American history major field, although it can have a Public History focus. This field must be designated before students conclude their required coursework (typically not more than 18cr beyond the MA, and at the end of the first year of the doctoral program). They will present a dissertation topic and proposal to their major advisor (HIST 598 Dissertation Proposal Seminar) for review and approval. Students formalize their proposed committee with approval from the Graduate Program Director and the Graduate School.

Following the successful completion of doctoral examinations and the portfolio requirement, students will make a public presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation. In discussing the proposal, students and members of the committee should work out problems and address questions the committee members may have. Upon successfully completing the dissertation proposal review, students submit a formal dissertation outline to any relevant research compliance bodies (IRB) and to the Graduate School. Following its approval by the Graduate School and the successful completion of all other degree requirements, students are admitted to PhD candidacy. Once students have advanced to candidacy, they will enroll in HIST 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Upon completion of the PhD in History, graduates will be able to:

- Use the historical method to solve historical and historiographical problems while applying the perspectives of class, race, gender, etc. to historical events and trends;
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession;
- Perform historical research in archives and libraries and evaluate the provenance, context, validity, and biases of these sources from the past;
- Apply the necessary research skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity, context, and biases of secondary source literature produced by other scholars;
- Demonstrate the ability to deploy multiple forms of communication (written, oral, and new media) to discuss their own historical scholarship and graduate-level knowledge of their chosen fields;
- Advance the knowledge of the discipline;
- Conduct cutting edge research;
- Engage respectfully in debates about the nature of the past in order to enrich historical understanding and generate new questions and investigatory avenues.

In addition, upon completion of the PhD in Public History/American History program graduates will be able to:

- Use public history methods and theories to share historical interpretation with a broad range of public audiences;
- Apply new media digital tools to the preservation and presentation of archival material;
- Utilize the best professional practices to preserve, catalog, and present historical artifacts and records;
- Understand and employ local, state, and federal preservation rules to establish the significance of historic properties;
- Demonstrate the ability to work with public history institutions to make the past relevant to diverse communities.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Public History (MA)

The Master of Arts in Public History program provides students both the theoretical and practical skill sets needed to perform public history work in a variety of vocations, whether as museum professionals, archivists, government contractors, community consultants, teachers both inside and outside the classroom, among others.

Curriculum

The Master of Arts in Public History requires 30 credit hours of coursework and a 1 credit hour in a Public History Internship, for a total of 31 credit hours.

Code	Title	Hours
Required Courses		
HIST 400	Twentieth Century Approaches to History	3
One 500-level Research Seminar		*3*
Five Public History Courses		*15*
HIST 479	Public History Media	
HIST 480	Public History: Method & Theory	
HIST 481	Management of Historic Resources	
HIST 482	Archives & Record Management	
HIST 487	Management of History Museums	
HIST 582	Public History Internship	1
Three minor field courses		*9*
Total Hours		**31**

Comprehensive Examination

Toward the end of their graduate program, public history students must pass a two-hour oral examination in the field of public history before a two-person faculty committee, one of whom must be the Public History Program Director. There is no examination in the minor field, but students must maintain at least a B average (3.0) in the three minor field courses.

Public History Portfolio

The portfolio, which represents the capstone of the program, documents the achievements of master's students and thereby identifies their strengths, weaknesses and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the student's faculty advisor annually, and the final version will be submitted to the faculty committee a minimum of two days prior to the oral exam. Successful completion of the portfolio is required for admission to and/or continuation in the PhD program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Upon completion of the MA in Public History, graduates will be able to:

- Use public history methods and theories to share historical interpretation with a broad range of public audiences;
- Apply new media digital tools to the preservation and presentation of archival material;
- Utilize the best professional practices to preserve, catalog, and present historical artifacts and records;
- Understand and employ local, state, and federal preservation rules to establish the significance of historic properties;
- Demonstrate the ability to work with public history institutions to make the past relevant to diverse communities;
- Perform historical research in archives and libraries and evaluate the provenance, context, validity, and biases of these sources from the past;
- Apply the necessary research skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity, context, and biases of secondary source literature produced by other scholars;
- Demonstrate the ability to deploy multiple forms of communication (written, oral, and new media) to discuss their own historical scholarship and graduate-level knowledge of their chosen fields.

Public History Program with Dominican University (MA/MLIS)

The Loyola Department of History and the Graduate School of Library and Information Science (GSLIS) of Dominican University (https://www.dom.edu/academics/majors-programs/mlis-and-ma-public-history/) in River Forest, IL, cooperate to offer a joint program leading to two separate degrees: Master of Arts in Public History and Master of Library and Information Science (MLIS).

The joining of two applied degree programs, public history and library science, provides interested students with the opportunity to combine historical training with a more focused educational background in archives and library science. The joint program allows students to complete work on the two degrees in a shorter time than if each degree were pursued separately. In addition, it provides a more focused and structured education in archives than either degree program does individually.

Curriculum

The Master of Arts in Public History/Master of Library and Information Science with Dominican University requires 24 credit hours (including an internship) taken in Loyola University Chicago's history department, a public history portfolio, comprehensive examination, and 30 credit hours from the Graduate School of Library and Information Science at Dominican University. Information about the MLIS course requirements can be found on the Dominican University website.

Code	Title	Hours
Required Courses		
HIST 400	Twentieth Century Approaches to History	3
One 500-level Research Seminar		*3*
Three Public History courses		*9*
HIST 479	Public History Media	
HIST 480	Public History: Method & Theory (Required)	
HIST 481	Management of Historic Resources	
HIST 482	Archives & Record Management	
HIST 487	Management of History Museums	
Two Minor Field courses		*6*
HIST 582	Public History Internship	3
Total Hours		**24**

Comprehensive Examination

Toward the end of their graduate program, public history students must pass a two-hour oral examination in the field of public history before a two-person faculty committee, one of whom must be the Public History

Program Director. There is no examination in the minor field, but students must maintain at least a B average (3.0) in the three minor field courses.

Public History Portfolio

The portfolio, which represents the capstone of the program, documents the achievements of master's students and thereby identifies their strengths, weaknesses and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the student's faculty advisor annually, and the final version will be submitted to the faculty committee a minimum of two days prior to the oral exam.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MA in Public History and MLIS in Library and Information Science at Dominican University, graduates will be able to:

- Use public history methods and theories to share historical interpretation with a broad range of public audiences;
- Apply new media digital tools to the preservation and presentation of archival material;
- Utilize the best professional practices to preserve, catalog, and present historical artifacts and records;
- Understand and employ local, state, and federal preservation rules to establish the significance of historic properties;
- Demonstrate the ability to work with public history institutions to make the past relevant to diverse communities;
- Perform historical research in archives and libraries and evaluate the provenance, context, validity, and biases of these sources from the past;
- Apply the necessary research skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity, context, and biases of secondary source literature produced by other scholars;
- Demonstrate the ability to deploy multiple forms of communication (written, oral, and new media) to discuss their own historical scholarship and graduate-level knowledge of their chosen fields;
- Demonstrate expertise in archival management;
- Employ strategies and best practices for preservation planning and management of preservation programs and resources;
- Assume professional responsibilities in the library and information field.

Mathematics and Statistics

The Department of Mathematics and Statistics at Loyola University Chicago, in the College of Arts and Sciences, supports the Jesuit ideal of knowledge in the service of humanity. The department endeavors to advance knowledge in mathematics and statistics, engaged with Chicago, the nation and the world. To achieve this mission, the department participates in the discovery, development, demonstration and dissemination of professional knowledge and practice within a context of professional ethics and service to others.

Beyond honing students' analytical skills, the mathematics and statistics curricula also foster critical thinking and the ability to articulate it... skills that are in high demand in many diverse fields.

The Department of Mathematics and Statistics will work to ensure that we invest in each student's success, sense of belonging, and cultural competency. We will strive to engage, empower, inform, and hold our faculty and students accountable for fostering an environment where every person shares in the responsibility for advancing diversity and inclusive excellence. Likewise, the department decisions and policies will be crafted with these goals in mind. We commit to this mission recognizing a definition of diversity that includes, but is not limited to, race, ethnicity, color, religion, national or ethnic origin, sex, age, military/veteran status, disability, marital status, sexual orientation, gender identity and expression, socio-economic background, and residency.

Graduate Programs

- Applied Statistics (MS) (p. 1402)
- Mathematics (MS) (p. 1403)

Mathematics (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Introduction to computational methods and error analysis. Topics include numerical solution of equations, interpolation and approximation, numerical differentiation and integration, numerical solution of ordinary and partial differential equations. Numerical methods in linear algebra, such as approximate solutions to the eigenvalue problem, will also be covered.
Course equivalencies: X-COMP409/MATH409

MATH 413 Algebra I (3 Credit Hours)
As the first part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, actions on sets, and Sylow theorems. Additional topics chosen from linear groups, category theory, homological algebra, and representation theory.

MATH 414 Algebra II (3 Credit Hours)
As the second part in a two-semester sequence, this course covers basic algebraic structures, focused mainly on rings and fields. Topics include integral domains, vector spaces, modules, etc., Additional topics chosen from Galois theory, Dedekind domains, category theory, tensor products, homological algebra, and representation theory.

MATH 415 Topics in Linear Algebra (3 Credit Hours)
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
A first course in the foundations of analysis. Topics include measure theory, Lebesgue integration, Hilbert and Banach spaces, and complex analysis.

MATH 452 Analysis II (3 Credit Hours)
A second course in the foundations of analysis. Topics include the Fubini Theorem, differentiation, and linear and nonlinear functional analysis.

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: Graduate Student Status
An introduction to functions of a single complex variable. Topics include analytic functions, contour integrals, Cauchy integral formula, harmonic functions, Liouville's theorem, Laurent series, analytic continuation, and conformal mapping. Additional topics may include theorems of Picard and Rouché, the Riemann mapping theorem, Riemann surfaces, and the fast Fourier transform.
Outcomes:
Students will be able to: analyze limits and continuity for complex functions; evaluate contour integrals (by the fundamental theorem, by Cauchy integral formula, and by the residue theorem); and represent functions as Laurent series, classifying singularities and poles

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Introduction to Mathematical Modeling (3 Credit Hours)
A course in modelling. Mathematics has the power to describe the world and predict future events. This can be seen through its use in physics, economics, and biology. In this course students will learn how to harness the power of mathematics to model real world phenomenon. This will mainly be done using calculus and differential equations, but other mathematical tools will be used as well.

MATH 458 Topics in Optimization (3 Credit Hours)
This course presents the study of selected mathematical models and their application to applied problems. Topics in linear and mathematical programming, optimization theory, and game theory are examined.
Course equivalencies: X-MATH458/STAT458/428

MATH 460 Theory of Games (3 Credit Hours)
The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
General theory of topological and metric spaces, compact spaces, convergence and completeness in metric spaces, connected spaces.

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Applied Statistics (MS)

Loyola's Master of Science in Applied Statistics emphasizes applied statistics and predictive modeling which gives students an advantage in evidence-based fields such as biomedical, environmental, marketing, educational, financial, and contract research (CRO) sectors. Our program can also be completed on a part-time basis and while working full-time.

Curriculum

The Master of Science in Applied Statistics requires 30 credit hours of coursework.

Required Courses

Code	Title	Hours
STAT 401	Introduction to Applied Statistics Using R	1
STAT 403	SAS Program & Applied Statistics	3
STAT 404	Probability & Statistics I	3
STAT 405	Probability & Statistics II	3

STAT 407	Statistical Design	3
STAT 408	Applied Regression Analysis	3
STAT 495	Statistical Consulting Capstone	2
Select Four (4) Elective Courses		*12*
STAT 406	Stochastic Processes	
STAT 410	Categorical Data Analysis	
STAT 411	Applied Survival Analysis	
STAT 421	Math Modeling & Simulation	
STAT 426	Advanced Statistical Inference	
STAT 436	Topics in Biostatistics	
STAT 438	Introduction to Predictive Analytics	
STAT 444	Longitudinal Data Analysis and Mixed Modeling	
STAT 451	Applied Nonparametric Methods	
STAT 488	Topics in Statistics	
STAT 498	Independent Study Statistics	
Total Hours		**30**

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of our MS program in Applied Statistics, students are expected to have:

- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model.
- Received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference.
- Worked with data from application fields such as public/global health, medical, industrial and environmental research.
- Received training to ethically apply statistical training in the real world.
- Obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class.
- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program

Mathematics (MS)

Loyola's Master of Science in Mathematics degree is a highly customizable program supporting students with a variety of career goals. Beyond delivering foundational knowledge in the discipline, its focus on critical-thinking, organizational, technological, and communication skills leaves students well-prepared for their next step.

Curriculum

The Master of Science in Mathematics requires 27 credit hours of coursework, a 1 credit professional development seminar during the first semester, and a 2 credit practicum during the final semester, for a total of 30 credit hours.

Coursework includes required foundational courses in algebra, analysis, and statistics, as well as 18 credit hours of electives chosen from courses in Mathematics and cognate fields (such as Applied Statistics, Data Science, and Computer Science). With their practicum, students design and independently execute a research project under faculty supervision.

Code	Title	Hours
Foundational Course Requirements		
MATH 416	Survey of Algebra	3
MATH 454	Survey of Analysis	3
MATH 404 / STAT 404	Probability & Statistics I [1]	3
or STAT 408	Applied Regression Analysis	
Depth Requirement Courses		
Select one of the following:		*3*
MATH 414	Algebra II	
MATH 415	Topics in Linear Algebra	
MATH 452	Analysis II	
MATH 453	Complex Analysis	
Select one of the following: [1]		*3*
MATH 405 / STAT 405	Probability & Statistics II	
STAT 410	Categorical Data Analysis	
COMP 429	Natural Language Processing	
COMP 487	Deep Learning	
DSCI 401	Introduction to Data Science	
Or Another Course with Graduate Program Director Approval		
Additional Requirements		
MATH 401	Introduction to Graduate Study in Mathematics	1
MATH 495	Graduate Practicum in Mathematics	2
Select four approved 400-level Electives in Mathematics or Statistics [2]		12
Total Hours		**30**

[1] Students who select MATH 404/STAT 404 in Foundational Courses may opt to take STAT 408 as a Depth Course, and vice versa.

[2] Approved elective courses should be selected with advice of Graduate Program Director to complement student's previous learning and support future plans.

STEM Designation

The MS in Mathematics has been granted a STEM designation from the U.S. Department of Homeland Security. International students completing degrees with this designation can qualify for extended OPT (Optional Practical Training), bringing the total OPT time granted to 36 months.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Graduates of the Master of Science in Mathematics Program will:

- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation;
- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines;
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries;
- receive training on how to act responsibly and ethically within the discipline.

Modern Languages and Literature

The Department of Modern Languages and Literatures offers a Master of Arts in Hispanic Studies. The department has full-time faculty with strong dedication to graduate teaching and a firm commitment to research. Study in the Department of Modern Languages and Literatures encourages close contact between faculty and students. In the tradition of the university at large, we value the individual.

We take pride in the diverse cultural, educational, intellectual and recreational opportunities available in the city of Chicago.

Graduate Programs

- Hispanic Studies (MA) (p. 1406)

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Hispanic Studies (MA)

Our Masters of Arts degree in Hispanic Studies allows students to begin their careers as Hispanists in many areas: teaching, translation and interpretation, diplomacy, foreign service, social work, journalism, editing, international business and more. This degree program allows students to explore their own academic interests, while at the same time providing them with a solid foundation in the literature and culture of the Hispanic world.

Curriculum

The Master of Arts in Hispanic Studies can be completed through a coursework or a master's paper or thesis option. The coursework option requires 30 credit hours of courses and a two-part comprehensive examination based on coursework and the Graduate Reading List. The second option requires the completion of 27 credit hours of courses, composition of a master's essay (or research-length article), and oral defense. The third option requires 27 credit hours of courses and completion of a master's thesis and oral defense. The master's essay and thesis option can only be taken with approval of the Graduate Program Director and the Graduate Committee.

Additionally, candidates for the MA degree fulfill the Research Tool Requirement of the Graduate School by showing competency in a language other than English or Spanish. This requirement can be fulfilled by taking a translation exam in the Graduate School, or by taking a language course at Loyola or elsewhere and earning a grade of B or higher.

Required Coursework

Coursework for credit toward the MA in Hispanic Studies consists of graduate seminars in Spanish. With the permission of the Graduate Program Director, graduate students may take up to two graduate seminars in other academic departments of Loyola University, and up to two independent study courses.

Code	Title	Hours

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Independent Studies / Directed Readings

Occasionally the department of Modern Languages and Literatures offers independent studies at the graduate level SPAN 500 Directed Readings. When applicable, students may take up to one or two of these courses for credit towards the MA in Hispanic Studies. Normally, independent studies in other LUC departments or academic programs do not apply.

Internships

On occasion, the graduate program also offers academic credit towards the MA in Hispanic Studies in the form of an internship (SPAN 499 Graduate Internship). Please see the program director for more details.

Master's Paper or Thesis

Students who choose to write a master's paper or thesis are enrolled in SPAN 595 Thesis Supervision or SPAN 605 Master's Study to maintain standing in the Graduate School while conducting research and writing.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, graduates will be able to:

- demonstrate familiarity with works of Latin American and Peninsular literature
- demonstrate familiarity with the general characteristics of several traditions and trends within the literary contexts of Latin America and Spain
- use the Spanish vocabulary necessary for discussing literature critically
- understand broad historical events, cultural currents, and current academic trends as they are represented in Latin American and Peninsular literature
- read, write, and speak Spanish fluently
- demonstrate the ability to do independent, scholarly research by integrating, comparing, and evaluating ideas and materials from various sources, both literary and critical
- develop and sustain a coherent argument in both oral and written Spanish
- know how to foster a collegial, collaborative learning environment that encourages self-expression
- comprehend the social and historical function and significance of literature, culture, and art in Spain and Latin America, and more broadly
- understand and incorporate the national standards for the teaching of foreign languages into the teaching of Spanish at various levels
- understand from a task-based perspective the theoretical and practical issues of communicative language teaching for all skill areas
- demonstrate competence in a language other than English or Spanish, for the purpose of research

Philosophy

Our graduate programs prepare students to be scholars and teachers who are grounded in the history of philosophy as well as contemporary philosophical methodologies. Our programs support specialization in a variety of contemporary fields, including those that expand the purview of philosophical inquiry beyond its traditional boundaries. Our department values philosophical pluralism, and or faculty represent diverse philosophical schools and perspectives, offering students a uniquely well-rounded education. We also take seriously the commitment of our Jesuit institution to social justice, providing opportunities to pursue philosophical inquiry that is socially engaged, interdisciplinary, and oriented toward the betterment of the world.

Graduate Programs

- Philosophy (MA) (p. 1410)
- Philosophy (PhD) (p. 1411)
- Social Philosophy (MA) (p. 1413)

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Philosophy (MA)

The terminal MA in Philosophy at Loyola integrates a strong grounding in the history of philosophy with current debates in social and political philosophy, ethics, and contemporary philosophy. Our department is distinguished by its exceptional breadth in the history of philosophy with internationally recognized faculty working in ancient Greek and Chinese philosophy, Islamic philosophy, and medieval, modern and 19th and 20th century European philosophy. Students who complete the terminal MA can therefore expect to develop a strong foundation in the core areas of philosophy and the ability to pursue specialized research in a range of areas at the doctoral level. Loyola's terminal MA also lays an excellent intellectual foundation for those who intend to pursue graduate work outside of philosophy in such fields as history, theology, and English, as well as those interested in pursuing this degree for personal enrichment.

Program Highlights

- First year proseminar to prepare students for coursework in graduate school
- Professional development and placement workshops that prepare students to present and publish their original research and apply for doctoral programs in philosophy and other fields
- Generalist training in the history of philosophy and an emphasis on philosophical pluralism that can prepare students for specialized research at the doctoral level
- Opportunity to attend seminars, conferences, and lectures in the Chicago-area

Curriculum

The Master of Arts in Philosophy requires 30 credit hours of coursework and a comprehensive examination. Entering MA students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy (ordinarily an undergraduate minor or its equivalent).

Specific courses may not be offered every semester and course offerings are subject to change.

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1407).

Language Requirement

There is no language requirement or other research tool requirement for the M.A. degree in the Philosophy Department.

Examination

Toward the end of the course of studies, students pursuing the MA in Philosophy must pass an oral examination before a committee of at least three faculty members on a research paper they have written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MA in Philosophy, students will have:

- Acquired advanced knowledge and be able to:
  - Demonstrate knowledge of the history of philosophy
  - Demonstrate knowledge of perennial and contemporary issues in philosophy
  - Demonstrate expertise in a particular area of philosophy
- Engaged in discursive and critical thinking and be able to:
  - Identify hidden presuppositions of everyday beliefs
  - Articulate and evaluate philosophical arguments
  - Consider alternative kinds of philosophical argumentation
  - Apply philosophical categories, methods and insights to other areas of human interest, experience, or cognitive inquiry
- Produced and disseminated scholarship and be able to frame, research, complete and defend the MA paper
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and in the world and be able to:
  - Work with others for the sake of common purposes
  - Foster Jesuit ideals, including truth and justice
  - Enhance the pleasures of work in common

Philosophy (PhD)

Loyola's PhD in Philosophy is a premiere program for graduate study in continental philosophy, social and political philosophy, and the history of philosophy. It is also renowned for its strengths in feminism, ethics and value theory, critical philosophy of race, and bioethics. Our department values philosophical pluralism and faculty are informed by a variety of traditions and methodologies, so students are exposed to a range of approaches, both analytic and continental, through their coursework. Loyola thus offers doctoral students a uniquely well-rounded education as well as a diversity of research paths that they can pursue.

Program Highlights

- **Outstanding Mentorship and Professional Development:** In addition to outstanding individual mentorship and advising, our faculty collaboratively designs and conducts programming to support student success. This includes a first year proseminar to prepare students for graduate coursework and professional development workshops throughout the year to prepare students to present and publish original research.
- **Developing Research Skills:** Doctoral students can take on research assistantships that cultivate relevant research and professional skills, for instance, by serving as editorial assistants for academic journals, directing our MAP chapter (https://www.luc.edu/philosophy/researchandinitiatives/minoritiesandphilosophychapter/), and engaging in faculty directed research. Doctoral students are also encouraged to participate in at least one of our research groups (https://www.luc.edu/philosophy/researchandinitiatives/researchgroups/) to expand their scholarly networks and present their research.
- **Teaching Excellence:** Loyola will prepare you to be an agile teacher who can design and deliver courses across the core areas of philosophy and adapt to the needs of students in an increasingly

complex world. Our teaching assistantships prioritize pedagogical development, and we offer teacher training through pedagogy seminars and one-on-one mentorship as well as the opportunity to teach courses as instructors of record.

- **Academic Careers:** In addition to individual advising, Loyola's placement committee offers workshops and seminars to prepare doctoral students for success on the academic job market. This committee provides feedback on application materials, schedules mock-interviews, and coaches students through the process of campus visits and job offers. Our alumni enjoy great success in their chosen career paths, and many secure full-time positions at respected colleges and universities.
- **Career Diversity:** Loyola also recognizes the importance of supporting students interested in pursuing non-traditional career paths, offering internships and training in such fields as education administration, academic publishing, public policy, social work, and computer programing.

Curriculum

The PhD in Philosophy requires 48 hours of coursework, a foreign language requirement, qualifying examination, and dissertation. All requirements for the Master of Arts in Philosophy must be satisfied as first stage of doctoral work. Entering PhD students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy, ordinarily an undergraduate major, including coursework in the history of ancient and early modern European philosophy as well as in metaphysics, epistemology, logic, ethics, and social-political philosophy.

