Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- How to manage people and organizations for well-being
- Training, organizing, motivating, and evaluating people in the workplace
- Fundamentals of labor relations, compensation, and benefits
- Cultivating diversity, inclusion, equity, and belonging

Human Resource Management (BBA)

Skills shortages. Work-life balance. Diversity needs. These are just a few of the challenges in finding and retaining talented employees. The BBA in Human Resource Management degree program will help you develop a socially responsible managerial philosophy in directing employees in their personal ambitions and your organizational goals.

Related Programs

Minor

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Interpersonal skills theory
- Understanding of ethical perspectives and sustainable outcomes with respect to all aspects of HR management
- Methods for sustaining employee diversity
- Develop a global perspective as it relates to human resources
- Training, organizing, motivating, and evaluating people in work settings
- Compensation and benefits and employment relations

Information Systems and Analytics (BBA)

The ability to combine systems knowledge with an understanding of the "big picture" means job-ready value. Our BBA in Information Systems and Analytics degree program at the Quinlan School of Business prepares students for a professional career in the rapidly changing fields of information systems and data analysis.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Integrating values and ethics into data analysis and information systems projects and solutions
- Conduct data analysis and information systems focused projects
- Demonstrate competence with SQL and at least one programming language
- Requirements analysis and specification
- Systems analysis and design
- Conceptual and logical data modeling
- Implementation and testing of back and front ends

The Loyola student network provides the student with access to current systems development environments such as Oracle, Teradata, OLAP/BI Tools, Data Visualization Tools, VBA, and C#.

Information Systems Minor

Students who wish to expand their skills in information systems may pursue a minor in this field. The minor in information systems management provides excellent foundational knowledge of applications, data and systems used in business and nonprofit organizations.

The minor in information systems is designed to increase job opportunities and enhance your career path, regardless of your primary major. When it is combined with a liberal arts major, students gain a better understanding of the role of information systems in business and technology, particularly data management and project management systems.

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Approaches to organizing, analyzing, and visualizing business data
- Integrating values and ethics into data analysis and information systems projects and solutions
- Develop skills in one or more programming languages used in the current business environment

International Business (BBA)

The BBA in International Business degree at the Quinlan School of Business prepares students to excel in positions involving global trade and commerce. We offer the business and communication skills needed to compete internationally.

The major combines courses in international accounting, marketing, economics, finance, management, supply chain management, some international political science choices and cultural anthropology choices with foreign-language study. A study abroad (http://www.luc.edu/studyabroad/) experience is required for the major.

The program draws on the resources of Chicago, which is a center of global commerce, including some of the country's largest venture capital firms, the Chicago Board of Trade, Chicago Mercantile Exchange, Chicago Board Options Exchange, corporate headquarters, and Fortune 500 companies.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Through project-based learning, students will develop strategic management skills for multinational enterprises (MNEs)
- Students will understand and apply techniques of international financial management
- With coursework and a study abroad experience, students will enhance and develop their foreign language skills

International Business Minor

Students who wish to expand their skills in international business may elect to pursue a minor in this field.

[1] Quinlan Business Core courses - not included in 12 credits toward minor for Quinlan students.
[2] Students may take no more than one non-Quinlan course toward this minor.

Minor Language Requirement

The minor also includes a foreign language requirement.

- Option 1) 103 level (or 3 yrs of same language in HS) + Study Abroad
- Option 2) 104 level (or 4 yrs of same language in HS)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the minor. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
200-level Business Principles course		3
	Hours	**3**
Spring		
IBUS 201	Introduction to International Business	3
	Hours	**3**
Year 2

Spring		
Group A Elective		3
	Hours	**3**
Year 4		
Fall		
Group B Elective		3
	Hours	**3**
	Total Hours	**18**

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Characterizing dimensions of multinational enterprises (MNEs)
- An understanding of differences principal business functions (finance, HR, marketing, production, logistics) across international contexts
- Understanding dynamics of globalization and its impact
- Interconnectedness of global economies

Management (BBA)

Our BBA in management degree program provides students with a theoretical and practical foundation for effective and responsible leadership in both entrepreneurial and established business enterprises.

Related Programs

Minor

- Management Minor (p. 785)

Curriculum

All Quinlan School of Business students must complete the University Core Curriculum, Business Core Curriculum, and Undergraduate School of Business program requirements. Students pursuing the BBA degree in Management must also complete 15 required hours from the Major Requirements listed below.

Code	Title	Hours
Undergraduate Business Program Requirements		
COMM 103	Business & Professional Speaking	3

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Management concepts and theories
- Leadership skills for career success
- Business ethics
- The dynamics of human behavior in the workplace
- Team processes and performance in organizations
- Team-based management and negotiation skills

Management Minor

Students who wish to expand their skills in management may pursue a minor in management.

Related Programs

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Management concepts and theories
- Leadership skills for career success
- Appreciation for applications of ethics to business decisions
- Comprehending dynamics of human behavior in the workplace

Marketing (BBA)

Marketing involves creating, communicating, delivering, and exchanging value, and can take various forms. From an Instagram influencer's posts to a vendor in an open market—marketing shapes our everyday lives.

The BBA in Marketing degree program at the Quinlan School of Business concentrates on developing difference-makers who value diversity, equity, inclusion, sustainability, and ethics in the aim to use marketing as a force for good in society.

All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understanding models of consumer behavior and market research
- Developing and executing a marketing strategy
- Traditional and digital marketing approaches
- Marketing for the greater good, with an emphasis on ethics and social justice

Nonprofit Management Minor

The Nonprofit Management minor supports students in gaining the knowledge, skills, and values to be future leaders in the social sector, including at nonprofit institutions, philanthropies, and government agencies. Students will:

- Explore the principles and practices of successful leadership
- Examine how nonprofits develop their missions, strategic plans, fundraising initiatives, and program models
- Develop economic analysis and entrepreneurial skills that they can apply in nonprofit settings
- Participate in an internship at a nonprofit organization that provides hands-on exposure and experience in management

	Total Hours	**18**

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Organization and operation of small and large nonprofit organizations
- Developing and executing an idea for a new organization
- Role of nonprofits in social change and community advancement
- Social entrepreneurship and social justice

Sport Management (BBA)

The BBA in Sport Management degree program at the Quinlan School of Business combines comprehensive business skills with an in-depth understanding of the sport industry. The sport management program focuses on the essentials in sport finance, facility management, and marketing, as well as on the economics of this dynamic industry.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- How the economy impacts every facet of sport organizations and the sport industry
- Leadership and ethical aspects of sport management
- Management strategies for today's sport business challenges.
- Sport facility management
- Sport marketing
- Legal areas relevant to the operation of sport programs and organizations

Sport Management Minor

Students who wish to expand their skills in sport management may pursue a minor in this field.

Related Programs

Major

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Operational and analytical methods
- Ethics and the supply chain
- Process design and improvement
- Managing purchasing, logistics, and inventory

Sustainability Management Minor

Students who wish to learn how to manage for people, planet, and profit may pursue the Sustainability Management minor.

This minor provides foundational knowledge of the applications of sustainability in management, marketing, and economics. Students will:

- Learn the social, environmental, and economic impacts of current business systems and consumer society
- Explore alternatives to the current system
- Gain an understanding of the scientific, moral, and business case for sustainability
- Learn standards and metrics for gauging sustainability impacts

Total Hours		**107**

1. Accounting majors with prior credit for COMM 101 Public Speaking & Critical Thinking must take ENGL 210 Business Writing to complete this requirement.
2. One must be a Quinlan course or ENGL 210 Business Writing. Writing Intensive courses must be taken in separate terms.
3. Course taken at the Rome campus.
4. Course taken while studying in Spain.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
Chicago		
UNIV 101	First Year Seminar	1
ECON 201	Principles of Microeconomics	3
UCLR 100	Interpreting Literature	3

Learning Outcomes

- Foundational business knowledge for the U.S. and Europe
- How to live and interact with different cultures
- Global approaches to social justice and sustainability
- Unique challenges facing multinational corporations

School of Communication

Mission

The School of Communication is a community of learners that fosters critical thinking and innovation, integrates big ideas in communication theory and practice, tells stories across multiple platforms and adapts to changing technology and social needs. We develop ethical professionals with the knowledge and dedication to make a lasting contribution through communication and service in the world.

For more information on Loyola's Jesuit mission, visit:

- University Mission Statement (https://www.luc.edu/mission/mission_vision.shtml/)
- Transformative Education in the Jesuit Tradition (https://jobs.luc.edu/media/lucedu/president/pdfs/FINAL-LoyolaTransformativeEducation-2015.pdf)

Values Statement

Members of the SOC community are dedicated to the well-being, growth and success of our students and our colleagues.

We are guided by our mission statement and by the Jesuit vision of *cura personalis*.

We believe:

- Members of this community should treat others with empathy and kindness.
- Honesty and trust-building should define our interactions.
- Collaboration should be the signature of our work.
- The core of all we do must reflect values of ethics, social justice, diversity, equity, and inclusion.

Through these beliefs and the actions that bring them to life, the SOC community fosters an environment of learning and belonging for all.

Degree Requirements

Students must fulfill the following requirements in order to graduate from the School of Communication with a bachelor's degree:

- Core Requirements
- College Requirements: Writing Intensive Course Sections and the Language Requirement
- School of Communication Major Requirements
- General Electives
- Residency Requirement

Core Requirements

The university Core Curriculum (p. 1405) seeks to play a key educational role in every Loyola student's undergraduate experience. Designed to provide both breadth and depth to a student's program of study, the Core Curriculum introduces students to key concepts and modes of thought in a variety of areas of human intellectual endeavors. In particular, the Core introduces students to ten central Knowledge Areas of university learning, with a consistent focus on learning outcomes for those Areas. Core coursework develops students' understanding through knowledge and experience in the Knowledge Areas of artistic, historical, literary, quantitative, scientific, societal and cultural, philosophical, theological and religious studies, and ethical learning, plus written communication. In addition, the Core reinforces the development of six Skills crucial to facing the challenges of contemporary society. Each core course promotes at least one of the following skills: communication, critical thinking, ethical awareness and decision-making, information literacy, quantitative and qualitative analysis and research methods, and technological literacy. Finally, the Core integrates the understanding and promoting of four Values essential to a Loyola education: understanding diversity in the US or the world; understanding and promoting justice; understanding spirituality or faith in action in the world; and promoting engaged learning.

To complete the Core Curriculum, students will take 16 courses across ten Knowledge Areas. Two courses are required in six of these areas (Historical Knowledge, Literary Knowledge and Experience, Scientific Literacy, Societal and Cultural Knowledge, Philosophical Knowledge, and Theological and Religious Studies Knowledge). Students will begin their studies in these six areas with a Foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the Foundational course, students will have an array

of options to further their studies by taking one of a variety of Tier II classes to pursue their particular interests in more depth. The other four Knowledge Areas (College Writing, Artistic Knowledge and Experience, Quantitative Analysis, and Ethics) require one course each.

Additionally, students will have the opportunity to apply their Loyola education to real world experiences through the Engaged Learning requirement. This requirement may be satisfied by a course within the Core Curriculum, or in a student's major or minor, or through an elective course.

Note: As of Fall 2005, students must earn a 2.00 overall cumulative GPA in Core Knowledge Areas and Engaged Learning courses. To calculate your cumulative Core GPA, use the GPA calculator available at http://www.luc.edu/advising/gpa_calculator.html (https://www.luc.edu/advising/gpa_calculator.shtml/).

Click on the links below to view the guides and worksheets about Loyola's Core Curriculum and Values Across the Curriculum requirements.

- Core Curriculum (p. 1405)
- Student Resources (https://www.luc.edu/core/studentresources.shtml/)

School Requirements

All SOC students are required to complete a language competency requirement and two writing-intensive sections of curses. These courses must be completed with a C- or better.

Writing Intensive Sections

Students should expect that virtually all of their courses will include a writing component. In addition, the college requirement for writing intensive courses is a means of strengthening the writing of all students throughout their years at Loyola.

In order to graduate with a degree from the School of Communication, students ordinarily must complete three writing courses. These include:

- UCWR 110 Writing Responsibly (3 credit hours) (Core Curriculum requirement)
- Two writing-intensive sections

Writing-intensive sections are designated sections of courses that are taught with a special emphasis on writing. They are identified by a "W" in the section number. Students in these course sections will have a variety of writing assignments that will be integrated closely with the learning objectives of the course. Often, students will be able to complete a writing-intensive course within their chosen major(s) and minor(s). The purpose of the program is to assure that students continue to give attention to writing as an essential component of education throughout their years at Loyola. Note: UCWR 110 Writing Responsibly must be taken in the freshman year and must be completed with a grade of "C-" or better before any writing-intensive course may be taken.

In order to ensure that training in writing is spread throughout the undergraduate years, the program specifies that no more than one writing-intensive course per semester may be applied to this requirement. Students must earn a C- or better in each writing intensive course in order for the requirement to be satisfied.

Transfer students who have taken and passed (with a C- or higher) both semesters of a two-semester requirement in college composition at their previous institutions or who have taken a composition course that is equivalent to UCWR 110 Writing Responsibly are not required to take UCWR 110 Writing Responsibly at Loyola. Transfer students with 59 or fewer transfer credit hours (completed prior to matriculation) must take two writing-intensive courses during their undergraduate career at Loyola; transfer students with 60-89 transfer credit hours must take one writing-intensive course during their undergraduate career at Loyola; transfer students with 90 or more transfer credit hours are exempt from taking writing-intensive courses. For further information, transfer students should consult their academic advisor.

Language

Competency in reading, writing, and speaking at the 102-level or higher in a language other than English is required for all SOC students. Students may complete this requirement in one of the following ways:

- In a language other than English, complete Loyola language coursework, earning a C- or better at the 102-level or above. (If a student wishes to study a language for which they have no background, this equates to taking two semesters of the same language, i.e. 101 and 102.). If coursework in a language is not offered at Loyola, a student may review eligibility and seek permission to take coursework at another college or university during the summer in accordance with the Policy on Prior Permission to Take Coursework at Other Universities (p. 2283). Students must first consult an academic advisor about this policy.
- Earn the 102-level or above equivalent in transfer credit from another college/university, prior to Loyola matriculation.
- If a student wishes to continue studying a language that is offered at Loyola, they may complete an online placement test that helps place them into the most appropriate language course. Scores are recorded for future reference and are valid for 15 months. (Past 15 months, students should retake the exam.) Students who take this exam must adhere to the Loyola policy on Academic Integrity —they should not receive help. This placement exam does not fulfill the language requirement. Rather, it determines at what level of a language a student should begin taking coursework.
- Earn a score of 4 or 5 on an Advanced Placement (https://www.luc.edu/undergrad/academics/creditbyexam/) examination (a score of 3 on an AP exam will satisfy the Language Requirement, but will not award academic credit). **or**
- Demonstrate competency by passing a Language Competency examination. Students are permitted to take only one competency exam. Multilingual students who wish to take this exam should test in the language they know best. If a student does not pass their one competency exam, they must take language coursework, adhering to the above rules. Note: Language Competency exam results may take up to six weeks to return. Students who wish to take an exam are strongly encouraged to schedule the exam as soon as possible upon matriculation, and no later than the end of their junior year.

For a list of Language Competency exams offered, please consult the Department of Modern Languages and Literatures website (https://www.luc.edu/modernlang/placementcompetency/foreignlanguagecompetencyexam/).

To schedule an appointment to take a Language Competency exam, send an email (from your Loyola account) to LanguageTesting@luc.edu. Include your Name, Student ID number, current SoC major, and the language in which you would like to be tested. The Department of Modern Languages and Literatures will reply with instructions on how to schedule your specific exam. Note: Students are responsible for the $100.00 cost of the exam. Language Competency exams that are conducted in the Language Learning Resource Center (LLRC) may not be scheduled

during the first week of each semester or during registration week in each semester.

Requesting a Language Competency Exam in a Language Not Offered at Loyola

Students who would like to test in a language that is not offered at Loyola may submit a request (during their first semester in the SoC) to the Department of Modern Languages and Literatures by completing the Language Exam Request (https://www.luc.edu/media/lucedu/cas/pdfs/languageexamrequest.pdf) (PDF) for a competency exam in that language. The request form must be submitted to LanguageTesting@luc.edu. Once a request is submitted, the Department of Modern Languages and Literatures will make a reasonable effort to locate an academically qualified tester at Loyola or at another college or university. If a Language Competency exam is made available and the student passes the exam, they will meet the 102-level language requirement.

If no qualified tester can be found within one academic semester, the student's request will be denied, and the student will be required to satisfy the SoC language requirement via language coursework at the 102-level or higher.

Elective Courses

Students must complete at least 120 credit hours (as of Fall 2011) to graduate from Loyola. By definition, electives are courses not used toward completing the major, minor, or Core requirements, and which students take to complete the graduation requirement of 120 credits. We encourage students, when choosing electives, to think of the knowledge, values, and skills you hope to gain in exploring a particular academic interest or in anticipation of a career after graduation. For undeclared students, elective courses present an excellent opportunity to develop academic interests leading toward a major or minor. General electives also present an opportunity to broaden your liberal arts education, add to your skill set, or simply try a new subject for the joy of it.

Residency Requirement (Required Hours in Residence)

In-residence hours refers to the course credit hours taken at Loyola University, the Rome Center, or taken from any of the Loyola sponsored study abroad programs through the Office for International Programs.

Students must take their final, uninterrupted 45 hours of instruction or a minimum of 60 hours in residence at Loyola University Chicago.

Undergraduate Programs

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Communication (COMM)

COMM 100 SOC Career Prep Seminar (1 Credit Hour)
This is a professional development course to help students expand their knowledge of communication fields and to begin career preparation for those fields.
Outcomes:
Develop and polish professional communication tools (resume, cover letters, LinkedIn, etc); prepare for professional interactions (interviews, etc); and make connections within the SOC and beyond

COMM 101 Public Speaking & Critical Thinking (3 Credit Hours)
This introductory course is designed to supply students with the skills of public address, a fundamental understanding of critical thinking practices, foundational tenets of communication theory, a grasp of the relationship between context and communication, and a sense of the social responsibility that comes with the capacity for communication. Students can take one course from COMM 101 and 103, but not both.
Interdisciplinary Option: Forensic Science
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking and an understanding of critical thinking

COMM 103 Business & Professional Speaking (3 Credit Hours)
This class examines the theory and practice of audience analysis, message design, and oral presentation for professional speakers, with an emphasis on communication in organizational settings.
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students will demonstrate presentation skills in simulated organizational settings

COMM 130 Intro to Audio Production (3 Credit Hours)
This class offers a study of basic audio production methods across new media platforms. Topics include acoustics, recording methods, digital editing, and sound as an industry and art form.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM130/ICVM238/IFMS238
Outcomes:
Students will produce creative projects using the skills they have learned

COMM 135 Intro to Video Production (3 Credit Hours)
This course is a hands-on introduction to video field production. By designing and executing a series of short, creative production projects of varied forms, students explore how video techniques are used to structure meaning in media messages.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
Student will be able to demonstrate an understanding of basic video production skills, such as preproduction planning, lighting, filming and editing, by producing several video texts

COMM 140 Intercollegiate Debate (1 Credit Hour)
This course offers students active participation in Loyola Debating Society. A maximum of six hours in intercollegiate debate credit allowed.
Outcomes:
Students will gain experience in debate

COMM 145 Video for Journalists (3 Credit Hours)
Pre-requisites: MJRN majors and minors may enroll, as well as EVCM minors
Entry-level course that will serve as an introduction to basic video/audio journalism. The goal of the course is for the student to develop the ability to capture great video images and audio, and to be able to edit those two elements together to tell a non-fiction video story. For MJRN majors and minors only An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos.
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos

COMM 175 Introduction to Communication (3 Credit Hours)
This course gives a general historical and theoretical overview of communication. By looking at communication through a critical, historical and theoretical lens, students will acquire an intellectual framework for further study and practice in communication.
Course equivalencies: COMM 175 /COMM 160 /ACCOM 201
Outcomes:
Students will increase communication literacy

COMM 200 Digital Communication and Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the ways technology affects personal, cultural and mass communication through examining the historical, societal and ethical implications of newer and interactive forms of media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: COMM200 / IFMS200 / ACCOM 205
Outcomes:
Students use audio, video and digital tools to research and produce essays, projects and presentations that analyze the impact of technology on communication

COMM 201 Media Theory and Criticism (3 Credit Hours)
This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective. Students taking the course should be able to understand and apply textual analysis methods to specific media texts, such as films, TV shows or videogames.
Course equivalencies: X-IFMS201/COMM201
Outcomes:
This course reviews semiotics and other methods of textual analysis of media

COMM 202 Story for Film and Television (3 Credit Hours)
Pre-requisites: COMM 274
An introduction to visual writing, story structure and character development for film and TV. Through in-class exercises, analysis of scripts, and assignments focused on storytelling fundamentals, students will learn what makes a compelling concept, where great ideas come from, and effective ways to build a narrative for the screen.
Outcomes:
Story will: write pitches, synopses, loglines and titles for the screen; create original characters; learn 3-act storytelling structure; develop original story treatments, outlines and pitches for film, TV or webseries

COMM 203 Topics in Cinema History (3 Credit Hours)
The course examines the aesthetic, social, technical, and theoretical evolution of cinema offered as specific topics that include, but are not limited to: war and revolution, social history and cinema, the role of women, Indian cinema, musicals, technology and style, and the realistic impulse.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM203/ICVM260IFMS260
Outcomes:
Students are offered a variety of topics, broadening their view of the film industry

COMM 204 Community as Story (3 Credit Hours)
This course uses children's literature as a means of understanding urban community and individual identities within that community. Students will though, community service, interaction with local experts and ethnographic research, explore communities surrounding Loyola's lake shore campus and create their own children's picture books in collaboration with experienced student artists.
This course satisfies the Engaged Learning requirement.

COMM 205 Reporting Basics I: Writing and Interviewing (3 Credit Hours)
Pre-requisites: UCWR 110
This course examines current issues in U.S. journalism with strong emphasis on developing skills in news reporting, interviewing, and writing.
Outcomes:
News Judgment; Writing Concisely and Clearly; Writing on Deadline; AP Style; Interviewing Techniques; Grammar, Spelling & Punctuation; Ethics & Legal Issues; Basic Research Methods

COMM 206 Hip Hop Culture and Social Change (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Grounded in Black studies, communication studies, critical cultural studies, political advocacy, popular culture, and the growing field of hip hop studies, we will investigate hip hop's evolving relationship with social change in the U.S. and beyond. Particular attention will be paid to Chicago's hip hop scene and its community building.
Outcomes:
1) Gaining a basic understanding of the subject; 2) Developing knowledge and understanding of diverse perspectives, global awareness, or other cultures; 3) Gaining a broader understanding and appreciation of intellectual/cultural activity (music, etc)

COMM 207 Photojournalism (3 Credit Hours)
Photojournalism introduces students to the art of photographic storytelling.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM207/IFMS207
Outcomes:
Students learn to distinguish journalistic photography from self-expressive photography through editing, critique and digital manipulation, and also understand the ethics of photojournalism through graphic concepts and page design

COMM 208 Reporting Basics II: Technology for Journalists (3 Credit Hours)
This course teaches 21st century journalism skills and how to use the equipment and software to report and edit across platforms, including radio, television and the Internet. Instruction will include how to use audio and video recording equipment, basic Web design, use of audio and video editing software, blogging and social media programs.
Outcomes:
News Judgment; Writing Concisely and Clearly; Writing on Deadline: AP Style; Interviewing Techniques; Grammar, Spelling & Punctuation; Ethics & Legal Issues; Basic Research Methods

COMM 210 Principles of Public Relations (3 Credit Hours)
Pre-requisites: COMM 175; PCOM and EVCM minors may enroll without pre-requisite
This course introduces the theory and practice of public relations in communicating and establishing relationships with diverse publics. Topics include professional roles and ethical responsibilities, strategies and tools, media resources, and public relations writing.
Outcomes:
Students will be able to demonstrate an understanding of the roles and practices of the public relations professional, develop PR plans, and create a portfolio or writing samples

COMM 211 Principles of Advertising (3 Credit Hours)
Pre-requisites: COMM 175; PCOM and EVCM minors may enroll without prerequisite
This course provides an overview of the theory and hands-on practice of advertising including planning, strategy, creative development, and media planning. Elements of direct response, promotion, internet, and public relations are also presented.
Outcomes:
Students will be able to demonstrate an understanding of the principles of advertising and practice creative and decision-making skills in developing an advertising campaign

COMM 212 International Advertising (3 Credit Hours)
This course will build an understanding of the cultural, language, social, national and business factors that drive international markets. A key outcome is to broaden student perspectives on how organizations communicate with Italian and other European audiences.
Interdisciplinary Option: Global Studies

COMM 213 Digital Foundations (3 Credit Hours)
Pre-requisites: COMM 175 or 201; EVCM minors are waived from pre-requisite
Students will be introduced to digital media tools, including online content creation, SEO, website management, email marketing, social media engagement, digital advertising, analytics and emerging technologies that are used to create and build integrated digital campaigns for advertising and public relations.
Outcomes:
Ability to demonstrate elementary knowledge of digital communication tools; Practical understanding and capabilities for creating content across a wide range of media platforms; Knowledge of digital media platform technical requirements

COMM 214 Introduction to Creative Concepts (3 Credit Hours)
Pre-requisites: COMM 211
This course introduces students to the creative process and idea generating techniques. Students explore what constitutes strong advertising concepts through exposure to award-winning ads and work in teams to create ads for assigned products.
Outcomes:
The emphasis is on conceptual development with students expected to express their ideas in rough rather than tightly finished layouts; The course focuses on print advertising but also provides opportunities to work across various other media

COMM 215 Ethics & Communication (3 Credit Hours)
Pre-requisites: COMM 175
COMM 215 does not meet Core Ethics. This course explores various approaches to ethical decision-making and applies that process to diverse aspects of every day, contemporary life.
Outcomes:
Students learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various communication situations, and clearly explain their analyses

COMM 220 Introduction to Rhetoric (3 Credit Hours)
This course introduces theories of rhetoric, emphasizing the relevance of classical disputes for understanding current controversies over the nature and function of discourse. A central theme is the tension between rhetoric's promise for constructing a rich and meaningful civic life and the dangers of its descent into demagoguery and irrationality.
Course equivalencies: ACENG 220 / COMM 220
Outcomes:
Students will work through theoretical issues, by examining speeches, films, and other rhetorical artifacts

COMM 227 Social Justice & Communication (3 Credit Hours)
Pre-requisites: COMM 175; EVCM minors are waived from the pre-requisite
This course examines the implications of communication processes and practices for democracy and social justice.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM227/PAX 227
Outcomes:
Students will be able to articulate and defend their conception of the role of communication in achieving a just society and demonstrate an understanding of how existing communication institutions, laws, and norms impede or assist movement towards that goal

COMM 230 Argumentation & Advocacy (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course is an introduction to analyzing and critiquing arguments, and inventing extended arguments to advocate positions.
Outcomes:
Students will be able to analyze and critique both individual arguments and extended cases; demonstrate understanding of the relationship of argumentation to audience and context; and invent arguments and develop cases for advocacy

COMM 231 Conflict Management and Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course explores the role of communication in conflict resolution. Special attention is paid to mediation and other forms of alternative dispute resolution.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM231/PAX 231
Outcomes:
Students will acquire methods of analyzing the nature of conflict and applying appropriate communicative strategies for managing conflict

COMM 232 Cinematography I (3 Credit Hours)
In this course, students will demonstrate their ability to apply aesthetic and theoretical principles and cinema production skills. Topics include pre-visualizations, preproduction planning, digital cameras system, cinematography and lighting. Students work on individual and group projects involving project development, filming and editing.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM232/ICVM232/IFMS232

COMM 234 Interviewing for Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; PCOM minors may enroll without pre-requisite
This course explores the crucial skill of interviewing necessary for many aspects of professional and daily life. Students will learn different ways of interviewing depending on communication context.
Outcomes:
These approaches will enhance students' interviewing ethics as they gain practical experience

COMM 236 Persuasive Presentations (3 Credit Hours)
Pre-requisites: COMM 220 or COMM 230 or COMM 268; EVCM minors are waived from pre-req
This class focuses on the creation and delivery of persuasive messages to develop a variety of persuasive strategies and implement them in both individual and group presentations.
Outcomes:
Students engage in situation analysis and message critique

COMM 237 Small Group Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This class is an introduction to theory, research, and practice of communication that contribute to effective task-group discussion and decision making.
Outcomes:
The development of personal leadership skills and observational/analytic skills through guided, structured group activities

COMM 239 Moving China (3 Credit Hours)
This course offers a unique opportunity to film and document China as it changes virtually before our eyes.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Outcomes:
Students will have an intimate knowledge of China and Chinese culture and the talent and skill to produce a 15-minute documentary video in digital format

COMM 256 Broadcast Newswriting (3 Credit Hours)
This course introduces basics of broadcast news and broadcast writing style. Students learn script writing and formatting, an introduction to radio and TV reporting, standard terms and basic newscast production, and an introduction to the studio. This course also provides a foundation for more advanced courses in the broadcast curriculum.
Outcomes:
Students gain experience writing for radio and TV news, as well as basic knowledge of the broadcast news industry and contemporary issues pertinent to the field

COMM 258 Game Studies (3 Credit Hours)
This course examines games and their complex role within contemporary culture. Games are approached as "texts" that can be "read" using a variety of theoretical lenses. Students will explore what games say about the nature of identity, community presence, learning, and communication and reflect on their own experience in a blog.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM258/IFMS258

COMM 259 News Editing (3 Credit Hours)
This course examines the skills needed to act as a newsroom leader and manager, including copy editing, researching, photo and visual editing, working as an assignment, project and online editor. This course will benefit those who want to be an editor, manage people, shape newsroom culture and build community trust.
Outcomes:
Students will gain experience with production skills in the print medium

COMM 260 Environmental Journalism (3 Credit Hours)
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

COMM 261 Social Media (3 Credit Hours)
Pre-requisites: COMM 200
Starting from the foundation of traditional offline business and social communities and communication, this course will show how the real relationships of online business and social communities use content to build personal and business success at the speed and reach of the Internet.
Outcomes:
Articulate how the Internet and social media has changed the way we produce and consume content and how social media has affected the way we work, shop, and interact online and off

COMM 262 Feature & Opinion Writing (3 Credit Hours)
This course examines methods of researching and writing editorials, commentaries, and features for print media.
Outcomes:
Students will broaden their research and writing skills

COMM 263 Editorial Design I: Newspaper & Online (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Editorial Design I is an introduction to information processing and readership, and basic principles of layout and editing.
Outcomes:
Students experiment with a variety of printed formats and practice copy fitting, typography, and photo-editing

COMM 265 Sports Broadcasting (3 Credit Hours)
This course will teach students how to report and produce broadcast stories about athletes and athletic events. Students will have access to players and coaches on the professional and collegiate levels, attending games, practices and training. Students will learn to produce stories for radio and television, as well as sound broadcast presentation skills.
Outcomes:
Students will learn to conduct journalistic research, interviewing techniques, public speaking skills and how to produce stories for radio and television

COMM 266 Advertising Copywriting (3 Credit Hours)
This course will focus on the art of copywriting for advertising, be it for TV, print, outdoor, social media and the ever changing landscape of digital media. Students will learn to craft their words to make creative advertising based on strategies and insights.
Outcomes:
Through a series of creativity building exercises, short lectures, and readings, learners develop both an understanding of creativity and increase their own ability

COMM 268 Persuasion (3 Credit Hours)
Students will get practical experience in the analysis, criticism, and application of persuasive discourse across a wide variety of contexts. This course is designed to explore theories related to persuasion, social influence, and compliance-gaining.

COMM 269 Observing China (3 Credit Hours)
This course is about street-level China, as it is seen and as it happens. This course is a practicum, in which students, through a mix of lectures, briefings and discussions, will delve into nature of observation and engagement with and in China.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will have a deeper understanding of how journalists and documentarians observe and write (or film) China, and over the course of the semester will make some efforts of their own to do original journalism and essay writing

COMM 271 Media Culture and Communication (3 Credit Hours)
This course examines contemporary U.S. American culture from a critical-theoretical standpoint while examining popular icons and social practices with particular attention to their influence on individual and collective identities.
Outcomes:
Students will learn critical cultural theories and do projects where they reflect upon the influences of contemporary cultural texts and practices with an eye for their economic, social and political influence on individual and collective identities

COMM 272 Intercultural Communication (3 Credit Hours)
This course introduces students to intercultural communication theory and research. Students explore how differences in ethnic, religious, economic, and geographical experiences produce social biases and engender conflict. Students are expected to explore their own cultural histories to understand how they create meaning and adopt attitudes.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM272/INTS213/PAX 218

COMM 273 Interpersonal Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
Students study speech to understand its role in human relationships. This course focuses on self-exploration of communication patterns by asking life's big questions about self and other. Students will gain competence in interpersonal communication through the development of perceptual accuracy, and clarification of values with regard to relational goals.

COMM 274 Introduction to Cinema (3 Credit Hours)
This course is an introduction to the study of cinema as a complex medium of communication. This course will provide students with the basic terminology, observational skills and theoretical background for the study of film aesthetics, language, cultural analysis, history and the production of cinematic texts.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: ACCOM / COMM 274
Outcomes:
Students will be able to demonstrate an understanding of the basic approaches to film studies such as formal analysis; critical practices, and narrative studies

COMM 275 Web Design and Usability (3 Credit Hours)
Pre-requisites: COMM 200; PCOM and EVCM minors may enroll without pre-requisite; For FNVC majors/minors, pre-requisite is FNAR 383
This course will explore the design and usability of websites from several perspectives: how they look (aesthetics), how they work (navigability and usability), and how they are made (tools and software). Lectures, demonstrations, and in-class lab time will introduce students to the creative tools and software that power contemporary web design and usability. Emphasis will be on using a variety of tools and resources to meet one's own goals, rather than achieving the level of expert in any one piece of software.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 277 Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course is an introduction to theory and practice of organizational communication, with an emphasis on organization contexts, culture, and systems, and the role of communication in building relationships with internal and external stakeholders.
Outcomes:
Students will be able to analyze organizational communication, and understand the impact of technology, globalization, community and diversity on organizational systems

COMM 278 International Public Relations (3 Credit Hours)
This course explores the growing impact of globalization on public relations. As multinationals grow and social, economic, and environmental issues become worldwide in focus, PR professionals work in increasingly interconnected world. Students will explore the growth of international public relations by comparing countries, analyzing and discussing cases, and learning best practices.
Interdisciplinary Option: Global Studies

COMM 279 Critical Issues in Journalism (3 Credit Hours)
This course examines different approaches to understanding the role of journalism in contemporary society, emphasizing the historical development of issues that surround journalism today.
Outcomes:
Students explore varied critical perspectives on news and news-gathering to gain a broader understanding of the role of journalism in society

COMM 280 Media Technology & Society (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Through lectures, discussions, and assignments, learn the evolutionary history of media technologies from the telegraph through film, television, and digital media, and review contemporary theories about how technology shapes society.

COMM 281 Communication, Language & Gender (3 Credit Hours)
This course explores the role of communication practices in the production, reinforcement and transformation of gendered identities. Students will learn how gender expectations within cultural contexts are created. They will also learn some of the ways that deeply-rooted assumptions limit social change and guide communication.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CMUN254/WOST208/WSGS208

COMM 282 Media Law (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; EVCM minors are waived from pre-requisites
This course examines cases and issues in constitutional, statutory, and regulatory law affecting print and electronic media including First Amendment rights, libel, privacy, copyright and trademarks, Freedom of Information, and telecommunication regulations.
Course equivalencies: COMM282/CMUN252
Outcomes:
Students will be able to understand major legal precedents affecting current media communication and recognize their impact on professional practices in print, electronic media and the Internet

COMM 290 Branding and Positioning (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
Examines the theory and practice of branding, target segmentation, and how the digital space and the rapid rise of consumer-generated content have impacted brand management. The course explores each stage of the communication planning process and introduces students to the way audience research, and the competitive sets are used to develop brand positions and benefits.

COMM 296 Themes in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Intermediate-level Advertising/Public Relations lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in AD/PR.

COMM 297 Themes in Communication Studies (3 Credit Hours)
Intermediate-level Communication Studies lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in COMM.

COMM 298 Themes in Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175
Intermediate-level multimedia journalism lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in MJRN.

COMM 299 Themes in Film and Digital Media (3 Credit Hours)
Beginner to Intermediate-level Film and Digital Media course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major.
Outcomes:
Students will gain access to a wide variety of topics in Film and Digital Media

COMM 300 Persuasive Campaigns (3 Credit Hours)
Pre-requisites: COMM 175
This course analyses the structure, development, and role of communication in political and advertising campaigns, with a focus on theories of media effects, message construction, and audience analysis.
Outcomes:
Students will use their analytic and research skills to broaden their understanding of the use and effects of communication as a means of public persuasion

COMM 301 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

COMM 303 Media, Politics, & Propaganda (3 Credit Hours)
Pre-requisites: COMM 175 or 201, and COMM 200
This course will enable students to understand the relationship between media and politics as well as be able to identify strategies used in propaganda, disinformation and misinformation campaigns, and the impact of technology on its history and evolution.
Interdisciplinary Option: Global Studies
Course equivalencies: X-CMUN330/INTS331/PAX 331
Outcomes:
Students will be able to articulate the media's impact on the circulation of propaganda as well as be able to identify disinformation/misinformation and understand its significance in the political process

COMM 304 Rhetorics of Utopia & Revolution (3 Credit Hours)
Pre-requisites: UCWR 110
This reading-intensive course will examine rhetorics of utopia, revolution, and strategies of change. Students will read a variety of texts from activists, scholars, and revolutionary thinkers to understand the ways (historically and presently) that utopias and revolutions are imagined and created through communication, media texts, and discourse.
Interdisciplinary Option: Global & International Studies, Peace Studies, Global & International Studies, Peace Studies
Course equivalencies: X-COMM304/PLSC/PAX336/INTS310
Outcomes:
By the end of this course, students will have a better understanding of utopia and revolution, how ideology operates and solidifies via discourse, and ways to enact social change

COMM 305 Animation (3 Credit Hours)
Pre-requisites: COMM 135; For FNVC majors/minors, FNAR 233 is the required pre-requisite in lieu of COMM 135
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 306 Environmental Advocacy (3 Credit Hours)
Pre-requisites: Sophomore standing; For SES undergrads and EVCM minors, pre-req is waived
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: XCOMM306/ESP 329/PAX 329
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the U.S. environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 307 Communication & Social Movements (3 Credit Hours)
Pre-requisites: COMM 175; EVCM minors are waived from pre-requisites
This course explores the communication strategies used to promote and/or resist significant socio-political change. Students will demonstrate an understanding of how communication is used in particular societal struggles to effect socio-cultural change at an individual, community, institutional or global level.
Interdisciplinary Option: Peace, Justice, and Conflict Studies

COMM 308 Screen Directing (3 Credit Hours)
Pre-requisites: COMM 135 and 274
This advanced course in screen directing is designed to further students' narrative filmmaking skills. Geared toward creating fiction films, the course focuses primarily on blocking for the camera, directing actors for the screen, and structuring dramatic scenes. Students should have a working knowledge of basic videography, nonlinear editing, shot composition and film grammar.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM308/IFMS309

COMM 309 Designing Media for Social Change (3 Credit Hours)
Pre-requisites: COMM 220, 227, 230, 231,237, 268, 272,277, or 281; GSCM-MS or DMST-MC or ECVM-MINR students may enroll with no prerequisites
This course examines media and social change at the intersection of theory and practice. The class will be dedicated to analyzing the way social change is catalyzed and communicated through various media platforms. Students will gain a historical and multi-media perspective on a variety of design and communication strategies tied to a range of social and cultural issues.
Outcomes:
Grounded in theories of media power, communication networks, political advocacy, engaged scholarship, and the digital, materials in this course will explore the past, present, and future of designing media and communication practices

COMM 310 Production Design (3 Credit Hours)
Pre-requisites: COMM 274 or COMM 135 or THTR 252; Or instructor permission; MC in DMST students may enroll without pre-requisites
Students develop an understanding for the evolution and history of production design, as it relates to film production, from its inception to the present. Students will pre-visualize and implement art direction--sets, costumes, makeup, color palettes--for student films in production. They learn pre-visualization techniques, script breakdowns and build-out processes for art direction on film sets.
Outcomes:
Students acquire the visual language and historical precedents for production design in film and television

COMM 311 Health Communication (3 Credit Hours)
Pre-requisites: COMM 205 or COMM 210
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 312 Special Events Planning (3 Credit Hours)
Pre-requisites: COMM 210
Students will gain hands-on experience in event planning. They will learn to anticipate and execute the needs of an organization or community planning special events.

COMM 313 Corporate and Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 210; PCOM minors may enroll without pre-requisites
Students will learn the theory and practice of responsive and strategic organizational communication in developing corporate identity and image.
Outcomes:
Students understanding of the theory and practice of responsive and strategic organizational communication, public relations and advertising will be enhanced

COMM 314 Public Relations Cases (3 Credit Hours)
Pre-requisites: COMM 210
The course focuses on issues, strategies, and solutions in creating and maintaining relationships with key publics including media relations, internal communications, community relations, public affairs, investor relations, and crisis communications.
Outcomes:
Students will gain experience analyzing, formulating and applying case-specific solutions and developing an integrated campaign

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205, 362 , and Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 317 Media Planning (3 Credit Hours)
Pre-requisites: COMM 211
This course examines the advertising and marketing processes required to research, develop and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies and tactics to construct an advertising media plan

COMM 318 Public Relations Writing (3 Credit Hours)
Pre-requisites: COMM 210
This course focuses on strategic public relations, writing for publics including print, broadcast and digital media with understanding of objectives, news values and formats.
Outcomes:
Students develop competency writing and editing news releases, pitch letters, fact sheets, public service announcements, newsletters, and Web content to develop a portfolio of individual writing samples

COMM 320 Public Service Communication (3 Credit Hours)
Pre-requisites: COMM 210 and 211
This course examines public relations strategies and applications in cause-related campaigns, public service initiatives, and community relations activities for corporate and nonprofit organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze current issues and advocacy campaigns, define ethical communication and social responsibility, and develop a public service campaign for an organization

COMM 321 Advertising Campaigns (3 Credit Hours)
Pre-requisites: COMM 211
This is an advanced advertising course in a simulated agency environment to provide practical experience in the campaign planning process.
Outcomes:
Student teams develop competencies in creating and producing a professional advertising campaign that includes market research, development of creative and media recommendations, and an integrated marketing communication strategy

COMM 322 Guerilla Media (3 Credit Hours)
Pre-requisites: COMM 200
This course covers provocative, unexpected, and alternative methods for distributing media and gaining new audiences. It includes the history, theories and ethics behind the appropriation of "guerrilla" strategies as found in artistic, civic, commercial and political media work. SES majors and EVCM minors are waived from pre-requisites.
Interdisciplinary Option: Film & Digital Media Studies
Outcomes:
Students gain experiences with understanding, creating and distributing media work with guerrilla strategies around environmental, journalistic and commercial themes of their choice

COMM 323 Remixing Culture (3 Credit Hours)
Pre-requisites: COMM 200
This course explores the remix culture as cultural exchange. While studying about remix culture and collaborative process, students will manifest projects that involve mashing up media using various web-based and mobile media creation, web-based editing, live online broadcasting and sharing and techniques of online presentation.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM323/ICVM323/IFMS323
Outcomes:
Students will learn about the intermixing of cultures through individual projects in which they will combine different types of media

COMM 324 Film Genre (3 Credit Hours)
Pre-requisites: COMM 274
Traces the evolution of independent filmmaking in the U.S, from the pioneering cinema of Maya Deren and John Cassavetes to seminal works of Spike Lee, Kelly Reichardt, and Barry Jenkins.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM324/ICVM324/IFMS324
Outcomes:
Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies

COMM 326 Screenwriting (3 Credit Hours)
Pre-requisites: COMM 202
This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and storytelling fundamentals, students will develop a working sense of the art of crafting a screenplay, learning how to build a script, step by step, from an original and compelling idea.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM326/THTR209/IFMS209
Outcomes:
Extensive writing requirements cover all aspects of screenwriting, from creating a treatment and character bios to writing action and dialogue, culminating in the development of a detailed step outline and polished first act of a feature-length script (20+ pages); Students are required to bring an original movie idea to the first class

COMM 327 Mastering Video Reporting and Storytelling (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course prepares students to report and produce video stories for broadcast and other similar media distribution. It emphasizes information gathering, source development and visual storytelling, and builds on the video and editing skills students learn in the beginning video production class. COMM 256 is encouraged before taking this class but not required.
Outcomes:
Students will learn how to capture great video and audio, research, write, produce, edit complex, effective video stories and present in a variety of ways

COMM 328 Editorial Design II: Magazine & Interactive (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course gives advanced instruction in multi-page editorial layout and design by incorporating writing and photography into a complete, full-color magazine. Students will work as editors and designers in applying principles of design and production to existing articles; and understand ethical issues in serving the readers of the magazine.

COMM 329 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
This course is for AD/PR majors who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 330 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: COMM 214
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 331 Social Media Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers the latest theories and practices of social media advertising. Students will be exposed to 1) evolving concepts and theories related to social media advertising, 2) case studies that discuss the strategies of social media campaigns, and 3) hands-on practices of digital technologies to implement social media campaigns.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Knowledge of theories relating to social media advertising, ability to create strategic plans on social media, skills for digital technologies in social media advertising campaigns, and understanding social media advertising ethics

COMM 332 Investigative & Public Affairs Reporting (3 Credit Hours)
Pre-requisites: COMM 205, COMM 362, and Junior Standing and above
This course will teach you how to do Investigative and Public Affairs Reporting with a data journalism approach. Through discussion of examples and our own work, we will explore how to find, request, and use data that can reveal important information about society.
Outcomes:
Students will learn how to conduct their own data-driven Investigative and Public Affairs Reporting; They will also be able to critically assess this type of journalism

COMM 333 Cinematography II (3 Credit Hours)
Pre-requisites: COMM 232, or instructor permission
Students learn and demonstrate techniques and roles for advanced cinematography: virtual production, assistant directing, sound stages, and location lighting.
Outcomes:
Camera/lighting setups for commercial spaces, virtual locations, lens/cameras for advanced aesthetic choices, assistant directing role/practices, drones, cranes, Steadicams, and other mobile camera framing techniques

COMM 334 Mobile Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 335 AI in Advertising (3 Credit Hours)
Pre-requisites: COMM 211 Outcomes: Students will learn the fundamental of logics of AI technologies, and its implicaitons in various aspects of advertising
This course explore what is AI, how it¿s been applied in various stages and aspects of advertising, and be creative in using artificial intelligent technologies to create better advertisement and consumer experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 335 / COMM 445

COMM 336 Search & Display Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers search engine optimization and advertising practices through lectures and hands-on practices. Students will learn technical terms and tactics involved in optimizing the search result and user experience with brand websites. Google AdWords, search network campaigns, display network campaigns and Google merchandiser set-up training will be included. (Consider scheduling to coincide with Google Challenge.)
Outcomes:
Understand the major concepts in search engine optimization; Working knowledge of the structure and terms used in Google AdWords; Be able to develop effective search engine and display advertising campaigns

COMM 337 AD/PR Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: COMM 135, COMM 145, or COMM 211
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts

COMM 338 Narrative Production (3 Credit Hours)
Pre-requisites: Junior standing and either COMM 232, COMM 308, OR COMM 359; Graduate students majoring in Digital Media Storytelling are also eligible to enroll
Students work in teams to create short-subject narrative films taking their projects from preproduction to exhibition. Students will experience working as a part of a film production crew, be exposed to a variety of jobs, and produce and exhibit original films.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 342 Human Rights Reporting (3 Credit Hours)
In this course, Students will study the history of the concept of human rights and the legal mechanisms for enforcing human rights law, and they will read work by reporters covering human rights worldwide.
Outcomes:
Students will learn how to report on international conflicts by finding local angles of interest to Chicago readers and how to approach articles on domestic human rights issues

COMM 344 Portfolio I (3 Credit Hours)
Pre-requisites: COMM 266; and (COMM 329 or COMM 330)
Builds on skills acquired in intermediate creative courses to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals.

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
COMM 210 or 211 strongly recommended. Open to undergraduate students only. A 3.0 GPA is required. Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 350 Producing for Film & Digital Media (3 Credit Hours)
Pre-requisites: COMM 135 OR COMM 274; COMM 405 (for DMST students); OR Instructor Consent
Aesthetic choices meet the ethics and business of filmmaking in COMM 350. Producing covers how to develop story ideas from conception to writing, financing, production and distribution. Relevant issues in script breakdowns, safety, communication and contracts are covered. Students create pitch decks, basic budgets and a longer prospectus for potential investors.
Outcomes:
Understanding DEI issues while choosing stories to produce, hiring performers or crew; templates for budgets; best practices for safety on the set; creating engaging pitch decks and treatments

COMM 357 Programming Film & Media: Festivals, TV & Digital (3 Credit Hours)
Pre-requisites: COMM 200
This course examines programming and curating (selecting) media for film festivals, museums, streaming services and other platforms. Through work on a festival or similar project, students examine how audiences are identified, learn about distribution, and explore the challenges facing media outlets in selecting, reviewing and archiving media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM357/IFMS369
Outcomes:
Evaluate, curate and present media work; improve critical thinking and writing about media; learn legal, creative and financial implications of programming and curating media

COMM 358 Newscasting and Producing (3 Credit Hours)
Pre-requisites: COMM 145 and COMM 256 This is designed as a capstone course for the broadcast journalism emphasis
It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458
Outcomes:
This class is designed to produce news content on multiple platforms: not only television but also audio (podcast-style) and social media, and to that end, you will gather information, write, shoot and edit stories to present in these various formats; In addition to learning the technical aspects of producing content on these platforms, to do well in the class you will need to keep up with the news -- what's happening at Loyola and in Chicago, in the state, nation, and world; In addition, you will be expected to produce news that represents diverse perspectives and avoids misrepresentation or harm to individuals, groups, or alternative viewpoints

COMM 359 Advanced Post Production (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM359/459/IFMS359
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 360 Digital Media Ethics (3 Credit Hours)
Pre-requisites: COMM 200
This course is designed to familiarize students with a new set of ethical dilemmas that have sprung up in the last decade with the rise of new media. Using classical ethical theories, students will formulate appropriate and responsible solutions to ethical dilemmas emerging in a new/digital media context.
Outcomes:
Students will learn about current ethical issues and solve these issues using classical ethical theories

COMM 361 New Media Criticism (3 Credit Hours)
Pre-requisites: COMM 200 and UCWR 110
Wikipedia, Google, YouTube, Twitter and mobile applications are complex designed objects. Students will learn a critical language for thinking of new media as art, narrative, culture, and code. This course is Writing Intensive.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 362 Multimedia Journalism Research Methods (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205; EVCM minors are waived from the pre-requisite
This course advances student knowledge of resources, methods, and credibility standards for gathering and reporting news stories.
Outcomes:
Students will learn how to conduct research that is both accurate and balanced

COMM 363 Research Methods in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Course will introduce majors to sound and effective social science research methods used in Ad/PR, including surveys, focus groups, content analysis, and audience analyses. It will also give students a chance to apply for the national PR student Bateman Competition that would continue in a designated course the following spring.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the research process and how to apply it to establish, build, and evaluate Ad/PR strategies, goals, and campaigns

COMM 365 Naturalistic Methods Communication Research (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines how communication research is conducted in naturalistic settings using qualitative methods associated with observation and in-depth interviewing.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become familiar with the reading and evaluation of communication research, and apply the concepts studied in class to the design and development of a research project

COMM 366 Observing/Measuring Cmun Behavior (3 Credit Hours)
This course examines how communication processes and behaviors are studied, using the social-scientific techniques of observation and measurements. It also looks at the limitations of these methods; appropriate methodologies and ways of analyzing quantitative (numerical) data.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will become familiar with the analysis of quantitative data, and apply their knowledge to the design of a research project

COMM 367 Rhetorical Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 and (COMM 175 or COMM 201)
This course examines theory, research, and application of critical methods for analyzing historical and contemporary persuasive discourse.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to analyze rhetorical situations and critically assess efforts to respond to them

COMM 368 Ethnographic Research Methods in Communication (3 Credit Hours)
Pre-requisites: (COMM 175 or COMM 201) and Junior standing
This course teaches principles of participant-observation research as a critical practice to produce a 'thick description' of meanings, values, hierarchies of interests, power structures and ideals of a particular cultural group or community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn to conduct ethnographic research and its procedures - taking field notes, conducting interviews, examination of data and artifacts, and producing research results to a public audience

COMM 370 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 371 Special Topics Communication Studies (3 Credit Hours)
Pre-requisites: COMM 175; DMST-MC and GSCM-MS students may enroll without prerequisites
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current social issues and communication practices. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 372 Special Topics: Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175, or DMST student
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current issues in multimedia journalism. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

COMM 374 Special Topics: Film & Digital Media (3 Credit Hours)
These courses offer in-depth experiences in the production, design, writing and development of film and digital media. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 375 Media Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Students learn to develop influence through earned media. Skills taught include identifying news values, writing/creating multimedia press releases and media alerts, AP style, media training, creating media lists using Cision, working with syndication services, search engine optimization for news releases, creating a social presence and working with social influencers.
Outcomes:
Students learn to develop influence through earned media and how to build relationships with the media and other influencers in order to amplify stories for clients

COMM 378 Advertising/Public Relations Practicum (3 Credit Hours)
Pre-requisites: COMM 100; GSCM-MS students may also enroll; Restricted to Juniors and Seniors in the Advertising and Public Relations major; Department consent is required to enroll
Students will gain advanced practical experience advertising/public relations projects.

COMM 379 Digital Sustainability (3 Credit Hours)
Pre-requisites: Sophomore standing; SES undergrads can also enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 380 Debate Practicum (3 Credit Hours)
Pre-requisites: Instructor Consent
Students gain advanced practical experience in the Loyola Debate Society.

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf. Pre-requisites: Department Consent.
This course satisfies the Engaged Learning requirement.

COMM 383 Radio Practicum (3 Credit Hours)
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.

COMM 384 Film & Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Requires Instructor Consent for all majors; DMST may also enroll with instructor consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section--director/producer, writer, cinematographer, editor, production designer, sound designer, publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ICVM384/IFMS384/COMM384
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

COMM 386 Advertising/Public Relations Capstone (3 Credit Hours)
Pre-requisites: Senior Standing (90 credits earned); Restricted to ADPR majors
Students focus on integrating and applying knowledge and skills related to advertising and public relations. They will research a career interest area, interview working professionals, and create strategic communication portfolio materials. Students gain specialized industry knowledge, improve professional communication competence, and build contacts.

COMM 387 New and Digital Media Capstone (3 Credit Hours)
Students focus on integrating and applying knowledge and skills related to new and digital media applications. They will gain specialized research and industry knowledge and skills, improve professional communication competencies, and build digital industry contacts.

COMM 388 Film and Digital Media Capstone (3 Credit Hours)
Pre-requisites: Instructor Consent and Senior Standing; Restricted to FDMD majors: Students must complete the COMM 388 form, describing your project, any participants/support materials/technology needed, and submit to Instructor; Form: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/COMM388Form.pdf
Project proposal must be approved by the program director and course supervisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, assisting in the development of a film festival or presentation of a significant research project.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

COMM 389 Advertising Creative Capstone: Portfolio II (3 Credit Hours)
Pre-requisites: COMM 266 and COMM 344; Must be an ADCR major, senior standing
Gives students an opportunity to develop new campaigns and refine existing work. Students receive feedback from advertising professionals throughout the semester to help them edit and develop their portfolios. Each member of the class creates a portfolio website and develops a job search plan. Final portfolios are critiqued by faculty and professionals. Have a plan for pitching work to potential employees.
Outcomes:
Develop a portfolio of innovative ideas and creative ads across multiple platforms; Learn skills to critique and edit portfolio material

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 398 Directed Study (1-3 Credit Hours)
Pre-requisites: Department Consent; Student must develop a project with a full-time faculty member in their SOC major; Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf
Course may be taken for variable credit (1-3 hours). Student will work independently in their area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials; a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication, etc.

Advertising & Public Relations

- Advertising & Public Relations (BA) (p. 814)
- Advertising & Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
- Advertising & Public Relations/Global Strategic Communication (BA/MS) (p. 969)
- Advertising & Public Relations/International Affairs (BA/MA) (p. 972)
- Advertising & Public Relations/Marketing (BA/MSM) (p. 978)
- Public Relations Minor (p. 816)

Advertising & Public Relations (BA)

In the Advertising/Public Relations Major you will learn to use strategic communication to develop creative and effective messages delivered across multiple media platforms for selected audiences. Loyola's Chicago location provides close proximity to agencies, brands, and organizations, giving students the opportunity to get first-hand exposure to the industry.