Coursework Requirements

Specific courses may not be offered every semester and course offerings are subject to change.

Total Hours		**48**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1407).

Foreign Language Requirement

A reading knowledge of one foreign language, e.g., German, French, Greek or Latin, is normally required for the doctorate, normally one that the student will use as a research tool for the dissertation. The requirement must be met at two levels:

1. basic language competence and
2. facility with the language in doing philosophy research.

The dissertation topic may also require knowledge of additional foreign languages. In exceptional cases students may petition that the research tool requirement be fulfilled in another way than by knowledge of a foreign language, e.g., by a knowledge of statistics.

PhD Qualifying Examination

The only PhD examination the department requires is a candidacy examination. This examination may be taken after a student has completed all course distribution requirements and the first level of

the language or other research tool requirement for the degree. The examination focuses on a dissertation proposal and a draft of the first chapter or an extended review of the literature relevant to the dissertation. It is an oral examination, designed to assess whether the proposal is well formed and a project which the student is prepared to carry out successfully.

Dissertation and Oral Defense

The last stage of the PhD is the writing and defense of a dissertation. The dissertation is written under the direction of a member of the department's graduate faculty, and must be read and approved by at least two other readers who are ordinarily members of the department's graduate faculty. Formally, the dissertation begins with the submission of a "Thesis Outline." Upon approval of this outline the student is formally advanced to candidacy. The dissertation is completed with the passing of the public oral defense of the work and its acceptance by the Graduate School.

The MA Degree as Part of the PhD

The Master of Arts in Philosophy is ordinarily earned as the first part of a student's PhD work. Thirty hours of graduate coursework (10 courses) are required for students in the MA program. These courses must include five of the seven PhD distribution requirements, namely courses in contemporary Analytic Philosophy, Contemporary Continental Philosophy, Ancient Philosophy, Medieval Philosophy, and Modern Philosophy. There is no language requirement in the M.A. program.

Doctoral students earning the non-terminal MA must pass an oral examination on a research paper they have written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the PhD in Philosophy, students will have:

- Acquired advanced knowledge and be able to:
  - Demonstrate knowledge of the history of philosophy
  - Demonstrate knowledge of perennial and contemporary issues in philosophy
  - Demonstrate expertise in a particular area of philosophy
- Engaged in discursive and critical thinking and be able to:
  - Identify hidden presuppositions of everyday beliefs
  - Articulate and evaluate philosophical arguments
  - Consider alternative kinds of philosophical argumentation
  - Apply philosophical categories, methods and insights to other areas of human interest, experience, or cognitive inquiry
- Produced and disseminated scholarship and be able to:
  - Frame, research, complete and defend the PhD dissertation
  - Frame, complete and submit papers for scholarly conferences and publications
- Developed effective teaching skills and be able to:
  - Effectively present material
  - Create syllabi and craft a statement of teaching philosophy
  - Run an effective philosophy course
  - Satisfy University and Department expectations of core courses and instructors
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and in the world and be able to:
  - Work with others for the sake of common purposes
  - Foster Jesuit ideals, including truth and justice
  - Enhance the pleasures of work in common

Social Philosophy (MA)

The Master of Arts in Social Philosophy provides an education for students interested in ethical, political, and other philosophical issues concerning society and social justice. Students enrolled in this program will learn to analyze the human condition through complex social, political, economic, and cultural contexts that characterize the contemporary global landscape. We also offer courses that introduce students to the history of philosophy and that explore the relationship between philosophical inquiry and the humanities for generally.

Curriculum

The Master of Arts in Social Philosophy requires 30 credit hours of graduate coursework (10 courses). The below requirements apply to any student following the M.A. program in Social Philosophy. However, Jesuits who elect to pursue this degree should consult with their advisor regarding other requirements associated with their First Studies program.

Specific courses may not be offered every semester and course offerings are subject to change.

Total Hours		**30**

[1] PHIL 470 Ethics & Economic Justice can fulfill either the Moral Philosophy or the Social Philosophy requirement. Some courses

can fulfill the Moral or Social Philosophy distribution requirements depending on course contents. Students make seek advising from Graduate Program Director in course selection to meet requirements.

2 These courses often include issues concerning ethics and social justice.

3 Up two two electives may be related courses offered by other graduate departments or schools within Loyola, subject to approval from the Graduate Program Director.

- For students who being in M.A. in Social Philosophy in Fall 2023 of later: Beginning in Fall 2023, all required courses must be taken at the 400 or 500 level. 300-level undergraduate courses cannot be counted toward the MA in Social Philosophy. This does not apply to students who entered before Fall 2023.
- For students who being in M.A. in Social Philosophy before Fall 2023: Of the required courses, up to three may (but need not) be taken as upper-division undergraduate (300-level) courses. The remainder must be graduate courses (400 or 500 level).

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1407).

Research Tool Requirement

There is no research tool/language requirement for this degree.

Paper Presentation

There is no formal departmental examination. A final project paper, developed in conjunction with a faculty advisor, is presented publicly at the end of the course of studies. The presentation of the paper requires a committee of three faculty members (at least two from the Philosophy Department).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MA in Social Philosophy students will have:

- Acquired advanced knowledge and be able to:
  - Demonstrate knowledge of the history of philosophy
  - Demonstrate knowledge of perennial and contemporary issues in philosophy
  - Demonstrate expertise in a particular area of philosophy
- Engaged in discursive and critical thinking and be able to:
  - Identify hidden presuppositions of everyday beliefs
  - Articulate and evaluate philosophical arguments
  - Consider alternative kinds of philosophical argumentation
  - Apply philosophical categories, methods and insights to other areas of human interest, experience, or cognitive inquiry
- Produced and disseminated scholarship and be able to:
  - Frame, research, complete and defend the MA paper
  - Frame, complete and submit papers for scholarly conferences and publications
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and in the world and be able to:
  - Work with others for the sake of common purposes
  - Foster Jesuit ideals, including truth and justice
  - Enhance the pleasures of work in common

Political Science

The Department of Political Sciences offers students a personalized education within a distinctive graduate program. Graduate courses are taught by full time faculty and conducted in a seminar form, with specific attention to the individual interests of students. All graduate students receive extensive methodological training, a well-rounded exposure to political science- including courses in comparative politics and international relations- as well as courses in American politics and political theory.

Graduate Programs

- International Affairs (MA) (p. 1418)
- Political Science/Law (MA/JD) (p. 1420)
- Political Science (MA) (p. 1422)
- Political Science (PhD) (p. 1424)

pOLITICAL sCIENCE (plsc)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

International Affairs (MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impact of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Master of Arts in International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Curriculum

The Master of Arts in International Affairs requires 30 credits hours. Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in Arts & Sciences or another school at Loyola.

Required Courses

Code	Title	Hours
Core Courses		**9**
Core International Affairs Courses		
INTA 420 / PLSC 420	Comparative Political Systems	
INTA 430 / PLSC 430	Theories of International Politics	
INTA 475	Political Analysis I	
Elective Courses (max three classes per department or another School)		**18**
Criminal Justice and Criminology Department		
CJC 403	Program Evaluation and Research	
CJC 404	Applied Data Analysis and Interpretation	
CJC 416	International Criminal Justice	
History Department		
HIST 441	Women's & Gender History: Europe	
HIST 459	Environmental History	
HIST 464	Transnational Urban History	
HIST 483	Oral History: Method and Practice	
Modern Languages and Literatures Department [1]		
SPAN 405	Critical Methods (pan-Hispanic world)	
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	
Philosophy Department		
PHIL 400	Philosophy Research Tools	
PHIL 459	Philosophy of Law	
PHIL 463	Virtue Ethics (includes non-Western philosophy)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	
PHIL 490	Current Philosophical Issues (Critical Race Theory)	
Political Science Department		
PLSC 401	Intro to Research Design & Method	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems

HRER 422	Global HR Management
HRER 502	Global Employment Relations
MARK 465	International Marketing
MARK 561	Comparative Consumer Behavior
MGMT 446	International Business Ethics
SCMG 486	Global Logistics
Capstone	**3**
Select one of the following:	
INTA 470	Fieldwork in PLSC-Internship
PLSC 499	Directed Readings
PLSC 605	Master's Study
Total Hours	**30**

[1] Students interested in honing their foreign language skills will have the option of taking a 300 or 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola at the 300 level include Chinese, French, German, Italian, and Spanish. Modern Languages and Literatures offers graduate-level courses in Spanish. The courses that follow are open only to interested students with advanced writing, speaking, and reading skills in Spanish.

[2] MA in International Affairs students must take variable credit Law courses for 3 credit hours. The course cannot be taken for less than 3 credit hours.

NOTE ON ELECTIVE COURSES:
Students will take six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core International Affairs courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses. The participating programs that will contribute classes include eight departments in Arts & Sciences (History Department, Philosophy Department, Political Science Department, Psychology Department, Sociology Department, Theology Department, Criminal Justice & Criminology Department, and Modern Languages and Literatures Department) and four additional Schools (School of Communication, School of Education [International Education], School of Social Work, and School of Law). Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses below for approval.

Suggested Sequence of Courses

In order to provide optimal flexibility in the Master's program, there is no required course sequence. However, it is suggested that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) as soon as they are offered before taking elective courses.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students will graduate from our program having achieved:

- A foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- Knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- An interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- Enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- Strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis

Political Science/Law (MA/JD)

The dual JD/MA program permits students enrolled in Loyola's Law School to complete both a JD degree and an MA in Political Science in a shorter period of time than if both programs were pursued separately. Students typically complete the joint program in 4 years, as opposed to the typical 5 years for the individual programs.

How Does This Program Work?

Students interested in this program must apply to the Loyola University Law School under the dual JD/MA in Political Science program. If accepted by the Law School, the student will then be also accepted into the MA program. Students must then satisfy the academic requirements of the School of Law for the JD degree and the academic requirements of the Department of Political Science for the MA degree, with an arrangement allowing several shared courses between the two.

Curriculum

The Department of Political Science will accept four Law School courses to be applied to the 30 credit hours required for the MA. The Law School will accept three Political Science courses toward the JD degree. Students should work in close concert with their Graduate Program Director and Law School advisor to ensure effective degree planning.

The Department of Political Science will accept four Law School courses to be applied to the 30 credit hours required for the MA. The Law School will accept three Political Science courses ***to be applied*** toward ***the 86 credit hours required for*** the JD degree. ***As a result, 95 total credits are required for the JD/MA program.*** Students should work in close concert with their Graduate Program Director and Law School advisor to ensure effective degree planning.

MA Degree Requirements

Code	Title	Hours
Select one course in Ancient Philosophy		*3*
PHIL 401	Plato	
PHIL 402	Aristotle	
PHIL 403	Ancient Philosophy	
Select one course in Medieval Philosophy		*3*

PHIL 447	Issues in Cognitive Science	
Select five 400-level Electives		*15*
Total Hours		**30**

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1407).

Language Requirement

There is no language requirement or other research tool requirement for the M.A. degree in the Philosophy Department.

Examination

Toward the end of the course of studies, students pursuing the MA in Philosophy must pass an oral examination before a committee of at least three faculty members on a research paper they have written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

JD Degree Requirements

Code	Title	Hours
Required Courses		
LAW 113	Civil Procedure	4
LAW 122	Constitutional Law	4
LAW 132	Contracts	4
LAW 140	Criminal Law	3
LAW 152	Property	4
LAW 162	Torts	4
LAW 190	Legal Writing I	2
LAW 190R	Basic Legal Research	0

LAW 192	Legal Writing II	2
LAW 210	Evidence	4
LAW 270	Business Organizations	4
LAW 410	Legal Writing III	2
LAW 414	Professional Responsibility	3
LAW 424	Professional Identity Formation	1
Perspective Elective		**2-3**
Experiental Learning		**6**
BCCR Course		
LAW Electives		**36-37**
Total Hours		**86**

Upper Level Required Courses

- Skills Training Course (2 credits)
  A skills class is one that offers substantial instruction in the professional skills generally regarded as necessary for effective and responsible participation in the legal profession. All JD students are required to complete the skills course requirement prior to graduation.
- Experiential Learning (6 credits)
  Experiential learning classes enable students to perform their legal knowledge, skills and values in a real or simulated practice setting with intense, ongoing law school supervision and assessment. Examples include live-client clinics, judicial or non-judicial externships, practica, or comprehensive simulations. At least three of these credits must involve work with live clients. The remaining three credits can involve comprehensive simulations.
- LAW 414 Professional Responsibility (taken after first year)
- One course that involves substantial instruction in bias, cross-cultural competency, and racism (BCCR).

Highly Recommended Courses

Code	Title	Hours

[1] Students have the flexibility during this point in the program to choose electives either in the Political Science Department or the School of Law as long as minimum electives are met for both programs. Students should consult an advisor for any assistance on elective selection.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

The dual JD/MA in Political Science offers students:

- Specialized training appropriate for careers in the public sector or for law practices involving administrative agencies or processes, by combining the study of law with an exploration of the political context within which domestic and international legal systems operate
- An overview of the theories and scholarly literature devoted to four major Political Science subfields:
  - American Politics (study of U.S. institutions and political processes).
  - Comparative Politics (study of political processes in various regions of the world, such as Africa, Asia, Europe, Latin America, and the Middle East).
  - International Relations (study of global processes throughout the international system).
  - Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- The ability to pursue careers in politics, government, international affairs, law, the non-profit world, journalism, business, education, social services, and other professions, as well as for further graduate (PhD) study at professional schools and institutions of higher learning, both in the U.S. and abroad.

We also encourage our BA/MA students to take advantage of additional learning opportunities:

- Advanced methodological training
- Advanced language training/proficiency in a language other than English
- Advanced research skills
- International, cross-cultural experience
- Professional development and experience
- Networking opportunities

Political Science (MA)

The Master of Arts in Political Science provides students with a general, political science graduate education that trains students in methodological techniques and research design, and provides training in at least three fields of political science.

Curriculum

The Master of Arts in Political Science requires 30 hours of coursework. Students are required to take 3 methods courses and a combination of courses in the sub-fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students may complete an internship, write an MA thesis, or take comprehensive exams to fulfill their degree requirements.

Course Requirements

Code	Title	Hours
Political Science Methods		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
PLSC 476	Political Analysis II	3
Seven Electives from Two Subfields [1]		*21*
The sub-fields that may be chosen from are International Relations, Comparative Politics, American Politics, and Political Theory.		
International Relations Courses		
PLSC 430	Theories of International Politics	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 437	Selected Problems International Law	
PLSC 439	Selected Problems in International Politics	
PLSC 531	Seminar: International Politics	
Comparative Politics Courses		
PLSC 420	Comparative Political Systems	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 423	Soviet & Post-Soviet Politics	
PLSC 424	Politics of Developing Areas	
PLSC 425	Sub-Saharan Africa	
PLSC 426	Latin American Politics	
PLSC 427	Politics of the Middle East	
PLSC 428	Political Violence	
PLSC 429	Comparative Politics Selected Problems	
PLSC 520	Seminar: Comparative Politics	
PLSC 521	Seminar Western European Politics	
PLSC 532	Soviet/Post-Soviet Foreign Policy	
American Politics Courses		
PLSC 404	Selected Problems in American Politics	
PLSC 405	American Executive Branch	
PLSC 406	American Legislative Branch	
PLSC 407	Public Policy-Making & Implementation	
PLSC 410	Urban Politics	
PLSC 411	American Political Parties/Electoral Process	
PLSC 412	Constitutional Politics	
PLSC 417	The American Legal System	
PLSC 418	Political Psychology & Socialization	
PLSC 419	Managing Urban Government	
Political Theory Courses		
PLSC 440	Ancient Political Thought	
PLSC 442	Modern Political Thought	
PLSC 444	Great Authors	
PLSC 446	Political Ethics	
PLSC 447	American Political Thought to Civil War	
PLSC 449	19th Century Political Thought	
PLSC 543	Liberalism	
PLSC 546	Political Philosophy Selected Problems	
Total Hours		**30**

[1] Seven elective courses should be chosen from at least two subfields: International Relations, Comparative Politics, American Politics, or

Political Theory. With approval of the Graduate Program Director, up to six (6) hours may be at the graduate level in related disciplines.

Capstone Requirement: Thesis, Comprehensive Exams, or Internship

Thesis

Students may satisfy six hours (2 courses) by writing a thesis. Students who choose this option will take PLSC 596 Thesis Research for two semesters (a total of 6 credit hours, which count as electives) and take PLSC 595 Thesis Supervision until they are done with the thesis.

Code	Title	Hours
Take for two semesters (may satisfy 6 elective hours)		
PLSC 596	Thesis Research	
Take until done with thesis		
PLSC 595	Thesis Supervision	

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Comprehensive Exam

MA students can choose to take a written comprehensive examination. The student will select five courses from the substantive courses they have taken on which they will be tested. Prior to taking the exam students must finish all incompletes. Students may be currently registered for courses necessary for the degree in the semester in which they take the exam. If the student has fulfilled all degree requirements except for the comprehensive exams, they should register for PLSC 605 Master's Study in the semesters leading up to and including the exam. Students taking comprehensive examinations at the master's degree level are expected to answer theoretical and substantive questions from a range of five courses they have taken in their coursework. Once a student knows that s/he will take the exam in a particular semester, we highly recommend that they discuss the exam with the faculty members with whom they have taken the five chosen courses. Comprehensive exams will take place during the second half of the fall and spring semesters. Students will answer three questions over a weekend, receiving the exam on a Friday at 5:00 PM and returning the completed examination the following Monday, at 9:00 AM. All three answers must be written during the specified weekend with no outside assistance. Students will write a maximum of 21, double-spaced pages (normal formatting: 1" margins, Times New Roman, 12 pitch font). Each answer should be approximately six or seven pages. Prior to taking comprehensive exams, students must submit to the Graduate Program Director a departmental "MA Requirements and Comprehensive Examination Form," that lists all of the courses the student has taken and identifies on which courses the student would like to be tested. At the beginning of each semester the Graduate Program Director will distribute this form to all students who will take the exam

Internship

PLSC 470 Fieldwork in Political Science-Internship offers academic credit toward your major or minor while interning and gaining professional experience at one of several organizations, either here in Chicago or elsewhere. The intent is for students to 1) apply their education to date in a professional setting, 2) gain valuable experience at the start of their professional careers, 3) to explore a particular area of professional interest before embarking on their careers, and 4) to potentially "get a foot in the door" within a particular field or employer with the hope of landing a permanent position upon graduation. While past interns have received job offers from organization where they have interned, there are no guarantees or promises of employment that accompany taking this course.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
Elective		3
	Hours	**9**
Spring		
PLSC 476	Political Analysis II	3
Elective		3
Elective		3
	Hours	**9**
Year 2		
Fall		
Elective [1]		3
Elective		3
	Hours	**6**
Spring		
Elective [1]		3
Elective		3
	Hours	**6**
	Total Hours	**30**

[1] If pursuing thesis capstone option, student must substitute this elective for PLSC 596 Thesis Research.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

The MA in Political Science offers students:

- An overview of the theories and scholarly literature devoted to four major subfields within the discipline of Political Science:
  - American Politics (study of U.S. institutions and political processes).

- Comparative Politics (study of political regimes, including the state, development and modernization, political, economic, and social movements).
- International Relations (study of global processes throughout the international system).
- Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).

- Extensive methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- Preparation for purposeful careers in politics, government, international affairs, law, the non-profit world, journalism, business, education, social services, and other professions, as well as for further graduate (PhD) study at professional schools and institutions of higher learning, both in the U.S. and abroad.

We also encourage our MA students to take advantage of additional learning opportunities through numerous Political Science-sponsored programs:

- Advanced methodological training
- Advanced language training/proficiency in a language other than English
- Advanced research skills
- International, cross-cultural experience
- Professional development and experience
- Networking opportunities

Political Science (PhD)

The PhD program in political science is intended for students who wish to acquire careers in teaching and research or work in the government or the private sector. The focus includes the four fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students will take most of their courses and specialize in two fields. One of the two fields will constitute the major field and the other the minor field.

Curriculum

Students may enter the PhD in Political Science upon completion of the Master of Arts in Political Science at Loyola or another institution[1]. The PhD requires 48 credit hours of coursework, a comprehensive examination, and a dissertation.

Required Coursework

The PhD in Political Science requires 48 credit hours of coursework, six hours of which may be taken in a related discipline.

Code	Title	Hours
Required Courses		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I (taken in first fall semester of program)	3
PLSC 476	Political Analysis II	3
PLSC 499	Directed Readings (to develop dissertation proposal)	3
Select Four Couses in Major Field [2]		12
Select Three Courses in Minor Field		9
Select Five Elective Courses from Two Sub-fields		15

The sub-fields that may be chosen between for Major and Minor Fields are International Relations, Comparative Politics, American Politics, and Political Theory.

International Relations Courses		
PLSC 430	Theories of International Politics	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 437	Selected Problems International Law	
PLSC 439	Selected Problems in International Politics	
PLSC 531	Seminar: International Politics	
Comparative Politics Courses		
PLSC 420	Comparative Political Systems	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 423	Soviet & Post-Soviet Politics	
PLSC 424	Politics of Developing Areas	
PLSC 425	Sub-Saharan Africa	
PLSC 426	Latin American Politics	
PLSC 427	Politics of the Middle East	
PLSC 428	Political Violence	
PLSC 429	Comparative Politics Selected Problems	
PLSC 520	Seminar: Comparative Politics	
PLSC 521	Seminar Western European Politics	
PLSC 532	Soviet/Post-Soviet Foreign Policy	
American Politics Courses		
PLSC 404	Selected Problems in American Politics	
PLSC 405	American Executive Branch	
PLSC 406	American Legislative Branch	
PLSC 407	Public Policy-Making & Implementation	
PLSC 410	Urban Politics	
PLSC 411	American Political Parties/Electoral Process	
PLSC 412	Constitutional Politics	
PLSC 417	The American Legal System	
PLSC 418	Political Psychology & Socialization	
PLSC 419	Managing Urban Government	
Political Theory Courses		
PLSC 440	Ancient Political Thought	
PLSC 442	Modern Political Thought	
PLSC 444	Great Authors	
PLSC 446	Political Ethics	
PLSC 447	American Political Thought to Civil War	
PLSC 449	19th Century Political Thought	
PLSC 543	Liberalism	
PLSC 546	Political Philosophy Selected Problems	
Total Hours		**48**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research

and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

[1] Students who do not enter Loyola with an MA may take the master's comprehensive exam after completing 10 courses (including PLSC 401 Intro to Research Design & Method, PLSC 475 Political Analysis I, and PLSC 476 Political Analysis II) and earn the MA en route to the PhD. Students must complete four semesters of residence, including at least two consecutive semesters at Loyola. At least one academic year (two consecutive semesters) must be spent as a full-time student.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

After coursework listed below is complete, students begin taking PLSC 610 Doctoral Study or PLSC 600 Dissertation Supervision until dissertation defense.

Course	Title	Hours
Year 1		
Fall		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
One Major Field Course		3
	Hours	**9**
Spring		
PLSC 476	Political Analysis II	3
One Major Field Course		3
One Minor Field Course		3
	Hours	**9**
Year 2		
Fall		
One Major Field Course		3
One Minor Field Course		3
Elective		3
	Hours	**9**
Spring		
One Major Field Course		3
One Minor Field Course		3
Elective		3
	Hours	**9**
Year 3		
Fall		
PLSC 499	Directed Readings	3-6
	Hours	**3-6**
Spring		
Elective		3
Elective		3
Elective		3
	Hours	**9**
	Total Hours	**48-51**

Language Proficiency

Students may be required to develop language proficiency to conduct research for their doctoral dissertations. PhD students who need to take language courses that are necessary for dissertation research may be able to secure tuition support from The Graduate School with approval of the Graduate Program Director.