Related Programs

Combined

[4] Inigo (https://www.inigocomm.com/)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 175	Introduction to Communication	3
	Hours	**3**
Spring		
COMM 210	Principles of Public Relations	3
COMM 211	Principles of Advertising	3
	Hours	**6**
Second Year		
Fall		
COMM 200 or COMM 215	Digital Communication and Society or Ethics & Communication	3
	Hours	**3**
Spring		
COMM 200 or COMM 215	Digital Communication and Society (if not already taken) or Ethics & Communication	3
COMM 213	Digital Foundations	3
MARK 201	Principles of Marketing	3
	Hours	**9**

Third Year		
Fall		
COMM 100	SOC Career Prep Seminar	1
Major Track Course		3
Major Track Course		3
Major Elective		3
	Hours	**10**
Spring		
Major Track Course		3
Major Elective		3
Research Course		3
	Hours	**9**
Fourth Year		
Fall		
COMM 386 or COMM 391	Advertising/Public Relations Capstone or Advertising/Public Relations Internship	3
	Hours	**3**
Spring		
COMM 386 or COMM 391	Advertising/Public Relations Capstone (if not already taken) or Advertising/Public Relations Internship	3
	Hours	**3**
	Total Hours	**46**

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media.
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Demonstrate the competencies to work as an entry-level professional in advertising or public relations.

Public Relations Minor

A Minor in Public Relations complements other majors as most careers require understanding of internal and external communications. Studying public relations will enable students to better communicate with customers, clients, audiences, supervisors, and teammates. Students will study the variety of communication strategies, tactics, and media platforms public relations practitioners use to build and maintain positive relationships and favorable images for clients. Common job areas include media relations, event planning, corporate communications, content creator, crises management, publicity, public affairs, and government relations. A Minor in Public Relations would offer benefits to students in multiple disciplines, including Business, Marketing, English, Theater, Fine Arts, Political Science, Healthcare, Environmental Sustainability, Education, Women and Gender Studies, and Social Work.

Advertising Creative (BA)

The Advertising Creative program offers students the opportunity to earn a four-year degree and build a career-ready creative portfolio, all while developing a well-rounded set of critical skills and a deep sense of ethics and responsibility. Students in this program prepare for careers in art direction, copywriting, production, and other creative roles at agencies and other organizations.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Gain knowledge for how creative strategies bring insights into focus to meet challenges and solve problems for industry and organizations.
- Understand the creative process employed for developing big ideas that can be used across multiple and changing communication platforms.
- Demonstrate skills for writing copy and designing messages in traditional and digital media.
- Enhance skills for creating content that is relevant and delivers strategy.
- Apply ethical and inclusive decision making throughout the creation of communications.
- Develop a professional portfolio of creative material.

Advertising Minor

Students pursuing an Advertising Minor learn about the dynamic and complex advertising industry, such as consumer insights, strategic planning, account management, design, media, creative, production, and branding. Typical job areas include market research, graphic design, account service, art director, copywriting, content creator, influencer management, media planning/buying, special event planning, and account management.

The Advertising Minor would be of interest to students in a variety of academics, such as Theater, Fine Arts, Graphic Design, English, Business, Marketing, Psychology, Sociology, Anthropology, Political Science, History, and Women and Gender Studies.

Learning Outcomes

- Understand the dynamic and complex advertising industry, such as consumer insights, strategic planning, account management, design, media, creative, production, and branding.
- Identify roles involved in advertising development such as market research, graphic design, account service, art director, copywriting, content creator, influencer management, media planning/buying, special event planning, and account/strategic planning.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Apply competencies to work as an entry-level professional in advertising or public relations.

Advocacy and Social Change

- Advocacy and Social Change (BA) (p. 820)
- Advocacy and Social Change/Environmental Science and Sustainability (BA/MS) (p. 992)
- Advocacy and Social Change/International Affairs (BA/MA) (p. 998)
- Advocacy and Social Change Minor (p. 822)

Advocacy and Social Change (BA)

The mission of Loyola University Chicago calls for all of its members "to make a difference as 'persons for others.'" The advocacy and social change major helps students prepare for the fulfillment of that mission, not only while at the university, but also as they move into the rest of their lives.

The program's coursework and faculty help students understand everything from community organizing to lobbying to political campaigns, preparing them for a number of possible career paths. Students will explore and reflect on how to promote social justice in coursework, but also through engagement outside of the classroom.

Recent graduates have found employment with media literacy groups, domestic and international service organizations, Internet start-ups, and government officials, and gone on to pursue graduate and professional degrees.

Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Select and use various communication strategies (including persuasion, argumentation, conflict management, negotiation and mediation) leading to ethical social change.
- Create, define, analyze, and interpret messages.
- Demonstrate effectiveness as rhetors, critics and decision makers.
- Serve the needs of diverse groups, communities and organizations which strive for equity, inclusion and fairness.

Advocacy and Social Change Minor

The mission of Loyola University Chicago calls for all of its members "to make a difference as "persons for others." The Advocacy and Social Change minor helps students understand how that mission can be carried on through engaged communication while at the University and for the rest of their lives.

Through a course load of 21 Credit Hours, students will gain a deeper understanding of the role of communication in advocating for others and in promoting positive social change.

The skills students acquire from this minor will enrich any course of study. They will also facilitate employment in pro-social areas such as media literacy groups, domestic and international service organizations, Internet start-ups, NGOs and government agencies concerned with social welfare.

Learning Outcomes

- Understand the role that communication plays in upholding, changing or transforming social hierarchies, institutions, and identities.
- Select and use various communication strategies (including persuasion, argumentation, conflict management, negotiation, and mediation) leading to ethical social change.
- Use communication skills and knowledge to create, define, analyze, interpret, and critique messages, texts, campaigns, and projects.
- Demonstrate effectiveness as rhetors, critics and decision makers.
- Serve the needs of diverse groups, communities and organizations which strive for equity, diversity, inclusion, and social justice.

- Communication Studies Minor (p. 825)
- Environmental Communication Minor (p. 826)
- Professional Communication Minor (p. 828)

Communication Studies (BA)

The communication studies major proudly places itself at the intersection of theory and practice. Its students are led to understand and to use, to critique and to appreciate, to embrace communication as it is presently practiced in society and to hone it for more effective service to the human community. Our communication studies majors benefit from our unparalleled location within the scholarly Loyola community and in the midst of the Chicago media hub.

Communication studies courses help students understand how communication can persuade, comfort, alienate, or bring the world together.

Major Elective		3
	Hours	**6**
Fourth Year		
Fall		
Major Elective		3
	Hours	**3**
Spring		
Research Methods Course		3
	Hours	**3**
	Total Hours	**40**

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Identify some of the fundamental communication issues that our contemporary world face, and the ways in which the communication field approaches and interprets them.
- Remember the situated, contextual and historical nature of communication processes and practices.
- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures.
- Assess, interpret and use communication research to apply and generate communication knowledge.
- Use communication skills and knowledge to produce messages, texts, campaigns, and projects.
- Formulate creative, culturally literate, and convincing oral, written, and multimodal arguments which are responsive to context and situation.
- See the crucial role that communication holds in advancing or deterring social justice.
- Apply communication knowledge and perform communication skills within different social contexts, such as interpersonal communication, group communication, intercultural communication, gender and communication, and traditional and new media platforms.

Communication Studies Minor

The communication studies minor equips students to understand the fundamental communication social issues faced by our globalized world. They come to appreciate how communication can persuade, comfort, alienate, or bring the world together.

This 18 credit minor will help students learn to use communication skills to produce messages, texts, campaigns, and projects in a way that is creative, culturally literate and convincing. Because of this, the minor is a very good complement for majors in the College of Arts and Sciences as well as Education, Business, and Social Work.

[1] Two (2) courses must come from different menus: Theory/Critical Analysis, Applied, Research Methods, any COMM class not previously taken.

Learning Outcomes

- Learn how the communication field interprets and approaches fundamental communication social issues faced by our globalized world.
- Understand the situated, contextual, and historical nature of communication processes and practices.
- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures.
- Use communication skills and knowledge to produce messages, texts, campaigns, and projects.
- Formulate creative, culturally literate, and convincing oral, written, and multimodal arguments which are responsive to context and situation.

Environmental Communication Minor

The Environmental Communication minor is a collaborative effort between the School of Communication and the School of Environmental Sustainability. This 18 credit minor equips students with a deeper understanding of the role of communication in effectively advocating for environmental sustainability.

The minor is enriched with access to state-of-the-art facilities at the Lakeshore and Water Tower campuses. At Lakeshore, the facilities of the School of Environmental Sustainability are designed to minimize energy use, reduce waste, and conserve water. At Water Tower, the School of Communication offers students on-site multi-media production facilities, labs, and specialized equipment.

The skills student acquire from this minor will prepare them for future work in environmental advocacy across diverse platforms.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understand the role that communication plays in upholding, changing, or transforming the dominant social and cultural understandings of the environment.
- Effectively use various communication strategies and technologies to advocate for environmental sustainability.
- Use communication skills to critique, change, and create environmental campaigns and projects.
- Serve the needs of diverse groups, communities and organizations which strive for equity, diversity, inclusion, and social justice.

Professional Communication Minor

The Professional Communication minor is designed for students outside of the School of Communication who are seeking to improve their communication skills, including speaking, writing, and multi-media presentations.

The 18-credit-hour minor will help students improve their public speaking, persuasive abilities, understanding of organizational communication and creative use of media technologies.

Students with this minor will have an advantage in professional settings that reward excellence in communication.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Improve public speaking skills geared towards organizational settings.
- Produce creative, effective, and appropriate messages, texts, and projects using different types of media technologies.
- Formulate professional, persuasive, and culturally literate oral, written, and multimodal arguments which are responsive to organizational contexts.
- Understand the role of communication in our contemporary globalized world.

Film and Digital Media

Learning Outcomes

- Similar to learning grammar to create sentences or speaking the sounds of a foreign language, students who minor in digital media will learn the "language" of film and how shot composition/framing aid in storytelling just as well as dialogue.

- You will be exploring non-fiction, narrative, and experimental genres and will be asked to demonstrate competency in visual storytelling, camera, editing, sound, lighting, scripting and design work.
- You will be asked to integrate theoretical and ethical ideas about the media into the creative context of visual/aural expression.
- In this minor, we will provide students with the basic terminology, observational and critical skills and theoretical background for the study of film aesthetics and language, history, cultural and formal analysis.
- Lastly, you will approach each assigned screening by performing a close analysis of each film that will explore its cinematic elements and properties such as mise-en-scene, cinematography, camera angles, editing, sound and image relation, narrative and other structures of organization, etc. and, furthermore, explore how different modes of composition and style develop over time.

Film and Digital Media Minor

Loyola's Film and Digital Media minor offers the opportunity to gain real-world experiences with award-winning filmmakers, producers, programmers and scholars. Students study and collaboratively create transformative media experiences for a variety of audiences and platforms.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Develop fundamental knowledge and skills essential in media production, exhibition, and distribution.
- Connect theory, analysis, and hands-on work in the development of original ideas in film and digital media.
- Identify their aesthetic vision as a creator of media.
- Gain technical proficiency in audio and visual skills, and specialization in advanced production skills.

Film and Digital Media: International Programming Track (BA)

Loyola's Film and Digital Media program offers the opportunity to gain real-world experiences with award-winning filmmakers, producers, programmers and scholars. Students collaboratively create transformative media experiences for a variety of audiences and platforms.

International Film Studies introduces students to the global markets for programming media, writing reviews and criticism, learning about media distribution, curation, film history and related professions.

- Multimedia Journalism/Environmental Science and Sustainability (BA/MS) (p. 1292)
- Multimedia Journalism/International Affairs (BA/MA) (p. 1298)
- Multimedia Journalism Minor (p. 836)

Multimedia Journalism (BA)

Loyola's multimedia journalism major engages students in the issues shaping today's media landscape, from the decline of newspapers, the rise of apps, virtual reality, and fake news. As part of Loyola's mission-based education, students learn to stand on Jesuit values and ethics in an uncertain and ever-changing world.

Multimedia journalism students practice the skills that every journalist must master, including researching, interviewing, reporting, and writing. Students also gain exposure to the latest technology, equipment, and software through Loyola's Convergence Studio, Owl Lab, and on-site radio station, WLUW.

Courses are offered at Loyola's Water Tower Campus, located in the heart of downtown Chicago. In addition to Loyola's on-campus media outlets, such as our student newspaper, *The Phoenix*, students can gain experience through professional internships at renowned media outlets like the *Chicago Tribune*, *Sun-Times*, WLS, and WMAQ, as well as major corporations, nonprofits, and agencies.

- A commitment to ethics and social justice
- Shooting and editing photos and video
- Recording and editing audio
- Designing web sites and other types of content
- Promoting content and understanding metrics
- A willingness to explore emerging media

Multimedia Journalism Minor

The minor in Multimedia Journalism is designed to help students in other majors learn how to communicate with the general public. The minor teaches students how to:

- write clearly and concisely as journalists do
- research using tools and databases that working journalists use
- relate facts through words, images, videos, podcasts and/or designs

The minor in Multimedia Journalism is perfect for any student who hopes to communicate effectively about their fields of interest.

School of Continuing and Professional Studies

For more than a century, the School of Continuing and Professional Studies has been transforming the trajectory of student lives, driving professional and personal pursuits with high-quality academic offerings and engaging learning environments. A forward-thinking, responsive school, we have designed academic programs to meet market needs and offer online coursework to deliver the flexibility our students need. We have emerged a highly ranked, national leader in online education, and we've created spirited learning environments where students develop tangible skills they can apply in today's workplace.

SCPS offers undergraduate programs to propel careers, enrich lives, and power social mobility, empowering adult learners through an accessible, impactful, and holistic education that positions them for success. With fully online classes and flexible 8-week schedules, students are able to balance their degree pursuits with life's other responsibilities. And with courses led by scholars and active practitioners in their respective fields, students will gain the relevant knowledge and practical skills to advance in their career.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

School of Continuing and Professional Studies Policies

The policies outlined here are additional policies that apply to all SCPS undergraduate students, both degree- and certificate-seeking students. All university policies outlined in the Undergraduate Academic Standards and Regulations section of the Academic Catalog apply to all undergraduate students, including SCPS students.

Academic Advising

The Senior Academic Advisor is the primary academic advisor for all undergraduate SCPS students, both degree- and certificate-seeking.

Upon admission, degree-seeking students are required to meet with an academic advisor and discuss the overview of their academic plan. Degree-seeking students then meet with their primary academic advisor during their first session to create a degree outline. Throughout their time, students may schedule advising appointments with their assigned academic advisor regarding any registration or enrollment questions.

The University uses LOCUS and particularly the Academic Requirements Report (ARR) as an official record of all courses completed and to be completed by the student. The Microsoft Excel electronic audit is also used as a tool to assist students in devising a graduation plan.

A file review is completed for all degree-seeking students who have earned 90+ credits to ensure that the classes necessary for graduation have been or will be completed. A graduation audit is completed and sent to all students who have completed a mandatory graduation application for their review.

Academic Standing

A cumulative GPA of at least 2.0 is required for a student to be considered in good academic standing. The following policies, and the university policies, apply to all SCPS undergraduate students, both degree- and certificate-seeking students.

Academic Probation

The review for academic standing is completed at the end of the term (fall and spring 16-week semester and 12-week summer semester) and not at the end of each 8-week session. When a student's cumulative GPA falls below 2.0 at the end of the term, they will be placed on academic probation and are required to complete an Academic Improvement Plan (https://forms.gle/18CkFWtUWWWa5C487/), and, may be restricted in enrollment. All students should be aware of the Academic Standing policies of the University as found in the Academic Catalog. SCPS follows the University policy parameters for academic probation, continued on probation, and dismissal for poor scholarship.

Students must be in good academic standing, cumulative GPA of 2.0 or higher, to graduate and have their degree and/or certificate conferred.

Dismissed for Poor Scholarship

Students who do not meet the requirements of academic probation and do not return to good academic standing will be dismissed for poor scholarship. SCPS follows university standards, as outlined in the academic catalog, for readmission consideration.

Once the requirement is met for readmission, students must apply for admission to SCPS, submitting official transcripts from all other schools. Grades from other institutions do not apply toward the computation of your Loyola GPA. Re-admission is not guaranteed and is subject to review. If a dismissed student is readmitted, it will be under the terms of continued academic probation and/or any other conditions established by the School of Continuing and Professional Studies Dean's Office.

Admission

Admission on Condition (Unofficial Transcripts)

Conditional admission may be offered to those who have submitted unofficial (self-submitted) or in-progress transcripts (applicant is still enrolled at previous institution at the time of admission). These admitted students must request that official transcripts be submitted to gradapp@luc.edu before the end of the first term of enrollment, or a hold will be placed on their account so that they may not register for future terms.

Admission on Probation

Admission on probation may be offered to students who do not meet the academic requirements for admission. These students will have the opportunity to demonstrate their ability to succeed academically while on academic probation.

For **undergraduate students**, the terms for admission on probation are as follows:

- Students must pass CPST 200 Introduction to Degree Completion in their first session.
- Students must earn a cumulative grade point average of 2.5 in their first 12 credit hours of coursework.

At the completion of their first 12 credit hours, the student's record will be reviewed to determine if the GPA and CPST 200 requirements have been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.5 GPA on the 12 credit hours and their cumulative GPA is 2.0 or higher.
- Continued on probation. If the student achieves the required 2.5 GPA on the 12 credit hours but still needs to bring their cumulative GPA to

2.0 or higher, they will be given the opportunity to continue to improve their GPA with future enrollment.
- Dismissal for poor scholarship. If the student fails to earn a 2.5 GPA on the 12 credit hours, they will be dismissed from the university.

For **graduate students**, the terms of admission on probation are as follows:

- Students must earn a cumulative grade point average of 2.8 (good academic standing) by the end of their first semester.

At the completion of their first semester, the student's record will be reviewed to determine if the GPA requirement has been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.8 cumulative GPA or higher.
- Dismissal for poor scholarship. If the student fails to earn a 2.8 cumulative GPA, they will be dismissed from the university.

Admission on Probation (Paralegal Studies Certificate Students)

Students who do not meet the 2.5 minimum undergraduate GPA requirement for the post-baccalaureate certificate programs may be admitted on probation if the admission committee agrees that the student has the potential for success in paralegal studies at this level. These students will have the opportunity to demonstrate their abilities by achieving a 2.5 minimum GPA in the first two sessions of study. At that point, their files will be reviewed for a change in status to unconditional admission or dismissal for poor scholarship.

Auditing a Course

All degree and non-degree seeking students auditing a course must first receive approval from the SCPS Assistant Dean. Course auditing will be allowed only in rare and special circumstances. Students auditing a course will be assessed tuition on a per-credit basis at 50% of the normal tuition rate.

Students must complete the University's undergraduate audit request form, email it to the Assistant Dean, and on approval it will be submitted to the Office of Registration & Records. This form is found on the Registration & Records website here: https://www.luc.edu/regrec/aboutus/forms/

The completed form must be received by the SCPS Dean's office before the audit deadline as stated on the academic calendar on the SCPS website. SCPS will not approve a request received after the deadline. Please note: Paralegal (PLST) courses may not be audited.

All university policies on auditing undergraduate courses apply and can be found in the academic catalog.

Class Attendance / Student Accountability

Expectations of Students

Students are expected to treat their classroom and SCPS community obligations as they would treat any serious professional engagement. In addition to adhering to the university's undergraduate attendance policy, students must follow the SCPS attendance guidelines outlined in the SCPS policy catalog. The following expectations apply to all students within the SCPS community at all times:

- Students are expected to behave ethically and respectfully within the SCPS community, and according to the Academic Integrity policy and Community Standards as found in the Academic Catalog.
- Students must use and check Loyola email and Sakai for all correspondence with SCPS faculty and staff.
- Students are responsible for reviewing and understanding University and SCPS policies and calendars.
- Students should meet regularly with their academic advisor

Students should also adhere to the following expectations before and during their courses:

Before classes:

- Complete Mastering Learning Tools (new degree-seeking students).
- Attend the SCPS orientation, when applicable.
- Purchase books or obtain course materials prior to the start of the course.
- Review the syllabus carefully prior to the start of the course and contact instructor with questions.
- Enroll prior to the session/term start date. Late enrollment is highly discouraged. Instructors are not required to make accommodations or accept late assignments due to late enrollment.
- Students who have accessibility needs must work with the Student Accessibility Center (SAC) prior to the start of class. Students should start the process with SAC at least two months prior to the start of the 8-week session.

During Classes:

- Adhere to deadlines and timetables established by the instructor and submit work on time. Any variations/conflicts must be communicated in advance and approved by the instructor.
- Proactively communicate with instructors and academic advisor about any concerns, difficulties, or scheduling conflicts or missed sessions of the course.
- Prepare thoroughly for each session in accordance with the instructor's request.
- Arrive promptly for the start and remain until the end of each synchronous class meeting.
- Participate fully and constructively in all class activities and discussions.
- Display appropriate courtesy to all involved in the class sessions. Courteous behavior specifically entails communicating in a manner that respects, and is sensitive to, the cultural, religious, sexual, and other individual differences in the University community.
- Provide constructive feedback to faculty members regarding their performance, through the university's formal course evaluation, administered at the end of each 8-week session.

Class Attendance/Student Accountability

Due to the intensive nature of each course, students' success in SCPS courses will heavily depend on their attendance and participation in the course. The choice to pursue a degree or certificate will likely involve adjusting one's schedule to avoid conflicts whenever possible. The value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor and will be stated in the syllabus.

Courses may include both synchronous and asynchronous components. Asynchronous coursework is independent coursework students complete within a certain time frame, but students are not required to be online at a specific day or time. Synchronous coursework refers to online meetings that occur at a designated date and time as set by the course instructor. Required synchronous meetings will be communicated in advance of a student registering for a course and are included within the SCPS course schedule and are held in the evening (6-9pm, CST) or on Saturdays (9am-Noon, CST).

Students are expected to be present for every required synchronous meeting of the course. If they are unable to attend a class meeting or if they will be late for a class, they must notify the instructor in advance of the absence. Requests for missed class meetings should only occur for circumstances that are truly unavoidable and students are responsible for reaching out to their instructor in advance of the start of the session.

Each course's instructor reserves the right to make judgment on accepting and/or making up assignments missed because of class absence for a required meeting. That policy will be clearly expressed in the course syllabus. Unexcused absences may result in failing the course. Please understand, if an instructor allows an excused absence, even with an approved modification to the required meetings for a course, any change to the required components of a course will impact the student's experience and can impact a student's learning and performance.

Understanding When a Class Begins

All classes start with the start of the 8-week session and not when the first required meeting date is scheduled for the course. Any required meeting a class has, whether it is a synchronous meeting for an online class or an on-campus meeting, will be clearly listed within the SCPS course schedule for the semester.

Non-Participation in Class and Withdrawal

Students must withdraw from a course within LOCUS to be considered withdrawn. Non-participation in a class, without formal withdrawal in LOCUS, does not constitute a withdrawal from a course. Students who do not withdraw from a course in LOCUS will have their grade computed on the basis of the work completed and may receive an 'F' grade.

Paralegal Studies Attendance and Participation Policy

Regular class attendance is required for Paralegal Studies (PLST) classes. Absences in PLST courses are excused only for serious, unavoidable situations, and you are expected to notify the instructor in advance of your absence. Absences from classes rescheduled because of public holidays are not excused, as these dates are provided at the time of registration. If you stop attending a class but do not officially withdraw from it, your grade will be computed on the basis of what work you did complete; you may receive an F if that is the resulting grade.

This accelerated program of paralegal studies requires a heavy commitment of time and energy. We are all balancing personal and professional demands. Our responsibility to you is specifically to prepare you for a paralegal career. When you miss a class, you lose the benefit of our knowledge and experience in the legal workplace, as well as our personal interest in your progress. Your absence may also be unfair to a group project.

In particular, your absence from class generally cannot be excused because of your job responsibilities. You are expected to register for a reasonable course load in light of other demands on your time.

Your success in this program will depend heavily on your attendance and participation in the classroom. The instructor has the discretion to decide whether to accept a late assignment or allow a makeup assignment, and if so to impose a deduction in the grade for that assignment. Also, the value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor.

Any student who has more than two absences, excused or unexcused, in a single 8-week session course will not be allowed to continue in that course without the Director's permission. The student will receive a final course grade calculated on the basis of zero scores on all subsequent tests and assignments.

The student must petition the Director for this permission in writing within three business days of the third absence. Relevant factors will include the student's performance in the class, the teacher's assessment of the student's ability to master the missed classes and assignments, and the reason for the absences. As noted above, absences from classes rescheduled because of holidays are not excused, as these dates are provided at the time of registration.

If some of the student's absences are excused, the student will have the opportunity to withdraw from the course, as long as the deadline for dropping a course has not yet passed. The student's grade will then be recorded as W. However, the student is still responsible for the course tuition in accordance with the University's official withdrawal schedule.

Please note that teachers may continue to use class attendance as part of the grading criteria. Also, it is at the teacher's discretion to consider absent a student who arrives late to class or leaves early.

If you cannot attend a class, you are expected to make arrangements to obtain notes and assignments from other students, and to submit any assignments due by the appropriate deadline. It is not appropriate to expect your teacher to give you his or her class notes; this would be unfair to the students who attended the class. Nor is it appropriate to ask the teacher to review or summarize the class for you. Of course, you may ask the teacher questions after you have reviewed the material.

Students who miss exams or quizzes in a PLST course must immediately send a message requesting a makeup to both the instructor and the Director. The makeup will be allowed only on agreement of the Director and instructor that a serious, unavoidable situation (such as illness, family emergencies, or religious holidays) caused the absence. The Director and instructor have the discretion to impose a deduction in the grade for that exam or quiz.

The makeup exam or quiz must then be taken as soon as possible, before the next class meeting, and during regular office hours, 8:30 am to 5 pm. You will be expected to rearrange your work or personal schedule to accommodate the makeup. To schedule a makeup exam or quiz, please contact the Institute Office, 312-915-6820.

You may be asked to provide documentation of the reason for your absence before you will be allowed to make up any quiz or exam. A request to make up more than one missed quiz or exam within two 8-week sessions generally will not be approved by the Director.

Course Registration

Students register for courses via the University's LOCUS system. Registering for a course is the only way to guarantee a place in a course. Registration after the session start date will incur a late registration fee. SCPS does not operate waitlists for any of its courses.

When registration opens for a semester, SCPS students are advised to enroll in all sessions within that semester. For example, for fall and spring 16-week semesters, students should enroll in both 8-week session I and session II. Students who do not enroll in all available sessions may encounter billing and/or financial aid issues for the semester.

A student must be registered in a course before attending any classes or participating in the course. No student may register for a course after the late registration period.

Late Enrollments

Students may enroll in a course after it has begun only during the add/drop period in Week 1 of each 8-week session during the fall and spring semesters. The add/drop period for summer session courses are shorter, about 1-2 days. Late registration fees apply to enrollment completed during the add/drop period. Students should consult the academic calendar on the SCPS website to learn the dates for add/drop.

Students are strongly discouraged from enrolling after the start of an 8-week session as late enrollment may lead to missed class sessions and assignments. Students are responsible for informing instructors immediately of their late enrollment. Instructors are not required to make accommodations or accept late assignments due to late enrollment. Additionally, students should be aware that it takes up to 24 hours for a student to be uploaded into a course's Sakai site after enrollment in LOCUS.

Directed Study

A directed study course is a version of an existing course run with fewer than 6 students.

Students in a directed study course must provide evidence of learning as in a regular course, i.e., they must meet learning outcomes and the minimum expectation for meetings and/or interactions with the instructor, depending on the number of credits needed. The course format and time frame may be variable and will be determined between the student and the instructor.

Students will pay regular tuition per credit for a directed study course.

Paralegal Studies (PLST) courses are not offered in a directed study format.

Double Dipping

Students are permitted to complete multiple programs (i.e. certificates, majors), even if program requirements overlap.

The exception to this is for students completing an individualized concentration (typically linked to the BA in Applied Studies). Students completing an individualized concentration may not double dip. Meaning courses that satisfy Core or other program requirements cannot be applied toward your individualized concentration.

For students completing multiple programs, conferral of your degree or certificate will not be done until program requirements for all programs have been completed. Please understand, while certificate requirements may be completed prior to finishing degree requirements, we are not able confer the certificate at an earlier point in a student's time at Loyola. Conferral for all programs is completed at the same time.

Full Time Status / Registration Limits

To be considered a full-time student, SCPS students must be enrolled for 12 credit hours per 16-week semester.

Students are not required to meet or maintain full-time status to be in good standing. However, some financial aid (student loans and scholarships), employer tuition reimbursement policies, and other situations may require full-time status in an educational program. It is recommended that students confirm the number of courses they are enrolled in for a given semester with Financial Aid to adjust their budgets accordingly.

SCPS students, except for paralegal certificate-seeking students, may register for no more than 9 credit hours in any one 8-week session. Students wanting to take more than the 9 credit hours in any 8-week session must submit the Session Over Limit Registration Appeal form (https://sites.google.com/view/scps-share-site/scps-students/student-forms/?authuser=0).

Paralegal Studies Certificate Registration Limit

Paralegal students may register for no more than 6 semester hours of courses (three 2-hour courses) in any one 8-week session. Certificate students must be enrolled half-time (three 2-hour courses) in any semester in which they obtain financial aid; the Fall I and Fall II sessions together are considered the Fall Semester, and the Spring I and Spring II sessions together the Spring Semester. The Summer Session is considered a separate semester.

Grade and Grading Policies

The University uses letter grades and plus/minus indicators to indicate the quality of a student's achievement in a course. The chart below shows the standardized grading scale used by all SCPS faculty for converting numerical scores into letter grades. No "A+" or "D-" grade is available.

Grade	Grade Points
A	4.0
A-	3.67
B+	3.33
B	3.0
B-	2.67
C+	2.33
C	2.0
C-	1.67
D+	1.33
D	1.0
F	0

Minimum Grade Requirements

Minimum grades are also required in certain courses, as noted in the chart below:

*CPST 200 - Minimum required grade of "**P**"*

*CPST 201, CPST 397, and UCWR 110 - Minimum required grade of "**C-**"*

*Classes taken for LUC Core or IAI - Minimum required grade of "**D**"*

*Major Classes - Minimum Required grade of "**C-**"*

*Certificate or Concentration Classes - Minimum required grade of "**C-**"*

*If the student's grade is NP, the student must repeat the class and earn a passing (P) grade.

No Record (NR) Grade

The notation "NR" is assigned in LOCUS for any course in which the student is enrolled but has not participated. Criteria for determining participation includes, but is not limited to:

- Physically attending a class where there is an opportunity for direct interaction between the instructor and students.
- Submitting an academic assignment.
- Taking an exam, an interactive tutorial, or computer-assisted instruction.
- Attending a study group that is assigned by the institution.
- Participating in an online discussion about academic matters.
- Initiating contact with a faculty member to ask a question or discuss a matter related to the course.
- For online or blended course, participation and attendance is defined as any class activity, including logging into the course on Sakai and accessing any of the course materials.

Pass/No-Pass Option

Students may take a course on a pass (P)/no pass (NP) basis. SCPS students adhere to university policy and students should review the policy and process found in the Academic Catalog. The pass/no pass option is not available for program required courses (major, certificate, etc.)

CPST 200 Introduction to Degree Completion is graded P/NP and is counted in the total attempted credit hours.

Students should be aware that the appearance of "P" and "NP" grades on their transcripts may have an adverse effect on transferring to other schools and acceptance by graduate or professional schools.

Incomplete (I) Grade

SCPS expects students to complete all coursework by the end of the session or term during which a course is taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of Incomplete (I) at the end of the session/term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following SCPS policies.

A grade of Incomplete for a course is assigned at the instructor's discretion, when justified by unexpected, disruptive situations or circumstances beyond the student's control. These may include personal illness or injury, a death in the immediate family, a natural disaster, or other such emergency. Documentation may be required, at the instructor's discretion.

Incomplete requests should only be submitted where a student has completed a significant portion of the course, and required coursework, and circumstances prevent the student from finishing remaining requirements by the end of the class. For example, if a student has been actively participating in and keeping up with coursework and they encounter life circumstances within the final few weeks of a course that prevents them from completing successfully, they should contact the instructor to request an incomplete. This request is not meant to be used in those situations where students have been non-participatory throughout the course and need additional time to make up missed assignments from the bulk of the course. In those cases, the student should contact their primary academic advisor to discuss their options.

For any incomplete request, the student must initiate the request by submitting the Incomplete form, found on the Registration and Records website, to the instructor. The instructor will then complete and submit the form according to its instructions and, if approved, enter the grade of Incomplete for the student in LOCUS.

The student must comply with all conditions specified on the form. The latest deadline permitted for submitting the missing work is six weeks after the start of the subsequent semester, but the instructor may specify an earlier due date. If the student does not submit the missing work by the deadline, the instructor enters a grade based on the work completed.

Late and Extra Credit Assignments

Instructors include an explanation of the grading criteria for each course on the syllabus. Late assignments (if accepted) and exams or quizzes taken late (if permitted) may be marked down, at the instructor's discretion.

If an instructor chooses to offer extra credit assignments (there is no obligation to do so), they will be noted on the course syllabus distributed at the beginning of the course. Students should not expect to make up poor grades entirely through extra credit assignments.

Graduation / Commencement

The University awards degrees and certificates four times within each academic year, after every semester: fall semester (December), J-term(January), spring semester (May), and summer semester (August).

Prospective graduates must submit a graduation application in LOCUS. Deadlines for the LOCUS undergraduate application are as follows:

- Fall graduation: March 1
- Spring graduation: October 1
- Summer graduation: October 1
- J-term graduation: November 1

All financial obligations to the University must be satisfied before the diploma or certificate can be mailed.

Laudatory Status/Honors

Students with transfer credit applying toward their degree requirements must complete a minimum of 60 graded Loyola credit hours (excluding pass-no pass hours) to be eligible for academic honors. The computation of a student's Loyola cumulative GPA is based on the student's entire academic career at Loyola.

Laudatory honors will be determined per the qualifications noted in the Academic Catalog.

Paralegal Studies Certificate Graduates

Earning a certificate does not make a graduate a "certified paralegal." No school can award the status of "certified paralegal," which is a designation given only by professional associations (such as NALA and NFPA) to persons who meet their qualifications. Employers who

ask for “certified paralegals” are almost always seeking paralegals with certificates; we know of no exceptions to this practice locally.

Commencement

The School of Continuing and Professional Studies has a commencement ceremony each year at the end of the spring semester in May on the Lake Shore Campus. Information can be found online at the University’s Commencement website: https://www.luc.edu/commencement/

The May Commencement ceremony includes graduates from the fall, spring, and summer semesters within that academic year.

Honor Societies

Alpha Sigma Lambda (ASL)

Invitations are sent via email in October/November of each year and ASL Inductees are recognized at an annual induction ceremony hosted by SCPS in December.

Alpha Sigma Nu (ASN)

Alpha Sigma Nu inductees rank in the top 15%, academically, of students in the School of Continuing & Professional Studies. Loyola University Chicago inducts fewer than 5% of its students each year, so it considers Alpha Sigma Nu to be one of the highest honors the University can bestow.

Eligible students are sent an invitation to apply and must meet the following criteria:

- Actively enrolled at time of induction
- Undergraduate students must be juniors or seniors at the time of induction.
- Undergraduate transfers must have completed 1-1/2 semesters at a Jesuit institution.
- Graduate students must have completed 1/2 of their credit requirements at the time of induction
- Must be in the top 15% of their class
- Demonstrated participation in service activities

Lambda Epsilon Chi (LEX)

Lambda Epsilon Chi (LEX) is the National Honor Society in Paralegal/Legal Assistant Studies sponsored by the American Association for Paralegal Education.

Paralegal students who have completed two-thirds of the program requirements toward their original certificate or degree at Loyola are eligible for induction into LEX if they demonstrate “superior academic performance.” The Institute faculty has defined this standard as a minimum of a 3.7 cumulative grade point average and placement in the top 20% of eligible students. Two-thirds of the program requirements is calculated as 16 semester hours of PLST courses.

Only students working on their original paralegal certificates or degrees at Loyola will be considered for LEX membership, and no more than the first 28 hours of PLST courses will be considered in determining the student’s GPA for this purpose. Also, only Institute PLST courses will be included in this GPA calculation.

LEX inductees are recognized at an annual induction ceremony hosted by SCPS in December.

SCPS Dean’s List

For the fall and spring semesters, students who complete 12 credit hours during the semester and achieved a minimum semester GPA of 3.7 or higher are named to the SCPS Dean’s List at the end of the semester.

Leave of Absence

Stop-Out Definition

A stop-out student is a student who has not enrolled for one semester/term or more. Students who do not enroll in a single 8-week session within the semester but enroll in the other 8-week session will not be considered a stop-out student.

Leave of Absence Policy

We recommend that students remain continuously enrolled and complete courses within the time frame set within your initial advising appointment. However, we understand circumstances may require you to step away from classes.

Students who need to stop-out of enrollment for anywhere from one semester up to one year, may request a leave of absence. Students should request a leave of absence before the start of the fall or spring semester, and no later than the start of the 8-week second session for the semester. Students choosing not to enroll in the summer semester do not need to request a leave of absence.

Students must submit the leave of absence form to their primary academic advisor to request a leave.

Paralegal Studies Certificate Students Time to Completion

Paralegal post-baccalaureate certificate students have up to three (3) calendar years to complete all program requirements and should consult with their advisor when making any adjustments to their schedule.

Returning from Leave/Extending Leave

Students on leave should contact their primary academic advisor when they are prepared to return to classes. Ideally, students should allow at least one month prior to the start of the semester to prepare for a return from leave.

If students need to extend their leave of absence, they should contact their primary academic advisor with this request. Extensions can only be provided to students who have requested a leave of less than one year, or three consecutive semesters.

Discontinuation & Readmission

Students who do not return from a leave of absence will be withdrawn from the university.

Withdrawn students may apply for admission to SCPS if they wish to return to classes. Students will be held to the degree requirements of the catalog year in which they are readmitted.

Applicants for readmission who have been dropped from Loyola for poor scholarship may apply for readmission only after complying with all terms outlined in their dismissal letter.

Applicants for readmission who have been dropped from Loyola for disciplinary reasons must have their applications for readmission reviewed by the Dean of Students Office. If the Dean approves

readmission, the application will be reviewed according to the regulations stated above.

Non-Traditional Credit

Non-traditional credit is credit earned by demonstrating knowledge gained through experience, either personal or professional. Adult students, in particular, often have a reservoir of college-level learning gained through professional and personal accomplishments that they can use to earn non-traditional credit toward select SCPS program requirements.

Students may apply up to 36 non-traditional credit hours to the completion of their undergraduate degree with SCPS.

Non-Traditional Credit Parameters

Non-traditional credits may not be applied toward the mission-specific courses, SCPS school requirements, or to the Loyola residency requirement. Non-traditional credit does not factor into the Loyola GPA.

- Non-traditional credit may not be applied toward mission-specific requirements (THEO or PHIL courses) or school requirements (CPST 200, CPST 201, CPST 397, and UCWR 110).
- Non-traditional credit may be applied to no more than four (4) courses toward major requirements. If transfer credit is applied toward major requirements, the availability of non-traditional credit options toward the major may be reduced as half of the major must be completed with Loyola academic credit. (BA Management majors should refer to the major specific policy within the transfer credit policy section of the catalog.)
- Non-traditional credit may be applied to no more than two (2) courses of an 18 credit hour certificate or concentration
- Only select CLEP exams can complete specific CORE requirements

Accepted Forms of Non-Traditional Credit

SCPS has identified the following as accepted forms of non-traditional credit:

- Credit by examination (CLEP/DSST)
- American Council on Education (ACE) evaluated credit
- Military Training/Education (CCAF/JST)
- Police Academy Training

Credit by Examination (CLEP/DSST)

Students may take CLEP and/or DSST examinations only if they:

- have not previously completed, failed, or received credit from Loyola University Chicago (transfer or otherwise) in a comparable or more advanced course in the specific examination area
- will not receive comparable credit in the CLEP examination area in the same term the examination is taken or in a subsequent term.

Students must receive a passing score on a CLEP or DSST exams approved by the University to count for college-level credit:

- CLEP Exam List
- DSST Exam List

American Council on Education (ACE)

The American Council on Education (ACE) evaluates 35,000+ workplace, military and non-collegiate learning experiences and training programs for college credit. Depending on the program or experience completed and approved by ACE, students may apply those credits to major and/or general elective hours, if applicable.

- **For work already completed**, students can move forward with ordering the transcript from ACE. Once submitted, your transcript will be reviewed to determine how the credit will transfer.
- If a student is considering taking an exam or course that has been reviewed by ACE, and they **haven't yet completed the work**, they should work with their primary academic advisor first to determine if the credit will be accepted and how it may apply toward requirements.

Students who believe they have completed an evaluated program should review the ACE National Guide.

Year Up

The School of Continuing and Professional Studies is a partner with Year Up Chicago. Year Up courses have been reviewed by the American Council on Education (ACE). Students who have completed coursework through Year Up should submit an official ACE transcript. All Year Up courses will transfer as general elective credit and go toward the 120 credit hours students need to complete their bachelor's degree with Loyola.

Military Training/Education

Students who have completed military training should order their military transcript (both JST And CCAF) through the American Council on Education (ACE).

Police Training

Students who have completed the education provided by the Chicago Police Department (CPD) Police Academy will be awarded 20 credit hours to be applied as general elective credits.

Students must submit a copy of their CPD Academic certificate of completion to their academic advisor. This certificate of completion will also be cross-checked against the Illinois Law Enforcement Training and Standards Board database.

Paralegal Studies Instructional Hours

Most PLST courses award 2 semester hours of credit. The ABA Guidelines for the Approval of Paralegal Education Programs require that a 2-s.h. course include 25 instructional hours. Therefore, in addition to the 24 hours of classroom instruction (class meetings three hours each week for eight weeks), each in-person PLST course will include an additional hour of instruction, determined at the teacher's discretion. For example, a teacher may schedule a review session before an exam, a Forums (discussion board) posting assignment on Sakai, or something similar. Teachers will include this extra hour of instruction in their syllabi each session.

Repeated Courses

SCPS students must adhere to the repeated course policy found in the Academic Standards and Regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

CPST 200: Admission on Probation

Students who are admitted on probation to SCPS must successfully pass CPST 200 in their first session. Students who receive an 'NP' grade will be dismissed from the program. Students on probation who withdraw from CPST 200 in their first session will be allowed to enroll in a subsequent session. Students on probation who withdraw from CPST 200 in their second attempt will be dismissed from the program.

CPST 200: Unconditional Admission

Students who are admitted unconditionally to SCPS must complete CPST 200 in their first session. Students who receive an 'NP' grade in their first attempt will be required to repeat the course in their next enrolled session and will not be permitted to enroll in any other courses unless permission is granted from the student's advisor.

Incomplete grades will not be granted for students taking the class for the second time. Students who do not pass CPST 200 on the second attempt will be dismissed from the program.

Residency Requirement

Degree-seeking students must take their final, uninterrupted 45 credit hours, or a minimum of 60 total credit hours, in residence at Loyola University Chicago. Residency requirements also apply to majors: half of the credits applied toward the major must be earned at Loyola. (BA Management majors should refer to the management major specific policy within the transfer credit policy section of the catalog.)

For certificates consisting of 18 credit hours, up to 6 credits may be accepted in transfer or completed via non-traditional credit, and all other required credits must be earned at Loyola.

The following certificates must be completed entirely with Loyola academic credit:

- Computer Science certificate
- New Media Communication certificate. Students may apply transfer credit toward COMM 175 but an additional COMM course must be taken to earn the 9 total credit hours to complete the certificate.

The following certificates allow the application of 1 course (3 credit hours) in transfer credit:

- Cybersecurity Technology Management certificate
- Introduction to Data Science (credit must be from work completed within the last 5 years)
- User Experience Design certificate (credit must be from work completed within the last 5 years)
- Web Design and Development certificate (credit must be from work completed within the last 5 years)

There is no residency requirement for the transfer-oriented individualized concentration which requires approval by the Assistant Dean or designee.

Students admitted to a SCPS certificate program can apply courses/credit completed as part of the certificate program toward a future SCPS degree program, where applicable.

Transfer Credit

Loyola SCPS accepts transfer credit earned from regionally accredited institutions. We can accept up to 64 credit hours across all two-year institutions (community colleges), and an unlimited number of credit hours from four-year universities.

Students who have completed either an A.A., A.S., or General Education Core Curriculum will have met Loyola's Core Curriculum requirements, with the exception of mission-specific courses.

Loyola is a receiving institution in the Illinois Articulation Initiative program for awarding transfer credit. Students who have completed 30 or more transfer credits may follow either the Illinois General Education curriculum or the Loyola CORE requirements to satisfy general education requirements. Students with less than 30 will follow the CORE.

Transfer courses that are remedial, not college level, may not be used to satisfy degree requirements and will not transfer.

Grade Requirements

College-level credit courses from regionally accredited institutions will be accepted in SCPS if the student earned a passing grade. Courses received in transfer must also adhere to the grade requirements, found under Grade and Grading Policies section, in order to satisfy program requirements. When transfer courses do not meet the grade requirements for a program, a student may need to repeat the course at LUC.

Enrolling in Courses Elsewhere

Any coursework taken after a student starts courses with Loyola will not be considered for transfer unless the student submits an appeal and receives approval before enrolling in the course(s). Courses taken elsewhere must meet the requirements outlined in the Academic Catalog.

Certificates and Transfer Credit

For certificates consisting of 18 credit hours, up to 6 credits may be accepted in transfer or completed via non-traditional credit, and all other required credits must be earned at Loyola.

The following certificates must be completed entirely with Loyola academic credit:

- Computer Science certificate
- New Media Communication certificate.

Students may apply transfer credit toward COMM 175 but an additional COMM course must be taken to earn the 9 total credit hours to complete the certificate.

The following certificates allow the application of 1 course (3 credit hours) in transfer credit:

- Cybersecurity Technology Management certificate
- Introduction to Data Science (credit must be from work completed within the last 5 years)
- User Experience Design certificate (credit must be from work completed within the last 5 years)
- Web Design and Development certificate (credit must be from work completed within the last 5 years)

Management BA Transfer Credit Policy

SCPS students completing a Management BA are limited in the number of business-related courses that can either be taken at Loyola or transferred from another institution. These limitations are set in response to the accreditation requirements determined by the Association to Advance Collegiate Schools of Business (AACSB). A business-related course is a course where course content includes:

- Accounting
- Economics
- Finance
- Management
- Marketing
- Quantitative methods
- Legal studies
- Management information systems

No more than 25% of a BA Management student's total program may include business-related courses. The total degree requirement for a BA student is 120 credit hours, which means BA Management students may not transfer or take at Loyola more than a combined 30 credit hours of business-related courses. Students should work with their primary academic advisor to understand how this impacts their program requirements.

Paralegal Studies Certificate Transfer Credit

Transfer credit may be available for courses taken at another paralegal program, or at an ABA-accredited law school, before applying to the Institute. The courses must be comparable to specific Institute paralegal courses, including instruction in practical paralegal skills.

Transfer credit towards the post-baccalaureate paralegal certificate is limited to 6 semester hours. University policy requires that the institution offering the paralegal program be regionally accredited and that the student have earned a grade of C- or higher. The student must submit an official transcript confirming the grade and may be required to provide documentation of the course content. The Director has the discretion to determine whether transfer credit will be awarded.

Students currently enrolled in the Institute will not receive transfer credit for courses taken elsewhere except with the advance approval of the Director, which is granted only in unusual situations and at the Director's discretion.

Special Note: Paralegal certificate students with transfer credit will have access to all career assistance services at the Institute once they have completed two-thirds of their required credit hours toward the Loyola paralegal certificate.

Withdrawal / Registration Changes

A grade of "W" indicates official withdrawal from a course during the withdrawal period (see academic calendar on SCPS website for dates). The grade of "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average.

The financial impact of changes after the late/change registration period is determined in accordance with the University's withdrawal schedule, available on the Bursar's website. The website provides the official schedule for each term, but generally, the schedule for fall and spring semester 8-week sessions is as follows:

First week of session - *100% of tuition credit*

Second week of session - *80% of tuition credit*

Third week of session - *40% of tuition credit*

Fourth week of session and after - *0% of tuition credit*

The effective date of withdrawal is determined by the date the course is dropped in LOCUS, not by class attendance. In an online or blended course, participation and attendance are defined as any class activity, including logging into the course on Sakai and accessing any of the course materials. A student who does not officially withdraw from a course will receive a grade based only on the work completed and will remain responsible for all charges for that course.

Students may not withdraw after the withdrawal deadline and, after the deadline date, will be assigned the grade earned based on work completed. For students dealing with extenuating circumstances preventing participation in a course, they may submit an appeal to change for change in academic record.

Students may work with their primary academic advisor to learn more about the appeal process and find further information in the university's academic catalog under Academic Appeals (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

The Financial Aid Office is required to recalculate financial aid eligibility for students who withdraw from classes before 60% of the course has been completed. This includes a recalculation for withdrawals where the effective date of withdrawal is adjusted after an approved appeal.

Writing Requirement

Upon admission, degree-seeking students who haven't satisfied UCWR 110 Writing Responsibly with either transfer credit or prior Loyola academic credit, must complete the Writing Placement Assessment (WPA). Students will be sent an email with further details about completing the WPA after admission.

Understanding the Writing Placement Assessment (WPA) Score

- If a student tests at 110 they will take UCWR 110 with Loyola in the next session available.
- If a student tests at 100 they take ENGL 100 (directed study) with Loyola in the next available session followed by UCWR 110 with Loyola in the next available session.
- If a student tests at 103 they take ENGL 103 (directed study) with Loyola in the next available session followed by UCWR 110 with Loyola in the next available session.
- If a student tests at 219 they take UCWR 109 (directed study) and UCWR 110 with Loyola concurrently in the next available session.

Applied Criminal Justice Leadership (ACJL)

ACJL 310 Organizational Leadership in Criminal Justice (3 Credit Hours)
This course provides an introduction to the study of criminal justice organizations and leadership practices. It includes a review of leadership styles, budgeting, communication with members, personnel problems, maintaining organizational accountability, promoting and responding to internal and externally-imposed reforms, and other leadership challenges. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss leadership challenges in criminal justice organizations and institutions; Describe best leadership practices for continuing improvement and effectiveness; Research and review the academic literature associated with police leadership and management; Critically assess the strengths and weaknesses of the major theories of police leadership and management

ACJL 320 Ethics, Justice, Leadership (3 Credit Hours)
Study of ethical obligations of criminal justice personnel and the meaning of justice, with emphasis on law enforcement and corrections components; includes management strategies and accountability for ensuring ethical conduct, civilian review and discipline, civil liability, and importance of leadership in promoting and maintain an ethical and just work environment. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Apply basic principles of moral theory and concepts of justice to ethical issues, moral dilemmas, and other challenges facing actors working within the criminal justice system; Use methods and strategies for effective leadership skills to promote an ethical environment in criminal justice organizations; Foster an ethical organizational environment, including ethics training, development of codes of ethics and rules of professional responsibility; Adopt methods of promoting accountability, including technological and civilian review of accountability systems, and effective disciplinary mechanisms; Identify strategies for investigating systemic criminal justice system misconduct

ACJL 330 Community Policing in the 21st Century (3 Credit Hours)
This course examines the history and development of police community relations and its importance for crime control. Topics covered include community policing, problem oriented policing, and the effect of aggressive patrol strategies on community relations. The recommendations of the President's Task Force on 21st Century Policing are also examined. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Examine the history and development of effective police community relations and its importance for crime control; Recognize the role of racial, class, and cultural identities in a diverse American society and the effect of racial profiling and unconscious bias on community relations; Describe community policing, problem-solving policing, and other emerging strategies; Research and review the academic literature associated with the study of community policing; Critically assess the strengths and weaknesses of the major theories of community policing; Discuss the recommendations of the President's Task Force on 21st Century Policing, including the adoption of internal and external procedural justice, a guardian culture, and less than lethal force standards

ACJL 340 Effective Communication in Criminal Justice (3 Credit Hours)
Effective written and oral communication for CJ personnel; includes grammar, spelling, punctuation, chronological articulation, and writing style in investigative reports and other documentation, public speaking, active listening skills, conducting interviews, providing oral witness testimony in criminal prosecutions, and managing media relations and communications. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Develop effective written and oral communication for rank and file and supervisory criminal justice personnel; Use proper grammar, spelling, punctuation, chronological articulation, and writing style in investigative notes, reports, and other documentation; Practice effective public speaking; Employ active listening skills and positive personal interactions with citizens; Practice conducting interviews, providing oral witness testimony in criminal prosecutions, and managing media relations and communications

ACJL 350 Conflict Management and Communication (3 Credit Hours)
Study of challenges confronting police and correctional personnel in conflict situations arising from order maintenance and other forms of social control; the role of systemic social problems such as mental illness, family violence, and substance abuse in conflict situations; strategies and best practices for violence avoidance and de-escalation. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss the challenges confronting police and correctional personnel in conflict situations arising from order maintenance, arrests, supervision of offenders, and other forms of social control; Describe the role of systemic social problems, mental illness, family violence, elder abuse and neglect, and substance and alcohol abuse in conflict situations; Identify strategies and best practices for violence avoidance and de-escalation; Apply theories of how conflict happens; Practice the essential skills of effective listening, negotiating, mediating, and leading others to resolve conflicts

ACJL 360 Cyber-Crime Detection and Investigation (3 Credit Hours)
Reviews computer-based criminal activities and criminal investigative methods used for investigation, apprehension, and prevention; includes hacking, identity theft, bitcoins, stalking, human trafficking, and other forms of computer fraud and crime; reviews digital security methods, cell phone tracking, social media, and other means of investigating such crimes. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Describe contemporary, computer-based criminal activities, including hacking, identity theft, bitcoins, stalking, human trafficking, and other forms of computer fraud and crime; Identify modern criminal investigative methods used for investigation, apprehension, and prevention; Evaluate digital security methods, cell phone tracking, social media, and other means of investigating such crimes

ACJL 370 Crime Analysis (3 Credit Hours)
This course provides an overview of the analytical methods used by criminal justice agencies including crime analysis, mapping, and program evaluation. The class will focus on best practices and the application of current technology. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss issues in crime analysis and crime mapping; Critique current practices; Identify technologies used in crime analysis; Describe the techniques of crime analysis and crime mapping and how they are practiced in everyday policing; Apply social science research methods and data analysis to crime analysis

ACJL 380 Investigation Management (3 Credit Hours)
A review of best practices in the management of investigative personnel, resources, and strategies in major and routine criminal investigation including proactive and reactive tactics for crimes against property, persons, vice, and narcotics. Traditional versus intelligence-led policing, COMPSTAT, and state versus federal investigations are also covered. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Describe best practices in management of investigatory personnel, resources, and strategies in major and routine criminal investigation; Assess proactive and reactive tactics for crimes against property, persons, and vice and narcotics, traditional versus intelligence-led policing, COMPSTAT, and state versus federal investigations; Research and analyze the academic literature associated with managing criminal investigations; Critically assess the practices used to manage criminal investigations

ACJL 385 Advanced Criminal Procedure (3 Credit Hours)
This course reviews basic 4th Amendment search and seizure law, including exceptions to the general warrant requirement, and exceptions to the exclusionary rule. It proceeds to study individual and agency liability for excessive force by law enforcement and correctional officers, unauthorized eavesdropping, digital information gathering, and related topics. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Define the legal principles governing law enforcement emanating from the 4th, 5th, and 6th Amendments to the Constitution of the US; Describe the manner in which those principles have been derived from both the text and the interpretations of those constitutional amendments; Practice the language of criminal law practitioners and others in the courthouse "workgroup"; Identify legal issues arising from law enforcement criminal investigations and methods in different factual circumstances; Apply constitutional law principles for the resolution of criminal procedure issues

ACJL 395 Special Topics in Criminal Justice Leadership (3 Credit Hours)
This course focusses on different relevant, special topics in criminal justice. These include criminal profiling, terrorism, private security, new constitutional developments in search and seizure law, gang intelligence, militarization of police, and other timely topics. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Students will learn about a specific, timely topic critical to contemporary criminal justice functions

Continuing Professional Studies (CPST)

CPST 165 Special Topics (1-3 Credit Hours)
Course titles and content vary from term to term. Permission is required to enroll.