Comprehensive Exams

Candidates must pass three total comprehensive examinations (made up of both written and oral components), culminating in an oral examination where 4/5 faculty examiners must approve. All course requirements, including resolution of any outstanding Incomplete grades, must be fulfilled before students can take the written comprehensive examinations.

Dissertation

Candidates must complete and successfully defend both a dissertation proposal and the completed dissertation. Sometime in the third year of study, students are expected for form a dissertation committee, with the assistance of the Graduate Program Director.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

The PhD in Political Science offers students:

- An in-depth understanding of the theories and scholarly literature in the sub-fields of Comparative Politics (study of political regimes, including the state, development and modernization, political, economic, and social movements), International Relations (study of global processes throughout the international system), American Politics (study of U.S. institutions and political processes), and Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Extensive methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Research and teaching training by serving as both a research assistant for department faculty and professor of record for at least one class during the period of the PhD student's funding.
- An enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- Preparation for careers in research and teaching at colleges and universities or work in the government, non-profit, and private sectors.

We also encourage our PhD students to take advantage of additional learning opportunities:

- Advanced methodological training
- Advanced language training/proficiency in a language other than English
- Advanced research skills
- International, cross-cultural experience
- Professional development and experience
- Networking opportunities

Psychology

Consistent with Loyola University's mission as a Jesuit, Catholic institution, transformative graduate education in the Department of Psychology has two foci: **Healthy Development in Children, Youth, and Families**, and **Psychological Foundations of Social Justice**.

Within each, faculty and students pursue research and provide graduate training that draws upon clinical, developmental, and social psychology, and that has as its ultimate goal maximizing human potential and eliminating barriers to fully effective human functioning, development, and interaction.

- Students interested in focusing on **Psychological Foundations of Social Justice** and who aspire to a non-clinical academic or professional career, follow the Applied Social Psychology Program (p. 1429).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a clinical academic or professional career, follow the Clinical Psychology PhD Program (p. 1431).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a non-clinical academic or professional career, follow the Developmental Psychology Program (p. 1434).

Graduate Programs

- Applied Social Psychology (MA) (p. 1429)
- Applied Social Psychology (PhD) (p. 1430)
- Clinical Psychology (PhD) (p. 1431)
- Developmental Psychology (PhD) (p. 1434)

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (8 Credit Hours)
Course will involve research presentations and other forms of professional development. Graduate student standing in Social Psychology.
Interdisciplinary Option: Women & Gender Studies

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.

Applied Social Psychology (MA)

The Master of Arts in Applied Social Psychology is a terminal degree program designed primarily to prepare people for careers as research specialist. Such individuals usually work under the direction of a PhD-level supervisor in government agencies, market research firms, research centers, personnel departments and so forth.

Curriculum

The Master of Arts in Applied Social Psychology requires 30 credit hours of coursework and the completion of a master's thesis.

Required Coursework

Code	Title	Hours
Core Course Requirements		*12*
PSYC 420	Research Methods in Psychology [1]	
PSYC 460	Social Psychological Theory	
PSYC 482	Advanced Statistics	
PSYC 491	Multivariate Analysis [1]	
Advanced Methods [2]		*6*
PSYC 486	Methods of Program Evaluation (required)	
PSYC 493	Structural Equation Modeling	
Applied Topics (Pick One)		*3*
PSYC 472	Organizational Psychology	
PSYC 484	Prejudice and Intergroup Relations	
PSYC 485	Psychology and Law	
PSYC 489	Political Cognition	
Basic Social Psychology (Pick One)		*3*
PSYC 461	Attitude and Attitude Change	
PSYC 462	Cognitive Social Psychology	
PSYC 479	Cognition and Emotion	
PSYC 474	Research in Group Dynamics	
PSYC 477	The Self and Self-Esteem	
Two Graduate-Level PSYC Electives [3]		*6*
Total Hours		**30**

1. Course must be completed with a grade of "B" or better.
2. Advanced Methods courses can be any graduate level statistics or methods course. Please contact Graduate Program Director for assistance.
3. Graduate level (400+) Psychology courses can be found here (p. 1426).

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of

research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Thesis

The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The student must present the results of the study to the faculty and students of the Social Psychology Program as part of the Program colloquium series. All master's theses must be submitted for publication in accordance with Graduate School policy.

Students are encouraged to begin work on their Master's thesis early in their graduate careers. Optimally, data collection should begin in the fall semester of the student's second year, and the thesis should be completed by the beginning of the fall semester of his/her third year. This allows students to begin teaching for the department during their third year of graduate school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Acquisition of research and publication skills that will allow students to pursue an applied job after completing the program

Applied Social Psychology (PhD)

Curriculum

The PhD in Applied Social Psychology requires 60 credit hours of coursework, a master's thesis, internship in teaching or research, doctoral candidacy exam, and dissertation.

Coursework Requirements

Code	Title	Hours
Psychology Core [1]		**12**
PSYC 420	Research Methods in Psychology	
PSYC 486	Methods of Program Evaluation	
PSYC 482	Advanced Statistics

PSYC 485	Psychology and Law	
PSYC 489	Political Cognition	
PSYC 484	Prejudice and Intergroup Relations	
Six Electives [2]		*18*
Total Hours		**60**

[1] Courses in Psychology Core must be completed with a grade of B or better to be applied to degree.

[2] Electives may be selected from above courses, other graduate level Psychology courses, and graduate level coursework from other departments in the University (*eg* Sociology, Counseling and Educational Psychology). Students are strongly encouraged to contact the Graduate Program Director for approval before registering. Electives may also include independent, individualized readings (PSYC 599 Directed Readings) or research (PSYC 598 Research) courses with any willing faculty member.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Doctoral Candidacy Examination

The Doctoral Candidacy Exam is broken down into two components. In order to be a successful applied social psychologist, there are two domains within which a student must develop expertise: the application of theory to applied questions, and the use of methodology and statistics in empirical inquiry. Consequently, the Candidacy Exam in Applied Social Psychology has two components that correspond to these two critical domains: *Theory and Applied* and *Methodology and Statistics*. Successful completion of the candidacy exam process will demonstrate that the PhD candidate has acquired expertise in a specific theoretical domain as

applied to some relevant social issue, and has the developed the ability to empirically investigate such questions with appropriate methods and statistics.

For each area, students are required to choose the topics and present them to two members of the faculty – a first and second reader for that particular exam. Once both the student and the faculty readers are in agreement on the appropriateness of the topic, the student puts together a reading list of approximately 1500 to 2000 pages of relevant work in that domain. In addition, the student creates an outline summarizing the topics developed in the readings and what the student wants to learn from the endeavor. When the student and readers are in agreement on the readings and outline, the student becomes responsible for doing the readings and then demonstrating expertise in that domain. For each area, there are multiple ways to demonstrate such expertise and options are discussed in the student handbook.

*Note: The candidacy exam project cannot analyze exactly the same data from the student's MA thesis or PhD dissertation. Students cannot use the exact same methods and analyses that are the core of the thesis or dissertation for this exam.

Internship

All PhD in Social Psychology students are required to complete an internship either as a researcher in an applied setting (for those students interested in applied setting employment), or as a teacher in an academic setting. The applied research internship requires approximately 1000 hours of research experience; the teaching internship requires teaching four college-level psychology courses, covering at least two different courses. Students can choose to split the internship - 1/2 applied research and 1/2 teaching by performing 500 hours of applied research and teaching two college-level courses. Internships are usually completed after receiving the MA degree and completing most required coursework - i.e., in the third or fourth year of a student's graduate career. However, students can also complete internship hours during the summer. All PhD students must make a presentation at SARS concerning their internships and what they learned while involved in order to complete the internship requirement.

Thesis and Dissertation

Students will complete a master's thesis and earn the MA in Social Psychology en route to the PhD. The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The thesis will be published according to Graduate School policy.

The dissertation represents the culmination of one's graduate study. Writing a dissertation is an opportunity to draw upon all of one's knowledge and experience while making an original contribution to general knowledge and/or the solution to some social problem. After finishing the candidacy exam, students are well prepared for this task. In fact, students typically formulate their exam areas with an eye toward their relevance for the dissertation. Upon completion and successful oral defense of the dissertation, it will be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

PhD Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Gain experience teaching undergraduate psychology classes
- Acquisition of research and publication skills that will allow students to pursue either an academic job or an applied job after completing the program

Clinical Psychology (PhD)

The Clinical Psychology PhD program at Loyola University Chicago adheres to the scientist-practitioner model of clinical training and is designed to develop skilled, creative professionals prepared to succeed in a variety of settings (e.g., clinical, research, academic). The program strives to provide a balance of training and experience in research, clinical work, and teaching. The mission of the program is to provide students with a strong foundation in general psychology along with training focused on the integration of research and practice of clinical psychology. Students are exposed to a range of clinical training and research, with an orientation toward social justice applications of both research and practice. Located in Chicago, Illinois, students have access to a variety of community-based research and clinical externship opportunities. Formal specialization is available in the area of clinical child psychology and/or neuropsychology.

APA Accredited

The clinical psychology program at Loyola University Chicago has been fully accredited by the American Psychological Association (https://www.apa.org/) since 1959.

APA, Office of Program Consultation and Accreditation
750 First Street NE
Washington, DC 20002-4242
202.336.5979

Curriculum

The PhD in Clinical Psychology requires 72 credit hours of coursework, a comprehensive examination, supervised clinical and research

experiences (including a yearlong APA-Accredited internship), and a dissertation. Students may select a sub-specialty in Child Clinical Psychology, or to elect to undertake a Neuropsychology module.

Coursework Requirements

Code	Title	Hours

PSYC 600	Dissertation Supervision	0
Total Hours		**72**

[1] Electives are selected by the student in consultation with their advisor and should provide the student with grater depth in their special interest area as well as a richer contextual framework for their clinical interests. Electives may be chosen from graduate level psychology courses or other graduate level courses in the university with approval.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

APA Course Requirements

To acquire a broad background in primary content areas designated by APA ("discipline-specific knowledge"), clinical students are required to complete courses the Biological, Cognitive, Affective, Social, and Developmental Aspects of Behavior, as well as Psychometrics and Advanced Integrative Knowledge in Scientific Psychology. In order to effectively plan coursework to meet all distribution requirements, students should consult their advisor and Graduate Program Director frequently.

The APA requires that students in all accredited clinical programs acquire basic knowledge in each of seven areas described as "broad theoretical and scientific foundations of the field of psychology." Note that the Department and APA requirements overlap in several respects. One class can simultaneously satisfy both Departmental and APA requirements.

Code	Title	Hours
Biological Aspects of Behavior (Choose One)

PSYC 473	Social Development	3
PSYC 475	Cognitive Development	3

Supervised Clinical Experience and Internship

Supervised clinical experience is an integral part of the overall program. All clinical students must complete a minimum of 800 hours of pre-internship, or practicum/externship training, experience. This begins during the second year when students complete a two-semester psychotherapy practicum based in the University's Wellness Center.

After the second year, students progress to advanced-level externship placements where they continue to receive supervised experience, generally with a wider range of assessment and intervention techniques and more diverse clinical populations. The Clinical Program maintains a close working relationship with many hospitals, medical centers, clinics, and mental health facilities in the Chicago metropolitan area.

Clinical Internship: The 12-month full-time internship is typically taken in the 6th year of study and may be completed at any APA-accredited site within the Chicago area or anywhere in the United States.

Comprehensive Examinations

In addition to the oral examinations associated with the master's thesis and doctoral dissertation, all clinical students are required to complete the Clinical Qualifying Examination. This exam is designed to provide a comprehensive assessment of professional and scientific competency in clinical psychology. Students typically take this exam after their third year of study. This exam covers three major areas: assessment, intervention, and psychopathology. An oral exam, the Clinical Competency Examination, is also required. In this exam, students are required to discuss clinical material related to a case that is given to the student by the examination committee. Students typically take this exam at the end of their fourth year of study.

Research, Thesis, and Dissertation

All clinical students are required to complete an empirical master's thesis and a doctoral dissertation. As such, students will complete a Master of Science in Clinical Psychology en route to the PhD. The program emphasizes research on clinical problems in applied clinical settings and strongly encourages such research. Because of the close working relationships between the clinical program at Loyola and Chicago-area mental health facilities, opportunities for clinical research are available at a variety of locations.

In addition to the required research and related courses, other elective opportunities exist for students to participate in research activity. Within the Department, faculty lead research teams that provide active forums for generating research ideas. Such research covers areas such as family and marital issues, depression, ethics, adolescence, psychotherapy research, exposure to violence, children's mental health services, and pediatric psychology. Finally, our faculty encourage students to present papers and posters at professional meetings and to publish their research.

The master's thesis and dissertation will be subject to oral defense and the final approved manuscript must be deposited in a publicly accessible database in accordance with Graduate School policy.

Child Clinical Sub-specialty

The child sub-specialty allows students to develop special expertise in psychological approaches to understanding and treating children, adolescents, and families. Many of the clinical faculty teach courses and conduct research on issues related to children, adolescents, and families. In addition, clinical students and faculty interact closely with students and faculty of the developmental division through program meetings and research collaborations.

Students who enroll in this "track" complete the core courses required of all clinical students. In addition, they complete a series of advanced coursework in the child clinical sub-specialty and acquire clinical and research experience relevant to this sub-specialty as described below. It is important to note that all clinical students may take child clinical courses and acquire child related experiences. However, students can only report that they have been trained as child clinical psychologists if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses within their psychology core or electives: PSYC 473 Social Development, PSYC 475 Cognitive Development, PSYC 451 Psychopathology of Childhood & Adolescents, PSYC 438 Principles of Psychological Assessment Child & Adult, PSYC 451 Psychopathology of Childhood & Adolescents.
- Students must complete a dissertation directly related to child, adolescent, or family issues. Also, at least one faculty member from the child track must serve on each student's Thesis and Dissertation Committees.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on work with children, adolescents, and/or families.
- Students are required to complete an internship where at least 33% of one's time is spent working with child, adolescent, or family clients

Neuropsychology Module

The neuropsychology module allows students to develop special expertise in clinical neuropsychological assessment. Students who wish to pursue completion of this "module" enroll in the core courses required of all clinical students. In addition, they complete advanced coursework in clinical neuropsychology and acquire clinical experience relevant to clinical neuropsychology as described below. It is important to note that all clinical students may take neuropsychology and acquire neuropsychology-related experiences. However, students can only report that they have focused their training in clinical neuropsychology if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses as part of their psychology core or electives: PSYC 552 Neuropsychology, PSYC 553 Neuropsychological Assessment, and PSYC 436 Psychopharmacology.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on clinical neuropsychological assessment of adults and/or children.
- Students are required to complete an internship where a significant portion of one's training is in the practice of clinical neuropsychology.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

- Knowledge of the substantive content in the field of clinical psychology
- Knowledge of theories and methodological approaches in psychology
- Design and implementation of psychological research
- Specialized knowledge of clinical assessment, treatment, and psychopathology, including integration of research and practice
- Effective communication of psychological information across contexts

- Knowledge of and adherence to the ethical standards of the profession
- Awareness and integration of intersectional dimensions of diversity and individual differences in the application of psychological principles and approaches

Developmental Psychology (PhD)

The Developmental Psychology Graduate Program aims to understand and support the healthy development of children, youth, and families. Our faculty specialize in the cognitive, social, emotional, cultural, physical, neurological, and spiritual factors that promote typical development and learning in infancy through adolescence. Through research training, coursework, and teaching, students gain the professional skills they need for non-clinical academic or professional careers.

Curriculum

The PhD in Developmental Psychology requires 60 credit hours, a critical review paper, master's thesis, qualifying examination, and dissertation.

En route to earning the PhD in Developmental Psychology, students complete a master's degree (30 credit hours), unless they enter with advanced standing from a master's in a relevant field from an accredited institution. An additional 30 credit hours are required beyond the master's degree for the doctoral degree.

Coursework Requirements

Code	Title	Hours
Psychology Core [1]		
PSYC 420	Research Methods in Psychology	3

PSYC 599	Directed Readings (Taken Twice)	
Three Electives [2]		*9*
Two Minor Area Courses [3]		*6*
Total Hours		**60**

1. All courses in Psychology Core must be completed with a grade of B or better to be applied to the degree.
2. Elective courses may be selected from the Developmental, Social or Clinical Topics courses listed above, or courses in the students' minor area, but each course can only count only once toward meeting a requirement (i.e., no double dipping).
3. Minor Areas include but are not limited to: Statistics, Education, and Women's Studies and Gender Studies. Other courses not listed here might also be acceptable to meet the minor requirement, but student must confer with Graduate Program Director. All courses must be taken at the graduate level (400 or above).

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Minor Area Options

Code	Title	Hours
Minor Area Options		
Statistics Minor		
PSYC 493	Structural Equation Modeling	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
RMTD 488	Meta-Analysis

Women's Studies and Gender Studies		
WSGS 402	Foundations of Women's Studies	
WSGS 450	Global Feminisms	

Comprehensive Examination

The doctoral qualifying exam is taken after the student has completed at least two full years in the graduate program. There are two parts: the Written Qualifying Exam, and the Oral Qualifying Exam.The qualifying examination is the final step before the student begins dissertation research. At this stage the student should have acquired considerable

knowledge of the field of developmental psychology and of one or more specialty areas. Students will write a NIH-style grant proposal. Students can propose to write an NRSA or an alternative grant proposal (e.g., NSF, Spencer), but whatever agency/proposal that will be pursued must be approved by their Research Mentor and the Graduate Program Director. The goal is to provide students with the opportunity to prepare a proposal for external funding, and also provide a written context for the subsequent Oral Qualifying Examination. The Oral Exam will require the student to place the work in a still larger context, such as discussion of the linkages to or implications for research and theory in various areas of social and cognitive development, social policy, and/or practice. The questions will not be provided to the student in advance of the exam

Thesis and Dissertation

The Master's thesis is an original research project, supervised by a Psychology Department faculty member, written up as a journal article and orally defended. Students who enter with advanced standing should check with the Graduate Program Director to determine if this requirement is met with previous master's degree.

The Dissertation is the product of a large-scale research endeavor undertaken with guidance and supervision of a faculty committee. A public oral defense of the dissertation is required, and after successful completion the final work will be deposited in a publicly available database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students who complete the PhD in Developmental Psychology will:

- Acquire broad understanding of psychological concepts, and advanced knowledge of the cognitive, cultural social-emotional, linguistic and neural factors that promote the learning and development of children and youth.
- Become versed in various data gathering methods, the ethical conduct of research, and the use of sophisticated statistical techniques.
- Conduct original research that contributes new knowledge and can ultimately support the healthy development of children, youth, and families.
- Learn about available research funding opportunities, and obtain experience with grant writing.
- Produce high quality oral and written presentations, including posters at conferences, and publications in peer-reviewed journals.

Sociology

Loyola's graduate programs in Sociology are distinctive in two ways:

- **An extensive commitment to value-oriented research.** Students in the department are exposed to faculty who are committed to making their research accessible to the wider community. This has been most fully institutionalized in the Department's leadership role in the Center for Urban Research and Learning (https://www.luc.edu/curl/) (CURL) through which community organization leaders and academics collaborate as equal partners in research projects. Variously called "public sociology", "value-oriented," "action" or "participatory," this style of research plays an important role in the Sociology program.
- **A genuine commitment to methodological pluralism and classroom skills.** All students receive an extensive training in qualitative and quantitative methodologies. Field studies, in-depth interviewing, participant observation, archival research, as well as surveys and sophisticated quantitative data analysis are equally stressed and represented in the department's research and teaching agenda.

Graduate Program

- Sociology (MA) (p. 1439)
- Sociology (PhD) (p. 1440)

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (3 Credit Hours)
Work on an individual research project under the supervision of a faculty member.

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Sociology (MA)

Curriculum

The Master of Arts in Sociology requires 30 credit hours and a master's thesis or portfolio. Students may choose between a general or applied sociology track.

General Sociology Requirements

The Master of Arts in Sociology general track is designed to equip students with a broad foundation in general sociology and a particular focus in a more specialized field of relevance to the student's career interests in teaching, research, governmental work, or public service. Requirements include 30 credit hours of course work (5 required courses and 5 electives) selected with the approval of the Graduate Program Director or the student's faculty advisor, and the preparation of a Master's Thesis or a Portfolio (consisting of two class related papers, one of which must be empirical).

Code	Title	Hours
General Sociology Required Courses		
Introductory Courses		
SOCL 405	History Sociological Thought	3
SOCL 406	Modern Sociological Theory	3
Methods and Research Courses		
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 414	Statistical Methods Analysis I	3
Choose Five Electives		**15**
SOCL 415	Statistical Methods of Analysis II	
SOCL 418	Demography	
SOCL 421	Theories Social Change	
SOCL 423	Social Movements	
SOCL 425	Inequality and Society	
SOCL 426	Sociology of Gender	
SOCL 427	Political Sociology	
SOCL 428	Poverty and Social Welfare	
SOCL 432	Socialization Thru Life Cycle	
SOCL 438	The Family	
SOCL 439	Community Change	
SOCL 440	Organizations & Organizational Change	
SOCL 441	Sociology of Religion	
SOCL 442	Religious Conflict & Change	
SOCL 446	Knowledge, Power & Expertise	
SOCL 447	Sociology of Culture	
SOCL 448	Technology & Material Culture	
SOCL 452	Complex Organizations	
SOCL 453	Occupations and Professions	
SOCL 461	Race & Ethnicity	
SOCL 462	The Urban Metropolis	
SOCL 463	Sociology & Natural Environment

SOCL 491	Sociological Discourse	
SOCL 494	Internship	
SOCL 497	Independent Research	
SOCL 498	Independent Research	
SOCL 499	Directed Study	
Total Hours		**30**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Applied Sociology Requirements

Although all aspects of the department's curriculum aim to provide students with a better understanding of social structures and processes, the track in Applied Sociology puts special emphasis on the application of sociological knowledge and methods to the development of policies and programs. It provides students with the research skills in both qualitative and quantitative analysis and the substantive sociological background needed to pursue careers in applied research.

This degree can be particularly useful for students planning jobs with such organizations as a corporation, a hospital, an urban police department, a metropolitan archdiocese, a social service agency, a labor union or a community organization.

In addition to five electives within the Sociology Program, this track consists of five required courses:

Code	Title	Hours
Applied Sociology Required Courses		
SOCL 405	History Sociological Thought	3
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 414	Statistical Methods Analysis I	3
SOCL 494	Internship	3
Choose Five Electives		**15**

SOCL 473	Criminology
SOCL 481	Medical Sociology
SOCL 490	Workshop: Applied Sociology
SOCL 491	Sociological Discourse
SOCL 497	Independent Research
SOCL 498	Independent Research
SOCL 499	Directed Study
Total Hours	**30**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

The internship is a unique opportunity for students to gain hands-on experience and to make professional contacts that will facilitate their careers. Interns have worked in a variety of organizations-the Illinois Criminal Justice Authority, American Medical Association, Better Government Association, and the Midwest Women's Center-as well as for several metropolitan newspapers, fair housing commissions, city government departments, and major corporations. Students in this track are also required to complete a thesis or submit a portfolio (including the internship report).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

This Master of Arts in Sociology prepares students for positions as research staff in government, non-profit, and for profit sectors. The General Track also prepares students for application to PhD programs.

Students in the General track will learn to:

- identify the broad theoretical orientations of the discipline
- frame sociological research questions
- synthesize social scientific literature
- select appropriate data sources
- collect and present data in accordance with ethical and professional standards
- use one or more data collection methods to carry out a research project, such as interviews, participant observation, surveys, or archival evidence
- analyze quantitative or qualitative data
- write a sociological research report

Students in the Applied track will learn to:

- apply sociological knowledge to governmental, non-profit, or for-profit organizational activities
- contribute to the work of a governmental, non-profit, or for-profit organization through an internship
- frame a research question relevant to an organization
- select appropriate data sources
- collect and present data in accordance with ethical and professional standards
- use one or more data collection methods, such as interviews, participant observation, or surveys
- analyze quantitative or qualitative data
- write a sociologically-informed report that is relevant to an organization

Sociology (PhD)

The PhD program in Sociology is designed to produce independent scholars able to research, teach or serve in a variety of settings. We offer comprehensive training in the knowledge and skills which constitute professional competence in the field. The curriculum is designed to equip students with a broad foundation in general sociology and in more specialized knowledge related to students' career interests in teaching, research, governmental work, or public service.

PhD student work closely with faculty as they advance in the program. The program has particular strengths in the sub-fiends of medical sociology, urban sociology, sociology of religion, and inequality and social justice.

Curriculum

The PhD in Sociology requires 60 credit hours, comprehensive examinations, and a dissertation. Students who enter the program with a master's degree in Sociology are required to complete 30 credit hours of coursework at Loyola. The student's thesis or research paper may also be certified at this time as meeting the department's master's thesis requirement for the PhD.

Course Requirements

After the initial integrative coursework in preparation for the qualifying exams and the doctoral review, students move on more advanced coursework. This involves specialized courses, individual study, and seminars in areas relevant for the student's scholarly and professional development.

Total Hours		**60**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

[1] In planning the more specialized phase of their graduate program, doctoral students are encouraged to take full advantage of the resources of the university and, where pertinent, to take courses in other graduate departments.

Comprehensive Examinations

Written examinations in two related special fields are normally taken after coursework is completed. Students must choose two Special Fields, or sub-fields in sociology, in which they wish to be examined. We strongly suggest that these exams be completed in the third year or the beginning of the fourth year. You may not take an exam if you have any Incompletes, or if you are on Academic Probation. The Department offers exams in Gender and Sexuality, Social Movements, Medical Sociology, Political Sociology, Race and Ethnicity, Sociology of Religion, Urban and Community Sociology, Sociology of Science and Technology, and Sociology of Immigration. Students may petition to take one of the two exams in another area (but not more than one) upon consultation with the Graduate Program Director. Such exceptions are not regularly granted. The only fields that will be considered are those established as sections within the American Sociological Association: http://www.asanet.org/asa-communities/asa- sections/current-sections.

The goals of the Special Field exams are to demonstrate:

- sophisticated knowledge of the development and current theoretical and empirical debates in a sub-field
- knowledge of important empirical patterns relevant to a sub-field
- the capacity for analytic writing, including the ability to marshal evidence to make claims, the capacity to make logic comparisons, and the capacity to identify gaps and issues in fields.
- the capacity to write in a clear, organized academic style, with few grammatical and spelling errors

The exam is a five-day, take-home exam, in which students answer 3 to 4 questions chosen by the committee. The questions are typically handed out on a Monday morning and completed by the end of the day on a Friday (or a similar time period). Students, who for medical, family, or work reasons, are unable to take the five-day exam, may petition the GPD to use a different exam form: a 30-40 page review that demonstrates your knowledge of the key developments and current debates in the field, key empirical patterns relevant to your field, and methodological techniques and tools commonly used in the sub-field. Students may want to model their papers on articles in The Annual Review of Sociology and similar periodicals. Again, this option is reserved for students who have extenuating circumstances that strongly limit their ability to take the 5-day exam. The Director will provide more guidance on expectations. Under no circumstances may students answer specific questions set by the Director and Reader: the student must produce a review essay.

Dissertation

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

This degree prepares students for research and teaching positions in the academic, government, non-profit, and for-profit sectors.

Research learning outcomes:

- demonstrate knowledge of the broad theoretical orientations of the discipline
- demonstrate knowledge of two empirical sub-fields in the discipline
- frame sociological research questions both theoretically and empirically

- select appropriate data sources
- analyze and present data in accordance with ethical and professional standards
- use one or more data collection methods to carry out a major research project: interviews, participant observation, surveys, or archival evidence.
- analyze quantitative or qualitative data with respect to sociological claims or theories.
- write for publication
- present findings orally for lay or professional audiences

Teaching learning outcomes:

- assist an instructor of record with grading, tutoring, and class presentations
- teach as an undergraduate instructor of record, by developing the capacity to: design a syllabus; create and carry out assignments, assessments, and lectures; integrate Ignatian pedagogical techniques, including *curia personalis;* and reflective learning.

Theology

Loyola University Chicago is home to a number of leading scholars in Christian Ethics, Systematic Theology, and New Testament/Early Christianity. Our graduate programs are designed to equip students with the resources necessary for contributing to theology as a discipline that is at once academically rigorous and creative.

Graduate Programs

- Theology (MA) (p. 1444)
- Theology (PhD) (p. 1446)

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Theology (MA)

The MA degree program is appropriate for students seeking either a terminal degree or a degree that will prepare them to pursue a doctoral degree. Applicants can be admitted to the program on a part-time basis. Many courses are conveniently scheduled during late afternoon or evening hours.

Curriculum

The Master of Arts in Theology requires 30 credit hours of coursework and a comprehensive examination. Students may choose to concentrate

in one of four areas: Theological Studies, Biblical Languages and Literature, Biblical Studies, or Christian Ethics. There is also an option to add an Education minor.

Concentrations

Theological Studies

This concentration emphasizes exposure to the full range of theological investigation.

Code	Title	Hours
Required Courses		
Two courses in Biblical Studies		6
Two courses in Systematic or Historical Theology		6
Two courses in Christian Ethics		6
Four Graduate Electives		12
Total Hours		**30**

Biblical Languages and Literature

The concentration in Biblical Languages and Literature provides students with the initial language and biblical study necessary to apply to doctoral programs in Biblical Studies. Half of the coursework is in biblical Greek and Hebrew. This concentration requires an additional 6cr hours due to intensive language requirements.

Code	Title	Hours
Required Courses		
Four courses in Major Biblical Language (Hebrew or Greek)		12
Two courses in Minor Biblical Language (Hebrew or Greek)		6
Two courses in Old Testament		6
Two courses in New Testament		6
One course in Systematic or Historical Theology		3
One course in Christian Ethics		3
Total Hours		**36**

Biblical Studies

This concentration is suited to students with a particular interest in Biblical Studies, but does not incorporate the language study necessary for doctoral work in Biblical Studies.

Code	Title	Hours
Required Courses		
Five courses in Biblical Studies		15
One course in Systematic or Historical Theology		3
One course in Christian Ethics		3
Three Graduate Electives		9
Total Hours		**30**

Christian Ethics

This concentration is similar to the concentration in Theological Studies, but requires more coursework in Christian Ethics.

Code	Title	Hours
Required Courses		
Five courses in Christian Ethics		15
Two courses in Systematic of Historical Theology		6
Two courses in Biblical Studies		6
One Graduate Elective		3
Total Hours		**30**

Bioethics & Health Care Policy

The concentration in Bioethics and Health Care Policy is offered jointly with the Neiswanger Institute for Bioethics and Healthcare Leadership. This concentration is appropriate for students interested in pursuing a social ethical understanding of bioethics. Courses in this concentration address the history of bioethics including the issues of racism and eugenics; methods and approaches in medical ethics and bioethics (ethnography, narrative bioethics, feminist bioethics); and topics in bioethics such as reproductive medicine and reproductive justice, genetics, disability ethics, spiritual care ethics, end of life, and healthcare justice.

Code	Title	Hours
Required Courses		
BEHL 401	Clinical Topics in Bioethics	3
Two courses in Christian Ethics		6
Two courses in Biblical Studies		6
Three courses in Bioethics [1]		9
Two courses in Systematic or Historical Theology		6
Total Hours		**30**

[1] One course in Bioethics may be taken at the Neiswanger Institute.

Graduate Courses by Area

Theology courses are divided into sub-fields as follows. There are also directed readings and independent studies options that are open for application to particular areas of study.

Biblical Studies

Code	Title	Hours
THEO 401	Tutorial in Biblical Studies	3
THEO 403	Topics in Rabbinic & Medieval Literature	3
THEO 404	History of Israel	3
THEO 405	Formation of The Pentateuch	3
THEO 406	Basic Hebrew Grammar	3
THEO 407	Hebrew Exegesis	3
THEO 418	Theological Prophets-Ancient Israel	3
THEO 420	Seminar	3
THEO 421	Directed Reading in Bible Studies	1-3
THEO 422	Directed Reading in Bible Studies	3
THEO 424	The Synoptic Gospels	3
THEO 425	Luke-Acts & New Testament Church	3
THEO 427	St Paul's Contribution to Christianity	3
THEO 429	Person of Jesus in New Testament	3
THEO 515	Gospels in Early Christianity	3
THEO 517	Early Christian Letters	1-12
THEO 519	Latr Nt-Subapost Writ	3
THEO 523	Cultural-Religious Environment Early Christianity	3
THEO 527	Various Community Early Christianity	3

Theology

Code	Title	Hours
THEO 436	Christology	3
THEO 437	Mystery of God in Christian Theology	3
THEO 440	Seminar in Systematic Theology	1-12
THEO 441	Directed Reading in Systematic Theology	3
THEO 447	Philosophical Theology	3
THEO 449	Phenomenology of Religion	3
THEO 459	Contemporary Theology	1-12
THEO 460	Seminar in History of Theology	1-12
THEO 461	Directed Readings in History of Theology	3
THEO 464	Religion & Politics in Christian History	3
THEO 530	Seminar - Variable Titles	1-12
THEO 536	Christian Doctrine-Catholic Theology	3
THEO 560	Contemporary Authors	1-12
THEO 570	Fundamental Issues in Christian Ethics	1-12

Ethics

Code	Title	Hours
THEO 470	Foundations Crititical Issues Theological Ethics	1-12
THEO 475	Natural Law & Theological Ethics	3
THEO 477	Feminist Issues in Theology and Ethics	3
THEO 478	Issues in Medical Ethics	3
THEO 480	Seminar in Christian Ethics	1-12
THEO 481	Directed Readings Christian Ethics	3
THEO 573	Roman Catholic Ethics	3
THEO 575	Religious Ethics and Social Theory	3
THEO 580	Christian Social Ethics	3
THEO 585	Issues Applied Theology Ethics	3

Education Minor

Students seeking an MA in any of our four concentrations can pursue a minor in Education. This option is excellent preparation for those who plan to teach theology at the high school level, where candidates with a combination of academic theological training and teacher training are in high demand.

Required Courses

Code	Title	Hours
CIEP 414	Instructional Methods-Diverse Population	3
CIEP 423	Advanced Literacy Instruction in the Content Area	3
CIEP 425	Theory and Practice in Assessment	3
CIEP 458	Classroom Management	3

For those students who choose this option, the Theology Department will recognize two of these four required School of Education courses as fulfilling two electives in the MA program. The other two School of Education courses are in addition to the usual MA course requirements. Students frequently take these additional two courses during the summer.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Theology (PhD)

The study of religion has been called a “field-encompassing field” (Clifford Geertz) in that the understanding of religion involves many disciplines. The PhD in Theology at Loyola emphasizes interdisciplinary engagement, drawing on historical, linguistic, philosophical, sociological, and literary methods, in addition to the core materials and texts of the fields of Systematic Theology, Christian Ethics, or Biblical Studies. Loyola University’s doctoral program in theology is designed for those who envision a career primarily in teaching and scholarly research at an advanced level. We offer two specializations.

In our **Integrative Studies in Ethics and Theology** (ISET) specialization, students give particular attention to the ways in which theology (historical and systematic) and Christian ethics intersect with and influence one another in particular thinkers and with respect to concrete theological and ethical questions.

The **New Testament and Early Christianity** specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

Curriculum

The PhD in Theology can be pursued in one of two areas of study: Integrative Studies in Ethics and Theology or New Testament and Early Christianity.

Integrative Studies in Ethics and Theology Requirements

The PhD in Theology with a concentration in Integrative Studies in Ethics and Theology requires 60 credit hours of coursework, two research tools (typically two modern languages), a comprehensive examination, and dissertation. Students complete coursework toward a master’s degree (30 credit hours) in route to the PhD, and the courses required below toward the doctorate.

The program in Integrative Studies in Ethics and Theology (ISET) represents an effort to rethink the riches of the Christian theological tradition to meet the intellectual, societal, and ethical challenges that confront humanity in the 21st century. In their studies and research, students give particular attention to the ways in which Christian theology and ethics interrelate and mutually inform one another.

ISET-ETHICS Required Courses

Code	Title	Hours
THEO 480	Seminar in Christian Ethics [1]	3
Five Courses in Christian Ethics		*15*
THEO 470	Foundations Crititical Issues Theological Ethics	
THEO 475	Natural Law & Theological Ethics

THEO 477	Feminist Issues in Theology and Ethics	
THEO 478	Issues in Medical Ethics	
THEO 481	Directed Readings Christian Ethics	
THEO 515	Gospels in Early Christianity	
One Course in Biblical Studies		*3*
Two Graduate Level THEO Electives		*6*
Total Hours		**30**

[1] Course is taken twice, in Spring semester of first two years in doctoral program.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Language Requirements

Students who want to pursue the specialization in Integrative Studies in Ethics and Theology must be able to demonstrate a reading knowledge of French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in one of the other two modern languages (or, in the case of Theology, a language pertinent to the intended dissertation topic) before the beginning of their third year of doctoral study.

New Testament and Early Christianity Requirements

The New Testament and Early Christianity specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

The PhD in Theology with a concentration in New Testament and Early Christianity requires 66cr hours of coursework, demonstrated competency in four languages (Greek, Hebrew or Latin, and two modern languages), a comprehensive examination, and dissertation. Students complete coursework toward a master's degree (30cr hours) en route to the PhD, and the courses required below toward the doctorate.

Required Courses

Code	Title	Hours
500-level Biblical Studies		*15*
THEO 515	Gospels in Early Christianity	
THEO 517	Early Christian Letters	
THEO 519	Latr Nt-Subapost Writ	
THEO 523	Cultural-Religious Environment Early Christianity	
THEO 527	Various Community Early Christianity	
One Course in Theology		*3*
One Course in Ethics		*3*
Select Three Electives		*9*
Total Hours		**30**

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Language Requirements

Students who want to pursue the specialization in New Testament and Early Christianity must be able to demonstrate a reading knowledge of Greek and either French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in Hebrew or Latin and one additional language before the beginning of their third year of doctoral study. German must be one of the modern languages. Modern languages courses taken to fulfill this requirement do not count towards the degree.

Comprehensive Exams

All PhD students complete comprehensive doctoral exams.

The doctoral exam for Integrative Studies in Ethics and Theology takes place over three days. The first two days of comprehensive exams cover the student's area of focus, either Ethics or Theology, but the third day is integrative. Each student chooses one of two options: to compare two figures in depth - one working primarily in Christian ethics and one working primarily in Theology or Bible; or to focus around a particular theme and propose authors working on this theme to read and prepare

The New Testament and Early Christianity written exams take place over three days. Day one consists of translation, textual criticism, and exegesis of a Greek text from the NT or other early Christian literature. Day two consists of questions related to a large cross section of reading outside the New Testament from 200 BCE to 200 CE. Day three consists of material chosen by the student as their "minor area" and is usually preparation for the student's dissertation research. These three days of writing are followed by an oral defense, usually during the week following the written exams.

Dissertation

Students will develop a dissertation field within their specialization. Following the successful completion of doctoral examinations and the portfolio requirement, students will make a presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation.

Following approval of the dissertation proposal and the successful completion of all other degree requirements, students are admitted to PhD candidacy. Once students have advanced to candidacy, they will enroll in THEO 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation.

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Women's Studies and Gender Studies

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention. It is also an intimate community where students build strong bonds with each other and with their faculty.

Graduate Programs

- Gender Studies and Migration for Social Justice Online Certificate (p. 1449)
- Women's Studies and Gender Studies (MA) (p. 1450)
- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1451)

Women & Gender STudies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Gender Studies and Migration for Social Justice Online Certificate

The Certificate in Gender Studies and Migration for Social Justice is a fully online certificate offered in collaboration with the School of Social Work. This post-graduation opportunity is intended for new students not already enrolled in programs at Loyola University Chicago, particularly, individuals working in professional settings such as social work, nursing, education, public policy, and non-governmental organizations among other academic/professional fields.

In our increasingly global world, migration issues have assumed a front and center position. Gender influences reasons for migrating, who migrates and to where, how people migrate and the networks they use, opportunities and resources available at destinations, and relations with the country of origin. Risks, vulnerabilities and needs are also shaped in large part by one's gender expression. Yet we believe that the emphasis should not be on biological sex or on women migrants alone. On the contrary, the awareness that sex and gender are not fixed categories or the product of biology should encourage the development of migration theories and social practices aimed at revealing and dismantling the relationships of power that have shaped such social constructions. The roles, expectations, relationships and power dynamics associated with being a man, woman, boy or girl, and whether one identifies as lesbian, gay, bisexual, transgender, queer, and/or intersex (LGBTQI+), significantly

affect all aspects of the migration process, and can also be affected in new ways by migration.

The certificate combines the expertise and practice of faculty in Women's Studies and Gender Studies and the School of Social Work. Its goal is to make accessible theoretical tools of decolonial feminism, which seeks to deconstruct normalized Western gender concepts, with the goal of re-introducing indigenous and postcolonial worldviews of gender into feminist discourse, and contemporary gender studies for social justice from global perspectives.

The certificate program directly tackles the societal challenge of addressing the needs of immigrant populations, particularly with respect to issues of gendered agency, racial and sexual discrimination, and sexual identity. It also stands to have an impact on the promotion of global and community partnerships.

Curriculum

The Certificate in Gender Studies and Migration for Social Justice requires 12 credit hours and is offered online year-round.

Code	Title	Hours
Required Courses		
WSGS 401	History of Feminist Thought	3
WSGS 450	Global Feminisms	3
WSGS 497	Topics in Women's Studies and Gender Studies	3
SOWK 732	Migration, Social Justice, and Human Rights	3
Total Hours		**12**

These courses are intended to foster students' recognition of how the struggle for gender justice is connected to larger social, economic, political, and cultural forces, local & global.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Students completing the program will be able to implement key theoretical concepts in the study of "borders," identity politics, trans-nationalism, and sexuality from an intersectional and de-colonial lens. They will be able to demonstrate cultural competency in critical theory and familiarity with key issues in different disciplinary realms, such as race theory, migration, diaspora, masculinity studies, transnational studies, Queer theory, film, and visual studies. They will also be able to advocate for humane policies regarding immigration grounded in an understanding of gender expression and social justice animated by Ignatian principles.

Women's Studies and Gender Studies (MA)

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention.

Curriculum

The Master of Arts in Women's Studies and Gender Studies requires 30 credit hours of courses as well as a capstone project or thesis.

Code	Title	Hours
Required Courses		
WSGS 401	History of Feminist Thought (Offered every fall)	3
WSGS 402	Foundations of Women's Studies (Offered every spring)	3
One Global Feminisms course [1]		**3**
WSGS 450	Global Feminisms	
WSGS 460	Migration, Identity, Sexuality	
WSGS 475	Masculinity Studies: Equity, Race, Transformation	
Select six elective courses [2]		**18**
WSGS 455	Feminist Pedagogy	
WSGS 470	Sexual Assault Advocacy	
WSGS 475	Masculinity Studies: Equity, Race, Transformation	
WSGS 480	Queer Theory	
WSGS 497	Topics in Women's Studies and Gender Studies	
WSGS 498	Practicum	
WSGS 499	Independent Study	
WSGS 599	Capstone Presentation	3
or WSGS 500	Thesis Research	
WSGS 595	Thesis Supervision [3]	0
Total Hours		**30**

1. The third core requirement is a course that explores feminism/gender in a global dimension; a number of different courses can satisfy this requirement.
2. Some graduate level electives are offered through other departments, including English, History, Philosophy, Sociology, Political Science, Theology, Communications, Law, and Social Work. Students must select three electives to apply to a track of study (detailed below).
3. WSGS 500 Thesis Research and WSGS 595 Thesis Supervision are taken by students who elect to write a thesis for the MA rather than a capstone.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Tracks of Study

Students must choose one of the following concentration tracks for at least three of their electives. Dual-degree students will not be required to choose a concentration beyond their dual degree, but they may organize their electives around a concentration if they choose.

- Global and Transnational
- Gender and Violence
- Bodies and Sexualities
- Religion and Ethics
- Expressive Arts
- Self-designed concentration (must be approved by the Graduate Program Director based on a written statement explaining the merits of the proposed course of study)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon graduating, Graduate Women's Studies and Gender Studies students will be able to:

- Identify major influences within key historic feminist/gender studies movements. These influences may include activists, authors and/or writings, or legislation both in and outside the US.
- Articulate and understand how women's and gender studies is a distinct and fundamental field of study intimately connected to other interdisciplinary academic disciplines.
- Evaluate, compare, and analyze gender and feminist theories and methodologies from both an intersectional and social justice lens.
- Identify and examine the intersections of identities (e.g., gender, race, ethnicity, class, sexuality, nationality, etc.) and assess the ways in which they contribute to instances of privilege and power dynamics across global cultures, space, and time.
- Conduct research by privileging Feminist, Queer, and/or other Gender Studies methodologies.
- Apply acquired knowledge and critical thinking toward further graduate study, and also professional and personal development with social justice at the core.

Women's Studies and Gender Studies (MA)/Social Work (MSW)

Loyola University Chicago is one of a very few institutions offering a dual degree in Social Work and Women's Studies and Gender Studies. Earning both an MA in Women's Studies and Gender Studies and an MSW in Social Work together allows students to complete these degrees more quickly by taking courses that carry credit in both fields. This dual degree program enables women's studies students to utilize their course work in an applied setting and allows social work students to enhance their capacity to work with women in social work settings after graduation.

Students interested in the dual degree in Social Work and Women's Studies and Gender Studies must apply to each school simultaneously and be admitted based on the criteria for admission to each school. Students are encouraged to contact the program directors from both schools at the time of admission.

Curriculum

The Dual Master of Arts in Women's and Gender Studies and Master of Social work requires 18 credit hours in Women's and Gender Studies as well as the 49 credit hours required for the MSW curriculum. The MSW program requires two internships totaling 1,000 hours.

Code	Title	Hours

SOWK 652	Organizations, Program Development, and Evaluation	
SOWK 653	Community Organizing and Policy Practice	
Electives		
All students will choose to take two electives. Any 600 or 700-level course may be considered an elective.		6
Total Hours		**67**

[1] The third core requirement is a course that explores feminism in a global dimension; a number of different courses can satisfy this requirement.