CPST 195 Special Topics in Management (3 Credit Hours)
Introductory course focusing on specialized areas in management leadership.
Outcomes:
The student will become familiar with the practices of the specific discipline under each subheading, as well as the technical and theoretical means to accomplish the goals of each topic

CPST 200 Introduction to Degree Completion (3 Credit Hours)
Enrollment is restricted to SCPS degree students only. CPST 200 exists to give newly admitted adult students a chance to ease themselves back into the academic environment while highlighting all of the tools and services available through the university. Improved academic writing through use of multiple drafts.
Outcomes:
Exposure to/familiarity with LUC resources

CPST 201 Civic Identity and Development (3 Credit Hours)
Pre-requisites: CPST 200; Co-requisite: UCWR 110; Enrollment is restricted to students in the School of Continuing and Professional Studies
In this course, students will examine their interconnected identities as engaged professionals in their communities using a variety of frameworks. They will learn to leverage the assets of their communities to enact positive change while also leveraging their own assets to grow as individuals. This course will also prepare students for the design and execution of the SCPS capstone project later on in their academic program.
Outcomes:
Students will develop civic awareness through examination of their identities and meaningful engagement with their communities

CPST 205 Prior Learning Assessment Portfolio (1 Credit Hour)
In the course, students will learn to develop a PLA Portfolio and document their prior learning by reflecting on relevant prior experiential learning and identifying college level learning outcomes.
Outcomes:
Submission of draft portfolio with resume, autobiographical essay, proposed learning essays, and at least one completed section that demonstrates learning and evidence of relevant professional and/or personal experience

CPST 210 Introduction to Leadership Studies (3 Credit Hours)
This course begins the Leadership certificate program and the Bachelor of Arts in Leadership. This course consists of the SCPS Assessment Center experience, a 2-day leadership assessment. At the conclusion of the Assessment Center experience, students will receive an assessment of the skills and knowledge in each of six domains. These are Problem Solving and Decision Making, Organizing and Planning, Relationship Building, Influence, Communications, and Intra-personal Leadership. These are equated to the 6 courses in the Leadership certificate/major. A credit award toward the course satisfied will be posted to the student's transcript. The student will then enroll in the remaining courses and will have one year from first enrollment to complete the remaining courses. Students in CPST 210 will subsequently meet with the advisor and develop a plan for completion of the certificate/major. Students who complete the SCPS Assessment Center and develop their plan for completion of the certificate or major will have successfully completed the course. Restricted to students in SCPS.

CPST 215 Individual Finance & Planning (3 Credit Hours)
This course focuses on the methods, features and techniques for personal financial planning. Tools applicable for financial decision-making, such as marginal analysis, opportunity cost, and the balancing or risk and return will be covered in this class. The course will also discuss the aspects of such topics as budgeting, credit cards, insurance 401k-investments and portfolio investments. The course will concentrate on personal finance topics with an emphasis on planning (budgeting, tax and insurance coverage), financing large asset purchases, money management, investing strategies and retirement planning. Restricted to students in the School of Continuing & Professional Studies. At the end of the course the student will be able to 1. Develop a financial plan and create personal financial statements 2. Evaluate present/future value of a dollar/annuity 3. Describe components of interest rates 4. Identify risks associated with money market investments and identity theft tactics 5. Manage credit scores and financing options for personal loans (car/house) 6. Protect wealth with insurance (auto, home, medical, life) 7. Assess common types of investments, risk and rate of return 8. Analyze a stock, bond value, diversification, retirement plans and social security 9. Utilize different financial tools such as budgeting, managing liquidity, personal loans, insurance, and investing fundamentals (stocks, bonds, mutual funds, asset allocation and retirement planning).

CPST 242 Design for the Web (3 Credit Hours)
This course prepares students to develop webpages through a study of Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), Usability principles and Design principles. This course will teach students to plan, design, and construct webpages to work properly in modern web browsers, conforming to web standards while following best practices. Students will be able to: identify graphic design principles that relate to web design, develop webpages with HTML; style webpages with CSS; design and implement wireframes and mockups for websites.

CPST 243 Microeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to economic analysis of the smaller components of the economy, household, firm and industry. Topics include economic, socio-economic, and political economic issues; includes a focus on behavioral economics; and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
1) Explain the law of supply and demand; 2) Distinguish characteristics of different market structures; 3) Analyze how consumers maximize utility; 4) Apply behavioral theory to economic decision-making; 5) Analyze real world microeconomic decisions; 6) Research a topic and present recommendations

CPST 245 Macroeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduces economic analysis that studies system wide phenomena including inflation, economic growth and development and unemployment. Includes a focus on behavioral economics, and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
1) Explain the law of supply and demand; 2) Describe the nature of macroeconomic issues and problems; 3) Articulate the objectives of monetary and fiscal policies and the function of the two principal policy makers; 4) Analyze historical macroeconomic crises; 5) Discuss basic macroeconomic goals such as GDP, CPI and unemployment; 6) Assess public policy decisions from a behavioral economic perspective

CPST 247 Computer Concepts and Applications (3 Credit Hours)
An introduction to computer and internet resources and skills with an emphasis on effective use of technology in the work place. Students will learn to identify and provide recommendations for technology-based issues in business using industry standard language, identify changes in information technologies and assess the impact on business and society. Restricted to students in the School of Continuing and Professional Studies.
Outcomes:
Understand the purpose and composition of information systems in business, and receive hands on experience developing business applications with tools such as Microsoft Office, social media, basic website construction

CPST 248 User Experience Design Fundamentals (3 Credit Hours)
Students are introduced to UX research and learn techniques of how to effectively evaluate and compare designs objectively. Students will be able to read and draw actionable conclusions from UX studies. Students will understand the UX Design process, including the use of personas, task models, and user journey mapping. Students will be able to: evaluate UX Design using objective metrics; conduct UX studies to derive actionable conclusions from UX Research; Understand personas, task models, and user journey mapping.

CPST 249 User Experience Design Tools and Techniques (3 Credit Hours)
Pre-requisites: CPST 248 with C- or better
The course focuses on user and task analysis (goal setting and problem framing), field research (interviews, personas, planning, etc.), usability testing, the UX process (from wireframes through user journey mapping). These topics are explored through Design assignments that utilize the complete UX Design process. Students will be able to: apply the UX Prototyping process and UX Design Tools; apply the UX Design process, including the use of personas, task models, and user journey mapping.

CPST 250 Foundations of Organizations (3 Credit Hours)
Pre-requisites: CPST courses are restricted to students in the School of Continuing and Professional Studies
An introduction to contemporary management with emphasis on organizational culture, decision making, organizational structure and design, planning, communication and information technology.
Course equivalencies: MGMT201/201H/301/CPST250/ACMGT
Outcomes:
Students will demonstrate an understanding of the managerial roles in organizations, the four levels at which behavior is examined in organizations and will develop a framework for basic business operations

CPST 265 Special Topics (1-3 Credit Hours)
Course titles and content will vary from term to term. Permission is required to enroll.

CPST 273 Building and Leading an Effective Workforce (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Coordinating operational aspects, overseeing employee functions, and directing marketing efforts are components within this survey of leadership skills. Course content to include: Hiring effectively, Developing talent, Supervising the workforce, Maximizing resources Define and implement the various stages of the hiring process. Identify leadership styles and attributes relevant to small group effectiveness. Coordinate systems and resources in a broad-based organization.

CPST 275 Successful Small Business Ventures (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Business development through case studies and best practices in successful small businesses, incorporating risk assessment and management. Dynamic roles and challenges of small businesses in today's competitive global marketplace. Survey of financial relationships in small business development. Identify and discuss the role of small business in U.S. economic development. Analyze components of successful small business development and management. Discuss the impact and changing potentials of small business at the local and the global level.

CPST 277 Writing the Business Proposal (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Students will develop their own business proposal, incorporating their vision as the proposal's foundation. The proposal will include business description, product or service, organization, market analysis, marketing strategies, financial plan and projections. Course content includes: - Technical Writing - Small Business Research Streams and Techniques - Integration of Small Business functions in proposal design - Presentation (graphic and oral) Techniques
Outcomes:
Develop a viable start-up plan for a desired small business; Create a document that reflects the needed components within the business proposal; Present a comprehensive business proposal with real-life application

CPST 279 Tactical Communications for Small Businesses (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Students focus on emerging contemporary communications formats as they build upon marketing knowledge and communication skills. Networking skills, promotional writing, and sales strategies are integrated into written and oral constructs. Course content to include: - Strategic marketing - Networking best practices and formats - Social media applications - Presentation skills Implement best practices in strategic communications relevant to small business and organizational promotion and sustainability. Develop networking and social media skills in promoting product and services within appropriate industry and marketplace.

CPST 290 World Geography (3 Credit Hours)
Restricted to current SCPS BA students. This course introduces the four main themes of the study of geography: physical, cultural, economic, and historical. Using two basic approaches for the discipline: regional and spatial, this course studies not only geographic locations, but also provides an overview of modern globalization and the human impact on the geographical world.
Outcomes:
Geographical knowledge of different continents, awareness of social-political trends globally

CPST 291 Dynamic Programming Languages (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to programming in dynamically typed languages, sometimes known as scripting languages. The primary language example will be Python; the course will cover Python data types, control structures, function definitions, objects and lambda expressions. A second language may be Ruby, PHP, Scheme or a similar language. The course will also briefly address how Javascript fits into the category of dynamic languages. - Ability to create a dynamic web page using Python or some other language
Outcomes:
Ability to write short programs in Python, using loops, lists and dictionaries; Ability to create graphical effects using Python; Familiarity with the software-development process, and how software can be organized using classes and functions; Familiarity with the advantages and disadvantages of dynamic languages, versus static typing; Ability to compare Python to some other dynamic language, such as Ruby or PHP

CPST 295 The Internship Experience (3 Credit Hours)
Pre-requisites: CPST 200 and CPST 201 (minimum grade of C+); Enrollment is restricted to SCPS degree seeking students; Minimum 2.5 GPA is required
This course provides an opportunity to broaden work and experiential base through immersion within a selected organization. Students spend approximately 8 hours a week interning with their chosen company, institution, nonprofit, small business or other professional setting. Optional to extend the internship a second term.
Outcomes:
To gain real-world professional experience within a targeted work environment; To apply skills and knowledge within context of selected environment; To develop networking opportunities within new professional workplace

CPST 310 Accounting Principles and Application (3 Credit Hours)
CPST courses are restricted to students in the School of Continuing and Professional Studies. This course introduces major concepts in the areas of financial and managerial accounting and develops understanding of accounting process and principles. Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis; The students will complete a final course project that demonstrates their ability to manage the financial data of a fictional organization

CPST 314 Problem Solving and Decision Making in Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Problem solving and decision making call on critical thinking skills. Using decision making formats, whether in teams or individually, provides a roadmap to strategic, ethical, and well-analyzed decisions, in both usual and crisis situations. Through a systematic approach which involves root- cause analysis, creative thinking and risk analysis, problems are delineated, information is gathered, ethical ramifications are analyzed, alternative actions are evaluated, and follow-through is planned. At the end of this course, the student will be able to 1. Apply techniques of logic and problem analysis to organizational situations. 2. Assemble tools used to identify and select the best decisions among alternatives. 3. Review standards of ethics and quality control for decision-making. 4. Develop implementation techniques and methods of follow-through.

CPST 315 Professional Technical Writing (3 Credit Hours)
Pre-requisites: UCWR 110; Restricted to students in the School of Continuing and Professional Studies
Technical Writing prepares students to design effective technical documents for both written and digital media, with particular emphasis upon technical memos, problem-solving and decision-making reports, and organizational, product-support, and technical-information webs.
Outcomes:
Students able to write standard prose with appropriate citations, use a range of current online platforms and technology

CPST 320 Program Evaluation (3 Credit Hours)
Enrollment is restricted to students in the School of Continuing and Professional Studies. Conceptual frameworks and methods related to program evaluation will be covered including process, developmental, outcome, and impact evaluation. Students will be exposed to best practices to measure and document change on the individual, organizational, and macro level including the use of logic models. Quantitative, qualitative, and mixed methods design will be presented. Students will be exposed to analytical tools to interpret qualitative and quantitative data. The use of Big Data will be explored including the implications for behavioral change. Ethical issues in real world evaluation will be addressed. Course Objectives 1. Describe the main conceptual frameworks used in program evaluation including process(formative), developmental, outcome and impact. 2. Compare and contrast quantitative, qualitative, and mixed methods design for program evaluation. 3. Evaluate best practices in relation to the measurement and documentation of change (individual, organizational, and macro-level). 4. Develop process and outcome objectives and logic models. 5. Interpret data including Big Data to make judgements about the efficacy of program activities and intervention. 6. Describe ethical dilemmas with real world research.

CPST 322 Strategic Communication Tools for Applied Psych (3 Credit Hours)
Communication tools commonly employed in the behavioral sciences will be covered: interview development and implementation; best practices for conflict management, negotiation, consultation and persuasion; group facilitation best practices; change facilitation communication techniques including motivational interviewing; the impact of computer mediated communication on interpersonal dynamics; and cultural norms and interpersonal communication. Students interested in counseling and other helping professions, Human Resources, organizational development and the persuasion sciences will benefit from these tools. Enrollment is restricted to students in the School of Continuing and Professional Studies. Course Objectives 1. Identify best practices for core communication tools used in applied psychology (and behavioral sciences). 2. Develop skills in interview development and implementation, group facilitation, and motivational interviewing. 3. Evaluate techniques for conflict management, negotiation, consultation and persuasion. 4. Critique the impact of computer mediated communication of interpersonal dynamics. 5. Describe culturally agile communication techniques.

CPST 324 Organizing and Planning Techniques for Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
This course provides the framework for setting and maintaining priorities and setting efficiencies throughout the organization, balancing priorities and time, and establishing team and individual roles. Integration of ethical practices is reviewed within the processes of organizing and planning high performance functions. At the end of this course, the student will be able to 1. Identify best practices for large and small group project organizing and planning. 2. Develop techniques for prioritizing competing priorities and individual work responsibilities. 3. Establish methods for building tactical and operational plans. 4. Differentiate team roles and individual roles and required organizational structures.

CPST 325 Data Processing, Analysis, and Visualization (3 Credit Hours)
Pre-requisites: STAT 103; CPST 291 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course studies the concepts, methods, and tools required to infer meaningful information and generate useful visualizations from large data sets. Visualize and analyze structured data using appropriate statistical data mining and visualization tools. Analyze distributed computing frameworks for processing large data sets.
Outcomes:
Implement scripting to convert raw data to structured data

CPST 334 Relationship Building for Organizational Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Relationship building calls on the critical skill set of emotional intelligence. This course develops the framework for productive leader-follower relationships. Reflecting on intra-personal leadership skill and building on inter-personal leadership capabilities is of primary focus. Personal assessment and active assignments provide opportunity to develop the important ability to perceive needs of followers in order to ethically motivate towards accomplishment of organizational goals. At the end of this course, the student will be able to 1. Identify and apply skills of emotional intelligence. 2. Develop best practices for building trust and motivation within teams. 3. Recognize the importance of internal as well as external networking. 4. Differentiate between formal and informal communication approaches.

CPST 335 Law and Regulations for Organizational Leaders (3 Credit Hours)
The role of the organization (for profit, non-profit and governmental) from the dual perspective of private and public law. Includes foundations of law and judicial process; contracts, torts, and property law; intellectual property rights; legal, securities and employment regulations; ethical considerations and policy issues.
Outcomes:
-Differentiate ethics and law/private and public law -Discuss Constitutional Law and government's role to regulate business -Apply basic legal principles to the private market -Explain legal principles of contracts

CPST 340 Marketing Concepts and Strategies (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to SCPS
Students will demonstrate an understanding of the fundamental principles of marketing identifying organizational goals, marketing objectives, and variables that affect marketing. Students will examine the roles of advertising, public relations, and sales; integrated and strategic marketing within an organization.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students will develop a comprehensive marketing plan analyzing a real marketing problem, determining strategies, developing sample materials and devising metrics to evaluate success for an organization

CPST 341 User Experience Design to Drive Business (3 Credit Hours)
Pre-requisites: CPST 249 with C- or better
In this course students will learn how to connect and align business objectives with UX Design goals. Students will learn how to bring high-level planning into concrete actionable steps. Students learn Strategy for continuously Developing Brand and Identity through Design. Students will be able to: Understand how effective UX is a strategic advantage for business; Connect and align business objectives with UX Design goals; Apply Design Thinking to create good UX.

CPST 342 Introduction to Web Application Development (3 Credit Hours)
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications. Specific topics include presentations, business, and data access layers, as well as integration with database systems. An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks; Familiarity with database integration and deployment environments; Create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

CPST 343 Software Development for Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course introduces software development for the Android environment, using the App Inventor framework. The course also introduces the basics of user-interface design and mobile architecture. Development work may be done on either an Android device or on an Android emulator running on a Windows/Mac/Linux laptop.
Outcomes:
Be able to develop simple Android applications using the App Inventor framework; Be able to explain the basics of mobile-application architecture and design; Be familiar with the basics of user-interface design; Understand the role of mobile-device sensors, such as the touchscreen, the accelerometer and GPS; Understand the use of Wi-Fi versus mobile wireless, and the use of the cloud in mobile applications; Be able to work with developers to create applications

CPST 344 Influence and Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Influence allows leaders to motivate follower movement towards organizational goals. This course establishes methods for leveraging expertise, communicating skillfully, and functioning with integrity. It integrates general management skills with the motivation to assume responsibility over others and create a positive and ethical organizational climate. At the end of this course, the student will be able to 1. Differentiate between the roles of leaders and managers, and various sources of power. 2. Identify ethical influencing principles that guide teams toward accomplishment of goals. 3. Develop a plan for leadership identity and ethical application of personal influence. 4. Recognize best practices for influencing others in situations of crisis.

CPST 345 Introduction to IT: Networking, Cloud & Security (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course covers the fundamentals of IT systems, networking, and security. The course will cover fundamental computer networking concepts and principles, including the basics of the TCP/IP model and packet-based networking. Other topics include an overview of Wireless Networking, Cloud Computing, and an introduction to Cybersecurity.
Course equivalencies: CPST 345 / ITLS 445
Outcomes:
Students will be able to: Describe how the Internet works; Make connections between devices Assess how data is transferred end to end; Perform basic Cloud Computing implementation and deployment; Describe essential features of Mobile Computing; and, identify and assess Cybersecurity threats and describe solutions to those threats

CPST 349 Project Management (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
The art and science of project management as applied to a variety of business, commercial, and public management situations. Covers all phases of the project life-cycle; techniques for planning, scheduling and control of projects; project organizations; and techniques for building effective project teams. Student will gain a working knowledge of the fundamental principles and techniques of effective project management, and how to apply these principles and techniques in the business environment.

CPST 350 Human Resources Principles & Practices (3 Credit Hours)
Pre-requisites: CPST 250; Students must be enrolled in the School of Continuing and Professional Studies
Students will gain understanding human of resource management functions including the legal environment, equal employment opportunities requirements; job design and analysis; recruiting, orientation and training; performance appraisal; compensation systems; labor relations; collective bargaining and grievance processes; and health and safety.
Course equivalencies: MGMT201/201H/MGMT 301/CPST 350
Outcomes:
Students will make a presentation about human resource components for an organization including job description, recruiting plan, hiring procedures, performance evaluation and collective bargaining considerations

CPST 354 Communications for Organizational Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Communicating clearly and persuasively is at the core of this topic. Individuals can leverage their unique leadership style to effectively communicate and inspire action. By developing practices for formal as well as informal communication, students learn to manage frequency, volume and medium chosen in order to construct messages that reach various audiences. Practicing clear and effective oral communication is established through multiple exercises in this course. At the end of this course, the student will be able to 1. Identify leadership style and use for connecting in verbal presentations. 2. Develop the ability to communicate simply and effectively through written communication. 3. Evaluate communication forms for inspiration and motivation. 4. Recognize the importance of ethical communication and technology.

CPST 355 Introduction to Global Trade Compliance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Understanding the principles of global trade compliance helps personnel in compliance and other key functional areas (e.g., accounting, logistics, talent, purchasing, R&D) understand the opportunities and risks associated with international trade. Topics include key principles of import and export compliance, the government's role in the regulatory framework, and common risk areas that impact business activities. At the end of the course, the student will be able to 1. Identify the basic regulatory framework for import compliance (e.g., customs valuation, tariff classification and country of origin) 2. Identify the basic regulatory framework for export compliance 3. Explain and understand the role of voluntary cargo security programs (e.g., Customs-Trade Partnership Against Terrorism) 4. Identify and analyze actual import/export compliance risk areas (e.g., free trade agreements and associated eligibility issues) 5. Create and implement a team project that identifies a compliance risk area and presents a cross-functional response to the regulatory risk.

CPST 356 Environmental Economics & Resource Management (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
The purpose of this course is to help students understand the role of economics in analyzing natural resource management and the role of economics in the development of environmental policy. An understanding economic models of efficiency is integral to any discussion of innovative ways to approach our natural resource constraints in the 21st century and beyond. The focus of the course will be on energy, energy efficiency and renewable energy sources, and the cost of pollution and climate change. The renewed interest in innovative technologies that reduce emissions, waste and improve bottom lines provides a new impetus for investment in renewables and new technologies. The second part of the course will be devoted to highlighting opportunities for companies, citizens and entrepreneurs to create jobs and improve communities. By the end of the course, it is hoped that students will find that as citizens, entrepreneurs or corporate executives, they can do well financially by doing good environmentally. By the end of the course, the student will be able to 1. Apply supply and demand models to natural resource management 2. Evaluate the role of economics in the development of environmental policy 3. Identify methods used in the economic valuation of the environment 4. Discuss the transition from depletable to renewable energy resources 5. Connect sustainable environmental practices with economic growth

CPST 360 Development and Change in Organizations (3 Credit Hours)
Pre-requisites: CPST 250
Students will investigate the theory and practice of organizational development, examine assumptions, strategies, models, intervention techniques for organizational development and change processes. Students will also study the formation of collaborative relationships, overcoming resistance, gaining commitment and realigning culture.
Outcomes:
Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs

CPST 364 Intra-personal Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Intra-personal leadership principles highlight the drive, energy and motivation one has toward leading effectively. Exploring what it means to bring positive organizational energy to the leadership role in a way that ethically supports organizational mission is at the foundation of this course. Effectively leading through complexity begins at the individual level and requires the ability to develop, motivate, and support the accomplishment of others. At the end of this course, the student will be able to 1. Examine personal goals for growth, challenge, achievement, and success 2. Develop requirements for fulfilling relationships and balancing work and life. 3. Establish personal parameters and professional practices for ethical leadership. 4. Develop methods for supporting goals and accomplishments of individuals and teams.

CPST 365 Advanced Special Topics (1-3 Credit Hours)
Course titles and content vary. Variable (1-3) credit hours. Permission required to enroll. Restricted to students in the School of Continuing & Professional Studies. SCPS permission required to enroll.

CPST 370 Leadership Theories and Applications (3 Credit Hours)
Pre-requisites: CPST 250
Students will study leadership theory, concepts and the practical application of leadership at all levels. Students will analyze historical approaches to leadership and focus on influential contemporary leadership perspectives such as servant leadership, situational leadership, transformational leadership, and principle-centered leadership.
Outcomes:
Students will complete a leadership development plan and apply leadership theories to workplace situations through reflection, real-life examples, and case studies

CPST 371 Organizational Finance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Management involves the allocation and distribution of resources as well as an ongoing knowledge of the financial impact of the local, regional and national economies. This course offers an overview of the inter-relations of money and markets, investment, and financial management. It will focus on financial analysis, design and reporting from a managerial perspective, as well as organizational issues which have a financial impact on the entity. It will concentrate on organizational finance topics with an emphasis on financial analysis, fixed income securities, stocks, projects and their valuations, corporate valuation and governance and cash distribution.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
At the end of this course, the student will be able to 1) Read, develop and write financial analyses for managerial roles; 2) Develop concrete skills in regard to fiscal leadership; 3) Analyze cash flow and financial statements; 4) Describe the time value of money, bonds, and bond valuation regarding changes in interest rates; 5) Evaluate risk and return, valuation of stocks and corporations, and financial options in corporate finance; 6) Apply the cost of capital and cash flows to capital budgeting; 7) Describe how local, regional and national economies impact the success of the allocation of financial resources

CPST 372 Banking & Financial Intermediaries (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
This course is designed to provide the student with a knowledge of banking and financial intermediaries. Concepts covered in the course will include the following: an overview of financial markets and interest rates; the functions and structure of the Federal Reserve System; the role of the Federal Reserve system in setting monetary policy; commercial banking operations and regulations; non-bank financial intermediaries, including thrift and finance companies; the role of insurance and pension fund operations. As a result of taking this course, students will understand the role that financial institutions play in developing and implementing monetary policies, as well as the inter-relationships between financial institutions and capital markets. At the end of this course, the student will be able to 1. Describe the types of financial markets, as well as the role played by the various institutions comprising those markets. 2. Recognize the market and institutional forces that contribute to the determination of short and long -term interest rates. 3. Explain the function and structure of the Federal Reserve system, as well as the role played by the Federal Reserve in determining monetary policy. 4. Analyze the nature and function of commercial banking including the sources and uses of funds by banking operations, the regulatory environment in which commercial banks operate, and the management of banking assets to achieve desired management strategies. 5. Discuss the interrelationships among commercial banks and other financial intermediaries. 6. Identify various non-bank financial intermediaries, including thrifts, credit unions, finance companies and mutual funds and explain how these institutions interact with commercial banking operations, as well as with end consumers. 7. Examine the role that pension and insurance funds play in providing liquidity and security to consumers and businesses. 8. Discuss interrelationships among pension and insurance funds and other financial intermediaries

CPST 373 Capital Markets (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201,CPST 372 Banking and Financial Intermediaries; Restricted to students in the School of Continuing & Professional Studies
This course is designed to provide the student with a knowledge of capital markets, banking, and measures of money supply. The course will include an overview of financial markets and interest rates; the functions and structure of the Federal Reserve System; the role of debt securities markets; the role played by equity securities markets; the nature and function of derivative markets. As a result of taking this course, students will understand the role played by capital markets, the Federal Reserve system, debt, equity and derivative markets as well as the inter-relationships between financial institutions and capital markets.
Outcomes:
At the end of this course, the student will be able to 1) Analyze the nature and function of the market for debt instruments, as well as the various types of debt instruments currently in use, including Treasury bills, commercial paper, CDs, repurchase agreements, federal funds, mortgages and banker's acceptances; 2) Assess the valuation of debt securities, pricing, and yields; 3) Describe the market for equity securities and the types of equity securities available for investment; stock market transactions, trading, and securities regulations; 4) Employ valuation methods to evaluate equity securities and performance measures related to them; 5) Explain the role that derivatives play in attempting to mitigate risk, as well as the speculative nature of some derivative products and the role of regulatory agencies in attempting to reduce speculative transactions

CPST 377 Data in Management Decision-Making (3 Credit Hours)
Pre-requisites: CPST 250, STAT 103
Data, technology, and analytics capabilities have a direct impact on decision making. The integration of Financial/Enterprise Resource Planning (ERP) Systems and business analytics drives the ability to turn data into insights and action. This course will prepare students to understand, manage and visualize data, while also focusing on effective ways to communicate for decision-making. The course will introduce ERP systems and technology and the use of analytical tools in organizational decision-making.
Outcomes:
Utilize common enterprise systems and analytical tools in decision-making; Evaluate the use of databases in data management and data wrangling; Develop the ability to apply analytical techniques to data through mining; Practice important data visualization techniques and summary measures; Write to communicate insights gained from data analysis

CPST 380 Leadership, Culture and Ethics (3 Credit Hours)
Pre-requisites: CPST 250
Students examine organizational ethics, values, strategy, culture, leadership and coaching. Students self-assess and refine their own concept of leadership and decision-making in the context of attitudes, environments, cultures, and issues faced by leaders in organizations.
Outcomes:
Students will analyze descriptive and normative models of ethical decision making in business, leadership strengths and management style using real life situations, self-assessment and cases studies

CPST 381 Cybersecurity Governance (3 Credit Hours)
Effective Cybersecurity Leadership requires that there is a cogent Governance structure. Students in this course will learn how to manage Cybersecurity processes while meeting the needs of the Enterprise. Students will learn how to establish a Governance program, Cybersecurity management frameworks, how to develop and implement a Cybersecurity strategy. Students will be able to: Explain the strategic importance of effective, interdisciplinary, and multifunctional enterprise information security governance and information security management program and its execution.

CPST 382 Cybersecurity Incident Response Management (3 Credit Hours)
Students in this course learn key aspects of Cybersecurity Incident Response Management (CIRM). Students in this course will learn how to plan for, respond to, investigate, and report on Cybersecurity Incidents. Students in this course will learn from case studies of past cyber incidents. Skills developed include the developing of an Incident Response Plan; ethical, best practices on handling communications/ disclosures after an incident; incident investigation techniques (forensics); interfacing with law enforcement; and post-incident recovery.

CPST 383 Cloud Security Strategy and Architecture (3 Credit Hours)
This course leverages cloud computing security guidelines set forth by the International Organization for Standardization (ISO), National Institute of Standards and Technology (NIST), European Union Agency for Network and Information Security (ENISA), and Cloud Security Alliance (CSA) to develop a Strategic perspective for the Cybersecurity practitioner. Skills developed include knowing best practices and standards; the ability to design and implement a cloud security architecture; and carefully working with 3rd party cloud infrastructure providers and other stakeholders.

CPST 390 Organizational Theory and Practice (3 Credit Hours)
Pre-requisites: CPST 380
This course extends knowledge of organizations by examining organizational behavior at the macro-level. Students will gain a deeper understanding of organizational theory and research including historical and modern era approaches. Students will also analyze organizational behavior and settings including an in-depth case study of a single company.
Outcomes:
Students will be able to explain and apply concepts within the main areas of organizational structure, culture, communication and process

CPST 395 Advanced Special Topics in Management (1-3 Credit Hours)
Permission required to enroll.

CPST 397 Capstone (3 Credit Hours)
This course must be taken by SCPS students during the last semester prior to graduation. Students will collaborate with a community organization of their choosing to design and execute a capstone project that fulfills the University Engaged Learning requirement. This includes completing at least 20 hours of civic engagement, all necessary Center for Engaged Learning, Teaching, and Scholarship (CELTS) documentation, and a capstone project report. Grounded in Ignatian pedagogy, the course emphasizes reflection, discernment, and action, guiding students through individual and group exercises to deepen their learning and refine their project. By integrating knowledge from their SCPS coursework, students will develop their capstone projects while preparing for life after graduation as Civic-Minded Professionals.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and execute a capstone project with a community partner organization of their choosing; Complete a minimum of 20 hours of civic engagement with a community partner to satisfy the University Engaged Learning requirement; Present a capstone project report

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

Institute of Paralegal Studies (PLST)

PLST 331 Introduction to Paralegal Studies (2 Credit Hours)
Required of all students in their first session of study. An introduction to the function and sources of American law (including the U.S. Constitution), the American legal system, the civil litigation process, and legal practice, focusing on the role of the paralegal. Trends in the paralegal field, including regulation and career issues.
Outcomes:
Students will recognize typical paralegal responsibilities in various areas of legal practice and be aware of recent developments in the field, especially regulatory proposals affecting paralegals

PLST 332 Legal Research and Writing I (2 Credit Hours)
Required of all students. An introduction to the fundamentals of legal research, focusing on locating, analyzing and updating case law (court opinions). Practice in researching case law in hard copy and online, and in writing case briefs.
Outcomes:
Students will be able to use various reference books and online services (LEXIS and WESTLAW) to locate, analyze, and update case law, and will be able to write case briefs

PLST 333 Legal Research and Writing II (2 Credit Hours)
Pre-requisites: PLST 332
Required of all students. Further instruction in legal research skills, focusing on locating, analyzing and updating statutory and administrative law. Practice in researching statutory and administrative law in hard copy and online. Drafting routine legal correspondence.

PLST 334 Legal Analysis: Practical Applications (2 Credit Hours)
Pre-requisites: PLST 332 and PLST 333
This writing intensive course will provide extensive practice analyzing factual scenarios, summarizing and applying legal authority and developing written legal arguments. Drafts and rewrites are required.
Outcomes:
To demonstrate comprehension of legal texts of varying levels of complexity; To apply legal rules to factual situations to predict legal outcomes; To use typical legal analytical tools to develop solutions to legal issues; To write clear explanations of the process of analysis used to resolve legal issues

PLST 335 Legal Ethics (2 Credit Hours)
Pre-requisites: PLST 331
Required of all students. Ethical considerations in the practice of law that paralegals are likely to encounter, especially the unauthorized practice of law, client confidentiality and conflicts of interest. Review of ethical codes for attorneys and paralegals.

PLST 336 Corporate Topics for Litigation Paralegals (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the basic principles of agency law, contract law, and the forms of business organizations: sole proprietorships, partnerships (general, registered limited liability and limited), limited liability companies, and corporations.

PLST 339 Secured Transactions and Bankruptcy (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362; Required for the Corporate Practice Certificate (Water Tower Campus)
An introduction to transactions under Uniform Commercial Code Article 9 (Secured Transactions) and federal bankruptcy law, primarily as it applies to businesses.
Outcomes:
Students will be able to draft UCC forms to perfect security interests as well as bankruptcy forms

PLST 340 Civil Litigation I (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the civil litigation process in state (Illinois) and federal courts, and proceedings in administrative agencies generally, focusing on the initial phases. Instruction in client interviews and pre-litigation investigations, evidentiary issues, and practice in drafting pleadings initiating lawsuits and proceedings through pre-trial motion practice.
Outcomes:
Students will understand the structure and basic operations of these courts, and will be familiar with the rules of procedure governing civil litigation proceedings

PLST 341 Civil Litigation II (2 Credit Hours)
Pre-requisites: PLST 340
Required for the Litigation Practice Certificate. Further instruction in the litigation process, focusing on the discovery, trial, and post-trial stages. Topics include interrogatories, depositions, document production and inspection requests, other discovery tools, settlement negotiations, organization of case files, document control systems, trial preparation, trial procedure, and post-trial proceedings. Overview of alternative dispute resolution.
Outcomes:
Students will be able to conduct client interviews and pre-litigation investigations, and to draft the pleadings initiating lawsuits and proceeding through pre-trial motion practice

PLST 342 Litigation Technology & eDiscovery (2 Credit Hours)
Pre-requisites: PLST 340 and PLST 341; Previous completion of PLST 345 strongly recommended
Required for the Litigation Practice Certificate. Hands-on instruction in software programs (Relativity) commonly used for litigation support, including electronic court filing, eDiscovery, case management, document control and trial presentation.
Outcomes:
Students will be able to assist attorneys in preparing for and conducting trials

PLST 343 Real Estate Transactions I (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
An introduction to the concepts of real estate ownership and real estate sales transactions. Practice in preparing standard documents required for real estate transactions: purchase/sale agreements, deeds and other closing documents, title insurance commitments and policies, and surveys.
Outcomes:
Students will be able to draft documents for basic real estate transactions and to assist attorneys in conducting real estate closings

PLST 344 Real Estate Transactions II (2 Credit Hours)
Pre-requisites: PLST 343
Further instruction in real estate transactions, examining issues that arise in all real estate transactions and especially the documentation and closing of these transactions. Commercial real estate leasing.
Outcomes:
Students will be able to prepare documents for these transactions, and to assist attorneys in conducting commercial real estate closings and other transactions

PLST 345 Law Office Computer Applications (2 Credit Hours)
Required of all students. Hands-on instruction in software programs commonly used in law offices: word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), pdf management (creating and combining pdfs, creating a portfolio, redacting, adding security) and presentation graphics.
Outcomes:
Students will be proficient in the fundamentals of word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), database management (organizing, sorting, and retrieving information), and presentation graphics

PLST 346 Advanced Litigation Technology (2 Credit Hours)
Pre-requisites: PLST 340, PLST 341, PLST 342
Additional instruction in online resources and software typically used in litigation support (e.g. Relativity).
Outcomes:
Students will prepared to use typical litigation resources and software at a basic to intermediate level

PLST 348 Advanced Online Research Skills (2 Credit Hours)
Pre-requisites: PLST 332
This course focuses on research strategies for paralegals and specifically develops skills in the area of online public database research. Students practice researching within publically available online resources in a wide variety of subject areas including court procedure and docketing, business entities, real property, criminal law, environmental compliance, etc. Multiple practical assignments as well as one main research assignment.
Outcomes:
Students will research and write memoranda in support of motions, and will be familiar with the mechanics of appellate court briefs

PLST 349 Torts (2 Credit Hours)
An introduction to civil tort liability, including the intentional torts, negligence, strict liability, and product liability. Role of the paralegal in personal injury litigation. Practice in client interviewing techniques. Basic factual investigation techniques.
Outcomes:
Students will be familiar with the paralegal's role in personal injury litigation from both the plaintiff's and defendant's viewpoints, including typical pleadings and other documents

PLST 350 Medical Malpractice (2 Credit Hours)
Negligence lawsuits brought against health care organizations and health care professionals, from both the plaintiff's and defendant's viewpoints. Illinois law and rules of procedure for medical malpractice cases. Practical skills for locating and organizing medical information.
Outcomes:
The student will be familiar with Illinois law and rules of procedure governing medical malpractice lawsuits and will be able to draft a malpractice complaint as well as locate and organize medical information

PLST 351 Intellectual Property: Patents and Trade Secrets (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of patent protection. Subject matter of patents, the concept of patentability, the patent application process and patent infringement litigation. Trade secret misappropriation.
Outcomes:
Students will be familiar with the concept of patentability, the patent application process (including preparation of basic forms and documents), and patent infringement litigation

PLST 352 Intellectual Property: Trademarks and Copyrights (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of trademark and copyright protection. Registration procedures and infringement disputes.
Outcomes:
Students will be familiar with registration procedures (including preparation of basic forms and documents) and infringement disputes

PLST 353 Securities Regulation (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
Federal and state regulation of securities transactions. The stock market and the roles of brokers, specialists and underwriters. Requirements for public offerings of stock, notably the registration statement and prospectus, as well as the anti-fraud provisions.
Outcomes:
Students will be familiar with the requirements for public offerings of stock, notably the registration statement and prospectus, and will be able to complete basic forms required under these laws

PLST 355 Estates, Trusts & Wills (2 Credit Hours)
An introduction to basic principles of estate and trust administration. Practical aspects of administration of estates and trusts for the paralegal. Probate proceedings in Illinois, including the preparation of probate court pleadings, inventories, collection and valuation of assets, distribution of assets to beneficiaries, and accountings. Overview of tax considerations.
Outcomes:
Students will be familiar with wills and will be able to prepare the documents required to administer estates in Illinois

PLST 357 Family Law (2 Credit Hours)
An introduction to the laws governing family relationships, specifically the Illinois Marriage and Dissolution of Marriage Act and related statutes. Factual investigation, preparation of pleadings and other documents, court procedures, settlement agreements, and post-decree modifications. Brief overview of adoption and paternity proceedings.
Outcomes:
Students will be able to prepare pleadings, notices, settlement agreements, and other documents, and to assist the attorney in domestic relations court proceedings

PLST 358 Criminal Law and Litigation (2 Credit Hours)
An introduction to the purpose and scope of substantive criminal law, considering various crimes against persons and property, criminal liability and punishment, and defenses to crimes. Procedural topics, including court forms and pleadings commonly used in the Illinois criminal trial process.
Outcomes:
Students will be able to prepare court forms and pleadings commonly used in the criminal trial process, and to assist attorneys preparing for trial

PLST 359 Environmental Law (2 Credit Hours)
An introduction to federal environmental statutes regulating water quality, waste management and remediation of hazardous substances (Superfund). Issues leading to enforcement proceedings. Research strategies for this technical area.
Outcomes:
Students will be familiar with permit applications, enforcement proceedings, and research strategies for this technical area

PLST 360 Employment Law (2 Credit Hours)
An overview of the legal relationship between employers and employees, including the employment-at-will doctrine, employment contracts, federal and state anti-discrimination laws, and worker's compensation proceedings. Administrative procedures and trial court actions.
Outcomes:
Students will be familiar with federal and Illinois law regulating employment status, employment contracts, anti-discrimination claims, and worker's compensation, and will be able to assist attorneys in administrative agency proceedings and civil lawsuits

PLST 361 Immigration Law (2 Credit Hours)
An overview of U.S. immigration law with emphasis on the paralegal's role. History of immigration law and current policy considerations. Preparation of visa applications, admission and removal of immigrants and non-immigrants, citizenship and naturalization, and humanitarian relief. Document organization and preparation, working with clients, litigation assistance, legal research, and ethical dilemmas.
Outcomes:
Students will be able to prepare various visa applications

PLST 362 Business Organizations (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on the formation and operation of sole proprietorships, partnerships (general, limited, and limited liability), limited liability companies, and corporations. Preparation of standard forms and agreements will be emphasized. Due diligence procedures for mergers and acquisitions and other transactions will be covered.

PLST 363 Contract Administration & Analysis (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on both common-law and Uniform Commercial Code (UCC) Article 2 contracts. The elements of a valid contract will be studied, as well as standard contractual provisions and basic principles of contract interpretation. Students will work with several sample contracts: a confidentiality/nondisclosure agreement, a licensing agreement, and a general trade agreement.

PLST 364 Topics in Corporate Practice (2 Credit Hours)
Pre-requisites: PLST 362 Business Organizations
This course provides an overview of laws relating to business operations, including secured transactions (Uniform Commercial Code Article 9), federal bankruptcy law, and employment law. Compliance with various regulatory requirements will also be covered.

PLST 366 Litigation Topics for Corporate Paralegals (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course introduces the civil litigation process in state (Illinois) and federal courts, from the initial phases of pre-litigation investigations and pleadings through the discovery, trial, and post-trial phases. Technological innovations affecting civil litigation, such as electronic court filing and e-discovery procedures, will be given special emphasis.

PLST 368 Corporate Compliance Topics (2 Credit Hours)
Pre-requisites: PLST 362 or PLST 336
This course provides an overview of various regulatory provisions applicable to the financial services industry, including the Anti-Money Laundering (AML) and Business Continuity Plans (BCP) rules, the Foreign Corrupt Practices Act, and insider trading prohibitions. Compliance with the requirements of these laws will be the focus of the course.
Outcomes:
Students will learn practices and procedures to monitor and document compliance with these laws

PLST 369 Advanced Topics in American Law (3 Credit Hours)
Pre-requisites: CPST 200; Enrollment is limited to students in the BA in PLST degree program
This course will build on students' knowledge of the American legal system, examining the role of law in 21st century American society. The course will focus on the interpretation of selected portions of the U.S. Constitution and their effect on American life.
Outcomes:
Students will learn how the US Constitution governs the American legal system and protects individual rights

PLST 370 Advanced Legal Analysis & Writing I (3 Credit Hours)
Pre-requisites: UCWR 110; Enrollment is limited to students in the BA in PLST degree program
This course will provide students with extensive practice in reading and summarizing case law, with particular attention to the rationale for court decisions and the use of precedent, as well as statutory and administrative law. This course will focus on analysis rather than retrieval of legal reference sources.
Course equivalencies: PLST334/PLST370
Outcomes:
Students will learn how to prepare summaries of court decisions, statutes, and administrative regulations

PLST 371 Advanced Legal Analysis & Writing II (3 Credit Hours)
Pre-requisites: PLST 370; Enrollment is limited to students in the BA in PLST degree program
This course will focus on the interaction of case law, statutory law, and administrative law in resolving legal issues. Students will learn to develop legal arguments and write a legal memorandum.
Outcomes:
Students will learn how to use court decisions, statutes, and administrative regulations to develop legal arguments

PLST 395 Applied Paralegal Study (1 Credit Hour)
Pre-requisites: Director's permission required; this course is limited to students in the BA in Paralegal Studies program
This course will require students to explore a contemporary issue in the paralegal field or the practice of law generally. Students will be expected to participate in a minimum of two class meetings and several online activities, concluding with a presentation of their research.

PLST 398 Internship (2 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (120 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

PLST 399 Internship (3 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (160 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

Applied Psychology (BA)

Individual, organizational, and global problems require innovative solutions based on psychological research concerning what motivates people to change. Moreover, robotics and increased automation

continues heightening demand for employees who are adept at systems thinking to address the complexity of human behavior.

The BA in Applied Psychology program is a differentiated, high-quality program tuned to the needs of adult learners. Expert faculty provide training in the scientific study of human behavior, emotion, cognition, and motivation and prepare students for occupations applying psychological theory and methods to promote creative, evidence-based problem solving, critical systems thinking, cultural agility, and persuasive communication.

Core Requirements		
The number of hours remaining toward Core requirements can vary due to transfer credit. [1]		
Mission Specific Requirements		
Mission specific requirements can vary from 0 to 15 credit hours based on your prior credit.		
General Elective Requirements		

Students may have some general elective coursework to complete if their transfer credit and remaining required hours (Core, mission specific, major, etc.) do not total 120.

[1] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Apply scientific thinking to solve individual, interpersonal, organizational and social problems in real world case studies and organizational/community projects.
- Analyze theories in human behavior, cognition, emotion, and motivation in written assignments and oral presentations.
- Use strategic communication and persuasion skills based in the behavioral sciences in role plays and real-world applications.
- Interpret statistical and evaluation data to discern meaningful patterns and assess the impact of interventions in course work and organizational/community applications.
- Recognize best practices including ethical and pragmatic constraints of applied research with people in course work and organizational/community projects.

Applied Studies (BA)

The B.A. in Applied Studies degree provides a strong foundation in communication and business. The Applied Studies major represents the best way to make the most of your prior credit in a particular subject and accelerate your path to graduation. The required certificate may also allow each student to focus on a complimentary discipline preparing them to excel in the professional world. SCPS understands that adult students often wish to take a wide range of courses to meet their professional and personal interests, so we have designed this degree to enhance your current career or establish a new one.

Related Programs

Major

- Applied Mathematics (BS) (p. 530)
- Applied Psychology (BA) (p. 858)

Master's

- Applied Social Psychology (MA) (p. 1651)

Curriculum

The B.A. in Applied Studies comprises 120 credit hours. Courses are offered in an 8-week session format with online, evening, and Saturday morning options.

Code	Title	Hours
Major Courses		
CPST 250	Foundations of Organizations	3
CPST 243	Microeconomics	3
or CPST 245	Macroeconomics	
COMM 175	Introduction to Communication	3
CPST 310	Accounting Principles and Application	3
CPST 247	Computer Concepts and Applications	3
STAT 103	Fundamentals of Statistics	3
CPST 315	Professional Technical Writing	3
Communication Skills		
Select one of the following:		3
COMM 101	Public Speaking & Critical Thinking	
CPST 322	Strategic Communication Tools for Applied Psych	
200-level (or higher) Communications course		
Theoretical Skills		
Select one of the following:		3
CPST 370	Leadership Theories and Applications	
CPST 360	Development and Change in Organizations	
CPST 340	Marketing Concepts and Strategies	
CPST 320	Program Evaluation	
Required Concentration or Certificate(s)		**18**
SCPS Courses		
CPST 200	Introduction to Degree Completion	3
CPST 201	Civic Identity and Development	3
CPST 397	Capstone	3
Core Requirements		
The number of hours remaining toward Core requirements can vary due to transfer credit. [1]		
Mission Specific Requirements		
Mission specific requirements can vary from 0 to 15 credit hours based on your prior credit.		
General Elective Requirements		
Students may have some general elective coursework to complete if their transfer credit and remaining required hours (Core, mission specific, major, etc.) do not total 120.		
Total Hours		**120**

[1] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Apply communication theories to promote change in personal and professional settings.
- Demonstrate effective business writing in written narratives, memos, argumentative narratives, and collaborative documents.
- Analyze organizational theory, structure, power dynamics and culture in persuasive written and oral presentations.
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements.
- Develop leadership skills through self-assessment exercises, reflection activities, and critical thinking assignments.

Computer Science Certificate

This concise, nine-hour certificate program prepares you to enter the computer science field. It also positions you to complete a master's degree in Information Technology or Software Engineering as well. In this program, you will: develop a thorough understanding of the principles of object-orientation, such as abstraction, delegation, inheritance, and polymorphism; learn basic design patterns; and gain programming experience in mainstream object-oriented languages such as C++ and Java.

Related Programs

- Cybersecurity Certificate (p. 1905)
- Cybersecurity Technology Management Certificate (p. 861)

Curriculum

Code	Title	Hours
Certificate Requirements		
COMP 170	Introduction to Object-Oriented Programming	3
COMP 271	Data Structures I	3
Options		
Select a third course from one of the following options:		3
Software Engineering Option		
Students who do well in COMP 271 are encouraged to complete the Software Engineering option and complete:		
COMP 313	Object-Oriented Design	
Information Technology Option		

Completion of a project management course will provide a good transition for students interested in the MS in Information Technology (choose one course):		
CPST 349	Project Management	
COMP 377	IT Project Management	
Web Option		
CPST 342	Introduction to Web Application Development	
Mobile Option		
CPST 343	Software Development for Mobile Devices	
Total Hours		**9**

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.

Cybersecurity Technology Management Certificate

The 3-course Cybersecurity Technology Management Certificate provides students with a background in both the technological and managerial skills needed to be an effective cybersecurity professional in today's IT enterprises.

Students will learn how to assess how organizational preparedness against cyber threats and how to manage their aftermath, including ensuring continuity of IT functions. Students also develop a strategy for designing and building cloud security architectures. An emphasis on ethical, legal, policy and regulatory concerns is embedded throughout the program.

Certificate Requirements		
CPST 381	Cybersecurity Governance	3
CPST 382	Cybersecurity Incident Response Management	3
CPST 383	Cloud Security Strategy and Architecture	3
Total Hours		**9**

Optional:

- CPST 265 Special Topics: Advanced Topics in Cybersecurity Technology Management: The optional course is included to address up-to-the-minute topics, such as emerging threats, insider threats, latest application delivery processes, and practices, etc.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

- Explain the strategic importance of effective, interdisciplinary, and multifunctional enterprise information security governance and information security management program and its execution.
- Evaluate the effectiveness and potential application of multiple information security governance structures and information security management programs for variant enterprise scenarios with consideration for strategic, operational, ethical, social, environmental, and risk factors.
- Apply foundational knowledge of governance, risk, and compliance (GRC) concepts as they relate to legal, regulatory, and standards-based environments, such as HIPAA, FISMA, NERC, PCI DSS, GLBA, SOX, FERPA, COPPA, and others.

Information Technology (BA)

The B.A. in Information Technology is designed for those interested in leadership roles in the growing and ever-critical IT job market. You can begin the program with a minimal understanding of computers and finish with skills to be an effective IT or software development practitioner. Students have the option to pursue admission into the dual BA/MS Information Technology program once they have completed 90 credit hours toward their undergraduate degree. This positions students for even more robust opportunities in their respective careers.

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Demonstrate a high level of proficiency in making informed and strategic decisions, applying quantitative analysis, and implementing project management strategies to effectively impact organizational goals.
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions.
- Apply foundational knowledge of IT systems, computer networking, and security, including cloud computing concepts, TCP/IP model, packet-based networking, wireless networking, and cybersecurity principles.
- Organize data in ways to emphasize relationships to elicit information from a database that allows data to be mined, visualized and graphically display via web interfaces.
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.

Introduction to Data Science Certificate

This 3-course certificate introduces students to the key elements of Data Science: Python programming, SQL & database design, data processing, and analysis & visualization. The certificate provides any professional valuable, widely applicable, and transferable skills.

Coursework explores the topics of data ethics and digital ethics. The certificate is intended to help prepare the student for a dynamic career in data analytic work, whether they seek to grow their existing career, switch to a career within the data science realm, or explore data science as a field before committing to a degree program or advanced study in the topic.

Related Programs

Certificate Requirements		
COMP 251	Introduction to Database Systems	3
CPST 291	Dynamic Programming Languages	3
CPST 325	Data Processing, Analysis, and Visualization	3
Total Hours		**9**

Optional:

- CPST 265 Special Topics – 1-3 credits of directed study. Student will solve a data science problem for a community non-profit organization under the guidance of a faculty member. Larger projects will be 3 credit hours held only on the 16-week semester schedule for either fall or spring. Summer will not be an option for a 3-credit hour special topics course. Interested students should start the process at least 6-weeks before the semester where you will potentially complete the course.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Create data analytic programs that perform rigorous statistical analyses to address real-world questions in the social sciences.
- Evaluate datasets to determine how variables have been measured and encoded, which statistical analyses can be performed upon them, and which data cleaning and preparation protocols are necessary in order to proceed.
- Apply the relational model to solving real-world problems using SQL on standard DBMS platforms.
- Apply the programming languages of Python and SQL to specific data analytic and visualization challenges, as well as to generate novel code.
- Analyze the ethical considerations relevant to accurate data analysis and reporting.

Management (BA)

The B.A. in Management degree program offers adult learners training in critical skills, such as management principles, ethical leadership, critical thinking and strategic planning. The grounding in these principles elevates the impact our students have in their business environments and positions them to pursue new career opportunities in communications, community relations, and project management.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Demonstrate effective business communication in written narratives, memos, argumentative narratives, oral presentations, and collaborative documents.
- Develop productive team processes, team building, and leadership skills through self-assessment exercises, reflection activities, role playing and critical thinking assignments.
- Analyze organizational theory, structure, power dynamics and culture in persuasive written documents and oral presentations.
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements.
- Creatively solve business problems as evidenced by project management simulations, strategic decision making, and quantitative analysis.
- Apply an understanding of law and regulation to business processes as evidenced by course assignments.

New Media Communication Certificate

This 3-course certificate will provide students with a foundation in communication and marketing principles, with an emphasis on social media and new digital media principles and tools. It introduces students to the principles and tools of communicating in the digital space and includes coursework in communication theory and history, communication literacy, digital media production, digital media ethics, social media communication, online content production, and social media literacy.

The certificate benefits those who are seeking to remain current and competitive within careers that are becoming increasingly digital, as well as those seeking to pivot into positions involving digital strategy or social media account management.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Explain how technology affects communication.
- Create audiovisual content using a variety of audio, visual, video, and technical tools.
- Analyze communication research and audience data to tailor a media outreach campaign.
- Understand how social media can contribute to organizational and personal success.
- Create internet-optimized work (writing, audiovisual work, and social media content) for the effective promotion of a business, nonprofit, or personal project.

Organizational Development and Leadership Certificate

This Organizational Development and Leadership Certificate is designed for students looking to learn more about the theories, research and practical applications of organizational development in the workplace. Students explore how organizations work and acquire skills to assess, diagnose and address structural and cultural problems. Students also study human behavior in the workplace, which offers valuable knowledge and skills for conflict management, motivation and morale, and employee development.

Please Note: This certificate can only be completed by students working toward an undergraduate degree within the School of Continuing & Professional Studies.

Learning Outcomes

Upon successful completion of the certificate, candidates will be able to:

- Explain organizational theory, structure, and power dynamics in contemporary work settings.
- Demonstrate effective business writing in written narratives, memos, argumentative narratives, and collaborative documents.
- Evaluate best practices in relation to assessment and solutions of structural and cultural problems in the workplace.
- Analyze leadership best practices to promote productive organizations.

Organizational Psychology Certificate

The Organizational Psychology Certificate provides training on social psychology, personality studies and industrial psychology. This certificate is designed for those pursuing careers involving worker productivity, assessment, training and human resources.

Please Note: This certificate can only be completed by students working toward an undergraduate degree within the School of Continuing & Professional Studies.

Learning Outcomes

Upon successful completion of the Organizational Psychology Certificate, candidates will be able to:

- Formulate analyses of organizational problems based on psychological theory and propose evidenced based solution.
- Analyze key dynamics in employee personality, behavior, and motivation.
- Critique leadership styles, group behavior and team dynamics.
- Practice effective organizational communication strategies related to interviewing, persuasion, conflict resolution, and negotiation.
- Design evaluation to assess the impact of workplace programs.
- Evaluate best practices in relation to employee recruitment, selection, performance evaluation, motivation, retention and training.
- Describe contemporary issues and approaches related to behavioral health and counseling.

Paralegal Studies (BA)

From investigating facts and obtaining affidavits to conducting legal research and drafting documents, paralegals play a key role in supporting the work of legal offices around the country. Successful attorneys, meanwhile, understand the immense value a capable, skilled, and knowledgeable paralegal brings to their organization, which heightens competition for those with proven skills.

With a BA in Paralegal Studies, you position yourself to become a prized, indispensable member of a legal team and create new career opportunities for yourself.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Learning Outcomes

Upon completion of All BA in Paralegal Studies students will be able to:

- Locate relevant legal sources from federal and state jurisdictions and prepare summaries of these sources.
- Develop legal arguments using court decisions, statutes, and administrative regulations.
- Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
- Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
- Draft pleadings, collect and organize factual information and pleadings to assist with investigation of the case, discovery and preparation for trial.
- Assist attorneys who work for corporate clients document the organization and operation of business entities.
- Draft contract provisions and coordinate the administrative process for contracts.

Strategic Digital Communication (BA)

Curriculum

The B.A. in Strategic Digital Communication comprises 120 credit hours. Courses are offered in an 8-week session format with online, evening, and weekend options.

Note*: *The following program is no longer accepting new students

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational

outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Analyze communication through a critical, historical, and theoretical lens.
- Create effective communications in a variety of formats including essays, news releases, pitch letters, fact sheets, public service announcements, and web content.
- Apply theories regarding communication best practices to specific audiences and messaging goals.
- Evaluate a message for its clarity, efficacy, persuasive ability, and utilization of digital technology.
- Understand the ethical issues involved in crafting an effective and socially responsible message.

User Experience Design Certificate

User Experience (UX) Design is one of today's fastest-growing specializations. Applicable to everything from the web or mobile applications to personal computers and other devices, UX Design seeks to craft a meaningful and relevant experience specific to the product.

This 3-course certificate provides students with a foundation in the tools and techniques of UX Design to either earn a position in UX Design or advance their careers in the field. Students learn how to conduct field research, objectively evaluate UX Designs, and take UX Design from concept-to-prototype using appropriate tools, including personas, task models, and user journey mapping. The application of UX Design in business strategy is also explored.

- CPST 265 Special Topics – 1-3 credits of directed study. Students will complete a UX Design project community non-profit organization or another client under the guidance of a Faculty member.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon successful completion of the certificate, candidates will be able to:

- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives with UX Design goals by effectively utilizing the User Experience (UX) Design process.
- Effectively apply the User Experience (UX) Design process, utilizing personas, task models, and user journey mapping techniques, to connect and align business objectives with UX Design goals.

Web Design and Development Certificate

The 3-course Web Design and Development Certificate equips students with the marketable skillset needed to design and develop websites and web applications for today's marketplace. Using WordPress, students will learn about the design and accessibility of websites using a JavaScript-based programming stack for web development (HTML/CSS/JavaScript/React or similar JavasScript framework).

Upon successful completion of the program, students will have the skills needed to seek out entry-level and freelance positions in web design and development roles.

- Web Programming Certificate (p. 1591)

Curriculum

Code	Title	Hours
Certificate Requirements		
COMM 275	Web Design and Usability	3
CPST 242	Design for the Web	3

CPST 342	Introduction to Web Application Development	3
Total Hours		**9**

Optional:

- CPST 265 Special Topics – 1-3 credits of directed study. Students will construct a website for a community non-profit organization under the guidance of a Faculty member.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon successful completion of the certificate, candidates will be able to:

- Apply graphic design principles and web standards to proficiently plan, design, and construct modern, browser-compatible websites while incorporating HTML, CSS, and JS.
- Develop and deploy modern, standards-compliant web applications while demonstrating proficiency in best practices, utilizing contemporary web technology solutions, and effectively managing software project versions through version control techniques.

Web Technologies (BA)

Web technologies are ever evolving. New tools, apps, sites, and algorithms constantly change norms and best practices in the field shift on a constant basis. Earning a degree in Web Technologies from the School of Continuing and Professional Studies (SCPS) at Loyola University Chicago prepares you for this fast-paced, ever-changing world.

Designed for those interested in careers in web development or design, web or social media analytics, or software engineering, SCPS's Web Technologies degree program provides students a strong foundation in the design and development of websites and web applications.

- Web Programming Certificate (p. 1591)

Curriculum

The B.A. in Web Technologies comprises 120 credit hours. Courses are offered in an 8-week session format with online, evening, and weekend options.

Code	Title	Hours
Major Courses		
COMP 317	Social, Legal, and Ethical Issues in Computing	3
COMM 275	Web Design and Usability	3
CPST 242	Design for the Web	3
CPST 342	Introduction to Web Application Development	3
COMP 170	Introduction to Object-Oriented Programming	3
COMP 251	Introduction to Database Systems	3
COMP 271	Data Structures I	3
CPST 291	Dynamic Programming Languages	3
CPST 343	Software Development for Mobile Devices	3
CPST 325	Data Processing, Analysis, and Visualization	3
CPST 248	User Experience Design Fundamentals	3
CPST 249	User Experience Design Tools and Techniques	3
CPST 341	User Experience Design to Drive Business	3
SCPS Courses		
CPST 200	Introduction to Degree Completion	3
CPST 201	Civic Identity and Development	3
CPST 397	Capstone	3
Core Requirements		
The number of hours remaining toward Core requirements can vary due to transfer credit. [1]		
Mission Specific Requirements		
Mission specific requirements can vary from 0 to 15 credit hours based on your prior credit.		
General Elective Requirements		
Students may have some general elective coursework to complete if their transfer credit and remaining required hours (Core, mission specific, major, etc.) do not total 120.		
Total Hours		**120**

[1] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Develop modern, standards-compliant web applications while demonstrating proficiency in best practices, utilizing contemporary web technology solutions, and effectively managing software project versions through version control techniques.
- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives

with UX Design goals by effectively utilizing the User Experience (UX) Design process.
- Utilize client-side services to interact with server-side APIs, model and implement structured and unstructured data, and perform data analysis using standard toolkits and libraries.
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions.

School of Education

Mission and Vision

Our Vision

At the School of Education of Loyola University Chicago, future education leaders will have a transformational experience, one that prepares them to address social inequalities in both their local and global communities through the power of education and research.

Our Mission

The School of Education at Loyola University Chicago, a Jesuit Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance equity in education in service of social justice, engaged with Chicago, the nation, and the world. In pursuit of our vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice.

Our mission is social justice, but our responsibility is social action through education and research. We fulfill our responsibility by preparing professionals to serve as teachers, administrators, counselors, psychologists, and policymakers who work across the human developmental continuum, and by conducting research on issues of professional practice in schools, families, and communities. In our immersive learning environment, students gain both second-to-none foundational knowledge and a strategic system-wide vision working alongside some of the top scholars and teachers in the nation. Through our rigorous curriculum, students learn to be comfortable with the uncomfortable, supported by our passionate and dedicated faculty, staff, and administrators. And they leave with lasting relationships with each other and an extensive alumni network of leaders in education across Illinois, the U.S., and the world.

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Counseling Psychology (CPSY)

CPSY 100 Intro Var Chd Dev&Impl Sp Educ (3 Credit Hours)
No course description is available

CPSY 200 Psyc Acad & Persnl Effect (3 Credit Hours)
No course description is available

CPSY 220 Speech & Language Development (3 Credit Hours)
No course description is available

CPSY 224 Career and Life Planning Seminar (3 Credit Hours)
Because most students will make several career or job changes during their lives, the purpose of this course is to teach students a decision-making process that can be used when making career-related decisions. planning; and planning an effective job search campaign.
Course equivalencies: CPSY 224/UNIV 224
Outcomes:
Students will be able to apply the decision-making process to a decision they are trying to make (eg, choosing a major, choosing a career)

CPSY 273 Developmental Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY273/PSYC273

CPSY 323 Theories of Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 324 Career Counseling and Development (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 332 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 333 Abnormal Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY333/PSYC331/ACPSY280

CPSY 334 Child, Family, and Community (3 Credit Hours)
No course description is available

CPSY 335 Attitudes, Values & Sexual Behavior (3 Credit Hours)
No course description is available

CPSY 337 Adolescent Development (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course introduces students to developmental processes, social context, variance (diversity), and psychological/educational implications of the life stage called "adolescence".
Outcomes:
Students will be expected to demonstrate an understanding the stages of normal adolescent development within a variety of cultural contexts as well as situations which compromise adolescent mental health and well being

CPSY 338 Psychology of Personality (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY338/PSYC338

CPSY 341 Principles of Guidance (3 Credit Hours)
No course description is available

CPSY 342 Identity and Pluralism (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. A critical examination of theory and research on the role of culture in identity development. Particular emphasis will be given to such concepts as racism, sexism, ethnicity, culture, class prejudice, and ethnocentrism and how these help shape an individual's identity and society's conceptualization of culture.
Outcomes:
Students will demonstrate ability to think critically about issues of race, class, culture, and gender, and to analyze how these issues play themselves out in our schools and school systems

Curriculum, Instruction & Educational Psychology (CIEP)

CIEP L359 Reading - Elementary Lab (1 Credit Hour)
No course description is available

CIEP L362 Literacy Instruction in the Content Area-Lab (1 Credit Hour)
No course description is available

CIEP L414 Instructional Methods Lab (1 Credit Hour)
No course description is available

CIEP L421 Literacy Instruction Elementary Lab (1 Credit Hour)
No course description is available

CIEP L423 Advanced Literacy Instruction in Content Area-Lab (1 Credit Hour)
No course description is available

CIEP LM60 Secondary Methods: Social Studies Lab (1 Credit Hour)
No course description is available

CIEP LM61 Secondary Methods: English Lab (1 Credit Hour)
No course description is available

CIEP LM62 Secondary Methods: Mathematics Lab (1 Credit Hour)
No course description is available

CIEP LM63 Secondary Methods: Modern Languages Lab (1 Credit Hour)
No course description is available

CIEP LM64 Secondary Methods: Science Lab (1 Credit Hour)
No course description is available

CIEP LM83 Teaching Science in Elementary School-Lab (1 Credit Hour)
No course description is available

CIEP M03 Student Teaching: Infants, Toddlers and PreSchoolers (6 Credit Hours)
This course (along with the related field experiences) serves as a continuation of the Methods courses and meets the requirements of a preprimary student teaching experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates will be provided with supervised applied experience in assessment and instruction with children in early childhood special education and will be prepared to work in an early childhood special education setting

CIEP M04 K-3 Student Teaching (9 Credit Hours)
Pre-requisites: CIEP M03
This course is the culminating experience of the Early Childhood Special Education Teacher Education Program. Candidates are placed in a classroom with an experienced cooperating teacher.
This course satisfies the Engaged Learning requirement.
Outcomes:
In addition to their planning and teaching responsibilities, student teachers also are expected to reflect on their experience, develop their planning and instructional skills, and compile a teaching portfolio

CIEP M13 Techniques of Teaching in Secondary Schools (3 Credit Hours)
This course introduces the secondary education student to the realities of the public, urban middle or high school setting. It provides students with an initial experience to the actual teaching of adolescents within their major discipline. Supervision and feedback are provided by the university course instructor and a subject specific high school teacher in the field. Students enroll concurrently in CIEP M14.
Outcomes:
Students will be able to demonstrate principles of lesson design in a specific subject content, create instruction designed for students in a diverse urban setting, analyze and apply "best practices" pedagogy, and develop a personal philosophy of teaching

CIEP M14 Secondary School Teaching in Context: Clinical Seminar (1 Credit Hour)
Directed classroom experiences that consist of a minimum of 30 clinical hours that include lesson planning and teaching related to the course content. The seminar meets only during the clinical field experience. Co-register with CIEP M13.
Outcomes:
Students will be able to observe exemplary practices in selected urban high school classrooms, create and deliver instruction to students in that setting, and analyze and reflect on those experiences

CIEP M15 Methods Teaching Art & Sec (3 Credit Hours)
No course description is available

CIEP M16 K-2 Literacy Methods for EC (2 Credit Hours)
This course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research based comprehensive literacy instruction in K-2 elementary classrooms and will emphasize the scientific foundations of reading instruction: phonics, vocabulary, text comprehension and fluency.
Outcomes:
A student enrolled in CIEP M16 will demonstrate beginning competence in the knowledge base, skills, and strategies stated in the Illinois Professional Teaching Standards and ECE standards

CIEP M17 Early Childhood Math Methods (2 Credit Hours)
Two credit hour math methods course specifically for early childhood special education majors. this course is designed to reflect current ISBE standards, and best practices in early math. It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum.
Outcomes:
It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum

CIEP M20 Methods-Materials Elementary Science-Social Studies (1 Credit Hour)
No course description is available

CIEP M21 Methods-Materials Mathematics (3 Credit Hours)
No course description is available

CIEP M22 Problems-Materials Teaching Reading & Language Arts (3 Credit Hours)
No course description is available

CIEP M23 Introduction to Teaching and General Elementary Methods (3 Credit Hours)
This course is designed to help students examine the complex role of the teacher and to understand principles and methods of curriculum, instruction, and evaluation in the elementary school.
Outcomes:
Students will be able to design an instructional plan, analyze the characteristics of an effective classroom, and articulate major challenges facing school systems

CIEP M24 Practice in Instruction-Elem (1 Credit Hour)
No course description is available

CIEP M30 Academic Assessments and Interventions (3 Credit Hours)
In this course, students will learn about psychological and educational assessment with a special focus on issues related to non-biased assessment and the link between assessment and intervention in the instructional consultative process.
Outcomes:
Students will develop and administer appropriate intervention plans related to the instructional needs of students with disabilities

CIEP M31 Behavior Interventions: Assessments and Supports (3 Credit Hours)
The purpose of this course is to develop the students ability to provide positive support to learners whose behavior(s) impedes their learning or the learning of others.
Outcomes:
The student will be able to plan and develop school wide group and individual supports, make adjustments as needed to IEPS, and assess the on-going progress being made by students for whom behavioral interventions have been planned

CIEP M32 Exceptional Learner II (3 Credit Hours)
This course provides in depth understanding of the ethical and professional issues related to collaborative service provision for children with disabilities.
Outcomes:
By viewing ability within the broader context of human diversity, students will learn instructional strategies that foster a student's meaningful participation in heterogeneous classrooms as well as the larger communities in which they live

CIEP M33 Accessing and Adapting the General Education Curriculum (3 Credit Hours)
Within this course, candidates explore methods to adapt the general education curriculum in order to meet the individual needs of students with disabilities. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and vocational and social skills curricula will be addressed along with behaviors and modification related to low incidence exceptionalities.
Outcomes:
Candidates will demonstrate an understanding of adapting the general education curriculum for students with special needs through the design of a universalized lesson plan, a synthesis of relevant literature, and researching assistive technology

CIEP M34 Family, Community and School-Based Consultation (3 Credit Hours)
Within this course, candidates explore how members of families affected by disability and school/community professionals can enter into productive partnerships and create positive outcomes for students in elementary and secondary schools. Different approaches to work on school or community based teams, the different aspects of planning and implementing team process, and the challenges and threats to that process, are examined.
Outcomes:
Candidates will demonstrate an understanding of collaborative relationships, and design and evaluate a wraparound plan for a student with a disability based on case study information and research

CIEP M35 Methods of Instruction: Infants, Toddler and Preschoolers (3 Credit Hours)
This course is designed to prepare candidates to develop curriculum and assessment strategies for working with infants, toddlers, and preschool children.
Outcomes:
Candidates will develop a strong foundation of so that they are able to make more successful accommodations and modifications for children with exceptionalities

CIEP M36 Methods of Teaching K-3: Social Studies (3 Credit Hours)
The purpose of this course is to provide an overview of teaching social studies to student in Kindergarten through third grades.
Outcomes:
Teacher candidates will become prepared to develop social studies curriculum appropriate for students in the primary grades including the development of a classroom management philosophy (and the necessary skills for implementing it), as well as the development of instructional techniques in preparation for student teaching

CIEP M37 Methods of Teaching K-3: Math and Science (3 Credit Hours)
This course focuses on math and science content and methods for teachers in kindergarten through grade three.
Outcomes:
Candidates will learn, design, and teach curriculum and lesson plans in math and science, as well as formal and informal assessment strategies

CIEP M38 Methods of Teaching K-3: Reading and Literacy (3 Credit Hours)
This course prepares candidates to guide young children from diverse cultural backgrounds in learning to read and write.
Outcomes:
Teacher candidates will become familiar with and learn to 1) recognize and describe the development stages of learning to read and write for 4-8 year olds, 2) identify factors that influence this learning process, and 3) develop curricula for reading and writing

CIEP M42 K-2 Special Education Methods for ECSE (2 Credit Hours)
In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.
Outcomes:
Demonstrates current knowledge of integrated learning experiences for children from birth through grade three and understands the central concepts and tools of inquiry in each of the following content area: language and literacy (English language arts); mathematics; science; health, safety, nutrition, and movement (physical development and health); art, music, and drama (fine arts); and social science; understands how to plan developmentally and culturally appropriate curriculum; understands how to use and integrate appropriate technological resources into classroom instruction

CIEP M43 Special Education Methods: Infants, Toddlers and Preschoolers (3 Credit Hours)
This course provides an overview in curricular adaptations and instructional strategies that address the needs of young children.
Outcomes:
Candidates will gain experience in developing strategies for meeting the educational and developmental needs of infants and young children with disabilities, as well as those who experience circumstances and conditions that potentially interfere with optimal growth and development

CIEP M44 Special Education Methods K-3 (3 Credit Hours)
This course is designed to meet the needs of future general and special education teachers in diverse and inclusive classrooms with particular focus being given to whole-class models for addressing student diversity and disabilities, followed by specific instructional strategies and interventions for students with particular types of special needs.
Outcomes:
Candidates will become familiar with inclusive strategies and methods for monitoring performance during pre-referral interventions

CIEP M47 Choral Conducting (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM47/MUSCM47

CIEP M48 Art in the Elementary School (1 Credit Hour)
This course presents students with an overview of the elements and principals of visual art, reviews arts materials and explores methods of integrating arts with core curriculum: Language Arts, Math, Science and Social Studies.
Outcomes:
Students will be able to identify the elements and principles of art and create visual art projects incorporating core curriculum with the knowledge of art materials

CIEP M60 Secondary Methods: Social Studies (3 Credit Hours)
In this course students examine teaching and learning in the social studies in grades 9-12. Students explore a variety of methods for teaching each discipline within the social studies as distinct subjects and as elements of interdisciplinary courses. The course emphasizes curriculum planning, practice teaching in the social studies and fieldwork in schools and social studies-related organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will design curricula and demonstrate instructional strategies in the social studies that meet the needs of diverse learners and focus on deep engagements with social studies content

CIEP M60L Secondary Methods: Social Studies Lab (0 Credit Hours)
No course description is available

CIEP M61 Secondary Methods: English (3 Credit Hours)
This course provides an intensive examination of the methods utilized in the teaching of language arts in grades 9-12. The course allows opportunities for students to synthesize their philosophy, content knowledge, and practice, in preparation for student teaching. In addition, students will be able to design and implement meaningful literacy experiences and curricula.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEPM61/ENGL396
Outcomes:
Students will be able to implement methods of teaching language, composition, and literature, in grades nine through twelve

CIEP M61L Secondary Methods: English Lab (0 Credit Hours)
No course description is available

CIEP M62 Secondary Methods: Mathematics (3 Credit Hours)
This course is designed to provide students with the knowledge and methods necessary for success in teaching in today's secondary mathematics classroom.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to implement methods of teaching mathematics and methods of assessment in grades sixth through twelve

CIEP M62L Secondary Methods: Mathematics Lab (0 Credit Hours)
No course description is available

CIEP M63 Secondary Methods: Foreign Language (3 Credit Hours)
This course is designed to prepare students to enter their student teaching experience with having created a standards-based curricular unit including assessments, goals, objectives, and activities/ assignments.
Outcomes:
Students will be able to implement methods of teaching a foreign language and methods of assessment in grades sixth through twelve

CIEP M63L Secondary Methods: Modern Languages Lab (0 Credit Hours)
No course description is available

CIEP M64 Secondary Methods: Science (3 Credit Hours)
This course is designed to help pre-service teachers develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the high school level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to draw Teaching Science in the Elementary/Middle School connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

CIEP M64L Secondary Methods: Science Lab (0 Credit Hours)
No course description is available

CIEP M65 Methods in Secondary School Music (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM65/MUSCM65

CIEP M77 Bilingual/Bicultural Methods and Materials (3 Credit Hours)
This course is designed to provide participants with the knowledge, skills, and competencies needed to meet the needs of English Language Learners in bilingual contexts.
Outcomes:
Students will understand the theoretical basis, methods, and techniques needed for effective teaching in bilingual bicultural classrooms and will be able to develop materials to put bilingual theory and methods into practice

CIEP M78 Methods/Materials Teaching English as a Second Language (3 Credit Hours)
This course is designed as a practical hands-on course that explores best practice in teaching in English with linguistic minority students.
Outcomes:
Students will learn methods of teaching listening, speaking, reading, and writing in English and methods of integrating the teaching of language and academic content, tailored to meet the needs of individual English Language Learners

CIEP M80 Materials and Methods for Middle School Math Instruction (1-3 Credit Hours)
This course provides students with a broad range of instructional materials and activities for teaching standards-based mathematics in the middle school.
Outcomes:
Students will be able to teach mathematics in departmentalized programs in the elementary schools, utilizing a wide range of manipulatives and technologies

CIEP M80L Mtls & Mthds Math Instr Gr 6-8 Lab (0 Credit Hours)
No course description is available

CIEP M83 Teaching Science in the Elementary/Middle School (3 Credit Hours)
This course is designed to help students develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the elementary and middle school levels.
Outcomes:
Students will be able to draw connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

CIEP M83L Advanced Instruction Subject Specific Lab (0 Credit Hours)
No course description is available

CIEP M86 Middle School Science Methods (3 Credit Hours)
This course will be paired with one of the CAS science courses; it emphasizes various advanced Instructional models such as inductive, deductive, inquiry role development, technology integration, and cooperative learning.
Outcomes:
Students will be able to understand and practice instructional models to effectively teach ALL students and assess their learning

CIEP M96 Teaching Theatre in Secondary School (3 Credit Hours)
No course description is available
Course equivalencies: X-THTR303/CIEPM96

CIEP M99 Methods Teaching Speech Secondary School (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM99/CMUN308

CIEP MU1 Student Teaching: Special Education (9 Credit Hours)
No course description is available
This course satisfies the Engaged Learning requirement.

CIEP MU2 Practicum (Student Teaching) BD II (8 Credit Hours)
No course description is available

CIEP MU3 Student Teaching-Early Childhood (9 Credit Hours)
No course description is available

CIEP MU4 Student Teaching in Music (9 Credit Hours)
No course description is available

CIEP MU5 Student Teaching: Elementary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the elementary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP MU6 Student Teaching: Secondary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the secondary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP 104 Mathematics for Teachers I (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this first course, students study geometry, measurement, data analysis and probability and fulfill the civic engagement value of core by tutoring in the Chicago Public Schools.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and tutor elementary-aged students

CIEP 105 Mathematics for Teachers II (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this second course, students study algebra and numbers and operations.
Course equivalencies: X-CIEP105/MATH148
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in middle school classrooms

CIEP 106 Math for Teachers III-Computer (3 Credit Hours)
No course description is available

CIEP 112 Strategies for Learning (1 Credit Hour)
This course is designed primarily for first and second year students to strengthen their academic skills. This course provides an opportunity for students to evaluate their goals and motivation for studying at Loyola and to develop effective strategies for academic success.
Course equivalencies: CIEP 112/UNIV 112
Outcomes:
Students will have a clearer view of their goals and the steps and strategies needed for achieving academic success

CIEP 113 First Year Seminar (1 Credit Hour)
This one-credit seminar course is open to incoming first-year STEP students only. Students will complete assignments related to personal and academic goals, and strategies for achieving academic success.
Course equivalencies: UNIV 113/CIEP 113

CIEP 113A First Year Seminar I (0 Credit Hours)
No course description is available

CIEP 113B First Year Seminar II (1 Credit Hour)
No course description is available

CIEP 114 Critical Skills (1 Credit Hour)
This course will focus on concepts and strategies for academic success and critical thinking. We will explore models for developing skills that will aid in success in educational, career, and personal endeavors. This course will also focus on learning how to evaluate goals and on motivation for studying at Loyola and how to develop effective strategies for continued academic success. Students will participate in class discussions, class projects, and service projects that are particularly aimed at teaching each student a variety of skills that they will apply to academic areas, the university community, and other critical areas. Students will study critical thinking, societal pressures, problem solving, and personal issues that may affect college success.
Outcomes:
This course will offer students a series of learning support, academic success skills and specialized advising; The skills for academic achievement and life-long learning are covered; Various aspects of transitional and other motivational issues that traditionally impede student success will also be explored; This course will also provide students with a framework where they will be able to set personal goals and develop strategies to succeed

CIEP 185 Understanding Science for PK-12 Educators (3 Credit Hours)
The course explores the following questions: What is science? How does it work? Why is it important? What challenges and threats does it face in the 21st century? The course also addresses fundamental principles of topics from the physical sciences and engineering within the context of and for the purpose of extending PK-12 education. Alignment with the respective National Science Teaching Association Standard is as follows NSTA Standard 1: Content Knowledge.
Outcomes:
Students who take this course will understand the nature of scientific knowledge; engage in scientific and engineering practices in order to enhance their knowledge and understanding of the natural world and of foundational concepts within the physical sciences and engineering disciplines; make meaningful connections within and between science disciplines; articulate core challenges and threats to science in the 21st century; develop critical thinking and reasoning skills; develop strategies to promote science acceptance and confront mis- and disinformation and science denial; and develop strategies to promote equity and inclusion within science and science education

CIEP 201 Seminar in Teaching I (0-1 Credit Hours)
The purpose of the Seminar in Teaching 1 is to provide a mechanism for the development of a learning community composed of teacher candidates and teacher educators. Teacher candidates enroll as freshmen and meet formally, as a cohort, four times during each semester throughout their senior year. The seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with the university faculty and 2 professional teacher practitioners through shared learning experiences, which include opportunities to observe and reflect on model teaching strategies. The Seminar in Teaching 1 focuses on the development of critical thinking and problem-solving skills that define the teacher in both urban and suburban classrooms. Academic advising sessions will be scheduled to monitor academic progress and to encourage professional development.

CIEP 202 Seminar in Teaching II (1 Credit Hour)
This seminar along with 201, 203, 204 prepares future teachers by offering a monitoring process that connects teacher candidates to each other and with university faculty and professional teacher practitioners through shared learning experiences. Freshman has taken educational psychology in this cohort, which meets weekly throughout the semester. As a cohort, they discuss and relate their own cultural education and backgrounds to understand how beliefs and experiences influence decision-making or educations and how these experiences impact teaching careers. Teacher candidates experience various teaching strategies, address current and historical educational issues, and reflect on modeling skills. Development of critical thinking and problem solving skills revolve around curriculum issues such as beliefs and philosophies, historical events that have helped to shape our current educational system, schools in society, current social problems and how schools are addressing these issues, partnerships in the school arena, and state and federal regulations. Discussion based on outside work will be part of the course agenda. Various technologies will be used to assist candidates during the course.

CIEP 203 Seminar in Teaching III (1 Credit Hour)
The purpose of the Seminar in Teaching III is to provide a mechanism for the development of a learning community composed of teacher candidates and teacher educators. This seminar was specifically designed for transfer students to assist with their transition into the Teachers for the 21st (T21C) program. The seminar also serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other, with the university faculty, and with the professional teacher practitioners through shared l earning experiences that include opportunities to work with students and teachers in Chicago Public Schools.

CIEP 204 Seminar in Teaching IV (1 Credit Hour)
The Seminar in Teaching IV continues an exploration of the challenges and rewards of teaching. The purpose of the Seminar in Teaching IV is to provide an on-going mechanism for the development of a learning community composed of teacher candidates and teacher educators. Teacher candidates meet formally, as a cohort, four times during each semester throughout the teacher preparation program. The seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with university faculty and professional teacher practitioners through shared learning experiences.

CIEP 206 Children's Literature (3 Credit Hours)
This course is designed to explore the genres of children's literature. Coursework involves reading and responding to various genre and engaging in professional book discussions to learn key strategies for teaching.
Course equivalencies: X-CIEP206/ENGL206
Outcomes:
Students will read and respond to multiple texts written for the adolescent reader, design instructional strategies to encourage reader response in classroom settings, and create a thematic literature-based teaching unit

CIEP 210 Early Childhood Development: Typical and Atypical (3 Credit Hours)
This course provides a framework for studying the process of human development and explores the physical, cognitive, social, and emotional development of children birth through age eight.
Outcomes:
Candidates learn milestones in each area of development in the first eight years of life and learn to recognize typical and atypical development in young children

CIEP 211 Introduction to the Profession: Early Childhood/Special Education (3 Credit Hours)
In this course, candidates will investigate the profession of early childhood special education, including a historical overview of early education, a review of theoretical program models and types of early childhood programs, discussion of available community resources, professional organizations, and exploration of contemporary trends and issues in programs for children with special needs ages birth to eight.
Outcomes:
Candidates will interpret and analyze trends in early care and education, including diversity, early intervention and special education legislation, public policy, and educationally appropriate practice

CIEP 229 Introductions of Educational Psychology (3 Credit Hours)
Students will learn basic to apply psychological principles in varied instructional settings, including theories of learning and development.
Outcomes:
Students will demonstrate an understanding of basic educational psychological principles and their application to learning and instruction in the classroom

CIEP 260 Interdisciplinary Wrkshp: Sqnc Two-Intro Responsive & Inclusive Classrooms (1-4 Credit Hours)
The modules in Sequence Two explore how the school is itself a community and how the organization and environment of a school influence student learning. exploration of the local communities that schools are situated in. This course builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning, The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 261 Computer Application to Education I (1 Credit Hour)
No course description is available

CIEP 290 Fact, Fiction, or Somewhere In Between? (3 Credit Hours)
The course investigates misconceptions about science, math, humanities, and social sciences through the lens of learners¿ varied social identities, prior knowledge and lived experiences, and research about how people learn. Students will identify misconceptions commonly learned in K-12 classes, reflect on how those misconceptions may shape ones¿ current understandings, and explore approaches for uncovering and confronting misconceptions and false beliefs in productive ways. - Effective instruction is guided by research-based principles of how people learn - Student learning is facilitated through effective instruction and assessment - Instruction that promotes intellectual virtues including open-mindedness and intellectual humility, courage, and diligence can help prepare students to better resist misinformation and also promote empathy, caring, and responsibility
Outcomes:
Students who take this course will understand that: - Misconceptions are derived from a variety of sources including information environments, prior experiences, peers, culture, language, teachers¿ explanations, and instructional materials and are often resistant to change

CIEP 304 History of Math for Teachers (3 Credit Hours)
No course description is available

CIEP 305 Reading Teacher Practicum (3 Credit Hours)
This course is the culminating experience in the reading teacher endorsement minor.

CIEP 311 Seminar in Teaching V (1 Credit Hour)
No course description is available

CIEP 312 Seminar in Teaching VI (1 Credit Hour)
The purpose of the Seminar in Teaching is to provide a mechanism for the development of a learning community composed of teacher candidates. The Seminar will provide an opportunity for teacher candidates to acquire a foundational knowledge base focusing on the tenets of good teaching and effective teaching strategies. Teacher candidates will also have the opportunity to reflect on their personal philosophies and beliefs about teaching, learning, and expectations about the students they will encounter. The Seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with the university faculty and professional teacher practitioners through shared learning experiences, which include opportunities to observe and reflect on model teaching strategies and to explore research-based concepts that focus on helping students to become successful in their academic, personal, and social lives. The Seminar in Teaching focuses on the development of critical thinking and problem-solving skills that define the teacher in both urban and suburban classrooms.

CIEP 313 Seminar in Teaching VII (1 Credit Hour)
No course description is available

CIEP 314 Seminar in Teaching VIII (1 Credit Hour)
The purpose of the Seminar in Teaching VIII is to provide a mechanism for the development of a learning community composed of teacher candidates. This course provides an opportunity for teacher candidates to refine and further develop a foundational knowledge base focusing on the tenets of good teaching and effective teaching strategies. Teacher candidates will also have the opportunity to reflect and refine their personal philosophies and beliefs about teaching, learning, and expectations about the students they will encounter. The Seminar serves to prepare future teachers by connecting teacher candidates with each other and with the university faculty and professional teacher practitioners through shared learning experiences. Teacher candidates will be encouraged to grow professionally through membership and participation in professional meetings and conferences.

CIEP 315 Language Development and Literacy (3 Credit Hours)
This course develops candidates' understanding of typical and atypical language development and principles that govern the process.
Outcomes:
Candidates learn how quality children's literature in early childhood programs can be used to maximize language and literacy development through authentic group experiences and activities

CIEP 327 Teaching English Language Arts in the Middle Grades (3 Credit Hours)
This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.
Outcomes:
Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum; Teacher candidates will become familiar with developmental issues related to learning to write across grades K -12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds

CIEP 328 Assessment and Diagnosis of Reading Problems (3 Credit Hours)
This assessment and diagnosis course provides the foundation knowledge and experiences in reading assessment and diagnosis that would be necessary for elementary or secondary classroom reading teachers.
Outcomes:
Reading teachers will recognize that reading is an active and complex process that involves skills, strategies, prior knowledge and purposes for reading within a goal-oriented process

CIEP 329 Materials, Resources, & Strategies for Reading Teacher (3 Credit Hours)
The purpose of this course is to provide teacher candidates in the reading teacher endorsement minor with an in depth knowledge and understanding of materials, resources, and strategies available to teachers whose primary teaching responsibility is the teaching of literacy.

CIEP 330 Typical and Atypical Development (3 Credit Hours)
The purpose of this course is to study the stages of psychological and cognitive development in children and adolescents with special attention to the similarities and differences among individuals with and without disabilities.
Outcomes:
Students will use their knowledge of typical/atypical development to design lessons, arrange learning environments, and select instructional strategies to promote their students' learning and social/emotional development

CIEP 332 School Wide Applications (3 Credit Hours)
This course focuses on the needs of a school as it develops and implements a LRE plan. It examines the planning involved in the development of comprehensive, school wide positive behavior support programs, the application of universal design to curriculum development, and the on-going evaluation of progress made by students for whom intervention is needed Outcome: Students will develop and school-wide behavior support plan.
Course equivalencies: CIEP 341 / CIEP 331 / CIEP 332

CIEP 333 Education of The Urban Child (3 Credit Hours)
No course description is available
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-CIEP333/BWS 333

CIEP 334 Child, Family & Community (3 Credit Hours)
No course description is available

CIEP 336 Child Development and Implications for Education (3 Credit Hours)
Survey of theory and research relevant to the cognitive, emotional and social development of children.

CIEP 337 Assessment of Infants and Preschool Children (3 Credit Hours)
The purpose of this course is to provide an overview of assessment practices for young children and their families.
Outcomes:
Candidates will become familiar with developmental screening, diagnostic evaluations, play-based assessment, curriculum/criterion-referenced assessments (including work sampling and portfolios), and ecological assessment of social and family contexts

CIEP 338 Theories of Learning (3 Credit Hours)
The purpose of this course is to investigate the factors that influence how students access, process, store, retrieve, and make use of experiences to (1) increase their understanding of academic content; (2) establish appropriate personal-social interactions; and (3) make transitions into the broader community.
Outcomes:
Students will apply theory strengthened by documented research findings to (1) design lesson plans consistent with the students' developmental levels and ways of knowing (learning styles) and (2) develop strategies to assess students' learning

CIEP 339 The Exceptional Child (3 Credit Hours)
This course is an introduction to the concept of exceptionality dealing with the educational implications of atypical child growth and development. Focus is given to the psychology and teaching of culturally diverse and atypical children including those with learning disorders.
Outcomes:
Students will have an increased understanding and demonstrate skills in: the connection between civil-rights issues and people with exceptionalities, and where the field of education has been, is now, and is going with regard to providing supports for people with special needs, their teachers, and family members

CIEP 340 Professional Applications in Special Education (3 Credit Hours)
This course will introduce candidates to research-based, hands-on teaching and learning tools to be implemented in the classroom. Designed to be taken during the special education student teaching experience, candidates will create appropriate learning tools to meet students' abilities and needs. Course
Outcomes:
Candidates will 1) develop competencies in the collaborative and consultative roles of special educators in the integration of individuals with disabilities into the general curriculum as well as educational and alternative settings; 2) reflect on their own practice to improve instruction and guide professional growth

CIEP 342 Transition Planning (3 Credit Hours)
The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in secondary school and community settings. Current perspectives on self-determination and quality of life issues as they relate to individuals transitioning to adulthood will be introduced.

CIEP 343 Adaptive and Assistive Technology (3 Credit Hours)
In this course, students will learn how to make all physical and virtual aspects of school fully accessible for their students, other faculty, and family members. They will have hands-on experience with a wide range of assistive and adaptive technologies (low, medium, and high tech) and become familiar with the A/A terminology and the most recent legislation related to AAT.
Outcomes:
Students will be able to integrate AAT into assessment plans, the IEP process, lesson planning and review, and daily classroom routines; Keeping in mind the specific characteristics of individual students, they will choose and then make use of appropriate technology to accomplish specific instructional/academic, physical, and social/emotional objectives

CIEP 350 Adolescent Literature (3 Credit Hours)
This course introduces the languages arts education student to the relevance and need for incorporating adolescent literature in the middle/secondary classroom and to the development and strengthening of literacy.
Outcomes:
Students will have broad and detailed understanding of the realities and intellectual context of middle/secondary language arts education and the role of adolescent literature within this context

CIEP 351 Curriculum and Teaching in the Middle School (3 Credit Hours)
The purpose of the course is to help students construct a conceptual framework within which they can effectively respond to the needs of middle school students.
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Students will learn the middle level philosophy and will examine how those beliefs and values affect both teaching and learning

CIEP 354 Classroom Management (3 Credit Hours)
This course is designed to help teachers develop a classroom environment conducive to quality instruction and optimal student learning by helping them establish classroom procedures, rules, and consequences; teach the social skills; unite the student teams; and solve behavior problems.
Outcomes:
Students will learn ways to take proactive steps to prevent many discipline problems before they happen as well as ways they can address those problems quickly and effectively when they do occur

CIEP 359 Teaching Reading (3 Credit Hours)
This course introduces the student to the teaching and learning processes associated with balanced literacy instruction in the elementary school. Developmental stages of learning to read and write, interactive teaching methods and materials are the focus of this course.
Outcomes:
Students will be able to make informed decisions regarding literacy instruction; They will be able to apply curriculum knowledge and instructional strategies in the development and teaching of literacy lessons

CIEP 359L Teaching Reading-Elementary Lab (0 Credit Hours)
No course description is available

CIEP 360 Interdisciplinary Workshop: Culture & Identity TLSC 140/150/160 Rome, Italy (3 Credit Hours)
The modules in Sequence 2 explore how the school is itself a community and how the organization and environment of a school influence student learning. This sequence builds off of Sequence 1's exploration of the local communities that schools are situated in. The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 361 Computer Application to Education II (2 Credit Hours)
In this course students will become familiar with concept mapping techniques, constructing web quests, and organizing classroom gradebooks and records. The purpose of these activities is to prepare students to meet the nine technology standards mandated by the Illinois content standards for teaching.

CIEP 362 Literacy Instruction in the Content Area (3 Credit Hours)
This course emphasizes reading and writing instruction as it applies to the subject areas taught in most elementary and secondary schools.
Outcomes:
Students will be able to plan lessons, create materials, and integrate the teaching of reading/writing in content areas (language arts, mathematics, science, social studies)

CIEP 362L Reading & Writing Content Areas Lab (0 Credit Hours)
No course description is available

CIEP 363 Workshop in the Individualization of Instruction (3 Credit Hours)
A workshop designed to assist elementary and secondary teachers, supervisors and administrators to implement instruction based on individual differences in learning styles and abilities.
Outcomes:
Individualized based on student's instructional needs

CIEP 364 Classroom Assessment (2 Credit Hours)
This course is designed to prepare teacher students to address the assessment and evaluation of student progress towards meeting targeted objectives, competencies, goals and standards.
Outcomes:
Students will be able to provide an accurate report of student achievement

CIEP 365 Health/Fitness Education (2 Credit Hours)
Through course readings, discussions, and assignments, issues related to health education in K-8, ideas and resources associated with maintaining a healthy lifestyle will be explored. The importance of nutrition and exercise as part of wellness and prevention of disease in the K-8 student locally & globally will frame course topics.
Outcomes:
Candidates will be able to: 1) demonstrate an understanding of human body systems and the importance of nutrition and exercise as part of wellness and prevention of disease; 2) Reflect on their roles as citizens in local and global societies, in health and wellness interactions and in advocacy roles involving health promotion for children

CIEP 366 Special Topic Seminar (3 Credit Hours)
This course is a seminar for Special Topics for SOE undergraduate students. This seminar will allow SOE to pilot newly developed and approved courses. This seminar will be used by SOE - ADSU, TL, and SPSY - programs covering various educational subjects and interdisciplinary topics.
Outcomes:
Seminar outcomes will be specific to the topic and program

CIEP 375 Theoretical Foundations of Teaching English ELL and Bilingual (3 Credit Hours)
This course is designed to introduce students to an understanding of the historical, political, philosophical, socioeconomic, and educational issues that led to the formation of ESL/BE (English as a Second Language/ Bilingual Education) educational policies, programs, and services for culturally diverse populations.
Outcomes:
Students will understand aspects of language learning and acquisition theories as they pertain to ESL/BE as well as contemporary issues in linguistic and cultural revitalization through bilingual education; Students will discuss current state and national educational legislation that impacts English Language Learners

CIEP 376 Assessment of ELLs (3 Credit Hours)
This course is designed to focus on recent developments and trends in the assessment of first and second language learning and content area learning for English Language Learners.
Outcomes:
Students will be able to use, analyze, and evaluate assessments in current use in K-9 schools systems with an emphasis on the use of assessment in planning instruction

CIEP 390 Field Study in Education (3 Credit Hours)
This course provides an opportunity to work with a small group of 8th graders from underserved Chicago public schools to improve their math achievement.
This course satisfies the Engaged Learning requirement.

CIEP 398 Independent Study (1-3 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on. Independent study of selected topics in Education under the supervision of a faculty member.

Educational Leadership & Policy Studies (ELPS)

ELPS 125 Introduction to Leadership Studies (3 Credit Hours)
This course is designed to provide an introduction to foundational theory and perspectives related to leadership. This includes an exploration of contemporary leadership knowledge and skills that are transferable to a variety of disciplinary contexts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on leadership as well as recognize critical knowledge and skills associated with leadership practice across various disciplines

ELPS 219 History of American Education (3 Credit Hours)
Pre-requisites: HIST 101 or HIST 102
No requirement for students with a declared major or minor in History. This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education.
Outcomes:
Students will demonstrate the ability to evaluate and explain the forces of historical continuity and change in American education

ELPS 222 Foundations of Ethics and Social Justice in Leadership (3 Credit Hours)
Pre-requisites: ELPS 125
This course introduces theories of ethics and social justice as critical frameworks through which to interpret leadership. Attention toward the process of ethical decision-making, using critical reflection as a tool for understanding complex leadership issues, and strategies for advancing leadership focused on social responsibility.
Outcomes:
Students will demonstrate competence in applying ethical and social justice frameworks in the interpretation and analysis of complex leadership issues as well as in the practice of leadership across a variety of disciplines

ELPS 223 Contextual Influences in Applied Leadership: Internship (3 Credit Hours)
Pre-requisites: ELPS 125 and ELPS 222; Leadership Minor
This online and experiential course provides a platform for students to apply learning associated with leadership theory, ethics, and social justice in practice through an applied internship experience. The internship site will provide a discipline specific experience through which to integrate and refine core skills and competencies associated with socially responsible leadership.
Outcomes:
Students will increase their capacity to engage effectively in socially responsible leadership in a discipline specific work context

ELPS 224 Cross Cultural Leadership: Lessons from Rome (3 Credit Hours)
Pre-requisites: ELPS 125; Leadership Minor
This course is designed to examine global and cultural influences on the manifestation of leadership using Rome as a historical and contextual reference point and learning laboratory. The course will examine cultural influences in the understanding of power, authority, and social justice as they relate to leadership and the development of cross-cultural competence.
Outcomes:
Students will be able to identify and describe cultural and global influences associated with power, authority, and social justice on leadership in social contexts

ELPS 230 Globalization, Education and Childhood (3 Credit Hours)
This course examines contemporary global shifts and transformations in how schools and other educational settings are set up and operate. In tandem with this the course examines the experience of childhood and notions of what it means to be a child both in terms of how this varies culturally, socioeconomically, and regionally, as well as how these experiences and conceptualizations are presently being transformed.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of how global and local issues are interwoven with regard to education; Students will be able to articulate a nuanced understanding (as regards schooling and education) of the ways that social justice concerns are being both advanced and hindered in our contemporary globalized world

ELPS 240 Urban Education: Policy and Practice (3 Credit Hours)
This course introduces students to some of the central policy questions currently afoot in American public education through consideration of one particular field of concern, Urban Education. Explores the sociological dimensions of schooling, the important questions of how race, social class and ethnicity impact American education, and the relationship between resources and outcomes at the heart of arguments about schools. Students will be able to demonstrate an understanding of the ways that policy is connected to practice in urban education.
Outcomes:
Students will be able to analyze the multiple and contested factors that influence urban education in the US

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education. This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

ELPS 300 History of Education (3 Credit Hours)
This course introduces students to the history of education in the United States, exploring the ideologies and theoretical frameworks that have been paramount in different historical periods and the ways they have shaped the social, cultural, economic, and political dimensions of educational institutions in America.

ELPS 301 History of Western Education (3 Credit Hours)
A historical analysis of the rise and development of educational movements, trends, institutions, and policies in the multicultural context of American society.
Course equivalencies: X-ELPS301/HIST302
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 302 Philosophy of Education (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. Study of major philosophical theories about educational practice, especially as these relate to pedagogical practice, curriculum development, and the response of schools to particular individual, community, and societal interests.
Outcomes:
The student will become adept at identifying philosophical issues embedded in current educational practice and controversies, especially as these relate to promoting the values of a democratic society, accommodating the interests of the society and particular groups within it, and the realization of social justice

ELPS 310 Leadership: Group Dynamics and a Mission Centered Approach (1 Credit Hour)
This course is designed to familiarize Resident Assistants/Managers with a variety of topics that have been formulated to assist them in building community, developing interpersonal relationships, creating intentional programs, and improving their crisis intervention skills. Topics may include, but are not limited to: identity formation, counseling, ethics, diversity, health, and current events in higher education.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 311 Student Leadership: Using Social Justice in Developmental Models (1 Credit Hour)
This class will examine social justice as it relates to building communities and creating positive interpersonal relationships between both the Resident Assistant/Manager and hall residents as well as among residents themselves. Topics may include, but are not limited to: program planning, the use of technology, service learning, vocation, career development, and the RA/RM impact on students.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 325 Leadership Studies Capstone (3 Credit Hours)
Pre-requisites: ELPS 125; ELPS 222; ELPS 223; and enrollment in the Leadership Minor
This course will explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, and systemic leadership.
Outcomes:
Students will understand the role of and capacities associated with leading personal and social transformation within their career fields and communities

ELPS 350 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy@JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 398 Independent Study (1-3 Credit Hours)
This course is an independent study under the supervision of a faculty member.
Outcomes:
The outcome for this course is an independent project, paper or other product that demonstrates advanced knowledge of a topic

Research Methods (RMTD)

RMTD 380 Statistical Methods (3 Credit Hours)
This undergraduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Course equivalencies: RMTD380 / CPSY380
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

Teaching, Learning & Leading (TLSC)

TLSC M42 Special Education Methods (2 Credit Hours)
Pre-requisites: BSEd students only
In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiation student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.

TLSC 110 The Profession and Our Program (TLLSC) (1 Credit Hour)
This module (course) introduces teacher candidates (students) to the profession and our program (TLLSC) with a focus on collaborative relationships within and among schools, families, and communities. This module (course) will expose teacher candidates (students) to specific knowledge and skill indicators necessary for educators to embody the dispositions of the profession.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will reflect on the knowledge, skills, and dispositions of educators with regard to teaching diverse students, the mission of Professionalism in Service of Social Justice, and the connection between research and practice related to collaborative relationships

TLSC 120 Bringing Language, Learning & Development Theory into Practice (2 Credit Hours)
In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 130 Sequence One: 130 Community Immersion (1 Credit Hour)
This module (course) is designed to engage teacher candidates (students) in an authentic exploration of the inherent relationship between P-12 schools and the surrounding community. Teacher candidates (students) are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities. Must be registered for TLSC 110 and TLSC 120 concurrently.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 140 Teaching, Learning and Leading for Social Justice (1 Credit Hour)
Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360; Restricted to All SOE Undergraduate Majors
Prerequisites or This module (course) builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy. Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

TLSC 150 Constructive Learning Environments For Diverse Students (1 Credit Hour)
Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360
This module (course) deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments. Candidates will complete a classroom management self-assessment and develop a related action plan for enhancing a constructive classroom environment. Prerequisites or Restricted to All SOE Undergraduate Majors

TLSC 160 Analyzing Culturally-Responsive Classroom Instruction (1 Credit Hour)
Co-requisites: (TLSC 110, 120, and 130) OR CIEP 360
This module (course) builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning. Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching. Prerequisites or Restricted to All SOE Undergraduate Majors

TLSC 210 Educational Policy For Diverse Students (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 220 Individualized Assessment & Instruction for Diverse Students (4 Credit Hours)
This module is specifically designed for candidates to appreciate, discern and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural and linguistic; in this way, candidates will explicitly focus on the multifaceted nature of planning for students with special needs and those who have been labeled as ELL. Through the use of case study research to collect individualized, authentic language and literacy assessment with one student, candidates will apply learning to the specific instructional context of a student who qualifies with at least one of the following labels: (a) student with special needs, (b) English language learner, or (c) struggling reader.

TLSC 221 Individualized Instruction and Assessment for Diverse Learners (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement, particularly students with diverse learning and behavioral needs. Through the use of case study research to conduct individualized assessments with diverse learners, candidates will work with students with special needs or those at risk of this being identified as having a disability. Candidates will apply learning to the instructional context with academically, behaviorally, culturally, cognitively, and socially/emotionally diverse students.
Outcomes:
- Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; - Use data to drive instruction and assess teaching and learning effectiveness; -Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; -Hold high expectations and build on the assets of diverse students (including, but not limited to, race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, gender identity); -Explicitly integrate the teaching of reading, writing, communication and technology across content area; -Create and support safe and healthy learning environments for all students

TLSC 222 Authentic Assessment and Instruction for Bilingual Learners (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual strengths and needs of students who speak a language other than English to plan instruction and support student achievement. Through the use of case study research, candidates conduct individualized, authentic assessments that focus on cultural backgrounds and language development of focal students. Candidates apply their learning with bilingual learners to support language and literacy development and acclimation to learning in the academic context
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess the effectiveness of their teaching and students' learning; Apply deep understandings of both content and language pedagogy to provide developmentally appropriate instruction to students who are learning English as an added language, who may have interrupted schooling, and/or who may have experienced trauma as a result of their immigration experiences and/or dangerous issues in their home country; Hold high expectations and build on the assets of students from different cultural and linguistic backgrounds (including, but not limited to, ethnicity, culture, language, SES, immigration status); Integrate the teaching of language and literacy across all content areas and in ways that use a variety of media to do; and Create and support safe and supportive learning contexts for all students

TLSC 230 Teaching Written Communication in Elementary Grade Classrooms (2 Credit Hours)
This module introduces teacher candidate's (students) to instruction in written communication across the curriculum. Candidates will learn evidence based practices for teaching writing, responding to writing and integrating best practices in writing instruction across content area instruction. The role of audience and purpose across types of texts (i.e., opinion, expository, narrative and research) will be emphasized.
Outcomes:
Teacher candidates (students) will develop, teach, and reflect upon content area writing lessons that address the stages of the writing process, incorporate the use of technology and include support for writers with diverse skills throughout the writing process

TLSC 231 Teaching Science/Writing in Elem and Middle Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Co-requisite TLSC 232; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing.
This course satisfies the Engaged Learning requirement.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instructional and materials that ensure rigorous, relevant, inquiry-based science instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 232 Integrated Teaching/Learning Social Studies & Writing in Elementary Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Corequisite TLSC 231; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This introduces candidates (students) to the disciplines of the social studies; provides experiences engaging in the teaching and learning of elementary social studies across varied school and non-school contexts; develops knowledge and skills to teach social studies through an inquiry approach and integrate writing.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instruction that ensure rigorous, relevant, inquiry-based social studies instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 235 Teaching Science and Writing in the Middle Grades Classroom (3 Credit Hours)
The content of this module focuses on the Framework for K-12 Science Education and the related Next Generation Science Standards (NGSS). A strong emphasis will be placed on disciplinary literacy within science, including reading comprehension strategies, facilitating scientific discussions, and integrating writing instruction that supports student learning. Students will engage with important science ideas, identify high quality resources, and undergo the process of planning cohesive storylines that could be implemented in middle grade classrooms.
Outcomes:
As a part of this module, candidates will understand that effective educators: - Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement; - Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; - Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; - Explicitly integrate the teaching of reading, writing, communication and technology across content areas

TLSC 236 Teaching Social Studies and Writing in the Middle Grades Classroom (3 Credit Hours)
This sequence addresses social studies instruction with a specific focus on middle grade classrooms. Teacher candidates will be introduced to the field of social studies and the disciplines within it have experiences engaging in the teaching and learning in this field, and specifically work to integrate literacy in powerful and purposeful ways. Candidates will learn culturally responsive teaching practices, choose and use high quality texts and resources, and utilize reading comprehension and analysis strategies as students ask essential questions that explore the important connections between history and current events.
Outcomes:
Each sequence and module in the Teaching and Learning with Schools and Communities Program (TLLSC) focuses on specific professional dispositions and candidates are offered opportunities to receive feedback on their dispositional growth; The teacher candidate commits to appropriate professional and interpersonal behaviors in this module by: - demonstrating professionalism and reflective practice in collaborating with teachers, students, administrators, families, and communities to improve achievement for all students (9N) (lB) (D4); - participating in ongoing professional development, reading, and research in order to deepen their knowledge and expand their repertoire of skills (90) (IB) (D5); - valuing and utilizing the unique identities and backgrounds of all students, families and communities as essential assets in learning environments (9L, 9N) (IB) (D7); - demonstrating that authentic literacy instruction is the responsibility of all teachers, across all disciplines and grade levels (2H, 6A) (IB) (D9); - valuing and promoting curiosity, creativity, and life-long learning in students (IB) (Dl5)

TLSC 240 Language, Culture, and Pedagogy in Bilingual Classrooms (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, AND TLSC 222 (Grade "C" or better); Restricted to BILI-BSED, and BILI-MINR
This module deals with bilingual education, schools, classrooms, and learners, with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism. Candidates will engage with parents, families, and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

TLSC 241 Language, Culture, and Pedagogy in Spanish Language Classrooms (0-3 Credit Hours)
This module offers a cultural, linguistic, and pedagogical immersion in a school setting to prepare teachers who will use Spanish as a medium of instruction. Participants spend two weeks in Mexico City living in a homestay and pairing with an elementary school teacher for a classroom teaching experience. Teacher candidates surround themselves with the rich cultural heritage and linguistic resources of Mexico, gaining a better understanding of the largest group of linguistically diverse students in Chicago and the broader United States.