[2] Some graduate level electives are offered through other departments, including English, History, Philosophy, Sociology, Political Science, Theology, Communications, Law, and Social Work. Electives recommended for students in the MA/MSW program include WSGS 480 Queer Theory, SOCL 426 Sociology of Gender, THEO 480 Seminar in Christian Ethics, and LAW 425 Feminist Jurisprudence.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Micro Practice Specialization

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1976)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1978)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1981)
  - Migration Studies Track (p. 1983)
  - Schools/Professional Educator License (PEL) Track (p. 1985)

Social Work Internship Placements

Students in the dual degree program must complete two social work field placements, one each year, which are focused on women. This means that the placements must provide students with experience in modalities of treatment that are women focused and/or involve students in advocacy activities in areas of concern for women. While there are some agencies that clearly meet these criteria by virtue of their focus and service population, other agencies may be considered if at least 50% of the student's activities in these agencies meet the required criteria. All placements must be supervised by social workers with an MSW.

Capstone Requirement

The required SOWK internships fulfill the required WSGS capstone experience for dual-degree students, but you must take WSGS 599 Capstone Presentation, the zero-credit-hour course that corresponds with the final capstone presentation, during your final semester. Upon completion of the program, all WSGS students do a capstone presentation, reflecting on the culmination of their work in the program as well as future applications of their WSGS curriculum, at the biannual WSGS capstone ceremony and celebration. Along with the capstone presentation, students are required to submit a brief synthesis paper and annotated bibliography of ten sources in Women's Studies and Gender Studies that have been influential to their work.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

MSW Program Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and

effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Police Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building

and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Counseling Psychology (CPSY)

CPSY 400 Research Fundamentals: Family Studies (3 Credit Hours)
No course description is available

CPSY 406 Professional, Ethical, Legal Issues: Family & School (3 Credit Hours)
No course description is available

CPSY 407 Professional Field Experience: Family Studies (0 Credit Hours)
No course description is available

CPSY 417 Intro to Family Studies (3 Credit Hours)
No course description is available

CPSY 418 Theories of Family (3 Credit Hours)
No course description is available

CPSY 419 Family Communications (3 Credit Hours)
No course description is available

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 422 Group Dynamics: Theory/Practice (3 Credit Hours)
No course description is available

CPSY 423 Theory Counseling & Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development & Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 438 Program for Addicted Personality (3 Credit Hours)
No course description is available

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (0 Credit Hours)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 452 Educational Implication Social Psych (3 Credit Hours)
No course description is available

CPSY 453 Affective Development (3 Credit Hours)
No course description is available

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 455 Interpersonal Relations & Sexuality (3 Credit Hours)
No course description is available

CPSY 456 Personality Theory & Education (3 Credit Hours)
No course description is available

CPSY 457 Child Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to child development
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in children and prevent the development of psychological and academic problems

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 464 Adult Development & Counseling (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY464/PSYC450

CPSY 480 Mental Tests:School Age& Adult (3 Credit Hours)
No course description is available

CPSY 481 Mental Tests: Preschool (3 Credit Hours)
No course description is available

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 483 Advanced Projectives (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP483/CPSY483

CPSY 484 Neuropsychological Assessment (3 Credit Hours)
Pre-requisites: CPSY 461
This course introduces students to the administration and interpretation of neuropsychological tests.
Outcomes:
Students will be able to demonstrate knowledge of major neuropsychological assessment tools and their application to the assessment of neuropsychological conditions

CPSY 485 Career Assessment (3 Credit Hours)
This course introduces the career assessment process from theoretical, empirical and practical perspectives. The appraisal of aptitudes, interests, values, needs, and work environments will be studied.
Outcomes:
Students will be able to demonstrate knowledge of the nature, structure, function, and cross-cultural generality of work-related aptitudes, interests, needs, and values and prominent tools to assess each

CPSY 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CPSY 489 Achievement Tests (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP493/CPSY489

CPSY 490 Advanced Educational Statistics (3 Credit Hours)
No course description is available
Course equivalencies: RMTD481 / CPSY490

CPSY 495 Research Methods (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP495/CPSY495

CPSY 496 Computers in Educational Research (3 Credit Hours)
No course description is available

CPSY 497 Microcomputer Applications School or Agency (3 Credit Hours)
No course description is available

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 551 Writing for Publication (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY551/GNUR506

CPSY 552 Research in Self Esteem (3 Credit Hours)
No course description is available

CPSY 553 Language & Communication Devel (3 Credit Hours)
No course description is available

CPSY 554 Moral Development (3 Credit Hours)
No course description is available

CPSY 555 Seminar Human Development (3 Credit Hours)
No course description is available

CPSY 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (0 Credit Hours)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Education Leadership and Policy Studies (ELPS)

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 401 Documentary Research in Education (3 Credit Hours)
Documentary research in the field of education introduces graduate students to archival research and addresses issues related to the role and use of documents and public and private records.
Course equivalencies: RMTD401 / ELPS401

ELPS 402 Mission and Catholic School Leadership (3 Credit Hours)
This course explores how mission must be central to leadership and how all activities must align with that mission. Students will explore inputs, transformation processes and outputs as they relate to Catholic Ed leadership and school improvement.
Course equivalencies: RMTD402 / ELPS402

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 411 Special Education in the Catholic School (3 Credit Hours)
This course will examine moral and practical foundations of developing special education programs with the Catholic schools setting. This course will also explore the connection between Church documents and serving students with disabilities in This course is restricted to those enrolled in the Leading Inclusive Catholic Schools

ELPS 412 Urban Education Policy (3 Credit Hours)
This course uses a range of theoretical perspectives, theories and empirical research to analyze urban education policy. This course explores urban schools' and urban educational policy's evolution in response to changes in U.S. cities, urban teaching and school governance, and contemporary educational policies that are prevalent in urban school districts.
Outcomes:
1) Improved ability to critically evaluate ideas, arguments, and points of view regarding urban education policy; 2) Expanded knowledge of contemporary events, issues, movements and policies in urban education settings

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural and social factors that helped to shape educational policy and schooling in the United States.
Course equivalencies: X-ELPS444/HIST454
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 445 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

ELPS 446 Historical Foundations of Western Education and Social Policy (3 Credit Hours)
This course examines the development of Western education through an examination of changing concepts of what it means to be an educated person and the intellectual movements and socio-cultural contexts within which such notions have emerged.
Course equivalencies: X-ELPS446/HIST437
Outcomes:
Students will be able to demonstrate a historical understanding of the development of Western education

ELPS 447 History of Modern European Education (3 Credit Hours)
An examination of the development of national systems of education across Europe since the nineteenth century and an analysis of the development of cross-European educational initiatives in the context of the European Union.
Course equivalencies: X-ELPS447/HIST438
Outcomes:
Students will be able to demonstrate a historical understanding of the development of nationally specific and regionally focused educational policies and schooling systems

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding the Jesuit Jesus: Preparing for Prof. Life - Living Spiritual Exercises of St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership such as: Instructional Leadership, Equity and Justice; Collective Bargaining; Research in Educational Leadership; Instructional Leadership, Cultural Context for Informed Decision Making; The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 502 Fundamentals in College Teaching and Course Design (3 Credit Hours)
Students will assess their experiences in the IHE program based on the tenets of the Jesuit Examen. Students will write a culminating final capstone paper which they will present at a School of Education mini-conference. Students will write a final culminating paper that identifies experiences, people, and places in the program that have impacted them personally and professionally; Students will analyze their successes, failures, and mediocrity as students in the program and articulate the major takeaways from their learning.
Outcomes:
Students will reflect upon their IHE program experience utilizing the principles of the Jesuit Examen

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 510 Seminar in the Sociology of Education (3 Credit Hours)
This course is an advanced seminar that will focus on a specific topic in education that incorporates sociological perspectives and research literature. Students will read in depth on the course topic (reading both theoretical literature and case material), will develop their understanding of texts and the topic through intensive seminar discussion, and will conduct independent research leading to a thorough literature review or empirically-based research paper on a topic related to the course theme.
Outcomes:
Students who complete this course will greatly expand their familiarity with and command of research literature, theory and contemporary cases related to the course theme

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 540 Seminar in the History of Education (3 Credit Hours)
Pre-requisites: Previous history of education coursework, or permission of instructor
An in-depth examination of a selected topic or area of research in the history of education.
Course equivalencies: X-ELPS540/HIST560
Outcomes:
Student develops an advanced understanding of the seminar topic, knowledge of the scholarly literature on it, and the methods of historical inquiry that can be used to study it

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 555 Seminar Comparative Education (3 Credit Hours)
In-depth, cross-national analysis of a special topic in Comparative Education. As topics change, ELPS 555 is repeatable as long as a repeat is not on a topic covered previously.
Outcomes:
Students will demonstrate a sound grasp of the social, economic, and political forces shaping educational systems as they relate to the topic

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Doctoral Students in Administration and Supervision (4 Credit Hours)
A non-credit series of seminars taken over the two consecutive semesters to address the interests and needs of students during their doctoral residency. The topics include preparation for the comprehensive examination, planning and writing the dissertation and other topics planned by the students and faculty.
Outcomes:
Students will be able to demonstrate understanding of the various seminar topics presented

ELPS 595 Thesis Supervision (0 Credit Hours)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (0 Credit Hours)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 605 Master's Study (0 Credit Hours)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (0 Credit Hours)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Research Methods (RMTD)

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 401 Discourse Analysis and Documentary Research (3 Credit Hours)
This research methods course will examine a number of different discourse analysis techniques. It will also prepare students to conduct historical documentary research, all with a special emphasis on how these methods can be applied to educational research and policy analysis projects.
Course equivalencies: RMTD401 / ELPS401
Outcomes:
Students in the course will be able to critically evaluate the diverse range of approaches used to analyze discourse and conduct educational research using documentary sources

RMTD 402 Comparative Analysis (3 Credit Hours)
No course description is available
Course equivalencies: RMTD402 / ELPS402

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 405 Qualitative Research (3 Credit Hours)
This course explores the discipline and practice of qualitative research through the examination of various theories, genres and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to recognize and discuss theories and components of qualitative research, to analyze various qualitative studies in terms of design, validity and meaning orally an in written critiques, to conceptualize, design and write a proposal for a small qualitative study, to collect, code and analyze data appropriate to a qualitative study, and to write up a small qualitative study including conceptual framework, research question, methods and collected data

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence With Quantitative Methods (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Community Counseling (MA)

The MA in Counseling Psychology prepares students to help communities living with disparities in health and well-being, especially the under-served. Loyola's program is the place for you to commit to shifting this inequitable landscape.

Curriculum

The Master of Arts in Counseling Psychology requires 48 semester hours of graduate study focused in two major areas: counseling core and a specialty area. The program includes 450 clock hours of practicum/ internship experience for six semester hours of course credit. Students must also take and pass a comprehensive examination during their final semester of study.

Coursework Requirements

Code	Title	Hours
Counseling Core		
CPSY 420	Counseling Skills	3
CPSY 421	Professional Issues Counseling	3
CPSY 423	Theory Counseling & Psychotherapy	3
CPSY 424	Career Development & Counseling	3
CPSY 425	Assessment in Counseling	3
CPSY 426	Group Counseling: Theory and Practice	3
CPSY 433	Multicultural Counseling	3
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	3
RMTD 400	Introduction to Research Methodology	3
Community Counseling Research and Practice		
RMTD 482	Introduction to Linear Models	3

or RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	
CPSY 427	Clinical Mental Health Counseling	3
CPSY 499	Independent Research [1]	3
CPSY 440	Practicum [2]	3
CPSY 441	Internship	3
Select one research elective		**3**
RMTD 403	Survey Research	
RMTD 406	Educational Evaluation	
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods	
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	
RMTD 430	Psychological Measurement	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
RMTD 488	Meta-Analysis	
PSYC 486	Methods of Program Evaluation	
Select one general elective		**3**
CPSY 527	Prevention, Advocacy, and Outreach: Community-Based	
CPSY 445	Family Therapy II	
CPSY 446	Marital/Couples Therapy	
CPSY 458	Adolescent Development and Counseling	
CPSY 482	Personality and Intellectual Assessment	
CPSY 535	Seminar in Supervision & Consultation	
CPSY 431	Advanced School Counseling & Consultation	
RMTD 404	Introduction to Educational Statistics	
Total Hours		**48**

Please note that PC and LCPC eligibility in Illinois requires CPSY 437 Addiction Counseling, CPSY 444 Family Therapy I, CPSY 528 Clinical Appraisal and Treatment Planning, and 700 hours of practicum/internship training.

1. Students are required to participate on a faculty member's research team for one semester. CPSY 499 Independent Research should be taken at that time and the student should register for his or her faculty mentor's section of CPSY 499 Independent Research. Voluntary (i.e., not for course credit) participation in research for more than one semester is recommended.
2. Practicum/Internship requires 450 hours of supervised experience in a setting relevant to community counseling practice.
3. General Elective can be another course selected from Research Elective list, or 3 semester hours from this list.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CPSY 420	Counseling Skills	3
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	3
RMTD 400	Introduction to Research Methodology	3
	Hours	**9**
Spring		
CPSY 421	Professional Issues Counseling	3
CPSY 423	Theory Counseling & Psychotherapy	3
CPSY 427	Clinical Mental Health Counseling	3
Research Elective		3
	Hours	**12**
Summer		
CPSY 425	Assessment in Counseling	3
CPSY 426	Group Counseling: Theory and Practice	3
	Hours	**6**
Year 2		
Fall		
CPSY 424	Career Development & Counseling	3
CPSY 433	Multicultural Counseling	3
CPSY 440	Practicum	3
	Hours	**9**
Spring		
CPSY 441	Internship	3
CPSY 499	Independent Research	3
RMTD 482	Introduction to Linear Models	3
General Elective		3
	Hours	**12**
	Total Hours	**48**

Comprehensive Assessment

A comprehensive proctored examination is required. Please see the School of Education Academic Calendar for comprehensive exam dates.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will engage in independent scholarship on questions important to counseling psychology, and develop and evaluate interventions to promote positive human development. You'll be equipped to pursue doctoral study and will graduate with competencies in research, ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, assessment, and clinical interventions.

Counseling Psychology (PhD)

Loyola's PhD in counseling psychology has been accredited by the **American Psychologist Association (APA)** since 1984. The mission of the PhD program in counseling psychology at Loyola University Chicago is to graduate scientist-practitioner-oriented health service psychologists who identify with the field of counseling psychology and who are committed to promoting social justice in all their professional activities.

Curriculum

The PhD in Counseling Psychology requires 69 credit hours of coursework beyond a master's degree, written and oral comprehensive examinations, a culminating portfolio and a dissertation with oral defense. Students develop an area of research expertise by engaging in research with faculty throughout their doctoral study. A 2,000 hour pre-doctoral internship is also required.

Code	Title	Hours
Prerequisites		
Ideally, students will have completed these courses or their equivalents prior to the start of the program.		
CPSY 420	Counseling Skills	
CPSY 423	Theory Counseling & Psychotherapy	
CPSY 425	Assessment in Counseling	
CPSY 426	Group Counseling: Theory and Practice	
CPSY 433	Multicultural Counseling	
CPSY 440	Practicum	
CPSY 444	Family Therapy I	
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	
CPSY 528	Clinical Appraisal and Treatment Planning	
RMTD 400	Introduction to Research Methodology	
RMTD 404	Introduction to Educational Statistics	
Psychology Core		**12**
Students will complete 12 credit hours towards the Psychology Core by selecting courses to fulfill each area listed below. Courses may be used to fulfill more than one area.		
One Course on Biological Basis of Behavior		
CPSY 461	Neuropsychology	
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 552	Neuropsychology	
One Course on Cognitive Basis of Behavior		
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 462	Cognitive Social Psychology	
PSYC 475	Cognitive Development	
One Course on Affective Basis of Behavior		
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	
CPSY 461	Neuropsychology	
One Course on Social Basis of Behavior		
PSYC 460	Social Psychological Theory	
PSYC 462	Cognitive Social Psychology	
PSYC 473	Social Development	
One Course on History and Systems of Psychology		
PSYC 401	History & Systems of Psychology	
One Course in Advanced Integrative Knowledge		
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 462	Cognitive Social Psychology	
PSYC 473	Social Development	
PSYC 475	Cognitive Development	
Counseling Psychology Core		
CPSY 424	Career Development & Counseling	3
CPSY 435	Selected Topics in Counseling	3
CPSY 527	Prevention, Advocacy, and Outreach: Community-Based	3
CPSY 529	Psychology of Immigration	3
CPSY 530	Research Seminar in Counseling Psychology	3
CPSY 531	Ethical and Legal Issues in Counseling Psychology	3
Methodology and Research Core		
CPSY 450	Research Methods in Counseling Psychology	3
RMTD 430	Psychological Measurement	3
Two additional advanced research methods or statistics courses		6
RMTD 403	Survey Research	
RMTD 406	Educational Evaluation	
RMTD 407	Introduction to Evaluation Theory	
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	
RMTD 422	Single Subject Design	
RMTD 432	Item Response Theory	
RMTD 440	Mixed Methods Research	
RMTD 482	Introduction to Linear Models	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 488	Meta-Analysis	
PSYC 493	Structural Equation Modeling	
Professional Practice Core		
CPSY 442	Doctoral Practicum (two sections)	3
CPSY 443	Clerkship	0
CPSY 482	Personality and Intellectual Assessment	3
CPSY 532	Advanced Theories in Psychotherapy	3
CPSY 533	Proseminar	0
CPSY 535	Seminar in Supervision & Consultation	3
CPSY 536	Supervision Practicum	3
CPSY 615	Internship: Counseling Psychology	0
Electives		**9**
Three additional advanced courses in research methods/statistics, assessment, and/or college-level teaching.		
Total Hours		**69**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CPSY 435	Selected Topics in Counseling	3
CPSY 443	Clerkship	0

CPSY 450	Research Methods in Counseling Psychology	3
CPSY 532	Advanced Theories in Psychotherapy	3
CPSY 533	Proseminar	0
Psychology Core Course		3
	Hours	**12**
Spring

	Total Hours	**69**

[1] Students may also choose to take a Psychology Core or Research Elective in this term.

Practicum

The Chicagoland area provides a wealth of clinical training opportunities for doctoral students in counseling psychology. Approximately half of our students seek training in university counseling centers in the city and suburbs, while the other half receives their clinical and diagnostic training in hospitals and community mental health centers. Students receive a generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, veterans, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain APA-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

Comprehensive Examination

The comprehensive examination is an oral exam that provides students an opportunity to integrate all course work, individual reading, research, and applied training. The comprehensive examination committee will be composed of the student's advisor (who will chair the exam) and two counseling psychology faculty members. Comprehensive examination performance will be evaluated by the committee using a rubric published in the Student Handbook and will evaluate student's understanding of profession wide competencies and program competencies.

Culminating Portfolio

The culminating portfolio represents the final pre-internship opportunity for students to demonstrate their integrative knowledge of health service and counseling psychology. The portfolio must be completed and submitted electronically by January 31 of the year the student applies for internship. Successful completion of this portfolio is required before leaving for internship. The following documents are required:

- Approved Dissertation Proposal
- Approved Clinical Case Study
- Approved Assessment Report
- Integrative Paper
- Social Justice Intervention Paper

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of

research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will engage in independent scholarship on questions important to counseling psychology, and develop and evaluate interventions to promote positive human development. You'll be equipped to practice as a health service psychologist with competencies in research, ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, assessment, intervention, supervision, consultation and inter-professional/ interdisciplinary knowledge and skills.

Cultural and Educational Policy Studies (MA)

Curriculum

The Master of Arts in Cultural and Educational Policy Studies requires 30 credit hours of coursework and a thesis. Students select a specialization in Comparative and International Education, History of Education, Sociology of Education, or Philosophy of Education.

Required Coursework

Code	Title	Hours
Select Three Courses in Major Area [1]		*9*
Select Two from Outside the Major Area		*6*
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
RMTD 400	Introduction to Research Methodology	3
Select Four Electives		*12*
ELPS 595	Thesis Supervision	0
Total Hours		**30**

1 At least one course in Major Area must be at introductory level (ELPS 410 Sociology of Education, ELPS 420 Philosophy of Education, ELPS 444 American Schooling and Social Policy: A Historical Perspective, or ELPS 455 Comparative Education).

2 Two courses are selected in consultation with the advisor in order to customize the course of study to the student's particular interests and needs. Commonly, students take additional research methods courses (*eg* RMTD 404 Introduction to Educational Statistics or RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods. However, electives may also be taken in other areas of the School of Education and, if appropriate, in other areas of the university as well.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Thesis

The MA thesis is the final requirement for the degree and will make a noteworthy, original contribution to current research knowledge and understanding of an educational issue or question that falls within the social foundations of education. A typical CEPS MA thesis is in the realm of 30-50 double-spaced pages (excluding references) and may eventually be revised and reworked to be submitted for publication as a book chapter or journal article.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Cultural and Educational Policy Studies (PhD)

Curriculum

The PhD in Cultural and Educational Policy requires 60 credit hours of coursework, qualifying examination, and dissertation.

To fulfill the Cultural Foundations and Policy core, students will choose one course from each of the following areas: Comparative and International Education, History of Education, Philosophy of Education, and Sociology of Education. Students will then choose a Depth Area from those above and take five (5) courses within it.

Required Coursework

Code	Title	Hours
Cultural Foundations and Policy Core		**12**
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
Coursework in Depth Area		**15**
Research Methods		**6**
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods [1]	
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	
Select Nine Graduate Level Electives [2]		**27**
ELPS 600	Dissertation Supervision	0

ELPS 610	Doctoral Study	0
Total Hours		**60**

1 RMTD 420 and RMTD 421 combined will fulfill the responsible conduct of research and scholarship training required by the Graduate School for all students completing a thesis or dissertation.

2 Students will select electives in consultation with their advisor to customize the course of study in the student's area of interest and research. Students are encouraged to complete coursework that contributes to a minor area of study within the four CEPS areas.

Comprehensive Exam

After PhD in Cultural and Educational Policy Studies students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations. The comprehensive examination is intended to establish that doctoral students have sufficient
comprehensive knowledge and academic writing skills to succeed in their areas of study. The examination consists of three different sections: one pertaining to the student's area of concentration; one related to a minor area of study in one of the four CEPS core areas; and one on a topic connected to the student's prospective dissertation. Over a one-week period, the student writes an essay in response to a question on each of these sections, so that all three sections are covered over three weeks. Each essay should be approximately 10-12 double-spaced pages in length (2500-3000 words excluding bibliography) but no more than 15 pages (3750 words excluding bibliography) overall. The essays should include complete citations and bibliography in APA or Chicago Manual of Style format.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Higher Education (PhD)

Loyola's PhD in Higher Education is an interdisciplinary program that encourages students to connect theory to practice while supporting scholarship on equity and social justice in various post-secondary contexts.

Curriculum

The PhD in Higher Education requires 60 credit hours of coursework, a comprehensive examination, and a dissertation.

Course Requirements

Code	Title	Hours
Core Courses		
ELPS 413	Critical Social Theories	3
ELPS 430	Curriculum and Pedagogy in Higher Education	3
ELPS 454	Budgeting and Finance in Higher Education	3
ELPS 459	Organization & Governance in Higher Education	3
ELPS 530	Proseminar: Higher Education	3
Four Higher Education Elective Courses [1]		**12**
Research Courses [2]		
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods	3
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	3
One Advanced Methodology Course and One Research Elective		6
Select from the following courses:		
RMTD 403	Survey Research	
RMTD 422	Single Subject Design	
RMTD 430	Psychological Measurement	
RMTD 432	Item Response Theory	
RMTD 440	Mixed Methods Research	
RMTD 470	Case Study Research	
RMTD 481	Advanced Educational Statistics	
RMTD 482	Introduction to Linear Models	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
Minor Courses [3]		**12**
General Elective Courses		**9**
Total Hours		**60**

1 Please confer with Graduate Program Director regarding appropriate Higher Education Electives.

2 RMTD 420 and RMTD 421 combined will fulfill the responsible conduct of research and scholarship training required by the Graduate School for all students completing a thesis or dissertation.