TLSC 250 Developmentally Appropriate Practice with Infants/Toddlers & Their Families (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 251, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the first of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course explore current knowledge and research findings about high-quality, developmentally appropriate early childhood care and education in the context of programs for infants and toddlers (including those with special needs) and their families and is designed to prepare future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience (which includes components related to assessment, intervention, work with families, and infant/toddler development), students will demonstrate proficiency at designing safe, supportive environments of nurturing care for infants and toddlers (including those with special needs) and their families by applying the principles of developmentally appropriate practice in curriculum design/delivery, assessment, and intervention

TLSC 251 Family-Centered Assessment and Intervention in Early Intervention (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 250, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the second of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course includes intensive clinical experiences in EI with infants and toddlers with special needs and their families, and is designed to complement Infants-Toddlers-EI 1 (Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families) in preparing future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience which (like I-T-EI 1) includes components related to assessment, intervention, diverse families, and infant/toddler development, students will develop their skills in working directly with families in designing assessment systems and interventions for infants and toddlers with special needs that address family resources, priorities, and needs

TLSC 252 Foundations, Settings, and Studies of Effective Early Childhood Education (1 Credit Hour)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 253; Restricted to ECSE-BSED
This field-based module provides an introduction to the diverse settings in which children birth-8 are served. Candidates will investigate the interlaced professions of early childhood education and early childhood special education.
Outcomes:
Students will interpret and analyze trends in early care and education

TLSC 253 Developmentally Approp Practice Assmt&Intervention Young Children Spcl Nds (2 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 252; Restricted to ECSE-BSED
This course frames sequence 4 in the TLLSC teacher preparation program. It addresses knowledge and skills in understanding the development of young children with special needs and the implications of that understanding for assessment and intervention in birth to five.
Outcomes:
Candidates will develop classroom environments, curriculum, and instructional strategies for working with infants, toddlers, and preschoolers, as well as demonstrating mastery of authentic assessments required for IL state credentialing

TLSC 260 Typical and A-Typical Development (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates (students) will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 261 Significant Disabilities and Life Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs within individualize education plans

TLSC 262 Assistive and Adaptive Technology (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 263 Transition Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 300A Professional Learning Communities (0 Credit Hours)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 300B Professional Learning Communities (1 Credit Hour)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 310 Language and Literacy for Diverse Students (2 Credit Hours)
This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.
Outcomes:
Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies

TLSC 320 Using Classroom Data in a Collaborative Env to Advance Student Achievement (2 Credit Hours)
This module (course) develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs
Outcomes:
Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 325 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 326 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education. Course
Outcomes:
- Describe characteristics of teaching and learning in informal science settings; - Describe practices that support learning and development in informal science settings; - Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; - Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; - Explain challenges and barriers to collaboration between in and out of school science teaching and learning; - Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; - Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; - Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 330 Discipline-Specific Literacy for Diverse Students (2 Credit Hours)
This module (course) supports teacher candidates (students) in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies (technology and online resources) designed to target all students' literacy needs, including those with linguistically diverse backgrounds. They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery.
Outcomes:
Teacher candidates (students) will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts

TLSC 340 Teaching and Learning in an Area of Specialization (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12
Outcomes:
Teacher candidates (students) will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 350 Teaching and Learning with a Global Framework (4 Credit Hours)
Teacher candidates (students) will work with PreK-12 teachers to develop and implement a transdisciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates (students) for teaching in schools that offer an International Baccalaureate program.
Outcomes:
Teacher candidates (students) assess their instruction using a global framework in this module (course) and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 360 Developing Rigorous and Relevant Instruction & Assessment (3 Credit Hours)
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 370 Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep (3 Credit Hours)
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will, while delivering the instructional unit designed in Module 7.1, be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 380 Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (6-12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module. (1C, 4L, 4N, 4Q, 5M, 5N, 5J, 8I, 8O, 8S, 9K, 9N) (IB) EU9 S7, S8; Demonstrate understanding and proficiency in core concepts, constructs and working principles from theories and research when making decisions and taking actions related to specific TLLSC EUs and EU indicators. (1C, 2A, 2B, 2C, 2I, 2J, 2G, 3A, 3Q, 4A, 4L, 5A, 5B, 5E, 5F, 5S, 6B, 6C, 7A, 7B, 7C, 7F, 9L) (IB) EU10 K1, K2, K3, K4, S1, S2; Demonstrate the ability to recognize and value student diversity and the differences in how students learn and provide instruction to accommodate such diversity. (1K, 2K, 5M, 7M, 8J) (IB) EU11 S2, S3, S4, S6; Support and deliver instruction in cooperation with their assigned co-teacher. (1H, 1I, 1L, 3I, 3J, 3M, 3P, 4C, 4K, 4N, 5I, 7P, 9J)(IB) EU1 S7, EU2 S8, EU4 S7; Provide a written analysis of each observed lesson, with a focus on their ability to make content accessible, the level of student engagement, the use of developmentally appropriate teaching practices, and the teaching of English language learners and students with special needs. (1H, 3J, 5H, 5K, 5M, 5P,7Q)(IB) EU3 S10, S11, S16, S18 EU4 S5; Reflect in writing and discussion on their ability to deliver and adapt relevant instruction and assessments, classroom management and professional interaction with teachers, students and families. (5H, 5J, 9K) (IB) EU6 S12 EU2 S9; Conduct regular pre- and post-observation conferences with Internship Coaches and Co-teachers to evaluate personal instructional style, preparation, use of technology, collaboration to promote learning and professional interactions to determine their impact on barriers to student learning, student success, self-esteem and inclusion (4K, 4N, 5K, 5M, 5N, 8I, 8J,8O, 8R,8S, 9G, 9K, 9N) (IB) EU9 S6, S8.
This course satisfies the Engaged Learning requirement.
Outcomes:
Utilize research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students EU3; Create and support safe and healthy learning environments for all students EU9; Utilize information from theories and related research based practices when making decisions and taking action in their professional practice EU10; Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement EU11; Enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups EU1; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity) EU7; Engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students EU2; Design and implement standards-based units and lesson plans to maximize learning for all students by using an appropriate variety of assessments, culturally responsive practices, multiple resources/representations and questioning to encourage critical/high-order thinking inquiry and problem solving based on high expectations for each student's learning and behavior (3H, 3I, 3N, 3Q, 5I, 5L, 5M, 5Q, 5S, 7K, 7P, 8N, 9A) (IB) EU3 S2, S3, S5, S6, S9; Use data to evaluate and monitor students' needs, instruction and

Bilingual/Bicultural Education (BSEd)

Overview

The BSEd program in Bilingual/Bicultural Education was designed for students who seek to become licensed bilingual teachers of elementary-aged children. Loyola's Bilingual/Bicultural Education program prepares candidates to teach in two languages in the growing number of bilingual programs in the Chicago area and across the country. Building from candidates' rich bilingualism, they are prepared with knowledge and pedagogy to make a positive impact on the lives of multilingual students.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Bilingual/Bicultural Education majors earn a BSEd in Bilingual/Bicultural Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Elementary Education (grades 1 through 6), as well as the Bilingual Education and English as Second Language (ESL) endorsements. Graduates are also entitled to the International Baccalaureate certificate. All of these credentials are built into the Elementary Education major.

Related Programs

Certificate

- English as a Second Language (ESL) and Bilingual Endorsement Certificates (p. 896)

Combined

- Secondary Education/International Affairs (BSEd/MA) (p. 1335)
- Special Education/International Affairs (BSEd/MA) (p. 1372)

Curriculum

The Bilingual/Bicultural Education (BLBC) major includes Core Curriculum and School of Education courses. In addition, all majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. Specialized BLBC Education sections begin in Phase Two of the program. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the BLBC Education major.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the School of Education: CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Tier 1 Literacy Core requirements are also waived for BLBC majors. Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to each student's pathway.		
School of Education CIEP and ELPS courses		

Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors. At times, these courses will also address a specific portion of the Core (CIEP 206, ELPS 219, ELPS 302). Other courses address key knowledge and instructional skills (CIEP 104, CIEP 105, CIEP 359).		
CIEP 104	Mathematics for Teachers I	3
CIEP 105	Mathematics for Teachers II	3
CIEP 206	Children's Literature	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills to effectively support elementary aged students. Specialized modules for BLBC majors begin with Phase Two. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) under the supervision of a licensed and experienced bilingual teacher and University supervisor. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with the others in the major. PLCs are led by a faculty member with expertise in bilingual education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year BLBC BSEd curriculum.		
Phase One: Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities ((4 @ 0 credits) BLBC Education majors must enroll each fall in the TLSC 300B section that corresponds with their major. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester for all four years.)	0
TLSC 300B	Professional Learning Communities ((4 @ 1 credit) BLBC Education majors must enroll each spring in the TLSC 300B section that corresponds with their major. Students must enroll in PLCs every semester for all four years.)	1
Phase Two: Concentration		
TLSC 231	Teaching Science/Writing in Elem and Middle Grades	3
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	3
TLSC 240	Language, Culture, and Pedagogy in Bilingual Classrooms	3
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three: Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**74**

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. Bilingual/Bicultural Education majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

Course	Title	Hours
Sequence 1		
TLSC 300A	Professional Learning Communities (BLBC)	0
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
UCWR 110	Writing Responsibly	3
CORE	Theological and Religious Studies Tier I	3

All candidates must pass Elementary Education licensure test & Language Proficiency Test prior to licensure.		
	Hours	**13**
	Total Hours	**120**

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Elementary Education licensure exam prior to their final internship semester. Bilingual/Bicultural Education majors must also demonstrate proficiency in their selected language by passing the appropriate Language Proficiency test. This test is waived for students who have the Seal of Biliteracy on file in School of Education. Program faculty can provide more specific information on these requirements.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Early Childhood Special Education (BSEd)

The Early Childhood Special Education program is designed for any student who is interested in working with the youngest children, whether in general education, special education, or inclusive settings from birth to age 8. It emphasizes inclusive, specialized teaching practices to develop meaningful learning experiences for both typically developing children and those with disabilities.

Upon program completion, graduates earn a BSEd in Early Childhood Special Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in ECSE, which includes general and special education across the full range of birth to age 8. The ECSE also includes the English as Second Language (ESL) endorsement and three other Illinois early childhood credentials:

- The Illinois Early Intervention credential in Developmental Therapy
- Gateways Level 5 Infant/Toddler credential
- Gateways Level 5 Early Childhood credential

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as their foundation. For ECSE majors, this unique, research-based approach emphasizes authentic learning of practices through direct work with infants/toddlers, preschoolers, and school-aged children. TLSC modules largely take place in school and community settings and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities. Learn more by reading through the **Early Childhood Special Education Program Viewbook**.

Curriculum

The Early Childhood Special Education (ECSE) BSEd program includes Core Curriculum and School of Education courses, as well as field-based learning modules that carry a TLSC prefix. Each of these types of requirements is explained in the table below. ECSE-specific sections begin in Phase Two. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for complete information on the requirements of this major pathway.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the ECSE major (e.g., CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to you.		
School of Education CIEP and ELPS courses		
Your Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors and minors. At times, these courses will also address a specific portion of the Core (see above). CIEP 315 and all CIEP M courses were designed specifically for ECSE majors. These courses are linked with specific Sequences and field experiences and must be taken when indicated in the Suggested Sequence of Classes table.		
CIEP 104	Mathematics for Teachers I	3
CIEP 206	Children's Literature	3
CIEP 315	Language Development and Literacy	3
CIEP M16	K-2 Literacy Methods for EC	2
CIEP M17	Early Childhood Math Methods	2
CIEP M42	K-2 Special Education Methods for ECSE	2
CIEP M43	Special Education Methods: Infants, Toddlers and Preschoolers	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills for working effectively with young children and their families. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a preschool setting under the supervision of a licensed and experienced ECSE teacher. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with all others in the ECSE major. PLCs are led by a faculty member who specialized in early childhood education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year ECSE curriculum.

	Hours	**13**
	Total Hours	**120**

School of Education Graduation Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better. Grades of C- or below do not count toward degree requirements. Students must enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. For ECSE majors, these processes occur prior to the start of Sequences 1, 4, and 7. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Early Childhood Special Education licensure exam prior to their final internship semester. In order to receive the Illinois Gateways and Early Intervention credentials, graduates must apply to the institutions that grant them. While the ECSE BSEd program is approved by those institutions, these credentials were developed and are offered outside the system to educator licensure. They are not entitled through the SOE licensure office and may require application fees.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Education Policy Studies Minor

Designed for future teachers, educational policymakers, school district partner organization professionals, community organizers, and nonprofit professionals, the Education Policy Studies Minor prepares students with cross-disciplinary, field-informed knowledge of education policy within American and international school systems. This minor is open to all Loyola University Chicago undergraduates.

Loyola's Educational Policy Studies Minor program introduces students to the policies, ideas and decision-making that has created and can create change in our educational system. This program is a great choice for students who want to study, critically analyze, and confront systemic equalities in our education systems. And for those who want to prepare for work in education in a non-classroom setting, this minor is especially useful.

Upon completion of the minor in Educational Policy Studies, graduates will possess knowledge, skills, and professional values necessary to work in non-classroom educational settings, including after-school programs, nonprofit organizations, community-based organizations, or government offices.

TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
Total Hours		**22**

School of Education Requirements

Required Education Policy Studies Internship

The Education Policy Studies Internship experience helps students integrate and take action upon policy, theoretical and research coursework with a practical field-based experience. The internship requires 120 hours of field work. The internship course will meet periodically (but not weekly) throughout the semester to support students in their internship. Students are encouraged to begin researching internship sites the semester before they plan to take the internship course, and can work with the internship course instructor to identify prospective internship sites and develop a plan along with the site supervisor. Students are given permission to register for this course once they have confirmed an internship site in conversation with the internship course instructor.

It is recommended that students make use of resources available through Loyola's Office of Experiential Education in locating an internship site. Possible sites for ELPS 265 Cultural and Educational Policy Studies Internship include, but are not limited to, nonprofit organizations, school-based after school programs, community centers, education policy institutes, and religious organizations. Within these sites, student interns could work in the areas of educational programming, international development, humanitarian assistance, fundraising, grant writing, policy formation, program development, program evaluation, and advocacy. Student interns do not primarily work as direct service providers because this internship is intended to provide exposure to various dimensions of education policy work. Accommodations can be made for students who would like to do their internship while studying abroad.

Suggested Sequence of Classes

Educational Policy Studies minor courses may be taken in any order; we only require that the ELPS 265 (https://catalog.luc.edu/search/?P=ELPS%20265) Cultural and Educational Policy Studies Internship be taken after a student has completed at least two other courses required for the minor. TLSC modules must be taken together in a single semester.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Successful completers will possess a solid framework and understanding of the historical, sociological, cultural, and philosophical issues that bear on contemporary educational policy and practice.
- Successful completers will be able to demonstrate a firm understanding of global and local dimensions of education related questions and problems of practice.
- Successful completers will acquire the knowledge, skills, and field-based experience necessary to access a professional pathway in the field of education to advance social justice and to advocate with and for children and youth.

Elementary Education (BSEd)

Overview

The BSEd program in Elementary Education was designed for students who seek to become licensed elementary school teachers. This major focuses on laying the foundation for children's lifelong learning and development. Elementary majors are prepared to teach essential knowledge and skills (including literacy, numeracy, critical thinking, and social interaction), but also to foster children's curiosity, creativity, and thirst for knowledge. These students learn to create nurturing and inclusive classroom environments where children feel valued and supported. In the Elementary major, students will learn to tailor their instruction to meet the diverse needs of each student, employing innovative teaching methods to engage and inspire curiosity.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in K-12 school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Elementary Education majors earn a BSEd in Elementary Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Elementary Education (grades 1 through 6), as well as the English as Second Language (ESL) endorsement and the International Baccalaureate certificate. All credentials are built into the Elementary Education major.

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. Elementary Education majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

Course	Title	Hours
Sequence 1		
TLSC 300A	Professional Learning Communities (Elementary)	0

TLSC 110	The Profession and Our Program (TLLSC)	1

	Total Hours	**120**

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Elementary Education licensure exam prior to their final internship semester.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

English as a Second Language (ESL) and Bilingual Endorsement Certificates

At Loyola University Chicago, we recognize the imperative for all educators to have expertise to serve and support the growing number of students labeled as English learners, also referred to as emergent bilinguals. For this reason, the School of Education is proud to offer multiple avenues to English as a Second Language (ESL) and bilingual endorsements in Illinois, as well as states with reciprocity agreements.

English as a Second Language (ESL) Endorsement

The ESL endorsement is woven into all of Loyola's undergraduate teacher preparation programs, including Bilingual/Bicultural Education, Elementary Education, Secondary Education, Special Education, and Early Childhood/Special Education. Upon program completion, graduates are entitled to add the ESL endorsement to the Professional Educator License (PEL) they earn through completing their major requirements.

Our teacher education programs target and integrate understandings and practices that support multilingual students' language development simultaneous to learning in PK-12 settings. The ISBE requirements and ESL/bilingual professional teaching standards required for the ESL endorsement are integrated into undergraduate coursework. Each course in the undergraduate Education program outlines the standards and objectives addressed to develop expertise for working with multilingual students. The following coursework develops candidates' understandings and skills as an educator for this important student population:

Course Requirements

Code	Title	Hours
TLSC 120	Bringing Language, Learning & Development Theory into Practice (Linguistics)	2
TLSC 130 / TLSC 140 / TLSC 160	Sequence One: 130 Community Immersion (Cross-Cultural Studies for teaching Emergent Bilingual Students)	1
TLSC 210	Educational Policy For Diverse Students (Theoretical foundations of Teaching ESL)	2
TLSC 222 / TLSC 320	Authentic Assessment and Instruction for Bilingual Learners (Assessment of Bilingual Students)	2
TLSC 240	Language, Culture, and Pedagogy in Bilingual Classrooms	3
TLSC 310 / TLSC 330	Language and Literacy for Diverse Students (Methods & Materials for teaching ESL)	2
TLSC 340	Teaching and Learning in an Area of Specialization (Elective)	2
Total Hours		**14**

Suggested Sequence of Classes for ESL Endorsement

Note that no additional courses or modules are required. All of the requirements below are built into each Education major.

Course	Title	Hours
Year 1		
TLSC 120	Bringing Language, Learning & Development Theory into Practice (Linguistics)	2
TLSC 130 / TLSC 140 / TLSC 160	Sequence One: 130 Community Immersion (Cross-Cultural Studies for teaching Emergent Bilingual Students)	1
	Hours	**3**
Year 2		
TLSC 210	Educational Policy For Diverse Students (Theoretical foundations of Teaching ESL)	2
TLSC 222 / TLSC 320	Authentic Assessment and Instruction for Bilingual Learners (Assessment of Bilingual Students)	2
TLSC 240	Language, Culture, and Pedagogy in Bilingual Classrooms	3
	Hours	**7**
Year 3		
TLSC 310 / TLSC 330	Language and Literacy for Diverse Students (Methods & Materials for teaching ESL)	2
TLSC 340	Teaching and Learning in an Area of Specialization (Elective)	2
	Hours	**4**
	Total Hours	**14**

Bilingual Education Endorsement

The Bilingual Education endorsement is available to any teacher education candidate (i.e., Elementary, Secondary, Early Childhood/Special Education, Special Education) who is fluent and literate in a language other than English.

Why Seek a Bilingual Endorsement?

- Bilingual teachers are in high demand in Chicago Public Schools (CPS), throughout Illinois, and across the United States. Having this endorsement will increase your marketability to all schools regardless of your major.
- In the Chicago Public Schools, almost 1 in 5 students are emergent bilingual learners, with more than 110 different languages spoken by children and their families in this school district.
- Special education teachers who also have the bilingual endorsement are in extremely high demand.
- An increasing number of schools and school districts are implementing dual language programs (a type of bilingual education program model) in both elementary and secondary school settings. You will learn about this program model in TLSC 240 Language, Culture, and Pedagogy in Bilingual Classrooms/TLSC 410 Language, Culture and Pedagogy in Bilingual Classrooms and gain pedagogical knowledge and skills to be able to teach in dual language programs.
- You will increase your ability to effectively teach bilingual students, advocate for their needs, and work with their families across grade levels and content areas.

Course List for Bilingual Endorsement

Code	Title	Hours
TLSC 240 / TLSC 410	Language, Culture, and Pedagogy in Bilingual Classrooms	3

Suggested Sequence of Classes for Bilingual Endorsement

Course	Title	Hours
Year 2		
TLSC 240 / TLSC 410	Language, Culture, and Pedagogy in Bilingual Classrooms	3
	Hours	**3**
	Total Hours	**3**

Additional Requirements for the Bilingual Endorsement

1. **Complete 50 additional clinical hours in your bilingual target language.** Examples include:
   - Tutoring bilingual PK-12 students using their heritage language at one of our partner schools.
   - Tutoring children, youth, or adults at an area community organization to support clients' heritage language.
2. **Pass the IL Target Language Proficiency Test in the language for which you are seeking the endorsement. The IL Licensure Testing Service now offers the exam in 36 different languages.** For more information on the exams, please review the Language Proficiency Tests for an Educator License with Stipulations Endorsed as Transitional Bilingual section on the Illinois Licensure Testing System (https://www.il.nesinc.com/PageView.aspx?f=GEN_Tests.html) website.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

The program provides candidates with:

- knowledge and skills to effectively teach English language learners (ELLs) in the mainstream classroom and the English as a Second Language (ESL) context
- knowledge of foundations, instruction, and assessment for teaching ELLs in PK-12 context.
- necessary coursework to receive ISBE ESL endorsement in order to be highly qualified to work with the growing population of linguistically diverse students in the state of Illinois.

Leadership Studies Minor

Leadership Studies Minor is designed as an interdisciplinary course of study to complement a wide range of academic majors. Leadership Studies exposes students to the theory and practice of leadership across interdisciplinary boundaries to better prepare for professional and personal success. Students will study diverse theories and perspectives on leadership, examine the interplay of social justice and ethics in the practice of leadership, and develop a deeper understanding of contextual influences on leadership in an increasingly complex and global society. An emphasis is placed on cultivating critical self-reflection as well as analytical skills to enhance the application of the students' evolving conceptualizations of leadership in organizational and career contexts. Students will engage in an exciting internship experience and also have the opportunity to study abroad at Loyola's John Felice Rome Center. Leadership Studies courses are delivered online, hybrid, and also on-site at the Rome Center for a two-week immersive study abroad opportunity every summer.

	Total Hours	**18**

Learning Outcomes

- Graduates will demonstrate an understanding of leadership theory along with contextual influences on the practice of leadership.
- Graduates will demonstrate an understanding of ethical considerations in the pursuit of leadership for social justice.
- Graduates will demonstrate the capacity to apply knowledge and skills related to leadership in their unique disciplinary contexts and career fields.

Middle Grades (BSEd)

Loyola's Middle Grades Education program is designed for undergraduates seeking to become licensed middle school educators. The three Middle Grades Education pathways include a Middle Grades Education major and an additional content area (Language Arts, Social Studies, or Science). Mathematics is presently NOT available as a middle grades content area. However, if a candidate is an Elementary or Secondary Education major, they can add a Middle Grades endorsement to their IL Professional Educator License in any of the above areas (including Mathematics) by taking a small number of courses and passing the appropriate Illinois content area test in the Middle Grades content area. The SOE Undergraduate Advisor can provide details on endorsement requirements. Middle Grades majors require a greater number of courses in these content areas.

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This approach emphasizes authentic practices in real classrooms. TLSC modules largely take place in school and community settings across the City of Chicago and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon graduation, Middle Grades Education majors earn a BSEd in Middle Grades Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) that includes an endorsement in their content area, as well as the English as a Second

Language (ESL) endorsement and the International Baccalaureate (IB) certificate.

Major

- Elementary Education (BSEd) (p. 893)
- Secondary Education (BSEd) (p. 904)
- Special Education (BSEd) (p. 909)

Curriculum

The Middle Grades major includes Core Curriculum and School of Education courses. In addition, all Education majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the major.

The order of the TLLSC curriculum is fixed; it is strongly recommended that students refer to the Suggested Sequence of Courses (p. 900) to locate specific requirements of the major.

Code	Title	Hours
University Core courses		
Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements may be met by taking pre-approved courses within the Secondary Education major (e.g., ELPS 219 and ELPS 302). Certain Core requirements may be met by taking the courses in your content area major or through transfer credit. Consult the Suggested Sequence of Classes tables below to identify the Core requirements for each content area, and always consult with the SOE undergraduate advisor about which Core requirements apply to your major.		
Content area major courses		
These courses provide you with required foundational knowledge of the content area you plan to teach (e.g., mathematics, social sciences, English). Content area courses are usually offered through the College of Arts and Sciences and include students from other majors across the University. The specific required courses within your content area major (as well as any electives) are indicated in the Suggested Sequence of Classes tables below. Because of the strong concentration of this coursework in your content area, your content area major courses typically address not only degree and licensure requirements, but an area of the University Core as well. The SOE undergraduate advisor will guide you through these requirements.		
School of Education CIEP and ELPS Courses		
Education degree requirements include a small number of courses offered within the School of Education and designed for Education majors. At times, these courses address a specific University Core requirement; for example, all Secondary Education majors meet the Philosophical Tier 2 Core requirement by taking ELPS 302. Secondary English and Math majors must take ELPS 219 (Tier 2 Historical), and only Secondary English majors must take CIEP 350.		
CIEP 305	Reading Teacher Practicum	3
CIEP 327	Teaching English Language Arts in the Middle Grades	3
CIEP 328	Assessment and Diagnosis of Reading Problems	3
CIEP 329	Materials, Resources, & Strategies for Reading Teacher	3
CIEP 350	Adolescent Literature	3
CIEP 351	Curriculum and Teaching in the Middle School	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups each semester, called Sequences. As you move through the three TLLSC Phases, you will gain extensive field experience, as well as knowledge and skills that will help you stand out from graduates of other teacher education programs. You will enter the field prepared to work in today's diverse classrooms with students of many backgrounds. The TLLSC secondary curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a high school under the supervision of a licensed and experienced teacher in your content area in collaboration with a University Supervisor. You must also enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B). In these PLCs, you will collaborate with the other students in your major and content area. PLCs are led by faculty experts in each content areas. To better understand how this curriculum will look over your four-year undergraduate experience, you should visit the Suggested Sequence of Classes table for your content area. TLSC modules are listed below in numerical order.		
Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities (Secondary Education majors must enroll each fall in the TLSC 300A section that corresponds with their major/content area. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester.)	0
TLSC 300B	Professional Learning Communities (Secondary Education majors must enroll each spring in the TLSC 300B section that corresponds with their major/content area. Students must enroll in PLCs every semester.)	1
Phase Two - Concentration		
Phase Two includes one full semester (usually the fourth) of content area coursework and no TLSC modules.		
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2

TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**71**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Social Sciences Concentration

	Hours	**13**
	Total Hours	**126**

[1] Topic depends on semester.
[2] Offered irregularly; if it is not offered during Sequence 4, students must take in Sequence 6.

Math Concentration
This major is not accepting students at this time.

School of Education Requirements
Each Undergraduate student in the School of Education must complete all degree requirements with a grade of C or better in order to meet degree requirements. They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC field-based learning modules address the University requirement for Engaged Learning.

Licensure Requirements
In order to be entitled for the Illinois State Professional Educator License (PEL), students must also pass the Illinois licensure test(s) for their secondary content area prior to their final internship semester. Information about licensure tests will be provided by teacher education faculty.

Additional Undergraduate Graduation Requirements
All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes
- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Reading Teacher Minor
The Reading Teacher Minor supports educators in developing a strong knowledge base in the area of literacy. Strong literacy skills are essential for success across all content areas and grade levels. Our program prepares you with the foundational knowledge of language and literacy learning with a focus on social justice and an aim to help students become empowered through their own literacy skills. The Reading Teacher minor includes 19 credit hours in targeted aspects of literacy.

Upon completion of the BSEd from the School of Education, students meeting the Reading Teacher minor requirements are eligible to receive the Illinois State Reading Teacher Endorsement (for grades PK-12). This endorsement can only be added to a Professional Educator license; therefore, this minor is only open to students who are enrolled as Education majors and seeking to become licensed educators. Students with majors in Elementary Education, Middle Grades English Language Arts and Social Studies, and Secondary English Education can complete this minor within their four-year program plan. All other Education majors will likely require additional semesters to be added to their undergraduate program. Always consult with your SOE advisor to discuss how to complete minor requirements.

Combined
- English (BA/BSED) (p. 406)

Curriculum
The table below lists all requirements for the Reading Teacher minor. These include School of Education courses, TLSC field-based learning modules, and a practicum, all of which should be taken in the order displayed in the Suggested Sequence of Classes table. This ensures that students meet prerequisite requirements and enroll in minor courses intended to be aligned with particular semesters of the Education major. The Reading minor meets the Tier 1 Literary requirement from the University Core.

Reading Teacher minors who are majoring in Elementary Education also enroll in a specialized Professional Learning Community (PLC), where they collaborate each semester with all Elementary Reading Teacher minors and a faculty expert in literacy instruction.

Course Requirements
Code	Title	Hours
CIEP 206	Children's Literature	3
or CIEP 350	Adolescent Literature	
CIEP 305	Reading Teacher Practicum	3
CIEP 328	Assessment and Diagnosis of Reading Problems	3

CIEP 329	Materials, Resources, & Strategies for Reading Teacher	3
CIEP 359	Teaching Reading [1]	3
or CIEP 327	Teaching English Language Arts in the Middle Grades	
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
Total Hours		**19**

[1]
- Elementary Education majors should take CIEP 359.
- Middle Grades majors already take CIEP 327 and CIEP 359 as major requirements
- Secondary Education majors should take CIEP 327

Suggested Sequence of Classes

Course	Title	Hours
Year 1		
CIEP 206 or CIEP 350	Children's Literature or Adolescent Literature	3
	Hours	**3**
Year 2		
CIEP 359 or CIEP 327	Teaching Reading [1] or Teaching English Language Arts in the Middle Grades	3
	Hours	**3**
Year 3		
Fall		
TLSC 310	Language and Literacy for Diverse Students [2]	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
CIEP 328	Assessment and Diagnosis of Reading Problems	3
	Hours	**7**
Spring		
CIEP 329	Materials, Resources, & Strategies for Reading Teacher	3
	Hours	**3**
Year 4		
Spring		
CIEP 305	Reading Teacher Practicum	3
	Hours	**3**
	Total Hours	**19**

[1]
- Elementary Education majors should take CIEP 359.
- Middle Grades majors already take CIEP 327 and CIEP 359 as major requirements
- Secondary Education majors should take CIEP 327

[2]
- Note that TLSC 310/320/330 are always taken together. TLSC 310 and 330 are aligned with minor requirements.
- Prior to enrolling in TLSC 310/320/330, Reading Minors should pass CIEP 206/359 or CIEP 350/327

School of Education Policies

All Education majors enroll each semester in the TLSC 300A (fall) and TLSC 300B (spring) section designed for their major. Reading minors majoring in Elementary Education enroll in a specialized section of the PLC. PLCs meet on three Monday evenings at the end of each semester, and fall/spring PLC credit is issued in the spring. Grades of "C-" or lower in any course or module are not counted toward fulfillment of minor requirements. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites.

Required Illinois Testing

In order to be entitled by ISBE for the Reading Teacher endorsement, all minors must pass the Illinois Reading Teacher Content Exam (Exam 222) prior to graduation.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students who complete the Reading Teacher minor will:

- Demonstrate a knowledge of theories and instructional strategies to promote language and literacy learning in schools
- Reflectively critique and implement a variety of literacy curricula, analyzing how to meet the needs of all learners
- Evaluate evidence-based literacy instruction and reflect on the approaches that help students grow in literacy
- Understand, select, and utilize valid and appropriate assessment tools to screen, diagnose, and measure student literacy growth and performance, while reflectively using the data to make instructional decisions and evaluate interventions
- Evaluate, select, and use inclusive texts and culturally responsive curriculum and materials to support diversity and equity in the classroom, school, and community.
- Demonstrate effective literacy instruction in a variety of settings in the PK-12 range (dependent on certification range)

Secondary Education (BSEd)

Loyola's secondary education program is designed for undergraduates seeking to become licensed high school educators. Secondary Education pathways include both a secondary education major and a major in an additional content area (English, History, Mathematics, Political Science, or Psychology). To be a Science teacher, you can specialize in Biology, Chemistry, or Physics in our dual bachelor's/master's degree program (presently on hold).

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This approach emphasizes authentic practices in real classrooms. TLSC modules largely take place in school and community settings across the City of Chicago, and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon graduation, Secondary Education majors earn a BSEd in Secondary Education, and a BSEd or BA in their content area. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in their secondary content area, as well as the English as a Second Language (ESL) endorsement and the International Baccalaureate (IB) certificate.

Curriculum

The order of the TLLSC curriculum is fixed; therefore we recommend that you refer to the Suggested Sequence of Classes tables (further down on this page) to locate the specific requirements of your major. The Curriculum table below provides general information about requirements for all Secondary Education majors.

Course Requirements

Your degree program as a Secondary Education major will include Core Curriculum, School of Education, and content area major courses. These requirements vary by major, and you should consult the Suggested Sequence of Classes table for your major's unique requirements. Each of these types of requirements is explained in the table below.

Code	Title	Hours
University Core courses		
Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements may be met by taking pre-approved courses within the Secondary Education major (e.g., ELPS 219 and ELPS 302). Certain Core requirements may be met by taking the courses in your content area major or through transfer credit. Consult the Suggested Sequence of Classes tables below to identify the Core requirements for each content area, and always consult with the SOE undergraduate advisor about which Core requirements apply to your major.		
Content area major courses		
These courses provide you with required foundational knowledge of the content area you plan to teach (e.g., mathematics, social sciences, English). Content area courses are usually offered through the College of Arts and Sciences and include students from other majors across the University. The specific required courses within your content area major (as well as any electives) are indicated in the Suggested Sequence of Classes tables below. Because of the strong concentration of this coursework in your content area, your content area major courses typically address not only degree and licensure requirements, but an area of the University Core as well. The SOE undergraduate advisor will guide you through these requirements.		
School of Education CIEP and ELPS Courses		
Education degree requirements include a small number of courses offered within the School of Education and designed for Education majors. At times, these courses address a specific University Core requirement; for example, all Secondary Education majors meet the Philosophical Tier 2 Core requirement by taking ELPS 302. Secondary English and Math majors must take ELPS 219 (Tier 2 Historical), and only Secondary English majors must take CIEP 350.		
CIEP 350	Adolescent Literature	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups each semester, called Sequences. As you move through the three TLLSC Phases, you will gain extensive field experience, as well as knowledge and skills that will help you stand out from graduates of other teacher education programs. You will enter the field prepared to work in today's diverse classrooms with students of many backgrounds. The TLLSC secondary curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a high school under the supervision of a licensed and experienced teacher in your content area in collaboration with a University Supervisor. You must also enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B). In these PLCs, you will collaborate with the other students in your major and content area. PLCs are led by faculty experts in each content areas. To better understand how this curriculum will look over your four-year undergraduate experience, you should visit the Suggested Sequence of Classes table for your content area. TLSC modules are listed below in numerical order.		
Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities (Secondary Education majors must enroll each fall in the TLSC 300A section that corresponds with their major/content area. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester.)	0
TLSC 300B	Professional Learning Communities (Secondary Education majors must enroll each spring in the TLSC 300B section that corresponds with their major/content area. Students must enroll in PLCs every semester.)	1
Phase Two - Concentration		
Phase Two includes one full semester (usually the fourth) of content area coursework and no TLSC modules.		

TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**53**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Must have passed Mathematics Content Area Test prior to Sequence 8 Student Teaching		
	Hours	**13**
	Total Hours	**138**

[1] MATH 318 Combinatorics is offered every two years. If offered this term, you must take it.

[2] MATH 301 History of Mathematics and MATH 344 Geometry are offered during alternative fall semesters.

Mathematics Department Requirements (p. 532)

Political Science Subject Area

Political Science Department Requirements (p. 638)

Psychology Subject Area

Psychology Department Requirements (p. 650)

School of Education Requirements

Each Undergraduate student in the School of Education must complete all degree requirements with a grade of C or better in order to meet degree requirements. They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC field-based learning modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must also pass the Illinois licensure test(s) for their secondary content area prior to their final internship semester. Information about licensure tests will be provided by teacher education faculty.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Special Education (BSEd)

The BSEd in Special Education is designed for students who seek to become licensed educators of children with disabilities. The SPED major emphasizes skills and strategies to support students with a variety of academic, social, and behavioral needs, from ages 3 to 21. Preparation focuses on knowledge and skills to create supports and programming that prevent special education students from being overlooked or falling behind and enable them to develop to their fullest potential.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in K-12 school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Special Education majors earn a BSEd in Special Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Special Education (ages 3 to 21), as well as the English as Second Language (ESL) endorsement. By adding two courses to their pathway, SPED majors can also be entitled for an endorsement to teach Elementary Education (grades 1 through 6), enabling them to work as both a special education and elementary education teacher.

Curriculum

The Special Education (SPED) major includes Core Curriculum and School of Education courses. In addition, all Education majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. SPED-specific sections begin in Phase Two of the program. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the SPED major.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the School of Education: CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to each student's pathway.		
School of Education CIEP and ELPS courses		
Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors. At times, these courses will also address a specific portion of the Core (CIEP 104, CIEP 206, ELPS 219, ELPS 302). CIEP 332 is a course designed specifically for SPED majors.		
CIEP 104	Mathematics for Teachers I	3
CIEP 206	Children's Literature	3
CIEP 332	School Wide Applications	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills to effectively support children with disabilities across the continuum from elementary age to adulthood. Specialized modules for SPED majors begin with TLSC 260. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a special education classroom under the supervision of a licensed and experienced teacher and University supervisor. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with the others in the major. PLCs are led by a faculty member with expertise in special education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year SPED curriculum.		
Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities ((4 @ 0 credits) SPED majors must enroll each fall in the TLSC 300B section that corresponds with their major. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester for all four years.)	0
TLSC 300B	Professional Learning Communities ((4 @ 1 credit) SPED majors must enroll each spring in the TLSC 300B section that corresponds with their major. Students must enroll in PLCs every semester for all four years.)	1
Phase Two - Concentration		
TLSC 260	Typical and A-Typical Development	2
TLSC 261	Significant Disabilities and Life Planning	2
TLSC 262	Assistive and Adaptive Technology	2
TLSC 263	Transition Planning	2
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Optional Courses leading to Elementary Education endorsement		
These courses should be taken in the spring of Year two:		
TLSC 231	Teaching Science/Writing in Elem and Middle Grades	
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	
Total Hours		**73**

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. SPED majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

Standard 4-Year Program

Course	Title	Hours
Sequence 1		
TLSC 300A	Professional Learning Communities (SPED)	0
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2

TLSC 300A	Professional Learning Communities (SPED)	0
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
CORE	Philosophical Knowledge Tier I	3
PLSC 101	American Politics (Tier II Societal)	3
ELECTIVE	General Elective	4
Apply for One-Year Internship by October 1		
	Hours	**16**
Sequence 6		
TLSC 300B	Professional Learning Communities (SPED)	1
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
PHYS 101	Liberal Arts Physics (Tier II Scientific)	3
CORE	Theological and Religious Studies Tier II	3
CORE	Ethics	3
Take the Content Area Test for Learning Behavior Specialist I (#290). Register through the IL Licensure Testing Service		
As an alternative to #290, you may take both #155 and #163 until these tests retire in 2023.		
	Hours	**16**
Sequence 7		
TLSC 300A	Professional Learning Communities (SPED)	0
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
ELPS 302	Philosophy of Education (Philosophical Tier II)	3
CIEP 332	School Wide Applications	3
Apply for May Graduation in LOCUS by October 1		
	Hours	**12**
Sequence 8		
TLSC 300B	Professional Learning Communities (SPED)	1
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (Engaged Learning)	12
Must have passed any Content Area Tests prior to Sequence 8 Student Teaching		
	Hours	**13**
	Total Hours	**120**

Accelerated Learning Behavior Specialist 1 (LBS1) Transfer Track

This transfer pathway offers a 2-year degree option for applicants who already have an Associate's Degree in a related field (or the equivalent credit hours). Offered in a hybrid format, candidates would complete the following 2 year course sequence to obtain their licensure as a Learning Behavior Specialist.

Course	Title	Hours
Year 1		
Summer II

	Total Hours	**61**

[1] Student takes 6 credit hours of TLSC 380 in Spring and 6 credit hours of TLSC 380 in Summer.

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Special Education licensure exam prior to their final internship semester.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Special Education Minor

A program for Education majors that prepares you to serve the needs of all students and qualify for an endorsement in special education on Illinois Professional Educator License (PEL). Illinois refers to this endorsement as the Learning Behavior Specialist – 1 (LBS-1).

There is a nationwide shortage of special education teachers, at a time when students with different academic, behavioral, and social needs are

often overlooked or fall behind. Adding a special education minor to your education major can help you address this important need in the field.

School of Education Requirements

Grades of "C-" or lower are not counted toward fulfillment of minor requirements. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to apply for the Learning Behavior Specialist 1 endorsement, candidates must pass the Illinois Learning Behavior Specialist I Content Area Test (#290). It is recommended that students pass this before beginning their final internship semester.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

A candidate who completes the Special Education minor will have:

- A Comprehensive Understanding of Special Education: Candidates grasp diverse instructional strategies, cultural influences, and collaboration techniques to address individual learning needs of students with disabilities.
- Proficient Assessment and Planning Skills: Candidates proficiently administer assessments, interpret results, and develop personalized education plans while adhering to ethical standards and staying abreast of research-based practices.
- Effective Collaboration and Professionalism: Candidates foster inclusive partnerships, navigate cultural differences, and engage in reflective practice to continually enhance teaching methods while advocating for social justice in education.
- Leadership and Advocacy for Exceptional Needs: Candidates demonstrate leadership in implementing school-wide initiatives, promoting positive behavior, and advocating ethically for appropriate services to maximize the potential of individuals with disabilities.

Teaching and Learning Minor

The Teaching and Learning minor provides access to foundational field-based learning experiences in our undergraduate teacher education program to students in other majors who are interested in schooling and in working with teachers, educators, and/or families but who do not intend to work as classroom teachers themselves. The minor will also provide foundational learning experiences for non-Education majors who are interested in substitute teaching, and it includes electives allowing students to specialize in areas of interest in education, as well as internships and other experiences that are tailored to those interests.

Other Electives		
ELPS 219	History of American Education	3

1 Students pursuing the Teaching and Learning Minor (in particular, those who select the museum education interest area) have the option of taking this internship twice if they choose to. They are not required to do so and may enroll in other elective courses instead if desired.
2 Must be taken concurrently in the same sequence with Sequence 2.
3 Fall (Secondary), Spring (Middle Grades)
4 These two modules must be taken concurrently (in a single semester) for a total of four (4) credit hours.
5 Must take TLSC 300A in the Fall and TLSC 300B in the Spring in a single academic year.

Residency Requirement

At least half of minor hours must be completed at LUC and may not transferred in. Any potential transfer hours are reviewed by the T&L program chair.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Students interested in a profession that requires educating others or providing professional development will learn principles and strategies of effective educational systems and strategies for working with diverse children, families and communities.
- Students will participate in alternative experiences in a variety of educational settings, including multiple site visits to a variety of schools or internships that are missing from many related LUC majors, even in cases where graduates will go on to do work that relates to or intersects with that of schools.
- Undergraduates will be better prepared for roles as short-term substitute teachers under recent ISBE guidelines with a better foundational and pedagogical knowledge than those who apply for that license with no background or coursework in education.

School of Environmental Sustainability

Our Mission

The mission of Loyola University Chicago's School of Environmental Sustainability (SES) is to engage students in understanding and responding to local and global environmental issues by:

- Delivering Core environmental science courses to raise awareness and action in all LUC undergraduates,
- Preparing SES baccalaureate and graduate students for socially responsible professions in environmental science, policy, education, business, and health, and
- Advancing our knowledge of environmental problems and developing solutions through original research and community outreach.

The SES strives to advance sustainability in operations across all university campuses and to:

- Develop an environmentally conscious culture throughout the university.
- Advance the University's mission of seeking God in all things
- Work to expand knowledge in the service of humanity through learning, justice, and faith
- Provide a rich and transformative educational experience grounded in teaching and research excellence
- Promote experiential learning, and student entrepreneurial action in the service of nature, humanity, and the planet

Our Sustainability Mission

Sustainability at Loyola is driven by our Jesuit tradition of social justice, our service to humanity, and our role as an institution of higher education. It is embodied in an educational experience for our students and activities that seek to meet the needs of the present generation without compromising the ability of future generations to meet their

own needs. We are committed to an inclusive process considering social, economic, and environmental impacts and exemplified in a transformative education for our students.

Our Commitment to Racial and Social Justice

We acknowledge that the multi-century legacy of racism against people of color -- particularly against those who are Black, Indigenous, Latinx, and Asian -- pervades environmentalism, where White voices and agendas continue to dominate. Environmentalist doctrines have been – and continue to be – used to justify eugenics, genocide, and the displacement of indigenous people from their ancestral homelands.

We affirm that social justice and ecological justice are both integral to achieving sustainability. We commit ourselves to deep reflection on the many ways that we as individuals are socialized into white supremacy and that our organizational culture, policies, and practices reflect it. This intentional process of study will enable us to identify the changes required of IES as we move towards becoming an anti-racist, multicultural organization that advances racial, social, and environmental justice through our teaching, research, and service.

Undergraduate Programs

- Environmental Action and Leadership Minor (p. 928)
- Environmental Economics & Sustainability (p. 929)
  - Environmental Economics & Sustainability: Governance (BA) (p. 930)
  - Environmental Economics & Sustainability: Governance/Environmental Science and Sustainability (BA/MS) (p. 1099)
  - Environmental Economics & Sustainability: Management (BA) (p. 931)
  - Environmental Economics & Sustainability: Management/Environmental Science and Sustainability (BA/MS) (p. 1103)
  - Environmental Economics and Sustainability Minor (p. 933)
- Environmental Policy (p. 934)
  - Environmental Policy (BA) (p. 934)
  - Environmental Policy/Digital Media and Storytelling (BA/MC) (p. 1108)
  - Environmental Policy/Environmental Science and Sustainability (BA/MS) (p. 1112)
  - Environmental Policy/Global Strategic Communication (BA/MS) (p. 1117)
  - Environmental Policy/Public Policy (BA/MPP) (p. 1122)
- Environmental Science (p. 937)
  - Environmental Science (BS) (p. 937)
  - Environmental Science Minor (p. 944)
  - Environmental Science/Business (BS/MBA) (p. 1127)
  - Environmental Science/Digital Media and Storytelling (BS/MC) (p. 1133)
  - Environmental Science/Environmental Science and Sustainability (BS/MS) (p. 1139)
  - Environmental Science/Global Strategic Communication (BS/MS) (p. 1146)
  - Environmental Science/Public Health (BS/MPH) (p. 1153)
  - Environmental Science/Public Policy (BS/MPP) (p. 1159)
- Environmental Studies (p. 945)
  - Environmental Studies (BA) (p. 946)
  - Environmental Studies/Business (BA/MBA) (p. 1166)
  - Environmental Studies/Digital Media and Storytelling (BA/MC) (p. 1171)
  - Environmental Studies/Environmental Science and Sustainability (BA/MS) (p. 1176)
  - Environmental Studies/Global Strategic Communication (BA/MS) (p. 1182)
  - Environmental Studies/Public Policy (BA/MPP) (p. 1187)
- Accelerated Bachelor's/Master's Programs with ESS-MS (p. 949)
  - Advertising & Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
  - Advertising Creative/Environmental Science and Sustainability (BA/MS) (p. 982)
  - Advocacy and Social Change/Environmental Science and Sustainability (BA/MS) (p. 992)
  - Communication Studies/Environmental Science and Sustainability (BA/MS) (p. 1057)
  - Film and Digital Media: Film and Media Production Track/Environmental Science and Sustainability (BA/MS) (p. 1196)
  - Film and Digital Media: International Programming Track/Environmental Science and Sustainability (BA/MS) (p. 1208)
  - Multimedia Journalism/Environmental Science and Sustainability (BA/MS) (p. 1292)

Curriculum Overview

Environmental problems are multifaceted and cannot be adequately understood and addressed through a monochromatic lens. As such, all SES majors share ten common environmental courses totaling 26 credits. These standard courses cover an introduction to environmental science, statistics, ecology with a lab, economics, politics, justice and ethics, environmental careers, an engaged learning experience, and a capstone experience.

Additional core courses in biology (8 credits) and chemistry (12 credits) are required for each of the BS majors. In addition, all majors require either specialty courses (0 to 14 credits), free electives (3 to 15 credits), or electives in the categories of Society, Ethics, & Justice (3 to 6 credits), Policy, Economics, & Resource Management (0 to 6 credits), and Methods and Analysis (0 to 3 credits). The BS majors require a total of 67 to 70 credits to complete. The BA majors require a total of 51 to 54 credits to complete. A student who wishes to double major within SES must complete at least 15 credit hours of coursework that is unique to each major.

Students wishing to add an SES minor can share 9 of 21 credits needed for either the Environmental Action and Leadership minor or the Environmental Science minor with their SES major. For those choosing the Environmental Economics and Sustainability minor, 6 of the 18 credits required for the minor can be shared with the major. Students minoring in either Sustainability Management, administered by the Quinlan School of Business, or Environmental Communication, administered by the School of Communication, can share 6 of the 18 credits required for either of those minors with their SES major.

Shared Core Courses

Code	Title	Hours
ENVS 137	Foundations of Environmental Science I	3
ENVS 200	Environmental Careers and Professional Skills	1

ENVS 203	Environmental Statistics	3
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
or ENVS 286S	Principles of Ecology Lab	
Justice & Ethics Choice		3
ENVS 335	Ecological Economics	3
or ECON 328	Environmental Economics	
PLSC 392	Environmental Politics	3
Engaged Learning Choice		3
Capstone Choice		3

Double-Dipping Policy

1. SES students may not major and minor in the same discipline.
2. Majors: No fewer than 15 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major.
3. Minors and interdisciplinary minors: no fewer than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Writing Requirement

SES students must complete two writing intensive courses. UCWR 110 Writing Responsibly must be taken in the first year and must be completed with a grade of "C-" or better before any writing-intensive section may be taken. Please note that these two courses cannot be taken simultaneously. Students who transfer in more than 60 credit hours are waived from one writing intensive course.

Language Competency Requirement

Competency at the 102-level or higher in reading, writing, and speaking a language other than English is required of all SES
students. This requirement can be met by:
1. Passing (C- or higher) a 102-level or higher course in a language other than English.
2. Obtaining a waiver through Advanced Placement examination. A passing AP score does not earn course credit, but waives a student from the Foreign Language requirement of SES.
3. Demonstrating language competency by passing a 102-level (or above) language competency exam. Schedule a competency exam with the Department of Modern Languages and Literatures online: https://www.luc.edu/modernlang/placementcompetency/foreignlanguagecompetencyexam/.

Academic Advising

All junior, senior, and transfer students will be advised by the SES. First and Second Year students will be advised by First and Second Year Advising (FSYA). Eligible students can declare or drop a major or minor in LOCUS. Students who want to switch to SES from another school at Loyola (or vice versa) must apply for an internal transfer.

Graduation and Commencement

SES students who have earned at least 85 credit hours are eligible to apply for graduation. To be eligible to graduate, you must complete a Graduation Application. The application is available online through LOCUS. Early application ensures that you will receive an audit of your remaining degree requirements prior to enrolling in your final semester's classes. When you submit your application, you initiate an "audit" of your Core, major, minor, and school requirements by your SES academic advisor. Your advisor will e-mail you a copy of the graduation degree audit, which details your remaining requirements for graduation. You may also choose to schedule an appointment to review your remaining requirements with your academic advisor. Deadlines for graduation applications are as follows:
Fall (December) Graduation = applications due by March 1
Spring (May) Graduation = applications due by October 1
Summer (August) Graduation = applications due by October 1
Students who do not apply by the application deadline must contact their academic advisor for a late application form.

Students earning 60 or more graded Loyola credits are eligible to graduate with laudatory honors. This outstanding accomplishment will be noted on the student's diploma and official transcript. Note: GPA is not rounded up for laudatory honors. Students who are eligible for Commencement will receive an invitation to participate in the ceremony. Commencement ceremonies are held only in May. Students who complete their degrees in December, May, or August may participate in the May ceremony if they wish.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Environmental Science (ENVS)

ENVS 101 The Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues. This is a foundational Tier I class; it is prerequisite to all Tier II science core classes.
Knowledge Area: Foundational Scientific Knowledge
Course equivalencies: ENVS137/UCSF137/ENVS101
Outcomes:
1) Exhibit knowledge of the nature of the four Earth systems; 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data; 3) Understand the role of energy and thermodynamics in ecosystems; 4) Understand and describe important cycles in nature

ENVS 137 Foundations of Environmental Science I (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.
Course equivalencies: ENVS137/UCSF137/ENVS101
Outcomes:
Recognize interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; understand physical, chemical and ecological principles underlying environmental science and how these interact

ENVS 200 Environmental Careers and Professional Skills (1 Credit Hour)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to Majors and Minors in the School of Environmental Sustainability
Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network.
Outcomes:
Select appropriate internships, curriculum, projects to enhance knowledge, skills and experience; develop job hunting and communication skills specific to environmental fields, including resumes, cover letters, presentations

ENVS 203 Environmental Statistics (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets.
Outcomes:
Programming/spreadsheet skills; data structure practices and diagnosis; data visualization; appropriate test selection; test execution and interpretation; introduction to qualitative data analysis

ENVS 204 Gender, Health & Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts.
Interdisciplinary Option: Bioethics
Outcomes:
Understanding the web of causality (relationships among scientific, medical, ecological, cultural, behavioral, economic, political, and ethical dimensions) of environmental health problems and how to ameliorate the disproportionate burden of risk

ENVS 207 Plants and Civilization (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the structure, function, ecology, and diversity of plants, their importance to human civilization, and the impact of societal decisions regarding their use and exploitation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will demonstrate an understanding of the critical role of plants in the biosphere, their physiological processes, adaptations for specialization, and linkages to humans including agriculture, pest control, and extraction/use of plant-derived products

ENVS 215 Ornithology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology, and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.
Course equivalencies: BIOL 215/ENVS 215
Outcomes:
Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area

ENVS 218 Biodiversity & Biogeography (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare

ENVS 223 Soil Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the properties, functions, and conservation of soil. Topics include belowground ecosystem services, soil biodiversity, biogeochemical cycles, and conservation, human impacts to soils, and the socioeconomic implications of soil degradation. Lectures, laboratory/field soil testing, field trips, and presentations by experts in sustainable soil management are employed.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will understand the properties, functions and methods of conservation/remediation of soils, learn how human activities affect soils and associated socioeconomic consequences, and develop analytical skills to assess soil health

ENVS 224 Climate & Climate Change (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to basic principles and knowledge to explain climate change. Students will learn about natural and anthropogenic causes of climate change, the interactions between earth-atmosphere-ocean systems, climate feedback mechanisms, and impacts of climate change on the natural physical environment.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will develop cognitive and mathematical skills to draw valid, logical conclusions regarding various observed phenomena such as observed changes in the climate system and observed impacts of climate change

ENVS 226 Science & Conservation of Freshwater Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face

ENVS 227R Ecology of the Mediterranean Sea (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course examines the ecology of the Mediterranean Sea and how human activity has shaped the present-day ecosystem. Students will learn fundamental ecological concepts including ecosystem functioning, energy flow, matter transformation, and elemental cycles and the human impacts on the Mediterranean environment, including discussion of impact reduction and remediation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Italian Studies
Outcomes:
Students will gain understanding of ecological processes/ interconnections within the Mediterranean Sea ecosystem, of historical & current human-induced changes therein

ENVS 230 Feeding the Planet: Global Perspectives on Sustainability, Culture and Food (3 Credit Hours)
Cross-cultural policies, practices, and beliefs about the production, preparation, consumption, and distribution of food vary widely. This course examines food in historical, political, social, and cultural contexts around the globe. It is divided into four sections that require students to apply concepts in food studies to international case studies and global examples: Cross-Cultural & Global Perspectives on Food; Culture, Identity, and Food; The Political Economy of Food; and Social, Cultural, Political, and Economic Responses to Hunger. Course topics include subsistence patterns and cultural patterns of food preparation and consumption; cultural practices involving food preferences and taboos; the globalization of foods and cuisines; labor practices in industrial agriculture; alternative economies of food; global policies and practices developed to eliminate hunger and malnutrition; the use/misuse of global food aid, and others.
Outcomes:
Explain the rationales of cross-cultural beliefs and practices of our own and others' foodways; Apply interdisciplinary perspectives to analyze the historical, cultural, and political roots of social phenomena and world problems involving food and society; Assess various dimensions of the forms and mechanisms of oppression, discrimination, or privilege in global and local food systems; Investigate coalitions and key ideas, past and present, which address and advocate for economic and social justice in the food system

ENVS 237 Foundations of Environmental Chemistry (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to BA majors in the School of Environmental Sustainability
This course is the second in a three-course sequence required of all ENVS BA majors. These courses provide the basic scientific grounding needed to intelligently discuss environmental issues and to prepare students for more advanced study on the environment. ENVS 237 focuses on the physical and chemical science needed to understand environmental processes. Students will build their quantitative skills in evaluating energy and chemical transactions that impact our environment.
The course will also work on building skills in interpreting scientific information, including using academic peer-reviewed journal articles.
Outcomes:
Be able to quantitatively assess environmental systems and anthropogenic processes that impact the environment; Gain understanding of the physical and chemical processes of environmental systems to be able to describe global climate dynamics, chemical reactions that contribute to environmental issues, the energetics of different energy sources, and technological aspects of alternative energy sources; Appreciate the importance of chemistry and physics as applied to different environmental issues and used by different environmental fields

ENVS 238 Foundations of Environmental Science Lab (1 Credit Hour)
Pre-requisites: ENVS 237 (pre- or co-requisite); Restricted to BA majors in the School of Environmental Sustainability
A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science.
Outcomes:
Students will understand and demonstrate safe lab practices and learn to use basic lab equipment to take and analyze environmental science data

ENVS 260 Environmental Journalism (3 Credit Hours)
Pre-requisites: Department Consent Required
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

ENVS 267 Bird Conservation and Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 102
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management
Course equivalencies: X-ENVS 267/BIOL 347
Outcomes:
Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation

ENVS 273 Energy and the Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
The concept of energy developed from antiquity through the present day and applied to national and worldwide energy use patterns, the technologies supporting their use, as well as the societal impact and environmental consequences of energy usage.
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, demonstrate an understanding of critical concepts and knowledge: heat and energy, the laws of thermodynamics, and current and future technologies and their impact

ENVS 274 Chemistry of the Natural Environment (3 Credit Hours)
Pre-requisites: ENVS 137, MATH 118 and CHEM 160; Restricted to Majors and Minors in the School of Environmental Sustainability
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions taking place and their equilibrium in the natural environment on Earth. The course will investigate these chemical and physical interactions in the three unique environmental compartments of the atmosphere, hydrosphere, and the soil environment, where the lithosphere and biosphere overlap, as we learn more about the materials and reactions that make up the natural environment. Students will utilize problem solving to explore the materials and reactions of the major compartments.
Interdisciplinary Option: Bioethics
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how materials move through the environment between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Quantitatively assess materials in air, water, soil, and cells across a range of scales appropriate in environmental science, from the microscopic to the global range; Describe underlying ecosystem functions that establish the chemistry of natural waters, air, and soil

ENVS 275 Chemistry of the Environment Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and (CHEM 112 or CHEM 181); ENVS 274 as pre- or co-requisite; Restricted to Majors and Minors in the School of Environmental Sustainability
Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.
Outcomes:
Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results

ENVS 276 Chemistry of Environmental Pollution (3 Credit Hours)
Pre-requisites: ENVS 137, CHEM 160, MATH 118, and SES Major
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions that influence the transport and fate of chemical pollutants in our environment. This course will identify major sources of environmental pollutants and technologies for source pollution control as well as understanding how pollutants move through the environment to potentially impact ecosystems and human health. The course will cover pollutants in all environmental compartments including air pollution from combustion sources, water quality issues and water treatment, and soil pollutants with a focus on agrochemicals and their impact on both soil environments and groundwater.
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how pollutants move through and between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Describe underlying chemistry of technologies and policies that would address key sources of major pollutants; Be able to utilize physical chemical properties of pollutants as a tool for assessing their persistence and potential to do harm in natural ecosystems

ENVS 278 Hydrology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Study of processes which cycle water between oceans, atmosphere, and land surface. This course examines precipitation, evaporation, infiltration, transpiration, groundwater and surface water flow. Understanding these processes is fundamental to managing our resources in the face of mounting environmental challenges and natural resource pressures.
Outcomes:
Understanding of key physical processes and multidirectional complex interactions between different components of the water cycle; ability to apply fundamental equations of conservation to quantify flows

ENVS 279 Climate and History (3 Credit Hours)
Pre-requisites: Department Consent Required
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

ENVS 280 Principles of Ecology (3 Credit Hours)
Pre-requisites: (ENVS 101 or ENVS 137) and (ENVS 237 or CHEM 101 or CHEM 160); Restricted to Majors and Minors in the School of Environmental Sustainability
The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand key concepts and principles concerning ecological processes in nature at the gene, individual, population, community, ecosystem and landscape scales and apply knowledge of ecological concepts to current environmental challenges

ENVS 283 Environmental Sustainability (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the impact of humans as consumers on the environment and how these interactions affect the probability of establishing sustainability for human and non-humans on Earth.
Interdisciplinary Option: Bioethics, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, and demonstrate an understanding of knowledge critical to the field including current human consumptive practices and their effects on the health and well-being of living organisms

ENVS 284 Environmental Justice (3 Credit Hours)
This course examines how policy interacts with race and class to affect differentially people's access to a clean, safe, productive environment; Reviews history of the environmental justice movement, and community, policy, and legal responses; Develops students' ability to work across diverse social groups to advance environmental justice and sustainability.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand forces that have led to people of different race and class being differentially affected by environmental benefits, and the burdens and strategies for addressing environmental injustices

ENVS 285 Eco-spirituality (3 Credit Hours)
Eco-spirituality is an emerging field in ecology, conservation, and religion that recognizes the spiritual component of environmentalism and Earth stewardship. This course explores how ecological efforts are enhanced by including a spiritual dimension and spirituality and religion must include awareness and engagement with ecology and ecological issues.
Outcomes:
1) Draw connections between ecology, spirituality, and Loyola¿s mission; 2) Implement tools and practices that foster personal awareness and reflection; 3) Demonstrate how reflection leads to necessary action

ENVS 286 Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (ENVS 238 or CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BA Majors in the School of Environmental Sustainability
This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.
Outcomes:
Students will understand basic ecological principles, apply these to design experiments, develop skills in data analysis and interpretation, and learn techniques used to characterize ecosystem properties and human environmental impacts

ENVS 286S Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BS Majors in the School of Environmental Sustainability
Course content includes lab skills and analytical techniques commonly employed in ecological studies; emphasizes sampling, research design, field work, laboratory technique, data analysis, project development, hypothesis testing, and scientific report writing.
Outcomes:
Understand ecological principles, apply knowledge to ecological experiments, observational studies, and entry-level mathematical models; assess biotic responses to the abiotic environment and to anthropogenic impacts

ENVS 288 Applied Interdisciplinary Data Analysis (3 Credit Hours)
Pre-requisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)
Restricted to students in SES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.
Outcomes:
Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets

ENVS 297 North American Environmental History (3 Credit Hours)
Pre-requisites: Department Consent Required
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

ENVS 298 Special Topics (1-12 Credit Hours)
Specific titles and contents vary from semester to semester. Variable credit hours.