3 Minor Course Option A: The completion of four graduate-level courses in a single field of study outside the School of Education (e.g., history, sociology, anthropology, management).
Minor Course Option B: The completion of four graduate-level courses in one area in the School of Education (e.g., counseling, foundations of education). Coursework in higher education administration cannot be used to fulfill this requirement.
Minor Course Option C: An intellectually defensible minor developed in conjunction with a student's advisor, consisting of two courses, each from options A and B (e.g., a minor in educational history, drawing on appropriate course work in history and educational leadership and policy studies).

Higher Education Courses

Below is a list of all Higher Education courses. This can be used in reference for electives if not used in other curricular requirements.

Code	Title	Hours
ELPS 400	Inquiry Into Educational Policy	3
ELPS 405	Introduction to Educational Policy Analysis	3
ELPS 413	Critical Social Theories	3
ELPS 419	Leadership in Higher Education	3
ELPS 425	Foundations in Student Affairs	3
ELPS 426	Student Affairs Administration Higher Education	3

ELPS 427	Foundations in Higher Education	3
ELPS 428	The Junior and Community College	3
ELPS 429	Selected Topics in Higher Education	3
ELPS 430	Curriculum and Pedagogy in Higher Education	3
ELPS 432	Multiculturalism for Social Justice in Higher Education	3
ELPS 434	American College Student	3
ELPS 435	Enrollment Management in Higher Education	3
ELPS 436	Women in Higher Education	3
ELPS 437	Today's Community College Students	1
ELPS 438	Designing Effective Community College Courses	1
ELPS 439	Assessing Student Learning in Community Colleges	1
ELPS 440	Community College Students as Learners	1
ELPS 441	Community College Teaching	3
ELPS 448	International Higher Education	3
ELPS 453	Legal Aspects of American Higher Education	3
ELPS 454	Budgeting and Finance in Higher Education	3
ELPS 455	Comparative Education	3
ELPS 458	International Education	3
ELPS 459	Organization & Governance in Higher Education	3
ELPS 498	Independent Study	1-3
ELPS 503	Critical Perspectives on the Internationalization of Higher Ed	3
ELPS 506	Strategic Executive Leadership in Higher Education	3
ELPS 527	Higher Education Capstone	3
ELPS 529	Seminar in Higher Education	3
ELPS 530	Proseminar: Higher Education	3
ELPS 550	Seminar on Globalization and Education	3
ELPS 565	International Education Internship	3
ELPS 600	Dissertation Supervision	0

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking ELPS 610 Doctoral Study or ELPS 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
ELPS 413	Critical Social Theories	3
ELPS 454	Budgeting and Finance in Higher Education	3
ELPS 530	Proseminar: Higher Education	3
	Hours	**9**
Spring		
ELPS 430	Curriculum and Pedagogy in Higher Education	3

Spring		
Minor or General Elective		3
Minor or General Elective		3
Research Elective		3
	Hours	**9**
Summer		
Comprehensive Examination		
	Hours	**0**
	Total Hours	**60**

Comprehensive Exam

After PhD in Higher Education students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations and should speak with their academic advisors. Advisors assist students to develop research questions and the literature that should be reviewed to complete the exam. The comprehensive examination is offered during the fall, spring and summer semesters.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will gain scholarly frames for understanding various higher education contexts, critically evaluate research (i.e., designs, data analysis, and data interpretation) and apply critical inquiry and research skills to successfully complete your dissertation research.

Research Methodology (MA)

We believe that data tells the story of the human experience

In Loyola's Research Methodology Program, we look at numbers in context. Unlike in math or statistics, where a number is the final answer, we know that numbers tell a story. We challenge our students to use data to highlight the systematic and personal characteristics that contribute to social inequities and leverage the findings to devise ways to offset those inequities.

Curriculum

The Master of Arts in Research Methodology requires 30 credit hours. Students may also choose to write a master's thesis.

Required Courses

Code	Title	Hours
Required Courses		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods [1]	3
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	3
Select Six Electives [2]		*18*
Total Hours		**30**

1. RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Methods and RMTD 421 Educational Research II: Building a Body of Evidence With Quantitative Methods will fulfill the responsible conduct of research and scholarship requirement for students who compose a thesis.
2. At least one elective (3 credit hours) must be taken in a substantive area of the social sciences with approval from the student's advisor. This course is usually in the area that the student would like to apply research methods (*e.g.* Higher Education, Social Work, or Curriculum and Instruction).

Thesis Option

Students can choose to complete a thesis as part of their electives. Students completing a thesis can focus on the application of methods to a substantive area (higher education, social work, curriculum and instruction, etc.) or an investigation of methods.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will be able to critically evaluate bodies of knowledge from a variety of methodological traditions, use a variety of software programs to implement analyses, and assist with all stages of a research study in applied settings.

Research Methodology (PhD)

Use numbers and data to drive systematic change in education

A number is not simply a number in our research methodology program. Here, unlike in math or statistics, numbers are not the final answer. With a PhD in Research Methodology, you can work in educational and institutional research, using numbers to tell the story of the human experience and create meaningful change.

Curriculum

The PhD in Research Methodology requires 60cr hours, the completion of a research portfolio, and a dissertation. Students also participate in a consulting experience, where they conduct a research study and provide consulting assistance to a researcher or organization.

Required Courses

Code	Title	Hours
RMTD 403	Survey Research	3
RMTD 406	Educational Evaluation	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Methods *	3
RMTD 421	Educational Research II: Building a Body of Evidence With Quantitative Methods	3
One advanced quantitative course		3
RMTD 481	Advanced Educational Statistics	
RMTD 482	Introduction to Linear Models	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
RMTD 488	Meta-Analysis	
One advanced qualitative course		3
RMTD 422	Single Subject Design	
RMTD 432	Item Response Theory	
RMTD 440	Mixed Methods Research	
RMTD 470	Case Study Research	
Three courses in Minor Research Area		9
Eleven Electives		33
Total Hours		**60**

Comprehensive Assessment

A Comprehensive Research Portfolio is required. The portfolio contains three items: a) a report on a research consulting experience, b) a research

paper demonstrating the candidates understanding of all phases in the research process and the ability to analyze and interpret data from a research study, and c) a literature review of an issue in the candidate's area of concentration.

Dissertation

A dissertation, as well as an oral defense of the dissertation, is required. Once completed, the final dissertation must be submitted to a publicly accessible database according to Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

You will be able to critically evaluate bodies of knowledge from a variety of methodological traditions, use a variety of software programs to implement analyses, and conduct all stages of a research study in applied settings. Plus, you'll participate in a required consulting experience, where you'll conduct a research study and then provide consulting advice to a researcher or organization.

School Psychology (PhD)

Work directly with students, while also publishing change-making research that will help disrupt inequities in our education system with a PhD in School Psychology.

Accreditation

Loyola's PhD in School Psychology has been accredited by the **American Psychologist Association (APA)** and approved by the **National Association of School Psychologists (NASP).**

Curriculum

The PhD in School Psychology requires 99 credit hours, 600 hours of school-based practicum, a minimum 900 hours of advanced practicum, a Doctoral Culminating Portfolio (which serves as the major comprehensive exam), a dissertation, and completion of a full-time yearlong APA-accredited internship. The PhD in School Psychology is organized to facilitate and maximize academic, research, and clinical experiences.

Required Coursework

Code	Title	Hours
Psychological Foundations		**21**
CIEP 413	Psychopathology & School Mental Health

CIEP 586	Doctoral Internship: School Psychology	
One Graduate Level Elective		**3**
Total Hours		**99**

[1] Students must have previously completed an undergraduate or graduate level course in statistics with a grade of B or better, or take such a course before entering the program or in Fall of the first semester.

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Students must also participate in a faculty research team during years one through four.

Practicum and Internship

In the second year of the program, students complete two semesters of a structured school-based practicum, in which they spend two days a week in a school setting and complete structured activities under the supervision of a credentialed school psychologist. In the third and fourth years of the program, students complete two advanced practica in a school or clinical setting while working on the dissertation proposal. In the fourth year of the program, students apply for a calendar-year-long doctoral APA-accredited internship in health service psychology through the Association of Psychology Postdoctoral and Internship Centers (APPIC) matching system. The internship must be under the direction of a licensed psychologist and certified school psychologist. The Director of Clinical Training approves internship applications submitted by doctoral students

Candidates in all programs leading to Illinois certification are required to pass an Illinois State Criminal Background Check.

Comprehensive Assessment

Doctoral students complete their major comprehensive examination (Doctoral Culminating Portfolio) prior to accepting an internship and typically during the fourth year of study.

Dissertation

A dissertation and oral defense is required. Upon completion, the dissertation is submitted for publication in a publicly accessible database per Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

The School Psychology PhD program has three aims:

- Aim #1: To develop scientist-practitioners who have a professional identify as socially just school psychologists who are guided by the ethical and legal principles of the profession;
- Aim #2:To develop scientist-practitioners who understand and can implement evidence-based, assessment, intervention, and consultation practice from a social justice perspective; and
- Aim #3: To develop scientist-practitioners who can evaluate, produce, and disseminate research

To achieve these aims, the program is scoped and sequenced to build students' knowledge, attitudes, and skills such that they can enter the profession with the foundational and functional competencies needed to effectively provide services.

Bioethics & Healthcare Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course provides an overview of the major areas of clinical biomedical ethics guided by extensive use of case discussions and analysis which will help to develop ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethics issues in settings such as long-term care, rehabilitation care, dentistry, and alternative medicine, and to develop moral frameworks for addressing these issues.

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.

BEHL 405 Research and Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants.

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important theories in bioethics and will examine major works by leading bioethics scholars to become more familiar with different approaches in the field.

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course provides an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field.

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.

BEHL 410 Ethics Consultation (1-3 Credit Hours)
This is a two-month course of online learning which includes a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.

BEHL 411 Public Health Ethics (3 Credit Hours)
This course introduces current ethical issues in public health research, practice, and policy.

BEHL 412 Organizational Ethics: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians, health system administrators, community advocates, etc.
Course equivalencies: IPS 652/BEHP 412/BEHL 412

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine's practice.

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership for Changing Healthcare Environment (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required Outcomes: This practicum will expose students to the practical applications of clinical ethics
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.

BEHL 422 Practicum in Organizational/Public Health Ethics (1-3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications. Identify elements of an effective oral presentation 2. Deliver an effective oral presentation 3. Judge the effectiveness of oral presentations
Course equivalencies: IDIM418/BMSC418
Outcomes:
1

BMSC 499 Research (2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (0 Credit Hours)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
IPBS PhD students will complete their degree work while registered for BMSC 600

Clinical and Applied Mass Spectrometry (CAMS)

CAMS 401 Theory and Physics of Mass Spectrometry (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.
Outcomes:
At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity

CAMS 402 Chemistry of Protein Separation (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamentals of separating biological agents in solution for analysis by mass spectrometry.
Outcomes:
At the end of this course students will be able to: 1) Describe the composition of typical biological collections including blood and waste; 2) Describe best-practices for preparing collections for mass spectrometry; 3) Describe fundamentals of separating biomolecules according to size, charge and other physiochemical factors; and 4) Describe mechanisms and tradeoffs behind common approaches for separating biological samples via chromatography (liquid and gas)

CAMS 403 Introduction to Mass Spectrometry Instrumentation (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will introduce the mass spectrometry instrumentation that is utilized in clinical, pharma, and academia, including HPLC and other sample preparation instrumentation.
Outcomes:
At the end of this course students will be able to: 1) Describe the basic technologies and instrumentation currently used for mass spectrometry; 2) Understand the basics in how to operate this instrumentation (theory, no hands on); 3) Appreciate the similarities and differences in the different technologies, and in what situation each instrument would be most appropriate; and 4) Describe the instrumentation used in sample preparation

CAMS 411 Computation and Bioinformatics for Proteomics (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the governing principles of analyzing proteomics data, with a special emphasis on data derived from mass spectrometry (MS). Computational methods and tutorials will complement the theoretical material.
Outcomes:
At the end of this course students will be able to: 1) Describe key approaches for matching MS spectra to known proteins, as well as identifying and quantifying protein content in analyzes samples; 2) Describe methodologies and limitations thereof for labeling and quantifying proteins of interest; 3) Perform routine computational analyses of MS data using python; and 4) Describe best-practices for objective data analysis and reproducibility

CAMS 412 Clinical Considerations and Biomarker Development (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover fundamental concepts about the criteria for something to qualify as a biomarker and how they are analyzed by mass spectrometry from a variety of biological fluids and/or tissues. We will also discuss the broader uses of mass spectrometry in a clinical or hospital setting.
Outcomes:
At the end of this course students will be able to: 1) Compare and contrast aspects of good vs bad biomarkers and the utility of mass spectrometry for their detection in biological samples; 2) Describe best practices for sample collection and the limitations of using biological samples; 3) Describe current regulations and standards for biomarker use in the clinic; 4) Identify and describe biohazard safety issues when working with biological samples; 5) Describe analytical approaches for quantification of biomarkers; and 6) Describe the type of mass spectrometry assays typically used in a clinical or hospital setting

CAMS 413 Advanced Mass Spectrometry Approaches (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover advanced MS approaches to address specialized needs. These approaches will frequently require specific instrumentation, and bioinformatics approaches, but sometimes only involve changes to sample preparation and interpretation.
Outcomes:
At the end of this course students will be able to: 1) Understand the need for specialized mass spec approaches; 2) Appreciate the theory behind specialized mass spec approaches; 3) Describe the technical and practical considerations when utilizing specialized MS approaches; and 4) Be able to choose the correct advanced MS approach for a particular situation

CAMS 491 Mass Spectrometry Lab Rotation A (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to prepare samples that are "mass spec ready" from a variety of liquid and solid tissue biological samples. Students will learn quality control parameters and will produce high quality samples for use in the HPLC and mass spectrometer.
Outcomes:
At the end of this course students will be able to: 1) Process liquid and tissue biological samples for analysis by mass spectrometry; 2) Perform gel electrophoresis on prepared samples and excise selected gel bands; 3) Perform in in-gel digestions using standard enzymatic approaches; 4) Perform in-solution digestions using standard enzymatic approaches; 5) Quantify protein samples before and after digestion; and 6) Use column chromatography to generate high purity samples

CAMS 492 Mass Spectrometry Lab Rotation B (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to perform normal LC-mass spectrometer general upkeep including HPLC setup, mass spectrometer calibration, quality control, etc. Students will then learn the process of running mass spectrometers for two types of approaches: discovery and targeted mode.
Outcomes:
At the end of this course students will be able to: 1) Setup HPLC, mass spectrometer and software; 2) Perform normal instrument upkeep including calibration, quality control, solution changes; 3) Be able to troubleshoot common instrument issues; 4) Analyze sample on mass spectrometer for discovery (two group comparison); 5) Analyze sample on mass spectrometer for targeted quantification (in simple solution); 6) Use bioinformatics software packages to analyze data from mass spectrometers; and 7) Understand how to present mass spectrometry data

CAMS 493 Capstone Design - Applications in Mass Spectrometry A (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CAMS 494 Capstone Design - Applications in Mass Spectrometry B (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (1 Credit Hour)
Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446.

ICB 446 Review Seminar (1 Credit Hour)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with the Scientific Literature Course 445 and is only offered during the spring semester.

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

ICB 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Microbiology and Immunology (MIIM)

MIIM 402 Microbes & Hosts (3 Credit Hours)
Pre-requisites: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor
Microbes & Hosts conveys important concepts in bacteriology, virology and immunology as well as the interactions of microbes with host organisms. Through a combination of didactic lectures and group discussions, students will come to appreciate fundamental processes which influence microbe-host interactions.
Outcomes:
Students will have a strong understanding of basic principles of microbiology, virology and immunology as well as an understanding of key concepts related to microbe-host interactions

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (2 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (4 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (1 Credit Hour)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor. They will defend their results in a public forum.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (1 Credit Hour)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students advance their knowledge of new neuroscience concepts and methods, gain experience in presenting in front of a group, and gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (1 Credit Hour)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

NRSC 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (1 Credit Hour)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (1 Credit Hour)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PHAR 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PHAR 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Biomedical Sciences

The Graduate School at the Health Sciences Campus offers advanced degree programs in a range of disciplines in the biomedical sciences.

A PhD degree in biomedical sciences is offered through our Integrated Program in Biomedical Sciences (IPBS). The IPBS is an umbrella admission program that allows students to select one of six different tracks for specialization (Biochemistry, Molecular, and Cancer Biology, Cell and Molecular Physiology, Integrative Cell Biology, Microbiology and Immunology, Molecular Pharmacology and Therapeutics, and Neuroscience) . Students admitted to the Stritch School of Medicine MD/PhD enroll in the IPBS during the PhD-phase of their training and join one of the six IPBS tracks.

Master of Science degrees in the biomedical sciences are offered by each of our six IPBS tracks, plus programs in Infectious Disease and Immunology, Cellular and Molecular Oncology, Clinical and Applied Proteomics, Mass Spectrometry and Medical Physiology.

A Pharmacovigilance Certificate program is also offered, in addition to a MS in Pharmacology/MBA dual degree offered in conjunction with the Quinlan School of Business.

Graduate Programs

- Biochemistry and Molecular Biology (MS) (p. 1492)
- Biochemistry, Molecular and Cancer Biology (PhD) (p. 1493)
- Biochemistry and Molecular Biology (MD/PhD) (p. 1494)
- Cell and Molecular Physiology (MS) (p. 1496)
- Cell and Molecular Physiology (PhD) (p. 1496)
- Cell and Molecular Physiology (MD/PhD) (p. 1497)
- Cellular and Molecular Oncology (MS) (p. 1499)
- Clinical and Applied Proteomics (MS) (p. 1499)
- Infectious Disease and Immunology (MS) (p. 1500)
- Integrative Cell Biology (MS) (p. 1501)
- Integrative Cell Biology (PhD) (p. 1501)
- Integrative Cell Biology (MD/PhD) (p. 1503)
- Medical Physiology (MS) (p. 1504)
- Microbiology and Immunology (MS) (p. 1504)
- Microbiology and Immunology (PhD) (p. 1505)
- Microbiology and Immunology (MD/PhD) (p. 1506)
- Molecular Pharmacology and Therapeutics (MS) (p. 1508)
- Molecular Pharmacology and Therapeutics (PhD) (p. 1508)
- Molecular Pharmacology and Therapeutics (MD/PhD) (p. 1509)
- Neuroscience (MS) (p. 1511)
- Neuroscience (PhD) (p. 1511)
- Neuroscience (MD/PhD) (p. 1512)
- Pharmacology/Business (MS/MBA) (p. 1514)
- Pharmacovigilance Certificate (p. 1515)

Biochemistry and Molecular Biology (MS)

The goal of the Master of Science in Biochemistry and Molecular Biology is to train students in the basic science and methodology of Biochemistry and Molecular Biology, to allow them to apply this knowledge in jobs as research assistants in academy or the biotechnology industry, or as teachers in primary or secondary education. Students graduating with an MS degree often obtain additional education in PhD and MD programs.

Curriculum

The Master of Science in Biochemistry and Molecular Biology requires 30 credit hours of coursework and a thesis.

Coursework Requirements

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMB 417	Molecular Biology	3
One Elective		*3*
BMB 490	Special Topics in Molecular Biology	
BMB 590	Molecular Biology of Oncogenesis	
ICB 403	Histology	
PIOL 401	Physiology	
PIOL 417	Cellular Physiology	
PIOL 421	Function of the Human Body I	
PIOL 422	Function of the Human Body II	
PIOL 423	Biochemical Physiology	
PIOL 450	Fundamentals Of Neurophysiology	
PIOL 461	Introduction to Human Pathophysiology	
PIOL 470	Excitability & Ion Transport	
MIIM 402	Microbes & Hosts	
MIIM 411	Basic Molecular Microbiology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
NRSC 410	Cellular & Molecular Neurobiology	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 409	Principles of Pharmacology	
BMB 499	Research in Molecular Biology	1-9
BMB 502	Seminar in Molecular Biology	0
BMB 595	Thesis Supervision	0
BMB 501	Molecular Biology Journal Club	1
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand concepts in biochemistry and molecular biology.
- Develop and test research-based hypotheses
- Implement research projects in an academic setting.
- Write scientific abstracts and manuscripts on their own projects.

Biochemistry, Molecular and Cancer Biology (PhD)

The PhD program in Biochemistry, Molecular, & Cancer Biology is part of the Integrated Program in Biomedical Sciences at Loyola University's Health Sciences campus. The goal of this program to train students as independent investigators who will go on to post-doctoral fellowships following the completion of the degree, and eventually become independent academic researchers and teachers.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:
- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in biochemistry, molecular biology, and cancer biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Biochemistry, Molecular, and Cancer Biology (MD/PhD)

The PhD program in Biochemistry, Molecular, & Cancer Biology is part of the Integrated Program in Biomedical Sciences at Loyola University's Health Sciences campus. The goal of this program to train students as independent investigators who will go on to post-doctoral fellowships following the completion of the degree, and eventually become independent academic researchers and teachers.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology

- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Biochemistry, Molecular, and Cancer Biology portion of this dual degree program can be found below.

Course Requirements

The PhD in Biochemistry, Molecular, and Cancer Biology requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework to fulfill PhD requirements. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Courses		
Select two Biochemistry, Molecular, and Cancer Biology Electives		
BMB 417	Molecular Biology	
BMB 490	Special Topics in Molecular Biology	
BMB 590	Molecular Biology of Oncogenesis	
ICB 403	Histology	
MIIM 402	Microbes & Hosts	
MIIM 411	Basic Molecular Microbiology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
NRSC 410	Cellular & Molecular Neurobiology	
PIOL 401	Physiology	
PIOL 417	Cellular Physiology	
PIOL 421	Function of the Human Body I	
PIOL 422	Function of the Human Body II	
PIOL 423	Biochemical Physiology	
PIOL 450	Fundamentals Of Neurophysiology	
PIOL 461	Introduction to Human Pathophysiology	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 409	Principles of Pharmacology	
BMB 499	Research in Molecular Biology	1-9
BMB 501	Molecular Biology Journal Club	1
BMB 502	Seminar in Molecular Biology	0
BMB 600	Dissertation Supervision	0

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in Biochemistry, Molecular Biology and/or Cancer Biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cell and Molecular Physiology (MS)

The Master of Science in Cell and Molecular Physiology (MS CaMP) is a research-intensive program that provides a broad, foundational knowledge of cellular, molecular, and systems-level physiology as well as the opportunity to pursue research with faculty mentors. The MS CaMP program fosters a stimulating and exciting research environment.

Curriculum

The Master of Science in Cell and Molecular Physiology requires 30 semester credit hours and a thesis.