ENVS 298L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 300 Introduction to Public Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

ENVS 301 Environmental Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

ENVS 303 Introduction to Epidemiology (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

ENVS 310 Introduction to Environmental Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.
Outcomes:
Understands how the natural environment is controlled, managed and promoted through the legal system

ENVS 311 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 312 Water Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 313 Energy Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 316 Energy and Power Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing; MATH 118
This course introduces the fundamental concepts of energy and power systems, covering essential principles, grid components, and generation technologies through a multidisciplinary lens. Students will explore current and future challenges in energy systems by applying mathematical tools, software, and programming to analyze the topics covered.
Outcomes:
Comprehend Basic Energy and Electrical Concepts: Explain the fundamental principles of electricity, energy, power, voltage, current, and resistance; Differential Generation Technologies: Compare and contrast conventional and renewable generation technologies, and assess their environmental, economic, and social impacts; Understand Grid Operations: Explain the basics of power flow analysis, load balancing, and grid operation; Analyze Energy Markets and Pricing: Discuss how electricity markets function, how electricity is priced, and how the grid is managed; Assess Further Grid Challenges: Evaluate the challenges of integrating renewable energy sources, managing load shifting, and electrifying other sectors, while considering social and equity implications; Apply Long-Term Grid Planning Tools: Identify and apply tools and methodologies used in generation expansion planning, and assess strategic considerations for achieving long-term goals in energy systems

ENVS 320 Conservation Biology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 321 Conservation Biology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 320 (pre- or co-requisite)
Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.
Outcomes:
This course will provide practical field and lab experience in population, community and ecosystem conservation; Students will learn how the principles of Conservation Biology are applied, and the associated challenges

ENVS 322 Invasive Species (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 323 Environmental Microbiology (3 Credit Hours)
Pre-requisites: BIOL 101, BIOL 102, CHEM 101, and (CHEM 102 or ENVS 274)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 324 Climate Science (3 Credit Hours)
Pre-requisites: ENVS 224 and MATH 118
The focus of this course is Earth's climate system, including the role of the atmosphere, ocean, cryosphere and land-atmosphere interaction. This course digs deeper into the physical principles underlying climate processes, energy balance, feedback mechanisms, climate variability and climate dynamics, including large-scale atmospheric and ocean circulation. This course will discuss recent climate change, and projections for future climate scenarios. Students will have hands-on experience with practicing climate modelling tools, analyzing climate data, and exploring current research in climate science. Thus, this course will involve quantitative analysis and will reinforce students' reading, writing, and public-speaking skills through the class project on climate change.
Outcomes:
Understand Earth's Climate Systems: Students will gain an in-depth understanding of Earth's climate system, including the atmosphere, ocean, cryosphere, and land-atmosphere interactions, as well as the physical principles underlying climate processes such as energy balance, feedback mechanisms, and climate variability; Develop Quantitative Analysis Skills: Students will engage in quantitative analysis through climate modeling tools and data interpretation, enabling them to critically analyze climate data and understand large-scale climate dynamics like atmospheric and ocean circulation; Evaluate Climate Change Impacts and Projections: Students will explore recent scientific developments in climate change, assess current climate change impacts, and understand projections for future climate scenarios, preparing them to engage in informed discussions and decision-making related to climate policy and research; Enhance Communication and Research Skills: Through scientific paper reviews and presentations, students will enhance their ability to critically evaluate research, improve their public-speaking skills, and effectively communicate scientific findings to peers, fostering collaboration and scientific literacy

ENVS 325 Sustainable Agriculture (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 326 Agroecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 223 (recommended)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 327 Food Systems Analysis (3 Credit Hours)
Pre-requisites: ENVS 203
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 330 Restoration Ecology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 331 Restoration Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and 286/s; or BIOL 265 and 266; and ENVS 330 (pre- or co-requisite)
Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.
Outcomes:
Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects

ENVS 333 Introduction to the Circular Economy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This course introduces principles and concepts of a circular economy that can support a more sustainable future. The course reviews circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. This course may include speakers and/or field trips to learn about companies with circular business practices.
Outcomes:
Explain circular economy; identify applications of circularity; understand role of policy, finance, and design in system-wide change; understand social, environmental, economic impacts of linear economic system

ENVS 335 Ecological Economics (3 Credit Hours)
Pre-requisites: ECON 201 or ECON 202
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic and ecological systems.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications

ENVS 336 Design for Circular & Sustainable Business (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods.
Outcomes:
Understand the role of design in creating a sustainable future

ENVS 338 Climate Change and Human Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 340 Natural History of Belize (3 Credit Hours)
Pre-requisites: For SES majors and minors, ENVS 101 or ENVS 137; For BIOL majors and minors, BIOL 102 and BIOL 112; For ANTH or GLST majors and minors, Junior or Senior Standing
This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - ENVS 340 /BIOL 340
Outcomes:
Provide a working understanding of the structure, function, and ecology of tropical ecosystems; their importance to local communities; and the social dimensions of environmental issues, especially those related to justice

ENVS 345 Conservation and Sustainability of Neotropical Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; Instructor Consent Required
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X- ENVS 345/ BIOL 349
Outcomes:
Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture

ENVS 350A Solutions to Environmental Problems: Water (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Water' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to water and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of water-related environmental problems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350B Solutions to Environmental Problems: Biogas (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
Outcomes:
Students will develop understanding of environmental problems related to biogas, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350C Solutions to Environmental Problems: Climate Action (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; and ENVS 224 (recommended)
Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement

ENVS 350F Solutions to Environmental Problems: Food Systems (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Food Systems' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to food production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of environmental problems related to food systems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 351 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 352 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 353 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 354 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 351, ENVS 352, and ENVS 353
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 367 Mammalogy (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 369 Field Ornithology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and BIOL 215 (recommended)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.
Course equivalencies: X- ENVS 369/BIOL 348
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 380 Introduction to Geographic Information Systems (3 Credit Hours)
Pre-requisites: Restricted to Junior and Senior standing
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.
Interdisciplinary Option: Urban Studies
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; Describe ethical issues germane to GIS; Prepare/analyze GIS data in research; Apply GIS in community-service projects

ENVS 381 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 380 and Restricted to Junior and Senior standing
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 382 Remote Sensing (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Juniors and Seniors
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 383 Human Dimensions of Conservation (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 384 Conservation Economics (3 Credit Hours)
Pre-requisites: ECON 201
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 385 Introduction to Global Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level.
Interdisciplinary Option: Bioethics
Course equivalencies: X-HSM210/PUBH314/ENVS385
Outcomes:
Understand approaches to existing and emerging health problems and the relationships between health, poverty, and development

ENVS 386 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Junior or Senior Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 380 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 387 Principles of Ecotoxicology (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; and ENVS 274
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.
Interdisciplinary Option: Bioethics
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems and to prepare them for graduate study/future career

ENVS 389 Ecological Risk Assessment (3 Credit Hours)
Pre-requisites: ENVS 274 and ENVS 275
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 390 Integrative Seminar (3 Credit Hours)
This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers.
Outcomes:
Students will demonstrate an understanding of the multi-faceted and interdisciplinary nature of environmental issues

ENVS 391 Environmental Research (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Enrollment Conditions: Administrative Permission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out the research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391C Independent Environmental Research (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor Consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391L Independent Environmental Research-Lab (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research. Requires Administrative Permission to enroll.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS395/ESP395/NTSC395
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 395C Environmental Internship (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Department Consent
Fulfills capstone requirement for SES majors. Through internship experience, students reflect upon academic and extra-curricular activities in their degree program and learn how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Guided reflection on relationship between coursework and internship experience, relate learning to specific activities and experiences in the internship, assess value of internship to future career plans

ENVS 398 Special Topics (3 Credit Hours)
Specific titles and contents vary from semester to semester.

ENVS 398B Environmental Science Topics for BIET Minor Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides a cross-listed elective for Environmental Science students when the Bioethics capstone's topic is environmental.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and environmental science issues with regard to the special topic in environmental science

ENVS 398L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 399 Directed Readings (1-3 Credit Hours)
Pre-requisites: Instructor Consent
Directed by an ESP faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme.
Outcomes:
Students will demonstrate comprehension of, and the ability to apply information from, scientific literature and be able to synthesize information to produce a cogent, synthetic analysis of their topic based on these readings

Environmental Action and Leadership Minor

The Environmental Action & Leadership Minor provides knowledge of and insight into environmental issues, and develops skills in communication, group management and leadership to facilitate action toward solving environmental problems and the development of sustainable practices in society.

Related Programs

Minor

- Sustainability Management Minor (p. 796)

Curriculum

Requirements: 7 courses (21 credit hours); *at least 3 courses must be ENVS.* A maximum of 3 courses can count toward this minor and an SES major.

Code	Title	Hours
Background & Perspective [1]		
Select two of the following:		6
ANTH 104	The Human Ecological Footprint	
ENVS 204	Gender, Health & Environment	
ENVS 207	Plants and Civilization	
ENVS 215	Ornithology	
ENVS 218	Biodiversity & Biogeography	
ENVS 223	Soil Ecology	
ENVS 224	Climate & Climate Change	
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 237	Foundations of Environmental Science II	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and The Environment	
ENVS 280	Principles of Ecology	
ENVS 283	Environmental Sustainability	
ENVS 340	Natural History of Belize	
ENVS 369	Field Ornithology	
Ethics & Society		
Select one of the following:		3
COMM 227	Social Justice & Communication	
ENGL 288	Nature in Literature	
ENVS 204	Gender, Health & Environment	
ENVS 279	Climate and History	
ENVS 284	Environmental Justice	

ENVS 297 / HIST 297E	North American Environmental History

[1] All ENVS 200-level courses, except COMM 260, ENVS 279, ENVS 284, and ENVS 297, have ENVS 101 or ENVS 137 as a pre-requisite; ENVS 280 also has ENVS 237 as a pre-requisite.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions.
- Appraise the interactions and synergies between the natural world, social systems, and human cultures.
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness.

Environmental Economics & Sustainability

- Environmental Economics & Sustainability: Governance (BA) (p. 930)
- Environmental Economics & Sustainability: Governance/ Environmental Science and Sustainability (BA/MS) (p. 1099)
- Environmental Economics & Sustainability: Management (BA) (p. 931)

- Environmental Economics & Sustainability: Management/ Environmental Science and Sustainability (BA/MS) (p. 1103)
- Environmental Economics and Sustainability Minor (p. 933)

Environmental Economics & Sustainability: Governance (BA)

The Environmental Economics and Sustainability major provides students rigorous training in economics and awareness of sustainability challenges, including global climate change, food production, environmental conservation, and social justice. Training in economics provides knowledge of how individuals and governments make decisions and the ways in which the economy can be structured and managed for the common good, training that is a crucial part of solving sustainability challenges. The Governance concentration is intended for students seeking a career in government, non-governmental organization (NGO), or law.

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Explain the interconnections between human development, the economy, and the environment.
- Understand how economic theory and analysis can be used to evaluate social and economic outcomes.
- Describe how policy affects business and economic activity to achieve human development and environmental sustainability goals
- Analyze how policy interventions can shift an economy to achieve a balance of ecological and socioeconomic objectives.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Economics & Sustainability: Management (BA)

The Environmental Economics and Sustainability major provides students rigorous training in economics and awareness of sustainability challenges, including global climate change, food production, environmental conservation, and social justice. Training in economics provides knowledge of how individuals and governments make decisions and the ways in which the economy can be structured and managed for the common good, training that is a crucial part of solving sustainability challenges. The Management concentration is intended for students seeking a business or consulting career.

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN

program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Explain the interconnection between human development, the economy, and the environment
- Understand how economic theory and analysis can be used to evaluate social and economic outcomes.
- Analyze how businesses can integrate environmental and social considerations into decision-making that aligns financial with environmental sustainability.
- Describe the impacts of business and industry on social outcomes, the economy, and environmental sustainability

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Economics and Sustainability Minor

The Environmental Economics and Sustainability Minor provides a broad understanding of how the environment and the economy are linked; to prepare students for careers in government, consulting, law and for-profit business. The program also offers the essential courses to prepare for a masters in environmental economics, agricultural economics or environmental management.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understand how the economy, the environment, and human development goals are linked.
- Understand how economic theory and quantitative analysis can be used to evaluate social and economic outcomes.
- Analyze who benefits or is harmed by economic and environmental policies; identify how benefits and harms are distributed in a population.
- Communicate with professionals about tradeoffs, property rights, ecosystem services, values and related economic measures, inequities, externalities, environmental degradation, and systems thinking.

Environmental Policy

- Environmental Policy (BA) (p. 934)
- Environmental Policy/Digital Media and Storytelling (BA/MC) (p. 1108)
- Environmental Policy/Environmental Science and Sustainability (BA/MS) (p. 1112)
- Environmental Policy/Global Strategic Communication (BA/MS) (p. 1117)
- Environmental Policy/Public Policy (BA/MPP) (p. 1122)

Environmental Policy (BA)

Well-designed public policies are critical in maintaining and restoring a healthy environment. Public policies influence air and water quality, land use, biodiversity, and public health and shape crucial efforts to fight climate change. Our environmental policy program prepares students to craft and implement public policies that promote ecological conservation, environmental justice, and innovation toward a green economy.

ENVS 369	Field Ornithology
ENVS 380	Introduction to Geographic Information Systems
ENVS 381	Advanced GIS Applications
ENVS 385	Introduction to Global Health
ENVS 387	Principles of Ecotoxicology
ENVS 388	
ENVS 389	Ecological Risk Assessment
ENVS 391	Environmental Research (with SES approval)
ENVS 395	Environmental Internship (with SES approval)
ENVS 398	Special Topics (with SES approval)
ENVS 399	Directed Readings (with SES approval)
ANTH 104	The Human Ecological Footprint
ANTH 303	People and Conservation
BIOL, CHEM, PHYS 300-level courses (with SES approval)	
Total Hours	**18**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
ENVS 137	Foundations of Environmental Science I	3
PLSC 101	American Politics	3
	Hours	**6**
Spring		
ENVS 203	Environmental Statistics	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
Justice & Ethics Choice		3
	Hours	**10**
Year Two		
Fall		
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
	Hours	**5**
Spring		
ENVS 310 or PLSC 392	Introduction to Environmental Law & Policy or Environmental Politics	3
Environmental Science Elective		3
	Hours	**6**
Year Three		
Fall		
ENVS 310 or PLSC 392	Introduction to Environmental Law & Policy or Environmental Politics	3
	Hours	**3**
Spring		
ENVS 335 or ECON 328	Ecological Economics or Environmental Economics	3
Society, Ethics, & Justice Elective		3
	Hours	**6**
Year Four		
Fall		
Engaged Learning Choice		3
Policy, Economics, & Resource Management Elective		3
Methods & Analysis Elective		3
	Hours	**9**
Spring		
Capstone Choice		3
Policy, Economics, & Resource Management Elective		3
Environmental Science Elective		3
	Hours	**9**
	Total Hours	**54**

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Describe the need for government intervention and the policy process.
- Explain the major US federal environmental laws and international agreements.
- Recognize the role of state and local innovation in environmental policy.
- Engage in environmental policy advocacy, development, and implementation.
- Evaluate the effectiveness of the policy toward environmental sustainability.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science

- Environmental Science (BS) (p. 937)
- Environmental Science Minor (p. 944)
- Environmental Science/Business (BS/MBA) (p. 1127)
- Environmental Science/Digital Media and Storytelling (BS/MC) (p. 1133)
- Environmental Science/Environmental Science and Sustainability (BS/MS) (p. 1139)
- Environmental Science/Global Strategic Communication (BS/MS) (p. 1146)
- Environmental Science/Public Health (BS/MPH) (p. 1153)
- Environmental Science/Public Policy (BS/MPP) (p. 1159)

Environmental Science (BS)

Solving the world's most pressing environmental problems requires understanding the scientific aspects of sustainability. Our program in environmental science prepares students to develop innovative solutions to challenges such as climate change, air and water pollution, and biodiversity loss.

This program has optional concentrations in Conservation and Restoration Ecology; Environmental Health; Food Systems and Sustainable Agriculture; or Climate & Energy.

Related Programs

Minor

- Environmental Science Minor (p. 944)

Combined

- Environmental Science/Business (BS/MBA) (p. 1127)
- Environmental Science/Digital Media and Storytelling (BS/MC) (p. 1133)

Curriculum

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

Students may take the program without a concentration [66 credit hours] or choose a concentration in Conservation and Restoration Ecology [67 credit hours]; Environmental Health [69 credit hours]; Food Systems and Sustainable Agriculture [66 credit hours]; or Climate & Energy [70 credit hours].

Code	Title	Hours
Core Curriculum		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
ENVS 274	Chemistry of the Natural Environment	3
ENVS 275	Chemistry of the Environment Lab	1
ENVS 276	Chemistry of Environmental Pollution	3
ENVS 280	Principles of Ecology	3
ENVS 286S	Principles of Ecology Lab	1
PLSC 392	Environmental Politics	3
Students take one of the following sequences based on concentration:		4
BIOL 102 & BIOL 112	General Biology II and General Biology II Lab [1]	
PHYS 111 & 111L	College Physics I Lec / Dis and College Physics Laboratory I [2]	

Justice and Ethics Choice		
Select one of the following:		3
ENVS 284	Environmental Justice	
PHIL 287	Environmental Ethics	
THEO 204	Religious Ethics and the Ecological Crisis	
Economics Choice		
ENVS 335	Ecological Economics	3
or ECON 328	Environmental Economics	
Engaged Learning Choice [3,4]		
Select one of the following:		3
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and the Environment	
ENVS 283	Environmental Sustainability	
ENVS 340	Natural History of Belize	
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems	
ENVS 350A	Solutions to Environmental Problems: Water	
ENVS 350C	Solutions to Environmental Problems: Climate Action	
ENVS 350F	Solutions to Environmental Problems: Food Systems [5]	
ENVS 369	Field Ornithology	
ENVS 391	Environmental Research (with SES approval) [5]	
ENVS 395	Environmental Internship (with SES approval) [5]	
Capstone Choice		
Select one of the following:		3
ENVS 390	Integrative Seminar	
ENVS 391C	Independent Environmental Research (Capstone)	
ENVS 395C	Environmental Internship (Capstone)	
Concentration Courses and Electives (p. 938)		**21-28**
Total Hours		**66-70**

1 Students with the Conservation and Restoration Ecology, Environmental Health, Food Systems and Sustainable Agriculture, and without concentration must take BIOL 102 and BIOL 112.

2 Students in the Climate and Energy Concentration must take PHYS 111 and PHYS 111L. Students in this concentration also take an additional PHYS course outlined in the Concentration requirements.

3 Students in the Food Systems and Sustainable Agriculture Concentration and the Climate and Energy Concentration have limited options to satisfy the Engaged Learning requirement.

4 Students in the Climate and Energy Concentration must take ENVS 273 for the Engaged Learning Requirement within the major. This requirement is outlined in the Concentration requirements.

5 Students in the Food Systems and Sustainable Agriculture Concentration may take this course to satisfy the Engaged Learning Requirement for the major.

Concentration Requirements and Elective Course Options

Environmental Science (Without Concentration)

Code	Title	Hours
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
Five (5) courses in Environmental Science Electives, at least three (3) of which must be at 300-level		15
Total Hours		**21**

Environmental Science: Conservation and Restoration Ecology Concentration

Code	Title	Hours
Required Courses		
ENVS 218	Biodiversity & Biogeography	3
ENVS 320	Conservation Biology	3
ENVS 321	Conservation Biology Lab	1
ENVS 330	Restoration Ecology	3
ENVS 331	Restoration Ecology Lab	1
ENVS 383	Human Dimensions of Conservation	3
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
One (1) course in Environmental Science Electives		3
Total Hours		**23**

Environmental Science: Environmental Health Concentration

Code	Title	Hours
Required Courses		
ENVS 300	Introduction to Public Health	3
ENVS 301	Environmental Health	3
ENVS 303	Introduction to Epidemiology	3
Electives		
One (1) course in Environmental Health and Society Electives		3
Four (4) courses in Environmental Science Electives		12
Total Hours		**24**

Environmental Science: Food Systems and Sustainable Agriculture Concentration

Code	Title	Hours
Required Courses		
ENVS 207	Plants and Civilization	3
ENVS 223	Soil Ecology	3
ENVS 325	Sustainable Agriculture	3
Food Systems and Sustainable Agriculture Required Choice		
Select one of the following:		3
ENVS 230	Feeding the Planet: Global Perspectives on Sustainability, Culture and Food	

ENVS 326	Agroecosystems	
ENVS 327	Food Systems Analysis	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
One (1) course in Environmental Science Electives		3
Total Hours		**21**

Environmental Science: Climate and Energy Concentration

Code	Title	Hours
Required Physics Core Course		
PHYS 112	College Physics II Lec/Disc	3
PHYS 112L	College Physics Lab II	1
Required Climate and Energy Courses		
ENVS 224	Climate & Climate Change	3
ENVS 273	Energy and the Environment [1]	3
ENVS 313	Energy Law & Policy	3
ENVS 316	Energy and Power Systems	3
ENVS 324	Climate Science	3
Electives		
One (1) course in Business, Economics, & Management Electives		3
One (1) course in Communication Electives		3
One (1) course in Methods & Analysis Electives		3
Total Hours		**28**

[1] This course satisfies the Engaged Learning requirement.

Electives

Society, Ethics, and Justice Electives

Code	Title	Hours
COMM 101	Public Speaking & Critical Thinking	3
COMM 277	Organizational Communication	3
COMM 306	Environmental Advocacy	3

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a “W” in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Examine the causes and consequences of environmental change at local to global scales. [no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [no concentration]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and all concentrations]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and all concentrations]
- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [Conservation and Restoration Ecology concentration]
- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [Conservation and Restoration Ecology concentration]
- Examine the sources of environmental degradation and their impacts on health. [Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [Environmental Health concentration]
- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [Environmental Health concentration]
- Explain the components of food systems and their complex interactions across spatial and temporal scales. [Food Systems and Sustainable Agriculture concentration]
- Articulate the physical, psychological, cultural, and spiritual significance of food to individual and community wellbeing. [Food Systems and Sustainable Agriculture concentration]
- Using multiple methods of analysis, evaluate the environmental and equity impacts of different food system practices to reveal points of leverage for social-ecological change. [Food Systems and Sustainable Agriculture concentration]
- Engage knowledge, skills, and values through experiences that advance sustainability, resilience, and justice within food systems. [Food Systems and Sustainable Agriculture concentration]
- Understand the fundamental concepts of climate science and the impacts of climate change on society and the natural environment. [Climate and Energy concentration]
- Assess the state of energy production, consumption, and the deployment of sustainable technologies as part of a just energy transition. [Climate and Energy concentration]
- Evaluate the role of governmental policy and regulation in solving climate and energy related problems. [Climate and Energy concentration]
- Apply techniques from both the natural and social sciences to design practical and innovative solutions to contemporary climate and energy issues. [Climate and Energy concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science Minor

The Environmental Science Minor provides a base in the science, social & political issues, and methods relevant to understanding environmental issues and working to solve environmental problems.

Related Programs

Minor

- Environmental Action and Leadership Minor (p. 928)
- Sustainability Management Minor (p. 796)

Curriculum

Requirements: 7 courses (21 credit hours); *at least 3 courses must be ENVS.* A maximum of 3 courses can count toward this minor and an SES major.

Code	Title	Hours
Environmental/Ecological Science [1]		
Select four of the following:		12
ANTH 104	The Human Ecological Footprint	
ENVS 204	Gender, Health & Environment	
ENVS 207	Plants and Civilization	
ENVS 215	Ornithology	

ENVS 218	Biodiversity & Biogeography	
ENVS 223	Soil Ecology	
ENVS 224	Climate & Climate Change	
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 237	Foundations of Environmental Chemistry	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and the Environment	
ENVS 280	Principles of Ecology	
or BIOL 265	Ecology	
ENVS 283	Environmental Sustainability	
ENVS 340	Natural History of Belize	
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems	
ENVS 369	Field Ornithology	
Policy, Business & Society		
Select one of the following:		3
ENVS 260 / COMM 260	Environmental Journalism	
ENVS 279	Climate and History	
ENVS 284	Environmental Justice	
ENVS 297	North American Environmental History	
ENVS 310	Introduction to Environmental Law & Policy	
ENVS 311	Natural Resources and Land Use Law & Policy	
ENVS 312	Water Law & Policy	
ENVS 313	Energy Law & Policy	
ENVS 333	Introduction to the Circular Economy	
ENVS 335	Ecological Economics	
ENVS 336	Design for Circular & Sustainable Business	
ENVS 363	Sustainable Business Management	
ENVS 383	Human Dimensions of Conservation	
ECON 328	Environmental Economics	
GLST 305	Globalization and Environmental Sustainability	
PLSC 354	Global Environmental Politics	
PLSC 392	Environmental Politics	
SOCL 272	Environmental Sociology	
SOCL 276	The Sociology and Politics of Food	
Methods & Application		
Select two of the following:		6
ENVS 203	Environmental Statistics	
ENVS 350A	Solutions to Environmental Problems: Water	
ENVS 350B	Solutions to Environmental Problems: Biogas	
ENVS 350C	Solutions to Environmental Problems: Climate Action	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
ENVS 380	Introduction to Geographic Information Systems	
ENVS 381	Advanced GIS Applications

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems.
- Examine the causes and consequences of environmental change at local to global scales.
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability.
- Create an action plan for leading a professional and personal life that promotes environmental sustainability.

Environmental Studies

- Environmental Studies (BA) (p. 946)
- Environmental Studies/Business (BA/MBA) (p. 1166)
- Environmental Studies/Digital Media and Storytelling (BA/MC) (p. 1171)
- Environmental Studies/Environmental Science and Sustainability (BA/MS) (p. 1176)

- Environmental Studies/Global Strategic Communication (BA/MS) (p. 1182)
- Environmental Studies/Public Policy (BA/MPP) (p. 1187)

Environmental Studies (BA)

Loyola's BA in Environmental Studies combines a solid base of courses in the natural sciences with course work in the social sciences to prepare students for careers in government, business, education, non-profit organizations or the media.

Related Programs

Combined

- Environmental Studies/Business (BA/MBA) (p. 1166)
- Environmental Studies/Digital Media and Storytelling (BA/MC) (p. 1171)
- Environmental Studies/Environmental Science and Sustainability (BA/MS) (p. 1176)
- Environmental Studies/Global Strategic Communication (BA/MS) (p. 1182)

Curriculum

Environmental Studies students complete coursework spanning a variety of disciplines pertinent to the understanding of environmental issues.

Code	Title	Hours

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by

successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions.
- Appraise the interactions and synergies between the natural world, social systems, and human cultures.
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness.
- Engaged actions of self-awareness and social solidarity that reflect a commitment to integral ecology.

Accelerated Bachelor's/Master's Programs with ESS-MS

- Advertising & Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
- Advertising Creative/Environmental Science and Sustainability (BA/MS) (p. 982)
- Advocacy and Social Change/Environmental Science and Sustainability (BA/MS) (p. 992)
- Communication Studies/Environmental Science and Sustainability (BA/MS) (p. 1057)
- Film and Digital Media: Film and Media Production Track/Environmental Science and Sustainability (BA/MS) (p. 1196)
- Film and Digital Media: International Programming Track/Environmental Science and Sustainability (BA/MS) (p. 1208)
- Multimedia Journalism/Environmental Science and Sustainability (BA/MS) (p. 1292)

School of Social Work

About Us

Founded in 1914, Loyola University Chicago's School of Social Work educates students to become leaders in the profession. Within a learning community dedicated to excellence in scholarship and service, students select a curriculum focused on clinical, organizational, community, and social justice issues.

BSW Program

Loyola University Chicago's School of Social Work's Bachelor of Social Work (p. 951) (BSW) program introduces students to the dynamic, changing, and challenging profession of social work. Loyola University Chicago offers a combined BSW/MSW degree that allows full-time students to complete both an undergraduate and graduate degree in social work in just five years. Students earn a BSW in Social Work degree, blending a top-quality social work curriculum with a strong liberal arts base. Because many first-year MSW requirements are completed during students' senior year, the MSW degree portion of the program can be completed in less time than normally required to earn a master's degree in social work.

Internships

Through relationships with over 1,000 agencies, non-profit organizations, hospitals, and schools in the Chicagoland area, Loyola provides outstanding access to supervised internships.

Continuing Education

The School of Social Work offers a variety of continuing education programs (https://cms4.luc.edu/socialwork/resources-initiatives/).

PRAXIS

Established in 2000, Praxis (https://cms4.luc.edu/socialwork/student-support/journals/) is one of the only student published journals of social work in the nation. The journal offers the scholarly work of students and alumni, providing a forum for the expression of diverse viewpoints and timely research.

Undergraduate Programs

- Social Work (BSW) (p. 951)
- Social Work (BSW/MSW) (p. 1344)
- Social Work/International Affairs (BSW/MA) (p. 1355)
- Social Work Minor (p. 954)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Social Work (SOWK)

SOWK 200 Introduction to Social Work (3 Credit Hours)
This course is an introduction to the social work profession through the identification of some of the human problems in society and the role of both society and social services in response to the problems. Students have the opportunity to observe several social service agencies and to evaluate current ways in which agencies interpret social problems and administer services Students will be able to evaluate current ways in which agencies interpret social problems and administer services.
This course satisfies the Engaged Learning requirement.

SOWK 205 Children and Youth: Systems and Services (3 Credit Hours)
Survey of the field of child welfare with consideration of various social services. Particular focus on abused and neglected children, foster care, adoption, and institutionalization.
Interdisciplinary Option: Human Services
Outcomes:
Students will be able to assess and analyze child welfare services within current political and social constraints

SOWK 301 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350; Corequisite: SOWK 380
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Understand core social work skills relevant to engaging with and working with individuals and families, 2) apply core skills to diverse client situations

SOWK 302 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies; as well as practice knowledge; the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
Understand integrated practice models that apply across micro, mezzo, and macro domains; Appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 303 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350; Pre or Corequisite: SOWK 301
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Understand the role of group work as a key social work methodology, and how group work is practiced within agency and community settings, 2) gain awareness of themselves as group members and facilitators

SOWK 305 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing
Co-requisites: SOWK 200, SOWK 370, and SOCL 101
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development. For Social Work majors only: Prerequisite: "C-" or higher in PSYC 101 AND Pre or For Social Work minors only: Pre or Corequisites: SOWK 200 and SOWK 370.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Understand the critical impact of the bio-psycho-social-spiritual perspective on the social work profession, 2) identify the role trauma and resilience have in human development and behavior

SOWK 307 Social Work Policy and Community Intervention (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing
Co-requisites: SOWK 200 and SOWK 370
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Outcomes:
Examine social workers in policy practice as change agents within communities and organizations; Discuss the history and current structures of social policies and services; Describe the role of policy in service delivery and the role of practice in policy development

SOWK 308 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work students; BSW major; Senior Standing; "C" or higher in the following courses: SOWK 200, 370, 305, (201 or 307), and 350 Corequisites: SOWK 380 This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels
It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Interdisciplinary Option: Human Services, Human Services
Outcomes:
Describe the importance of integrated practice; Examine a variety of models that can be used in integrated practice; Discuss the importance of empirical research of theories as well as interprofessional and interdisciplinary collaboration

SOWK 330 Internship I and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350; Corequisite: SOWK 362
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 340 Internship II and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 330 and SOWK 362
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 350 Preparation for Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Junior standing; A grade of "C" or higher in the following courses: SOWK 200 and SOWK 370
SOWK 370 may be taken as a co-requisite. Students will strengthen professional identification and to facilitate the transfer from social work education to professional practice or graduate studies.
Outcomes:
Introduce BSW majors to the internship experience; Integrate classroom learning with the practice setting

SOWK 360 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing
A course designed for individuals or small groups to focus on selected issues and problems in social work practice beyond course offerings.

SOWK 361 Special Topics (3 Credit Hours)
Pre-requisites: Sophomore standing
A survey course on a particular topic, such as aging, alcoholism and drug dependency, family process, group process, African-American men, gender, race, and culture. Students will understand how these issues affect social work practice.

SOWK 362 Integrative Seminar (1 Credit Hour)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 307, SOWK 305, and SOWK 350
Co-requisites: SOWK 330
This course is the first of two seminars that serve to enrich students' internship experience. The focus of this course is upon experiences and progress of the student in the first semester of internship and the relationship of the internship experience to specific foundational/generalist practice class content.
Course equivalencies: SOWK 362/SWFI/SWII 530S
Outcomes:
1) Integrate classroom knowledge and skills into the practice setting;2) reflect on internship learning experiences and growth of professional sense of self

SOWK 370 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
Pre-requisites: Sophomore standing
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Outcomes:
1) Examine students' engagement in a deep exploration of self-awareness of their identities, values, and biases in several areas; 2) recognize their knowledge and awareness of cultures and identities outside their own

SOWK 380 Assessment of Client Concerns in Context (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 301
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Describe the elements of strength-based and contextual assessments, 2) explain process of culturally informed assessment, 3) apply knowledge by assessing client and community situations

SOWK 390 Research and Evaluation in Social Work Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Senior standing; For Social Work majors only: A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, (SOWK 201 or 307), and SOWK 305
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Interdisciplinary Option: Human Services, Urban Studies
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Identify research literacy and research skills in order to be accountable, and to evaluate their own practice, programs, and service delivery in the field, 2) understand the methods of social work research

Social Work (BSW)

The Bachelor in Social Work degree is a four-year program offering generalist training in variety of social service settings in diverse communities. Graduates of this program are well positioned for roles in social services, including child welfare, community mental health, drug/alcohol rehabilitation, and developmental disabilities.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

BSW Program Generalist Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas.

Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, anti- racist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work.

Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

1. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
2. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
3. use technology ethically and appropriately to facilitate practice outcomes; and
4. use supervision and consultation to guide professional judgment and behavior.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response.

Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably, and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

1. advocate for human rights at the individual, family, group, organizational, and community system levels; and
2. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

1. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
2. demonstrate cultural humility by applying critical reflection, self-awareness, and self- regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

1. apply research findings to inform and improve practice, policy, and programs; and
2. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affect well-being, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights- based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

1. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
2. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

1. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
2. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

1. apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies; and
2. demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

1. engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals; and
2. incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

1. select and use culturally responsive methods for evaluation of outcomes; and
2. critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities.

Social Work Minor

Students interested in a social work minor are required to take a sequence of six courses (totaling 18 credit hours) which must include four required courses and two social work electives. Grades of “C” or better must be earned in all minor courses.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Learning Outcomes

The minor's learning outcomes are the following competencies from the BSW outcomes:

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas.

Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, anti- racist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

1. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
2. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
3. use technology ethically and appropriately to facilitate practice outcomes; and
4. use supervision and consultation to guide professional judgment and behavior.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history

that result in oppression and racism, including social work's role and response.

Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably, and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

1. advocate for human rights at the individual, family, group, organizational, and community system levels; and
2. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

1. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
2. demonstrate cultural humility by applying critical reflection, self-awareness, and self- regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

1. apply research findings to inform and improve practice, policy, and programs; and
2. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affect well-being, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights- based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

1. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
2. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate

engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

1. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
2. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level

courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1. If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2. Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3. In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4. For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 2283) for academic policies that supersede those of academic units within the University.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Accounting (BBA/MSA)

Loyola's BBA/MSA degree program is rigorous yet flexible. Interested and qualified students should apply to complete the master's portion of the program during the second semester of their junior year to take advantage of an MSA program 2-course reduction opportunity.

Students can apply to the MSA program at any time during their academic career. BBA/MSA students can complete the graduate coursework component in one year.

ACCT 412	Special Topics in Accounting	
ACCT 424	Managerial Accounting	
ACCT 425	International Accounting	
ACCT 431	Tax Research	
ACCT 432	State, Local and International Tax	
ACCT 436	Forensic Accounting and Fraud	
ACCT 437	Advanced Forensic Accounting	
LREB 445	Entrepreneurship Law	
Electives [6]		
Two MBA non-accounting elective courses		6
Three electives (MBA or MSA)		9
Total Hours		**117-118**

1. Accounting majors with prior credit for COMM 101 Public Speaking & Critical Thinking must take ENGL 210 Business Writing to complete this requirement.
2. Students majoring in Economics or Finance should take MATH 130 Business Calculus (or MATH 131 Applied Calculus I or MATH 161 Calculus I). All other students take MATH 110 Business Precalculus (or MATH 131 Applied Calculus I).
3. One must be a Quinlan course or ENGL 210 Business Writing.
4. A study abroad experience will also satisfy this requirement.
5. Only one ACCT 399 Special Topics in Accounting class is allowed to count for this major.
6. Students work with the MSA program director in choosing electives.

Major Requirements

BBA Accounting Major Requirements: Undergraduate students who choose to complete the accounting major must complete 24 credit hours within the major (not including ACCT 201 Introductory Accounting I/ACCT 202 Introductory Accounting II).

BBA/MSA Requirements: BBA/MSA students must complete 12 additional courses (36 hours) beyond the BBA accounting major requirements. This includes six graduate accounting courses (six MSA-level), one graduate business ethics course, two MBA elective courses (non-accounting), and three general elective courses (MBA, MSA). Students choosing the BBA/MSA program may take two graduate accounting courses during their senior year that would count towards both the undergraduate and graduate accounting hours requirement.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Semester I		
ACCT 201	Introductory Accounting I	3
	Hours	**3**
Semester II		
ACCT 202	Introductory Accounting II	3
	Hours	**3**
Year 2		
Semester I		
ACCT 303	Intermediate Accounting I	3
ACCT 328	Concepts in Taxation	3
	Hours	**6**
Semester II		
ACCT 304	Intermediate Accounting II	3
ACCT 311	Auditing & Internal Control Systems	3
	Hours	**6**
Year 3		
Semester I		
ACCT 317	Managerial Accounting	3
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
	Hours	**6**
Semester II		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
	Hours	**3**
Year 4		
Semester I		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
Also, consider graduate accounting class if BBA/MSA student.		
	Hours	**3**
Semester II		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
Also, consider graduate accounting class if BBA/MSA student.		
	Hours	**3**
Year 5		
Semester I		
Meet with MSA program director		
	Hours	**0**
	Total Hours	**33**

Note: If you are an undergraduate accounting major, some modification of the 12-course MSA program requirement is possible if you opt for taking up to two graduate accounting classes while in your senior year. You can also double count these courses towards the undergraduate accounting major requirement.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional

master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Deep and broad understanding of accounting and business
- Strategic cost management
- Financial management
- Auditing and business risk
- Legal and regulatory knowledge
- Ethics and values in accounting and business
- Decision-making and problem-solving skills
- International implications of accounting and business decisions

Advertising & Public Relations/ Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Advertising & Public Relations/Global Strategic Communication (BA/MS)

The School of Communication's five-year BA/MS program is for students who are focused on a communication career on the global stage. The program combines two degrees, the BA in Advertising and Public Relations (Ad/PR) and the MS in Global Strategic Communication (GSC).

This is a professionally focused, interdisciplinary, non-thesis program. Students will gain an understanding of strategic communication processes, learning about public relations, advertising and digital marketing. They will learn how to navigate the globalized world by creating strategic campaigns and culturally relevant messages to engage a diverse range of stakeholders. A study abroad class in global media centers provides applied learning.

3 May be repeated if topic differs.
4 May be repeated once for MS elective.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
COMM 175	Introduction to Communication	3
	Hours	**3**
Spring		
COMM 210	Principles of Public Relations	3
COMM 211	Principles of Advertising	3
	Hours	**6**
Year Two		
Fall		
COMM 200	Digital Communication and Society	3
	Hours	**3**
Spring		
COMM 213	Digital Foundations	3
MARK 201	Principles of Marketing	3
	Hours	**6**
Year Three		
Fall		
COMM 100	SOC Career Prep Seminar	1
Major Track Course		3
Major Track Course		3
COMM 300/400-Level Elective		3
	Hours	**10**
Spring		
Major Track Course		3
Research Course		3
	Hours	**6**
Year Four		
Fall		
COMM 391	Advertising/Public Relations Internship	3
COMM 401	Foundations of Global Strategic Communication	3
COMM 413	Writing for Strategic Communication	3
	Hours	**9**
Spring

COMM 400-Level Elective	3
Hours	**9**
Total Hours	**73**

[1] Could also be taken in Summer; can be repeated as elective credit in a different location.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media.
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Demonstrate the competencies to work as an entry-level professional in advertising or public relations.

Advertising & Public Relations/ International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Advertising & Public Relations and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Advertising & Public Relations and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Advertising Public Relations (BA) (p. 814)

Combined

- Advertising Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
- Advertising Public Relations/Global Strategic Communication (BA/MS) (p. 969)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by

a single department in the College of Arts & Sciences or another School at Loyola.

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**76**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet

the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]

- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts. [Advertising & Public Relations]
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media. [Advertising & Public Relations]
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices. [Advertising & Public Relations]
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities. [Advertising & Public Relations]
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community. [Advertising & Public Relations]
- Demonstrate the competencies to work as an entry-level professional in advertising or public relations. [Advertising & Public Relations]

Advertising & Public Relations/ Marketing (BA/MSM)

The Advertising & Public Relations Bachelor of Arts/Master of Science in Marketing is an accelerated program which allows Loyola students to earn the two respective degrees in a slightly shorter period of time than by completing each separately.

Related Programs

Major

- Advertising Public Relations (BA) (p. 814)

Combined

- Advertising Public Relations/Global Strategic Communication (BA/MS) (p. 969)
- Advertising Public Relations/International Affairs (BA/MA) (p. 972)

Curriculum

Students in the BA program must choose and declare a focus in Advertising, Public Relations, or Integrated, which determines the specific three courses they will take as part of their chosen focus.

Students generally take two MSM courses during their senior year of undergraduate work. The MSM requires 12 courses and prerequisite ISSCM 402N.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet

the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts. [Advertising & Public Relations]
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media. [Advertising & Public Relations]
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices. [Advertising & Public Relations]
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities. [Advertising & Public Relations]

- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community. [Advertising & Public Relations]
- Demonstrate the competencies to work as an entry-level professional in advertising or public relations. [Advertising & Public Relations]
- Develop the creative and strategic skills you need to lead and innovate in the diverse, digital, and dynamic field of marketing [Marketing]
- Learn marketing strategies that deliver brand growth and a competitive advantage in a time of sweeping economic, environmental, and social change [Marketing]
- Gain the technical business skills that are essential in today's global economy [Marketing]
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote positive social change [Marketing]
- You will also build a strong foundation in: Marketing finance; Strategic planning; Brand leadership; Digital and social content development; Leadership and ethics; Database analytics; Sustainable business leadership; and Global campaign development [Marketing]

Advertising Creative/Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

With MS Law & Policy Track

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Gain knowledge for how creative strategies bring insights into focus to meet challenges and solve problems.
- Understand the creative process employed for developing big ideas that can be used across multiple and changing communication platforms.
- Demonstrate skills for writing copy and designing messages in traditional and digital media.
- Apply ethical and inclusive decision making throughout the creation of communications.
- Develop a professional portfolio of creative material.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Advertising Creative/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Advertising Creative and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Advertising Creative and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Advertising Creative (BA) (p. 817)

Combined

- Advertising Public Relations/International Affairs (BA/MA) (p. 972)
- Advertising Creative/Environmental Science and Sustainability (BA/MS) (p. 982)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

5 Can be taken as an elective if not taken for Specialized Focus.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

School of Law - Classes Offered at the John Felice Rome Center

Code	Title	Hours
PLAW 101	Comparative and Ethical Lawyering for the Rule of Law	3
PLAW 102	History, Theory and Practice of Rule of Law for Development	3
PLAW 103	Theory and Practice of Assessments in Rule of Law Advising	2
PLAW 104	International Development Architecture	3
PLAW 105	Sustainable Development Through International Commerce and Investment	2
PLAW 106	Design of Rule of Law Programs and Proposal Preparation	2
PLAW 107	Rule of Law in Conflict Prevention and Peacebuilding	2
PLAW 108	Legal Systems and Methods	3
PLAW 250	Research and Writing on the Rule of Law	3
PLAW 907	Rule of Law Project Management, Monitoring & Evaluation	3

Parkinson School of Health Sciences and Public Health

Code	Title	Hours
MPBH 400	Determinants of Population Health	3
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal and Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 424	Health Economics and Healthcare Financing	3
MPBH 432	Health Impact Assessment	3

Quinlan School of Business

Code	Title	Hours
ECON 424	International Business Economics	3
FINC 455	International Financial Management	3
HRER 422	Global HR Management	3
HRER 502	Global Employment Relations	3
MARK 465	International Marketing	3
MARK 461	Research Methods in Marketing	3
MGMT 446	International Business Ethics	3
SCMG 486	Global Logistics	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 175	Introduction to Communication	3
	Hours	**3**
Spring		
COMM 210	Principles of Public Relations	3
COMM 211	Principles of Advertising	3
	Hours	**6**
Second Year		
Fall		
COMM 200	Digital Communication and Society	3
COMM 215	Ethics & Communication	3
	Hours	**6**
Spring		
COMM 213	Digital Foundations	3
COMM 214	Introduction to Creative Concepts	3
MARK 201	Principles of Marketing	3
	Hours	**9**
Third Year		
Fall		
COMM 100	SOC Career Prep Seminar	1
COMM 266	Advertising Copywriting	3
COMM 290	Branding and Positioning	3

Major Elective		3
	Hours	**10**
Spring		
COMM 329 or COMM 330	Advertising and Public Relations Design or Intermediate Advertising Design	3
COMM 391	Advertising/Public Relations Internship	3
Research Course		3
	Hours	**9**
Fourth Year		
Fall		
COMM 344	Portfolio I	3
Major Elective		3
Two (2) International Affairs Courses [1]		6
	Hours	**12**
Spring		
COMM 389	Advertising Creative Capstone: Portfolio II	3
Two (2) International Affairs Courses [1]		6
	Hours	**9**
Fifth Year		
Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
Spring		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**82**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the

student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Gain knowledge for how creative strategies bring insights into focus to meet challenges and solve problems for industry and organizations. [Advertising Creative]
- Understand the creative process employed for developing big ideas that can be used across multiple and changing communication platforms. [Advertising Creative]
- Demonstrate skills for writing copy and designing messages in traditional and digital media. [Advertising Creative]
- Enhance skills for creating content that is relevant and delivers strategy. [Advertising Creative]
- Apply ethical and inclusive decision making throughout the creation of communications. [Advertising Creative]
- Develop a professional portfolio of creative material. [Advertising Creative]

Advocacy and Social Change/ Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students

to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the

graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Select and use various communication strategies (including persuasion, argumentation, conflict management, negotiation and mediation) leading to ethical social change.
- Create, define, analyze, and interpret messages.
- Serve the needs of diverse groups, communities and organizations which strive for equity, inclusion and fairness.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Advocacy and Social Change/ International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Advocacy and Social Change and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Advocacy and Social Change and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of

Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 175	Introduction to Communication	3
	Hours	**3**
Spring		
COMM 200	Digital Communication and Society	3
	Hours	**3**
Second Year		
Fall

	Hours	**6**
Fourth Year		
Fall		
Major Elective		3
Applied Course		3
Theory Course		3
Two (2) International Affairs Courses [1]		6
	Hours	**15**
Spring		
Research Methods		3
Two (2) International Affairs Courses [1]		6
	Hours	**9**

Fifth Year	
Fall	
Three (3) International Affairs Courses [1]	9
Hours	**9**
Spring	
Three (3) International Affairs Courses [1]	9
Hours	**9**
Total Hours	**70**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards

the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Select and use various communication strategies (including persuasion, argumentation, conflict management, negotiation and mediation) leading to ethical social change. [Advocacy and Social Change]
- Create, define, analyze, and interpret messages. [Advocacy and Social Change]
- Demonstrate effectiveness as rhetors, critics and decision makers. [Advocacy and Social Change]
- Serve the needs of diverse groups, communities and organizations which strive for equity, inclusion and fairness. [Advocacy and Social Change]

Applied Psychology/Public Service Leadership (BA/MA)

The BA Applied Psychology/ MA Public Service Leadership program is an accelerated, online program that gives academically successful Loyola SCPS BA Applied Psychology majors the opportunity to pursue the MA degree in Public Service Leadership while completing their BA degree. This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA Applied Psychology program to take four of the courses from the MA Public Service Leadership in their senior year. These courses will be taken as elective courses and will count toward the degree requirements for both programs.

[1] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as

an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Apply scientific thinking to solve individual, interpersonal, organizational and social problems in real world case studies and organizational/community projects. [Applied Psychology]
- Analyze theories in human behavior, cognition, emotion, and motivation in written assignments and oral presentations. [Applied Psychology]

- Use strategic communication and persuasion skills based in the behavioral sciences in role plays and real-world applications. [Applied Psychology]
- Interpret statistical and evaluation data to discern meaningful patterns and assess the impact of interventions in course work and organizational/community applications. [Applied Psychology]
- Recognize best practices including ethical and pragmatic constraints of applied research with people in course work and organizational/community projects. [Applied Psychology]
- Describe components and levels of leadership across public sectors. [Public Service Leadership]
- Apply ethical reasoning to administrative design and decision-making in the current realm of public service leadership. [Public Service Leadership]
- Analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted. [Public Service Leadership]
- Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression. [Public Service Leadership]
- Collect and apply data in problem identification and problem solving. [Public Service Leadership]
- Differentiate between non-crisis leadership and leadership in emergencies among public, social and economic sectors. [Public Service Leadership]
- Apply fundamentals of communication appropriate to situation in both local and global situations. [Public Service Leadership]

Biochemistry (BS/MS)

The BS/MS program in Biochemistry allows currently Loyola University Chicago undergraduate students to obtain both a Bachelor's and Master's degree in a compressed time period. This program structure is beneficial for those planning to take a gap year between undergraduate graduation, medical school, dental school, or other higher education. The research experience and courses with faculty you know and love allow you to build the references that will help you successfully transition to your next step. Your coursework keeps your chemical intuition sharp when preparing for admissions tests.

Students complete the bachelor's degree, but also take two graduate courses as undergraduates their senior year that count toward both their Bachelor's and Master's degree. By doing so, the 6 additional graduate courses can be finished in a single year for this 4+1 program.

Related Programs

Combined

- Chemistry (BS/MS) (p. 1053)

Curriculum

Students complete the bachelor's degree, but also take two graduate courses as undergraduates their senior year that count toward both their Bachelor's and Master's degree. By doing so, the additional graduate courses can be finished in a single year for this Accelerated Bachelor's/Master's program.

Chemistry is taking a modern, integrated approach to foundational coursework.

- Aligns with the latest American Chemical Society (ACS) and American Association of Medical Colleges (AAMC) standards & guidelines
- Themes: structure-activity relationships; culture and practice of science; energy; polymers, proteins, and macromolecules; sustainability; chemical synthesis, purification, characterization, and analysis.
- With such knowledge and skills, you should be prepared to further excel in upper-level coursework that specializes your work in the specific major you have chosen.

In addition to the required courses listed below, CHEM 300 Undergraduate Research is strongly recommended. Credit hours earned in CHEM 300 Undergraduate Research or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the BS degree requirement. Both CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are required for Departmental honors. The CHEM-BS degree is accredited by the American Chemical Society.

400-Level CHEM Electives (15 credit hours) [1]		
Thesis-Based MS in Chemistry		
CHEM 401	Chemistry Methodology and Communication	
Select one of the following:		
CHEM 424	Molecular Characterization Part A	
CHEM 435	Special Topics in Physical Chemistry	
CHEM 445	Special Topics in Inorganic Chemistry	
CHEM 455	Special Topics in Analytical Chemistry	
CHEM 465	Special Topics in Biochemistry	
Required 12 credit hours in one of the following		
CHEM 429	Research in Organic Chemistry	
CHEM 439	Research in Physical Chemistry	
CHEM 449	Research in Inorganic Chemistry	
CHEM 459	Research in Analytical Chemistry	
CHEM 469	Research in Biochemistry	
Select any four courses from any area of concentration: Organic, Inorganic, Physical, Analytical, Education. (12 credit hours) *(p. 1007)*		
CHEM 605	Master's Study	
CHEM 595	Thesis Supervision	
Total Hours		**103**

[1] Elective courses can be distributed or in a specialized area as determined by student. A list of all 400 level Chemistry courses can be found here (p. 1565).

- Core requirements (p. 1405)
- Please visit http://www.luc.edu/cas/academics_degreerequirements.shtml#college (https://www.luc.edu/cas/academics_degreerequirements.shtml/#college) to view other CAS requirements.
- For chemistry course descriptions and pre and co-requisite information, please visit here (p. 317).

All chemistry majors are assigned a chemistry faculty advisor. Please meet with your advisor on a regular basis, at least twice a year, for assistance with your chemistry schedule, research possibilities, graduate school information and more. If you do not know who your advisor is please call the chemistry department at 773/508-3100 or come to the department office located in Flanner Hall room 125.

MS Areas of Specialization

Code	Title	Hours
Analytical		
CHEM 455	Special Topics in Analytical Chemistry [1]	3
Biochemistry		
CHEM 465	Special Topics in Biochemistry [2]	3
CHEM 470	Biochemistry I	3
Education		
CHEM 480	Chemistry for Teachers I	3
Inorganic		
CHEM 441	Advanced Inorganic Chemistry	3
CHEM 445	Special Topics in Inorganic Chemistry [3]	3
Organic		
CHEM 423	Medicinal Chemistry	3
CHEM 424	Molecular Characterization Part A	3
CHEM 425	Special Topics in Organic Chemistry [4]	3
Physical		
CHEM 435	Special Topics in Physical Chemistry [5]	3

[1] Topics can include Archeometry and Adv Analytical Chemistry.
[2] Topics can include: Plant Biochemistry; The Chemistry of Enzymes; Biochemistry of Lipids; Adv Approaches in Biochemistry; Adv Enzyme Kinetics and Mechanisms; Molecular Immunology; Biochemistry of Renewable Energy; and Proteomics.
[3] Topics can include: Medicinal Inorganic Chemistry; Electron & X-Ray Methods; and Molecular Characterization Part B.
[4] Topics can include: Orgo Structure Determination; Strategy & Tactics of Org Chem; Func Dyes Biomed Imaging; Avd Orgo-Synthesis and Mech; Comp Organomet Chem; and Advanced Organic Synthesis.
[5] Topics can include: Exp Tech of Surface Science; Survey of Modern Physical Chem; Surface Chem and Analysis; Thermodynam/Protein Structures; and Computational Chemistry.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Students **not** placing in MATH 118 Precalculus II or higher cannot start the Chemistry sequence until MATH 117 Precalculus I is completed with a grade of C- or better. Such students are advised to enroll in first-year Chemistry courses in the summer sessions (after meeting the math requirement) in order to complete the major in four years.

[1] Capstone Course: CHEM 314 Instrumental Analysis for Junior or Senior year

CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are strongly recommended and required to receive Departmental Honors with graduation. Credit hours earned in CHEM 300 Undergraduate Research and/or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the CHEM-BS degree requirement. CHEM 361 Principles of Biochemistry does not count towards the CHEM-BS degree.

Mathematics Preparedness for Chemistry

Students intending to register for a chemistry course will need a background in mathematics that is commensurate with the computational requirements of the chemistry course. Evidence of math preparedness is obtained from results of the ACT/SAT and of a Mathematics Placement Assessment (MPA) administered by the College in conjunction with the Department of Mathematics and Statistics. Students who are found to be mathematically under prepared are required to pass the appropriate course or sequence of courses in mathematics with a grade of "C-" or better before they register for a chemistry course. More information regarding placement by ACT/SAT and the MPA can be found at http://www.luc.edu/math/placement/.

Thesis Requirement

In addition to coursework, students in Thesis-based MS in Chemistry will write and defend a research thesis. Once students have completed coursework and are solely working on the thesis they will be enrolled in the appropriate study or supervision course to maintain good standing in the university.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- answer knowledge and comprehension type questions related to fundamental chemical concepts and demonstrate fluency with basic facts, terminology, and principles in the various subfields of chemistry.
- understand and describe the chemical basis of life, our natural resources and environments, and the universe.
- retrieve, research, synthesize, and critically evaluate scientific literature.
- design and implement experiments that test predictive hypotheses, gather relevant data, analyze results, and interpret the significance of these results.
- operate state of the art equipment used by chemists and biochemists.
- engage in scientific reasoning with claims based on supported evidence and communicate effectively results and interpretations of scientific research.

Bioinformatics (BS/MS)

Bioinformatics is a highly interdisciplinary STEM field that integrates computational and statistical methods for analyzing large biological data sets. Bioinformaticians apply their biological and computational sciences backgrounds to develop, utilize, and optimize new computational tools to organize, synthesize, and analyze the rapidly increasing amount of biological and biomedical data.

Accelerated Bachelor's/Master's programs (ABM) provide significant cost savings to students interested in accelerating their path to an advanced degree. An ABM allows full-time students to complete both an undergraduate and graduate degree within just five years, equating to a lower overall cost than completing both programs separately. The Bioinformatics ABM programs include coursework in Biology, Chemistry, Computer Science, and Statistics as well as hands-on research experience. Students typically apply during the spring semester of their Junior year (Applicants must be at least a Junior based on credit hours and under 1 year from completing the BS degree).

Two ABM programs are available:

- For students majoring in Bioinformatics BS/MS (BIOI BS/BIOI MS) [This page!]
- For students majoring in Biology BS - Bioinformatics MS (BIOL BS/BIOI MS) [Please follow this link (p. 1026)!]

The one-year MS component is offered as one of two possible tracks:

1. Thesis track (research-based) for students interested in academic research and advanced degree programs, such as a Ph.D. program.
2. Non-thesis track (internship-based) for students who aim to enter the workforce in an industrial setting, such as Biotech and Pharma

Related Programs

Combined

- Biology/Bioinformatics (BS/MS) (p. 1026)

Curriculum

An ABM allows full-time students to complete an undergraduate and graduate degree within five years. This is possible because students take Graduate-level courses during their senior year, which earns them Graduate-level credit. Graduate-level credit hours taken during the undergraduate program and then applied toward graduate program requirements will be referred to as Shared Credits. Up to 15 Graduate-level credit hours can be taken during senior year, and a minimum of 15 Graduate-level credit hours will be taken during the MS year.

Code	Title	Hours
Biology Fundamental Courses		
BIOL 101	General Biology I	3
BIOL 282	Genetics	3
BIOL 283	Genetics Laboratory	1
Chemistry Fundamental Courses		
CHEM 160	Chemical Structure and Properties	3
CHEM 180	Chemical Reactivity I	3
CHEM 240	Chemical Reactivity II	3
CHEM 260	Quantitative Methods in Chemistry	3
CHEM 361	Principles of Biochemistry	3
Computer Science Fundamental Courses		
COMP 141	Introduction to Computing Tools and Techniques	3
MATH 215	Object-Oriented Programming with Mathematics [1]	3
COMP 231	Data Structures & Algorithms for Informatics	3
Math/Stats Fundamental Courses		
MATH 131	Applied Calculus I	3
or MATH 161	Calculus I

STAT 408	Applied Regression Analysis	3
STAT 410	Categorical Data Analysis	3
STAT 436	Topics in Biostatistics	3

1 BIOI 495 Special Topics in Bioinformatics includes topics: Human Genetics, Human Molecular Genetics, Scientific Logic & Critical thinking, Genomics - Spring only, & Metagenomics - Fall only
2 CHEM 425 Special Topics in Organic Chemistry (Medicinal Chemistry)
3 CHEM 435 Special Topics in Physical Chemistry (Computational Biochemistry)
4 CHEM 455 Special Topics in Analytical Chemistry (Introduction to Spectroscopy)
5 CHEM 465 Special Topics in Biochemistry includes topics: Enzymology, Plant Biochemistry, & Protein Crystallography.

Suggested Sequence of Courses

The sequence of courses below is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor(s) for assistance with course selection.

These sample course schedules exemplify how students may complete their Bioinformatics major (B.S.), University Core Requirements, and M.S. in Bioinformatics within five years of study. The first is an example for the Non-thesis track, and the second for the thesis track:

Suggested Sequence of Courses - Non-thesis Track

Course	Title	Hours

1 This course is required to meet the GPA requirements for admission into the Bioinformatics ABM program.
2 Alternatively, BIOL 392 Metagenomics can be taken [Fall only]
3 Courses required of the M.S. degree, totaling 30 credit hours.
4 Courses which could be applied towards both the B.S. and M.S. degrees.
5 Alternatively CHEM 465 Special Topics in Biochemistry can be taken [Spring odd years only]
6 If Bioinformatics is taken at the undergraduate level (BIOL 388 Bioinformatics), at least one of the *Bioinformatics Electives* must be in **Biology**.

Rules for taking MS courses in senior year:

- A maximum of 15 Graduate-level credit hours can be taken during the undergraduate program.
- Included in these 15 credit hours may be up to three designated courses that may count as Shared Credits for the BS as well as the MS degree (formerly known as double dipping). Designated courses are listed at the bottom of this curriculum. The three recommended Shared Credits are included in the course list.
- Graduate-level credit hours that are not Shared Credits will count toward your MS degree only.

The following courses are required for the Bioinformatics ABM programs (BIOI-BS/BIOIMS). Two tracks are offered: a thesis track and a non-thesis track. While most fundamental courses are required for both tracks, some track-specific Graduate-level courses are listed under the respective thesis track and non-thesis track headers.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the

student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Loyola's Bioinformatics ABM Programs will prepare you with the following:

- technical skills at the interface of biology, computer science, chemistry, and statistics;
- biological and chemical laboratory techniques;
- computer programming capabilities;
- statistical techniques to analyze results from laboratory experiments and computer outputs
- an understanding of critical problems, proposed solutions, and future challenges of the bioinformatics field; and
- the ability to conduct bioinformatics studies in the industry and the research environment.

Biology/Business (BS/MBA)

With contemporary life sciences playing an ever-larger role in the economy, there is an increasing demand by employers for individuals with rigorous training in biology as well as business. Career opportunities in the biotechnology and pharmaceutical industries are expanding significantly, and are likely to continue to do so for the foreseeable future as applications of modern biological research continue to grow.

The BS in Biology/MBA dual-degree program provides the type of broad training that contemporary employers in these industries value. It is the first program of its type in the Chicago area.

BIOL 396	Research [2]	3
BIOL 398	Internship in Biology [2]	1-3
NEUR 302	Laboratory in Neuroscience II	3

[1] If not already taken as the 200-level required lab.
[2] Either BIOL 396 Research OR BIOL 398 Internship in Biology (but NOT both) count as Biology Electives.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
MATH 131	Applied Calculus I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1

MARK 460	Marketing Management	3
	Hours	**11**
Year Five		
Students will complete 13 MBA courses in their 5th year with appropriate waivers.		36
	Hours	**36**
	Total Hours	**118**

Course Waivers

Biology majors admitted to the five-year program can take up to three of the required MBA courses listed above during their senior year. The MBA courses are taught in the evening on a quarter system, with the first quarter beginning at approximately the same time as the fall semester.

Course waivers are determined upon admission to the MBA program. Ideally, biology majors will be waived from ISSCM 400 Quantitative

Methods, ISSCM 491 and ECON 420 Managerial Economics. Thus, they will take ACCT 400 Financial Accounting for Business Decisions and MARK 460 Marketing Management during their senior year. These graduate courses can be applied as six hours of free electives toward the BS in Biology degree.

Progress Through the Program

In addition to completing the normal requirements for the BS in Biology (p. 299), students planning to enter the MBA program should do the following:

Freshman/Sophomore Years: Arrange their undergraduate course scheduling to preserve six hours of free electives until their senior year. The majority of biology majors have math and foreign language placements upon entrance that already give them the six hours of free electives. Through use of summer school, the remaining students can also readily have the free elective hours by the time they are seniors. During their first two years, students should take ECON 201 Principles of Microeconomics and ECON 202 Principles of Macroeconomics, which will satisfy the social science requirement of the Core Curriculum and allow the student to waive out of ECON 420 Managerial Economics.

Junior Year (2nd semester): Take the GMAT and make formal application to the MBA program. Take BIOL 335 Intro to Biostatistics. Biostatistics, which counts as an upper-level elective in the biology major and allows the student to waive out of ISSCM 491 .

Senior Year: Take ACCT 400 Financial Accounting for Business Decisions and MARK 460 Marketing Management, which will count as free electives toward the BS degree. Complete all requirements for the BS in Biology.

Fifth Year: During the fifth year, students who have followed the above directions will have a total of 13 MBA courses remaining. These courses can be completed full-time at the rate of three or four per quarter (including the summer quarter). Students also have the option to complete the MBA program on a part-time basis (usually one or two courses per quarter).

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses

that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

At the completion of the Biology BS / Business MBA program:

- Students will demonstrate developing mastery of the following Vision and Change core concepts and their related principals: evolution (the diversity of life-forms that have evolved over time through mutations, selection and genetic change; structure and function (the basic units of biological structures that define the functions of all living things); information flow, exchange and storage (the influence of genetics on the control of the growth and behavior of organisms); pathways and transformations of energy and matter (the ways in which chemical transformation pathways and the laws of thermodynamics govern the growth and change of biological systems); and systems (the ways in which living things are interconnected and interact with one another).
- Students will be able to retrieve, synthesize, and critically evaluate scientific literature.
- Students will be able to communicate (orally and in writing) results and interpretation of scientific research.
- Students will be able to design and implement experiments that test predictive hypotheses, analyze data, report results, and interpret the significance of these experiments.
- Students will learn: Leadership; Strategy; Data-driven decision making; and Communication, teamwork, and ethics.

Biology/Secondary Education (BS/MEd)

NOTE: This program is not currently accepting applications.

Become a high school biology teacher. In this five-year, dual-degree program, students earn a bachelor's degree in Biology and a master's degree in Secondary Education, preparing them to teach grades 9-12. Through this program, students qualify for an Illinois Professional Educator License (PEL) in Secondary Education (grades 9-12) and fulfill the requirements for the Illinois English as Second Language (ESL) endorsement. Additional endorsements can be added to teach science in Middles Grades (grades 5-8), as well as additional science disciplines.

In Illinois there is a critical need for secondary science teachers. Numerous job opportunities are available for students interested in becoming secondary science teachers.

- Earn both degrees together in less time and at a lower cost than it would take if pursued separately.
- Gain broad perspective through a multidisciplinary curriculum.

- Get real-world classroom experience in diverse settings through Loyola partnerships with schools and communities.
- Gain extensive experiences engaging with diverse populations, including students with special needs and those labeled as English language learners (ELL).

Related Programs

- Biology (BS) (p. 299)
- Secondary Education (BSEd) (p. 904)

Master's

- Secondary Education (MEd) (p. 2014)

Curriculum

Students are enrolled in the College of Arts and Sciences (https://www.luc.edu/cas/) for the first four years, working to complete the requirements for a bachelor of science degree in Biology. Students may begin the required sequence of classes for the MEd in Secondary Education starting in their junior or senior year. The remainder of required education courses, including student teaching, are completed in the fifth year.

Students work under the guidance of the School of Education Senior Academic Advisor to outline a specific course of study to fulfill all requirements. The number and timing of the education courses taken in the fourth and fifth years can vary depending on each student's particular needs. Summer courses may be needed between the fourth and fifth year depending on the number of courses taken during years three and four, and depending on whether additional teaching endorsements are sought.

Program Overview

5-Year Dual-Degree B.S./M.Ed. Program

Years 1-2	Years 3-4	Year 5 Summer 1	Fall	Spring	Summer 2
Content-area B.A./B.S. major requirements in CAS	Content-area B.A./B.S. major requirements in CAS	(Summer courses may be required, depending on what courses were taken in Years 3-4)	Education coursework	Student Teaching	Student Teaching ends in June
Contact School of Education advising	Contact School of Education advising	**Optional** - Complete additional coursework for endorsements (e.g., bilingual, other content areas)	School visits 1 day per week + on-campus courses 3 late afternoons and evenings per week	Part time student teaching starting in January, full time starting in March	
May apply to dual-degree program starting in Year 1	Apply to dual-degree program if have not already done so				
Optional - Join a Professional Learning Community (PLC) in the School of Education as schedule allows	Begin education coursework as schedule allows				
	Optional - Join a Professional Learning Community (PLC) in the School of Education as schedule allows				

TRANSFERRING CREDIT

Transfer students seeking the BS in Biology degree must take a minimum of 20 credit hours in Biology courses at Loyola. No more than 18 credit hours from another institution may be applied to the BS in Biology degree program.

COURSE REPEAT RULE

Effective with the spring 2009 semester, students are allowed only TWO attempts to pass Biology courses with a C- or better grade. The two attempts includes withdrawals (W).

The procedure for securing approval for a repeat: Students must come to the Biology Department, fill out a permission to register form, and obtain signatures of both the faculty instructor, and the Biology Chairperson or Assistant-Chairperson. A copy of this form is then submitted to the student's academic advisor to secure final permission for the repeat. After a second attempt to pass a Biology course, it is at the discretion of the Biology Chairperson or Assistant-Chairperson whether the student may repeat the course.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate

designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request

deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

At the completion of the Biology BS / Secondary Education MEd program:

- Students will demonstrate developing mastery of the following Vision and Change core concepts and their related principals: evolution (the diversity of life-forms that have evolved over time through mutations, selection and genetic change; structure and function (the basic units of biological structures that define the functions of all living things); information flow, exchange and storage (the influence of genetics on the control of the growth and behavior of organisms); pathways and transformations of energy and matter (the ways in which chemical transformation pathways and the laws of thermodynamics govern the growth and change of biological systems); and systems (the ways in which living things are interconnected and interact with one another).
- Students will be able to retrieve, synthesize, and critically evaluate scientific literature.
- Students will be able to communicate (orally and in writing) results and interpretation of scientific research.
- Students will be able to design and implement experiments that test predictive hypotheses, analyze data, report results, and interpret the significance of these experiments.
- Students will learn to: critically evaluate current bodies of knowledge in their field; apply culturally responsive practices that engage diverse communities; demonstrate knowledge of ethics and social justice; hold high expectations and build on the assets of diverse students; use research and evidence-based practices to design and implement instruction to meet the individual needs of students; and apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students.

Biology/Bioinformatics (BS/MS)

Accelerated Bachelor's/Master's programs (ABM) provide significant cost savings to students interested in accelerating their path to an advanced degree. An ABM allows full-time students to complete both an undergraduate and graduate degree within just five years, equating to a lower overall cost than completing both programs separately. The **Bioinformatics ABM programs** include coursework in *Biology*, *Chemistry*, *Computer Science*, and *Statistics* as well as hands-on *research experience*. Students typically apply during the spring semester of their Junior year (*Applicants must be at least a Junior based on credit hours and >1 year from completing the BS degree*).

Two ABM programs are available:

- For students majoring in **Biology** BS - **Bioinformatics MS** (*BIOL BS/BIOI MS*) [**This page!**]
- For students majoring in **Bioinformatics BS/MS (***BIOI BS/BIOI MS*) [Please follow this link (p. 1010)!]

The one-year MS component of each program is offered as one of two tracks:

1. ***Thesis track*** (research-based) for students interested in academic research and advanced degree programs, such as a Ph.D.
2. ***Non-thesis track*** (internship-based) for students who aim to enter the workforce in an industrial setting, such as Biotech and Pharma

Related Programs

Major

- Bioinformatics (BS) (p. 283)

Master's

- Biology (MS) (p. 1563)

Combined

- Bioinformatics (BS/MS) (p. 1010)

Curriculum

An ABM allows full-time students to complete an undergraduate AND graduate degree within five years. This is possible because students take Graduate-level courses during their senior year, which earns them Graduate-level credit. Graduate-level credit hours taken during the undergraduate program and then applied toward graduate program requirements will be referred to as Shared Credits. Up to 15 Graduate-level credit hours can be taken during senior year, and a minimum of 15 Graduate-level credit hours will be taken during the MS year.

Rules for taking MS courses in senior year:

- A maximum of 15 Graduate-level credit hours can be taken during the undergraduate program.
- Included in these 15 credit hours may be up to three designated courses that may count as Shared Credits for the BS and the MS degree (formerly known as double dipping). Designated courses are listed at the bottom of this curriculum. Three courses for recommended Shared Credits are included in the course list.
- Graduate-level credit hours taken during senior year that are not Shared Credits will count toward the MS degree only.

The following courses are required for the Accelerated Biology BS/Bioinformatics MS degrees (BIOL-BS/BIOI-MS). Two tracks are offered: a thesis track and a non-thesis track. While most fundamental Bioinformatics MS courses are required for both tracks, some track-specific Graduate-level courses are listed under the respective thesis track and non-thesis track headers. Please note that prerequisites for Bioinformatics MS courses may not be required for the Biology BS degree. However, they must be completed for MS-required courses.

Suggested Sequence of Courses

The sequence of courses below is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor(s) for assistance with course selection.

These sample course schedules exemplify how students may complete their Bioinformatics major (BS), University Core Requirements, and MS in Bioinformatics within five years of study. The first is an example for the Non-thesis track, and the second for the thesis track:

1. This course is required to meet the GPA requirements for admission into the Bioinformatics ABM program.
2. Courses required of the M.S. degree, totaling 30 credit hours.
3. Courses which could be applied towards both the B.S. and M.S. degrees
4. Computer Science course, COMP 215 Object Oriented Programming with Mathematics, recommended.
5. Computer Science course, COMP 231 Data Structures & Algorithms for Informatics, recommended.

TRANSFERRING CREDIT

Transfer students seeking the BS in Biology degree must take a minimum of 20 credit hours in Biology courses at Loyola. No more than 18 credit hours from another institution may be applied to the BS in Biology degree program.

COURSE REPEAT RULE

Effective with the spring 2009 semester, students are allowed only TWO attempts to pass Biology courses with a C- or better grade. The two attempts includes withdrawals (W).

The procedure for securing approval for a repeat: Students must come to the Biology Department, fill out a permission to register form, and obtain signatures of both the faculty instructor, and the Biology Chairperson or Assistant-Chairperson. A copy of this form is then submitted to the student's academic advisor to secure final permission for the repeat. After a second attempt to pass a Biology course, it is at the discretion of the Biology Chairperson or Assistant-Chairperson whether the student may repeat the course.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been

awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

At the completion of the Biology BS / Bioinformatics MS program:

- Students will demonstrate developing mastery of the following Vision and Change core concepts and their related principals: evolution (the diversity of life-forms that have evolved over time through mutations, selection and genetic change; structure and function (the basic units of biological structures that define the functions of all living things); information flow, exchange and storage (the influence of genetics on the control of the growth and behavior of organisms); pathways and transformations of energy and matter (the ways in which chemical transformation pathways and the laws of thermodynamics govern the growth and change of biological systems); and systems (the ways in which living things are interconnected and interact with one another).
- Students will be able to retrieve, synthesize, and critically evaluate scientific literature.

- Students will be able to communicate (orally and in writing) results and interpretation of scientific research.
- Students will be able to design and implement experiments that test predictive hypotheses, analyze data, report results, and interpret the significance of these experiments.
- Students will gain fundamental skills that will help you be an inquisitive scientist: a solid foundation in biological, computational, chemical, and statistical concepts and theory; the capacity to employ statistical and computational methods to investigate and solve problems within the life sciences; and the ability to conduct bioinformatics study in industry and/or the research environment.

Business Administration (BBA/MBA)

The five-year BBA/MBA degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

Because Loyola is a member of the Jesuit network of 27 colleges and universities nationwide, our graduates can receive career services at Quinlan's Business Career Services (https://www.luc.edu/quinlan/studentlife/businesscareerservices/), as well as at career centers (https://www.ajcunet.edu/career-service-leaders/) at U.S. Jesuit colleges and universities.

Degree Requirements and Course Sequence

BBA/MBA students take a total of 12 courses for the MBA requirements.

Course Sequence

A typical course sequence for a Loyola BBA/MBA student is as follows:

- Apply by October 15 if graduating with your BBA in May. Apply by April 15 if graduating with your BBA in December.
- Students take 2-3 courses per quarter and complete their degree at the end of the following summer quarter (one year).

SECOND SEMESTER, LOYOLA SENIOR YEAR

- 2 MBA electives for the undergraduate major

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the

Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA):

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Business/Accountancy (BBA/MSA)

Loyola's BBA/MSA degree program is rigorous yet flexible. Interested and qualified students should apply to complete the master's portion of the program during the second semester of their junior year to take advantage of an MSA program 2-course reduction opportunity.

Students can apply to the MSA program at any time during their academic career. BBA/MSA students can complete the graduate coursework component in one year.

Electives [6]		
Two MBA non-accounting elective courses		6
Three electives (MBA or MSA)		9
Total Hours		**120**

1. Accounting majors with prior credit for COMM 101 Public Speaking & Critical Thinking must take ENGL 210 Business Writing to complete this requirement.
2. Students majoring in Economics or Finance should take MATH 130 Business Calculus (or MATH 131 Applied Calculus I or MATH 161 Calculus I). All other students take MATH 110 Business Precalculus (or MATH 131 Applied Calculus I).
3. One must be a Quinlan course or ENGL 210 Business Writing.
4. A study abroad experience will also satisfy this requirement.
5. Only one ACCT 399 Special Topics in Accounting class is allowed to count for this major.
6. Students work with the MSA program director in choosing electives.

Major Requirements

BBA Accounting Major Requirements: Undergraduate students who choose to complete the accounting major must complete 24 credit hours within the major (not including ACCT 201 Introductory Accounting I/ACCT 202 Introductory Accounting II).

BBA/MSA Requirements: BBA/MSA students must complete 12 additional courses (36 hours) beyond the BBA accounting major requirements. This includes six graduate accounting courses (six MSA-level), one graduate business ethics course, two MBA elective courses (non-accounting), and three general elective courses (MBA, MSA). Students choosing the BBA/MSA program may take two graduate accounting courses during their senior year that would count towards both the undergraduate and graduate accounting hours requirement.

International Business Major Group

Code	Title	Hours

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Semester I		
ACCT 201	Introductory Accounting I	3
	Hours	**3**
Semester II		
ACCT 202	Introductory Accounting II	3
	Hours	**3**
Year 2		
Semester I		
ACCT 303	Intermediate Accounting I	3
ACCT 328	Concepts in Taxation	3
	Hours	**6**
Semester II		
ACCT 304	Intermediate Accounting II	3
ACCT 311	Auditing & Internal Control Systems	3
	Hours	**6**
Year 3		
Semester I		
ACCT 317	Managerial Accounting	3
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
	Hours	**6**
Semester II		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
	Hours	**3**
Year 4		
Semester I		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
Also, consider graduate accounting class if BBA/MSA student.		
	Hours	**3**
Semester II		
Select one accounting elective of the following:		3
ACCT 306	Advanced Financial Accounting	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	
Also, consider graduate accounting class if BBA/MSA student.		
	Hours	**3**
Year Five		
Semester I		
Meet with MSA program director		
	Hours	**0**
	Total Hours	**33**

Note: If you are an undergraduate accounting major, some modification of the 12-course MSA program requirement is possible if you opt for taking up to two graduate accounting classes while in your senior year. You can also double count these courses towards the undergraduate accounting major requirement.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the

option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Deep and broad understanding of accounting and business
- Strategic cost management
- Financial management
- Auditing and business risk
- Legal and regulatory knowledge
- Ethics and values in accounting and business
- Decision-making and problem-solving skills
- International implications of accounting and business decisions

Business/Business Analytics (BBA/MS)

The five-year BBA/MS degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Learning Outcomes for the MS

At the completion of the program, graduates are expected to:

- Use data to drive strategic and tactical business decisions;
- Utilize sophisticated database, data warehousing, data mining, and data visualization methodologies and techniques to capture and apply data as a corporate asset;
- Demonstrate competence with various languages and tools, SQL, R, Tableau, and Python;
- Lead, supervise, and manage information systems projects of varying levels of complexity;
- Demonstrate effective communication skills with technical and non-technical individuals and groups;
- Show ability to effectively collaborate with and provide technical leadership to a variety of business units and organizations;
- Demonstrate a high level of technical aptitude in design, development, and use of information systems components;

- Integrate values and ethics into data analysis and information systems projects and solutions.

Business/Finance (BBA/MSF)

The five-year BBA/Master of Finance degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

Program Structure

Undergraduate and graduate courses for the MSF program are held on Loyola's Water Tower Campus, which is conveniently located off the Red Line in downtown Chicago, as well as online. Undergraduate courses are held on weekdays during the day. Graduate courses are held weekday evenings.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Our Master of Science in Finance program will provide you with specialized knowledge of:

- Financial securities
- Financial markets
- Risk metrics
- Investment criteria
- Capital budgeting techniques
- Hedging strategies
- General modeling and analytical skills
- Writing computer programs
- Working with databases
- Simulating outcomes
- Performing regression analysis
- Solving constrained optimization problems

Business/Human Resources (BBA/MSHR)

The five-year BBA/MS degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Learning Outcomes for the MSHR

- Understand the theoretical and practical demands of HR professional career and human relations requirements of being an effective manager; both of which involve attracting, engaging, and retaining talented employees.
- Develop and administer human resource strategies, programs and policies in the specific functional areas including talent

acquisition/staffing (including employment planning, recruitment, and selection), HR development and training, compensation and benefits, performance management, and employment relations.
- Understand how the practice of effective human resource management can positively impact the business and result in a competitive advantage to the organization.
- Utilize critical thinking skills which involve complex human behavior and motivation.
- Appreciate of the value and methods for sustaining employee diversity including a global perspective as it relates to human resources.
- Develop research, written, and oral communications skills by preparing in-depth case presentations and reports.
- Appreciate ethical perspectives and support sustainable outcomes with respect to all aspects of HR management.

Business/Marketing (BBA/MSM)

The five-year BBA/MS degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

Track Requirements

MSM students choose one of the following three tracks:

- Digital Marketing Analytics (STEM-designated)
- Integrated Marketing Communications
- Supply Chain (STEM-designated)

All three tracks have a 12-course curriculum with one prerequisite course.

Digital Marketing Analytics Track

The STEM-designated Digital Marketing Analytics track is devoted to engaging emerging capabilities built on the foundation of creative, digital, and analytical marketing skill sets.

Combining business goals with marketing decisions, this increasingly critical marketing function leverages consumer, retail, and category trend data to help marketers make informed marketing and business decisions through database models, improved sales forecasting, and data-driven tactics that enhance consumer loyalty, market share, and profitability.

PURSUING INTERNET OR DATABASE MARKETING

Students interested in careers in Internet or database marketing are encouraged to consider courses in e-commerce, data warehousing, or related areas from the extensive offerings in Loyola's highly respected masters' degree program in information systems analytics.

Supply Chain Track

An efficient supply chain allows for a marketing strategy to be successfully implemented. The STEM-designated Supply Chain track intertwines marketing and supply chain; giving you the skills to move products from supplier to customer while also managing service operations. You'll learn advanced techniques in inventory management, purchasing management, global logistics, and supply chain analytics.

SCMG 489	Supply Chain Analytics	
Total Hours		**15**

[1] Upon completion of this course and one additional supply chain track elective, the student will earn a Supply Chain Fundamentals Certificate.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the

graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Learning Outcomes for the MSM

As a Quinlan MSM student, you will:

- Develop the creative and strategic skills you need to lead and innovate in the diverse, digital, and dynamic field of marketing
- Learn marketing strategies that deliver brand growth and a competitive advantage in a time of sweeping economic, environmental, and social change
- Gain the technical business skills that are essential in today's global economy
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote positive social change
- You will also build a strong foundation in: Marketing finance; Strategic planning; Brand leadership; Digital and social content development; Leadership and ethics; Database analytics; Sustainable business leadership; and Global campaign development

Business/Supply Chain Management (BBA/MSSCM)

The five-year BBA/MS degree program provides focused and high-achieving undergraduate study. The program is designed for students intent upon building their resumes, skill sets, and business judgment. You'll have the chance to earn both undergraduate and graduate degrees in a compressed time frame.

Related Programs

Major

- Supply Chain Management (BBA) (p. 793)

Combined

- Business/Accountancy (BBA/MSA) (p. 1035)
- Business/Business Analytics (BBA/MS) (p. 1039)

Curriculum

All Quinlan School of Business students must complete the University Core Curriculum, Business Core Curriculum, and Undergraduate School of Business program requirements.

Code	Title	Hours
BBA Requirements		
COMM 103	Business & Professional Speaking	3
MATH 110	Business Precalculus [1]	3-4
or MATH 130	Business Calculus

Capstone Course		
SCMG 589	Supply Chain Management Consulting [6]	3
Total Hours		**91**

1 Students majoring in Economics or Finance should take MATH 130 Business Calculus (or MATH 131 Applied Calculus I or MATH 161 Calculus I). All other students take MATH 110 Business Precalculus (or MATH 131 Applied Calculus I).

2 One of which must be a Quinlan course or ENGL 210 Business Writing

3 A study abroad experience will also satisfy this requirement.

4 This course can be substituted with a program elective by the approval of the academic director and depending on the academic background. Typically, you need to have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the subject area within the last five years with a grade of B (or equivalent) or higher if the course is determined appropriate by their academic advisor.

5 INFS 795 may be taken to fulfill the Ethics requirement **OR** the Electives requirement, not both.

6 All required courses must be completed prior to or concurrently with SCMG 589.

International Business Major Group

Code	Title	Hours

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's

program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while

in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Learning Outcomes for the MSSCM

- Technical Knowledge: Graduates will be proficient in advanced knowledge of supply chain management and methodologies for optimization, transportation, inventory, purchasing management, supply chain analytics, and risk analysis. This comprehensive skill set will enable them to become effective leaders capable of optimizing operations and making informed decisions in a dynamic business environment.
- Critical Decision Making: Graduates will become adept at assessing risks, identifying opportunities for improvement, and devising innovative strategies to enhance supply chain efficiency and overall performance. Equipped with strong critical thinking skills, graduates will be well-prepared to tackle the complexities and uncertainties inherent in supply chain operations, contributing to the success and competitiveness of the organizations they serve.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally and in writing.

Chemistry (BS/MS)

The BS/MS program in Chemistry allows currently Loyola University Chicago undergraduate students to obtain both a Bachelor's and Master's degree in a compressed time period. This program structure is beneficial for those planning to take a gap year between undergraduate graduation, medical school, dental school, or other higher education. The research experience and courses with faculty you know and love allow you to build the references that will help you successfully transition to your next step. Your coursework keeps your chemical intuition sharp when preparing for admissions tests.

Related Programs

Combined

- Biochemistry (BS/MS) (p. 1006)

Curriculum

Students complete the bachelor's degree, but also take two graduate courses as undergraduates their senior year that count toward both their Bachelor's and Master's degree. By doing so, the additional graduate courses can be finished in a single year for this Accelerated Bachelor's/Master's program.

Chemistry is taking a modern, integrated approach to foundational coursework.

- Aligns with the latest American Chemical Society (ACS) and American Association of Medical Colleges (AAMC) standards & guidelines
- Themes: structure-activity relationships; culture and practice of science; energy; polymers, proteins, and macromolecules; sustainability; chemical synthesis, purification, characterization, and analysis.
- With such knowledge and skills, you should be prepared to further excel in upper-level coursework that specializes your work in the specific major you have chosen.

In addition to the required courses listed below,CHEM 300 Undergraduate Research is strongly recommended. Credit hours earned in CHEM 300 Undergraduate Research or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the BS degree requirement. Both CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are required for Departmental honors. The CHEM-BS degree is accredited by the American Chemical Society.

Code	Title	Hours

Required 12 credit hours in one of the following	
CHEM 429	Research in Organic Chemistry
CHEM 439	Research in Physical Chemistry
CHEM 449	Research in Inorganic Chemistry
CHEM 459	Research in Analytical Chemistry
CHEM 469	Research in Biochemistry
Select any four courses from any area of concentration: Organic, Inorganic, Physical, Analytical, Education. (12 credit hours) (p. 1054)	
CHEM 605	Master's Study
CHEM 595	Thesis Supervision
Total Hours	**95**

[1] Elective courses can be distributed or in a specialized area as determined by student. A list of all 400 level Chemistry courses can be found here (p. 1565).

- Core requirements (p. 1405)
- Please visit http://www.luc.edu/cas/academics_degreerequirements.shtml#college (https://www.luc.edu/cas/academics_degreerequirements.shtml/#college) to view other CAS requirements.
- For chemistry course descriptions and pre and co-requisite information, please visit here (p. 317).

All chemistry majors are assigned a chemistry faculty advisor. Please meet with your advisor on a regular basis, at least twice a year, for assistance with your chemistry schedule, research possibilities, graduate school information and more. If you do not know who your advisor is please call the chemistry department at 773/508-3100 or come to the department office located in Flanner Hall room 125.

MS Areas of Specialization

Code	Title	Hours
Analytical		
CHEM 455	Special Topics in Analytical Chemistry [1]	3
Biochemistry		
CHEM 465	Special Topics in Biochemistry [2]	3
CHEM 470	Biochemistry I	3
Education		
CHEM 480	Chemistry for Teachers I	3

Organic		
CHEM 423	Medicinal Chemistry	3
CHEM 424	Molecular Characterization Part A	3
CHEM 425	Special Topics in Organic Chemistry [4]	3
Physical		
CHEM 435	Special Topics in Physical Chemistry [5]	3

[1] Topics can include Archeometry and Adv Analytical Chemistry.

[2] Topics can include: Plant Biochemistry; The Chemistry of Enzymes; Biochemistry of Lipids; Adv Approaches in Biochemistry; Adv Enzyme Kinetics and Mechanisms; Molecular Immunology; Biochemistry of Renewable Energy; and Proteomics.

[3] Topics can include: Medicinal Inorganic Chemistry; Electron & X-Ray Methods; and Molecular Characterization Part B.

[4] Topics can include: Orgo Structure Determination; Strategy & Tactics of Org Chem; Func Dyes Biomed Imaging; Avd Orgo-Synthesis and Mech; Comp Organomet Chem; and Advanced Organic Synthesis.

[5] Topics can include: Exp Tech of Surface Science; Survey of Modern Physical Chem; Surface Chem and Analysis; Thermodynam/Protein Structures; and Computational Chemistry.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Students **not** placing in MATH 118 Precalculus II or higher cannot start the Chemistry sequence until MATH 117 Precalculus I is completed with a grade of C- or better. Such students are advised to enroll in first-year Chemistry courses in the summer sessions (after meeting the math requirement) in order to complete the major in four years.

[1] Capstone Course: CHEM 314 Instrumental Analysis for Junior or Senior year

CHEM 300 Undergraduate Research and CHEM 380 Chemistry Seminar are strongly recommended and required to receive Departmental Honors with graduation. Credit hours earned in CHEM 300 Undergraduate Research and/or CHEM 380 Chemistry Seminar do not count as elective hours satisfying the CHEM-BS degree requirement. CHEM 361 Principles of Biochemistry does not count towards the CHEM-BS degree.

Mathematics Preparedness for Chemistry

Students intending to register for a chemistry course will need a background in mathematics that is commensurate with the computational requirements of the chemistry course. Evidence of math preparedness is obtained from results of the ACT/SAT and of a Mathematics Placement Assessment (MPA) administered by the College in conjunction with the Department of Mathematics and Statistics. Students who are found to be mathematically under prepared are required to pass the appropriate course or sequence of courses in mathematics with a grade of "C-" or better before they register for a chemistry course. More information regarding placement by ACT/SAT and the MPA can be found at http://www.luc.edu/math/placement/.

Thesis Requirement

In addition to coursework, students in Thesis-based MS in Chemistry will write and defend a research thesis. Once students have completed coursework and are solely working on the thesis they will be enrolled in the appropriate study or supervision course to maintain good standing in the university.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program

and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- answer knowledge and comprehension type questions related to fundamental chemical concepts and demonstrate fluency with basic facts, terminology, and principles in the various subfields of chemistry.

- understand and describe the chemical basis of life, our natural resources and environments, and the universe.
- retrieve, research, synthesize, and critically evaluate scientific literature.
- design and implement experiments that test predictive hypotheses, gather relevant data, analyze results, and interpret the significance of these results.
- operate state of the art equipment used by chemists and biochemists.
- engage in scientific reasoning with claims based on supported evidence and communicate effectively results and interpretations of scientific research.

Communication Studies/ Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.

- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Identify some of the fundamental communication issues that our contemporary world face, and the ways in which the communication field approaches and interprets them.
- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures.
- Use communication skills and knowledge to produce messages, texts, campaigns, and projects.
- Understand the role that communication holds in advancing or deterring social justice.
- Apply communication knowledge and perform communication skills within different social contexts, such as interpersonal communication, group communication, intercultural communication, gender and communication, and traditional and new media platforms.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Communication Studies/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Communication Studies and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Communication Studies and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Combined

- Communication Studies/Environmental Science and Sustainability (BA/MS) (p. 1057)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
BA Requirements		
School of Communication Foundation Courses		
COMM 100	SOC Career Prep Seminar	1
COMM 175	Introduction to Communication	3
COMM 200	Digital Communication and Society	3
COMM 215	Ethics & Communication	3
or COMM 360	Digital Media Ethics	
Theory/Critical Analysis		
Select two of the following:		6
COMM 201	Media Theory and Criticism	
COMM 220	Introduction to Rhetoric	
COMM 227	Social Justice & Communication	
COMM 258	Game Studies	
COMM 268	Persuasion	
COMM 272	Intercultural Communication	
COMM 273	Interpersonal Communication	
COMM 277	Organizational Communication	
COMM 280	Media Technology & Society	
COMM 281	Communication, Language & Gender [2]	
COMM 379	Digital Sustainability	
Applied		
Select two of the following:		6
COMM 230	Argumentation & Advocacy	
COMM 231	Conflict Management and Communication	
COMM 234	Interviewing for Communication	
COMM 236	Persuasive Presentations	
COMM 237	Small Group Communication	
COMM 306	Environmental Advocacy	
COMM 307	Communication & Social Movements	
COMM 309	Designing Media for Social Change	
COMM 323	Remixing Culture	
Research Methods/Capstone		
Select one of the following:		3
COMM 361	New Media Criticism [1]	
COMM 365	Naturalistic Methods Communication Research [2]	
COMM 367	Rhetorical Criticism [1]	
COMM 368	Ethnographic Research Methods in Communication [2]	
Communication & Community		
Select one of the following:		3
COMM 204	Community as Story	
COMM 227	Social Justice & Communication	
COMM 237	Small Group Communication	
COMM 320	Public Service Communication [2]	
COMM 339	Video Documentary [2]	
COMM 381	Communication Practicum	
COMM 393	Communication Studies Internship [2]	
Electives		
Select any four (4) electives from the list of Approved Electives if not taken to satisfy requirements above. (p. 1063)		12
International Affairs MA Requirements		
Core		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives *(p. 1064)* [3]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**70**

[1] Writing Intensive (p. 800)
[2] Satisfies Engaged Learning (p. 1417) requirement.
[3] Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3
PLSC 431	Formulation US Foreign Policy	3
PLSC 432	Comparative Foreign Policy Analysis	3
PLSC 433	International Organization	3
PLSC 435	International Political Economics	3
PLSC 436	International Conflict	3
Methods Courses		
PLSC 401	Intro to Research Design & Method	3
PLSC 476	Political Analysis II	3
Psychology Department		
PSYC 460	Social Psychological Theory	3
PSYC 461	Attitude and Attitude Change	3
PSYC 474	Research in Group Dynamics	3
PSYC 484	Prejudice and Intergroup Relations	3

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

School of Law - Classes Offered at the John Felice Rome Center

Code	Title	Hours
PLAW 101	Comparative and Ethical Lawyering for the Rule of Law	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 175	Introduction to Communication	3
	Hours	**3**
Spring		
COMM 200	Digital Communication and Society	3
	Hours	**3**
Second Year		
Fall		
COMM 215 or COMM 360	Ethics & Communication or Digital Media Ethics	3
Applied Course		3
Theory Course		3
	Hours	**9**
Spring		
Applied Course		3
Theory Course		3
	Hours	**6**
Third Year		
Fall		
Communication & Community Course		3
Major Elective		3
COMM 100	SOC Career Prep Seminar	1
	Hours	**7**
Spring		
Major Elective		3
Major Elective		3
	Hours	**6**
Fourth Year		
Fall		
Major Elective		3
Two (2) International Affairs Courses [1]		6
	Hours	**9**
Spring		
Research Methods Course		3
Two (2) International Affairs Courses [1]		6
	Hours	**9**
Fifth Year		
Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**

Spring	
Three (3) International Affairs Courses [1]	9
Hours	**9**
Total Hours	**70**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress

through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Identify some of the fundamental communication issues that our contemporary world face, and the ways in which the communication field approaches and interprets them. [Communication Studies]
- Remember the situated, contextual and historical nature of communication processes and practices. [Communication Studies]
- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures. [Communication Studies]
- Assess, interpret and use communication research to apply and generate communication knowledge. [Communication Studies]
- Use communication skills and knowledge to produce messages, texts, campaigns, and projects. [Communication Studies]
- Formulate creative, culturally literate, and convincing oral, written, and multimodal arguments which are responsive to context and situation. [Communication Studies]
- See the crucial role that communication holds in advancing or deterring social justice. [Communication Studies]
- Apply communication knowledge and perform communication skills within different social contexts, such as interpersonal communication, group communication, intercultural communication, gender and communication, and traditional and new media platforms. [Communication Studies]

Computer Science (BS/MS)

The BS/MS programs in Information Technology, Software Engineering, and Computer Science are five-year programs that give academically successful Loyola undergraduates the opportunity to pursue the MS degree in Information Technology, Software Engineering, or Computer Science while completing their BS degree. The applicant can be pursuing any of the BS degrees offered by the Department of Computer Science, including the joint majors with Mathematics or Physics or the interdisciplinary Bioinformatics.

These programs reduce the total number of courses needed and the total time needed for the combined degrees. Specifically, students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses towards both their BS and MS degrees. Each double-counted course must be a 400-level course taken in the student's senior year in place of a corresponding 300-level course. This leaves a total of 21 credits (seven courses) to be taken after completion of the Bachelors' degree.

Students may not automatically enroll in the BS/MS program during Freshman admission. They must specifically apply to the Graduate School, generally in their Junior year by using The Graduate Application Form (https://gpem.luc.edu/apply/). See Application Requirements (https://academics.cs.luc.edu/undergraduate/

bsmsprograms.html#application-requirements) and Application Information (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-information) for more details.

- Software Engineering (BS/MS) (p. 1368)

Curriculum

The MS program requires 30 credits of graduate courses. This generally takes one and a half years to complete. BS/MS students must also take 30 credits of courses at the 400 level or greater. The main advantages come from the fact that some of the MS courses may be double-counted, applying to the BS also, and there can be a shift in some of the required MS courses based on what students took in the BS portion. In particular students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses for both their BS and MS degrees. Each must be a 400 level course taken in the student's senior year *in place* of a 300 level major course. Also, a student wishing to take 123 or more credits while an undergraduate, can have 3 of the extra credits be for a fourth 400 level COMP course, and count that toward the MS if the extra course is needed for *no* undergraduate requirement, from the university, college, core, major or minor. Hence a BS/MS student with 120 credits and 9 400-level COMP credits counted for the BS is required to take only 21 credits (instead of 30 credits) of additional 400-level courses. If a student takes a further 3-credit 400 level COMP course beyond the 120 credits needed for the BS, then only 18 further credits are needed. In either case, students can finish the program in five years.

Code	Title	Hours
Major Requirements		
MATH 131	Applied Calculus I [1]	3 or 4
or MATH 161	Calculus I	
MATH 132	Applied Calculus II [1]	3 or 4
or MATH 162	Calculus II

COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
COMP 488	Computer Science Topics	
Total Hours		**15**

Additional Rules of the BS/MS Program

1. All students need to take COMP 271 Data Structures I as part of their undergraduate major.
2. Students pursuing an MS in Software Engineering or Computer Science must take COMP 313 Object-Oriented Design by their senior year.
3. Students may take at most 6 credits total of internship at the undergraduate and graduate level, COMP 391 Internship in Computer Science plus COMP 499 Internship.
4. A student with credit for a 300 level COMP course that was taught in a combined class with a 400 level course may not take the 400 level course later for separate credit without permission from the Graduate Program Director. In particular for students with credit for COMP 317 Social, Legal, and Ethical Issues in Computing, the MS requirement for COMP 417 Social and Ethical Issues in Computing is waived, to be replaced by 3 MS elective credits. Similarly, in programs requiring COMP 413 Intermediate Object-Oriented Development, COMP 313 Object-Oriented Design will satisfy the requirement, but still, the course will need to be replaced by 3 MS elective credits.
5. In MS programs with restricted electives lists with two or more courses required from a larger explicit list, one of the courses may be waived if the corresponding 300 level undergraduate course was successfully completed at Loyola. The course must still be replaced by a 3-credit MS program elective.
6. All further individual MS program requirements must be met with the inclusion of the allowed 400 level courses taken as an undergraduate.

Requirements for Completion of the BS/MS Program

After admission to the BS/MS program, a student may request to be registered in their senior year for up to four 400 level COMP courses, with three of them replacing undergraduate major courses, and a fourth *if* the student will graduate with at least 123 credits and not need the fourth course as a part of *any* undergraduate requirement. Students generally take the remainder of their 30 credits of 400-level MS classes during their fifth year. This schedule can be modified for students with AP or transfer credit who desire to finish the combined program in less than five years. Students in the program are expected to consult regularly with the Graduate Program Director to ensure that they are on track for completion of both the BS and MS degrees. The following are required to complete a BS/MS degree program:

- Successful completion of one of the BS degrees in the Department of Computer Science or Bioinformatics or a joint major with Mathematics or Physics
- The 400-level graduate courses, excluding those counted while an undergraduate, completed with a GPA of 3.0 or higher

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
COMP 150	Introduction to Computing [1]	3

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been

awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will gain a broad background in the practical and theoretical foundations of Computer Science.
- Students in a specific concentration will gain mastery in that area, which students who pursue the thesis option will gain deep expertise in their research area.

Criminal Justice and Criminology (BS/MA)

BS/MA Five Year Program

The BS/MA program enables high achieving undergraduate majors to begin fulfilling requirements for a master's degree while completing the bachelor's degree. The program is designed so that students may

complete their MA degree in one year after graduating with their BS degree rather than the traditional two years of study. BS/MA students will have more challenging courses during their senior year of study and will have broader career opportunities after completing the MA degree. Successful students have obtained desired careers, gained admission to law schools, or gained admission to PhD programs.

Loyola undergraduates with an overall GPA of 3.5 may apply for our combined BS/MA program in their junior year. Fall admitted BS/MA students will take 4 graduate (400 level) classes in their senior year that will count toward both their BS degree and their MA degree. Spring admitted BS/MA students will take 2 graduate (400 level) classes in their senior year that will count toward both degrees. Students should save their CJC electives so that graduate-level CJC courses can count as CJC electives in the major. Therefore, up to 15- of the 30-credit hours needed to successfully complete the MA degree will be completed during the student's senior year. After graduating with their BS degree (during year five), students will take the remaining 6 courses as a full-time graduate student.

For additional information on this program, please contact Dr. Maribeth Rezey, Graduate Program Director, at mrezey@luc.edu.

Related Programs

Major

- Criminal Justice and Criminology (BS) (p. 375)

Master's

- Criminal Justice and Criminology (MA) (p. 1594)

Minor

- Criminal Justice and Criminology Minor (p. 376)

CURRICULUM

Once enrolled in the BS/MA program, admitted students can enroll in up to 15-credit hours during their senior year. The Master of Arts in Criminology and Criminal Justice requires 30-credit hours of coursework, consisting of 5 required courses (including a culminating experience) and 5 elective courses. In order to demonstrate cumulative proficiency, students are required to pass either Applied Research in Criminal Justice & Criminology or complete a thesis. By default, all students are placed in the non-thesis option unless they select and are approved for the thesis option.

Code	Title	Hours
BS Required Courses		
CJC 101	Criminal Justice in a Global Context	3
CJC 201	Theories of Criminal Behavior	3

CJC 414	General Special Topics	
Total Hours		**51**

1. Students double-majoring in Sociology/CJC or Psychology/CJC may also fulfill the research methods requirement in Sociology or Psychology; in such cases, students then will need to complete seven (7) CJC elective courses.
2. A list of available undergraduate courses can be found in our Undergraduate Course Descriptions (p. 2504).
3. If students take CJC 206 Statistics, then they only need to complete five (5) CJC elective courses; however, if students fulfill the statistics requirement in another department, then they will need to complete six (6) CJC elective courses.
4. With the approval of the department, qualified students may also complete CJC 391 Capstone Experience Research
5. Student must earn a grade of B or better in order to graduate (a B- or below will not fulfill this requirement), and class must be repeated if grade below a B is earned.
6. In consultation with the Graduate Program Director, students may select graduate-level electives among those offered within the Department of Criminal Justice and Criminology as well as from other programs such as Social Work, Psychology, Women's Studies and Gender Studies, Public Policy, or Sociology.
7. Students choosing the thesis track will complete a research thesis and take CJC 501 Thesis Research, while students who choose a non-thesis option will complete a major research paper and take CJC 408 Applied Research in Criminal Justice & Criminology.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Provide students with a broad liberal arts background, with stimulating and challenging courses pertinent to the study of criminal justice and criminology.
- Give students the awareness and appreciation of group similarities and differences, especially those relating to culture and race, and to ethics, norms, and values.
- Help students develop theoretical and practical knowledge of the structures, processes, and functions of the criminal justice system, always stressing its links and interdependence with other institutions in the social system.
- Provide students with an understanding of criminological theory and how these apply to criminal justice policy and practice.
- Offer students the opportunity to test their interests and abilities in criminal justice fields through controlled involvement in the form of agency visits, field experience, and research.
- Help prepare students for professional service in a wide range of careers in criminal justice.
- Enable talented students to enter confidently into graduate or professional school programs in criminal justice, law, social work, or any of the social sciences.

Criminal Justice and Criminology/ International Affairs (BS/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BS/MA in Criminal Justice and Criminology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BS/MA in Criminal Justice and Criminology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Curriculum

For the BS, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
Required BS Courses		
CJC 101	Criminal Justice in a Global Context	3
CJC 201	Theories of Criminal Behavior	3
CJC 205	Research Methods [1]	3
Select two of the following:		6

CJC 202	Criminal Courts	
CJC 203	Policing	
CJC 204	Corrections	
CJC 323	Criminal Procedure	
Elective Courses [2]		
Select six (6) elective courses from CJC 200- or 300- level courses. [3]		18
CJC 206	Statistics (or a comparable course in sociology, psychology, or statistics.) [4]	3
Capstone		
CJC 399	Senior Capstone [5]	3
or CJC 390	Capstone Experience Internship	
Requires MA Courses		
CORE		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1076) [2]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**63**

1 Students also may fulfill the research methods requirement in Sociology or Psychology; in such cases, students then will need to complete seven (7) CJC elective courses.

2 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

3 A list of available undergraduate courses can be found in our Undergraduate Course Descriptions (p. 2504).

4 If students take CJC 206 Statistics, then they only need to complete five (5) CJC elective courses; however, if students fulfill the statistics requirement in another department, then they will need to complete six (6) CJC elective courses.

5 With the approval of the department, qualified students may also complete CJC 391 Capstone Experience Research.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

Students can begin the Criminal Justice and Criminology (BS) degree at any point in their undergraduate studies, in consultation with their advisor. While there is no set sequence of classes, students are encouraged to take CJC 101 Criminal Justice in a Global Context early on. Once students have declared the major, they are encouraged to contact First and Second Year Advising within the College of Arts and Sciences or the Criminal Justice and Criminology Department's Undergraduate Program Director for further guidance on how best to progress with their studies.

The following grid is a suggested sequence of courses for students who declare a CJC major as freshmen.

In order to provide optimal flexibility in the program, there is no required course sequence for the International Affairs (MA). However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Course	Title	Hours
Freshman		
CJC 101	Criminal Justice in a Global Context	3

Select two International Affairs 400-level courses.		6
	Hours	**12**
Year 5		
Complete remainder of International Affairs MA requirements.		24
	Hours	**24**
	Total Hours	**63**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- A foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- Knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- An interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- Enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- Strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis.

Data Science (BS/MS)

The Accelerated Bachelor's Master's program in Data Science allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate Data Science Programs. They are able to finish the program in only one additional year by double counting 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

	Total Hours	**80**

Thesis Track Suggested Schedule of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
DSCI 101	Fundamentals of Modern Data Science with R	3
MATH 161	Calculus I	4
	Hours	**7**
Spring		
MATH 162	Calculus II	4
COMP 141	Introduction to Computing Tools and Techniques	3
	Hours	**7**
Year 2		
Fall		
MATH 212	Linear Algebra	3
MATH 215	Object-Oriented Programming with Mathematics	3
	Hours	**6**

Spring		
COMP 231	Data Structures & Algorithms for Informatics	3
STAT 203	Introduction to Probability & Statistics	3
	Hours	**6**
Year 3		
Fall		
STAT 308	Applied Regression Analysis	3
COMP 353	Database Programming	3
	Hours	**6**
Spring		
COMP 300-Level Course		3
STAT 300-Level Course		3
COMP 317	Social, Legal, and Ethical Issues in Computing	3
	Hours	**9**
Year 4		
Fall		
COMP 479 or STAT 438	Machine Learning or Introduction to Predictive Analytics	3
STAT 300-Level Course		3
COMP 300-Level Course		3
	Hours	**9**
Spring		
COMP 458	Big Data Analytics	3
STAT 410	Categorical Data Analysis	3
STAT 370	Data Science Consulting	3
	Hours	**9**
Year 5		
Fall		
DSCI 401	Introduction to Data Science	4
DSCI 494	Data Science Research Design	2
STAT 400-Level Course		3
COMP 400-Level Course	Substitutes COMP 453 as COMP 353 was taken in Y3	3
	Hours	**12**
Spring		
DSCI 499	Data Science Research	8
DSCI 595	Thesis Supervision	1
	Hours	**9**
	Total Hours	**80**

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1. If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2. Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3. In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4. For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- The ability to manage large data sets in preparation for data science analysis.
- A working knowledge of statistical techniques and computer algorithms, and the ability to apply these methods to a wide array of real-world problems.
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible and ethical research.
- The ability to program in both the R and Python programming languages.
- Non-thesis track: Students will be required to complete areal-world data science project prior to graduating from this program, either through our consulting course, an internship, an independent study, or other appropriate project
- Thesis track: Students will be required to undertake a research project culminating in a thesis

Data Science/Applied Statistics (BS/MS)

The Accelerated Bachelor's Master's program allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate programs. They are able to finish the program in only one additional year by double counting up to 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- The ability to manage large data sets in preparation for data science analysis [Data Science]
- A working knowledge of traditional statistical techniques and the ability to apply these methods to a wide array of real-world problems [Data Science]
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible research [Data Science]
- The ability to program in both the R and Python programming languages [Data Science]
- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model. [Applied Statistics]
- Received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference. [Applied Statistics]
- Worked with data from application fields such as public/global health, medical, industrial and environmental research. [Applied Statistics]
- Received training to ethically apply statistical training in the real world. [Applied Statistics]
- Obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class. [Applied Statistics]
- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [Applied Statistics]

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- The ability to manage large data sets in preparation for data science analysis [Data Science]
- A working knowledge of traditional statistical techniques and the ability to apply these methods to a wide array of real-world problems [Data Science]
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible research [Data Science]
- The ability to program in both the R and Python programming languages [Data Science]
- The ability to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation [Mathematics]
- A working knowledge of applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines [Mathematics]
- Training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries [Mathematics]
- Training on how to act responsibly and ethically within the discipline [Mathematics]

Elementary Education/International Affairs (BSEd/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BSEd/MA in Elementary Education and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSEd/MA in Elementary Education and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Minor

- Education Policy Studies Minor (p. 892)

Curriculum

For the BSEd, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

International Affairs MA Requirements		
Core		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1090) [1]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**98**

[1] Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

All of Loyola's Bachelor of Science in Education (BSEd) degrees use the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as its foundation. It's an approach that will help you stand out when you're searching for your first job.

The TLLSC curriculum focuses on hands-on learning. Your studies will be built around four Cornerstones—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

As you learn and grow, you'll progress through the three Phases (https://www.luc.edu/education/academics/areasofstudy/teachinglearningandleadingwithschoolsandcommunities/bsedprogramphases/) of the program- Exploration, Concentration, and Specialization. These phases will guide you through a comprehensive experience that will prepare you to make a difference with learners in diverse settings.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
TLSC 300A	Professional Learning Communities	0
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
UCWR 110	Writing Responsibly	3
MATH 108	Real World Modeling with Mathematics	3
UNIV 101	First Year Seminar	1
CORE	Literary Knowledge & Experience Tier I	3
Submit all required documentation and background check prior to program entry		
	Hours	**14**

TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
ELPS 302	Philosophy of Education	3
CORE	Theological and Religious Studies Tier II	3
Two (2) International Affairs Electives [1]		6
Apply for May Graduation in LOCUS by October 1		
Apply for Educational Teacher Performance Assessment (edTPA) through Pearson Inc.		
	Hours	**18**
Spring		
TLSC 300B	Professional Learning Communities	1
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Must have passed Elementary Content Area Test prior to Sequence 8 student teaching		
Must pass edTPA		
Two (2) International Affairs Courses [1]		6
	Hours	**19**
Year Five		
Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
Spring		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**147**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning. [Elementary Education]

English (BA/MA)

The English Department offers a five-year combined BA/MA degree. Graduates of this program will be well prepared to pursue a PhD in English, to apply to a professional school, or to seek a teaching position at the post-secondary level. The combined degree will allow promising and talented undergraduates to move quickly through the MA degree.

The program offers our best undergraduates access to the considerable strengths of our strong and highly-regarded graduate programs. It will give these English majors a significant opportunity to test their skills and develop professional insights, leading to stronger applications when it is time for them to be considered by PhD programs elsewhere or for post-secondary teaching positions, as well as in industries where an advanced degree in English is sought (marketing, communications, editing, and professional writing for example). While completing the equivalent of the requirements for the BA in English, students in the five- year program will receive significantly more training in research skills and methods than their counterparts who complete only the BA. They may also fulfill the requirement for the undergraduate capstone course (ENGL 390 Advanced Seminar) with a graduate seminar.

Students in the BA/MA program have two electives at the graduate level, which may be used to take courses in another department or an interdisciplinary program that offers a graduate degree, such as History, Philosophy, or Women's Studies and Gender Studies. The new MA in Digital Humanities also provides opportunities for students in the BA/MA program to take courses in textual scholarship.

Curriculum

For the Bachelors of Arts, twelve courses (36 hours) are required, nine of which (27 hours) must be at the 300-level. Up to three elective courses (9 hours) may be drawn from UCLR-E 100 and advanced 200-level (ENGL 270 and above) courses. At least one course must be among those designated by the department as "multicultural." The Advanced Seminar (ENGL 390) is considered the capstone of the major.

The Master of Arts in English requires 30 semester hours of coursework and a written examination. The program is designed so that a full-time student can complete these requirements in a year and a half of study. Students start taking their Masters coursework in the senior year. Three to four 400-level courses may be used to count toward both Bachelors and Masters requirements.

Required Courses

Code	Title	Hours
Bachelors of Arts Requirements		
Literary Theory		
ENGL 354	Contemporary Critical Theory	3
or ENGL 355	Studies in Literary Criticism	
Shakespeare		
Select one of the following: [1]		3
ENGL 326	Shakespeare: Selected Major Plays [2]	
ENGL 327	Studies in Shakespeare [2]	
Capstone: Advanced Seminar		
ENGL 390	Advanced Seminar [3]	3
English Literature Before 1900 *(p. 1096) (See list)*		
Select at least one course prior to 1700 [4]		3
Select at least one course from 1700 to 1900		3
One additional course chosen from either of the previous categories		3
English Literature Since 1900 *(p. 1096) (See list)*		*3*
Elective Courses *(p.)*		
Complete five ENGL elective courses. Three or four 400-level courses can be used to fulfill elective requirements for the Bachelors.		15
Master of Arts Requirements		
ENGL 400	Intro to Graduate Study	3
Select Three (3) Courses in Literary Studies Courses *(p. 1096)*		*9*
At least one course must be in literature before 1800, and one in literature after 1800.		
Select One Course in Critical Theory		*3*
ENGL 406	History of the English Language	
ENGL 410	Contemporary Literary Criticism	
ENGL 419	Contemporary Issues in Literature and Culture	
ENGL 420	Topics in Critical Theory	
ENGL 422	Postcolonial Theory	
ENGL 423	Marxist Literary Theory	
ENGL 426	Feminist Theory and Criticism	
ENGL 427	Dramatic Theory	

Select One Course in Textual Studies or Digital Humanities		*3*
ENGL 412	History of the Book to 1800	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Select Four 400-Level ENGL Elective Courses [1]		*12*
Total Hours		**57**

[1] Course descriptions for 400 level English courses can be found here (p. 1600). For students interested in taking an elective outside of the English Department, please contact the Graduate Program Director.

English Literature Before 1900

Code	Title	Hours

MA Qualifying Examination

All students will take a four-hour written examination at the end of their course work. The exam is given during the last week of second summer term in August, and the first day of exam week in December and May. The exam will be prepared and graded by a four-member MA examining committee using a standard set of questions, each testing a particular skill. Faculty teaching graduate seminars in any one year will submit a short list of required readings (literary, critical, and theoretical) from their courses. From that list, the examining committee will form a master list of major texts to be used by students in answering the exam questions. The short lists will be shared with students prior to the exam, the master list will not.

The exam will be graded as High Pass, Pass, Low Pass or Fail. The minimum requirements for the MA degree will be a Low Pass on the exam and a B average in all course work. MA students who fail the exam may retake it once, at the conclusion of the following semester. PhD students who fail the exam may also retake it once, but only to complete the MA degree: they will not be allowed to continue in the program.

The MA exam serves as both a requirement for the master's degree and a qualifying exam for students intending to proceed toward the PhD. The Committee on Graduate Programs will consider the performance of such students in all facets of the MA program; however, the MA exam is designed as a key indicator of students' ability to continue work toward the PhD.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most

capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Graduates of the program will be able to:

- perform close readings of literature and other kinds of texts, paying careful attention to textual detail. [BA]
- demonstrate an understanding of human diversity as it is represented in literature and other kinds of texts. [BA]
- communicate their ideas clearly, in writing that employs appropriate word choice, diction, structure, and mechanics. [BA]
- create focused and well-supported arguments and analyses. [BA]
- where applicable, demonstrate their understanding of literary and cultural theories by incorporating them into their work in precise and effective ways. [BA]
- where applicable, demonstrate their ability to employ in their own creative works their understanding of the conventions and techniques of particular literary genres. [BA]
- where applicable, demonstrate their knowledge of textual genres, histories, movements, traditions, and innovations. [BA]
- demonstrate an understanding of how texts reflect and affect societies and cultures. [BA]
- Write effectively about a broad range of texts in English using effective compositional and rhetorical techniques. [MA]
- Assess and intervene in existing scholarly discourses in the field as a literary critic. [MA]
- Distinguish and interpret diverse experiences across various social formations (race, class, gender, sexuality, ability, etc.) as registered in literary works. [MA]
- Evaluate and apply the principles of a range of critical and textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works. [MA]

Environmental Economics & Sustainability: Governance/ Environmental Science and Sustainability (BA/MS)

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain the interconnections between human development, the economy, and the environment. [BA]
- Understand how economic theory and analysis can be used to evaluate social and economic outcomes. [BA]
- Describe how policy affects business and economic activity to achieve human development and environmental sustainability goals. [BA]
- Analyze how policy interventions can shift an economy to achieve a balance of ecological and socioeconomic objectives. [BA]
- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals. [MS]
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature. [MS]
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public. [MS]
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis. [MS]

Environmental Economics & Sustainability: Management/ Environmental Science and Sustainability (BA/MS)

The BA Environmental Economics & Sustainability - Management and the MS Environmental Science & Sustainability (MSESS) allows undergraduate students the opportunity to continue their graduate education while remaining within SES and Loyola.

Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain the interconnection between human development, the economy, and the environment [BA]
- Understand how economic theory and analysis can be used to evaluate social and economic outcomes [BA]
- Analyze how businesses can integrate environmental and social considerations into decision-making that aligns financial with environmental sustainability [BA]
- Describe the impacts of business and industry on social outcomes, the economy, and environmental sustainability [BA]
- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals [MA]
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature [MA]
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public [MA]
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis [MA]

Environmental Policy/Digital Media and Storytelling (BA/MC)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

[2] In place of Environmental Elective.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the

Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Describe the need for government intervention and the policy process. [BA]
- Explain the major US federal environmental laws and international agreements. [BA]
- Recognize the role of state and local innovation in environmental policy. [BA]
- Engage in environmental policy advocacy, development, and implementation. [BA]
- Evaluate the effectiveness of the policy toward environmental sustainability. [BA]
- Learn how to use state-of-the-art equipment in our Convergence Studio and technology labs. [MC]
- Learn audience engagement and analytics to understand user activities and to drive improvements in distribution performance. [MC]
- Students will learn digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content. [MC]
- Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public. [MC]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Policy/Environmental Science and Sustainability (BA/MS)

Well-designed public policies are critical in maintaining and restoring a healthy environment. Public policies influence air and water quality, land use, biodiversity, and public health and shape crucial efforts to fight climate change. Our environmental policy program prepares students to craft and implement public policies that promote ecological conservation, environmental justice, and innovation toward a green economy.

With our Accelerated Bachelor's/Master's Program, Loyola SES students can boost their professional credentials and save time and money by completing an undergraduate degree along with a master of science in environmental science and sustainability degree in as little as five years. The economic and academic benefits are substantial.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Suggested Sequence of Courses - Research Track

Course	Title	Hours
Year One		
Fall		
ENVS 137	Foundations of Environmental Science I	3
PLSC 101	American Politics	3
	Hours	**6**
Spring		
ENVS 203	Environmental Statistics	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
Justice & Ethics Choice		3
	Hours	**10**
Year Two		
Fall

	Total Hours	**78**

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Describe the need for government intervention and the policy process. [BA]
- Explain the major US federal environmental laws and international agreements. [BA]
- Recognize the role of state and local innovation in environmental policy. [BA]
- Engage in environmental policy advocacy, development, and implementation. [BA]
- Evaluate the effectiveness of the policy toward environmental sustainability. [BA]
- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals. [MS]
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature. [MS]
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public. [MS]
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis. [MS]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Policy/Global Strategic Communication (BA/MS)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

Related Programs

Combined

- Environmental Science/Global Strategic Communication (BS/MS) (p. 1146)
- Environmental Studies/Global Strategic Communication (BA/MS) (p. 1182)

Curriculum

Environmental Policy students complete coursework spanning a variety of disciplines pertinent to the understanding of environmental issues.

Code	Title	Hours
BA Requirements		
Core Curriculum		
ENVS 137	Foundations of Environmental Science I	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
ENVS 280	Principles of Ecology	3

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress

through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Describe the need for government intervention and the policy process. [BA]
- Explain the major US federal environmental laws and international agreements. [BA]
- Recognize the role of state and local innovation in environmental policy. [BA]
- Engage in environmental policy advocacy, development, and implementation. [BA]
- Evaluate the effectiveness of the policy toward environmental sustainability. [BA]
- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts. [MS]
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media. [MS]
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices. [MS]
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities. [MS]
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community. [MS]
- Demonstrate the competencies to work as a professional in advertising or public relations. [MS]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Policy/Public Policy (BA/MPP)

From ecological restoration to water conservation, from climate change adaptation to storm water management, the challenge is clear. The need for individuals with literacy and skills relevant to both environmental science and public policy has never been greater.

The SES dual degree programs with the Master of Public Policy (MPP) prepare graduates to meet these challenges effectively in careers in government, non-profit organizations, and businesses.

Combined

- Environmental Science/Public Policy (BS/MPP) (p. 1159)
- Environmental Studies/Public Policy (BA/MPP) (p. 1187)

Curriculum

These Accelerated Bachelor's/Master's programs begin with a broad, interdisciplinary undergraduate curriculum drawing on courses in the natural sciences, social sciences, humanities, and business.

Undergraduate service-learning, internships, research, and study abroad provide students with rich, experiential learning opportunities. Students then develop more in-depth understanding of policy issues and the professional skills necessary to influence policy outcomes as part of their graduate studies.

Environmental Policy students complete coursework spanning a variety of disciplines pertinent to the understanding of environmental issues.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such

that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Describe the need for government intervention and the policy process. [BA]
- Explain the major US federal environmental laws and international agreements. [BA]
- Recognize the role of state and local innovation in environmental policy. [BA]
- Engage in environmental policy advocacy, development, and implementation. [BA]
- Evaluate the effectiveness of the policy toward environmental sustainability. [BA]
- Design policy interventions and apply criteria to assess the best option in each specific case. [MPP]
- Understand a government budget and evaluate it from different stakeholder positions. [MPP]
- Understand the political process at the federal, state and local government levels. [MPP]
- Develop political messaging to advocate for policies and to build a political coalition of support for a program. [MPP]
- Apply appropriate statistical procedures used in public policy research and practice. [MPP]
- Design, conduct and critique program evaluations. [MPP]
- Experience working in the public policy arena in government agency, non-profit, research, or private sector organization. [MPP]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/ Business (BS/MBA)

Solving the world's environmental crises depends on how well tomorrow's business leaders adopt strategies that allow for sustainability to be a leading driver in how they do business.

Loyola's five-year Accelerated Bachelor's/Master's program in environmental science or environmental studies and business administration introduces students to the fundamental issues involved in global, environmental and ethical business practices.

The academic content and direct, hands-on experiences within the bachelors degrees will provide a base from which to develop skills and knowledge in the MBA program. The program equips graduates to promote and implement sustainable business practices.

Related Programs

Major

- Environmental Economics Sustainability: Management (BA) (p. 931)

Combined

- Advertising Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
- Environmental Studies/Business (BA/MBA) (p. 1166)

Curriculum

Students interested in pursuing one of the Accelerated Bachelor's/Master's programs will complete all normal requirements for a BS in Environmental Science.

Students may take two graduate courses that count toward the MBA during their senior year in lieu of environmental science/studies electives. Students complete the degree requirements for a BS in environmental science after four years and complete the MBA at the end of the fifth year.

Accelerated Bachelor's/Master's Program Tip

In addition to completing the normal requirements for the BS environmental science or BA environmental studies, students planning to enter the MBA program should note the following:

- A GPA of 3.20 or higher is required for admission to this program.
- The Quinlan School of Business Graduate Program uses a quarter system rather than a semester system. Admission start terms are Fall and Spring quarters only.

First-year / Sophomore: Arrange undergraduate course scheduling to preserve six hours of free electives until senior year.

During their first two years, students should take ECON 201 Principles of Microeconomics and ECON 202 Principles of Macroeconomics, which will satisfy the social science requirement of the Core Curriculum and allow the student to waive out of ECON 420 Managerial Economics.

Junior year: attend MBA Accelerated Bachelor / Masters (ABM) info sessions.

Senior year: Apply to the program by October 15 in are completing your Bachelors degree in May. Apply to the program by April 15 if you are completing your Bachelors degree in December. After admission to the MBA, meet with MBA advisor for planning your graduate business course schedule.

Take ACCT 400 Financial Accounting for Business Decisions and MARK 460 Marketing Management, which will count as free electives toward the BS or BA degree. Complete all requirements for the BS or BA.

Fifth year: During the fifth year, students who have followed the above directions will have a total of 14 (or less) MBA courses remaining. These courses can be completed full-time at the rate of three or four per quarter (including the summer quarter). Students also have the option to complete the MBA program on a part-time basis (usually one or two courses per quarter).

Students should contact the Quinlan School of Business for specific MBA requirements and an academic calendar.

Suggested Sequence of Courses

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1

	Hours	**12**
	Total Hours	**115**

[1] ECON 420 Managerial Economics can be waived with grade of B higher in ECON 201 and ECON 202

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses

that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1. If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2. Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3. In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4. For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems. [BS]
- Examine the causes and consequences of environmental change at local to global scales. [BS]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS]
- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/Digital Media and Storytelling (BS/MC)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

Related Programs

Combined

- Environmental Policy/Digital Media and Storytelling (BA/MC) (p. 1108)
- Environmental Studies/Digital Media and Storytelling (BA/MC) (p. 1171)

Curriculum

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

The BS in Environmental Science can be taken without a concentration [66 credit hours] or with a chosen concentration in Conservation and Restoration Ecology [68 credit hours]; Environmental Health [69 credit hours]; or Food Systems and Sustainable Agriculture [66 credit hours].

Students can take 12 credits worth of 400-level classes in their senior year.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1. If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2. Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3. In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4. For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems. [BS - no concentration]
- Examine the causes and consequences of environmental change at local to global scales. [BS - no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS - no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS - no concentration]
- Learn how to use state-of-the-art equipment in our Convergence Studio and technology labs. [MC]
- Learn audience engagement and analytics to understand user activities and to drive improvements in distribution performance. Students will learn digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content. [MC]
- Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public. [MC]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and all concentrations]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and all concentrations]

- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [Conservation and Restoration Ecology concentration]
- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [Conservation and Restoration Ecology concentration]
- Examine the sources of environmental degradation and their impacts on health. [Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [Environmental Health concentration]
- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [Environmental Health concentration]
- Explain the components of food systems and their complex interactions across spatial and temporal scales. [Food Systems and Sustainable Agriculture concentration]
- Articulate the physical, psychological, cultural, and spiritual significance of food to individual and community wellbeing. [Food Systems and Sustainable Agriculture concentration]
- Using multiple methods of analysis, evaluate the environmental and equity impacts of different food system practices to reveal points of leverage for social-ecological change. [Food Systems and Sustainable Agriculture concentration]
- Engage knowledge, skills, and values through experiences that advance sustainability, resilience, and justice within food systems. [Food Systems and Sustainable Agriculture concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/ Environmental Science and Sustainability (BS/MS)

Solving the world's most pressing environmental problems requires understanding the scientific aspects of sustainability. Our program in environmental science prepares students to develop innovative solutions to challenges such as climate change, air and water pollution, and biodiversity loss.

With our Accelerated Bachelor's/Master's Program, Loyola SES students can boost their professional credentials and save time and money by completing an undergraduate degree along with a master of science in environmental science and sustainability degree in as little as five years. The economic and academic benefits are substantial.

Related Programs

Major

- Environmental Science (BS) (p. 937)

Minor

- Environmental Science Minor (p. 944)

Combined

- Environmental Science/Business (BS/MBA) (p. 1127)
- Environmental Science/Digital Media and Storytelling (BS/MC) (p. 1133)

Curriculum

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

The BS in Environmental Science can be taken without a concentration [66 credit hours] or with a chosen concentration in Conservation and Restoration Ecology [67 credit hours]; Environmental Health [69 credit hours]; Food Systems and Sustainable Agriculture [66 credit hours]; or Climate & Energy [70 credit hours]. During a student's senior year two classes per semester (12 credits total) can be taken at the Graduate level and count towards both the BS and the Master of Science and Environmental Sustainability, leaving 18 credits worth of coursework to be completed after the BS degree is completed, for a total of 30 credits for the Masters Degree.

Engaged Learning Choice [3,4]		
Select one of the following:		3
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and the Environment	
ENVS 283	Environmental Sustainability	
ENVS 340	Natural History of Belize	
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems	
ENVS 350A	Solutions to Environmental Problems: Water	
ENVS 350C	Solutions to Environmental Problems: Climate Action	
ENVS 350F	Solutions to Environmental Problems: Food Systems [5]	
ENVS 369	Field Ornithology	
ENVS 391	Environmental Research (with SES approval) [5]	
ENVS 395	Environmental Internship (with SES approval) [5]	
Capstone Choice		
Select one of the following:		3
ENVS 390	Integrative Seminar	
ENVS 391C	Independent Environmental Research (Capstone)	
ENVS 395C	Environmental Internship (Capstone)	
Concentration Courses and Electives (p. 1140)		*21-28*
See designated elective categories below		
MS Requirements		
Required Courses		
ENVS 401	Sustainable Systems - Natural Science Perspectives	3
ENVS 402	Sustainable Systems - Social Science Perspectives	3
Choose One of Four Concentrations		*9-12*
Environmental Law & Policy		
ENVS 410	Introduction to Environmental Law & Policy	
ENVS 411	Natural Resources and Land Use Law & Policy	
ENVS 412	Water Law & Policy	
ENVS 413	Energy Law & Policy	
Geographic Information Systems		
ENVS 480	Introduction to Geographic Information Systems	
ENVS 481	Advanced GIS Applications	
ENVS 482	Remote Sensing	
ENVS 486	Python Programming for GIS	
Sustainable Assessment and Planning		
ENVS 451	Introduction to Sustainability Concepts & Impacts	
ENVS 452	Sustainability Assessment & Reporting I	
ENVS 453	Sustainability Assessment & Reporting II	
ENVS 454	Sustainability Plan Development & Reporting	
Sustainable Business		
ENVS 433	Introduction to the Circular Economy	
ENVS 435	Ecological Economics	
ENVS 436	Design for Circular & Sustainable Business	
ENVS 463	Sustainable Business Management	
Electives (p. 1143) [6]		*12-15*
Total Hours		**96-100**

1. Students with the Conservation and Restoration Ecology, Environmental Health, Food Systems and Sustainable Agriculture, and without concentration must take BIOL 102 and BIOL 112.
2. Students in the Climate and Energy Concentration must take PHYS 111 and PHYS 111L. Students in this concentration also take an additional PHYS course outlined in the Concentration requirements.
3. Students in the Food Systems and Sustainable Agriculture Concentration and the Climate and Energy Concentration have limited options to satisfy the Engaged Learning requirement.
4. Students in the Climate and Energy Concentration must take ENVS 273 for the Engaged Learning Requirement within the major. This requirement is outlined in the Concentration requirements.
5. Students in the Food Systems and Sustainable Agriculture Concentration may take this course to satisfy the Engaged Learning Requirement for the major.
6. Students choosing the Geographical Information Systems concentration must take an additional elective course to meet the total credit hours for the MS.

Concentration Requirements and Elective Course Options

Environmental Science (Without Concentration)

Code	Title	Hours
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
Five (5) courses in Environmental Science Electives, at least three (3) of which must be at 300-level		15
Total Hours		**21**

Environmental Science: Conservation and Restoration Ecology Concentration

Code	Title	Hours
Required Courses		
ENVS 218	Biodiversity & Biogeography	3
ENVS 320	Conservation Biology	3
ENVS 321	Conservation Biology Lab	1
ENVS 330	Restoration Ecology	3
ENVS 331	Restoration Ecology Lab	1
ENVS 383	Human Dimensions of Conservation	3
Electives		

One (1) course in Society, Ethics, and Justice Electives	3
One (1) course in Policy, Economics, and Resource Management Electives	3
One (1) course in Environmental Science Electives	3
Total Hours	**23**

Environmental Science: Environmental Health Concentration

Code	Title	Hours
Required Courses		
ENVS 300	Introduction to Public Health	3
ENVS 301	Environmental Health	3
ENVS 303	Introduction to Epidemiology	3
Electives		
One (1) course in Environmental Health and Society Electives		3
Four (4) courses in Environmental Science Electives		12
Total Hours		**24**

Environmental Science: Food Systems and Sustainable Agriculture Concentration

Code	Title	Hours
Required Courses		
ENVS 207	Plants and Civilization	3
ENVS 223	Soil Ecology	3
ENVS 325	Sustainable Agriculture	3
Food Systems and Sustainable Agriculture Required Choice		
Select one of the following:		3
ENVS 230	Feeding the Planet: Global Perspectives on Sustainability, Culture and Food	
ENVS 326	Agroecosystems	
ENVS 327	Food Systems Analysis	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
One (1) course in Environmental Science Electives		3
Total Hours		**21**

Environmental Science: Climate and Energy Concentration

Code	Title	Hours
Required Physics Core Course		
PHYS 112	College Physics II Lec/Disc	3
PHYS 112L	College Physics Lab II	1
Required Climate and Energy Courses		
ENVS 224	Climate & Climate Change	3
ENVS 273	Energy and the Environment [1]	3
ENVS 313	Energy Law & Policy	3
ENVS 316	Energy and Power Systems	3
ENVS 324	Climate Science	3
Electives		
One (1) course in Business, Economics, & Management Electives		3
One (1) course in Communication Electives		3
One (1) course in Methods & Analysis Electives		3
Total Hours		**28**

[1] This course satisfies the Engaged Learning requirement.

Electives

Society, Ethics, and Justice Electives

Code	Title	Hours
COMM 101	Public Speaking & Critical Thinking	3
COMM 277	Organizational Communication	3
COMM 306	Environmental Advocacy	3
COMM 322	Guerilla Media	3
COMM 379	Digital Sustainability [1]	3
ENGL 288	Nature in Literature	3
ENVS 204	Gender, Health & Environment	3
ENVS 230	Feeding the Planet: Global Perspectives on Sustainability, Culture and Food	3
ENVS 260 / COMM 260	Environmental Journalism	3
ENVS 279 / HIST 279E	Climate and History	3
ENVS 284	Environmental Justice	3
ENVS 285	Eco-spirituality	3
ENVS 297 / HIST 297E	North American Environmental History	3
ENVS 298	Special Topics (with SES approval)	1-12
ENVS 338	Climate Change and Human Health	3
ENVS 350A	Solutions to Environmental Problems: Water	3
ENVS 350C	Solutions to Environmental Problems: Climate Action	3
ENVS 350F	Solutions to Environmental Problems: Food Systems	3
ENVS 383	Human Dimensions of Conservation	3
ENVS 391	Environmental Research (with SES approval)	1-3
ENVS 395	Environmental Internship (with SES approval)	3
ENVS 398	Special Topics (with SES approval)	3
ENVS 399	Directed Readings (with SES approval)	1-3
PHIL 287	Environmental Ethics	3
PSYC 277	Environmental Psychology	3
SOCL 226	Science, Technology, & Society	3
SOCL 252	Global Inequalities	3
SOCL 272	Environmental Sociology	3
SOCL 276	The Sociology and Politics of Food	3
SOCL 278	Global Health	3
THEO 204	Religious Ethics and the Ecological Crisis	3
THEO 344	Theology and Ecology	3

[1] For students with the Conservation and Restoration Ecology Concentration or without a Concentration.

Policy, Economics, and Resource Management Electives

Code	Title	Hours
COMM 379	Digital Sustainability [1]	3
ECON 328	Environmental Economics	3
ENVS 230	Feeding the Planet: Global Perspectives on Sustainability, Culture and Food	3
ENVS 298	Special Topics (with SES approval)	1-12
ENVS 300	Introduction to Public Health	3
ENVS 310	Introduction to Environmental Law & Policy	3
ENVS 311	Natural Resources and Land Use Law & Policy	3
ENVS 312	Water Law & Policy	3
ENVS 313	Energy Law & Policy	3
ENVS 316	Energy and Power Systems	3
ENVS 327	Food Systems Analysis	3
ENVS 333	Introduction to the Circular Economy	3
ENVS 335	Ecological Economics	3
ENVS 336	Design for Circular & Sustainable Business	3
ENVS 338	Climate Change and Human Health	3
ENVS 351	Introduction to Sustainability Concepts & Impacts [1]	3
ENVS 363	Sustainable Business Management	3
ENVS 383	Human Dimensions of Conservation	3
ENVS 384	Conservation Economics	3
ENVS 389	Ecological Risk Assessment	3
ENVS 391	Environmental Research (with SES approval)	1-3
ENVS 395	Environmental Internship (with SES approval)	3
ENVS 398	Special Topics (with SES approval)	3
ENVS 399	Directed Readings (with SES approval)	1-3
GLST 305	Globalization and Environmental Sustainability	3
MGMT 201	Managing People and Organizations	3
PLSC 354	Global Environmental Politics	3

[1] For students in the Food Systems and Sustainable Agriculture Concentration only.

Environmental Science Electives

Code	Title	Hours
Environmental Science Electives		
ANTH 104	The Human Ecological Footprint	3
ANTH 303	People and Conservation	3
ENVS 204	Gender, Health & Environment [3]	3
ENVS 207	Plants and Civilization [4]	3
ENVS 215 / BIOL 215	Ornithology [1]	3
ENVS 218	Biodiversity & Biogeography [3]	3
ENVS 223	Soil Ecology [3]	3
ENVS 224	Climate & Climate Change	3
ENVS 226	Science & Conservation of Freshwater Ecosystems	3
ENVS 267	Bird Conservation and Ecology [5]	3
ENVS 273	Energy and the Environment [5]	3
ENVS 278	Hydrology [6]	3
ENVS 283	Environmental Sustainability	3
ENVS 298	Special Topics (with SES approval)	1-12
ENVS 300	Introduction to Public Health [7]	3
ENVS 301	Environmental Health [7]	3
ENVS 303	Introduction to Epidemiology [7]	3
ENVS 320	Conservation Biology [7]	3
ENVS 322	Invasive Species	3
ENVS 323	Environmental Microbiology [3]	3
ENVS 324	Climate Science	3
ENVS 325	Sustainable Agriculture [4]	3
ENVS 326	Agroecosystems	3
ENVS 327	Food Systems Analysis	3
ENVS 330	Restoration Ecology [3]	3
ENVS 338	Climate Change and Human Health [6]	3
ENVS 340	Natural History of Belize [5]	3
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems [5]	3
ENVS 350A	Solutions to Environmental Problems: Water	3
ENVS 350C	Solutions to Environmental Problems: Climate Action	3
ENVS 350F	Solutions to Environmental Problems: Food Systems	3
ENVS 367	Mammalogy	3
ENVS 369	Field Ornithology [5]	3
ENVS 380	Introduction to Geographic Information Systems	3
ENVS 381	Advanced GIS Applications	3
ENVS 382	Remote Sensing	3
ENVS 383	Human Dimensions of Conservation [7]	3
ENVS 384	Conservation Economics [2]	3
ENVS 385	Introduction to Global Health	3
ENVS 386	Python Programming for GIS	3
ENVS 387	Principles of Ecotoxicology	3
ENVS 389	Ecological Risk Assessment	3
ENVS 391	Environmental Research (with SES approval)	1-3
ENVS 395	Environmental Internship (with SES approval)	3
ENVS 398	Special Topics (with SES approval)	3
ENVS 399	Directed Readings (with SES approval)	1-3
BIOL, CHEM, PHYS 300-level courses (with SES approval)		

[1] For students with the Food and Sustainable Agriculture Concentration, the Environmental Health Concentration, or without a Concentration.
[2] For students in the Environmental Health Concentration only.
[3] For students with the Conservation and Restoration Ecology Concentration or without a Concentration.
[4] For students in the Food Systems and Sustainable Agriculture Concentration only.
[5] For students with the Conservation and Restoration Ecology Concentration, the the Environmental Health Concentration, or without a Concentration.
[6] For students with the Food Systems and Sustainable Agriculture Concentration or without a Concentration.
[7] For students without a Concentration only.

Environmental Health and Society Elective (Environmental Health only)

Code	Title	Hours

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Suggested Sequence of Courses - Professional Track

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
	Hours	**12**
Year Two		
Fall		
ENVS 280	Principles of Ecology	3
ENVS 286S	Principles of Ecology Lab	1
Environmental Science Elective		3
	Hours	**7**
Spring		
Justice & Ethics Choice		3
Society, Ethics, & Justice Elective		3
	Hours	**6**
Year Three		
Fall		
ENVS 274	Chemistry of the Natural Environment	3
ENVS 275	Chemistry of the Environment Lab	1
Environmental Science 300 Level Elective		3
	Hours	**7**
Spring		
ENVS 335 or ECON 328	Ecological Economics or Environmental Economics	3
PLSC 392	Environmental Politics	3
	Hours	**6**
Year Four		
Fall		
Engaged Learning Choice		3
400 Level Environmental Science Elective		3
400 Level Environmental Science Elective		3
	Hours	**9**
Spring		
Capstone Choice		3
400 Level Policy, Economics, & Resource Management Elective		3
400 Level Environmental Science Elective		3
	Hours	**9**

Year Five		
Fall		
ENVS 402	Sustainable Systems - Social Science Perspectives	3
400 Level Required Concentration Course		
400 Level Required Concentration Course		
	Hours	**3**
Spring		
ENVS 401	Sustainable Systems - Natural Science Perspectives	3
400 Level Required Concentration Course		3
400 Level Required Concentration Course		3
	Hours	**9**
	Total Hours	**79**

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems. [BS - no concentration]
- Examine the causes and consequences of environmental change at local to global scales. [BS - no concentration]

- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS - no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS - no concentration]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and all concentrations]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and all concentrations]
- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [Conservation and Restoration Ecology concentration]
- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [Conservation and Restoration Ecology concentration]
- Examine the sources of environmental degradation and their impacts on health. [Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [Environmental Health concentration]
- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [Environmental Health concentration]
- Explain the components of food systems and their complex interactions across spatial and temporal scales. [Food Systems and Sustainable Agriculture concentration]
- Articulate the physical, psychological, cultural, and spiritual significance of food to individual and community wellbeing. [Food Systems and Sustainable Agriculture concentration]
- Using multiple methods of analysis, evaluate the environmental and equity impacts of different food system practices to reveal points of leverage for social-ecological change. [Food Systems and Sustainable Agriculture concentration]
- Engage knowledge, skills, and values through experiences that advance sustainability, resilience, and justice within food systems. [Food Systems and Sustainable Agriculture concentration]
- Understand the fundamental concepts of climate science and the impacts of climate change on society and the natural environment. [Climate and Energy concentration]
- Assess the state of energy production, consumption, and the deployment of sustainable technologies as part of a just energy transition. [Climate and Energy concentration]
- Evaluate the role of governmental policy and regulation in solving climate and energy related problems. [Climate and Energy concentration]
- Apply techniques from both the natural and social sciences to design practical and innovative solutions to contemporary climate and energy issues. [Climate and Energy concentration]
- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals. [MS]
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature. [MS]
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public. [MS]
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis. [MS]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/Global Strategic Communication (BS/MS)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

Related Programs

Combined

- Environmental Policy/Global Strategic Communication (BA/MS) (p. 1117)

Curriculum

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

The BS in Environmental Science can be taken without a concentration [66 credit hours] or with a chosen concentration in Conservation and Restoration Ecology [68 credit hours]; Environmental Health [69 credit hours]; or Food Systems and Sustainable Agriculture [66 credit hours]. Students are able to take 12 credits worth of 400-level classes their senior year.

Code	Title	Hours
BS Requirements		
Core Curriculum		
BIOL 101 & BIOL 111	General Biology I and General Biology I Lab	4
BIOL 102 & BIOL 112	General Biology II and General Biology II Lab	4
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
ENVS 274	Chemistry of the Natural Environment	3
ENVS 275	Chemistry of the Environment Lab	1
ENVS 276	Chemistry of Environmental Pollution	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the

Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems. [BS - no concentration]
- Examine the causes and consequences of environmental change at local to global scales. [BS - no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS - no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS - no concentration]
- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts. [MS]
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media. [MS]
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices. [MS]
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities. [MS]
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community. [MS]
- Demonstrate the competencies to work as a professional in advertising or public relations. [MS]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and all concentrations]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and all concentrations]
- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [Conservation and Restoration Ecology concentration]

- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [Conservation and Restoration Ecology concentration]
- Examine the sources of environmental degradation and their impacts on health. [Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [Environmental Health concentration]
- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [Environmental Health concentration]
- Explain the components of food systems and their complex interactions across spatial and temporal scales. [Food Systems and Sustainable Agriculture concentration]
- Articulate the physical, psychological, cultural, and spiritual significance of food to individual and community wellbeing. [Food Systems and Sustainable Agriculture concentration]
- Using multiple methods of analysis, evaluate the environmental and equity impacts of different food system practices to reveal points of leverage for social-ecological change. [Food Systems and Sustainable Agriculture concentration]
- Engage knowledge, skills, and values through experiences that advance sustainability, resilience, and justice within food systems. [Food Systems and Sustainable Agriculture concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/Public Health (BS/MPH)

Earn a dual bachelor's and master's degree in five years

The environment is a powerful determinant of public health. Combining your environmental studies through Loyola's School of Environmental Sustainability (SES) (https://www.luc.edu/sustainability/) with a master's degree in public health will strengthen your ability to improve public health.

Related Programs

Major

- Environmental Science (BS) (p. 937)

Combined

- Healthcare Administration/Public Health (BS/MPH) (p. 1234)

Curriculum

The BS in Environmental Science can be taken without a concentration (66 credits) or a chosen concentration in Environmental Health (69 credits). During a student's senior year two classes per semester (12 credits total) can be taken at the Graduate level and count towards both the BS and the Master of Public Health, leaving 30 credits worth of coursework to be completed after the BS degree is complete, for a total of 42 credits for the Masters Degree. ENVS 303 should be taken as MPBH 403.

MPH Track-Specific Curricula

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPBH 427	Advanced Statistical Methods	1
MPBH 431	Grant Writing	3
Choose One Research Methods Course from the following:		3
MPBH 413	Non-Communicable Disease Epidemiology	
MPBH 414	Introduction to Global Health	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
Total Hours		**15**

Global Health Equity

This concentration is a hybrid program of online and evening classes. Study the health of global populations with the ultimate goal of identifying and eliminating structures and practices of inequity and injustice to advance health equity for individuals and populations.

Code	Title	Hours
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal and Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 431	Grant Writing	3
Choose one of the following: [1]		3
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 432	Global Bioethics	
Total Hours		**15**

[1] Students may choose an elective course not on this list with Track Director approval.

Public Health Policy and Management

This concentration can be completed entirely online, and also can be taken with in-person courses. This curriculum studies the organization,

structure, and delivery of health-related services, and associated population health outcomes. Students may customize their academic focus in either public health policy, administration, or both.

Code	Title	Hours
MPBH 416	Health Services Research Methods	3

Hours	**10-12**
Total Hours	**108-112**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record

as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Evidence-based Approaches to Public Health: Apply epidemiological methods to the breadth of settings and situations in public health practice; Select quantitative and qualitative data collection methods appropriate for a given public health context; Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate; and Interpret results of data analysis for public health research, policy or practice. [MPH]
- Public Health & Health Care Systems: Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings; and Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels. [MPH]
- Planning & Management to Promote Health: Assess population needs, assets and capacities that affect communities' health; Apply awareness of cultural values and practices to the design or implementation of public health policies or programs; Design a population-based policy, program, project or intervention; Explain basic principles and tools of budget and resource management; and Select methods to evaluate public health programs. [MPH]
- Policy in Public Health: Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence; Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes; Advocate for political, social or economic policies and programs that will improve health in diverse populations; and Evaluate policies for their impact on public health and health equity. [MPH]
- Leadership: Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making; and Apply negotiation and mediation skills to address organizational or community challenges. [MPH]
- Communication: Select communication strategies for different audiences and sectors; Communicate audience-appropriate public health content, both in writing and through oral presentation; and Describe the importance of cultural competence in communicating public health content. [MPH]
- Interprofessional Practice: Perform effectively on interprofessional teams. [MPH]
- Systems Thinking: Apply systems thinking tools to a public health issue. [MPH]
- BS Learning Outcomes: Explain the physical, biological, and chemical structure and function of ecosystems; Examine the causes and consequences of environmental change at local to global scales; Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability; and Create an action plan for leading a professional and personal life that promotes environmental sustainability. [MPH]
- Explain the physical, biological, and chemical structure and function of ecosystems. [BS - no concentration]
- Examine the causes and consequences of environmental change at local to global scales. [BS - no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS - no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS - no concentration]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and Environmental Health concentration]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and Environmental Health concentration]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and Environmental Health concentration]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [Environmental Health concentration]

- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [Environmental Health concentration]
- Examine the sources of environmental degradation and their impacts on health. [Environmental Health concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science/Public Policy (BS/MPP)

From ecological restoration to water conservation, from climate change adaptation to storm water management, the challenge is clear. The need for individuals with knowledge and skills relevant to both environmental science and public policy has never been greater.

The SES dual degree programs with the Master of Public Policy (MPP) prepare graduates to meet these challenges effectively in careers in government, non-profit organizations, and businesses.

Undergraduate students take four graduate courses in their senior year, two each semester. In their fifth, graduate only year they will complete the remaining MPP credit hours.

There are eight 3-credit required MPP courses and a one-credit required Professional Development class. Students also take 12 elective credits where they develop a concentration in a particular field, such as environmental policy. For these electives, students can select from graduate courses in the School of Environmental sustainability.

Related Programs

Major

- Environmental Science (BS) (p. 937)

Combined

- Environmental Policy/Public Policy (BA/MPP) (p. 1122)
- Environmental Studies/Public Policy (BA/MPP) (p. 1187)

Curriculum

These dual degree programs begin with a broad, interdisciplinary undergraduate curriculum drawing on courses in the natural sciences, social sciences, humanities, and business.

Undergraduate service-learning, internships, research, and study abroad provide students with rich, experiential learning opportunities. Students then develop more in-depth understanding of policy issues and the professional skills necessary to influence policy outcomes as part of their graduate studies.

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

The BS in Environmental Science can be taken without a concentration [66 credit hours] or with a chosen concentration in Conservation and Restoration Ecology [68 credit hours]; Environmental Health [69 credit hours]; or Food Systems and Sustainable Agriculture [66 credit hours]. Four courses (12 credit hours) can be taken at the 400-level in a student's senior year to count toward both undergraduate and graduate degree programs.

MPP Electives

Students are required to take 12 hours of electives. Electives can be drawn from departments across the university, including environmental studies and public health. These electives are where students can focus on their preferred field of policy. The following are some examples of optional courses:

Code	Title	Hours
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3

Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 401	Environmental Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
	Hours	**11**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
	Hours	**12**
Year Two		
Fall		
ENVS 280	Principles of Ecology	3
ENVS 286S	Principles of Ecology Lab	1
Environmental Science Elective		3
	Hours	**7**
Spring		
Justice & Ethics Choice		3
Environmental Science Elective		3
	Hours	**6**
Year Three		
Fall		
ENVS 274	Chemistry of the Natural Environment	3
ENVS 275	Chemistry of the Environment Lab	1
Environmental Science 300 Level Elective		3
Environmental Science 300 Level Elective		3
Society, Ethics, & Justice Elective		3
	Hours	**13**
Spring		
ENVS 335 or ECON 328	Ecological Economics or Environmental Economics	3
PLSC 392	Environmental Politics	3
Policy, Economics, & Resource Management Elective		3
300 Level Environmental Science Elective		3
	Hours	**12**
Year Four		
Fall		
Engaged Learning Choice		3
MPP 400 or MPP 401 or MPP 404	Policy Design and Analysis or Analytical Tools in Public Policy or Public Policy Process	3
ENVS 410 or ENVS 411 or ENVS 480	Introduction to Environmental Law & Policy or Natural Resources and Land Use Law & Policy or Introduction to Geographic Information Systems	3
	Hours	**9**
Spring		
Capstone Choice		3
MPP 403 or MPP 404	Public Budget and Finance or Public Policy Process	3
MPP 413 or ENVS 412 or ENVS 413 or ENVS 481	Intergovernmental Relations or Water Law & Policy or Energy Law & Policy or Advanced GIS Applications	3
	Hours	**9**
Year Five		
Fall		
MPP 405	Statistical Methods & Analysis for Public Policy I	3
MPP 501	Public Policy Internship	3
MPP 502	Professional Development Skills	1
MPP Elective		3
MPP Elective		3
	Hours	**13**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates.

Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Upon completion of the joint degree program, students will be able to:

- Examine the causes and consequences of environmental change at local to global scales. [BS - no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [BS - no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [BS - no concentration]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [BS - no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [BS - no concentration and all concentrations]
- Design policy interventions and apply criteria to assess the best option in each specific case. [MPP]
- Understand a government budget and evaluate it from different stakeholder positions. [MPP]
- Understand the political process at the federal, state and local government levels. [MPP]
- Develop political messaging to advocate for policies and to build a political coalition of support for a program. [MPP]
- Apply appropriate statistical procedures used in public policy research and practice. [MPP]
- Design, conduct and critique program evaluations. [MPP]
- Experience working in the public policy arena in government agency, non-profit, research, or private sector organization. [MPP]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [BS - no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [BS - no concentration and all concentrations]
- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [BS - Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [BS - Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [BS - Conservation and Restoration Ecology concentration]
- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [BS - Conservation and Restoration Ecology concentration]
- Examine the sources of environmental degradation and their impacts on health. [BS - Environmental Health concentration]
- Apply the tools of public health to characterize the impacts on community health using a planetary health perspective. [BS - Environmental Health concentration]
- Integrate environmental regulatory policies to evaluate the health impacts at local and global scales. [BS - Environmental Health concentration]
- Incorporate critical public health and environmental health justice perspectives into environmental and human dimensions. [BS - Environmental Health concentration]
- Explain the components of food systems and their complex interactions across spatial and temporal scales. [BS - Food Systems and Sustainable Agriculture concentration]
- Articulate the physical, psychological, cultural, and spiritual significance of food to individual and community wellbeing. [BS - Food Systems and Sustainable Agriculture concentration]
- Using multiple methods of analysis, evaluate the environmental and equity impacts of different food system practices to reveal points of leverage for social-ecological change. [BS - Food Systems and Sustainable Agriculture concentration]
- Engage knowledge, skills, and values through experiences that advance sustainability, resilience, and justice within food systems. [BS - Food Systems and Sustainable Agriculture concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Studies/Business (BA/MBA)

Solving the world's environmental crises depends on how well tomorrow's business leaders adopt strategies that allow for sustainability to be a leading driver in how they do business.

Loyola's five-year Accelerated Bachelor's/Master's program in environmental studies and business administration introduces students to the fundamental issues involved in global, environmental and ethical business practices.

The academic content and direct, hands-on experiences within the bachelors degrees will provide a base from which to develop skills and knowledge in the MBA program. The program equips graduates to promote and implement sustainable business practices.

Related Programs

Major

- Environmental Studies (BA) (p. 946)

Combined

- Advertising Public Relations/Environmental Science and Sustainability (BA/MS) (p. 963)
- Environmental Science/Business (BS/MBA) (p. 1127)

Curriculum

Students interested in pursuing one of the Accelerated Bachelor's/Master's programs will complete all normal requirements for a BA in environmental studies.

Students may take two graduate courses that count toward the MBA during their senior year in lieu of environmental science/studies electives. Students complete the degree requirements for a BA in environmental studies after four years and complete the MBA at the end of the fifth year.

Three (3) MBA Electives		*9*
Through electives, you can shape your education for your personal career path and interests. Electives can be concentrated in a particular area of study (e.g., finance, marketing, human resources management, etc.) or across several areas of interest.		
Total Hours		**96**

[1] The Quinlan School of Business Graduate Program uses a quarter system rather than a semester system. The MBA program is an 16 course program (48 hours).

[2] ISSCM 400 Quantitative Methods and ISSCM 402N Quantitative Methods II - Statistics Primer can be taken in the first quarter of MBA degree if necessary.
[3] Can be waived with grade of B or above in MATH 131 Applied Calculus I or MATH 161 Calculus I.
[4] Can be waived with grade of B or above in STAT 103 Fundamentals of Statistics or ENVS 203 Environmental Statistics.
[5] Can be taken as a free elective in senior year.
[6] Prerequisite of ISSCM 400 Quantitative Methods or the equivalent can be waived with grade of B or above in ECON 201 Principles of Microeconomics & ECON 202 Principles of Macroeconomics
[7] Prerequisite of ACCT 400 Financial Accounting for Business Decisions or the equivalent.

	Hours	**9**
	Total Hours	**66**

Accelerated Bachelor's/Master's Program Tip

In addition to completing the normal requirements for the environmental studies, students planning to enter the MBA program should do the following:

A GPA of 3.20 or higher is required for admission to this program.

First-year/sophomore years: Arrange undergraduate course scheduling to preserve six hours of free electives until senior year.

During their first two years, students should take ECON 201 Principles of Microeconomics and ECON 202 Principles of Macroeconomics, which will satisfy the social science requirement of the Core Curriculum and allow the student to waive out of ECON 420 Managerial Economics. Take MATH 131 Applied Calculus I or MATH 161 Calculus I to waive out of ISSCM 400 Quantitative Methods.

Junior year (2nd semester): Attend an MBA accelerated Bachelor's / Master's information session.

Senior year: Apply to the program by October 15 if you complete your Bachelor's degree in May. Apply to the program by April 15 if you are completing your Bachelors degree in December. After admission, meet with your MBA advisor for planning your graduate business course schedule.

Take ACCT 400 Financial Accounting for Business Decisions and MARK 460 Marketing Management, which will count as free electives toward the BA degree. Complete all requirements for the BA.

Fifth year: During the fifth year, students who have followed the above directions will have a total of 14 (or less) MBA courses remaining. These courses can be completed full-time at the rate of three or four per quarter (including the summer quarter). Students also have the option to complete the MBA program on a part-time basis (usually one or two courses per quarter).

Students should contact the Quinlan School of Business for specific MBA requirements and an academic calendar.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate

designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request

deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions. [BA]
- Appraise the interactions and synergies between the natural world, social systems, and human cultures. [BA]
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness. [BA]
- Engaged actions of self-awareness and social solidarity that reflect a commitment to integral ecology. [BA]
- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Studies/Digital Media and Storytelling (BA/MC)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

Related Programs

Combined

- Environmental Policy/Digital Media and Storytelling (BA/MC) (p. 1108)
- Environmental Science/Digital Media and Storytelling (BS/MC) (p. 1133)

Curriculum

Environmental Studies BA students complete coursework spanning a variety of disciplines pertinent to the understanding of environmental issues.

	Total Hours	**87**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the

graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions. [BA]
- Appraise the interactions and synergies between the natural world, social systems, and human cultures. [BA]
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness. [BA]
- Engaged actions of self-awareness and social solidarity that reflect a commitment to integral ecology. [BA]
- Learn how to use state-of-the-art equipment in our Convergence Studio and technology labs. [MC]
- Learn audience engagement and analytics to understand user activities and to drive improvements in distribution performance. Students will learn digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content. [MC]
- Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public. [MC]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Studies/ Environmental Science and Sustainability (BA/MS)

Loyola's BA in Environmental Studies combines a solid base of courses in the natural sciences with course work in the social sciences to prepare students for careers in government, business, education, non-profit organizations or the media.

With our Accelerated Bachelor's/Master's Program, Loyola SES students can boost their professional credentials and save time and money by completing an undergraduate degree along with a master of science in environmental science and sustainability degree in as little as five years. The economic and academic benefits are substantial.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they

approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions. [BA]

- Appraise the interactions and synergies between the natural world, social systems, and human cultures. [BA]
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness. [BA]
- Engaged actions of self-awareness and social solidarity that reflect a commitment to integral ecology. [BA]
- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals. [MS]
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature. [MS]
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public. [MS]
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis. [MS]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Studies/Global Strategic Communication (BA/MS)

The new Accelerated Bachelor's/Master's (ABM) program allows SES students to earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The program trains environmental scientists to be better communicators. While environmental scientists are trained to investigate, analyze data, and interpret results, they are not taught how to communicate their results and conclusions in ways that are readily accessible to the general public, CEOs, or legislators. For students in the School of Environmental Sustainability, the ABM program will help them with writing, public speaking, conference presentations, television and radio interviews, and social media messaging.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the

option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions. [BA]
- Appraise the interactions and synergies between the natural world, social systems, and human cultures. [BA]
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness. [BA]
- Engaged actions of self-awareness and social solidarity that reflect a commitment to integral ecology. [BA]
- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts. [MS]
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media. [MS]
- Understand the implications and applications of integrated strategies for digital media in marketing, advertising and public relations practices. [MS]
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities. [MS]
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community. [MS]
- Demonstrate the competencies to work as a professional in advertising or public relations. [MS]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Studies/Public Policy (BA/MPP)

From ecological restoration to water conservation, from climate change adaptation to storm water management, the challenge is clear. The need for individuals with literacy and skills relevant to both environmental science and public policy has never been greater.

The SES dual degree programs with the Master of Public Policy (MPP) prepare graduates to meet these challenges effectively in careers in government, non-profit organizations, and businesses.

Related Programs

Combined

- Environmental Policy/Public Policy (BA/MPP) (p. 1122)
- Environmental Science/Public Policy (BS/MPP) (p. 1159)

Curriculum

These dual degree programs begin with a broad, interdisciplinary undergraduate curriculum drawing on courses in the natural sciences, social sciences, humanities, and business.

Undergraduate service-learning, internships, research, and study abroad provide students with rich, experiential learning opportunities. Students then develop more in-depth understanding of policy issues and the professional skills necessary to influence policy outcomes as part of their graduate studies.

Environmental Studies BA students complete coursework spanning a variety of disciplines pertinent to the understanding of environmental issues.

MPP Electives

Students are required to take 12 hours of electives. Electives can be drawn from departments across the university, including environmental studies and public health. These electives are where students can focus on their preferred field of policy. The following are some examples of optional courses:

Code	Title	Hours
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
ENVS 412	Water Law & Policy	3
ENVS 413	Energy Law & Policy	3
ENVS 480	Introduction to Geographic Information Systems	3
ENVS 481	Advanced GIS Applications	3
Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 401	Environmental Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3

Suggested Sequence of Courses

Course	Title	Hours
Year One		
Fall		
ENVS 137	Foundations of Environmental Science I	3
	Hours	**3**
Spring		
ENVS 203	Environmental Statistics	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
Justice & Ethics Choice		3
	Hours	**10**
Year Two		
Fall		
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
	Hours	**5**