Coursework Requirements

Code	Title	Hours
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
PIOL 410	Intro to Research	2
BMSC 405	Ethics in Biomedical Sciences	1
PIOL 401	Physiology [1]	4
PIOL 420	Methods/Technical in Physiological Research	2
PIOL 412	Research	1-6
PIOL 595	Thesis Supervision	0
Total Hours		**30**

[1] Students may elect to take PIOL 401 in Fall or Spring semester depending on systems of interest. On rare occasions, students may elect to enroll twice with the approval of their PI and the Graduate Program Director. Research hours will be adjusted accordingly.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

MS CaMP students will be able to demonstrate ability in:

- Gaining a general knowledge base in the biomedical sciences
- Acquisition of deeper knowledge of past and current scientific literature in a more specific field within physiology (i.e., in the chosen track of study)
- Ability to form hypotheses and to design and perform appropriate experiments to test these hypothesis
- Acquisition of oral and written communication skills for scientific peers and general audiences

Cell and Molecular Physiology (PhD)

Physiology is the study of the function of living organisms. The PhD in Cellular and Molecular Physiology trains students to acquire, analyze and integrate data obtained from their basic research into a physiological context to understand the molecular basis of cell function and dysfunction within the organism. With cardiovascular research and neurosciences & metabolism as main research topics, students receive a solid integrated training in basic medical sciences including biochemistry, biophysics, cell biology, molecular biology, physiology and pathophysiology.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-

specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in cell and molecular physiology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cell and Molecular Physiology (MD/PhD)

Physiology is the study of the function of living organisms. The PhD in Cellular and Molecular Physiology trains students to acquire, analyze and integrate data obtained from their basic research into a

physiological context to understand the molecular basis of cell function and dysfunction within the organism. With cardiovascular research and neurosciences & metabolism as main research topics, students receive a solid integrated training in basic medical sciences including biochemistry, biophysics, cell biology, molecular biology, physiology and pathophysiology.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Cellular and Molecular Physiology portion of this dual degree program can be found below.

Course Requirements

The PhD in Cell and Molecular Physiology requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
Track Required Coursework		
PIOL 470	Excitability & Ion Transport (or approved substitute)	3
PIOL 472	Structure/Function Membrane Proteins (or approved substitute)	3
PIOL 416	Research Seminar	1
PIOL 446	Cardiovascular Journal Club	1
PIOL 412	Research	1-6
PIOL 600	Dissertation Supervision	0
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of cell and molecular physiology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cellular and Molecular Oncology (MS)

The Cellular and Molecular Oncology Master of Science (CMO MS) program will prepare master's level scientists to meet the changing landscape of cancer research. Our CMO MS graduate program focuses on training and providing both the academic and laboratory research tools to best prepare graduate students to meet the challenges within the field of oncology early in their careers.

Students will be trained for future careers in the pharmaceutical, biotech, or biomedical industry. Top researchers within Loyola's Department of Cancer Biology will mentor CMO MS students toward the successful completion of their thesis research, directly involving students in the lab from day one. The profile of CMO MS students will be as diverse as the subject matter that they seek to study, many may seek to prepare themselves for an industry-related career, others will become top candidates for PhD programs, and some will be competitive candidates for healthcare professional schools.

A commonality linking Loyola's CMO MS graduate students lies in their fundamental passion for effecting change in cancer-research.

Curriculum

The Master of Science in Cellular and Molecular Oncology requires 30 credit hours and a thesis.

Coursework Requirements

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	2
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 412	Cell Biology	4
CMO 503	Special Topics in Oncology	1
BMB 590	Molecular Biology of Oncogenesis	2
One Elective		*3*
BMB 417	Molecular Biology	
BMB 490	Special Topics in Molecular Biology (Epigenetics and Stem Cells)	
IDIM 400	Infections and Immunology	
ICB 403	Histology	
MIIM 471	Molecular Microbial Genetics	
MIIM 502	Special Topics	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 409	Principles of Pharmacology	
CMO 499	Research	1-4
CMO 502	Seminar	1
CMO 595	Thesis Supervision	0
Total Hours		**30**

Research and Thesis

Hands-on laboratory research will begin in the first semester of study. Students will complete two lab rotations to help them identify their research advisor and lab. Upon completion of the first semester, a student's research advisor will be assigned and subsequent lab time will be spent designing, conducting, and analyzing independent research projects under the supervision of the student's advisor. Upon completion of the CMO MS program, graduates can expect they will be highly knowledgeable in the methodology and skill necessary for success in future research endeavors.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Deploy a number of concepts, techniques and resources, within the specific topic of their thesis project, to carry out a largely independent research project in experimental oncology.
- Analyze, interpret and comprehend experimental data in a critical fashion.
- Engage in self-directed problem solving. Employ critical thinking and evaluate risks in original scientific projects.
- Use problem-solving experiences to diagnose and troubleshoot new failures to fix experimental faults in a rapid and consistent fashion.
- Being familiar with scholarly publications and the major open questions within an area of investigation.
- Present, verbally and in written form, their scientific results, relating the results to the existing body of knowledge.

Clinical and Applied Proteomics (MS)

The Master of Science in Clinical and Applied Proteomics is designed for science graduates and those already working in the field of scientific research who wish to pursue or advance their career through specialized study in the exciting field of Proteomics and Mass Spectrometry. This program is a combination of innovative, didactic online study of theory,

combined with two in-person hands on laboratory rotations in order to provide students with the freedom to study from anywhere while still gaining access to operational training with some of the most specialized, modern equipment available.

Curriculum

The Master of Science in Clinical and Applied Proteomics requires 30 credit hours. The time limit to complete all the work towards the degree is one year.

Code	Title	Hours
CAMS 401	Theory and Physics of Mass Spectrometry	4
CAMS 402	Chemistry of Protein Separation	4
CAMS 403	Introduction to Mass Spectrometry Instrumentation	2
CAMS 411	Computation and Bioinformatics for Proteomics	3
CAMS 412	Clinical Considerations and Biomarker Development	3
CAMS 413	Advanced Mass Spectrometry Approaches	2
CAMS 491	Mass Spectrometry Lab Rotation A	5
CAMS 492	Mass Spectrometry Lab Rotation B	5
CAMS 493	Capstone Design - Applications in Mass Spectrometry A	2
CAMS 494	Capstone Design - Applications in Mass Spectrometry B	2
Total Hours		**32**

The didactic classes will take place online. The laboratory rotation will take place in person at the Loyola University of Chicago's Health Sciences Campus in Maywood, IL.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand how compounds can be isolated for analysis based on their chemical properties.
- Describe the physics of each step of mass spectrometry.
- Read and interpret mass spectra.
- Identify the best mass spectrometry approach for a given situation.
- Perform all steps, from sample preparation to data analysis, of the mass spectrometry analysis workflow.
- Be able to explain the bioinformatic analysis of mass spectra and how to choose the most appropriate approach for a given situation.
- Develop a project based on a clinical or applied mass spectrometry question.

Infectious Disease and Immunology (MS)

Through the research-intensive Master of Science Degree in Infectious Disease and Immunology, students will receive rigorous training in the fundamentals of the scientific method, and in practical laboratory skills, by performing a research project under the joint direction of two scientific mentors: a basic scientist and a clinician.

Curriculum

Required Courses

The Master of Science in Infectious Disease and Immunology requires 30 credit hours and a master's thesis.

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
IDIM 403	Parasitology and Virology	2
IDIM 400	Infections and Immunology	3
IDIM 401	Conceptual Bases of Infectious Diseases	2
IDIM 418	Presentation skills	1
IDIM 492	Research	2
IDIM 501	Seminar	1
IDIM 502	Special Topics in Infectious Disease and Immunology	5
MIIM 503	Current Literature	1
IDIM 595	Thesis Supervision	0
Total Hours		**30**

Students will participate in the Department of Medicine's Clinical Grand Rounds that are held once a week. Students are expected to attend at least five Grand Rounds seminars, generally in their second year. This requirement allows Master's students to interact with physicians, residents, and medical students.

Research

Students will select a laboratory for research following one to three 6-week rotations during the first semester. Students will select laboratories for each rotation in consultation with faculty mentors and the program's graduate program director. MS candidates are expected to undertake an independent, original experimental study resulting in a new and significant contribution to knowledge. The research will culminate in the preparation of a thesis and a final oral examination conducted by the student's MS Thesis Committee.

Thesis

By the beginning of the second year (August), in consultation with her/his mentors, students will select a committee (the two mentors plus two other faculty) and submit a written proposal for the master's thesis work. Following approval of the proposal, students continue to carry out the appropriate experiments and develop the written thesis. The thesis is defended orally to the committee by the end of the second year (by the end of July). Students are expected to actively engage in research for the duration of the program, including during semester breaks.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Master's students will graduate with the ability to:

- Discuss, develop, conduct and/or supervise research projects that call for broad training in the biomedical sciences and focused training in Infectious Disease and Immunology.
- Provide technical expertise in molecular biology and cellular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culture.
- Act as liaison between researchers and clinical faculty and in situations that require familiarity with clinical presentations within the areas of infectious disease and immunology, as well as treatment of infectious disease.
- Incorporate high standards of ethics into research design and execution and data interpretation.
- Demonstrate strong oral presentation skills in the course of dialogues with colleagues, clients, physicians, and research scientists.
- Have thorough knowledge, within the fields of infectious diseases and immunology, of the biomedical research process including project planning, experimental design, and research protocol development. This knowledge will be beneficial to those pursuing careers in health sciences, government or commercial environments.

Integrative Cell Biology (MS)

Knowledge in the Biomedical Sciences has been growing exponentially over the last decade. As we learn more about cells at the molecular level, we also discover the need to understand their interactions and functions integratively, emulating life in an in vitro setting. The Master of Science in Integrative Cell Biology at Loyola University Chicago is training the next generation of biomedical researchers. Through the program, students acquire a solid foundation and understanding of cell function at molecular, multicellular tissue, and organ structure levels.

Curriculum

The Master of Science in Integrative Cell Biology requires 30 credit hours of coursework and a thesis.

Coursework Requirements

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
ICB 403	Histology	3
Select one of the following:		3
BMB 590	Molecular Biology of Oncogenesis	
MIIM 402	Microbes & Hosts	
MIIM 413	Basic Concepts of Immunology	
PHAR 410	Signal Transduction	
ICB 445	Scientific Literature: Review & Critique	1
ICB 446	Review Seminar	1
ICB 595	Thesis Supervision	0
ICB 459	Research	8
Total Hours		**30**

Research and Thesis

During the summer between the first and second year, students will meet with a potential mentor and select a laboratory where they will conduct research leading to the thesis. The final approved thesis must be submitted to a publicly available database in accordance with Graduate School policy

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and current biomedical research methods.
- Propose original biomedical research questions and design experiments to interrogate these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Clearly and effectively communicate scientific information in both oral and written forms
- Critically evaluate the results to arrive at a conclusive interpretation of the novel findings.
- Search and critically evaluate the scientific literature and data in the context of the novel findings.

Integrative Cell Biology (PhD)

The PhD in Integrative Cell Biology offers students a flexible curriculum focused on learning cell biology in a comprehensive scope, ranging from the molecular biology of cells and cell structures to cellular functions in various biological contexts, like cancer, inflammation, and immunology.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology

- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Specific Requirements		
Track Required Coursework		15
Research [1]		19
Seminar		
Journal Club		
Dissertation Supervision		0
Total Hours		**48**

[1] Students can choose to take more than 15 credits of electives and reduce research credits accordingly.

Integrative Cell Biology Track Specific Course Requirements

The PhD in Integrative Cell Biology requires 48 credit hours and consists of the IPBS Core Curriculum plus Integrative Cell Biology Required Courses and Electives, Research, Journal Club, Seminar, a comprehensive examination, and completion of a dissertation.

Code	Title	Hours
IPBS Core Requirements (see above)		**14**
Integrative Cell Biology Courses		
ICB 403	Histology	3
ICB 463	Teaching Anatomy II	2
Select three of the following:		
PHAR 410	Signal Transduction	
MIIM 413	Basic Concepts of Immunology	
MIIM 431	The Molecular Biology of Viruses	
BMB 417	Molecular Biology	
BMB 590	Molecular Biology of Oncogenesis	
MIIM 443	Molecular B-Cell Immunology	
ICB 445	Scientific Literature: Review & Critique	1
ICB 446	Review Seminar	1
ICB 459	Research (hours vary)	8
ICB 600	Dissertation Supervision	0

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in cellular biology.
- Propose original biomedical research questions and design experiments to address these questions.

- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Integrative Cell Biology (MD/PhD)

The PhD in Integrative Cell Biology offers students a flexible curriculum focused on learning cell biology in a comprehensive scope, ranging from the molecular biology of cells and cell structures to cellular functions in various biological contexts, like cancer, inflammation, and immunology.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Integrative Cell Biology portion of this dual degree program can be found below.

Course Requirements

The PhD in Integrative Cell Biology required a total of 48 credit hours. Students in the MD/PhD program will complete 24 hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Courses		
MIIM 442	Cell & Molecular Immunology	3
ICB 463	Teaching Anatomy II	2
One Integrative Cell Biology Elective		*2-3*

ICB 445	Scientific Literature: Review & Critique	1
ICB 446	Review Seminar	1
ICB 459	Research	1-8
ICB 600	Dissertation Supervision	0
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation.

The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of cell biology.
- Propose original biomedical research questions and design experiments to address these questions.Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution,data interpretation and presentation.

Medical Physiology (MS)

The Master of Science in Physiology (MSMP) program at Loyola University Chicago Health Sciences Campus is designed for college graduates who are interested in strengthening their understanding of medical physiology with the intent of enhancing their academic credentials to succeed in their medical school applications and the medical school academic years. The MSMP program is a non-thesis, full-time, nine month special master's program running from early September to late May. Our courses are designed specifically for MSMP students and are classroom-taught by medical school faculty professors who have extensive medical education and admissions experience at Loyola University Chicago Stritch School of Medicine.

MSMP students will pursue intensive studies in M1-level graduate cell physiology, physiological biochemistry, organ system medical physiology, neurophysiology, basic human anatomy, introduction to pathophysiology and clinical bioethics. Our Professional Development course helps each student with all aspects of their applications to medical school. Each student in the MSMP program is assigned a faculty advisor to guide them throughout the program, as well as with their medical school applications. We also provide assistance for students interested in local medical and community volunteer programs.

Curriculum

The Master of Science in Medical Physiology requires 30 credit hours of coursework.

BEHL 401	Clinical Topics in Bioethics	3
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Program graduates will be able to demonstrate ability in:

- Acquiring advanced knowledge and engaging in transformational and critical thinking.
- Producing and disseminating scholarship.
- Demonstrating ethical thinking and responsible conduct.
- Applying principles of social justice to the larger community.

Microbiology and Immunology (MS)

The Microbiology and Immunology MS program offers a two-year, research-intensive program that leads to a Master's degree in Microbiology and Immunology. Students will be trained in the rigor of the scientific method by proposing and completing a research project under the direction of a selected faculty mentor.

Curriculum

The Master of Science in Microbiology and Immunology requires 30 credit hours of coursework and a master's thesis.

Required Courses

Code	Title	Hours
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
MIIM 402	Microbes & Hosts	3

Select one of the following:		3
MIIM 413	Basic Concepts of Immunology	
MIIM 411	Basic Molecular Microbiology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
IDIM 502	Special Topics in Infectious Disease and Immunology	
MIIM 471	Molecular Microbial Genetics	
MIIM 502	Special Topics	
BMSC 402	Statistical Methods for Biomedical Science	
MIIM 492	Research (hours vary)	12
MIIM 501	Seminar	0
MIIM 503	Current Literature	1
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- apply their broad training in the biomedical sciences and specialized training in Microbiology and Immunology. This wide knowledge base will provide versatility in applying for subsequent positions in research or teaching.
- demonstrate expertise in molecular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culturing.
- communicate your scientific expertise in oral presentations.

Our graduates are equipped to succeed in more advanced research, teaching or administrative positions and will serve as leaders in their chosen professions. They are also prepared for additional educational objectives such as obtaining an advanced degree in such areas as law, medicine or research.

Microbiology and Immunology (PhD)

The PhD in Microbiology and Immunology trains students for a career in research and teaching in microbiology, virology, immunology or molecular biology. The Department of Microbiology and Immunology creates and environment through courses, laboratory work, and other activities to allow students to acquire the tools necessary to work independently and to think critically. The department instills a sense of thoroughness, accuracy, and knowledge of common research tools that is indispensable. Students will able to independently analyze and evaluate scientific problems and be responsible for their research by the end of their program.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:
- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Specific Requirements		
Track Required Coursework		15
Research [1]		19
Seminar		
Journal Club		
Dissertation Supervision		0
Total Hours		**48**

[1] Students can choose to take more than 15 credits of electives and reduce research credits accordingly.

Microbiology and Immunology Track Specific Course Requirements

The PhD in Microbiology and Immunology requires 48 credit hours and consists of the IPBS Core Curriculum plus Microbiology and Immunology Electives, Research, Journal Club, Seminar, a comprehensive examination, and completion of a dissertation.

Code	Title	Hours
IPBS Core Curriculum		**14**
Mircobiology and Immunology Courses		**15**
MIIM 402	Microbes & Hosts	
MIIM 411	Basic Molecular Microbiology	
MIIM 413	Basic Concepts of Immunology	
MIIM 442	Cell & Molecular Immunology	
MIIM 471	Molecular Microbial Genetics	
MIIM 502	Special Topics (may be taken multiple times)	
IDIM 502	Special Topics in Infectious Disease and Immunology	
MIIM 492	Research (hours vary)	1-9
MIIM 501	Seminar	0
MIIM 503	Current Literature	1
MIIM 600	Dissertation Supervision	0

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam,they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation.The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in microbiology and immunology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design,execution, data interpretation and presentation.

Microbiology and Immunology (MD/PhD)

The PhD in Microbiology and Immunology trains students for a career in research and teaching in microbiology, virology, immunology or molecular biology. The Department of Microbiology and Immunology creates and environment through courses, laboratory work, and other activities to allow students to acquire the tools necessary to work independently and to think critically. The department instills a sense of thoroughness, accuracy, and knowledge of common research tools that is indispensable. Students will able to independently analyze and evaluate scientific problems and be responsible for their research by the end of their program.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the

academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Microbiology and Immunology portion of this dual degree program can be found below.

Course Requirements

The PhD in Microbiology and Immunology requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Requirements		
Two Microbiology and Immunology Electives		
MIIM 402	Microbes & Hosts	
MIIM 413	Basic Concepts of Immunology	
MIIM 411	Basic Molecular Microbiology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
MIIM 471	Molecular Microbial Genetics	
IDIM 502	Special Topics in Infectious Disease and Immunology	
MIIM 502	Special Topics	
MIIM 492	Research	1-9
MIIM 501	Seminar	0
MIIM 503	Current Literature	1
MIIM 600	Dissertation Supervision	0

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of Microbiology and Immunology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.

- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Molecular Pharmacology and Therapeutics (MS)

The Master of Science in Molecular Pharmacology and Therapeutics is a research intensive program designed to graduate students with a broad base of knowledge in the biomedical sciences and a more focused understanding of pharmacology. The goal of our graduate program is to prepare students for advanced training in the biomedical sciences, academia, the pharmaceutical industry, or consulting.

Curriculum

Required Coursework

The Master of Science in Molecular Pharmacology and Therapeutics requires 30 credit hours of coursework and a master's thesis.

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
PHAR 409	Principles of Pharmacology	3
Select 2 Electives		*6*
PHAR 407	Fundamentals of Drug Discovery and Development	
PHAR 410	Signal Transduction	
PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 420	Pharmacovigilance: A Practical Approach	
PHAR 405	Pharmacology Journal Club	1
PHAR 499	Research	6
PHAR 595	Thesis Supervision	0
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods.
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease.
- Understand, assess, and draw conclusions from published research.
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use.
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions.
- Design and effectively present scientific presentations, write scientific papers and grants.
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity.

Molecular Pharmacology and Therapeutics (PhD)

The PhD in Molecular Pharmacology & Therapeutics is dedicated to training outstanding scientists in the pharmacological sciences. After successful completion of formal course work students will have acquired in-depth knowledge of pharmacology and basic knowledge of molecular and cellular biology, biochemistry, and physiology. Our training provides a solid foundation for successful scientific careers in a wide range of areas, including academia, government, and the pharmaceutical industry.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar

and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours

Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in molecular pharmacology and therapeutics.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Molecular Pharmacology and Therapeutics (MD/PhD)

The PhD in Molecular Pharmacology & Therapeutics is dedicated to training outstanding scientists in the pharmacological sciences. After successful completion of formal course work students will have acquired in-depth knowledge of pharmacology and basic knowledge of molecular and cellular biology, biochemistry, and physiology. Our training provides a

solid foundation for successful scientific careers in a wide range of areas, including academia, government, and the pharmaceutical industry.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Molecular Pharmacology and Therapeutics portion of this dual degree program can be found below.

Course Requirements

The PhD in Molecular Pharmacology and Therapeutics requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1

Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in molecular pharmacology and therapeutics.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Neuroscience (MS)

The Master of Science in Neuroscience is a two-year, research-intensive program designed to provide students with a foundational understanding of neuroscience and an appreciation for emerging concepts and related methodologies. At Loyola University Chicago, we take an intra-departmental and interdisciplinary approach to learning, giving students a broad choice of mentors and neuroscience-related research projects to help advance your career. Students will acquire the knowledge and confidence to develop novel neuroscience questions, address them with rational and reproducible experimental design, and succeed in challenging academic and industry environments.

Curriculum

The Master of Science in Neuroscience requires 30 credit hours of coursework and a master's thesis.

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4

NRSC 415	Neurochemistry	3
NRSC 503	Neuroscience Seminar	1
NRSC 499	Research	8
NRSC 595	Thesis Supervision	0
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Neuroscience (PhD)

The Neuroscience PhD Program provides students with a fundamental understanding of nervous system structure and function as well as the opportunity to develop the analytical and communication skills necessary to independently and collaboratively ask and answer novel and impactful research questions that advance our current understanding of central and peripheral nervous system function, disease processes and potential therapeutic targets.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

NRSC 499	Research	1-9
NRSC 503	Neuroscience Seminar	1
NRSC 600	Dissertation Supervision	0

[1] Students may choose electives from any of the biomedical graduate tracks.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- A thorough conceptual understanding of structure and function of the nervous system as well as the biology and function of cells of the nervous system.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Neuroscience (MD/PhD)

The Neuroscience PhD Program provides students with a fundamental understanding of nervous system structure and function as well as the opportunity to develop the analytical and communication skills necessary to independently and collaboratively ask and answer novel and impactful research questions that advance our current understanding of central and peripheral nervous system function, disease processes and potential therapeutic targets.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates

undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Neuroscience portion of this dual degree program can be found below.

Course Requirements

The PhD in Neuroscience requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Courses		
NRSC 410	Cellular & Molecular Neurobiology	3
NRSC 415	Neurochemistry	3
NRSC 499	Research	1-9
NRSC 503	Neuroscience Seminar	1
NRSC 600	Dissertation Supervision	0

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a thorough conceptual understanding of structure and function of the nervous system as well as the biology and function of cells of the nervous system.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Pharmacology/Business (MS/MBA)

The Department of Molecular Pharmacology & Neuroscience and the Loyola University Chicago Quinlan School of Business offer full time 2.5-year and part-time 4-year dual degree programs leading to a Master of Science (MS) in Pharmacology degree and a Master of Business Administration (MBA) degree. This program is especially designed for individuals who are planning a career in the pharmaceutical, biotechnology, or other health-related industries. The ability of our graduates to understand both the science and business aspects of developing and marketing a new product or therapy gives them a competitive advantage in obtaining a position in industry and advancing their careers. This dual degree program also allows students to earn the two degrees in a shorter period of time than completing each one separately.

Curriculum

Master of Science in Pharmacology Curriculum

The Master of Science in Pharmacology requires 30 credit hours, 3 of which will be shared with the MBA curriculum.

Required Coursework

Code	Title	Hours
MS Pharmacology Requirements		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
PHAR 405	Pharmacology Journal Club (taken twice)	2
PHAR 407	Fundamentals of Drug Discovery and Development	3
PHAR 409	Principles of Pharmacology	3
PHAR 499	Research	4
Select one of the following:		3
BMB 417	Molecular Biology	
BMSC 414	Systems Biology	
MIIM 411	Basic Molecular Microbiology	
MIIM 431	The Molecular Biology of Viruses	
NRSC 410	Cellular & Molecular Neurobiology	
PHAR 420	Pharmacovigilance: A Practical Approach	
Business MBA Requirements		
Introductory MBA Courses		
ACCT 400	Financial Accounting for Business Decisions	3
ECON 420	Managerial Economics	3
FINC 450	Financial Management	3
MARK 460	Marketing Management	3
SCMG 480	Intro to Operations Management	3
MBA Coursework		
FINC 470N	Business Finance	3
HRER 417N	Managing and Motivating in the Workplace	3

MGMT 426N	Leadership Development	1.5
MGMT 430N	Strategy and Leadership	3
MGMT 431N	Business Consulting Course	3
MGMT 441N	Business Ethics	3
Total Hours		**66**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 412	Cell Biology	4
PHAR 499	Research	2
PHAR 405	Pharmacology Journal Club	1
	Hours	**12**
Spring		
PHAR Elective Course		
PHAR 409	Principles of Pharmacology	3
BMSC 402	Statistical Methods for Biomedical Science	3
PHAR 499	Research	2
PHAR 405	Pharmacology Journal Club	1
	Hours	**9**
Year 2		
Fall		
PHAR 407	Fundamentals of Drug Discovery and Development	3
PHAR 405	Pharmacology Journal Club	1
ACCT 400	Financial Accounting for Business Decisions	3
FINC 450	Financial Management	3
	Hours	**10**
	Total Hours	**31**

MBA Courses to follow in the suggested sequence.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes for the MBA Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Learning Outcomes for the MS Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods.
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease.
- Understand, assess, and draw conclusions from published research.
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use.
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions.
- Design and effectively present scientific presentations, write scientific papers and grants.
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity.

Pharmacovigilance Certificate

Pharmacovigilance is the science of collecting, detecting, assessing, and monitoring data of drugs in order to minimize or prevent adverse effects. Pharmacovigilance, modernization and evolution of safety pharmacology, employs sophisticated state of the art approaches in the collection and analyses of data for therapeutics under development and for post-marketing surveillance of pharmaceutical products. Pharmacovigilance offers the promise of significant beneficial improvements in human health by providing safer, more effective and individually tailored therapeutics.

Loyola's Department of Molecular Pharmacology & Neuroscience offers a 12-credit certificate program in Pharmacovigilance which can be completed in 1-year (full-time) or 2-years (part-time). This program is especially well suited for individuals who are planning careers in the pharmaceutical industry, public health sciences, or biomedical research. The certificate program is also suited for physicians, nurses, and scientists in epidemiology or therapeutic-related fields. The program covers all aspects of Pharmacovigilance, related drug development and regulatory topics, and the ethics associate with these endeavors. Courses involve executives and expert scientists from the pharmaceutical industry who are world leaders in these areas.

All courses consist of Asynchronous lectures and synchronous course meetings (early evening) and are flexible to allow students to take the courses from home and around daytime obligations.

Curriculum

Code	Title	Hours
PHAR 407	Fundamentals of Drug Discovery and Development	3
PHAR 409	Principles of Pharmacology	3
or PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	2
PHAR 420	Pharmacovigilance: A Practical Approach	4
Total Hours		**12**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Identify and evaluate Drug Development pathways including pre-clinical and clinical trials and the ethical, scientific, and regulatory issues around them.
- Identify and evaluate signal identification, assessment, management, and causality assessment.
- Evaluate benefit-risk, risk minimization, product safety monitoring, and vaccine safety monitoring.
- Evaluate and assess real world data/evidence.
- Interpret evidence obtained in Pharmacovigilance, including behavioral science, patient perspectives, and risk communication.
- Identify and explain the ways in which Pharmacovigilance can produce evidence and evaluations of data, and how these can be used to benefit human health.

Neiswanger Institute of Bioethics and Healthcare Leadership

The Neiswanger Institute for Bioethics and Healthcare Leadership is a pluralistic program that draws upon the commitment to social justice of the Jesuit and Roman Catholic heritage of the Stritch School of Medicine in its teaching, research, and service. The Institute promotes the ideals of Jesuit education in seeking to form "men and women for others" and to make our classrooms a "home for all faiths." Thus, while giving special regard to Catholic healthcare ethics in teaching and research, the Institute also fosters respectful dialogue among all traditions represented in our student body and patient population.

Two things distinguish the Neiswanger Institute for Bioethics:

- A commitment to educating healthcare professionals to be effective leaders for social justice in medicine and society, and;
- A commitment to understanding and respecting the role of religious and spiritual traditions, especially that of the school's Roman Catholic heritage, in healthcare decision making.

The primary values of the Institute, a regard for social justice and a commitment to understanding the roles of religion and spirituality in medicine, give rise to a research and teaching focus for institute faculty that includes addressing racial and ethnic disparities in healthcare, fostering cultural humility and competence, contributing to global health, promoting public health, and advocating a renewal of medical professionalism that evidences a concern for the common good.

As part of our mission, the Institute offers online master's degree programs and a hybrid doctoral degree in bioethics and healthcare mission leadership, as well as online certificate programs for healthcare professionals. Our innovative online environment supports practical education and provides valuable engagement and networking among peers and experts in the field of bioethics and health policy.

Graduate Programs

- Bioethics and Health Policy (DBe) (p. 1516)
- Bioethics and Health Policy (MA) (p. 1517)
- Bioethics and Health Policy Certificate (p. 1517)
- Healthcare Mission Leadership (DHCML) (p. 1518)
- Healthcare Mission Leadership (MA) (p. 1519)
- Healthcare Mission Leadership Certificate (p. 1519)

Bioethics and Health Policy (DBe)

Our professional doctorate in bioethics (DBe) is a first of its kind and meets the growing need for advanced training in bioethics for those professionals that have increased responsibilities related to bioethics and health policy at their institution. Such individuals may serve as chair of a hospital's ethics committee, perform clinical ethics consultations, have administrative oriented ethics work or are a steward for issues central to your institution's mission and values. This degree offers healthcare professionals an opportunity to obtain a high quality doctorate through a hybrid delivery system (asynchronous online courses combined with blended courses that require 2-3 days of on-campus activity).

Curriculum

The Doctorate in Bioethics (DBe) is a professional doctoral degree and requires 57 credit hours of coursework, written and oral qualifying examinations, two capstone courses, and one capstone presentation (virtual or in-person). Matriculants in the doctoral program are required to maintain a 3.5 cumulative GPA.

Students who enter with a previously earned master's degree in bioethics may transfer up to 27 credit hours (pending approval from program director), and are required to complete a minimum of three (3) required courses, five (5) elective courses, and the two (2) capstones at Loyola.

Required Coursework

Code	Title	Hours
Required Courses		
BEHL 401	Clinical Topics in Bioethics	3
BEHL 402	Justice & Health Care	3
BEHL 404	Biomedical Ethics and Law	3
BEHL 406	Principles of Health Care Ethics	3
Select Three Courses in Concentration (see below)		*9*
Clinical Bioethics		
BEHL 403	Ethics Care Continuum	
BEHL 410	Ethics Consultation [1]	
BEHL 430	Advanced Clinical Ethics Skills [1]	
or BEHL 421	Practicum in Clinical Ethics	
Catholic Bioethics		
BEHL 414	Moral Theology for Bioethics	
BEHL 415	Ethical & Religious Directives for Catholic Healthcare Leadership

or BEHL 419	Organizational Ethics II: Ethical Leadership for Changing Healthcare Environment	
BEHL 418	Advancing Health Equity Practice [1]	
or BEHL 407	Social Determinants of Health and Bioethics	
Select Ten Electives		*30*
Capstone Courses		
BEHL 423	Doctoral Capstone I	3
BEHL 424	Doctoral Capstone II	3
Total Hours		**57**

[1] Indicates hybrid course offered asynchronously online with two to three days of on-campus activity.

Qualifying Examination

The qualifying examination students in the Bioethics Doctoral Program (DBe) should be completed after other coursework but *prior to* the Doctoral Capstone courses. This is an open book essay exam that should be an opportunity for the doctoral student to showcase their knowledge from the coursework they've already taken. After written responses are submitted, an oral exam is conducted online with the student and two

faculty reviewers. This is an opportunity for the student to clarify and expand upon their written answers. The student will receive a letter from the graduate program director indicating successful completion of the written and oral exams.

Capstones

DBe students will take two doctoral capstone courses (BEHL 423 Doctoral Capstone I and BEHL 424 Doctoral Capstone II), each of which should result in peer-reviewed articles. Afterwards students will make a virtual or in-person presentation of their capstone work.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Bioethics and Health Policy (MA)

The key ingredients to a successful experience in an online educational program are the quality of the students and the dedication of the faculty. Our students typically have advanced or professional degrees in a variety of disciplines and they hail from all over the country (and even a few from outside the US). Our program attracts physicians, nurses, social workers, chaplains, health care administrators, lawyers, researchers, and even a few of our own medical students.

Our faculty members (https://hsd.luc.edu/bioethics/aboutus/facultydirectory/) are trained in a variety of disciplines: law, medical humanities, philosophy, psychology, public health, theology, and health care ethics (https://hsd.luc.edu/bioethics/aboutus/whatisbioethics/). Because of the commitment of our faculty to online education, we can boast a low attrition rate, and students typically complete the master's program within 2 to 3 years.

Curriculum

The Master of Arts in Bioethics and Health Policy requires 30 credit hours of coursework (5 required & 5 elective courses).

Code	Title	Hours
Required Courses		
BEHL 401	Clinical Topics in Bioethics	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Healthcare Mission Leadership (DHCML)

As the position of mission leadership has evolved over the past three decades, leaders working in Catholic healthcare cite an increasing need for well-prepared executives with deep understanding of Catholic theology, bioethics, practical business acumen, and organizational leadership who can function in an executive capacity to guide increasingly complex organizations.

Our interdisciplinary online Doctorate in Healthcare Mission Leadership builds on the MA in Healthcare Mission Leadership and provides a professional, doctoral-level preparation for individuals who hold or will hold positions of senior leadership within Catholic healthcare organizations.

Loyola offers the first and only doctoral-level graduate program in Healthcare Mission Leadership in the U.S.

Curriculum

The Doctorate in Healthcare Mission Leadership (DHCML) is a professional doctoral degree and requires 66 credit hours of coursework. Matriculants in the doctoral program are required to maintain a 3.5 GPA.

Students may transfer up to 33 credit hours of coursework from an external MA degree toward the DHCML based on curricular requirements. Prior graduate coursework will be evaluated on an individual basis. Each student's course of study will be tailored to build on and complement their previous coursework. DHCML students may also select additional electives in healthcare leadership and management from the Quinlan School of Business or in theology and spirituality from the Department of Theology. These electives will be selected in conversation with the student's academic advisor.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Healthcare Mission Leadership (MA)

The Master of Arts in Healthcare Mission Leadership offers professional preparation for those in senior leadership positions in a healthcare environment who are charged with developing, enhancing, cultivating, and protecting the identity and mission of their organizations. This interdisciplinary program is offered collaboratively by Loyola's Neiswanger Institute for Bioethics and Healthcare Leadership at the Stritch School of Medicine, the Marcella Niehoff School of Nursing, and the Institute of Pastoral Studies. It integrates courses from theology, spirituality, bioethics, organizational development, and leadership to offer a well-rounded degree pertinent to the work being done in Catholic hospitals and health systems throughout the world.

Curriculum

The Master of Arts in Healthcare Mission Leadership is designed to meet the Competencies for Mission Leaders outlined by the Catholic Health Association. The program 36cr hours of foundational coursework in three competency domains: Theology and Spirituality, Ethics, and Organizational Management and Leadership. Since participants in this program will come with a wide range of past education and experience, this curriculum can be tailored to each applicant's background. Candidates demonstrating graduate-level training in a competency represented by a particular foundational course may substitute other courses in that or another competency domain.

Required Coursework

Code	Title	Hours
Theology and Spirituality		**12**
Select four of the following:		
BEHL 500	Introduction to Healthcare Mission Leadership	
BEHL 502	Christian Doctrine	
BEHL 426	Ignatian Spirituality and Medicine	
IPS 402	Church and Mission	
IPS 545	The Foundations of Christian Spirituality	
Ethics		**12**
Select four of the following:		
BEHL 401	Clinical Topics in Bioethics	
BEHL 403	Ethics Care Continuum	
BEHL 414	Moral Theology for Bioethics	
BEHL 415	Ethical & Religious Directives for Catholic Healthcare Leadership	
BEHL 416	Catholic Bioethics and Social Justice	
Organizational Management and Leadership		**9**
Select three of the following:		
BEHL 412	Organizational Ethics: Business, Professionalism, and Justice	
BEHL 419	Organizational Ethics II: Ethical Leadership for Changing Healthcare Environment	
BEHL 422	Practicum in Organizational/Public Health Ethics	
BEHL 505	Advanced Concepts in Health Systems Management	
CMAN 533	Fiscal Management in Health Care Organizations

Total Hours		**36**

The Healthcare Mission Leadership Program Can Be Completed Entirely Online

Our online graduate degree programs offer a highly accessible option for working professionals and individuals looking for greater flexibility. Loyola's innovative online environment encourages interaction, collaboration, and a sense of community among our students, while also offering a great depth of academic content. Our nationally-recognized faculty provides valuable engagement and networking among peers and experts in Catholic healthcare.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2064) under their school. Any additional University Policies supercede school policies.

Healthcare Mission Leadership Certificate

The Certificate in Healthcare Mission Leadership is for associates across Catholic healthcare who wish to deepen their understanding of the theological, ethical, and practical elements of the mission and ministry of Catholic healthcare. This certificate is designed for those interested in exploring the area of mission or who would like to deepen their expertise in Catholic identity or one or more of the *Catholic Health Association (CHA) competencies* and for those who wish to do "mission-in-place" to enhance the work they do in finance, patient services, clinical care and more through engagement with the foundations of Catholic healthcare.

Curriculum

The Certificate in Healthcare Mission Leadership required 15 credit hours. Students can choose any five courses in the areas of Ethics, Theology and Spirituality, and Organizational Management and Leadership from the curriculum for the MA in Healthcare Mission Leadership (p. 1519). This flexibility allows those who have strong backgrounds in healthcare administration to focus their coursework in the theological disciplines, while those with backgrounds in theology may, for example, choose to focus on organizational development.

Code	Title	Hours
Ethics		
BEHL 401	Clinical Topics in Bioethics	3
BEHL 403	Ethics Care Continuum	3
BEHL 414	Moral Theology for Bioethics	3

Nursing

Graduate School Programs

- Nursing (PhD) (p. 1520)

Marcella Niehoff School of Nursing Programs

- Nursing (RN to MSN) (p. 1594)
- Nursing and Healthcare Administration (MSN) (p. 1595)
- Adult-Gerontology Acute Care Clinical Nurse Specialist (DNP) (p. 1596)
- Adult-Gerontology Acute Care Nurse Practitioner (DNP) (p. 1597)
- Adult Gerontology Clinical Nurse Specialist (DNP) (p. 1598)
- Adult Gerontology Clinical Nurse Specialist with Oncology Specialty (DNP) (p. 1599)
- Adult-Gerontology Primary Care Nurse Practitioner (DNP) (p. 1599)
- Adult-Gerontology Primary Care Nurse Practitioner with Oncology Specialty (DNP) (p. 1600)
- Family Nurse Practitioner (DNP) (p. 1601)
- Family Nurse Practitioner with Emergency Specialty (DNP) (p. 1602)
- Psychiatric Mental Health Nurse Practitioner (DNP) (p. 1603)
- Psychiatric Mental Health Nurse Practitioner with Substance Use and Addictions Specialty (DNP) (p. 1604)
- Systems Leadership (DNP) (p. 1604)
- Women's Health/Gender Related Nurse Practitioner (DNP) (p. 1605)
- Post-Graduate Advanced Practice Registered Nurse (APRN) Certificate (p. 1606)
- Oncology Nursing Certificate (p. 1606)

Nursing (PhD)

Preparing nurse scholars to improve health through research, education, and leadership

The PhD in Nursing prepares graduates to advance the scientific foundation of nursing practice and health care delivery. Under the guidance of our faculty, students are prepared to launch a program of research addressing the social, cultural, political and ethical issues related to an area of nursing scholarship.

Curriculum

The PhD in Nursing requires 45-46 credit hours for students entering with a Master of Science in Nursing, and 67 credit hours for students entering with a Bachelor of Science in Nursing.

Classes meet on campus one weekend each month throughout the semester. Classes are held in Fall, Spring, and Summer sessions and meet on a rotating basis between the Lake Shore and Health Sciences campuses.

Required Courses

For students who enter the PhD program with a BSN, their first 24 credit hours of graduate level coursework will be chosen in concert with their advisor and taken through the MSN or DNP program. The remaining coursework makes up the body of the PhD in Nursing, and totals 45-46 hours depending on internship credit.

Code	Title	Hours
GNUR 432	Philosophical Bases of Nursing Science	3
GNUR 500	Conceptual Inquiry	3
GNUR 501	Theoretical Foundations for Nursing Science	3
GNUR 509	Teaching in Nursing	3
GNUR 512	Quantitative Methods and Design for Nursing Research	3
GNUR 513	Qualitative Methods in Nursing Research	3
GNUR 519	Measurement in Nursing Research	3
GNUR 523	Health Care Policy and Economics	3
GNUR 532	Research Internship	2-3
GNUR 540	Philosophy of Nursing: Nursing as a Moral Practice	3
GNUR 542	Grantsmanship	1
GNUR 546	Introduction to Linear Models [2]	3
GNUR 547	Categorical Data Analysis	3
GNUR 600	Dissertation Supervision	0
Three Courses in Cognate Area		9
Total Hours		**45-46**

[1] GNUR 510 Teaching Practicum is required for students who receive funding through the Nurse Faculty Loan Program. Students in that program will complete 52cr hours of coursework.

[2] Students who have not taken a graduate level statistics course prior to entering the PhD program may be required to take an additional three credit hour graduate statistics course before enrolling in GNUR 546 Introduction to Linear Models or GNUR 547 Categorical Data Analysis. The pre-requisite will not replace one of the above required courses and students will graduate with 49cr hours.

Qualifying Examination

At the completion of coursework, students are required to successfully complete a qualifying examination consisting of both written and oral components. The examinations are designed to assess the depth, breadth, comprehension, integration, and synthesis of knowledge that forms the foundation for conducting dissertation research.

Dissertation

A directed dissertation is required to complete a PhD in Nursing. All students in the Graduate School who write a dissertation must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship. It is recommended that this course be taken prior to beginning research.

Program Goal

The goal of the PhD in Nursing program is to prepare scholars who improve human health through the development and expansion of knowledge.

Learning Outcomes

At the completion of the program the graduate has the knowledge and skills to:

- Initiate a beginning program of research that expands nursing and healthcare knowledge.
- Incorporate social, cultural, political, economic, and ethical considerations into nursing scholarship and practice.
- Participate in the international community of scholars to further the Jesuit mission of generation and dissemination of knowledge in the service of humanity.
- Assume leadership roles in nursing research, education, practice, policy development, and/or administration in order to improve the health of society.

Social Work (SOWK)

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Understand the critical impact of the bio-psycho-social-spiritual perspective on the social work profession, 2) identify the role trauma and resilience have in human development and behavior

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Describe the elements of strength-based and contextual assessments, 2) explain process of culturally informed assessment, 3) apply knowledge by assessing client and community situations

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50
Outcomes:
1) Examine students' engagement in a deep exploration of self-awareness of their identities, values, and biases in several areas 2) recognize their knowledge and awareness of cultures and identities outside their own

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Corequisite is SOWK 501; Restricted to Graduate Social Work students
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Understand core social work skills relevant to engaging with and working with individuals and families, 2) apply core skills to diverse client situations

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Understand the role of group work as a key social work methodology, and how group work is practiced within agency and community settings, 2) gain awareness of themselves as group members and facilitators

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Identify research literacy and research skills in order to be accountable, and to evaluate their own practice, programs, and service delivery in the field, 2) understand the methods of social work research

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Course equivalencies: X-SOWK 509/IPS 635
Outcomes:
1) Examine social workers in policy practice & as change agents within communities and organizations, 2) understand the history and current structures of social policies and services; the role of policy in service delivery; and the role of practice in policy development

SOWK 600 Dissertation Supervision (0 Credit Hours)
Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)
Pre-requisites: SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SWFI 530, and SWFI 530S; or Advanced Standing Students or 5-Year Social Work Students
This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels. Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)
Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention. It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice. Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
1) Build specific skills in assessment and intervention strategies; 2) Apply skills to individuals, groups, and schools; 3) Integrate trauma-informed care

SOWK 611 Social Work Practice with Couples (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course explores clinical models and techniques for the treatment of couples with relationship problems. Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.

SOWK 612 Family Assessment and Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families. The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.

SOWK 613 Advanced Family Treatment (3 Credit Hours)
This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relation-centered framework.

SOWK 615 Adolescent Client: Diagnosis and Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.

SOWK 616 Psychotherapy with Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.

SOWK 619 Issues in Treatment of Women (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination. In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)
Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course includes a review of the basic concepts of gerontology/ geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.

SOWK 634 Special Topics (1-3 Credit Hours)
Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.
Outcomes:
Students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma

SOWK 645 Crisis Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course builds knowledge and skills in the areas of program development, sustainability, and evaluation. Program development is presented using an approach that also highlights the role of power, values, needs, and resources in decision-making processes. Grant-writing skills are developed alongside a critical analysis of social entrepreneurship and longstanding models of philanthropy. Knowledge and application of technology-based strategies to monitoring, evaluation and program improvement through data collection, data analysis, and data presentation are covered as well.

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.

SOWK 654 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.

SOWK 662 Professional Development (3 Credit Hours)
This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 663 Women in a Global Context (3 Credit Hours)
Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.
Interdisciplinary Option: Women & Gender Studies

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.
Outcomes:
Students will learn to apply critical thinking to inform and communicate professional judgments using oral and written communication as appropriate to the practice setting

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity.
Outcomes:
Demonstrate professional use of self, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts; Demonstrate understanding of discrimination patterns in society and how macro, mezzo, and micro-level oppression impacts micro-level social work practice

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWFI 530S; P in SWFI 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.
Outcomes:
Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

SOWK 689 Arts-Based and Experiential Approaches to Social Work (3 Credit Hours)
Pre-requisites: Grade of C or better in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, and SWFI 530s, AND completion of SWFI 530 (P/F course); Or Advanced Standing Students or 5-Year Social Work Students
Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.

SOWK 690 Independent Study (1-3 Credit Hours)
Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 709 Social Work and Law (3 Credit Hours)
This course focuses on of the relationship between the disciplines of social work and law. Students acquire a framework for comprehending and analyzing laws, learn to critically examine the function of law in society and examine criminal and juvenile justice; child welfare; domestic violence; and confidentiality.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)
Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students
This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.
Course equivalencies: PHPY402/SOWK714

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)
This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)
This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)
This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)
This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)
This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)
This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.
Outcomes:
Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)
Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Program (1 Credit Hour)
This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.
Outcomes:
