Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.

- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Upon completion of the joint degree program, students will be able to:

- Apply scientific knowledge to the understanding of environmental problems and their physical causes.
- Understand the ethical, social, and scientific dimensions of issues such as biodiversity loss, hunger, water, energy, and climate change.
- Assess environmental problems and potential solutions by integrating economic, societal, ethical, political, scientific, and historical perspectives.
- Combine knowledge about current government programs with technical skills to assess how politics influence policy choices, to evaluate the impacts of existing programs, and to design more effective programs with respect to sustainability.
- Understand the role of advocacy in the political system, including the role and limitations of expert analysis and data in political decisions.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Exercise Science (BS/MS)

Loyola also offers a five-year bachelor to master's program for undergraduate exercise science majors. Accelerate your progress and earn both degrees in just five years (earning the degrees separately takes at least six years).

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate proficiency in exercise and fitness screening, health appraisal and risk stratification, fitness assessment and evaluation, and exercise techniques. [Undergraduate]
- Communicate effectively and collaboratively with clients and the interprofessional team in exercise and fitness settings. [Undergraduate]
- Integrate values, ethics, and client preferences into exercise science practice [Undergraduate]
- Participate in activities to promote lifelong learning and professional development in exercise science. [Undergraduate]
- Demonstrate proficiency in critical thinking and evidence-based decision making in Exercise science. [Undergraduate]
- Synthesize knowledge from the arts, sciences and exercise sciences as the basis for assessment of physical capabilities and exercise prescriptions. [Undergraduate]
- Conduct comprehensive health and fitness assessments using theories and frameworks. [Graduate]
- Apply scientific principles and evidence-based recommendations into the prescription, implementation, and evaluation of exercise and fitness programs. [Graduate]
- Create lifestyle modification and health promotion plans for individuals and groups. [Graduate]
- Incorporate effective communication and motivational strategies to support clients or patients as they adopt, perform, and maintain a healthy lifestyle. [Graduate]
- Implement role behaviors consistent with the scope of practice of exercise sciences. [Graduate]
- Manage human, fiscal, and physical resources of health fitness facilities and programs. [Graduate]

Film and Digital Media: Film and Media Production Track/ Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.

- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the

undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Develop fundamental knowledge and skills essential in media production, exhibition, and distribution.
- Connect theory, analysis, and hands-on work in the development of original ideas in film and digital media.
- Identify their aesthetic vision as a creator of media.
- Gain technical proficiency in audio and visual skills, and specialization in advanced production skills.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Film and Digital Media: Film and Media Production Track/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Film and Digital Media: Film and Media Production Track and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Film and Digital Media: Film and Media Production Track and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Film and Digital Media: Film and Media Production Track (BA) (p. 831)
- Film and Digital Media: International Programming Track (BA) (p. 833)

Combined

- Film and Digital Media: International Programming Track/ International Affairs (BA/MA) (p. 1214)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**73**

1 Writing Intensive (p. 800)
2 Satisfies Engaged Learning (p. 1417) requirement.
3 May be repeated if different topic
4 Inigo (https://www.inigocomm.com/)
5 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3
PLSC 431	Formulation US Foreign Policy	3
PLSC 432	Comparative Foreign Policy Analysis	3
PLSC 433	International Organization	3
PLSC 435	International Political Economics	3
PLSC 436	International Conflict	3
Methods Courses		
PLSC 401	Intro to Research Design & Method	3
PLSC 476	Political Analysis II	3
Psychology Department		
PSYC 460	Social Psychological Theory	3
PSYC 461	Attitude and Attitude Change	3
PSYC 474	Research in Group Dynamics	3
PSYC 484	Prejudice and Intergroup Relations	3
Methods Courses		

PSYC 486	Methods of Program Evaluation	3
Sociology Department		
SOCL 418	Demography	3
SOCL 423	Social Movements	3
SOCL 426	Sociology of Gender	3
SOCL 441	Sociology of Religion	3
SOCL 447	Sociology of Culture	3
SOCL 461	Race & Ethnicity	3
Methods Courses		
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 201	Media Theory and Criticism	3
COMM 274	Introduction to Cinema	3
	Hours	**6**
Spring

Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
Spring		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**73**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as

an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]

- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Develop fundamental knowledge and skills essential in media production, exhibition, and distribution. [Film and Digital Media: Film and Media Production Track]
- Connect theory, analysis, and hands-on work in the development of original ideas in film and digital media. [Film and Digital Media: Film and Media Production Track]
- Identify their aesthetic vision as a creator of media. [Film and Digital Media: Film and Media Production Track]
- Gain technical proficiency in audio and visual skills, and specialization in advanced production skills. [Film and Digital Media: Film and Media Production Track]

Film and Digital Media: International Programming Track/Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit

hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students

in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Develop fundamental knowledge and skills essential in media production, exhibition, and distribution.
- Connect theory, analysis, and hands-on work in the development of original ideas in film and digital media.
- Identify their aesthetic vision as a creator of media.
- Gain technical proficiency in audio and visual skills, and specialization in advanced production skills.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Film and Digital Media: International Programming Track/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Film and Digital Media: International Programming Track and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Film and Digital Media: International Programming Track and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Film and Digital Media: Film and Media Production Track (BA) (p. 831)
- Film and Digital Media: International Programming Track (BA) (p. 833)

Combined

- Film and Digital Media: Film and Media Production Track/ International Affairs (BA/MA) (p. 1202)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Electives (p. 1215) [5]		*18*

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.

Total Hours	**73**

1 Writing Intensive (p. 800)
2 Satisfies Engaged Learning (p. 1417) requirement
3 May be repeated if different topic
4 Inigo (https://www.inigocomm.com/)
5 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of

Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Develop fundamental knowledge and skills essential in media production, exhibition and distribution. [Film and Digital Media: International Programming Track]
- Connect theory, analysis, and hands-on work in the development and review of original ideas in film and digital media. [Film and Digital Media: International Programming Track]
- Identify their social values as a critical thinker. [Film and Digital Media: International Programming Track]
- Gain proficiency in the story development, programming, financing and distribution of media works [Film and Digital Media: International Programming Track]

Global Studies/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Global Studies and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at

Loyola will be able to pursue an accelerated BA/MA in Global Studies and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Global Studies (BA) (p. 478)

Minor

- Global Studies Minor (p. 482)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
Required BA Courses [1]		
GLST 101	Introduction to Global Studies	3
ANTH 100	Globalization and Local Cultures	3
PLSC 102	International Relations in an Age of Globalization [2]	3
Select two of the following: [3]		6
GLST 301	Capstone in Global Studies: Directed Readings	
GLST 302	States and Firms	
GLST 303	Technological Change and Society	
GLST 304	Global Civil Society and Social Movements	
GLST 305	Globalization and Environmental Sustainability	
GLST 306	International Development	
GLST 398	Topics in Global Studies	
GLST 370	Internship in Global Studies [4]	
GLST Elective Courses (p. 1221) [5]		18
Required MA Courses		
CORE		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1223) [5]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**57**

1. Global Studies BA requirements for students who declare the Global Studies Major on or after August 1, 2021.
2. PLSC 102 International Relations in an Age of Globalization can be taken and 3 PLSC Electives.
3. Students are allowed to take additional coursework from this list in order to fulfill GLST elective requirements.
4. GLST 370 Internship in Global Studies will only have 3 credit hours counted towards the GLST major.
5. Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Additional BA Requirements

Portfolio Requirement

All graduating global studies majors must submit during their final semester a portfolio, which should be emailed directly to chasselmann@luc.edu. These portfolios are not graded at the level of the individual student but are used instead as part of an annual assessment of the program. The precise prompts will vary from year to year; however, students are required to submit the following:

1. a personal statement (300-500 words) describing the most important knowledge and skills gained as a global studies major as well as the courses and experiences you have found most helpful;
2. the inclusion of a statement (300-500 words) on the strengths and weaknesses of the Global Studies Program itself as you see it as well as any recommendations you would like to see made to the program; and
3. depending on the year, we might request copies of essays completed for a global studies class or a short response to an essay prompt. You will receive an email from the program director approximately two months before you are set to graduate asking for the portfolio and letting you know if we need supplemental material.

December graduates must submit their portfolios by December 10th of their final semester; May graduates must submit their portfolios by April 30th of their final semester. Please note that portfolio submission prior to graduation is a requirement that is separate from all other global studies major requirements.

Language Requirement

The language requirement for the major in global studies may be satisfied in any of the following ways:

- Successful completion with a grade of "C" or better of a 104-level or higher course in one of the accepted modern, foreign languages offered by the Department of Modern Languages and Literatures.
- Completion of a language proficiency examination or the equivalent, administered by the Department of Modern Languages and Literatures, demonstrating proficiency at the 104 level or higher of a modern, foreign language. Please email CASLanguageTesting@luc.edu for information about language proficiency testing.
- Determination by the director of the Global Studies Program, in consultation with appropriate specialists, that a student has at least a 104-level reading and writing proficiency in a language that is not taught or tested at Loyola.

Please note that English, American Sign Language, computer languages, and other US-based languages do not satisfy this requirement.

List of BA Elective Courses

Global Studies elective courses must be tagged with the GLST program and must include at least two courses that focus on specific world areas (Africa, Asia, Europe, Latin America, and the Middle East). However, students may not take their electives in the same world area. Courses taken abroad may be substituted for LUC GLST courses only if they are pre-approved by the director of the GLST program. In addition, for students who declare the major starting Fall 2015, elective coursework must be from at least three departments. No more than three courses taken from any single department can count for the GLST major.

If a student wishes to concentrate on a particular region (e.g., Africa, Asia, Europe, Latin America, or the Middle East) within the global studies major, he or she may choose to take up to six GLST electives that focus on the chosen world area. It is not required, however, that students do this.

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3

Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3

LAW 388	Global Access to Medicine: A Patent Perspective	3
LAW 459	Intro to English Legal Profession	1
LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'."

Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

In order to provide optimal flexibility in the International Affairs MA program, there is no required course sequence for that degree. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the

graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Demonstrate an ability to describe and analyze two or more important contemporary global concerns (e.g., the environment, violence, human trafficking, poverty, child labor) [Global Studies]
- Demonstrate geographical, cultural, and/or historical knowledge of at least two different world regions (Asia, Africa, South America, Europe, and the Middle East) [Global Studies]
- Demonstrate an ability to describe and analyze an aspect of the modern political system in at least two countries outside of North America [Global Studies]
- Demonstrate an ability to describe and analyze the significance and activities of two or more international/global organizations [Global Studies]

Healthcare Administration (BS/MHA)

Accelerate your path to a master's degree

Loyola University Chicago and the City of Chicago together serve as the ideal location for a Bachelor of Science and Master in Healthcare Administration (BSHCA/MHA). Chicago, a leading U.S. hub of health care organization and innovation, offers a unique urban setting for foundational and advanced study in healthcare administration.

Our undergraduate students begin with a broad, interdisciplinary curriculum drawing on courses in healthcare organization, business, data analysis, and ethics. Service-learning, internships, and capstones provide them with rich experiential learning opportunities. Our graduate students develop a more in-depth understanding of operational, finance, and strategic issues in addition to the professional skills to be an effective leader in the vast healthcare industry. With three graduate-specialty tracks, students have the flexibility to tailor an interdisciplinary program to individual interests.

The dual BSHCA/MHA program allows students to explore challenges and solutions in a rich healthcare environment while accelerating their ability to earn two degrees.

The mission of the Department of Healthcare Administration is to develop leaders to improve healthcare through education, research, and service, grounded in the Jesuit values of care for others and social justice.

Our vision is to be a national leader whose graduates are forces for positive change and leaders of teams that meet the challenges and opportunities of healthcare consistent with the highest ethical values.

Our MHA program follows rigorous standards and has aligned our program objectives and outcomes with the following industry-driven competencies:

- Effectively use key accounting principles and financial management tools
- Plan, organize, execute, and monitor the resources of the organization to ensure optimal health outcomes and effective quality and cost controls
- Demonstrate an understanding of system structure, funding mechanisms, and how healthcare services are organized
- Balance the interrelationships among access, quality, safety, cost, resource allocation, accountability, care setting, community need, and professional roles
- Assess the performance of the organization as part of the health system/healthcare services
- Connect the interrelationships among access, quality, cost, resource allocation, accountability, and community need
- Use vital statistics and core health indicators to guide decision-making and analyze health trends of the population to guide the provision of health services
- Analyze problems, promote solutions, and encourage decision making
- Respond to the need for change and lead the change process
- Lead the development of key planning documents, including strategic plans, business services plans, and business cases for new services
- Use data sets to assess performance, establish targets, monitor indicators and trends, and determine if deliverables are met

- Present results of data analysis in a way that is factual, credible, and understandable to the decision-makers
- Collate relevant data and information, and analyze and evaluate this information to support or make an effective decision or recommendation
- Ensure optimal use of information and trend analysis within the organization through the use of business intelligence, information management, clinical, and business systems
- Articulate and communicate the mission, objectives, and priorities of the organization to internal and external entities
- Present results of data analysis in a way that is factual, credible, and understandable to the decision-makers
- Demonstrate problem-solving and problem-solving skills
- Commit to competence, integrity, altruism, and the promotion of the public good
- Demonstrate high ethical conduct, a commitment to transparency and accountability for one's actions
- Use the established ethical structures to resolve ethical issues
- Practice and value transparent shared decision-making and understand its impacts on stakeholders

Elective		3
Students take one Parkinson 400 level course, as long as meeting the pre-requistes, to satisfy the elective requirement. [2]		
Total Hours		**106-109**

[1] Onsite Immersion course.

[2] A full list of 400 level Parkinson courses can be found here (p. 1843).

Credit Hours & Timeline

The two degrees require 152-155 credit hours in total:

- 112 total credit hours for the Bachelor of Science- Less credit hours for the standard BS in HCA (121) because 9 undergraduate credit hours will be replaced by graduate courses. There is 69 credit hours of required classes for the HCA major. The remaining credit hours are university CORE requirements.
- 40-43 for the MHA

BSHCA/MHA students are expected to complete the MHA within 18 months of graduating with the baccalaureate. Completion time for the two degrees is shortened by enrolling in 11 credit hours of graduate coursework in the fall and spring semesters of senior year and waiving the undergraduate healthcare finance course (i.e. HSM 325 Healthcare Fiscal Management) in lieu of a higher level graduate finance course.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Drive operational and performance improvements in healthcare organizations [Undergraduate]
- Manage data to guide effective decision-making in health services organizations [Undergraduate]
- Evaluate industry and organizational dynamics in the healthcare environment [Undergraduate]
- Assess and prioritize population health needs [Undergraduate]
- Apply core business and financial principles to the healthcare environment [Graduate]
- Evaluate industry and organizational dynamics in the healthcare environment [Graduate]
- Assess and prioritize population health needs [Graduate]
- Drive operational and performance improvements in healthcare organizations [Graduate]
- Manage data to guide effective decision-making in health services organizations [Graduate]

- Synthesize theoretical and analytical knowledge, critical thinking, and communication skills to solve problems in healthcare administration [Graduate]
- Integrate values, ethics, and social justice into the management and leadership of health services organizations in keeping with the Jesuit Catholic tradition [Graduate]

Healthcare Administration/Business (BS/MBA)

Designed exclusively for Loyola University Chicago, the Bachelor of Science in Healthcare Administration and Master of Business Administration (MBA) dual-degree program allows students the chance to earn both undergraduate and graduate degrees in a compressed timeframe. An MBA complements your healthcare administration studies, enabling you to become a more knowledgeable and evidence-based decision-maker and leader in the field. It also adds a stronger business element to your coursework, expands your business knowledge, and provides you with in-demand skills.

Curriculum

Students accepted into this program take two graduate-level MBA electives during their spring semester senior year. Students will work with the MBA Program Director to select and enroll in these courses.

BSHCA/MBA students complete the remainder of their **MBA curriculum** within approximately 12 months after their senior year beginning during the summer term directly following graduation.

[1] Students assigned to UCWR 110 Writing Responsibly for spring should take a CORE in the fall

[2] Students assigned to UCWR 110 Writing Responsibly for fall should take a CORE in the spring

[3] PHIL 284 Health Care Ethics or HSM 280 Healthcare Ethics in Practice is a prerequisite to HSM 330 Healthcare Legal & Regulatory Environment.

[4] Statistics (ISSCM 241 Business Statisticsor PSYC 304 Statistics), ECON 201 Principles of Microeconomics and ACCT 201 Introductory Accounting I are prerequisites to FINC 301 Introductory Business Finance.

[5] Business Electives: ECON 329 Health Economics, ENTR 201 Essentials of Entrepreneurship, HRER 301 , or SCMG 232 Introduction to Supply Chain Management.

[6] FINC 301 Introductory Business Finance is a prerequisite to HSM 325 Healthcare Fiscal Management.

[7] Students are strongly encouraged to use program electives toward the following course HSM 210 Introduction to Global Healthcare Delivery.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee.

Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level

course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Healthcare Administration/Public Health (BS/MPH)

Earn both a bachelor's and master's degree in five years.

Build your knowledge in the organization of healthcare administration and public health with this dual degree. As an undergraduate, you will acquire a broad, interdisciplinary healthcare administration knowledge-base drawing on courses in healthcare organization, business, data analysis, ethics, and a rich experiential learning experience. At the master's level, you will become proficient in core public health competencies in the areas of of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking. The Master of Public Health program complements your health care administration studies, enabling you to become a more knowledgeable and evidence-based decision-maker and leader in the field.

MPBH 424	Health Economics and Healthcare Financing	
Management-oriented		
MPBH 422	Population Health Planning & Management	
CMAN 533	Fiscal Management in Health Care Organizations	
Total Hours		**15**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Beyond the health care systems management skills gained in your undergraduate studies, you will graduate with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking.

Hispanic Studies (BA/MA)

The accelerated BA/MA program offers well-qualified Spanish majors an opportunity to earn both a B.A. in Spanish and an M.A. in Hispanic Studies. Select high-performing Spanish majors are invited to join the program, spending a total of five years examining issues of culture, language, and power as they traverse the Hispanic world.

Students in the BA/MA program receive comprehensive training in the languages and cultures of the Hispanic world, increasing their knowledge of diverse, globally relevant issues in literary, cultural, and linguistic studies.

With a focus on social justice, the program fosters intellectual debate, interdisciplinary academic dialogue, and high-level research in areas including social inequality, race, gender, class, and ethnicity. Students graduate equipped to succeed as academic researchers, educators, and in a wide range of other professional roles.

Related Programs

Minor

- Spanish Language Minor (p. 584)
- Spanish Language and Literature Minor (p. 583)

Curriculum

Requirements for the BA Degree in Spanish (30 Hours)

Students are required to take or have credit for the following courses:

Code	Title	Hours
Required Courses		
SPAN 250	Composition & Conversation I	3
SPAN 251	Composition & Conversation II	3
SPAN 270	Introduction to Critical Analysis in Spanish	3
SPAN 271	Introduction to Iberian Literature and Culture	3
or SPAN 272	Introduction to Spanish American Literature and Culture	
Select any six courses at the SPAN 300-level, one of which must be a Latin American topic course and one of which must be an Iberian (Spain) topic course		18
Total Hours		**30**

(10 courses for a total of 30 credit hours)

Requirements for the MA Degree in Spanish (30 Hours)

Students are required to complete:

- ten graduate-level courses
- a two-part comprehensive exam, written and oral
- or nine graduate-level courses and a Masters thesis

The following exceptions apply, and are dependent upon approval of the Graduate Program Director:

- students may transfer up to two graduate-level classes (six credit hours) from another institution toward their LUC degree
- students may take up to two LUC graduate seminars (six credit hours) in another department
- students who have the Graduate Program Director's permission to write a Masters thesis will complete nine courses, or 27 hours of course work, plus the credit-bearing thesis research course, SPAN 501 Thesis Research, for three credit hours (please see the department's Thesis Guidelines)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Schema of how students progress through this program in four and a half or five years by earning 30 hours for the B.A. and 30 hours for the M.A. in Hispanic Studies:

Suggested Sequence of Courses (Completing in 4 ½ Years)

Student enters LUC with credit for SPAN 250 Composition & Conversation I **&** SPAN 251 Composition & Conversation II

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that

indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Acquiring advanced knowledge in the field, producing scholarship that engages in critical thinking, and demonstrating ethical thinking and responsible conduct.

History (BA/MA)

The combined BA and MA degree program in History integrates Loyola University Chicago's (LUC) current History degree programs at the undergraduate and master levels. The program provides the most capable History majors with the opportunity to more efficiently move through two degrees and thereby jump-start their professional development by completing two degrees in five rather than six years. Graduates of this program are well prepared to pursue a PhD in History, to apply to a professional school, or to seek a teaching position at the post-secondary level.

The combined degree is available for only the MA degree in History (not the program for the MA in Public History or the dual degree Public History/MLIS degree with Dominican University).

Related Programs

Major

- History (BA) (p. 503)

Minor

- History Minor (p. 506)

Combined

- History/International Affairs (BA/MA) (p. 1245)

Curriculum

Students in a BA/MA program begin graduate courses during the first semester of their senior year. To complete the program, students will have to earn a total of 30 credit hours during their senior year and graduate career. Twelve of those hours can count towards both the undergraduate major and the graduate degree. No graduate courses will be taken during the freshman, sophomore, or junior years.

Pre-requisites: Students in the combined degree program begin their senior year with 27–30 total credits in their History major, including the successful completion of HIST 299 Historical Methods.

Please note: Only 12 hours at the graduate level can be completed during the senior year. All other graduate courses **must** be taken during the graduate year.

Code	Title	Hours
Introductory (Core) Courses		*6*
Select two courses, one from each of the following categories:		
Tier 1 Foundational Historical Knowledge		
HIST 101	Culture, Power and Identity: Western Ideas & Institutions to 17th Century	
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	
HIST 103	American Pluralism	
HIST 104	Global History Since 1500	
HONR 101	Western Traditions - Antiquity to the Middle Ages	
HONR 102	Western Traditions-Renaissance to Modernity	
Tier 2 Historical Knowledge		
HIST 208	East Asian History: Themes & Issues	
HIST 208X	Pre-Modern Chinese History	
HIST 208Z	Modern Chinese History	
HIST 209	Islamic History: Themes & Issues	
HIST 210	Latin American History: Themes & Issues	
HIST 211	US History to 1865: Themes & Issues	
HIST 212	US History since 1865: Themes & Issues	
HIST 213	African History: Themes & Issues	
Selected Honors Courses: HONR 203A, HONR 203B, HONR 203C, HONR 208A, HONR 208B, HONR 208C, HONR 209A, HONR 209B, HONR 209C, HONR 210A, HONR 210B, HONR 210C, HONR 212A, HONR 212B, HONR 212C

400-Level Minor Field Course II		
400-Level Minor Field Course III		
Elective 1		**3**
400-Level Elective		
Total Hours		**54**

[1] See Undergraduate Course Listings (p. 487) for detailed information about courses.

Additional BA Requirements

Residency Requirements

- At least 6 courses for this major must be successfully completed in residence at Loyola University Chicago.
- At least 4 300-level courses for this major must be successfully completed in residence at Loyola University Chicago.

Portfolio

Every history major must build a portfolio over the course of his/her undergraduate studies. The student must upload the **two required documents** listed below to a History Department website by Friday of the last week of classes prior to graduation. For more information, please contact the History Department Undergraduate Program Director. The required documents are:

1. **A historiographical essay (typically a paper from** HIST 299 Historical Methods**).** This paper must both summarize and evaluate historians' principal arguments about a particular topic.
2. **A 300-level Research Paper with a *bibliography*.** This paper --- a minimum of 12-15 pages, usually from a 300-level course --- makes use of both primary and secondary sources to prove a historical thesis. All good historical writing has a thesis that the author seeks to establish through interpretation of the primary source evidence. In lieu of uploading a 300-level research paper, students have the option of submitting a platform appropriate project such as a public history or digital history project that makes an analytical argument based on both primary and secondary sources to prove a historical thesis.

Students should submit papers that showcase their best work.

Research Tool Requirement

All master's level students must demonstrate competence in a research skill (oral history, public history media, or a reading knowledge of a foreign language, for example) appropriate to their major field. They are expected to master this skill before advancing beyond 18 credit hours. Coursework taken to master a language or for oral history and public history media if used for a research tool does not apply toward graduation.

Examinations

Toward the end of their graduate program, students must pass a take-home written examination in the major field. The student will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the student's examination committee. In addition,

students satisfy the examination requirements in the minor field through earning nine credit hours with at least a B (3.0) average.

Required Areas: Upper-Level Pre-Modern History Courses

Code	Title	Hours
Students must take at least one of the courses below as part of the Required Areas		
HIST 253A	Barbarians and the Fall of the Roman Empire	3

HIST 389B	Topic: Gender, Race, & Class in US History	3
HIST 389C	Gender Benders	3
HIST 389F	The Sixties	3
HIST 389K	Autobiography and Memoir in Recent US History	3
HIST 389N	Anti-Immigrant Politics in U.S. History	3
HIST 389W	Races to the White House: Presidential History	3
ECON 327	American Economic & Business History	3

Suggested Sequence of Courses

There is no set sequence of classes. Students are encouraged to take at least two Introductory (Core) Classes before taking upper division classes. BA/MA students must take HIST 299 prior to enrolling in the program; it is strongly suggested that students take HIST 299 at the end of their sophomore or beginning of their junior year. Once students have declared the History Major, they are encouraged to contact their History Advisor or the History Department's Undergraduate Program Director for further guidance on how best to progress with their studies, including their interest in the BA/MA program in History.

This course distribution reflects a student entering the BA/MA Program on the traditional pathway, i.e., starting in the Fall of the senior year and taking courses in both semesters of the senior year. Students who graduate in the Fall of their senior year or who have a significant amount of transfer credit will have a schedule that reflects their more individualized pathway. They may not, for example, be able to take all 12 of the hours allowed during their senior year and, as a result, their particular degree completion plan may vary from the plan outlined below.

Course	Title	Hours
Freshman		
Fall		
Foundational Historical Knowledge Course		3
	Hours	**3**
Spring		
Tier 2 Historical Knowledge Course		3
	Hours	**3**

500-Level Research Course		3
	Hours	**9**
	Total Hours	**54**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions

may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession.

History/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in History and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in History and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- History (BA) (p. 503)

Combined

- History (BA/MA) (p. 1240)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by

a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
Required BA Courses		
Introductory (Core) Courses		
Select two courses, one from each of the following categories:		6
Tier 1 Foundational Historical Knowledge		
HIST 101	Culture, Power and Identity: Western Ideas & Institutions to 17th Century	
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	
HIST 103	American Pluralism	
HIST 104	Global History Since 1500	
HONR 101	Western Traditions - Antiquity to the Middle Ages	
HONR 102	Western Traditions-Renaissance to Modernity	
Tier 2 Historical Knowledge		
HIST 208	East Asian History: Themes & Issues	
HIST 208X	Pre-Modern Chinese History	
HIST 208Z	Modern Chinese History	
HIST 209	Islamic History: Themes & Issues	
HIST 210	Latin American History: Themes & Issues	
HIST 211	US History to 1865: Themes & Issues	
HIST 212	US History since 1865: Themes & Issues	
HIST 213	African History: Themes & Issues	
Selected Honors Courses: HONR 203A, HONR 203B, HONR 203C, HONR 208A, HONR 208B, HONR 208C, HONR 209A, HONR 209B, HONR 209C, HONR 210A, HONR 210B, HONR 210C, HONR 212A, HONR 212B, HONR 212C		
Methods Courses		
Select one of the following:		3
HIST 299	Historical Methods [1]	
INDS 380	Newberry Seminar [2]	
Required Areas		
Select four Upper-Level Courses, one from each of the following:		12
Upper-Level Pre-Modern History (p. 1247) (see course list below)		
Upper-Level Modern European History (p. 1247) (see course list below)		
Upper-Level U.S. History (p. 1247) (see course list below)		
Upper-Level World History (p. 1247) (see course list below)		
Elective Courses [3]		
Select any history courses at any level: [4]		15
HIST 101 - HIST 399 [5]		
CLST 362	Roman Law	
ECON 327	American Economic & Business History	
THEO 317	Christian Thought: Ancient-Medieval	
THEO 318	Christian Thought: Reformation to Modern	
Selected Honors Classes: HONR 101, HONR 102, HONR 203A, HONR 203B, HONR 203C, HONR 208A, HONR 208B, HONR 208C, HONR 209A, HONR 209B, HONR 209C, HONR 210A, HONR 210B, HONR 210C, HONR 212A, HONR 212B, HONR 212C		
Required MA Courses		
CORE		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1248) [3]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**60**

1. To register for HIST 299 Historical Methods Historical Methods, please contact the History Department Administrative Assistant.
2. For information on the Newberry Seminar, please contact the Dr. Shermer at eshermer@luc.edu.
3. Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.
4. One of which can be HIST 398 History Internship.
5. Any 100-level, 200-level, or 300-level history course can count toward the electives if not used for another requirement in the major.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Additional BA Requirements

Residency Requirements

- At least 6 courses for this major must be successfully completed in residence at Loyola University Chicago.
- At least 4 300-level courses for this major must be successfully completed in residence at Loyola University Chicago.

Portfolio

Every history major must build a portfolio over the course of his/her undergraduate studies. The student must upload the **two required documents** listed below to a History Department website by Friday of the last week of classes prior to graduation. For more information, please contact the History Department Undergraduate Program Director. The required documents are:

1. **A historiographical essay (typically a paper from** HIST 299 Historical Methods**).** This paper must both summarize and evaluate historians' principal arguments about a particular topic.
2. **A 300-level Research Paper with a *bibliography*.** This paper --- a minimum of 12-15 pages, usually from a 300-level course --- makes use of both primary and secondary sources to prove a historical thesis. All good historical writing has a thesis that the author seeks to establish through interpretation of the primary source evidence. In lieu of uploading a 300-level research paper, students have the option of submitting a platform appropriate project such as a public history

or digital history project that makes an analytical argument based on both primary and secondary sources to prove a historical thesis.

Students should submit papers that showcase their best work.

BA Required Areas

Students must take at least one of the course from each of the BA Required Areas.

Upper-Level Pre-Modern History Courses

Code	Title	Hours
HIST 253A	Barbarians and the Fall of the Roman Empire	3
HIST 254A	The Vikings	3

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. For the History BA, we strongly recommend that students take HIST 299 as a second-semester sophomore or first-semester junior. For the MA, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the

Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Produce analytical arguments by using evidence and facts to interpret past events, behavior and processes in their own historical writing and projects. [History]
- Identify the arguments put forth by historians in order to compare, evaluate and criticize different interpretations of the past. In doing so, our graduates will be able to evaluate the adequacy of evidence (including a variety of sources: documents, films, diaries, images, oral and digital histories, etc.) that historians use to make truth claims about the past. [History]
- Demonstrate an understanding of the processes of historical change and be able to discuss and evaluate causes, complexities and consequences of change over time in relationship to historical events and processes. [History]
- Demonstrate an understanding that human values and beliefs are shaped by historical context and they will gain the capacity to make informed judgements about past and present behavior and ideas with a goal of fashioning a more just world. In this endeavor, students will gain an understanding of the ethical practices and standards for historical research and writing. [History]

Information Technology (BA/MS)

The BA/MS Information Technology program is an accelerated program giving students the opportunity to pursue admission to and begin classes for the MS Information Technology while an undergraduate student. This program reduces the total number of courses needed and the total time needed for the combined degrees. The BA is awarded by the School of Continuing and Professional Studies and the MS by The Graduate School.

Additional Requirements fo the BA/MS Program

Students in the BA/MS program are permitted to take up to 9 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. If you have general elective hours to satisfy for your undergraduate degree, your 400-level courses can be courses taken in addition to your undergraduate major courses. Additionally, there are three 400-level courses that can be applied both toward your BA and MS Information Technology program requirements:

- COMP 477 IT Project Management
- COMP 422 Software Development for Wireless and Mobile Devices
- COMP 417 Social and Ethical Issues in Computing

The following are required to complete the BA/MS dual degree program:

- Successful completion of the BA Information Technology within the School of Continuing & Professional Studies.
- 30 credit hours of 400-level graduate courses, including those counted while an undergraduate, completed with a GPA of 3.0 or higher.

Please note only 400-level courses will apply toward graduate requirements. Additionally, a student with credit for a 300-level COMP course that has an equivalent 400-level COMP course may not take the 400-level course for separate credit. Example: COMP 317 and COMP 417 are equivalent courses and credit can only be earned once.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Students in the BA/MS program are permitted to take up to 9 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. There are three 400-level courses that can be applied both toward your BA and MS Information Technology program requirements and these are listed below.

If you have general elective hours to satisfy for your undergraduate degree, your 400-level courses can be courses taken in addition to your undergraduate major courses and not have overlap with your major requirements.

- COMP 477 IT Project Management (satisfies CPST 349 IT major requirement)
- COMP 422 Software Development for Wireless and Mobile Devices (satisfies CPST 342 IT major requirement)
- COMP 417 Social and Ethical Issues in Computing (satisfies COMP 317 IT major requirement)

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level

courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will be able to:

- Demonstrate a high level of proficiency in making informed and strategic decisions, applying quantitative analysis, and implementing project management strategies to effectively impact organizational goals. [BA Information Technology]
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions. [BA Information Technology]
- Apply foundational knowledge of IT systems, computer networking, and security, including cloud computing concepts, TCP/IP model, packet-based networking, wireless networking, and cybersecurity principles. [BA Information Technology]
- Organize data in ways to emphasize relationships to elicit information from a database that allows data to be mined, visualized and graphically display via web interfaces. [BA Information Technology]
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections. [BA Information Technology]
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language. [BA Information Technology]
- Students in the MS Information Technology program will gain familiarity with the broad outlines of computer technology and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Information Technology (BS/MS)

The BS/MS programs in Information Technology, Software Engineering, and Computer Science are five-year programs that give academically successful Loyola undergraduates the opportunity to pursue the MS degree in Information Technology, Software Engineering, or Computer

Science while completing their BS degree. The applicant can be pursuing any of the BS degrees offered by the Department of Computer Science, including the joint majors with Mathematics or Physics or the interdisciplinary Bioinformatics.

These programs reduce the total number of courses needed and the total time needed for the combined degrees. Specifically, students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses towards both their BS and MS degrees. Each double-counted course must be a 400-level course taken in the student's senior year in place of a corresponding 300-level course. This leaves a total of 21 credits (seven courses) to be taken after completion of the Bachelors' degree.

Students may not automatically enroll in the BS/MS program during Freshman admission. They must specifically apply to the Graduate School, generally in their Junior year by using The Graduate Application Form (https://gpem.luc.edu/apply/). See Application Requirements (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-requirements) and Application Information (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-information) for more details.

Related Programs

Combined

- Computer Science (BS/MS) (p. 1068)
- Software Engineering (BS/MS) (p. 1368)

CURRICULUM

The stand-alone MS programs each require 30 credits of graduate courses. This generally takes one and a half years to complete. BS/MS students must also take 30 credits of courses at the 400 level or greater. The main advantages come from the fact that some of the MS courses may be double-counted, applying to the BS also, and there can be a shift in some of the required MS courses based on what students took in the BS portion. In particular students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses for both their BS and MS degrees. Each must be a 400 level course taken in the student's senior year *in place* of a 300 level major course. Also, a student wishing to take 123 or more credits while an undergraduate, can have 3 of the extra credits be for a fourth 400 level COMP course, and count that toward the MS if the extra course is needed for *no* undergraduate requirement, from the university, college, core, major or minor. Hence a BS/MS student with 120 credits and 9 400-level COMP credits counted for the BS is required to take only 21 credits (instead of 30 credits) of additional 400-level courses. If a student takes a further 3-credit 400 level COMP course beyond the 120 credits needed for the BS, then only 18 further credits are needed. In either case, students can finish the program in five years.

Code	Title	Hours
Major Requirements		
Select one of the following:		3
STAT 103	Fundamentals of Statistics	
STAT 203	Introduction to Probability & Statistics	
ISSCM 241	Business Statistics

Six (6) COMP Graduate-Level Electives [7]		18
Total Hours		**70**

[1] See the details of registering in the links for each course. Students are encouraged to complete these credits during junior and senior years to draw on prior experience. Note:

- COMP 312 is a 3-credit course
- COMP 390 is limited to 3 total credits
- COMP 391 and COMP 398 will usually be limited to 6 total credits each, but permission may sometimes be granted for more.

[2] Note that some COMP 300-level electives have a prereq of COMP 271 Data Structures I or higher, and MGMT and ENTR courses also have prereqs.

[3] You must take COMP 264 or COMP 271 as part of the Major requirements. The second one can be used as an elective if taken.

[4] MGMT 201 Managing People and Organizations plus ACCT 201 Introductory Accounting I may count in place of 3 credits of major electives, only if ISSCM 349 Project Management is completed to also count toward this major.

[5] This course can be substituted with another graduate course at the discretion of Graduate Program Director if students had the equivalent in their undergraduate program.

[6] Courses can be substituted at the discretion of the Graduate Program Director. Substitutions will usually be limited to special-topics courses (COMP 488 Computer Science Topics) which have learning outcomes closely related to other courses in the track in question.

[7] Electives can be any COMP 400 level class (p. 1576), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship. You can go here (p. 1576) for a list of COMP 400-level course descriptions.

Complete MS Requirements in consultation with the Graduate Program Director.	21
Hours	**21**
Total Hours	**143**

Additional Rules of the BS/MS Program

1. All students need to take COMP 271 Data Structures I as part of their undergraduate major.
2. Students pursuing an MS in Software Engineering or Computer Science must take COMP 313 Object-Oriented Design by their senior year.
3. Students may take at most 6 credits total of internship at the undergraduate and graduate level, COMP 391 Internship in Computer Science plus COMP 499 Internship.
4. A student with credit for a 300 level COMP course that was taught in a combined class with a 400 level course may not take the 400 level course later for separate credit without permission from the Graduate Program Director. In particular for students with credit for COMP 317 Social, Legal, and Ethical Issues in Computing, the MS requirement for COMP 417 Social and Ethical Issues in Computing is waived, to be replaced by 3 MS elective credits. Similarly, in programs requiring COMP 413 Intermediate Object-Oriented Development, COMP 313 Object-Oriented Design will satisfy the requirement, but still, the course will need to be replaced by 3 MS elective credits.
5. In MS programs with restricted electives lists with two or more courses required from a larger explicit list, one of the courses may be waived if the corresponding 300 level undergraduate course was successfully completed at Loyola. The course must still be replaced by a 3-credit MS program elective.
6. All further individual MS program requirements must be met with the inclusion of the allowed 400 level courses taken as an undergraduate.

Requirements for Completion of the BS/MS Program

After admission to the BS/MS program, a student may request to be registered in their senior year for up to four 400 level COMP courses, with three of them replacing undergraduate major courses, and a fourth *if* the student will graduate with at least 123 credits and not need the fourth course as a part of *any* undergraduate requirement. Students generally take the remainder of their 30 credits of 400-level MS classes during their fifth year. This schedule can be modified for students with AP or transfer credit who desire to finish the combined program in less than five years. Students in the program are expected to consult regularly with the Graduate Program Director to ensure that they are on track for completion of both the BS and MS degrees. The following are required to complete a BS/MS degree program:

- Successful completion of one of the BS degrees in the Department of Computer Science or Bioinformatics or a joint major with Mathematics or Physics
- The 400-level graduate courses, excluding those counted while an undergraduate, completed with a GPA of 3.0 or higher

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate

major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while

in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will gain familiarity with the broad outlines of computer technology, and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Information Technology/Computer Science (BA/MS)

The Information Technology (BA)/Computer Science (MS) program is an accelerated program giving students the opportunity to pursue admission to and begin classes for the M.S. while an undergraduate student. This program reduces the total number of courses needed and the total time needed for the combined degrees.

Additional Requirements fo the BA/MS Program

Students in the BA/MS program are permitted to take up to 9 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. If you have

general elective hours to satisfy for your undergraduate degree, your 400-level courses can be courses taken in addition to your undergraduate major courses. Additionally, there are three 400-level courses that can be applied both toward your BA and MS Information Technology program requirements:

- COMP 477 IT Project Management
- COMP 422 Software Development for Wireless and Mobile Devices
- COMP 417 Social and Ethical Issues in Computing

The following are required to complete the BA/MS dual degree program:

- Successful completion of the BA Information Technology within the School of Continuing & Professional Studies.
- 30 credit hours of 400-level graduate courses, including those counted while an undergraduate, completed with a GPA of 3.0 or higher.

Please note only 400-level courses will apply toward graduate requirements. Additionally, a student with credit for a 300-level COMP course that has an equivalent 400-level COMP course may not take the 400-level course for separate credit. Example: COMP 317 and COMP 417 are equivalent courses and credit can only be earned once.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Students in the BA/MS program are permitted to take up to 9 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. There are three 400-level courses that can be applied both toward your BA and MS Information Technology program requirements and these are listed below.

If you have general elective hours to satisfy for your undergraduate degree, your 400-level courses can be courses taken in addition to your undergraduate major courses and not have overlap with your major requirements.

- COMP 477 IT Project Management (satisfies CPST 349 IT major requirement)
- COMP 422 Software Development for Wireless and Mobile Devices (satisfies CPST 342 IT major requirement)
- COMP 417 Social and Ethical Issues in Computing (satisfies COMP 317 IT major requirement)

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will be able to:

- Demonstrate a high level of proficiency in making informed and strategic decisions, applying quantitative analysis, and implementing project management strategies to effectively impact organizational goals. [BA Information Technology]
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions. [BA Information Technology]
- Apply foundational knowledge of IT systems, computer networking, and security, including cloud computing concepts, TCP/IP model, packet-based networking, wireless networking, and cybersecurity principles. [BA Information Technology]
- Organize data in ways to emphasize relationships to elicit information from a database that allows data to be mined, visualized and graphically display via web interfaces. [BA Information Technology]
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections. [BA Information Technology]
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language. [BA Information Technology]

- Students in the MS Computer Science program will gain familiarity with the broad outlines of computer technology and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Information Technology/Information Technology Leadership and Strategy (BA/MPS)

The accelerated BA Information Technology (BA IT)/MPS IT Leadership and Strategy program is an online program that gives academically successful Loyola SCPS BA IT majors the opportunity to pursue the MPS degree in IT Leadership and Strategy while completing their BA degree. This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA IT program to take four of the courses from the MPS IT Leadership and Strategy in their senior year. These courses will be taken as both major and elective course and will count toward the degree requirements for both programs.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Three of the MPS courses will be taken during the students' senior year as an undergraduate: COMP 477 IT Project Management, COMP 417 Social and Ethical Issues in Computing, and ITLS 445 Introduction to IT: Networking, Cloud & Security.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language. [Information Technology]
- Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies. [Information Technology Leadership and Strategy]
- Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework. [Information Technology Leadership and Strategy]
- Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success. [Information Technology Leadership and Strategy]
- Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies. [Information Technology Leadership and Strategy]

Information Technology/Instructional Design (BA/MPS)

The BA Information Technology (BA IT)/MPS Instructional Design program is an accelerated, online program that gives academically successful Loyola SCPS BA IT majors the opportunity to pursue the MPS degree in Instructional Design while completing their BA degree.

This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA IT program to take four of the courses from the MPS Instructional Design in their senior year. These courses will be taken as elective course and will count toward the degree requirements for both programs.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional

master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate a high level of proficiency in making informed and strategic decisions, applying quantitative analysis, and implementing project management strategies to effectively impact organizational goals. [Information Technology]
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions. [Information Technology]
- Apply foundational knowledge of IT systems, computer networking, and security, including cloud computing concepts, TCP/IP model, packet-based networking, wireless networking, and cybersecurity principles. [Information Technology]
- Organize data in ways to emphasize relationships to elicit information from a database that allows data to be mined, visualized and graphically display via web interfaces. [Information Technology]
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections. [Information Technology]
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language. [Information Technology]
- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences. [Instructional Design]
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials. [Instructional Design]
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues. [Instructional Design]
- Conduct research and predictive data set analysis to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices and performance gaps in an organization. [Instructional Design]

Management/Information Technology Leadership and Strategy (BA/MPS)

The BA-Management/ MPS IT Leadership and Strategy program is an accelerated, online program that gives academically successful Loyola SCPS BA-Management majors the opportunity to pursue the MPS degree in IT Leadership and Strategy while completing their BA degree. This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/ master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA- Management program to take four of the courses from the MPS IT Leadership and Strategy in their senior year. These courses will be taken as both major and elective course and will count toward the degree requirements for both programs.

Related Programs

Major

- Management (BA) (p. 863)

Curriculum

Up to 12 credit hours can be shared between the undergraduate and graduate degree. During the students' senior year, the graduate-level Project Management course COMP 477 IT Project Management will count toward the major requirements, in lieu of the undergraduate course CPST 349 Project Management. The other graduate courses will be taken as electives during the students' senior year.

Code	Title	Hours
BA Requirements

Suggested Sequence of Course

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

During the students' senior year, the graduate-level Project Management course COMP 477 IT Project Management will count toward the major requirements, in lieu of the undergraduate course CPST 349 Project Management.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate effective business communication in written narratives, memos, argumentative narratives, oral presentations, and collaborative documents. [Management]
- Develop productive team processes, team building, and leadership skills through self-assessment exercises, reflection activities, role playing and critical thinking assignments. [Management]
- Analyze organizational theory, structure, power dynamics and culture in persuasive written documents and oral presentations. [Management]
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements. [Management]
- Creatively solve business problems as evidenced by project management simulations, strategic decision making, and quantitative analysis and effective use of business analytics. [Management]
- Apply an understanding of law and regulation to business processes as evidenced by course assignments. [Management]
- Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies. [Information Technology Leadership and Strategy]
- Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework. [Information Technology Leadership and Strategy]
- Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success. [Information Technology Leadership and Strategy]
- Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies. [Information Technology Leadership and Strategy]

Management/Instructional Design (BA/MPS)

The Management/Instructional Design (BA/MPS) program is an accelerated, online program that gives students the opportunity to pursue admission to and begin classes for the MPS degree in Instructional Design while still working toward the completion of their BA degree. This program will allow students in the BA Management program to take four of the courses from the MPS Instructional Design program in their senior/final year. A career in Instructional Design can be attractive to BA Management students as it builds upon the curriculum of the Management degree such as project management, HR, and communications. Instructional design will help define a career path and provide relevant skills and knowledge for managers, trainers, and HR personnel who deliver training and instruction.

Related Programs

Major

- Management (BBA) (p. 783)

Minor

- Management Minor (p. 785)

Curriculum

Students may take up to 12 credit hours of 400 level courses required for the MPS Instructional Design while an undergraduate student. The four graduate courses, taken during the students' senior year will count toward the degree requirements for both the undergraduate and graduate degree.

They will be considered general elective hours counting toward the 120 credit hours needed for the undergraduate degree and count toward the 30 credit hour MPS degree requirements. With four courses double-counting, the total credit hours needed for both of the degrees will be reduced by 12 credit hours, for a total of 138 credit hours across both programs.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the

Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

The Management (BA) degree program offers adult learners training in business principles, ethical leadership, critical thinking and strategic planning. Students will be prepared for professional advancement in organization communications, community relations and project management.

The Master of Professional Studies (MPS) in Instructional Design will prepare students to become generalist instructional designers who are equipped to work in a variety of fields and professional settings, including both education and business environments. This fully online and application-oriented master's degree will provide a strong foundation in instructional design as well as the tools and perspective needed for flexible career paths and continuing professional development in the field. It provides a breadth of foundational knowledge and skills in different areas, rather than a focus on a narrower area of specialization within the field, such as learning technologies. It will prepare instructional designers to work with technical specialists as well as subject matter experts and allow them to develop more specialized interests as they grow in their profession.

Upon degree completion, graduates will be able to:

- Demonstrate effective business communication in written narratives, memos, argumentative narratives, oral presentations, and collaborative documents. [BA]
- Develop productive team processes, team building, and leadership skills through self-assessment exercises, reflection activities, role playing and critical thinking assignments. [BA]
- Analyze organizational theory, structure, power dynamics and culture in persuasive written documents and oral presentations. [BA]
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements. [BA]
- Creatively solve business problems as evidenced by project management simulations, strategic decision making, and quantitative analysis. [BA]
- Apply an understanding of law and regulation to business processes as evidenced by course assignments. [BA]
- Utilize instructional design processes and appropriate theoretical approaches to design effective and innovative learning experiences. [MPS]
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials. [MPS]
- Adapt instructional design processes to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc.) [MPS]
- Manage the iterative lifecycle of instructional design projects progressing from conception to implementation to revision. [MPS]
- Apply culturally responsive and ethical practices that engage diverse communities and promote social justice. [MPS]
- Conduct research designed to inform practice and stay abreast of emerging trends in the field of instructional design. [MPS]

- Build collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) in support of meeting organizational needs. [MPS]

Management/Public Service Leadership (BA/MA)

The Management/Public Service Leadership BA/MA program is an accelerated, online program that gives academically successful Loyola SCPS BA Management majors the opportunity to pursue the MA degree in Public Service Leadership while completing their BA degree.

Related Programs

Combined

- Management/Information Technology Leadership and Strategy (BA/MPS) (p. 1267)
- Management/Instructional Design (BA/MPS) (p. 1270)

Curriculum

Up to 12 credit hours taken at the 400 level can be shared between the undergraduate and graduate degree. These credits fulfill general electives for the 120 credits needed for the bachelor's degree.

[1] These courses are eligible for waiver to Loyola's Quinlan School of Business M.B.A. program. Final approval of waivers are determined by a Quinlan academic advisor upon admission to the graduate program.

[2] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

BA Management students admitted to the MA program should start with PSLD 400 Introduction to Public Service.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee.

Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level

course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate effective business communication in written narratives, memos, argumentative narratives, oral presentations, and collaborative documents. [Management]
- Develop productive team processes, team building, and leadership skills through self-assessment exercises, reflection activities, role playing and critical thinking assignments. [Management]
- Analyze organizational theory, structure, power dynamics and culture in persuasive written documents and oral presentations. [Management]
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements. [Management]
- Creatively solve business problems as evidenced by project management simulations, strategic decision making, and quantitative analysis and effective use of business analytics. [Management]
- Apply an understanding of law and regulation to business processes as evidenced by course assignments. [Management]
- Describe components and levels of leadership across public sectors. [Public Service Leadership]
- Apply ethical reasoning to administrative design and decision-making in the current realm of public service leadership. [Public Service Leadership]
- Analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted. [Public Service Leadership]
- Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression. [Public Service Leadership]
- Collect and apply data in problem identification and problem solving. [Public Service Leadership]
- Differentiate between non-crisis leadership and leadership in emergencies among public, social and economic sectors. [Public Service Leadership]
- Apply fundamentals of communication appropriate to situation in both local and global situations. [Public Service Leadership]

Mathematics (BS/MS)

The accelerated BS/MS program in Mathematics gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Mathematics while completing their BS degree. This is best suited for students pursuing a BS in mathematics, but can be pursued with other BS degrees (http://www.luc.edu/math/undergradprogs.shtml/) offered by the Department of Mathematics and Statistics at the program director's discretion.

There are several advantages to pursuing the BS/MS program. Chief among them are time and cost: by taking graduate courses during their senior year (at the undergraduate tuition rate), students in the BS/MS program save one semester over the usual path to a Master's degree. Additionally, students in the STEM fields holding an MS degree are more competitive for jobs.

STEM DESIGNATION

The MS in Mathematics has been granted a STEM designation from the U.S. Department of Homeland Security. International students completing degrees with this designation can qualify for extended OPT (Optional Practical Training), bringing the total OPT time granted to 36 months.

Related Programs

Master's

- Applied Statistics (MS) (p. 1622)
- Data Science (MS) (p. 1596)
- Mathematics (MS) (p. 1623)

Combined

- Mathematics/Applied Statistics (BS/MS) (p. 1279)

Curriculum

Students in the BS/MS program are permitted to take up to 10 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. Of these, nine credits may come 400-level courses that have 300-level equivalents that satisfy BS program requirements. The one-credit course MATH 401 should also be taken during the student's undergraduate career. (While it does not fulfill any specific Mathematics BS program requirement, it does count towards the credit-hours requirement for a degree from the College of Arts & Sciences.)

The coursework includes required ("foundational") courses in algebra, analysis and statistics, as well as 18 credit hours of electives, chosen from courses in Mathematics and cognate fields (such as Applied Statistics, Data Science and Computer Science). With their practicum, students design and independently carry out a research project under faculty supervision.

Select four approved 400-level Electives in Mathematics or Statistics [5]		12
Total Hours		**72**

1. This BS degree has waivers for both Quantitative and Scientific core.
2. Graduate MATH 400+ courses can also count towards this. This means students have the opportunity to concurrently fulfill elective requirements for both the Bachelor's and Master's part of the program by selecting MATH 400+ elective courses.
3. Students who select MATH 404/STAT 404 as a Foundational Course may opt to take STAT 408 as a Depth Course, and vice versa.
4. The depth requirement for Cognate Fields may be fulfilled by other courses, including courses from other departments, with approval of Graduate Program Director.
5. Approved elective courses should be selected with advice of Graduate Program Director to complement student's previous learning and support future plans.

Interested students should reach out to the Graduate Program Director in their sophomore year (or early junior year) to optimize course selection for their remaining semesters.

Eligibility Requirements

- 3.5 minimum GPA, in major-program coursework: MATH 161, MATH 162, MATH 263, MATH 201, and three courses (9 credits total) chosen from MATH 212 and 300-level math/stat courses
- 3.3 minimum GPA, across all Loyola coursework
- Satisfactory progress towards completion of Loyola's core

Program Policies

- **AP Credit Policies**
- No 300-level courses will apply toward graduate requirements.
- A student with credit for a 300-level MATH/STAT/COMP course that has an equivalent 400-level offering may not take the 400-level course for separate credit.
- Additional MS policies appear below.

MS Policies

- At most three 400-level courses (nine credits) outside the MATH designation will be counted for the MS program.
- At most six credits of independent study (MATH 498) or research (MATH 495) will be counted for the program.
- Course selection for all 400-level electives should be made in consultation with the Graduate Program Director

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their undergraduate and graduate program advisors for assistance with course selection.

Important Note: what follows is *one choice*, of **many,** for selection of three 400-level courses to take during one's senior year.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/

Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

Graduates of the BS/MS in Mathematics Program will:

- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation;
- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines;
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries;
- receive training on how to act responsibly and ethically within the discipline.

Mathematics/Applied Statistics (BS/MS)

The Accelerated Bachelor's Master's program allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate programs. They are able to finish the program in only one additional year by double counting up to 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

MS Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Suggested Sequence of Courses

Note: This is only one possibility. Among other things, depending on initial math placement, which can range from MATH 100 to MATH 263, the schedule will look very different. Especially for students starting at MATH 161 or above, there is a lot of space to pursue a minor or even a second major.

Course	Title	Hours
Year 1		
Fall		
MATH 161	Calculus I	4

400-level math class		
	Hours	**3**
Year 5		
Students take remainder of MS courses in consultation with the Graduate Program Director.		24
	Hours	**24**
	Total Hours	**75**

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions

process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while

in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences. [Mathematics]
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving, the abstraction to general principles from specific examples, and the ability to use formal mathematical language. Students will be able to apply these skills in a variety of contexts. [Mathematics]
- Students will be fluent in the traditional mathematical subjects such as abstract algebra and real analysis. They will be able to use the methods and terminology in these field to read and write formal, logical proofs, and to communicate these both in writing and verbally. [Mathematics]
- Students will understand how different sub-disciplines of mathematics fit together. They will be able to use their knowledge in a variety of modern applications, both within math and in related disciplines such as science, engineering and tech. They will also be able to place these in a historical context. [Mathematics]
- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model. [Applied Statistics]
- Received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference. [Applied Statistics]
- Worked with data from application fields such as public/global health, medical, industrial and environmental research. [Applied Statistics]
- Received training to ethically apply statistical training in the real world. [Applied Statistics]
- Obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class. [Applied Statistics]
- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [Applied Statistics]

Mathematics and Computer Science/ Applied Statistics (BS/MS)

The Accelerated Bachelor's Master's program allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate programs. They are able to finish the program in only one additional year by double counting up to 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [Applied Statistics]

Mathematics and Computer Science/ Mathematics (BS/MS)

The accelerated BS/MS program gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Mathematics while completing their BS degree. The B.S. in Mathematics and Computer Science provides students with a strong foundation in both fields. Core courses from the Mathematics and Computer Science curricula will aid students to develop critical thinking and communication skills, as well as a technical and practical understanding of programming and algorithm design. Graduating students will be prepared for any industry jobs requiring scientific computing skills and the ability to analyze, design, and implement algorithms, such as data mining, finance, and risk analysis. This major also prepares students for advanced degrees in computer science, mathematics, and the STEM fields.

There are several advantages to pursuing the BS/MS program. Chief among them are time and cost: by taking graduate courses during their senior year (at the undergraduate tuition rate), students in the BS/MS program save one semester over the usual path to a Master's degree. Additionally, students in the STEM fields holding an MS degree are more competitive for jobs.

- Mathematics and Computer Science (BS) (p. 534)

Combined

- Mathematics and Computer Science/Applied Statistics (BS/MS) (p. 1282)

Curriculum

The following are required to complete this accelerated bachelor's/master's program:

- Successful completion of the Mathematics and Computer Science BS, within the College of Arts & Sciences.
- Successful completion of the 30-credit Mathematics MS degree with a GPA of 3.0 or higher.

Students in the BS/MS program are permitted to take up to 10 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. Of these, nine credits may come 400-level courses that have 300-level equivalents that satisfy BS program requirements. The one-credit course MATH 401 should also be taken during the student's undergraduate career. (While it does not fulfill any specific undergraduate program requirement, it does count towards the credit-hours requirement for a degree from the College of Arts & Sciences.)

Total Hours		**90**

[1] Students who select MATH 404/STAT 404 in Foundational Courses may opt to take STAT 408 as a Depth Course, and vice versa.

[2] Approved elective courses should be selected with advice of Graduate Program Director to complement student's previous learning and support future plans.

The BS degree has a waiver for the Quantitative core.

Further Information

Interested students should reach out to the Graduate Program Director in their sophomore year (or early junior year) to optimize course selection for their remaining semesters.

Eligibility Requirements

- 3.5 minimum GPA, in major-program coursework: MATH 161, MATH 162, MATH 263, MATH 201, and three courses (9 credits total) chosen from MATH 212 and 300-level math/stat courses
- 3.3 minimum GPA, across all Loyola coursework
- Satisfactory progress towards completion of Loyola's core

Program Policies

- AP Credit Policies (p. 520)
- No 300-level courses will apply toward graduate requirements.
- A student with credit for a 300-level MATH/STAT/COMP course that has an equivalent 400-level offering may not take the 400-level course for separate credit.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of the mathematics and computer science disciplines. These include calculus, linear algebra, and differential equations, statistics, modern computer programming. [BS]
- Students will acquire analytical and logical skills in the mathematical and computer sciences. These skills will enable problem solving, the abstraction to general principles from specific examples as well as the ability to design, implement, and evaluate a computational system to meet a given set of requirements. [BS]
- Students will understand traditional mathematical subjects such as abstract algebra and real analysis. They will be able to use the methods and terminology in these fields to read and write formal, logical proofs, and to communicate these both in writing and verbally. [BS]
- Students will understand the design and analysis of computer algorithms. Students will be exposed to a variety of modern topics which heavily rely on these algorithms and other knowledge of computer science. [BS]
- Students will understand how different sub-disciplines of mathematics and different topics learned in computer science fit together. They will be able to use their knowledge in a variety of modern applications. [BS]
- Graduates will be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation [MS]
- Graduates will have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines [MS]
- Graduates will receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries [MS]
- Graduates will receive training on how to act responsibly and ethically within the discipline [MS]

Mathematics - Education Track/ Applied Statistics (BS/MS)

The Accelerated Bachelor's Master's program allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate programs. They are able to finish the program in only one additional year by double counting up to 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences. [BS]
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving, the abstraction to general principles from specific examples, and the ability to use formal mathematical language. Students will be able to apply these skills in written and verbal communication. [BS]
- Students will be exposed to the traditional areas of classical geometry and abstract algebra. They will be able to use the methods and terminology in these fields to understand the role of definitions, axioms and theorems that underlie all mathematical ideas. Students will be exposed to the history of mathematical thought across diverse cultures. [BS]
- Students will obtain an advanced perspective on a variety of mathematical topics and see how these can be generalized and employed in real world problems relevant to the high school curriculum. [BS]
- Students will acquire basic knowledge of the teaching and education profession. Students will be prepared to utilize a variety of teaching techniques to positively influence student learning and success. [BS]

- Students are expected to have mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model. [MS]
- Students are expected to have received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference. [MS]
- Students are expected to have worked with data from application fields such as public/global health, medical, industrial and environmental research. [MS]
- Students are expected to have received training to ethically apply statistical training in the real world. [MS]
- Students are expected to have obtained hands-on experience and assimilated course material via our 2 credit hour Statistical Consulting capstone/practicum class. [MS]
- Students are expected to have sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [MS]

Mathematics - Education Track/ Mathematics (BS/MS)

The accelerated BS/MS program gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Mathematics while completing their BS degree. The BS in Mathematics - Education Track, coupled with a **Major in Secondary Education** or with a **Master's Degree in Education (p. 869),** prepares students for a career in teaching secondary school mathematics.

There are several advantages to pursuing the BS/MS program. Chief among them are time and cost: by taking graduate courses during their senior year (at the undergraduate tuition rate), students in the BS/MS program save one semester over the usual path to a Master's degree. Additionally, students in the STEM fields holding an MS degree are more competitive for jobs.

- Mathematics - Education Track (BS) (p. 533)

Combined

- Mathematics (BS/MS) (p. 1275)
- Mathematics - Education Track/Applied Statistics (BS/MS) (p. 1287)

Curriculum

The following are required to complete this accelerated bachelor's/master's program:

- Successful completion of the Mathematics - Education Track BS, within the College of Arts & Sciences.
- Successful completion of the 30-credit Mathematics MS degree with a GPA of 3.0 or higher.

Students in the BS/MS program are permitted to take up to 10 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. Of these, nine credits may come 400-level courses that have 300-level equivalents that satisfy BS program requirements. The one-credit course MATH 401 should also be taken during the student's undergraduate career. (While it does not fulfill any specific undergraduate program requirement, it does count towards the credit-hours requirement for a degree from the College of Arts & Sciences.)

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences. [BS]
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving, the abstraction to general principles from specific examples, and the ability to use formal mathematical language. Students will be able to apply these skills in written and verbal communication. [BS]
- Students will be exposed to the traditional areas of classical geometry and abstract algebra. They will be able to use the methods and terminology in these fields to understand the role of definitions, axioms and theorems that underlie all mathematical ideas. Students will be exposed to the history of mathematical thought across diverse cultures. [BS]
- Students will obtain an advanced perspective on a variety of mathematical topics and see how these can be generalized and employed in real world problems relevant to the high school curriculum. [BS]
- Students will acquire basic knowledge of the teaching and education profession. Students will be prepared to utilize a variety of teaching techniques to positively influence student learning and success. [BS]
- Students will be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation [MS]
- Students will have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines [MS]
- Students will receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries [MS]
- Students will receive training on how to act responsibly and ethically within the discipline [MS]

Multimedia Journalism/ Environmental Science and Sustainability (BA/MS)

Loyola's School of Communication, in partnership with the School of Environmental Sustainability, offers a program that enables students to earn an undergraduate and graduate degree in environmental communication in five years.

The Accelerated Bachelor's to Master's program allows SOC students to earn their undergraduate degree in their declared major, plus a master's degree in Environmental Science and Sustainability.

Similarly, SES students can earn their undergraduate degree in their declared major, while also earning a master's degree from the SOC in either the Digital Media and Storytelling or Global Strategic Communication graduate programs.

The two schools developed the Accelerated Bachelor's to Master's program to train environmental scientists to be better

communicators, and communication professionals to better understand environmental science.

These 4+1 programs are uniquely applied and strongly interdisciplinary. They integrate basic science concepts, communication theory and practice, and socio-cultural dimensions to cultivate the interdisciplinary problem-solving and communication skills necessary for developing sustainable solutions. The goals of these programs are to:

- Educate students across the sciences, social sciences and humanities, providing knowledge and interdisciplinary perspectives needed to effectively address complex environmental problems through grounding in solid scientific understanding of ecosystem operation.
- Develop skills in environmental and sustainability sciences including GIS, sustainability tracking, and environmental communications as well as important professional skills, such as interdisciplinary thinking, systems thinking, research design, data collection, data analysis, research ethics, technical writing, and communication.
- Improve communication skills by teaching students how to tell stories through enhanced speaking and presentation methods, better writing, video production, recording podcasts, developing blogs and social media.
- Prepare students for advancement in careers in the public and private sectors, including in government agencies, consulting firms, media organizations, businesses, and not-for-profit organizations.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit

hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students

in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Develop skills in research, interviewing, reporting and writing.
- Become proficient at shooting and editing photos and video.
- Gain knowledge and skills at recording and editing audio.
- Learn how to design web sites and other types of digital content.
- Learn how to gather and analyze data for use in telling stories.
- Make a commitment to seeking the truth, ethics and social justice.
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.
- Critically evaluate the accuracy and credibility of information relating to environmental topics.
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.
- Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Multimedia Journalism/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Multimedia Journalism and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Multimedia Journalism and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Major

- Multimedia Journalism (BA) (p. 835)

Minor

- Multimedia Journalism Minor (p. 836)

Combined

- Multimedia Journalism/Environmental Science and Sustainability (BA/MS) (p. 1292)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**76**

1 Writing Intensive (p. 800)
2 Satisfies Engaged Learning (p. 1417) requirement
3 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
COMM 145	Video for Journalists	3
COMM 175	Introduction to Communication	3
	Hours	**6**
Spring		
COMM 200	Digital Communication and Society	3
COMM 205	Reporting Basics I: Writing and Interviewing	3
	Hours	**6**
Second Year		
Fall		
COMM 208	Reporting Basics II: Technology for Journalists	3
	Hours	**3**
Spring		
COMM 279	Critical Issues in Journalism	3
Major Intermediate Course		3
	Hours	**6**
Third Year		
Fall		
COMM 100	SOC Career Prep Seminar	1

Major Intermediate Course		3
	Hours	**7**
Spring		
COMM 282	Media Law	3
COMM 362	Multimedia Journalism Research Methods	3
Major Advanced Course		3
	Hours	**9**
Fourth Year		
Fall		
COMM 392	Multimedia Journalism Internship	3
Major Advanced Course		3
Two (2) International Affairs Courses [1]		6
	Hours	**12**
Spring		
Major Intermediate Course		3
Two (2) International Affairs Courses [1]		6
	Hours	**9**
Fifth Year		
Fall		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
Spring		
Three (3) International Affairs Courses [1]		9
	Hours	**9**
	Total Hours	**76**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet

the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]

- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- At Loyola University Chicago, we're committed to ensuring journalism survives and thrives in the future. We teach students the skills every journalist must master, including: Researching; Interviewing; Reporting; Writing; and A commitment to ethics and social justice [Multimedia Journalism]
- We know technology has changed the way the public consumes journalism. So we also teach our students the other skills storytellers must excel at, including: Shooting and editing photos and video; Recording and editing audio; Designing web sites and other types of content; Promoting content and understanding metrics; and A willingness to explore emerging media [Multimedia Journalism]

Philosophy (BA/MA)

The BA/MA in Philosophy program allows students to earn both bachelor's and master's degrees in philosophy in five years. This accelerated degree program is a cost-effective option for undergraduate majors wishing to pursue graduate education in philosophy. It prepares students to apply for doctoral programs and gives them a chance to work with faculty they already know at the graduate level. A student enrolled in this program is an undergraduate for four years and a graduate student for one year. Philosophy majors must apply to the BA/MA program in their junior year. They will then have a modified program of study in their senior year, taking courses at both the graduate and undergraduate level that count toward their BA and MA, before completing a fifth year of graduate study.

Program Highlights

- Cost-effective option for undergraduate majors interested in pursuing graduate education in philosophy.
- Takes half the time to complete than a traditional MA at a new institution
- Provides excellent preparation for applying to PhD programs and pursuing specialized research at the doctoral level
- Offers continuity of education, allowing students to continue working with faculty they already know

Related Programs

Major

- Philosophy (BA) (p. 605)

Minor

- Ethics and Moral Philosophy Minor (p. 603)
- Philosophy Minor (p. 609)

Combined

- Philosophy/International Affairs (BA/MA) (p. 1306)

CURRICULUM

In years 1-4 students complete the BA in Philosophy, taking four graduate courses that "double dip" towards both the BA and MA. In year 5 students take six graduate courses to complete the MA in Philosophy and defend the MA thesis or paper. The six graduate courses – plus the four graduate "double dipped" courses taken towards the MA as an undergraduate – complete the 10 courses required for the MA.

Code	Title	Hours

PHIL 444	Studies in Logic	
PHIL 447	Issues in Cognitive Science	
Five 400-level Philosophy Elective Courses [5]		15
Total Hours		**63**

1 Three (3) of the eleven (11) courses required for the major must be at the 300-level (four if 301 is taken) and four (4) must be taken at the 400-level.

2 BA/MA students can use relevant 400-level courses to satisfy the ethics and epistemology requirements toward the BA. Whether the course counts as relevant is determined in consultation with the Graduate Program Director, Undergraduate Program Director, and course instructor.

3 BA/MA students are not required to take the capstone seminar (PHIL 395, PHIL 396, PHIL 397, PHIL 398, or PHIL 399). If students replace their BA capstone seminar with a graduate seminar, they take an additional 3 400-level electives, “double dipping” these (for a total of four double-dipped courses) towards their BA and MA. If students take the BA capstone seminar, then they take four “double-dipped” 400-level courses as electives.

4 Other Philosophy courses may be used for the MA requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the curriculum grid. For a full list of Philosophy graduate-level courses, click here (p. 1628). Specific courses may not be offered every semester and course offerings are subject to change.

5 Comprised of one 400-level elective course and the four graduate "double-dipped" courses taken towards the MA as an undergraduate i.e. students must take one additional 400-level course.

MA Examination

Toward the end of year five, students pursuing the BA/MA in Philosophy must pass an oral examination before a committee of at least three faculty members on a substantial research paper or thesis the student has written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

Guidelines for Accelerated Bachelor’s/ Master’s Programs

Terms

- Accelerated Bachelor’s/Master’s programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor’s/Master’s programs are designed to enhance opportunities for advanced training for Loyola’s undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program’s admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master’s degree were pursued entirely after the receipt of a bachelor’s degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor’s/Master’s program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master’s program through the regular admissions process. Students enrolled in an Accelerated Bachelor’s/Master’s program who choose not to continue to the master’s degree program upon completion of the bachelor’s degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor’s degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor’s/Master’s program. Using the plan code associated with the Accelerated Bachelor’s/Master’s program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master’s degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Upon completion of the BA/MA in Philosophy program students will be able to/will have:

- Analyze major texts in the history of philosophy. [BA]
- Articulate major philosophical problems and their solutions, such as questions concerning truth and knowledge, reality, moral values, and justice. [BA]
- Distinguish and explain different philosophical methodologies or approaches. [BA]
- Explain and apply ethical frameworks. [BA]
- Evaluate or construct arguments. [BA]
- Acquired advanced knowledge and be able to: Demonstrate knowledge of the history of philosophy; Demonstrate knowledge of perennial and contemporary issues in philosophy; and Demonstrate expertise in a particular area of philosophy [MA]
- Engaged in discursive and critical thinking and be able to: Identify hidden presuppositions of everyday beliefs; Articulate and evaluate

philosophical arguments; Consider alternative kinds of philosophical argumentation; and Apply philosophical categories, methods and insights to other areas of human interest, experience, or cognitive inquiry [MA]

- Produced and disseminated scholarship and be able to frame, research, complete and defend the MA paper [MA]
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and in the world and be able to: Work with others for the sake of common purposes; Foster Jesuit ideals, including truth and justice; and Enhance the pleasures of work in common [MA]

Philosophy/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Philosophy and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Philosophy and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours

PHIL 396	Seminar in Medieval Philosophy	
PHIL 397	Capstone Seminar in Classical Modern Philosophy	
PHIL 398	Capstone Seminar in Contemporary Philosophy	
PHIL 399	Capstone Seminar on a Topic in Philosophy	
Electives [2]		
Five other elective philosophy courses, of which at least four must be at the 300-level		15
Required MA Courses		
CORE		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*

Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1307) [2]		*18*
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		
Total Hours		**57**

1 The department offers one capstone in each major specialization area each year.

2 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon

a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level

course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved/with the ability to:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Analyze major texts in the history of philosophy. [Philosophy]
- Articulate major philosophical problems and their solutions, such as questions concerning truth and knowledge, reality, moral values, and justice. [Philosophy]
- Distinguish and explain different philosophical methodologies or approaches. [Philosophy]
- Explain and apply ethical frameworks. [Philosophy]
- Evaluate or construct arguments. [Philosophy]

Physics/Secondary Education (BS/MEd)

NOTE: This program is not presently accepting applications.

Become a science teacher. Earn an undergraduate degree in physics and a master's degree in secondary education

In Loyola's accelerated master's degree program for science teachers, you'll earn your undergraduate degree in physics and a graduate degree in teaching grades 9-12, plus an Illinois teaching license in secondary education. You'll qualify for a higher salary with a graduate degree, and be able to earn both degrees more quickly than if you enrolled in the two programs separately. Plus, there is a high need for science teachers across Illinois.

Related Programs

Major

- Physics (BS) (p. 617)
- Physics with Computer Science (BS) (p. 621)

Minor

- Physics Minor (p. 620)

Curriculum

Students are enrolled in the College of Arts and Science (https://www.luc.edu/cas/) for the first four years, working to complete the requirements for a Bachelor of science degree in physics (p. 617) as well as prerequisites for Loyola's Graduate Teacher Preparation program. Students may begin the required sequence of classes for the MEd starting in their junior or senior year. They will also formally apply to the School of Education prior to their fifth year. The remainder of required education courses, including student teaching, are completed in the fifth year.

Please note that the MEd includes at least one summer session. Students work under the guidance of the Education Senior Academic Advisor to outline a specific course of study to fulfill all requirements. The timing of the education courses in the fourth and fifth years can vary depending on each student's particular needs. The number of courses taken each term can vary depending on the plan developed.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Political Science (BA/MA)

The dual BA/MA program allows our best undergraduate Political Science majors to pursue the BA and MA in a shorter period of time than if both programs were pursued separately. Students typically complete the dual BA/MA program in 5 years, as opposed to the 6 years if both programs were pursued separately.

Related Programs

Major

- Political Science (BA) (p. 638)

Minor

- Political Science Minor (p. 640)

Combined

- Political Science/International Affairs (BA/MA) (p. 1318)

Curriculum

Students admitted to the Political Science BA/MA Accelerated Bachelor's/Master's program may apply up to 12 semester hours of credit earned toward the 120 semester hours needed for the BA toward the 30-hour requirement for the MA degree. The 12 hours must be 400- or 500-level credit. The 12 hours of credit applied toward the MA degree are in addition to the 33 semester hours of credit normally required for the undergraduate political science major. The application of the 12 hours of credit toward the 30-hour MA requirement means that students will only be required to take 18 additional semester hours of coursework beyond the 120 hours required for the BA degree. As a result, students will be able to complete the MA degree in less time than normal. The four graduate courses that students take in their senior year will count towards their major in PLSC.

Course Requirements

Code	Title	Hours
Political Science BA Requirements		
Select three of the following:		*9*
PLSC 100	Political Theory	
PLSC 101	American Politics	
PLSC 102	International Relations in an Age of Globalization	
PLSC 103	Comparative Politics	
BA Subfield Requirements		
One (1) course in American Politics Subfield (p. 1315)		3
One (1) course in Political Theory Subfield (p. 1315)		3
One (1) course in Comparative Politics Subfield (p. 1315)		3
One (1) course in International Relations Subfield (p. 1315)		3
Four (4) PLSC Electives		*12*
Political Science MA Requirements		
Political Science Methods		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
PLSC 476	Political Analysis II	3
Seven Electives from Two MA Subfields [2]		*21*
The MA subfields that may be chosen from are International Relations, Comparative Politics, American Politics, and Political Theory.		
International Relations Courses		
PLSC 430	Theories of International Politics	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 437	Selected Problems International Law	
PLSC 439	Selected Problems in International Politics	
PLSC 531	Seminar: International Politics	
Comparative Politics Courses		
PLSC 420	Comparative Political Systems	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 423	Soviet & Post-Soviet Politics	
PLSC 424	Politics of Developing Areas	
PLSC 425	Sub-Saharan Africa	
PLSC 426	Latin American Politics	
PLSC 427	Politics of the Middle East	
PLSC 428	Political Violence	
PLSC 429	Comparative Politics Selected Problems	
PLSC 520	Seminar: Comparative Politics	
PLSC 521	Seminar Western European Politics	
PLSC 532	Soviet/Post-Soviet Foreign Policy	
American Politics Courses		
PLSC 404	Selected Problems in American Politics	
PLSC 405	American Executive Branch	
PLSC 406	American Legislative Branch	
PLSC 407	Public Policy-Making & Implementation	
PLSC 410	Urban Politics	
PLSC 411	American Political Parties/Electoral Process	
PLSC 412	Constitutional Politics	
PLSC 417	The American Legal System	
PLSC 418	Political Psychology & Socialization	
PLSC 419	Managing Urban Government	
Political Theory Courses		
PLSC 440	Ancient Political Thought	
PLSC 442	Modern Political Thought	
PLSC 444	Great Authors	
PLSC 446	Political Ethics	
PLSC 447	American Political Thought to Civil War	
PLSC 449	19th Century Political Thought	
PLSC 543	Liberalism	
PLSC 546	Political Philosophy Selected Problems	
Total Hours		**63**

[1] If students take PLSC 100, 101, or 102 as the three required courses for the major, they can also take PLSC 103 and have it count as an elective in the major. Students in the BA/MA Political Science and Students in the BA/MA in International Affairs can count two of the graduate level courses (at the 400 or 500 level) that they take in their senior year as electives in the PLSC major, alongside the other two courses at the 200 or 300 level.

[2] Seven elective courses should be chosen from at least two subfields: International Relations, Comparative Politics, American Politics, or Political Theory. With approval of the Graduate Program Director, up to six (6) hours may be at the graduate level in related disciplines.

BA Curricular Notes

- The Political Science internship program (PLSC 370), a 3- or 6-credit hour course, counts as one of the four Political Science electives.

Only 3 credits of PLSC 370 may count toward the PLSC major, the other three will be counted as general electives. An exception is made for students who complete an internship in Chicago as well as an internship via the Washington, DC program. In that case, 3 credit hours from each internship may be applied to the major.

- The following courses do not fulfill subfield requirements but do count as electives toward the PLSC major: PLSC 396 Directed Readings and PLSC 216 Political Numbers (PLSC 216 also fulfills the core quantitative reasoning requirement for PLSC majors only.)
- The following courses neither fulfill subfield requirements nor count as electives toward the PLSC major: PLSC 395 Political Science Honors Seminar. This is an extra course that students take beyond the major requirements in order to graduate with Honors in Political Science.

BA Subfield Courses

American Politics

Code	Title	Hours
PLSC 202	Mock Trial [1]	3
PLSC 203	Moot Court [1]	3
PLSC 208	Representation in the United States	3

GLST 305	Globalization and Environmental Sustainability	3

[1] This course is Engaged Learning.

Capstone Requirement: Thesis, Comprehensive Exams, or Internship

Thesis

Students may satisfy six hours (2 courses) by writing a thesis. Students who choose this option will take PLSC 596 Thesis Research for two semesters (a total of 6 credit hours, which count as electives) and take PLSC 595 Thesis Supervision until they are done with the thesis.

Code	Title	Hours
Take for two semesters (may satisfy 6 elective hours)		
PLSC 596	Thesis Research	
Take until done with thesis		
PLSC 595	Thesis Supervision	

Comprehensive Exam

MA students can choose to take a written comprehensive examination. The student will select five courses from the substantive courses they have taken on which they will be tested. Prior to taking the exam students must finish all incompletes. Students may be currently registered for courses necessary for the degree in the semester in which they take the exam. If the student has fulfilled all degree requirements except for the comprehensive exams, they should register for PLSC 605 Master's Study in the semesters leading up to and including the exam. Students taking comprehensive examinations at the master's degree level are expected to answer theoretical and substantive questions from a range of five courses they have taken in their coursework. Once a student knows that s/he will take the exam in a particular semester, we highly recommend that they discuss the exam with the faculty members with whom they have taken the five chosen courses. Comprehensive exams will take place during the second half of the fall and spring semesters. Students will answer three questions over a weekend, receiving the exam on a Friday at 5:00 PM and returning the completed examination the following Monday, at 9:00 AM. All three answers must be written during the specified weekend with no outside assistance. Students will write a maximum of 21, double-spaced pages (normal formatting: 1" margins, Times New Roman, 12 pitch font). Each answer should be approximately six or seven pages. Prior to taking comprehensive exams, students must submit to the Graduate Program Director a departmental "MA Requirements and Comprehensive Examination Form," that lists all of the courses the student has taken and identifies on which courses the student would like to be tested. At the beginning of each semester the Graduate Program Director will distribute this form to all students who will take the exam

Internship

PLSC 470 Fieldwork in Political Science-Internship offers academic credit toward your major or minor while interning and gaining professional experience at one of several organizations, either here in Chicago or elsewhere. The intent is for students to 1) apply their education to date in a professional setting, 2) gain valuable experience at the start of their professional careers, 3) to explore a particular area of professional interest before embarking on their careers, and 4) to potentially "get a foot in the door" within a particular field or employer with the hope of landing a permanent position upon graduation. While past interns have received job offers from organization where they have interned, there are no guarantees or promises of employment that accompany taking this course.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. During Year 4, students should plan to take any required major or elective courses needed to complete their undergraduate degree alongside the suggested graduate courses. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 4		
Fall		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
	Hours	**6**
Spring		
PLSC 476	Political Analysis II	3
PLSC Graduate-Level Elective		3
	Hours	**6**
Year 5		
Fall		
PLSC Graduate-Level Elective		3
PLSC Graduate-Level Elective		3

PLSC Graduate-Level Elective	3
Hours	**9**
Spring	
PLSC Graduate-Level Elective	3
PLSC Graduate-Level Elective	3
PLSC Graduate-Level Elective	3
Hours	**9**
Total Hours	**30**

[1] If pursuing thesis capstone option, student must substitute this elective for PLSC 596 Thesis Research.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

The dual BA/MA in Political Science offers students:

- An overview of the theories and scholarly literature devoted to four major Political Science subfields: American Politics (study of U.S. institutions and political processes); Comparative Politics (study of political processes in various regions of the world, such as Africa, Asia, Europe, Latin America, and the Middle East); International Relations (study of global processes throughout the international system); or Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- Prepararion for purposeful careers in politics, government, international affairs, law, the non-profit world, journalism, business, education, social services, and other professions, as well as for further graduate (PhD) study at professional schools and institutions of higher learning, both in the U.S. and abroad.
- We also encourage our BA/MA students to take advantage of additional learning opportunities: Advanced methodological training; Advanced language training/proficiency in a language other than English; Advanced research skills; International, cross-cultural experience; Professional development and experience; and Networking opportunities

Political Science/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Political Science and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Political Science and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the

School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Minor

- Political Science Minor (p. 640)

Combined

- Political Science (BA/MA) (p. 1313)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
Political Science BA Requirements		
Select three of the following: [1]		*9*
PLSC 100	Political Theory	
PLSC 101	American Politics	
PLSC 102	International Relations in an Age of Globalization	
PLSC 103	Comparative Politics	
Subfield Requirements		
One (1) course in American Politics Subfield (p. 1319)		3
One (1) course in Political Theory Subfield (p. 1320)		3
One (1) course in Comparative Politics Subfield (p. 1320)		3
One (1) course in International Relations Subfield (p. 1320)		3
Four (4) PLSC Electives		*12*
International Affairs MA Requirements		
Required Courses		
CORE		
INTA 475	Political Analysis I	3
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
Capstone Experience		3
Electives (p. 1320)		
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		18
Total Hours		**63**

[1] If students take PLSC 100, 101, or 102 as the three required courses for the major, they can also take PLSC 103 and have it count as an elective in the major. Students in the BA/MA Political Science and Students in the BA/MA in International Affairs can count two of the graduate level courses (at the 400 or 500 level) that they take in their senior year as electives in the PLSC major, alongside the other two courses at the 200 or 300 level.

BA Curricular Notes

- The Political Science internship program (PLSC 370), a 3- or 6-credit hour course, counts as one of the four Political Science electives. Only 3 credits of PLSC 370 may count toward the PLSC major, the other three will be counted as general electives. An exception is made for students who complete an internship in Chicago as well as an internship via the Washington, DC program. In that case, 3 credit hours from each internship may be applied to the major.
- The following courses do not fulfill subfield requirements but do count as electives toward the PLSC major: PLSC 396 Directed Readings and PLSC 216 Political Numbers (PLSC 216 also fulfills the core quantitative reasoning requirement for PLSC majors only.)
- The following courses neither fulfill subfield requirements nor count as electives toward the PLSC major: PLSC 395 Political Science Honors Seminar. This is an extra course that students take beyond the major requirements in order to graduate with Honors in Political Science.

List of MA Elective Courses

The participating programs that will contribute classes to the MA Electives include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3

Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3
PLSC 431	Formulation US Foreign Policy	3
PLSC 432	Comparative Foreign Policy Analysis	3
PLSC 433	International Organization	3
PLSC 435	International Political Economics	3
PLSC 436	International Conflict	3
Methods Courses		
PLSC 401	Intro to Research Design & Method	3
PLSC 476	Political Analysis II	3
Psychology Department

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g.,

1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]

- Demonstrate an understanding of the structures and functions of political systems. [Political Science]
- Be able to apply political theories and concepts when interpreting past and current events. [Political Science]
- Recognize the influence of cultural, social, and historical contexts on political behavior, values, institutions, or policies. [Political Science]
- Characterize the roots of enduring social disagreements and conflicts. [Political Science]
- Evaluate normative or empirical claims about political phenomena. [Political Science]
- Demonstrate an ability to communicate effectively about complex political issues. [Political Science]
- Develop research skills to gather, evaluate, and synthesize information from multiple sources to support arguments or theories in political science. [Political Science]

Psychology/Applied Social Psychology (BS/MA)

The five-year program in applied social psychology allows students to earn both the BS in Psychology (p. 650) and the MA in Applied Social Psychology (p. 1651) degrees in five years. Completing both degrees in five years saves students approximately one year of study.

Graduates of the program obtain skills in basic and applied research methodology, advanced training in statistics and a strong knowledge base for theory and research in social psychology.

If you have additional questions about the program please contact Dr. Scott Tindale (rtindal@luc.edu) (Graduate Program Director).

Related Programs

Major

- Psychology (BS) (p. 650)

Minor

- Psychology Minor (p. 653)

Combined

- Psychology/International Affairs (BS/MA) (p. 1327)

Curriculum

The five-year degree in applied social psychology requires the completion of 120 hours of undergraduate coursework toward the BS in Psychology and the completion of 30 hours of graduate coursework toward the MA in Applied Social Psychology. Twelve hours of the graduate coursework also fulfill requirements for the undergraduate degree. The total number of required hours is 138. Successful completion of the MA degree also requires an empirical thesis. Students begin taking graduate courses in their senior year and complete the program in their 5th year.

PSYC 399	Special Studies in Psychology	1-3

Thesis

The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The student must present the results of the study to the faculty and students of the Social Psychology Program as part of the Program colloquium series. All master's theses must be submitted for publication in accordance with Graduate School policy.

Students are encouraged to begin work on their Master's thesis early in their graduate careers. Optimally, data collection should begin in the fall semester of the student's second year, and the thesis should be completed by the beginning of the fall semester of his/her third year. This allows students to begin teaching for the department during their third year of graduate school.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the

School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Acquisition of research and publication skills that will allow students to pursue an applied job after completing the program

Psychology/International Affairs (BS/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BS/MA in Psychology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BS/MA in Psychology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

Combined

- Psychology/Applied Social Psychology (BS/MA) (p. 1324)

Curriculum

For the BS, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially

matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different

departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Acquire a broad understanding of fundamental psychological principles and concepts, including the biological, cognitive, developmental, mental health, and social pillars of psychological science. [Psychology]
- Learn to use scientific knowledge to make reasoned and ethical judgments promoting the health and well-being of the individual, community, and society. [Psychology]
- Develop the ability to design, conduct, and communicate the results, both orally and in writing, of basic psychological research. [Psychology]
- Develop the ability to think quantitatively about psychological concepts, and to quantitatively analyze experimental results. [Psychology]
- Participate in scientific inquiry using the methodologies and tools of psychological science in laboratory and field settings. [Psychology]
- Expose students to theoretical approaches that deal with privilege, oppression, and social justice and encourage appreciation of differences in psychology across cultures. [Psychology]

Public Health (BS/MPH)

Earn your bachelor's degree and master's degree in five years.

Grounded in the basic sciences with an emphasis on population health, the Bachelor of Science in Public Health (BSPH) program prepares students for positions in fields such as health education, epidemiology, and environmental health across nonprofit, industry, and government sectors. Inspired by Loyola's Jesuit tradition of social justice and freedom of inquiry, the Master of Public Health (MPH) program prepares students to improve population health and promote health equity with three MPH study tracks: Public Health Policy and Management, Epidemiology, and Global Health Equity.

1 This course satisfies the Engaged Learning requirement.
2 This course satisfies the Writing Intensive requirement.
3 Other elective courses may be available upon advisor approval.
4 MPBH 403; MPBH 407; MPBH 414 or MPBH 417; MPBH 404 or MPBH 409; and ENVS 480 satisfy BSPH and MPH curriculum requirements and are direct substitutes for the BSPH PUBH 303,

PUBH 307, PUBH 314/HSM 210, STAT 335 and ENVS 380, respectively. Additionally, MPBH 400 or MPBH 402 may be added in the senior year as a substitute for an elective. The goal is for the student to complete 15 credits of the MPH curriculum in the senior year leaving 27 remaining MPH credits to be taken in the MPH year.

MPH Track-Specific Curricula (15 credits)

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2

CMAN 533	Fiscal Management in Health Care Organizations	
Total Hours		**15**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the

School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Beginning with courses in ethics, environmental sciences, biology, mathematics, social sciences, and the humanities alongside epidemiology, biostatistics, health behavior and health promotion, and public health policy gained in the undergraduate public health program, students will graduate with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking.

Secondary Education/International Affairs (BSEd/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BSEd/MA in Secondary Education and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSEd/MA in Secondary Education and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

PLSC 605	Master's Study	
Electives (p. 1336) [3]		18

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.

Total Hours	**83**

1 For Secondary Education and English majors only.
2 For Secondary Education with either English or Mathematics only.
3 Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

All of Loyola's Bachelor of Science in Education (BSEd) degrees use the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as their foundation. TLLSC is an approach that will help you stand out when you're searching for your first job.

The TLLSC curriculum focuses on hands-on learning. Your studies will be built around four Cornerstones—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

As you learn and grow, you'll progress through the three Phases (https://www.luc.edu/education/academics/areasofstudy/teachinglearningandleadingwithschoolsandcommunities/bsedprogramphases/)of the program. These phases will guide you through a comprehensive experience that will prepare you to make a difference with learners in diverse settings.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

LAW 459	Intro to English Legal Profession	1
LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

English Subject Area

Course	Title	Hours
Year One		
Fall		
TLSC 300A	Professional Learning Communities	0

TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
UCWR 110	Writing Responsibly	3
CORE	Historical Knowledge Tier I	3
ENGL	English Major Course	3
UNIV 101	First Year Seminar	1
Submit required documentation and background check prior to program entry		
	Hours	**14**
Spring

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning. [Secondary Education]

Social Work (BSW/MSW)

The School of Social Work Accelerated Bachelor's/Master's program offers an excellent social work curriculum with a strong liberal arts base, and a wide range of opportunities for practical experience.

This program allows BSW students to complete their undergraduate degree in four years, and their MSW degree in just one year.

Related Programs

Major

- Social Work (BSW) (p. 951)

Master's

- Social Work (MSW) (p. 2148)

Minor

- Social Work Minor (p. 954)

Curriculum

During the fifth year, students will select one of two specializations offered in the MSW program. Students can choose from the Micro

Practice Specialization or the Leadership, Mezzo, and Macro Practice Specialization.

Note: All BSW students must submit an application for the five-year program in their senior year.

Code	Title	Hours
BSW Requirements [1]		
SOWK 200	Introduction to Social Work	3
SOWK 301	Practice Skills with Individuals and Families	3
SOWK 303	Group Work Practice in Social Work: Micro/Mezzo/Macro	3
SOWK 305	Life Span Development, Human Behavior, Trauma, & Theory	3
SOWK 307	Social Work Policy and Community Intervention	3
SOWK 308	Integrated Micro, Mezzo, and Macro Practice [2]	3
or SOWK 302	Integrated Micro/Mezzo/Macro Theory and Practice	
SOWK 330	Internship I and Simulated Experience	3.5
SOWK 340	Internship II and Simulated Experience	3.5
SOWK 350	Preparation for Practice	3
SOWK 362	Integrative Seminar	1
SOWK 370	Power, Oppression, Privilege, and Social Justice	3
SOWK 380	Assessment of Client Concerns in Context	3
SOWK 390	Research and Evaluation in Social Work Practice	3
MSW Requirements

Leadership, Mezzo & Macro Practice (LMMP) Specialization		
Leadership, Community, Advocacy, and Policy (LCAP) Track		
SOWK 650	Leadership & Supervision in Service Organizations	
SOWK 652	Organizations, Program Development, and Evaluation	
SOWK 653	Community Organizing and Policy Practice	
Electives		
All students will choose to take two electives. Any 600 or 700-level course may be considered an elective.		6
Total Hours		**61**

[1] 15 credit hours are required for social science courses. (PSYC 101 General Psychology, SOCL 101 Society in a Global Age + 9 credits of social science electives)

[2] Students who have completed SOWK 302 should expect to take SOWK 681 in their MSW year. Students who have completed SOWK 308 should expect to take SOWK 682 in their MSW year. SOWK 308 will begin to be offered in Fall 2025 and later.

[3] Course Options (p. 2194)

Internship

Students complete one internship during the fifth year for a total of 600 hours. The internship is aligned with the student's area of specialization.

Specializations and Tracks

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 2191)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 2194)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 2197)
  - Migration Studies Track (p. 2200)
  - Schools/Professional Educator License (PEL) Track (p. 2203)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Micro Practice Specialization

Course	Title	Hours

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 1405) area.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while

completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

MSW Program Generalist Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas.

Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, anti- racist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

1. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
2. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
3. use technology ethically and appropriately to facilitate practice outcomes; and
4. use supervision and consultation to guide professional judgment and behavior.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response.

Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably, and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

1. advocate for human rights at the individual, family, group, organizational, and community system levels; and
2. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in

policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

1. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
2. demonstrate cultural humility by applying critical reflection, self-awareness, and self- regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

1. apply research findings to inform and improve practice, policy, and programs; and
2. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affect well-being, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights- based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

1. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
2. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

1. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
2. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social

workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

1. apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies; and
2. demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

1. engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals; and
2. incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

1. select and use culturally responsive methods for evaluation of outcomes; and
2. critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities.

MSW Program Specialized Micro Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Demonstrate professional use of self as a social worker, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts.
- Demonstrate ethical use of advanced modalities in practice and any related technological applications in the micro field of social work.
- Recognize and manage ethical violations and resolve conflicting ethical obligations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Articulate human rights violations the client and client's system are experiencing, including environmental and economic issues that endanger the health of the client system.
- Demonstrate understanding of the impact of intersectionality of marginalized identities, systemic racism, and associated oppressions and plan practice accordingly.

- Demonstrate ways in which social workers can advocate for human rights at the individual, family, group, organizational, and community system levels as it relates to the micro field of social work practice

Competency 3: Engage in Anti-racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Understand and demonstrate an understanding of anti-racism practice at the individual, group, organizational, community, research, and policy levels that will allow for diversity, equity, and inclusion practice in the micro-level field of social work.
- Demonstrate an understanding of discrimination patterns in society and how micro-level oppression impacts micro-level social work practice regarding race, class, gender, sexual orientation, gender identity, ability, age, and any other social categories in which oppression occurs.
- Demonstrate the ability to formulate how an anti-racist practice will advance the client and client system's human rights.

Competency 4: Engage In Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Demonstrate understanding of and be able to contribute to the evaluation of social research regarding advanced micro practice.
- Critically evaluate and select potential practice models relevant to the client's systems.
- Use their experience from their internship or practicum placement to identify real-life challenges and address the practical needs of clients
- Engage in partnerships with experienced social workers to help bridge the gap between theory and practice and broaden knowledge of social work practice as it relates to the micro field of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rightsbased, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan for organizational analysis and change, working with relevant constituencies to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the organization's mission.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders, and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affect client groups, organizations, and communities and intervene proactively for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability

to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Apply culturally appropriate resources available to assist with problem-solving.
- Recognize and describe self-reflective competency in identifying bias, countertransference, and potential microaggressions when engaging diverse client systems.
- Implement and describe the use of reflective listening tools when needed to engage and empower members of families and groups.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Collect and organize data to support their professional decision-making as well as demonstrate critical thinking to interpret information from clients and constituencies.
- Illustrate knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies, understanding the lack of political neutrality in their work.
- Exemplify a process in which mutually agreed-on intervention goals and objectives are generated based on the critical assessment of strengths, needs, and challenges within clients and constituencies in their social environment; and
- Convey a deeper understanding of how to select appropriate intervention strategies informed by assessment, research knowledge, and values and preferences of clients and constituencies through the exercise of antiracist practice principles.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Practices self-reflective understanding of the professional use of self in interventions with diverse types of client systems in order to understand and challenge oppressive social forces as well as to avoid perpetuating racist biases, microaggressions, and disempowerment of clients.
- Use supervision and consultation appropriate to developing skills for advanced and interdisciplinary practice.
- Demonstrate an ability to intervene collaboratively and collectively with clients in choosing treatment plans and their implementation.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate understanding of the logic and method of single case evaluation of practice from diverse theoretical and methodological perspectives.
- Competently demonstrate case evaluation, including identifying problems and their resolution, the fulfillment of goals co-identified with client, and managing systemic problems that impinge on client well-being.
- Demonstrate competence in incorporating client feedback processes in planning and carrying out the intervention plan.

MSW Program Specialized LMMP Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and

personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Practice self-reflection and self-evaluation in working through competing personal and professional values.
- Apply and anti-racist and anti-oppressive framework to macro practice decision-making, considering NASW and IFSW ethical codes, research and practice-based knowledge, and applicable legal and policy information.
- Promote policies for organizational, community, and policy change that reflect social work values and challenge inequities.
- Demonstrate an understanding of social work supervision as an accountability mechanism in supporting ethical and professional social work practice.
- Identify discrimination and marginalization and prioritize the voices of affected populations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Integrate knowledge of international human rights conventions and covenants, as well as human rights theories and frameworks, into practice that addresses social, economic, and environmental justice.
- Critically examine the political process to participate in organizational, community, and policy change addressing human rights and social justice
- Identify human rights and justice issues of clients and constituents.
- Develop strategies to address human rights and justice issues and to evaluate outcomes with key stakeholders.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Demonstrate proficiency in choosing and using a variety of communication styles to engage with people of various political ideologies, religious and cultural backgrounds, and points of view.
- Create engagement strategies that are inclusive and consider systems of power and intersectional identities, including areas of racism, sexism, nativism, etc.
- Recognize the discrepancies that may arise between respecting cultural differences of clients and constituencies and the Universal Declaration of Human Rights
- Develop leadership and other teams that reflect the diversity of the communities in which they work.

Competency 4: Engage in Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Critically analyzes research results on best practices in management and supervision from a variety of disciplines.
- Develop research questions with input from stakeholders and analysis of how the research process may impact, both positively and negatively, clients, programs, organizations, communities, and/or policies. Intentionally include the voices and experiences of those most affected by any type of inequality into the research process

- Critically analyze research findings and practice models to inform practice at all levels of macro practice, including teams, organizations, community, and policy
- Identify possible barriers and resistance to the conduct and dissemination of research, as well as any ethical, political, and other dilemmas that may arise.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights-based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan of organizational analysis and change, working with relevant constituencies, to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the mission of the organization.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affects client groups, organizations and communities and being proactive in intervening for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Demonstrate ability to identify a comprehensive range of stakeholders in the relevant practice setting: organization, community, and/or policy.
- Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations.
- Demonstrate verbal, written, and digital skills to engage multiple, diverse constituencies.
- Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration.
- Define and recognize their own and others' leadership skills to effectively promote stakeholder engagement and change.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Analyze power distributions to identify influential decision-makers, whether formal or informal, among individuals, teams, organizations, communities, and other institutional entities
- Identify and create mezzo and macro interventions based on an assessment and analysis of assets, needs, benefits, service gaps, rights, and power and resource distributions.
- Demonstrate ability to collaborate with stakeholders throughout the assessment process.
- Analyze collected data and communicate summaries of the data in written and oral form as appropriate.
- Present options for intervention based on data-informed assessments.
- Articulate the benefits and drawbacks of various metrics, analytical methods and tools, and data sources (primary & secondary, quantitative & qualitative)

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional

collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Articulates ethically sound, social work value-centered supervision strategies for employees, including performance reviews and corrective action plans.
- Engage with stakeholders in the identification of issues and policies that impact individual well-being and the communities and organizations that support them.
- Mobilize constituents to participate and lead in issue analysis and formulation of corresponding advocacy agendas with effective strategies and tactics to advance meaningful change for social justice, equity, and inclusion.
- Participate in coalitions, networks, professional associations, and community based organizing efforts to leverage political capital to challenge unjust structures of power and effect positive change.
- Formulate and persuasively communicate cogent arguments through effective written and oral formats that reach diverse audiences and utilize varied platforms.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate ethical knowledge and awareness of evaluation guidelines that can be employed in assessment of practice and ensure confidentiality of engaged participants.
- Comprehend evaluation norms, benchmarks and guidelines as approved by NASW and CSWE that allow accurate and impartial assessments at all levels of social work practice.
- Illustrate comprehensive knowledge of human rights-based understanding of evaluation design, methods, approaches, and analysis that can be applied in simple to complex settings within social work mezzo and macro policy and organizational environments.
- Distinguish, explain, and apply various types of theories of change and logic models to understand systems thinking to identify and facilitate growth-oriented evaluative mindsets among all stakeholders.

Social Work/International Affairs (BSW/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Social Work and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSW/MA in Social Work and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

CURRICULUM

Code	Title	Hours
BSW Requirements		
Required Courses		
SOWK 200	Introduction to Social Work	3
SOWK 301	Practice Skills with Individuals and Families	3
SOWK 302	Integrated Micro/Mezzo/Macro Theory and Practice	3
SOWK 303	Group Work Practice in Social Work: Micro/Mezzo/Macro	3
SOWK 305	Life Span Development, Human Behavior, Trauma, & Theory	3
SOWK 307	Social Work Policy and Community Intervention	3
SOWK 330	Internship I and Simulated Experience	3.5
SOWK 340	Internship II and Simulated Experience	3.5
SOWK 350	Preparation for Practice	3
SOWK 362	Integrative Seminar	1
SOWK 370	Power, Oppression, Privilege, and Social Justice	3
SOWK 380	Assessment of Client Concerns in Context	3
SOWK 390	Research and Evaluation in Social Work Practice	3
Social Science Courses		*15*
PSYC 101	General Psychology	
SOCL 101	Society in a Global Age	

9 Credits of Social Science electives [1]		
International Affairs MA Requirements		
Required Courses		
Core		
INTA 475	Political Analysis I	3
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives *(p. 1356)*		
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		18
Total Hours		**74**

[1] Social science electives can be drawn from multiple LUC majors and are approved by the BSW program.

[2] At least two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These courses double-count for International Affairs MA requirements.

List of MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

School of Law - Classes Offered at the John Felice Rome Center

MPBH 400	Determinants of Population Health	3
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal & Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 424	Health Economics and Healthcare Financing	3
MPBH 432	Health Impact Assessment	3

Quinlan School of Business

Code	Title	Hours
ECON 424	International Business Economics	3
FINC 455	International Financial Management	3
HRER 422	Global HR Management	3
HRER 502	Global Employment Relations	3
MARK 465	International Marketing	3
MARK 461	Research Methods in Marketing	3
MGMT 446	International Business Ethics	3
SCMG 486	Global Logistics	3

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.

- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- For the BSW, see Social Work Competencies.

BSW Program Generalist Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas.

Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, anti- racist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

1. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
2. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
3. use technology ethically and appropriately to facilitate practice outcomes; and
4. use supervision and consultation to guide professional judgment and behavior.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response.

Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably, and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

1. advocate for human rights at the individual, family, group, organizational, and community system levels; and
2. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

1. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
2. demonstrate cultural humility by applying critical reflection, self-awareness, and self- regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

1. apply research findings to inform and improve practice, policy, and programs; and
2. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affect well-being, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights- based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

1. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
2. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

1. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
2. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

1. apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies; and
2. demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

1. engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals; and
2. incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

1. select and use culturally responsive methods for evaluation of outcomes; and
2. critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities.

Sociology (BA/MA)

The Sociology Department offers a 5 year BA/MA degree, allowing you to begin graduate school in your senior year, and to finish the MA degree at the end of your 5th year. This is a wonderful opportunity to gain an advanced degree without the time and expense of the longer 2 year MA degree offered by most programs. This is approximately one year less than normally required to earn both degrees. Graduates of this program will be well prepared to enter the labor force, a professional school or pursue a PhD.

Related Programs

Major

- Sociology (BA) (p. 665)
- Sociology-Anthropology (BA) (p. 669)

Combined

- Sociology/International Affairs (BA/MA) (p. 1364)

Curriculum

The BA/MA program generally requires four more sociology courses taken in the student's first four years than the eleven normally required for a BA sociology major. The four extra courses must be graduate-level courses, and are usually taken in the student's senior year. Consequently, BA/MA students will generally have four fewer non-sociology electives than ordinary BA students. In some cases, students may only take two graduate courses during their senior year, and take the other two during their fifth year along with the other graduate courses they take that year (in these instances students may take longer than five years to finish the program).

Code	Title	Hours
BA Requirements		
Required Courses		
SOCL 101	Society in a Global Age	3
SOCL 205	Sociological Thought [1]	3
SOCL 206	Principles of Social Research	3
SOCL 301	Statistics for Social Research	4
SOCL 365	Social Theory & Social Research [2]	3
Elective Courses		*18*
Complete six total electives; five must be from SOCL 210-SOCL 380. [3,4,5]		
MA Requirements [6]		
Required Courses		
SOCL 405	History Sociological Thought	3
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3

SOCL 414	Statistical Methods Analysis I	3
Choose one of the following MA track specific course:		*3*
General Track		
SOCL 406	Modern Sociological Theory	
Applied and Public Track		
SOCL 494	Internship [7]	
Elective Courses (See list) (p. 1362)		*15*
Total Hours		**64**

1 Any Sociology 100-level course is considered to be a prerequisite for SOCL 205 Sociological Thought, except by special permission of the instructor.

2 SOCL 205 Sociological Thought, SOCL 206 Principles of Social Research, and SOCL 301 Statistics for Social Research are prerequisites for SOCL 365 Social Theory & Social Research. These courses provide social science students with the theory and methodology background needed for more advanced work.

3 Only one semester of SOCL 380 Internship may be counted toward the major (although this is a six credit hour course, it counts as one course).

4 In choosing electives, majors should consult with their department advisor. One course from another social science may be substituted with departmental permission.

5 A list of all Sociology (SOCL) course descriptions can be found here (p. 2895).

6 Students who only took two graduate courses during their senior year of the BA/MA program will have to take eight graduate-level sociology courses to complete the program.

7 If the student intends to do the applied MA track, they are advised not to take the undergraduate internship (SOCL 380 Internship) but to take the graduate internship instead (SOCL 494 Internship)

MA Elective List

Code	Title	Hours
Select five of the following:		15
SOCL 406	Modern Sociological Theory	3
SOCL 415	Statistical Methods of Analysis II	3
SOCL 418	Demography	3
SOCL 421	Theories Social Change	3
SOCL 423	Social Movements	3
SOCL 425	Inequality and Society	3
SOCL 426	Sociology of Gender	3
SOCL 427	Political Sociology	3
SOCL 428	Poverty and Social Welfare	3
SOCL 432	Socialization Thru Life Cycle	3
SOCL 438	The Family	3
SOCL 439	Community Change	3
SOCL 440	Organizations & Organizational Change	3
SOCL 441	Sociology of Religion	3
SOCL 442	Religious Conflict & Change	3

SOCL 494	Internship	3
SOCL 497	Independent Research [1]	3
SOCL 498	Independent Research [1]	3
SOCL 499	Directed Study [1]	3

1 Only one independent research/directed study course counted toward MA.

Thesis or Portfolio

Students in the BA/MA program must do either a thesis or a portfolio.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's

program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4]

Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while

in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- identify the broad theoretical orientations of the discipline [General Track]
- frame sociological research questions [General Track]
- synthesize social scientific literature [General Track]
- select appropriate data sources [General Track]
- collect and present data in accordance with ethical and professional standards [General Track]
- use one or more data collection methods to carry out a research project, such as interviews, participant observation, surveys, or archival evidence [General Track]
- analyze quantitative or qualitative data [General Track]
- write a sociological research report [General Track]
- apply sociological knowledge to governmental, non-profit, or for-profit organizational activities [Applied Track]
- contribute to the work of a governmental, non-profit, or for-profit organization through an internship [Applied Track]
- frame a research question relevant to an organization [Applied Track]
- select appropriate data sources [Applied Track]
- collect and present data in accordance with ethical and professional standards [Applied Track]
- use one or more data collection methods, such as interviews, participant observation, or surveys [Applied Track]
- analyze quantitative or qualitative data [Applied Track]
- write a sociologically-informed report that is relevant to an organization [Applied Track]

Sociology/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Sociology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Sociology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Related Programs

Major

- Sociology (BA) (p. 665)
- Sociology-Anthropology (BA) (p. 669)

Combined

- Sociology (BA/MA) (p. 1361)

Curriculum

For the BA, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

Code	Title	Hours
Sociology BA Requirements		
Required Courses		
SOCL 205	Sociological Thought [1]	3
SOCL 206	Principles of Social Research	3
SOCL 301	Statistics for Social Research	4
SOCL 365	Social Theory & Social Research [2]	3
Electives		
Complete seven total electives; five must be from SOCL 210-SOCL 380. [3,4,5]		21
International Affairs MA Requirements		
Required Courses		
CORE		
INTA 475	Political Analysis I	3
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
Capstone Experience		3
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1365) [6]		
In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.		18
Total Hours		**64**

1 Any Sociology 100-level course is considered to be a prerequisite for SOCL 205 Sociological Thought, except by special permission of the instructor.

[2] SOCL 205 Sociological Thought, SOCL 206 Principles of Social Research, and SOCL 301 Statistics for Social Research are prerequisites for SOCL 365 Social Theory & Social Research. These courses provide social science students with the theory and methodology background needed for more advanced work.

[3] Only one semester of SOCL 380 Internship may be counted toward the major (although this is a six credit hour course, it counts as one course).

[4] In choosing electives, majors should consult with their department advisor. One course from another social science may be substituted with departmental permission.

[5] A list of all Sociology (SOCL) course descriptions can be found here (p. 2895).

[6] Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

List of MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3

LAW 568	European Union Law [1]	1-3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2]

Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the

School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Critical Thinking - demonstrate the ability to analyze and evaluate multiple and competing social, political, and/or cultural arguments. [Sociology]
- Sociological Imagination - the ability to articulate and evaluate how individual biographies are shaped by social structures, social institutions, cultural routines, and multiple of elements of social difference and/or inequality. [Sociology]
- Communication - the ability to formulate effective and convincing written and verbal arguments. [Sociology]
- Diversity — an awareness of how people of different cultural, religious, and political belief systems interpret the world around them through those beliefs. [Sociology]
- Sociological Theory - the ability to use and evaluate both classical and contemporary perspectives in sociological theory. [Sociology]
- Methodology - the ability to interpret and evaluate several of the major social science research methodologies, as well as the relationship between research questions and appropriate methods. [Sociology]
- Substantive Areas - the ability to demonstrate knowledge of multiple key substantive areas within the field of sociology and evaluate competing perspectives. [Sociology]
- Social Justice in the Jesuit Tradition - the ability to articulate and evaluate how sociological insights should inform a commitment to social justice. [Sociology]

Software Engineering (BS/MS)

The BS/MS programs in Information Technology, Software Engineering, and Computer Science are five-year programs that give academically successful Loyola undergraduates the opportunity to pursue the MS degree in Information Technology, Software Engineering, or Computer Science while completing their BS degree. The applicant can be pursuing any of the BS degrees offered by the Department of Computer Science, including the joint majors with Mathematics or Physics or the interdisciplinary Bioinformatics.

These programs reduce the total number of courses needed and the total time needed for the combined degrees. Specifically, students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses towards both their BS and MS degrees. Each double-counted course must be a 400-level course taken in the student's senior year in place of a corresponding 300-level course. This leaves a total of 21 credits (seven courses) to be taken after completion of the Bachelors' degree.

Students may not automatically enroll in the BS/MS program during Freshman admission. They must specifically apply to the Graduate School, generally in their Junior year by using The Graduate Application Form (https://gpem.luc.edu/apply/). See Application Requirements (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-requirements) and Application Information (https://academics.cs.luc.edu/undergraduate/bsmsprograms.html#application-information) for more details.

Related Programs

Combined

- Computer Science (BS/MS) (p. 1068)
- Information Technology (BS/MS) (p. 1254)

CURRICULUM

The stand-alone MS programs each require 30 credits of graduate courses. This generally takes one and a half years to complete. BS/MS students must also take 30 credits of courses at the 400 level or greater. The main advantages come from the fact that some of the MS courses may be double-counted, applying to the BS also, and there can be a shift in some of the required MS courses based on what students took in the BS portion. In particular students in the BS/MS program are allowed to "double count" 9 credits (generally three 3-credit courses) of their Loyola COMP courses for both their BS and MS degrees. Each must be a 400 level course taken in the student's senior year *in place* of a 300 level major course. Also, a student wishing to take 123 or more credits while an undergraduate, can have 3 of the extra credits be for a fourth 400 level COMP course, and count that toward the MS if the extra course is needed for *no* undergraduate requirement, from the university, college, core, major or minor. Hence a BS/MS student with 120 credits and 9 400-level COMP credits counted for the BS is required to take only 21 credits (instead of 30 credits) of additional 400-level courses. If a student takes a further 3-credit 400 level COMP course beyond the 120 credits needed for the BS, then only 18 further credits are needed. In either case, students can finish the program in five years.

Total Hours		**82**

[1] By arrangement with the Undergraduate Program Director, the extra credit from MATH 161 Calculus I may be applied towards the "Computer Science Free Electives" category.

[2] See the details of registering in the links for each course. Students are encouraged to complete these credits during junior and senior years to draw on prior experience. Note:

- COMP 312 is a 3-credit course
- COMP 390 is limited to 3 total credits
- COMP 391 and COMP 398 will usually be limited to 6 total credits each, but permission may sometimes be granted for more.

[3] A list of available COMP 300-level courses can be found here (https://catalog.luc.edu/undergraduate/arts-sciences/computer-science/#coursestext).

[4] Electives can be any COMP 400 level class (p. 1576), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

[1] COMP 150 Introduction to Computing will apply to COMP Free Electives; students with prior experience in computer programming, for example a high school course modeled on the Exploring Computer Science (https://www.exploringcs.org/) or Computer Science Principles (https://apcentral.collegeboard.org/courses/ap-computer-science-principles/) curriculum may replace this course with a different COMP Free Elective at any time during the program. A score of 4 or 5 on the AP CS Principles Exam will earn actual credit for this course.

[2] May substitute MATH 161 Calculus I and may use the extra credit towards COMP Free Electives.

[3] A score of 4 or 5 on the AP CS A Exam will earn credit for this course.

[4] May substitute STAT 203 Introduction to Probability & Statistics or ISSCM 241 Business Statistics or PSYC 304 Statistics.

[5] Language must be completed through the 102 course level or through an exam (https://www.luc.edu/cas/college-requirements/).

Additional Rules of the BS/MS Program

1. All students need to take COMP 271 Data Structures I as part of their undergraduate major.
2. Students pursuing an MS in Software Engineering or Computer Science must take COMP 313 Object-Oriented Design by their senior year.
3. Students may take at most 6 credits total of internship at the undergraduate and graduate level, COMP 391 Internship in Computer Science plus COMP 499 Internship.
4. A student with credit for a 300 level COMP course that was taught in a combined class with a 400 level course may not take the 400 level course later for separate credit without permission from the Graduate Program Director. In particular for students with credit for COMP 317 Social, Legal, and Ethical Issues in Computing, the MS requirement for COMP 417 Social and Ethical Issues in Computing is waived, to be replaced by 3 MS elective credits. Similarly, in programs requiring COMP 413 Intermediate Object-Oriented Development, COMP 313 Object-Oriented Design will satisfy the requirement, but still, the course will need to be replaced by 3 MS elective credits.
5. In MS programs with restricted electives lists with two or more courses required from a larger explicit list, one of the courses may be waived if the corresponding 300 level undergraduate course was successfully completed at Loyola. The course must still be replaced by a 3-credit MS program elective.
6. All further individual MS program requirements must be met with the inclusion of the allowed 400 level courses taken as an undergraduate.

Requirements for Completion of the BS/MS Program

After admission to the BS/MS program, a student may request to be registered in their senior year for up to four 400 level COMP courses, with three of them replacing undergraduate major courses, and a fourth *if* the student will graduate with at least 123 credits and not need the fourth course as a part of *any* undergraduate requirement. Students generally take the remainder of their 30 credits of 400-level MS classes during their fifth year. This schedule can be modified for students with AP or transfer credit who desire to finish the combined program in less than

five years. Students in the program are expected to consult regularly with the Graduate Program Director to ensure that they are on track for completion of both the BS and MS degrees. The following are required to complete a BS/MS degree program:

- Successful completion of one of the BS degrees in the Department of Computer Science or Bioinformatics or a joint major with Mathematics or Physics
- The 400-level graduate courses, excluding those counted while an undergraduate, completed with a GPA of 3.0 or higher

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while

completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Students will gain familiarity with software development in a wide range of application contexts, using a range of programming languages and tools.

Special Education/International Affairs (BSEd/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BSEd/MA in Special Education and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BSEd/MA in Special Education and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

Minor

- Special Education Minor (p. 912)

Curriculum

For the BSEd, students will complete requirements for the Bachelor's degree, and graduate level courses may be used as electives. For the MA, students will take a total of ten classes (30 credit hours) to complete the program: Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in the College of Arts & Sciences or another School at Loyola.

TLSC 231	Teaching Science/Writing in Elem and Middle Grades	
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	
International Affairs MA Requirement		
Core		
INTA 420	Comparative Political Systems	3
INTA 430	Theories of International Politics	3
INTA 475	Political Analysis I	3
Capstone Experience		*3*
Select one of the following:		
INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1373) [1]		*18*

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.

Total Hours	**100**

[1] Two Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These two courses double-count for International Affairs MA requirements.

All of Loyola's Bachelor of Science in Education (BSEd) degrees use the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as its foundation. It's an approach that will help you stand out when you're searching for your first job.

The TLLSC curriculum focuses on hands-on learning. Your studies will be built around four Cornerstones—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

As you learn and grow, you'll progress through the three Phases (https://www.luc.edu/education/academics/areasofstudy/teachinglearningandleadingwithschoolsandcommunities/bsedprogramphases/) of the program. These phases will guide you through a comprehensive experience that will prepare you to make a difference with learners in diverse settings.

List of International Affairs MA Elective Courses

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

	Total Hours	**140-146**

[1] Students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420 Comparative Political Systems, PLSC 430 Theories of International Politics, and PLSC 475 Political Analysis I) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions

in your classroom and for your students and when assessing the effectiveness of teaching on learning. [Special Education]

Statistics/Applied Statistics (BS/MS)

The BS/MS (Accelerated Bachelor's-Master's) program in Applied Statistics is a five-year program that gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Applied Statistics while completing their BS degree. The applicant can be pursuing any of the BS degrees offered by the Department of Mathematics and Statistics. There are several advantages to enrolling in the BS/MS program.

- The MS program requirement to take the GRE is waived for students applying to the BS/MS program. The application fee to the program is also waived.
- Students can begin taking their Masters courses during their senior year of undergraduate study.
- The MS program in Applied Statistics requires 30 credits of graduate courses. This generally takes one and a half years to complete. Students in the BS/MS program are permitted to "double count" up to three of their Loyola 400-level STAT courses for both their BS and MS degrees; since this depends upon whether the BS is in Data Science, Mathematics or Statistics, speak with the Director for further details. Hence BS/MS students are required to take as few as 21 credits (instead of 30 credits) of additional 400-level courses in the fifth year, and can finish the program in five years.

Further Information

If you have additional questions about the program, please contact Timothy O'Brien (https://www.luc.edu/math/profiles/obrientimothy.shtml/), Graduate Program Director for Applied Statistics.

[1] These courses can be replaced with 400-level courses that can count toward both degrees.

The BS degree has waivers for both Quantitative and Scientific core.

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Suggested Sequence of Courses

Note: This is only one possibility. Among other things, depending on initial math placement, which can range from MATH 100 to MATH 263, the schedule will look very different. Especially for students starting at MATH 161 or above, there is a lot of space to pursue a minor or even a second major.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Upon completing the program, students majoring in statistics will be able to properly use statistical reasoning as it applies to inferential methods in a written analysis and/or oral presentation. [Statistics BS]

- Upon completing the program, students majoring in statistics will be able to create and interpret statistical models including understanding the limitations of the model in a written analysis and/or oral presentation. [Statistics BS]
- Upon completing the program, students majoring in statistics will be able to use statistical software to generate appropriate output for data analysis. [Statistics BS]
- Students are expected to have mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model. [Applied Statistics MS]
- Students are expected to have received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference. [Applied Statistics MS]
- Students are expected to have worked with data from application fields such as public/global health, medical, industrial and environmental research. [Applied Statistics MS]
- Students are expected to have received training to ethically apply statistical training in the real world. [Applied Statistics MS]
- Students are expected to have obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class. [Applied Statistics MS]
- Students are expected to have sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [Applied Statistics MS]

Statistics/Mathematics (BS/MS)

The accelerated BS/MS program gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Mathematics while completing their BS degree. Students earning a BS in Statistics will acquire knowledge of a broad range of statistical techniques and methods, an understanding of the mathematical underpinnings of these methods and techniques, and the computational skills, such as R and SAS, to apply and implement these methods using real data. Statistics majors are in high demand in industry in a wide array of fields such as medical research, technology companies, pharmaceuticals, insurance, finance, government, genetics, public health, sports, and epidemiology to name a few.

There are several advantages to pursuing the BS/MS program. Chief among them are time and cost: by taking graduate courses during their senior year (at the undergraduate tuition rate), students in the BS/MS program save one semester over the usual path to a Master's degree. Additionally, students in the STEM fields holding an MS degree are more competitive for jobs.

Related Programs

Major

- Mathematics (BS) (p. 532)
- Statistics (BS) (p. 535)

Combined

- Statistics/Applied Statistics (BS/MS) (p. 1378)

Curriculum

Students in the BS/MS program are permitted to take up to 10 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. Of these, nine credits may come 400-level courses that have 300-level equivalents that satisfy BS program requirements. The one-credit course MATH 401 should also be taken during the student's undergraduate career. (While it does not fulfill any specific undergraduate program requirement, it does count towards the credit-hours requirement for a degree from the College of Arts & Sciences.)

Further Information

Interested students should reach out to the Graduate Program Director in their sophomore year (or early junior year) to optimize course selection for their remaining semesters.

Program Policies

- AP Credit Policies (p. 520)
- No 300-level courses will apply toward graduate requirements.
- A student with credit for a 300-level MATH/STAT/COMP course that has an equivalent 400-level offering may not take the 400-level course for separate credit.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation;
- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines;
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries;
- receive training on how to act responsibly and ethically within the discipline.

Theology (BA/MA)

The Department of Theology offers undergraduates the unique opportunity to complete a combined BA/MA in Theology in just five years (instead of the customary six). Upon completion of the degree, graduates will be prepared to assume a variety of positions where theological training and competence are in demand, such as teaching theology in a high school/academy, developing educational programs for a parish, or entrance into a doctoral program in theology or religious studies for those interested in life as a professor.

The 5 year BA/MA in Theology aims to:

- Accelerate the overall time-to-graduation of a student.
- Reduce the total tuition cost of obtaining both degrees.
- Encourage excellent undergraduate students in Theology and Religious Studies to continue their graduate studies at Loyola.

Related Programs

Major

- Religious Studies (BA) (p. 678)
- Theology (BA) (p. 682)

Combined

- Theology/International Affairs (BA/MA) (p. 1388)

Curriculum

Students pursuing their BA in Theology take seven entry level and compulsory courses in that field, leaving them with five Theology electives to complete in the first stage of the program. In the accelerated degree, students would take four MA level courses during their senior year - two 400-level courses that would count towards the elective requirement for the major; two 400-level courses that would count towards a student's general elective requirement. While there is some possibility of flexibility here, the courses that would be the most suitable for the Theology electives are THEO 460 Seminar in History of Theology and two MA level courses in Bible, e.g. Old Testament and New Testament at the 400 level.

Three courses in Bioethics [5]		
Total Hours		**66**

[1] Eligible students may substitute HONR 101 Western Traditions - Antiquity to the Middle Ages / HONR D101 Developments Western Thought I Discussion for the Doctrine requirement.

[2] Students may take the Christian Thought courses at the 400-level - THEO 460 Seminar in History of Theology - in order to fulfill the requirement to complete two 400 level courses for the BA/MA.

[3] With prior approval from the undergraduate program director, students may replace THEO 373 Theology Capstone with THEO 353 Religious Traditions.

[4] At least seven (7) of the 12 courses required for the major must be at the 300-level or higher. With prior approval from the undergraduate program director, two 400 level Masters courses will be taken senior year and will be double-counted as credits for both the BA and the MA degrees. Courses used for other Theology major requirements cannot be used as electives.

[5] One course in Bioethics may be taken at the Neiswanger Institute.

Concentration Descriptions

The Master of Arts in Theology requires 30 credit hours of coursework and a comprehensive examination. The following descriptions are provided to aid in choosing a concentration area:

- **Theological Studies**: emphasizes exposure to the full range of theological investigation.
- **Biblical Languages and Literature**: provides students with the initial language and biblical study necessary to apply to doctoral programs in Biblical Studies. Half of the coursework is in biblical Greek and Hebrew. Note: requires an additional 6 credit hours due to intensive language requirements.
- **Biblical Studies**: directed towards students with a particular interest in Biblical Studies, but does not incorporate the language study necessary for doctoral work in Biblical Studies.
- **Christian Ethics**: focuses on coursework in Christian Ethics with similarities to the concentration in Theological Studies for a comprehensive overall coursework.
- **Bioethics & Health Care Policy**: offered jointly with the Neiswanger Institute for Bioethics and Healthcare Leadership. This concentration is appropriate for students interested in pursuing a social ethical understanding of bioethics. Courses in this concentration address the history of bioethics including the issues of racism and eugenics; methods and approaches in medical ethics and bioethics (ethnography, narrative bioethics, feminist bioethics); and topics in bioethics such as reproductive medicine and reproductive justice, genetics, disability ethics, spiritual care ethics, end of life, and healthcare justice.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon

a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level

course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Demonstrate knowledge of the sources and historical development of beliefs and practices of Christianity with particular attention to the Roman Catholic tradition.
- Apply scholarly methods to the understanding of scripture.
- Demonstrate familiarity with key theological concepts and doctrines of the Christian faith (e.g., Christology, trinity, ecclesiology, sacramental theology, etc.) as enunciated by at least two theologians.
- Demonstrate foundational knowledge of at least one other religious tradition outside of Christianity.
- Demonstrate an understanding of how Christian perspectives and sources inform responses to pressing ethical questions.

Theology/International Affairs (BA/MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impacts of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Accelerated BA/MA in Theology and International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

Loyola University Chicago and the City of Chicago together serve as the ideal location for an MA in International Affairs: Loyola embodies a long commitment to interdisciplinary education; and Chicago is consistently ranked as one of the top ten global cities in the world. The program offers a unique urban setting for students interested in the advanced study of International Affairs.

The majority of full-time students are expected to finish the program in 5 years, as opposed to the six years if both programs are pursued separately. Undergraduate students from participating programs at Loyola will be able to pursue an accelerated BA/MA in Theology and International Affairs.

Students will also be able to take graduate courses in the School of Communication, the School of Education (International Education), the School of Law, Parkinson School of Health Sciences and Public Health, Quinlan School of Business, and the School of Social Work.

INTA 470	Fieldwork in PLSC-Internship	
PLSC 499	Directed Readings	
PLSC 605	Master's Study	
Electives (p. 1390) [4]		*18*

In addition to the four core classes, students will take an additional six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core INTA courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses.

Total Hours	**60**

1 Eligible students may substitute HONR 101 Western Traditions - Antiquity to the Middle Ages/HONR D101 Developments Western Thought I Discussion for Doctrine requirement.

2 With prior approval from the undergraduate program director, students may replace THEO 373 Theology Capstone or THEO 280 Religion & Interdisciplinary Studies (Engaged Learning) with THEO 353 Religious Traditions. THEO 280 Religion & Interdisciplinary Studies must be taken as an **Engaged Learning Course**.

3 With prior approval from the undergraduate program director, up to two elective courses may be taken outside the Department of Theology. Four Graduate-level International Affairs courses must be taken Senior Year. These courses can count as major electives or general electives. These four courses double-count for International Affairs MA requirements.

The participating programs that will contribute classes include: Global Studies, History, Philosophy, Political Science, Psychology, Sociology, and Theology, Criminal Justice & Criminology, as well as the Schools of Communication, Education, Business, Law, Health Sciences and Public Health, and Social Work.

List of MA Elective Courses

Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses to see whether the course can serve as an elective.

College of Arts and Sciences

Code	Title	Hours
Criminal Justice and Criminology Department		
CJC 416	International Criminal Justice	3
Methods Courses		
CJC 403	Research Methods and Program Evaluation	3
CJC 404	Applied Data Analysis and Interpretation	4
History Department		
HIST 441	Women's & Gender History: Europe	3
HIST 459	Environmental History	3
HIST 464	Transnational Urban History	3
Methods Courses		
HIST 483	Oral History: Method and Practice	3
Modern Languages and Literatures Department		
Language Research Tool: Although there is no language requirement, students interested in honing their foreign language skills will have the option of taking a 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola include Chinese, French, German, Italian, and Spanish.		
MLL also offers graduate-level courses in Spanish as part of their master's degree in Spanish. These courses are as follows and would be open only to interested students with advanced writing, speaking, and reading skills in Spanish. These courses are as follows:		
SPAN 405	Critical Methods (pan-Hispanic world)	3
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	3
Philosophy Department		
PHIL 459	Philosophy of Law	3
PHIL 463	Virtue Ethics (includes non-Western philosophy)	3
PHIL TBD	Critical Race Theory (originally taught as a "special topics" course; is being turned into a permanent course)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	3
Methods Courses		
PHIL 400	Philosophy Research Tools	3
Political Science Department		
PLSC 421	Democratic Political Systems	3
PLSC 422	Authoritarian Political Systems	3
PLSC 431	Formulation US Foreign Policy	3
PLSC 432	Comparative Foreign Policy Analysis	3
PLSC 433	International Organization	3
PLSC 435	International Political Economics	3
PLSC 436	International Conflict	3
Methods Courses		
PLSC 401	Intro to Research Design & Method	3
PLSC 476	Political Analysis II	3

[1] Explanatory note about 1, 2, 3, and variable credit hour courses from the School of Law: "For the law courses showing a range of hours (e.g., 1-3 credit hours), students have the option to choose the number of credits for enrollment within the range. For students opting for the higher credits (i.e., enrollment in 3 credit hours rather than 1 credit hour would require additional assignments and/or an examination). If the MA students in these courses need to be enrolled in 3 credit hours, the following notation can be included with the course listing: 'MA students must choose the 3 credit option for enrollment in this course'." Please note that courses to be included in this MA program will require students choosing the 3-credit option.

Suggested Sequence of Courses

In order to provide optimal flexibility in the program, there is no required course sequence. However, students are expected to take two graduate-level courses in each semester of their senior year and a total of six graduate-level courses in their fifth year. There is no required course sequence, but we strongly suggest that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) whenever they are offered before taking elective courses.

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]

- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
5 Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the

option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Students will graduate from our program having achieved:

- a foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data [International Affairs]
- knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields [International Affairs]
- an interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola [International Affairs]
- enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience [International Affairs]
- strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis. [International Affairs]
- Accurately describe basic sources and historical development of beliefs and practices of Christianity, with a particular focus on the Roman Catholic tradition. [Theology]
- Analyze a biblical text using academic tools. [Theology]
- Compare at least two different approaches to basic theological concepts. [Theology]
- Describe beliefs and practices of one religion other than Christianity. [Theology]
- Name the four sources of Christian ethics: Scripture, tradition, reason, and experience. [Theology]
- Analyze and critically evaluate arguments from at least two different Christian ethicists on a contemporary ethical issue. [Theology]

Theoretical Physics and Applied Mathematics/Applied Statistics (BS/MS)

The Accelerated Bachelor's Master's program allows undergraduate students to receive their Master's Degree in a total of five years. Students apply in their junior year and must complete all requirements for the undergraduate and graduate programs. They are able to finish the program in only one additional year by double counting up to 9 credits in their senior year towards both their Undergraduate Degree and their Master's Degree.

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

1 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

2 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

3 In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Loyola University Chicago's major in Theoretical Physics / Applied Mathematics is an interdisciplinary program that provides extensive training in both physics and mathematics. It prepares students for graduate study in physics, mathematics, or applied mathematics; careers in fields such as engineering or computer science that value quantitative reasoning and mathematical modeling; or technical training in professions like medicine, dentistry, or law.

Students majoring in Theoretical Physics / Applied Mathematics possess a versatile set of skills that are well-suited to data science, numerical modeling, and quantitative analysis. They may pursue careers in higher education, at research institutes or government labs, or in high-tech industries. Recent majors have gone on to world class graduate programs in fields ranging from physics to neuroscience, and programming jobs at major tech companies.

The course of study for the Theoretical Physics / Applied Mathematics major covers the core classes in the Physics major, provides laboratory experience, and adds a comprehensive mathematics component. Upon completion of this program and the Master of Science program, students will:

- Exhibit foundational knowledge in both physics and mathematics. [BS]
- Be able to develop and interpret mathematical models that provide both quantitative and qualitative understanding of physical systems. [BS]
- Possess intermediate level laboratory skills that will serve as a foundation for more advanced training in graduate or professional school. [BS]
- Recognize how careful data collection and analysis helps develop or falsify scientific theories. [BS]
- Demonstrate effective and ethical decision-making abilities in issues related to the sciences. [BS]
- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model. [MS]
- Have received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference. [MS]
- Have worked with data from application fields such as public/global health, medical, industrial and environmental research. [MS]
- Have received training to ethically apply statistical training in the real world. [MS]
- Have obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class. [MS]
- Have sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program [MS]

Theoretical Physics and Applied Mathematics/Mathematics (BS/MS)

The accelerated BS/MS program gives academically successful Loyola undergraduates the opportunity to pursue the MS degree in Mathematics while completing their BS degree. Since the advent of statistical mechanics, quantum mechanics, and the like, a solid foundation in analysis, abstract algebra, and statistics is essential for students wishing to study the basic physical laws governing our universe. Students pursuing a BS in Theoretical Physics and Applied Mathematics with gain exposure to these modern physical theories and to the abstract mathematics underpinning them.

There are several advantages to pursuing the BS/MS program. Chief among them are time and cost: by taking graduate courses during their senior year (at the undergraduate tuition rate), students in the BS/MS program save one semester over the usual path to a Master's degree. Additionally, students in the STEM fields holding an MS degree are more competitive for jobs.

Related Programs

Major

- Theoretical Physics and Applied Mathematics (BS) (p. 537)

Combined

- Mathematics (BS/MS) (p. 1275)
- Theoretical Physics and Applied Mathematics/Applied Statistics (BS/MS) (p. 1393)

Curriculum

The following are required to complete this accelerated bachelor's/master's program:

- Successful completion of the Theoretical Physics and Applied Mathematics BS, within the College of Arts & Sciences.
- Successful completion of the 30-credit Mathematics MS degree with a GPA of 3.0 or higher.

Students in the BS/MS program are permitted to take up to 10 credit hours of 400-level courses that would apply toward their MS program requirements while completing their undergraduate degree. Of these, nine credits may come 400-level courses that have 300-level equivalents that satisfy BS program requirements. The one-credit course MATH 401 should also be taken during the student's undergraduate career. (While it does not fulfill any specific undergraduate

program requirement, it does count towards the credit-hours requirement for a degree from the College of Arts & Sciences.)

Program Policies

- AP Credit Policies (p. 520)
- No 300-level courses will apply toward graduate requirements.
- A student with credit for a 300-level MATH/STAT/COMP course that has an equivalent 400-level offering may not take the 400-level course for separate credit.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

Loyola University Chicago's major in Theoretical Physics / Applied Mathematics is an interdisciplinary program that provides extensive training in both physics and mathematics. It prepares students for graduate study in physics, mathematics, or applied mathematics; careers in fields such as engineering or computer science that value quantitative reasoning and mathematical modeling; or technical training in professions like medicine, dentistry, or law.

Students majoring in Theoretical Physics / Applied Mathematics possess a versatile set of skills that are well-suited to data science, numerical modeling, and quantitative analysis. They may pursue careers in higher education, at research institutes or government labs, or in high-tech industries. Recent majors have gone on to world class graduate programs in fields ranging from physics to neuroscience, and programming jobs at major tech companies.

The course of study for the Theoretical Physics / Applied Mathematics major covers the core classes in the Physics major, provides laboratory experience, and adds a comprehensive mathematics component. Upon completion of this program and the Master of Science program, students will:

- Exhibit foundational knowledge in both physics and mathematics. [BS]

- Be able to develop and interpret mathematical models that provide both quantitative and qualitative understanding of physical systems. [BS]
- Possess intermediate level laboratory skills that will serve as a foundation for more advanced training in graduate or professional school. [BS]
- Recognize how careful data collection and analysis helps develop or falsify scientific theories. [BS]
- Demonstrate effective and ethical decision-making abilities in issues related to the sciences. [BS]
- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation [MS]
- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines [MS]
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries [MS]
- receive training on how to act responsibly and ethically within the discipline [MS]

Web Technologies/Information Technology Leadership and Strategy (BA/MPS)

The BA Web Technologies/ MPS IT Leadership and Strategy program is an accelerated, online program that gives academically successful Loyola SCPS BA Web Technologies majors the opportunity to pursue the MPS degree in IT Leadership and Strategy while completing their BA degree. This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA Web Technologies program to take four of the courses from the MPS IT Leadership and Strategy in their senior year. One course will be taken as part of the major and three will be taken as elective courses and will count toward the degree requirements for both programs.

Related Programs

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

One of the MPS degree courses will count toward the BA Web Technologies major requirements: COMP 417 Social and Ethical Issues in Computing (in lieu of COMP 317) and should be taken in the students' senior year as an undergraduate.

Guidelines for Accelerated Bachelor's/Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

[1] Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
[2] The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
[3] If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.
[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.
[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.
[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.
[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Develop modern, standards-compliant web applications while demonstrating proficiency in best practices, utilizing contemporary web technology solutions, and effectively managing software project versions through version control techniques. [Web Technologies]
- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives with UX Design goals by effectively utilizing the User Experience (UX) Design process. [Web Technologies]
- Utilize client-side services to interact with server-side APIs, model and implement structured and unstructured data, and perform data analysis using standard toolkits and libraries. [Web Technologies]
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections. [Web Technologies]
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency

in programming, testing, and debugging using a mainstream object-oriented language. [Web Technologies]
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions. [Web Technologies]
- Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies. [Information Technology Leadership and Strategy]
- Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework. [Information Technology Leadership and Strategy]
- Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success. [Information Technology Leadership and Strategy]
- Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies. [Information Technology Leadership and Strategy]

Web Technologies/Instructional Design (BA/MPS)

The BA Web Technologies /MPS Instructional Design program is an accelerated, online program that gives academically successful Loyola SCPS BA Web Technologies majors the opportunity to pursue the MPS degree in Instructional Design while completing their BA degree. This program reduces the total number of courses needed and the total time needed for the combined degrees. Current accelerated bachelors/master's degree programs at LUC allow qualified students to take up to four graduate-level courses as undergraduates. This program will allow students in the BA Web Technologies program to take four of the courses from the MPS Instructional Design in their senior year. These courses will be taken as elective course and will count toward the degree requirements for both programs.

Related Programs

Major

- Web Technologies (BA) (p. 868)

Master's

- Instructional Design (MPS) (p. 1928)

Curriculum

Up to 12 credit hours can be shared between the undergraduate and graduate degree. These credits fulfill general electives for the 120 credits needed for the bachelor's degree.

Code	Title	Hours
BA Requirements		
COMP 170	Introduction to Object-Oriented Programming	3
COMM 275	Web Design and Usability	3
CPST 242	Design for the Web	3
CPST 342	Introduction to Web Application Development	3
COMP 251	Introduction to Database Systems	3

[1] Core Requirements - Learn More (p. 1405)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Students must start with the MPS ID pre-requisite course CIEP 470 Principles of Instructional Design, and end with INDN 490 Instructional Design Capstone (as the last course in the MPS degree, not to be taken as an undergraduate).

Guidelines for Accelerated Bachelor's/ Master's Programs

Terms

- Accelerated Bachelor's/Master's programs: In this type of program, students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees.
- Shared credits: Graduate level credit hours taken during the undergraduate program and then applied towards graduate program requirements will be referred to as shared credits.

Admission Requirements

Accelerated Bachelor's/Master's programs are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these programs must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these programs may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, programs may choose to have more stringent admissions requirements in addition to those minimal requirements below.

Requirements:

- Declared appropriate undergraduate major,
- By the time students begin taking graduate courses as an undergraduate, the student has completed approximately 90 credit hours, or the credit hours required in a program that is accredited by a specialty organization,[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the program-specific requirements, a minimum major GPA that is at or above the program-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]

Students not eligible for the Accelerated Bachelor's/Master's program (e.g., students who have not declared the appropriate undergraduate major) may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Bachelor's/Master's program who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.[3]

Ideally, a student will apply for admission (or confirm interest in proceeding towards the graduate degree in opt-out programs) as they approach 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the program. Once admitted as an undergraduate, Program Directors should ensure that students are enrolled using the plan code associated with the Accelerated Bachelor's/ Master's program. Using the plan code associated with the Accelerated Bachelor's/Master's program will ensure that students may be easily identified as they move through the program. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the graduate program, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.

2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.

3 If students choose not to enroll in the Accelerated Bachelor's/Master's program, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

For more information on Admissions requirements, visit here (https://gpem.luc.edu/portal/admission/?tab=home).

Curriculum

Level and progression of courses. The Accelerated Bachelor's/Master's programs are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Bachelor's/ Master's programs should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[1,2] Up to 50% of the total graduate level credit hours, required in the graduate program, may come from 300/400 level courses where the student is enrolled in the 400 level of the course. Further, at least 50% of the credit hours for the graduate program must come from courses that are designed for and restricted to graduate students who have been admitted to a graduate program at Loyola (e.g., enrolled in plan code that indicates the Accelerated Bachelor's/Master's program, typically ending with the letter "D").[3]

In general, graduate level coursework should not be taken prior to admission into the Accelerated Bachelor's/Master's program. Exceptions may be granted for professional programs where curriculum for the Accelerated Bachelor's/Master's program is designed to begin earlier. On the recommendation of the program's Graduate Director, students may take one of their graduate level courses before they are admitted to the Accelerated Bachelors/Master's program if they have advanced abilities in their discipline and course offerings warrant such an exception.[4] Undergraduate degree requirements outside of the major are in no way impacted by admission to an Accelerated Bachelor's/Master's program.[5]

Shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count towards the master's degree. Up to 50% of the total graduate level credit hours, required in the graduate program, may be counted in meeting both the undergraduate and graduate degree requirements. Of those shared credits, students in an Accelerated Bachelor's/Master's program should begin their graduate program with the standard introductory course(s) for the program whenever possible. So that students may progress through the Accelerated Bachelor's/Master's program in a timely manner, undergraduate programs are encouraged to design their curriculum such that a student can complete some required graduate credit hours while completing the undergraduate degree. For instance, some of the graduate curriculum should also satisfy electives for the undergraduate major.

The program's Graduate Director will designate credit hours to be shared through the advising form and master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned hours and GPA. Graduate

credit hours taken during the undergraduate program will not be included in the graduate GPA calculation.

[1] If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400 level course or higher.

[2] Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

[3] In rare cases, the Graduate Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

[4] For example, if a particular course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful, the Graduate Director may allow a student to take a graduate level course to be shared prior to the student being formally admitted to the graduate program. See, also, footnote 3.

[5] Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a graduate program.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. Students in these programs must be continuously enrolled from undergraduate to graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Bachelor's/Master's program, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Learning Outcomes

- Develop modern, standards-compliant web applications while demonstrating proficiency in best practices, utilizing contemporary web technology solutions, and effectively managing software project versions through version control techniques. [Web Technologies]
- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives with UX Design goals by effectively utilizing the User Experience (UX) Design process. [Web Technologies]
- Utilize client-side services to interact with server-side APIs, model and implement structured and unstructured data, and perform data analysis using standard toolkits and libraries. [Web Technologies]
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections. [Web Technologies]
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language. [Web Technologies]
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions. [Web Technologies]
- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences. [Instructional Design]
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials. [Instructional Design]
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues. [Instructional Design]
- Conduct research and predictive data set analysis to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices and performance gaps in an organization. [Instructional Design]

University Core

University Core Curriculum

The Loyola University Chicago Core Curriculum plays a central educational role in every Loyola student's undergraduate experience. Designed to provide both breadth and depth to a student's

program of study, the Core Curriculum introduces students to key concepts and modes of thought in a variety of areas of human intellectual endeavors. The Core Curriculum actualizes transformative education in the Jesuit tradition, helping students to define their values, discover their gifts and passions, and look at their role in society as being one in service of humanity and for the common good.

- About the Core (p. 1406)
- Core Area and Courses (p. 1406)
  - Artistic Knowledge and Inquiry (p. 1407)
  - College Writing Seminar (p. 1407)

- Honors and the Core (p. 1417)

About the Core

About the Core

The University Core Curriculum introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Core Areas. Core coursework develops students' understanding through knowledge and experience in the Core Areas of Artistic, Ethical, Historical, Literary, Quantitative, Philosophical, Scientific, Societal and Cultural, and Theological and Religious Knowledge and Inquiry, plus written communication in the College Writing Seminar. In addition to knowledge and skills development, Core courses integrate and promote values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world. Many courses in the Core were specifically designed to highlight the value of diversity (https://catalog.luc.edu/undergraduate/university-requirements/university-core/diversity-core/).

To complete the University Core Curriculum, students will take 16 courses across ten Core Areas. Two courses are required in six of these areas (Historical, Literary, Scientific, Societal and Cultural, Philosophical, and Theological and Religious Knowledge and Inquiry). Students will begin their studies in these six areas with a foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the foundational course, students will have an array of options to further their studies by taking one of a variety of Tier II classes to pursue particular interests in more depth. The other four areas (College Writing Seminar and Artistic, Quantitative, and Ethical Knowledge and Inquiry) require one course each.

Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study. Please see the Core and your major and minor (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-major-minor/) for more information. Students in the Interdisciplinary Honors Program should note the relationship between the Honors Program and Core Curriculum (https://catalog.luc.edu/undergraduate/university-requirements/university-core/honors-core/).

Please note that these requirements apply to students obtaining a bachelor's degree. Students entering as freshmen (https://catalog.luc.edu/undergraduate/university-requirements/university-core/students-entering-freshmen/), transfer students (https://catalog.luc.edu/undergraduate/university-requirements/university-core/transfer-students/), and Arrupe College (https://www.luc.edu/arrupe/academics/degrees/) students have distinct requirements for completing the Core Curriculum.

What's next? Head to the Core Curriculum Guide (p. 1406) to find out more about the specific Core requirements and learn about courses being offered.

Core Area and Courses

The University Core Curriculum includes 16 required courses distributed across 10 Core Areas. Core Curriculum coursework develops students' understanding in the Core Areas of Artistic, Ethical, Historical, Literary, Quantitative, Philosophical, Scientific, Societal and Cultural, and Theological and Religious Knowledge and Inquiry, as well written communication in the College Writing Seminar. In addition to knowledge and skills development, Core courses integrate and promote values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world.

Required Core Areas	Required Courses	Credit Hours
Artistic Knowledge and Inquiry (p. 1407)	1	3
College Writing Seminar (p. 1407)	1	3
Ethical Knowledge and Inquiry (p. 1408)	1	3
Quantitative Knowledge and Inquiry (p. 1410)	1	3
Historical Knowledge and Inquiry (p. 1408)	2	6
Literary Knowledge and Inquiry (p. 1408)	2	6
Philosophical Knowledge and Inquiry (p. 1409)	2	6
Scientific Knowledge and Inquiry (p. 1410)	2	6

Theological & Religious Knowledge and Inquiry (p. 1411)	2	6
Total	**16 courses**	**48 hours**

Artistic Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore artistic traditions and expressions.

Area Objectives: The study of art is essential for a complete education of the whole person because it fosters a search for truth, respect for the person, and encourages students to develop critical habits of the mind and ethical standards of behavior. "Art" is understood to encompass any and all forms of artistic expression, including but not limited to, dance, music, theater, film, and visual and plastic arts. The courses in this Core Area will provide students with the opportunity to engage in the arts through formal study or creative processes, and to explore non-linear modes of thinking, problem-solving, and expression. Students will have the opportunity to acquire collaborative skills through group problem solving and engaged dialog where applicable.

Curriculum

Courses (3 credit hours required)

In order to satisfy the Core Artistic Knowledge and Experience requirement, a student must successfully complete three credit hours. This may be accomplished by taking one three credit hour class or by taking a combination of one credit hour classes.

Code	Title	Hours
Choose one or more of the following:		3
CLST 206	Art of Ancient Greece	
CLST 207	Art of the Roman World

MUSC 154R	Introduction to Opera in Rome	
THTR 100	Intro to Theatre Experience	
THTR 252	Theatrical Design I	
THTR 261	Beginning Acting	

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. analyze, interpret, create, or participate in the creation or performance of some forms of artistic expression as a means of exploring human experience and understanding the creative process.
2. use critical and technical vocabulary to describe, analyze, and formulate an argument about artistic productions.
3. assess how various forms of artistic expression shape the experience and response of the audience.
4. evaluate works of art within their aesthetic, historical, or cultural contexts.
5. recognize or participate in the artistic-cultural life of their communities.

College Writing Seminar

Area Goal: This Core Area of Inquiry will invite students to explore strategies for process-based drafting, research, and argumentation in academic writing.

Area Objectives: The complexity of contemporary global society requires that individuals demonstrate effective written communication and rhetorical skills to engage in dialogue, whether in their undergraduate courses, in their careers, or in civic and public discourse. Through this course, students will explore academic practices and strategies--including critical reading and thinking, rhetorical argumentation, the recursive writing process, and information/research literacy--that will develop their writing skills and offer them the opportunity to understand their responsibility to their readers, their sources, and themselves as writers.

Curriculum

Core College Writing Seminar (1 course required)

Code	Title	Hours
UCWR 110	Writing Responsibly	3

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. summarize, analyze, synthesize, and evaluate texts through informal and formal writing assignments.
2. use a variety of sources to formulate and support a clear claim: this includes finding, evaluating, analyzing, synthesizing, and documenting sources appropriately.
3. apply recursive and reflective processes in writing, including strategies for invention, drafting, organization, peer review, revision, and editing.
4. articulate rhetorical strategies in a range of media and texts.

5. write clearly and effectively, tailoring writing and rhetorical strategies to the goals and audience of a given project.

Ethical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore topics in Ethics such as the nature of human flourishing, moral responsibility, and justice through critical reflection on a range of ethical frameworks and methodologies.

Area Objectives: Developing a student's ethical awareness and reflection is central to the Core Curriculum. By completing the Core Ethics course, students will explore the differences and similarities between ethical frameworks, the complexities of ethical frameworks and their applications, and historical or contemporary issues that can be interpreted through the lens of ethical frameworks.

Curriculum

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		
PHIL 181	Ethics	3
PHIL 182	Social and Political Philosophy	3
THEO 185	Christian Ethics	3
THEO 186	Global Religious Ethics	3

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. describe and discuss the central features (e.g., concepts, constructs, and principles) that comprise different ethical frameworks or schools of thought.
2. compare and contrast various ethical frameworks, for example, how these frameworks can be applied to living well and promoting the flourishing of others.
3. identify central features of historical or contemporary ethical issues.
4. apply an ethical framework or school of thought to analyze a historical or contemporary issue, defend their analysis by explaining how the framework/school is present, and the advantages and disadvantages of using it.

Historical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the human experience from a historical perspective.

Area Objectives: History is a form of inquiry, critical thinking, and understanding that encompasses all aspects of human experience and illuminates how the past shapes the present and thus the future. Through these courses, students will explore historical and contemporary perspectives with a view to fashioning a humane and just world. Students will have the opportunity to examine a range of historical evidence in multiple forms such as documents, films, diaries, images, artifacts, empirical data, and oral and digital histories.

Curriculum

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
HIST 101	Culture, Power and Identity: Western Ideas & Institutions to 17th Century	
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	
HIST 103	American Pluralism [D]	
HIST 104	Global History Since 1500 [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for all Tier II Courses: HIST 101 Culture, Power and Identity: Western Ideas & Institutions to 17th Century, HIST 102 Culture, Power and Identity: Western Ideas & Institutions from 17th Century, HIST 103 American Pluralism, **or** HIST 104 Global History Since 1500. Please check requirements for declared majors/minors for exceptions.

CLST 274	World of Archaic Greece	
CLST 275	World of Classical Greece	
CLST 276	World of Classical Rome	
CLST 277	World of Late Antiquity	
HIST 208	East Asian History: Themes & Issues [D]	
HIST 209	Survey of Islamic History [D]	
HIST 210	Latin American History: Themes & Issues [D]	
HIST 211	US History to 1865: Themes & Issues	
HIST 212	US History since 1865: Themes & Issues	
HIST 213	African History: Themes & Issues [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. recognize the importance of chronology, sequential development, and geography in shaping history.
2. explain processes of historical continuity and change.
3. assess and explain the relationship between historical events and cultural, social, and political forces.
4. interpret varied forms of sources as historical evidence.
5. illustrate how human and societal values, as well as methods of analysis and interpretation, shape and are shaped by historical context

Literary Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore literary traditions and expressions.

Area Objectives: Through these courses, students will examine how literary expression manifests in different types of texts. The kinds of texts students can study are expansive: e.g., poems, plays, novels, stories, memoirs, essays, magazines, newspapers, and more in print and online formats. Students have opportunities to select courses that cover literature from a range of time periods, places, perspectives, cultures, languages, identities, and social positions that have generated and continue to generate rich literature. This range extends across literatures produced in a variety of languages by the many cultures and social groups of Africa, the Americas, Asia, Europe, and Oceania as well as the diasporas and migrations within and between these regions. Students will explore the forms that shape literary expressions; the creative processes that produce them; the concepts and terms that facilitate their interpretation; and the cultural, social, linguistic, and historical contexts in which they are produced.

LITR 283	Major Authors in Translation	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. identify, explain, and analyze carefully key components of various literary productions that deepen understanding of human experiences and creative processes.
2. use critical and technical vocabulary to describe, analyze, and formulate an argument about literary productions.
3. assess how various forms of literary expression shape the experience and response of the audience.
4. examine multiple interpretive possibilities of any literary work.
5. articulate the relationships of works of literature to the cultures and histories in which they were created and used.

Philosophical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore key philosophical questions and traditions.

Area Objectives: Through these courses, students will explore influential philosophical questions, positions, and methods of inquiry. Students will develop intellectual attitudes that enable them to identify and assess implicit presuppositions and formulate and defend responses to philosophical issues, including ethical issues.

Curriculum

Foundational/Tier I

Code	Title	Hours
PHIL 130	Philosophy & Persons	3

Tier II

Requirement for all Tier II Courses: PHIL 130 Philosophy & Persons

Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
PHIL 271	Philosophy of Religion	
PHIL 272	Metaphysics	
PHIL 273	Philosophy of Science	
PHIL 274	Logic	
PHIL 275	Theory of Knowledge	
PHIL 277	Aesthetics	
PHIL 277R	Aesthetics: the Aesthetic Experience in Rome	
PHIL 279	Judgment and Decision-Making	
PHIL 284	Health Care Ethics	
PHIL 286	Ethics and Education	
PHIL 287	Environmental Ethics	
PHIL 288	Culture and Civilization	

PHIL 288R	Culture & Civilization in Rome
PLSC 100	Political Theory
PSYC 280	Psychology of Judgment and Decision-Making

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. describe the historical or conceptual development of major philosophical questions.
2. explain the contributions major philosophical questions make to the understanding of ourselves as humans.
3. articulate some of the major problems and range of responses central to philosophical inquiry, including questions concerning truth and knowledge, reality, moral values, or social justice.
4. construct philosophical arguments, which means students will support their ideas with reasons, assess critically the underlying assumptions of their positions, and evaluate the strengths and weaknesses of alternative positions.

Quantitative Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the major concepts and methods involved in the analysis of quantitative data.

Area Objectives: Through these courses, students will explore how one or more fields--mathematics, statistics, computing, and the social sciences--understand and analyze quantitative information. This involves reasoning by symbolic, numerical, or geometrical means, and determining various ways to solve problems while predicting possible consequences.

Curriculum

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		3
CJC 206	Statistics	
COMP 122 / MUSC 122	Introduction to Digital Music	
COMP 125	Visual Information Processing	
COMP 150	Introduction to Computing	
ISSCM 241	Business Statistics	
MATH 108	Real World Modeling with Mathematics	
PLSC 216	Political Numbers	
STAT 103	Fundamentals of Statistics	

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. represent and interpret quantitative information symbolically, graphically, numerically, verbally, and in written form.
2. describe the strengths and limitations of various types of quantitative models.
3. describe the utility of quantitative methods for scientific inquiry or technological progress.
4. apply quantitative methods to solve problems or model situations arising in scientific, political, social, or personal contexts.

Scientific Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the fundamental principles, concepts, questions, and methods of science.

Area Objectives: In the study of scientific knowledge and inquiry, students will explore how empirical questions are addressed using the iterative methods and tools of science. Students will also examine the scientific underpinnings of environmental processes. This Core Area will prepare students to make reasoned decisions and informed judgments about the role science plays for people, communities, societies, and life on Earth.

Curriculum

Foundational/Tier I

Code	Title	Hours
ENVS 101	The Scientific Basis of Environmental Issues	3

Tier II

A requirement for all Tier II Courses: ENVS 101 The Scientific Basis of Environmental Issues. Please check requirements for declared majors/minors for exceptions.

ENVS 273	Energy and the Environment	
ENVS 283	Environmental Sustainability	
PHYS 101	Liberal Arts Physics	
PHYS 102	Planetary and Stellar Astronomy	
PHYS 106	Physics of Music	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. explain Earths' physical, chemical, and biological systems and the implications of their alteration by human activities.
2. describe how scientific data are collected, analyzed, and interpreted using the Scientific Method and fundamental scientific principles and concepts.
3. collect, analyze, and interpret scientific data to explore empirical questions.
4. communicate scientific processes and results.

5. articulate the philosophical or historical foundations of one or more contemporary scientific disciplines.

Societal and Cultural Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the study of society, culture, and people and the distinct disciplinary approaches within the social sciences.

Area Objectives: Through these courses, students will learn about various political, economic, and social systems across the globe and their interconnections, as well as the beliefs, rituals, structures, and values that constitute societies and cultures. In addition, students will learn about the experiences of underrepresented communities (e.g., related to socioeconomic status, ability, gender, sexual orientation, race/ethnicity, or religion) within a particular cultural and societal context, and how people shape and are shaped by society. Students will explore concepts such as power, privilege, oppression, inequality, and social justice, critical to fashioning a humane and just world.

SOCL 122	Race and Ethnic Relations [D]	
SOCL 125	Chicago: Urban Metropolis [D]	
SOCL 145	Religion & Society [D]	
SOCL 171	Sociology of Sex and Gender [D]	
SOCL 250	Inequality in Society [D]	
WSGS 201	Contemporary Issues in WSGS [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. describe and analyze the key processes and components of cultural, economic, political, or social forces across time or place.
2. summarize the various ways that people, groups, or communities shape and are shaped by cultural or social forces.
3. analyze the various ways in which identities are formed through a complex interaction of biographical, societal, or cultural contexts.
4. describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
5. analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
6. apply concepts from above to analyze contemporary or historical issues of inequality and justice.

Theological & Religious Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore a range of theological and religious questions and traditions, taking into account the roles these questions and traditions can play in human life and quests for meaning.

Area Objectives: Through these two courses, students will engage in critical thinking and informed reflection on theology and religion. Students will gain familiarity with the basic content of, and modes of scholarly inquiry into, selected religious and theological systems.

Curriculum

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
THEO 100	Christian Theology	
THEO 107	Introduction to Religious Studies [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for all Tier II Courses: THEO 100 Christian Theology or THEO 107 Introduction to Religious Studies

Code	Title	Hours
Choose one of the following:		3
THEO 114	Introduction to the Qur'an	
THEO 203	Social Justice and Injustice [D]	
THEO 204	Religious Ethics and the Ecological Crisis [D]	
THEO 231	Hebrew Bible/Old Testament	
THEO 232	New Testament	
THEO 265	Sacraments and the Christian Imagination	
THEO 266	Church & Global Cultures	
THEO 267	Jesus Christ	
THEO 272	Judaism [D]	
THEO 276	Black World Religion [D]	
THEO 278	Religion & Gender [D]	
THEO 279	Roman Catholicism	
THEO 280	Religion & Interdisciplinary Studies	
THEO 281	Christianity Through Time	
THEO 282	Hinduism [D]	
THEO 293	Christian Marriage	
THEO 295	Islam [D]	
THEO 297	Buddhism [D]	
THEO 299	Religions of Asia [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. compare and contrast multiple answers to these questions that have been offered within the respective fields of Religious Studies and Theology: "What is religion?" and "What is the academic study of religion?"
2. demonstrate knowledge, with attention to historical development, of the texts, beliefs, ethical understandings, and practices of at least one religious tradition, including the diversity of perspectives within that tradition.
3. analyze the interdisciplinary intersections between religion and selected contemporary issues (e.g., ethical, social, political, economic, cultural issues, or other academic disciplines).
4. explain some of the ways in which religious thought and practices can both reinforce oppressive structures and also enable possibilities for resistance, paying particular attention to various perspectives of marginalized and oppressed groups.
5. critically reflect on religious perspectives, their own and those of others, and the implications of those perspectives.

Requirements for Students Entering as Freshmen

All Loyola students who enter as freshmen will follow the University Core Curriculum, which will entail completion of courses in the Core Areas (p. 1406).

Please refer to the transfer credit policy for new (first time) freshman (p. 2283) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Requirements for Transfer Students

We strongly encourage all transfer students to work closely with their academic advisor to plan course selections to maximize the credit received from Loyola.

Loyola University Chicago is a participant in the Illinois Articulation Initiative (IAI), a statewide agreement that allows transfer students to complete the IAI General Education Core Curriculum (GECC) in lieu of a receiving institution's core curriculum. For more information on the Illinois Articulation Initiative, please visit their webpage (https://itransfer.org/).

Students Who Have Completed the GECC Requirements

At Loyola, all transfer students (**both in-state and out-of-state**) who have received an Associate of Arts (AA) or Associate of Science (AS) degree from a public community college, 4-year college, or university will have met Loyola's Core Curriculum requirements, with the exception of mission-specific courses. In addition, transfer students who attended an Illinois 2-year or 4-year institution, who enter Loyola without a degree but who have completed the IAI General Education Core Curriculum (GECC) requirements will also have satisfied Loyola's Core Curriculum requirements and only need to complete the mission-specific and Engaged Learning requirements as described below.

In-State Transfer Students Who Have Not Completed the GECC

If you are a transfer student from an in-state school entering Loyola with **30 or more hours of credit** but have not satisfied the GECC requirements, you may choose to complete core requirements either by completing the GECC or Loyola's Core Curriculum. If you choose to complete Loyola's Core Curriculum, you can find descriptions of the various Core Areas and courses that satisfy them on this webpage (p. 1406). If you choose to complete your core requirements through the GECC option, you will need to select Loyola courses that articulate with the approved GECC courses from your prior institution(s). In addition, you will be required to complete the mission-specific courses and Engaged Learning requirement as described below.

If you enter Loyola with **fewer than 30 hours of credit** your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1417) requirements. You can find complete descriptions of the various Core Areas and courses that satisfy them on this webpage (p. 1406).

Out-of-State Transfer Students Who Have Not Earned an AA or AS Degree

If you are a transfer student from an out-of-state school entering Loyola without an AA or AS degree, your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1417) requirements. You can find complete descriptions of the various Core Areas and courses that satisfy them, on this webpage (p. 1406).

Mission-Specific Core Requirements

Transfer students who enter Loyola University having satisfied the general Core Curriculum requirements must complete mission-specific courses that are central to Jesuit education. These courses are not covered by the IAI/GECC. These mission-specific requirements may be transferred to Loyola or completed at Loyola, and include courses in the following Core Areas:

- Philosophical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/philosophical-knowledge-inquiry/)
- Theological and Religious Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/theological-religious-knowledge-inquiry/)
- Ethical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/ethical-knowledge-inquiry/)

Transfer students who enter Loyola University from either in-state or out-of-state institutions will complete their mission-specific requirements in accordance with the guidelines below:

For Transfer Students Entering with 30 or More Credit Hours

1. Students entering Loyola with 4 or 5 of the mission-specific Core courses will have completed the mission-specific Core requirements.
2. Students entering with 2 or 3 of the mission-specific courses will take the new transfer student course, either PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions.
3. Students entering with 0 or 1 of the mission-specific courses will take the new transfer student course (PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions) **plus** one of the mission-specific courses not completed; one of these must be an Ethical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/ethical-knowledge-inquiry/) course if they have not already taken an Ethics course.

For Students Entering with Fewer than 30 Credit Hours

Students will be required to satisfy the same set of Core Curriculum requirements as students who enter as freshmen.

Transfer Credit Policy for New (First Time) Freshman

Students entering as freshman are not transfer students. Please refer to the transfer credit policy for new (first time) freshman (p. 2283) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Diversity and the Core

The current Core, which was launched in Fall 2012, introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Areas. In addition to the content of the specific Core Areas (p. 1406), Core courses integrate the understanding and promoting of values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world.

With regard to *understanding diversity in the US or world*, many courses in the Core were specifically designed to address this important value and allow students to develop the specific competencies that are shown below.

Demonstrate an understanding of diversity in the United States and the world.

***Competencies**: By way of example, Loyola graduates should be able to:*

1. Recognize that human diversity is complex and variegated.
2. Distinguish the various factors that inform and impact individual identity formation.
3. Comprehend how group identities are formed in a heterogeneous society.
4. Identify distinctive patterns of thought and behavior that contribute to the formation of a culture different from one's own.
5. Perceive the interdependence of cultures in domestic and global terms.

Currently one-third of all courses in the University Core Curriculum are diversity-designated, including all Tier 1 Societal and Cultural Knowledge and Inquiry courses. Courses with a Diversity Designation are indicated with a (D) next the course titles listed under Core Areas and courses (p. 1406) so that they can be easily identified.

The Loyola University Chicago Core Curriculum is a critical element in a student's transformative education that serves as a framework for learning, reflecting and experiencing, as Loyola students prepare for lives seeking knowledge in the service of humanity. The integration of diversity as a core value in this curriculum is an essential component of this enterprise.

Core and Your Major and Minor

Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study.

The following waivers concern Core Area requirements, not major or minor requirements. Please see your major or minor advisor for details about those requirements.

If you change majors or minors, you may have completed some Core Curriculum requirements prior to the change. Please check with your academic advisor for confirmation of your remaining Core Curriculum requirements.

Honors and the Core

100-level Honors

Upon successful completion of HONR 101 Western Traditions - Antiquity to the Middle Ages and HONR D101 Developments Western Thought I Discussion, the following Core requirements are waived: Philosophical Knowledge and Inquiry Tier 1 (3 credit hours); Theological & Religious Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 102 Western Traditions-Renaissance to Modernity and HONR D102 Developments in Historical Western Thought II Discussion, the following Core requirements are waived: Artistic Knowledge and Inquiry (3 credit hours); Literary Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 101, HONR D101, HONR 102, and HONR D102, the requirement for College Writing Seminar, UCWR 110 Writing Responsibly, is waived. HONR D102 is a Writing Intensive course.

200-level Honors Courses

Honors students who successfully complete all four 200-level Honors requirements will receive four Core waivers as follows:

- Historical Knowledge and Inquiry Tier 2
- Societal and Cultural Knowledge and Inquiry Tier 2
- Literary Knowledge and Inquiry Tier 2
- Scientific Knowledge and Inquiry Tier 2

Please note: You must complete ALL FOUR 200-level Honors course requirements before the four Core course waivers are applied. Students who leave the Honors program before completing their Honors 200-level requirements must appeal to the Director of Core Curriculum (Core@luc.edu) to determine whether any of their 200-level Honors courses can lead to Core waivers.

Education students in Honors are not required to take HONR 203; and Engineering students in Honors are not required to take HONR 204.

Honors students can take a 200 or 300 level history course to fulfill their History Tier 1 requirement. To utilize this exception, the HIST course must be taken at a Loyola University Chicago campus and cannot be a transfer credit of any kind. Transfer credit for HIST 101, 102, 103, 104 can still be utilized to fulfill Tier 1 HIST requirement.

300-level Honors Capstone: Moral Responsibility

Upon successful completion of HONR 301 Honors Capstone: Moral Responsibility, the Core requirement for Ethical Knowledge and Inquiry (3 credit hours) is waived.

Be aware students will be required to fulfill the Quantitative Knowledge and Inquiry (3 credit hours); Historical Knowledge and Inquiry Tier 1 (3 credit hours); Philosophical Knowledge and Inquiry Tier 2 (3 credit hours); Scientific Knowledge and Inquiry Tier 1 (3 credit hours); Societal and Cultural Knowledge and Inquiry Tier 1 (3 credit hours); and Theological and Religious Knowledge and Inquiry Tier 2 (3 credit hours) outside of the Honors Program.

Engaged Learning in the Honors Program

All Honors students are required to take 3 credit hours of Engaged Learning coursework. These courses provide a core learning experience integrated into a course that engages students in learning outside the classroom. You can find more information on the Engaged Learning (p. 1417) page.

HONR 290 Literacy Center *does not* satisfy any requirements within the Honors program, but it can be taken to satisfy the Engaged Learning requirement.

Additional Information

Visit the Interdisciplinary Honors (p. 512) page for additional information about the program and requirements.

Engaged Learning

The Engaged Learning requirement supports the mission of Loyola University Chicago by embedding opportunities for students to explore the many different forms of experiential learning as part of their academic coursework. All undergraduate students are required to complete at least one Engaged Learning course/s totaling at least three (3) credit hours prior to graduation.

Check out the course offerings below:

- Fall 2025 Academic Internship Courses (https://www.luc.edu/media/lucedu/celts/semesterelcourses/FALL%202025%20-%20AI.pdf)

- Fall 2024 Service-Learning Courses (https://catalog.luc.edu/undergraduate/university-requirements/engaged-learning/Fall_2024_SL_List.pdf)

Engaged Learning courses are those that provide all of the following:

- A structured learning experience integrated into a course that engages students in learning outside the classroom, such as in a community agency, professional organization, or in a research setting
- Critical reflection on that experience through various assignments in class
- Synthesis of the experience through a final project or learning portfolio (https://www.luc.edu/celts/programs/learningportfolio/).

Engaged Learning courses may be offered by either individual departments, academic programs, and the Center for Engaged Learning, Teaching, and Scholarship. This requirement may be satisfied by a course within the Core Curriculum, or in a student's major or minor, or through an elective course. Students may engage in these courses during the regular academic year, summer semester, J-Term, a capstone course or a study abroad experience.

Since a requirement of all Engaged Learning courses is for students to complete a final project or a learning porfolio, click here (https://www.luc.edu/celts/programs/learningportfolio/) to learn more about learning portfolios. Learning portfolios, often referred to as a ePortfolios, are high-impact tools for learning. They are a digital collection of students' demonstrated knowledge, competencies and skills represented through learning artifacts. Learning portfolios assist students to deepen critical reflections and integrate learning across course concepts, academic disciplines, and co-curricular experiences.

Upon designating a course as Engaged Learning, the course remains designated as Engaged Learning until notice is given otherwise. Academic departments and/or faculty instructors must communicate if a course changes (new course number, for example) or if a course retires the Engaged Learning designation; please communicate with the Director of Engaged Learning, Dr. Patrick Green (Executive Director, Center for Engaged Learning, Teaching, & Scholarship) at engagedlearning@luc.edu. You can also access Frequently Asked Questions about Engaged Learning? (https://www.luc.edu/media/celts/Engaged%20Learning%20FAQs.pdf).

Academic Internships

For a course to be designated as "Academic Internship", satisfying the University Engaged Learning requirement, it must meet all the criteria below. Criteria for academic internship courses are based on research and best practices, the CAS Standards for Internships (2009), and the National Association of Colleges and Employers (NACE) Position Statement on U.S. Internships (2011).

1. *The academic course in which students engage in an internship clearly states the hours requirement (minimum of 100 hours of work).*
2. *The internship must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
3. *The internship experience has a clear position description with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the internship experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the University Engaged Learning Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Please Note: *Past internships are not considered for Engaged Learning credit. Students with an approved internship must enroll in an academic internship course that has been designated for Engaged Learning by the University's Engaged Learning Subcommittee of the Board of Undergraduate Studies (BUS). The academic internship course and the internship experience are done concurrently (in the same semester).*

College of Arts and Sciences

AFR 397 Capstone/Internship (3 Credit Hours)
This capstone course may be completed in a variety of ways. This includes an internship at a business or organization that is related to the program, or a study abroad semester related to the program. Internships require a minimum of 10 hours/week verified service hours over the 15 week semester, amounting to 3 credit hours. Students may also make a 300 level AFR course into a "Capstone" by adding an additional, in-depth research assignment approved by the course instructor and the program director. Director approval is required for this course.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.

ANTH 396 Internship in Anthropology (3-6 Credit Hours)
Pre-requisites: Students must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form Enrollment is limited to Undergraduate Anthropology Majors/Minors. This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience

BIOI 398 Bioinformatics Internship (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOL 398 Internship in Biology (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biology-related job settings

CHEM 399 Internship in Biochemistry or Chemistry (2-3 Credit Hours)
A supervised field placement to give students training or work experience in aspects of biochemistry or chemistry that are not commonly available on campus. Students will work outside the classroom (e.g. industrial setting or national lab) applying and extending their biochemistry or chemistry skills, typically for at least 150 hours to receive 3 credits or for more than 100 hours for 2 credits. Permission of faculty advisor Students must complete a total of 3 credits to receive engaged learning credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biochemistry or chemistry related job settings

CLST 382 Internship in Classical Studies (3 Credit Hours)
Students complete a semester-long internship (100 hours minimum) that builds on their training in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience while applying theories and techniques gained from coursework

COMP 391 Internship in Computer Science (1-6 Credit Hours)
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Program Director, followed by final reports from the student and the employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Application of classroom skills to real-world situations

CJC 390 Capstone Experience Internship (1-6 Credit Hours)
Pre-requisites: CRMJ Majors and Minors, Psychology of Crime and Justice Minors, Forensic Science Majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in criminal justice agencies.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency and be able to identify and describe the link between their field experience and prior courses

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at Loyola's Fine Arts Galleries. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FRSC 390 Forensic Science Internship (3-4 Credit Hours)
Pre-requisites: FRSC 342; Forensic Science Majors Only
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

HIST 398 History Internship (3 Credit Hours)
This course provides three hours credit for students engaged in history related internships in the public and private sectors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to obtain an internship position, to learn on-the-job from an experienced practitioner in a wide variety of public and private sector settings, to draw links between their present situation and historical research, and to develop critical thinking and communication skills

HMSV 390 Supervised Fieldwork II (6 Credit Hours)
No course description is available
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Islamic World Studies, Latin American Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate awareness of at least one important global concern or issue as addressed in the internship

ITAL 395 Internship (3 Credit Hours)
The internship will enable students to gain practical experience in working in Italian government institutions in Chicago (such as the Italian Cultural Institute) or working in businesses or education.
Interdisciplinary Option: Italian Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will work 4-8 per week and reflect on their experience in conversations with supervising professor and other interns

MUSC 394 Internship in Music (1-6 Credit Hours)
Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses

PLSC 370 Fieldwork in Political Science-Internship (1-6 Credit Hours)
Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn about different forms of public service and the ethical responsibilities of civic engagement; Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand; Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

POST 395 Polish Studies Capstone (3 Credit Hours)
Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.
Interdisciplinary Option: Polish Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to integrate their coursework in the POST minor with their major concentration

PSYC 390 Internship in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshipinpsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

SOCL 380 Internship (3-6 Credit Hours)
Pre-requisites: Permission of instructor or chair
Supervised field experience for students working in a selected community organization, government agency, social agency, or business.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SPAN 395 Internship (3 Credit Hours)
The internship will allow students to work in a variety of settings using Spanish - business, education, government, or social service agencies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience in speaking and writing Spanish

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)
Pre-requisites: STAT 304 and 396; approval of the internship director
This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain first hand experience doing actuarial work in a real world environment

THEO 348 Supervised Ministry (3 Credit Hours)
Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THTR 394 Internship in Theatre (1-6 Credit Hours)
Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

WSGS 398 Women's Studies Internship (3 Credit Hours)
This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST398/WSGS398
Outcomes:
Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

Rome Campus

- GLST 370 Internship in Global Studies
- ITAL 395 Internship

Center for Engaged Learning, Teaching, & Scholarship/Office of the Provost

EXPL 390 Internship Seminar: Organizational Change and Community Leadership (3 Credit Hours)
This course is a seminar course focusing on organizational leadership and change through a 100 hour internship experience with a non-profit organization, government agency, or business organization, pre-approved by the Center for Experiential Learning.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Students will gain professional experience at an organization while reflecting on their work experience and applying theories of organizational leadership, civic engagement, community development, and leadership in the community

EXPL 393 Seminar in Integrative Leadership (3 Credit Hours)
This is a seminar course for students leaders in approved co-curricular programs (e.g., ABI leaders, student organization executive board, Loyola4Chicago leaders, etc.). Students in this course will complete at least 100 hours in a leadership experience in the context of integrative leadership theory culminating in a portfolio to demonstrate holistic leadership capacity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Develop understanding of leadership theories, reflection on actions, and integrative leadership theories; 2) Enhance connection to the institution through leadership experience, and academic and professional learning and development; 3) Produce an integrative professional portfolio

UNIV 392 Internship Seminar in Ignatian Praxis (3 Credit Hours)
Pre-requisites: Approval by the Office of Student Transitions and Outreach
Students in this internship course will complete at least 100 internship hours in Office of Student Transition and Outreach programs
Students reflect on their work experience in the context of Ignatian critical reflection and will put theory into practice.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Development understanding of reflection on actions and Ignatian traditions; 2) Enhance connection to the institution through internship work, and academic and professional learning and development; 3) Foster critical thinking and reflective writing skills

Institute of Environmental Sustainability

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS395/ESP395/NTSC395
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

Interdisciplinary Honors Program

HONR 290 Literacy Center (3 Credit Hours)
Pre-requisites: Students in or beyond their second semester; UCWR 110 or equivalent
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program. Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.
This course satisfies the Engaged Learning requirement.

HONR 370 Fieldwork in Honors - Internship (1-3 Credit Hours)
The main goal of this course is to provide students with valuable work experience in a professional field connected with their academic program. It allows students to apply and further develop their knowledge and skills through an internship in a non-academic setting. The course is also intended to serve as a "bridge" between college and career. This internship presents an opportunity for students to gain valuable professional experience as an intern in public or private institutions engaged in public service projects. HONR 370 will satisfy the "service" requirement for all Honors students.
This course satisfies the Engaged Learning requirement.

Parkinson School of Health Science and Public Health

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.

HSM 360 Healthcare Administration Field Internship (6 Credit Hours)
Pre-requisites: HSM 200, 310, 315, 330, 338, 345, 358, 368, 386 and FINC 301
This professional experience provides exposure to and experience in the healthcare environment. Under the supervision of a field preceptor and faculty advisor, students work with a healthcare organization integrating content gained through prior HCA coursework. Students develop and refine skills and practical knowledge by conducting a goal-based project(s) of value to the internship site. Project objectives are developed in concert between student, faculty, and preceptor. The experience involves three on-campus seminars, preparation of seminar deliverables plus a minimum of 196 on-site hours fulfilled on a weekly basis as mutually agreed between student and preceptor. The field experience as facilitated by Loyola University Chicago and the HCA Program concludes at the close of the semester and may or may not be compensated.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Apply healthcare administration theoretical knowledge, concepts, and skills to the practice setting; 2) Solve project challenges through the use of analytical and reflective tools; 3) Function as a collaborative team member; 4) Demonstrate critical thinking and refine communication skills; 5) Apply strategies of ethical reasoning to arrive at principled decisions in the Jesuit tradition; 6) Integrate supervisory, and faculty feedback to improve personal skills, knowledge, and effectiveness; and 7) Demonstrate the ability to work independently, thoughtfully, and resourcefully

PUBH 310 Public Health Internship (3 Credit Hours)
This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.
This course satisfies the Engaged Learning requirement.
Outcomes:
Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 399 Public Health Capstone Experience (3 Credit Hours)
This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

School of Business

IBUS 370 Inernational Business Internship - Engaged Learning (3-6 Credit Hours)
Pre-requisites: Sophomore standing, Permission of Instructor
IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Developing a foundation on which a student may build a career; b) Understanding the role of the Jesuit tradition as it relates to leadership and service

School of Communication

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

School of Continuing and Professional Studies

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

School of Education

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

School of Nursing

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

School of Social Work

SOWK 330 Internship I and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350; Corequisite: SOWK 362
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SOWK 340 Internship II and Simulated Experience (3.5 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 330 and SOWK 362
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

Fieldwork

For a course to be designated as “Fieldwork”, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for field work courses are based on research and best practices in experiential learning:

1. *The field work (clinical placement, practicum) must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
2. *The academic course in which students engage in the field work clearly states the hours requirement (minimum of 100 hours of work).*
3. *The field work experience is with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the field work experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

ANTH 399 Fieldwork in Anthropology (1-6 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Application of anthropological concepts and methods to a specific field situation under the supervision of a faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn field techniques and data recovery and analysis techniques pertinent to the specific nature of their field experience

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

ENGR 391 Biomedical Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 381 during the same academic year, ENGR 342, concurrent enrollment in ENGR 343
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored medical device projects assigned in ENGR 381. Medical device product development or regulation topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 392 Computer Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 382 during the same academic year, ENGR 352, concurrent enrollment in ENGR 353
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 382. Computer engineering or professional development topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce computer engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 393 Environmental Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: ENGR 383 (minimum C-)
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced. ENGR majors only.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

MLSC 302 Applied Leadership in Small Unit Operations (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 301 or departmental consent is required
MLSC 302 consists of both lecture and lab sections; focuses on applied leadership in small unit operations; analyze, test, and relate the fundamentals of direct level leadership and small unit tactics at the platoon level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially; Successful completion of this course will help prepare contracted Army ROTC students for the Cadet Summer Training Advance Camp, which students normally attend summer of junior year at Fort Knox, KY

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

WSGS 388 Women's Studies Practicum (3 Credit Hours)
This supervised field experience uses experiential learning at a wide variety uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which cab benefit gender equity.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST388/WSGS388
Outcomes:
Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

School of Business

See Academic Internships (QUIN 351 Business Internship-Engaged Learning)

ISSCM 393 Requirements Analysis and Communication (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" or better in ISSCM 247
This course focuses on Information Systems requirements and related communication skills. Students will learn how to gather requirements for Information Systems from an organization's users and executives based on a general understanding of organizations and business goals. Students learn techniques of how to translate between organizational needs and requirements for systems and processes, and how to analyze, validate, and prioritize those requirements. A special focus of the course will be to improve business communication skills such as interviewing, listening, presenting and negotiating.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ISOM393 / MGSC393

School of Communication

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205, 362 , and Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
COMM 210 or 211 strongly recommended. Open to undergraduate students only. A 3.0 GPA is required. Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf. Pre-requisites: Department Consent.
This course satisfies the Engaged Learning requirement.

COMM 383 Radio Practicum (3 Credit Hours)
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.

COMM 384 Film & Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Requires Instructor Consent for all majors; DMST may also enroll with instructor consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section--director/producer, writer, cinematographer, editor, production designer, sound designer, publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ICVM384/IFMS384/COMM384
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

School of Education

CIEP M03 Student Teaching: Infants, Toddlers and PreSchoolers (6 Credit Hours)
This course (along with the related field experiences) serves as a continuation of the Methods courses and meets the requirements of a preprimary student teaching experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates will be provided with supervised applied experience in assessment and instruction with children in early childhood special education and will be prepared to work in an early childhood special education setting

CIEP M04 K-3 Student Teaching (9 Credit Hours)
Pre-requisites: CIEP M03
This course is the culminating experience of the Early Childhood Special Education Teacher Education Program. Candidates are placed in a classroom with an experienced cooperating teacher.
This course satisfies the Engaged Learning requirement.
Outcomes:
In addition to their planning and teaching responsibilities, student teachers also are expected to reflect on their experience, develop their planning and instructional skills, and compile a teaching portfolio

CIEP MU1 Student Teaching: Special Education (9 Credit Hours)
No course description is available
This course satisfies the Engaged Learning requirement.

CIEP MU5 Student Teaching: Elementary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the elementary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP MU6 Student Teaching: Secondary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the secondary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP M60 Secondary Methods: Social Studies (3 Credit Hours)
In this course students examine teaching and learning in the social studies in grades 9-12. Students explore a variety of methods for teaching each discipline within the social studies as distinct subjects and as elements of interdisciplinary courses. The course emphasizes curriculum planning, practice teaching in the social studies and fieldwork in schools and social studies-related organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will design curricula and demonstrate instructional strategies in the social studies that meet the needs of diverse learners and focus on deep engagements with social studies content

CIEP M64 Secondary Methods: Science (3 Credit Hours)
This course is designed to help pre-service teachers develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the high school level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to draw Teaching Science in the Elementary/Middle School connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

TLSC 380 Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (6-12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module. (1C, 4L, 4N, 4Q, 5M, 5N, 5J, 8I, 8O, 8S, 9K, 9N) (IB) EU9 S7, S8; Demonstrate understanding and proficiency in core concepts, constructs and working principles from theories and research when making decisions and taking actions related to specific TLLSC EUs and EU indicators. (1C, 2A, 2B, 2C, 2I, 2J, 2G, 3A, 3Q, 4A, 4L, 5A, 5B, 5E, 5F, 5S, 6B, 6C, 7A, 7B, 7C, 7F, 9L) (IB) EU10 K1, K2, K3, K4, S1, S2; Demonstrate the ability to recognize and value student diversity and the differences in how students learn and provide instruction to accommodate such diversity. (1K, 2K, 5M, 7M, 8J) (IB) EU11 S2, S3, S4, S6; Support and deliver instruction in cooperation with their assigned co-teacher. (1H, 1I, 1L, 3I, 3J, 3M, 3P, 4C, 4K, 4N, 5I, 7P, 9J)(IB) EU1 S7, EU2 S8, EU4 S7; Provide a written analysis of each observed lesson, with a focus on their ability to make content accessible, the level of student engagement, the use of developmentally appropriate teaching practices, and the teaching of English language learners and students with special needs. (1H, 3J, 5H, 5K, 5M, 5P,7Q)(IB) EU3 S10, S11, S16, S18 EU4 S5; Reflect in writing and discussion on their ability to deliver and adapt relevant instruction and assessments, classroom management and professional interaction with teachers, students and families. (5H, 5J, 9K) (IB) EU6 S12 EU2 S9; Conduct regular pre- and post-observation conferences with Internship Coaches and Co-teachers to evaluate personal instructional style, preparation, use of technology, collaboration to promote learning and professional interactions to determine their impact on barriers to student learning, student success, self-esteem and inclusion (4K, 4N, 5K, 5M, 5N, 8I, 8J,8O, 8R,8S, 9G, 9K, 9N) (IB) EU9 S6, S8.
This course satisfies the Engaged Learning requirement.
Outcomes:
Utilize research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students EU3; Create and support safe and healthy learning environments for all students EU9; Utilize information from theories and related research based practices when making decisions and taking action in their professional practice EU10; Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement EU11; Enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups EU1; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity) EU7; Engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students EU2; Design and implement standards-based units and lesson plans to maximize learning for all students by using an appropriate variety of assessments, culturally responsive practices, multiple resources/representations and questioning to encourage critical/high-order thinking inquiry and problem solving based on high expectations for each student's learning and behavior (3H, 3I, 3N, 3Q, 5I, 5L, 5M, 5Q, 5S, 7K, 7P, 8N, 9A) (IB) EU3 S2, S3, S5, S6, S9; Use data to evaluate and monitor students' needs, instruction and

School of Nursing

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

MCN 273 Family Health Patterns I (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better; Must have taken and passed MSN 277L with a P; Must also enroll in MCN 273L
This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)
Co-requisites: Must enroll on MCN 273
No course description is available

MCN 374L Family Health Patterns II: Lab (3 Credit Hours)
Co-requisites: Must also enroll in MCN 374
No course description is available

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294
This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)
Must also enroll in MSN 277. This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360,with a C- or better; Must also enroll in MSN 377L
This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)
Must also enroll in MSN 377. This course builds on MSN 277L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues - clinical

Public Performance

For a course to be designated as "Public Performance", satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for public performance courses are based on research and best practices in experiential learning:

- *The experience (e.g. musical performance, dramatic performance, art exhibit) is the culmination of a student's work presented publicly in a program or performance, as it is the extension of the classroom and applying knowledge gained in the classroom.*
- *The academic experience in which students engage in the performance work clearly states the hours requirement.*
- *The learning objectives related to the performance experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
- *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
- *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 313 Ballet V Advanced Ballet or 343 Advanced Majors Ballet. Students must be enrolled in Advanced Ballet to be eligible for enrollment in Pointe II. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with DANC 313 Ballet V or 343 Advanced Majors Ballet. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

MUSC 104 Gospel Choir (1 Credit Hour)
Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC104/BWS 104
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; They reflect on their personal and collective artistic growth through the process

MUSC 106 Guitar Ensemble (1 Credit Hour)
Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 107 Chorus (1 Credit Hour)
University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance; They reflect on their personal and collective artistic growth throughout the performance process

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)
Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)
Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publicly at least twice each semester of the academic year.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC109/BWS 109
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 207 Chamber Choir (1 Credit Hour)
Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 246 Composition I (3 Credit Hours)
Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions

MUSC 320 Rehearsal and Performance (1 Credit Hour)
This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.
This course satisfies the Engaged Learning requirement.

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)
This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)
Pre-requisites: Music Major only
A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

PLSC 202 Mock Trial (3 Credit Hours)
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course. Prior Permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Mock trials are an activity that promotes critical thinking and reasoning; They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures

PLSC 203 Moot Court (3 Credit Hours)
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Moot court competitions are an activity that promotes critical thinking and reasoning; They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills; Students gain knowledge of legal argumentation and constitutional law

THTR 204 Playwriting (3 Credit Hours)
Pre-requisites: THTR 100 or THTR 203
This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)
This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 323 Rehearsal & Performance (1-12 Credit Hours)
Pre-requisites: permission of the instructor
This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester. Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)
This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will deepen their understanding of a design process via first hand experience in our theatre

School of Communication

COMM 335 AI in Advertising (3 Credit Hours)
Pre-requisites: COMM 211 Outcomes: Students will learn the fundamental of logics of AI technologies, and its implicaitons in various aspects of advertising
This course explore what is AI, how it¿s been applied in various stages and aspects of advertising, and be creative in using artificial intelligent technologies to create better advertisement and consumer experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 335 / COMM 445

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

Service-Learning

For a course to be designated as “Service-Learning”, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for service-learning courses are based on research and best practices, the CAS Standards for Service-Learning (2009), and the Principles of Good Practice for Service-Learning Pedagogy (Howard, 1993).

1. *The academic course establishes the service expectation of 20+ hours of service to work in the community or in the environment, or on a community-based project connected to the content of the course.*
2. *Learning objectives related to the service experiences are clearly articulated.*
3. *There is a clear articulation of the community partnership or project and how it addresses community-defined priorities.*
4. *The syllabus assignments and final projects synthesize classroom- and community-based learning.*
5. *Activities and assignments encourage students to reflect on larger community issues, sustainability issues, social structures, and/or topics of social justice (e.g. perpetuating dependence vs. building capacity within the community).*

The Center for Engaged Learning, Teaching, & Scholarship publishes a listing of ALL approved service-learning classes each semester. This list can be found on the Service-Learning Program website (https://www.luc.edu/celts/programs/service-learning/forstudents/courses.shtml/).

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all

approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Undergraduate Research

For a course to be designated as “Undergraduate Research“, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for undergraduate research courses are based on research, best practices, and the CAS Standards for Undergraduate Research (2009).

1. *The field research course engages students on an original research project (not a simulation), either contributing to a faculty research project or engaging in an independent research project with a mentor*
2. *Students conduct research on an ongoing basis, working an average of 5 – 10 hours/week.*
3. *Students gain knowledge of or experience in discipline-specific language, research ethics, skills in research methodologies, and important scholarship.*
4. *The learning objectives related to the research experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a mentor who has expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*
7. *There is an outlet to disseminate the original research (e.g., symposium, conference, scholarly article) integrated into the course.*

In addition to classes approved for EL credit in the area of Undergraduate Research, research projects students pursue under an Independent Study or Directed Readings course-number may be approved for EL credit if they meet the criteria. Students should follow the process to request EL credit on the "Requesting EL Credit (https://www.luc.edu/celts/programs/engagedlearning/studentresources/requestingelcredit/)" page.

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

2. The Ramonat Seminar (http://ramonatseminar.com/) is an interdisciplinary, two-semester course that provides Loyola undergraduates with the unique opportunity to explore changing topics within American Catholic history, literature, and culture through hands-on research. Taught by a Loyola faculty member, the seminar is limited to 12 participants who pursue common readings in the fall semester and individual research projects in the spring semester. Unlike standard undergraduate courses, the Ramonat Seminar provides promising students, who will be named *Ramonat Scholars*, with resources for research, travel, and even publication in digital and print formats, all aimed at their general professional development.

UNIV 101

UNIV 101 First Year Seminar is a 1-credit, pass/no pass, extended-orientation course required for all first-year students at Loyola University Chicago. Each class consists of 22 students or fewer and is taught by a University faculty or staff member and an undergraduate Peer Advisor. The class meets for 50-minutes/week during the fall semester.

UNIV 101 First Year Seminar is a graduation requirement for all first-year degree-seeking undergraduate students. Students must pass UNIV 101 First Year Seminar during their first semester of enrollment at Loyola. Should a student not pass UNIV 101 First Year Seminar, they must re-enroll and pass the course during the subsequent semester.

For more information, click on any of the sections below:

Course Description, Goals, and Learning Outcomes

UNIV 101 First Year Seminar helps new students make a positive transition to Loyola University Chicago by helping them adjust to academic and student life. Students will develop relationships with their classmates, faculty/staff instructor, and Peer Advisor in order to foster an inclusive and welcoming community. To make the most of their experience at Loyola, students will participate in meaningful discussions, personal reflection, and engaging activities within and outside of the classroom to learn more about themselves, others, Loyola, and the City of Chicago.

Goals

1. Foster student academic success and the achievement of their academic goals
2. Connect students to Loyola University Chicago, our mission, and the City of Chicago
3. Support student wellbeing and sense of belonging at Loyola University Chicago

Learning Outcomes

As a result of engaging in UNIV 101 First Year Seminar, students will be able to:

1. Create an academic and co-curricular plan to make the most of their experience at Loyola.
2. Choose resources and opportunities, on- and off-campus, that help them achieve their academic, social, personal wellbeing, and career goals.
3. Describe how the Jesuit mission of Loyola University Chicago, and the City of Chicago, influence their experience at Loyola.

Section Types

Most students will enroll in a general section of UNIV 101 First Year Seminar, which consists of students from across campus with different majors and identities. In addition, some sections are available for students with specific majors, communities, and identities. These special UNIV 101 First Year Seminar sections may include:

Magis Sections, for Students Who Identify as…

- Asian students
- Commuters
- First-generation college students
- LGBTQ
- Pre-health
- Students of color
- Undecided/undeclared

Major Specific Sections, for Students Majoring in…

- Communications
- Engineering
- Helping Professions (Social Work, Education, etc.)
- Nursing
- Public Health
- Science, Technology, Engineering, or Math (STEM)

Program Specific Sections, for Students Involved in….

- Achieving College Excellence (ACE)
- First-Year Research Experience (FYRE)
- Interdisciplinary Honors Program
- Learning Communities
- NCAA Athletics
- Quinlan School of Business Honors Program
- Rambler Success Program (RSP)
- Student Diversity & Multicultural Affairs (SDMA) Mentorship Programs

GRADUATE AND PROFESSIONAL CATALOG

Graduate and Professional Catalog

2024-2025

Loyola University Chicago is an independent, Catholic and urban university with a Jesuit heritage, emphasizing the development of the intellectual, social and moral values, and character of its students. Dedicated to higher education and health care, the university has national, regional and international influence.

The Graduate and Professional catalog is issued annually, prior to the start of the Fall Term of the new academic year. Graduate students are governed by the degree requirements issued for the academic year in which they enter Loyola University Chicago, and by the Academic Standards and Regulations for their academic unit or school.

Graduate and Professional Academic Standards and Regulations (p. 2300)

Accreditation

Loyola University Chicago is accredited by The Higher Learning Commission (HLC). Contact HLC at 800.621.7440 or visit: https://www.hlcommission.org/.

Graduate and Professional Schools

- The Graduate School (p. 1437)
- Institute of Pastoral Studies (p. 1769)
- Marcella Niehoff School of Nursing (p. 1809)
- Parkinson School of Health Sciences and Public Health (p. 1843)
- Quinlan School of Business (p. 1874)

- School of Social Work (p. 2129)
- Stritch School of Medicine (p. 2206)
- Dual Degree Programs (p. 2206)

Non-Discrimination Policy

Loyola University Chicago will not discriminate in its programs and activities on the basis of race, color, religion, national origins, sex, age, ancestry, marital status, sexual orientation, arrest record, military status or unfavorable military discharge, physical or mental handicap or disability.

Confidentiality of Education Records

Loyola University Chicago complies with the provisions of the Family Education Rights and Privacy Act of 1974 ("FERPA") when releasing personally identifiable information concerning students. FERPA stipulates that a student's education record is confidential information and must not be released without prior written consent of the student. FERPA does permit the release of "Directory Information." Directory information is information which would not generally be considered harmful or an invasion of privacy if disclosed. Students have the right to withhold "directory Information." However, the student should consider the consequences of such a request as Loyola University Chicago will honor the request, until removed in writing by the student. Loyola University Chicago has determined directory information to consist of a student's:

- Name
- Address(es) and telephone number
- University e-mail address
- Photograph
- Major and minor field(s) of study, including the college, division, department, institute or program in which the student is enrolled
- Dates of attendance
- Grade level (Such as freshman, sophomore, junior, senior or graduate level)
- Enrollment status (Undergraduate or graduate, full-time or part-time)
- Date of graduation
- Degree(s) received
- Honors or awards received, including selection to a Dean's list or honorary organization
- Participation in officially recognized activities or sports
- Weight and height of members of athletic teams

Rights Reserved

The President and officers of Loyola University Chicago reserve the right to change information, regulations, requirements and procedures announced in this catalog; to change the requirements for admission, graduation or degrees; to change the arrangements, scheduling, credit or content of courses; and to change the fees listed in this catalog.

The University reserves the right to refuse to admit or readmit any student at any time should it be deemed necessary in the interest of the student or of the University to do so and to require the withdrawal of any student at any time who fails to give satisfactory evidence of academic ability, earnestness of purpose, or active cooperation in all requirements for acceptable scholarship.

Catalog Disclaimer

This catalog is published for informational purposes. Although every attempt is made to ensure accurate information, the information provided should be used only as a reference and planning tool. While students are governed by the catalog that is in effect in the academic year in which they enter, students should not assume that the catalog is a contract between Loyola University Chicago and students. The Board of Trustees of Loyola University Chicago reserves the right to change, at any time, without notice, graduation requirements, fees and other charges, curriculum, course structure and content, and other such matters as may be within its control, notwithstanding any information set forth in this catalog. Students should always consult with their college advisors to confirm all information.

This Academic Catalog lists the approved courses for the plan of study during the published Catalog Year.

Final confirmation of all degree requirements is subject to department, school, and university approval.

The Graduate School

At Loyola University Chicago's Graduate School, we cultivate leaders—scholars who are motivated to make a real difference in the world. From

academic fields to professional specialties, the Graduate School offers advanced study and research programs on the leading edge of a wide variety of disciplines in the humanities, natural and biomedical sciences, social sciences and the professions. The Graduate School's inception in 1926 has been marked by innovation, excellence, and commitment to teaching, research, and service. Over the years, the Graduate School has witnessed relatively steady growth and its programs have reflected the university's response to societal needs, university resources, and shifting academic environments.

The programs that today fall under the aegis of the Graduate School represent a combination of programs with deep roots and those that are relatively young in the school's range of offerings. Approximately 1,500 graduate students are enrolled in 25 PhD programs, two professional doctorate programs, 39 master's programs, 9 dual degree programs, 10 certificates, and 20 advanced bachelor's/master's programs. They work with more than 600 graduate faculty members on three campuses. We are a dynamic community of researchers and scholars united in a commitment to developing new knowledge, providing high quality training, enhancing professional credentials, and fostering creativity.

Because Loyola graduate programs have an ethics component, the University's Graduate School provides both the opportunity and the impetus for students from a wide variety of disciplines to conduct research that directly benefits humanity. The Graduate School serves the needs of students and faculty who work at the highest level of excellence in their field and fosters projects that build communities, promote social justice, address the complex problems confronting society, and promote global awareness.

Why Loyola University Chicago? Graduate students at Loyola learn from faculty members who are as committed to mentoring, instruction and intellectual discourse with students as they are to research and scholarship. Our setting in the heart of Chicago allows students to apply their knowledge through outstanding internship and field study opportunities at leading institutions and research settings throughout the metropolitan area. The rigorous intellectual environment at Loyola is informed by our commitment to serving our community and our world, in keeping with Jesuit values, a tradition that has typified Loyola University Chicago since its founding in 1870.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Biochemistry & Molecular Biology (BMB)

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

BMB 600 Dissertation Supervision (0 Credit Hours)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given a letter grade.
Outcomes:
Development of the dissertation project, writing and defense of the dissertation

Bioethics & Health Care Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (0 Credit Hours)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
IPBS PhD students will complete their degree work while registered for BMSC 600

Catholic Studies (CATH)

CATH 400 Catholicism in the Americas (3 Credit Hours)
This course examines social, political, and religious developments in the Americas from the colonial era with a particular focus on the years following the Second Vatican Council through the present day in order to explore a range of issues regarding the nature of religion, politics, and the role of the Catholic Church.

CATH 402 Catholic Church in Modern World (3 Credit Hours)
This course will examine the Church in the modern world-- with an emphasis on the relationship between Catholicism and democracy, placing particular stress on their relevance to contemporary American public life. In this context, Catholicism will be understood not only as a religious institution, but as the source of a tradition of communitarian social and political thought, while democracy will be understood not only as a form of government, but also as an ethos shaping American society. Authors and texts will include Alexis de Toucqueville, Orestes Brownson, Dorothy Day, John Courtney Murray, and relevant documents from Vatican II and the American hierarchy. The historic tension between Catholicism and democracy will be the subject of our conversation as will the possibilities for greater harmony between them. In particular, we will explore the possibility that Catholicism's communitarian orientation might serve as a corrective to American individualism and consumerism, while democratic institutions and practices might have something to offer Catholicism.

CATH 498 Integrative Project (3 Credit Hours)
This is a synthesis course in which the student, in consultation with a faculty member, will independently research and develop a project that integrates subject-mastery and skills that they have developed over the course of their studies.

CATH 499 Independent Study (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Catholic Studies not otherwise covered by course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Catholic Studies

Cellular & Molecular Oncology (CMO)

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (0 Credit Hours)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours.
Outcomes:
Allows completion of thesis research and defense, required for degree

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Clinical & Applied Mass Spectrometry (CAMS)

CAMS 401 Theory and Physics of Mass Spectrometry (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.
Outcomes:
At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity

CAMS 402 Chemistry of Protein Separation (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamentals of separating biological agents in solution for analysis by mass spectrometry.
Outcomes:
At the end of this course students will be able to: 1) Describe the composition of typical biological collections including blood and waste; 2) Describe best-practices for preparing collections for mass spectrometry; 3) Describe fundamentals of separating biomolecules according to size, charge and other physiochemical factors; and 4) Describe mechanisms and tradeoffs behind common approaches for separating biological samples via chromatography (liquid and gas)

CAMS 403 Introduction to Mass Spectrometry Instrumentation (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will introduce the mass spectrometry instrumentation that is utilized in clinical, pharma, and academia, including HPLC and other sample preparation instrumentation.
Outcomes:
At the end of this course students will be able to: 1) Describe the basic technologies and instrumentation currently used for mass spectrometry; 2) Understand the basics in how to operate this instrumentation (theory, no hands on); 3) Appreciate the similarities and differences in the different technologies, and in what situation each instrument would be most appropriate; and 4) Describe the instrumentation used in sample preparation

CAMS 411 Computation and Bioinformatics for Proteomics (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the governing principles of analyzing proteomics data, with a special emphasis on data derived from mass spectrometry (MS). Computational methods and tutorials will complement the theoretical material.
Outcomes:
At the end of this course students will be able to: 1) Describe key approaches for matching MS spectra to known proteins, as well as identifying and quantifying protein content in analyzes samples; 2) Describe methodologies and limitations thereof for labeling and quantifying proteins of interest; 3) Perform routine computational analyses of MS data using python; and 4) Describe best-practices for objective data analysis and reproducibility

CAMS 412 Clinical Considerations and Biomarker Development (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover fundamental concepts about the criteria for something to qualify as a biomarker and how they are analyzed by mass spectrometry from a variety of biological fluids and/or tissues. We will also discuss the broader uses of mass spectrometry in a clinical or hospital setting.
Outcomes:
At the end of this course students will be able to: 1) Compare and contrast aspects of good vs bad biomarkers and the utility of mass spectrometry for their detection in biological samples; 2) Describe best practices for sample collection and the limitations of using biological samples; 3) Describe current regulations and standards for biomarker use in the clinic; 4) Identify and describe biohazard safety issues when working with biological samples; 5) Describe analytical approaches for quantification of biomarkers; and 6) Describe the type of mass spectrometry assays typically used in a clinical or hospital setting

CAMS 413 Advanced Mass Spectrometry Approaches (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover advanced MS approaches to address specialized needs. These approaches will frequently require specific instrumentation, and bioinformatics approaches, but sometimes only involve changes to sample preparation and interpretation.
Outcomes:
At the end of this course students will be able to: 1) Understand the need for specialized mass spec approaches; 2) Appreciate the theory behind specialized mass spec approaches; 3) Describe the technical and practical considerations when utilizing specialized MS approaches; and 4) Be able to choose the correct advanced MS approach for a particular situation

CAMS 491 Mass Spectrometry Lab Rotation A (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to prepare samples that are "mass spec ready" from a variety of liquid and solid tissue biological samples. Students will learn quality control parameters and will produce high quality samples for use in the HPLC and mass spectrometer.
Outcomes:
At the end of this course students will be able to: 1) Process liquid and tissue biological samples for analysis by mass spectrometry; 2) Perform gel electrophoresis on prepared samples and excise selected gel bands; 3) Perform in in-gel digestions using standard enzymatic approaches; 4) Perform in-solution digestions using standard enzymatic approaches; 5) Quantify protein samples before and after digestion; and 6) Use column chromatography to generate high purity samples

CAMS 492 Mass Spectrometry Lab Rotation B (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to perform normal LC-mass spectrometer general upkeep including HPLC setup, mass spectrometer calibration, quality control, etc. Students will then learn the process of running mass spectrometers for two types of approaches: discovery and targeted mode.
Outcomes:
At the end of this course students will be able to: 1) Setup HPLC, mass spectrometer and software; 2) Perform normal instrument upkeep including calibration, quality control, solution changes; 3) Be able to troubleshoot common instrument issues; 4) Analyze sample on mass spectrometer for discovery (two group comparison); 5) Analyze sample on mass spectrometer for targeted quantification (in simple solution); 6) Use bioinformatics software packages to analyze data from mass spectrometers; and 7) Understand how to present mass spectrometry data

CAMS 493 Capstone Design - Applications in Mass Spectrometry A (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CAMS 494 Capstone Design - Applications in Mass Spectrometry B (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (0 Credit Hours)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (0 Credit Hours)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science and Education (CSED)

CSED 401 Intro to Programming & Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 430 Technical Administration of PC Cluster (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 431 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

Computer Science & Information Systems (CSIS)

CSIS 484 Project Management (3 Credit Hours)
The art and science of project management as applied to a variety of large and small project situations, in commercial, public, and private sectors. Coverage includes project life cycle management, project organization and leadership, proposals and contracts, and techniques for project planning, estimating, scheduling, and control.
Course equivalencies: X-CSIS484/ISOM484

CSIS 498 Telecommunications for Managers (3 Credit Hours)
This course introduces the basic concepts of data communications, telecommunications networks, and business applications of telecommunications technology, from a managerial perspective. Basic concepts covered include data communications hardware and software, transmission media, and network topology, with an emphasis on local area networks (LANs) and client server applications. Issues related to the management of LANs, wide area networks, and international telecommunications networks will be presented. The course will address technical and managerial issues related to the use of telecommunications for strategic advantage and its role in business organizations. Business cases involving the planning, designing, implementation, and management of communications networks in business organizations will be discussed.
Course equivalencies: X-CSIS498/ISOM498

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the U.S

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the U.S. in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e., 408 project or thesis).

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

Erikson Institute (ERIK)

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

Graduate School Seminar (GSSM)

GSSM 501 Teaching Effectiveness Seminar (0 Credit Hours)
Pre-requisites: Approval of the Graduate School
This seminar provides pedagogical support to funded graduate students serving as teachers of record.
Outcomes:
To enhance students' abilities to teach undergraduate courses and deepen their pedagogical toolkit

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Healthcare Professions Education (HPE)

HPE 400 Research Methods in Health Professions Education (4 Credit Hours)
Introduction for Health Professions Education (HPE) students to the fundamentals of research design for education and scholarship in teaching and learning. This course offers a deep dive into educational research, covering problem identification, literature review, research question formulation, and the critical evaluation and synthesis of existing studies. It provides a solid foundation in quantitative research (including reliability, validity, survey construction, and validation), qualitative research (focusing on interviews and focus groups), and mixed methods research. The course emphasizes ethical principles in research and teaches effective data interpretation and presentation. Additionally, students will be introduced to grant development and introduced to their capstone project which is a research proposal. This course will equip students with the skills needed to excel in educational research., reliability, validity, survey construction, and survey validation), qualitative research (as it relates to interviews and focus groups) and mixed methods research (how to manage and use more than one method of data collection); Analyze data and ethical research practices that guide educational research; Illustrate grant development with an introduction of the capstone project research proposal.
Outcomes:
Identify a research problem and method of literature review; Formulate research questions and hypothesis; Distinguish between quantitative, qualitative, and mixed methods research; Describe fundamentals of quantitative research (e.g

HPE 401 Fundamentals of Learning and Teaching Modalities in Health Professions (3 Credit Hours)
Introduction to a range of teaching modalities, including large group lectures, small group teaching, case-based, problem-based, and team-based learning, flipped classrooms, standardized patients, simulation, e-learning, procedural, chalk talks, and clinical and bedside teaching. Ignatian Pedagogy will be threaded throughout the course. Rooted in adult learning theories and human cognition, students will review these fundamental concepts and seamlessly apply them throughout the course. There is a strong focus on practical application, enabling participants to create innovative and engaging learner-centered experiences, establish supportive learning environments, and adeptly integrate feedback. As a culmination of their learning, students will craft a final project, utilizing one of these teaching modalities to instruct peers on a relevant topic, applying the skills in a real-world educational context., large group lecture, small group teaching, cased-based, problem based and team-based learning, flipped classroom, standardized patients, simulation, e-learning and clinical and bedside teaching); Define the concepts of adult learning theories (e.g., learning theory, human cognition); Apply knowledge and understanding of androgyny to class work during this course; Demonstrate course skills, including the creation of innovative and engaging learner-centered experiences which will be showcased in the teaching portfolio project; Appraise experience with teaching modalities in education through reflective writing.
Outcomes:
Categorize different teaching modalities (e.g

HPE 402 Technology in Education and Effective Lecture Skills (4 Credit Hours)
In this engaging course, through a series of hands-on activities, participants will design and produce an electronic lecture that skillfully incorporates critical components of effective instruction. Students will not only create an educational presentation, but also assess its effectiveness through peer review, showcasing their critical evaluation skills and the ability to use feedback for continuous improvement. By the course's conclusion, participants implement peer-reviewed feedback and integrate best practices to refine their lecture into a polished, pedagogically effective resource.
Outcomes:
Produce an engaging and impactful electronic lecture that incorporates critical components of effective instruction; Demonstrate critical evaluation skills through peer review of educational content; Use peer feedback to revise and enhance their lecture; Appraise use of technology in education with discussion posts

HPE 403 Principles of Curriculum Design (4 Credit Hours)
The course will focus on the formal process of curriculum development. Much of the course will cover the standard medical education curriculum development process developed by Kern and Thomas (Thomas PA, Kern DE et al. Curriculum Development for Medical Education: A Six-Step Approach. 3rd ed. The Johns Hopkins University Press). Throughout this course, students will delve into essential theoretical literature specific to healthcare education, equipping participants with a solid foundation. They will learn to pinpoint educational challenges through needs assessment and distinguish between learning goals and objectives. Furthermore, students will master the art of crafting effective learning objectives using Bloom's Taxonomy and selecting fitting evaluation designs. Participants will learn educational strategies that will allow them to achieve their curriculum objectives. Finally, students will gain practical strategies for collecting and leveraging educational data to continuously enhance pedagogy, ensuring their healthcare education practices are informed, effective, and patient centered.
Outcomes:
Develop familiarity with essential theoretical literature of Kern's Six-Step Approach to Medical Education curriculum development; Identify curricular problems; Formulate a needs assessment; Recall the fundamental differences between learning goals and objectives; Illustrate how to create learning objectives for courses and educational sessions utilizing Bloom's Taxonomy; Select an appropriate evaluation design based on the identified objectives; Evaluate the effectiveness and impact of various educational technologies on learning outcomes and instructional design; Develop strategies to gather, review, and utilize educational data to improve pedagogy

HPE 404 Statistical Methods for Educational Research (4 Credit Hours)
This course offers a foundational understanding of statistical analysis within the context of research in clinical and health professions education. Through a blend of theoretical knowledge and hands-on practice, students will become proficient in defining core statistical concepts, applying statistical methods to diverse data types, and recognizing statistical analysis as a versatile toolkit for uncovering insights in data. Additionally, they will explore how statistical thinking enhances problem-solving skills in health professions education research and gain an understanding of the purpose and proper application of statistical techniques. Practical skills include conducting statistical tests, interpreting their outcomes, and translating results into meaningful conclusions. By the course's conclusion, students will be well-prepared to engage in evidence-based research, make informed decisions, and contribute to advancements in both clinical practice and medical education.
Outcomes:
Define basic statistical concepts; Analyze statistics from clinical and educational data; Classify statistical analysis as a collection of techniques that are intended to uncover information in data; Discuss how statistical methodology is used to aid thinking in health professions education research; Describe proper use of the statistical techniques that are presented in this course; Compute statistical tests of research hypotheses using methods presented in this course; Interpret the meaning of tests of hypotheses and other statistical computations

HPE 405 Strategies in Assessment, Implementation, and Evaluation in HPE (4 Credit Hours)
This course is designed to equip students with the advanced skills and knowledge required to navigate the evolving landscape of healthcare education. This program offers a dynamic blend of theory and practice. Dive deep into the art and science of designing effective assessment strategies, implementing innovative educational techniques, and rigorously evaluating the outcomes in health professions education. Through critical analysis and synthesis, students will gain the skills to create holistic, evidence-based educational approaches.
Outcomes:
Apply advanced theoretical knowledge to real-world scenarios within the evolving landscape of healthcare education; Employ a blend of theory and practice to effectively address complex challenges and opportunities; Analyze the art and science of effective assessment strategies, innovative educational techniques, outcomes evaluations in health professions education; Demonstrate an understanding of various assessment and testing methods; Appraise educational practices, leveraging advanced skills and knowledge to lead positive change and innovation in healthcare education

HPE 406 Leadership in Health Professions Education (3 Credit Hours)
This course is designed to provide students with an understanding of the various theories that underpin leadership education and practice within the context of health professions education. As an active participant in this class, students will explore the presented leadership theories to shape their approach as an educator but also examine how these theories inform their interactions and engagement with the world within and beyond the healthcare and education domains. Participants will gain insights into how leadership principles can be applied to address the unique challenges and opportunities faced by health professions educators, helping them become a more effective leader and educator in the healthcare field, ultimately contributing to the advancement of healthcare education and practice.
Outcomes:
Review the fundamental concepts of leadership and the theories in the context of health professions education; Analyze ideas, arguments, and viewpoints related to leadership theories within healthcare and educational settings; Assess the effectiveness of different leadership styles, change agent qualities, and approaches in various organizational contexts, especially in the context of driving change; Articulate how one's personal developmental perspective influences both philosophical beliefs and practical applications in healthcare leadership and education

HPE 407 Administrative Skills and Organizational Change (3 Credit Hours)
This course has a clear focus on two main aspects: understanding how organizations undergo transformations and equipping individuals to drive change within an organization. It covers several key areas, including the driving forces behind change, the process of implementing change, the qualities, and skills necessary for effective change agents, and the behavioral theory explaining how both individuals and organizations evolve. A comprehensive grasp of the various theoretical frameworks shaping the organization and structure of higher education is integral to achieving proficiency in these areas. The goal of this course is to provide students with valuable insights into the major functions and structures within higher education. In essence, it's not focused on teaching administrative or faculty tasks but rather on helping participants understand the context within which they operate within higher education. This course introduces students to important concepts, theories, and fiscal practices in higher education. Moreover, it offers opportunities for students to analyze, test, and receive feedback on their financial decision making and its impact on critical higher education issues.
Outcomes:
Explain the significance of theoretical frameworks in shaping the structure of higher education and organizational dynamics; Apply knowledge of organizational change forces; Analyze real-world scenarios of organizational transformation; Examine the various factors contributing to the success or failure of change initiatives within organizations; Demonstrate competence in financial decision-making processes by making informed decisions that address critical higher education issues; Develop innovative approaches for implementing change within an organization

HPE 408 Health Professions Education Capstone Project (3 Credit Hours)
In this course students craft a research proposal primed for submission to the Institutional Review Board (IRB). Guided by seasoned educators and researchers, participants skillfully construct essential components of a robust research proposal that fills a current gap in the literature. Proposals will include an introduction, background, significance, thorough literature review, research methods, budget, and thoughtful implications and conclusions. By course end, students will not only have a well prepared research proposal but also the knowledge and confidence to undertake impactful research in the dynamic landscape of health professions education.
Outcomes:
Demonstrate a grasp of health professions education research principles; Construct an effectively structured research proposal that includes a well-defined introduction, background/significance, and literature review; Develop the research methods, implications, and conclusion sections of a health professions educational research proposal; Generate a coherent, complete, well-structured, and insightful proposal ready for IRB submission

Hebrew (HEBR)

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Infectious Disease & Immunology (IDIM)

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (0-5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (0 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Students will 1) Understand the significance and clearly communicate the research problem; 2) Describe the approaches used and results obtained; 3) Draw conclusions and identify future directions

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Graduate Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (0-1 Credit Hours)
Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446.

ICB 446 Review Seminar (0-1 Credit Hours)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with the Scientific Literature Course 445 and is only offered during the spring semester.

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (0-2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (0-2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

ICB 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Interdisciplinary Studies (INDS)

INDS 400X TBA-Foreign Stdy (0-15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

Italian (ITAL)

ITAL 401 Italian Language and Culture (3 Credit Hours)
This course offers advanced students the opportunity to undertake an in-depth study of cultural debates that have emerged in Italy over the centuries. It examines transformations in Italian culture, and the challenges Italy has confronted in the face of societal changes through the study of a variety of written and visual texts. The course may examine other sources and media.
Outcomes:
By the end of the course, students will formulate their own hypotheses on the transformative periods and the role played by cultural figures and forces in promoting change; Students will explore a topic of their choice guided by the faculty member and will conduct a research project that will result in a final paper; ACTFL* achievement level desired: Advanced Mid to High

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (0-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Microbiology and Immunology (MIIM)

MIIM 402 Microbes & Hosts (3 Credit Hours)
Pre-requisites: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor
Microbes & Hosts conveys important concepts in bacteriology, virology and immunology as well as the interactions of microbes with host organisms. Through a combination of didactic lectures and group discussions, students will come to appreciate fundamental processes which influence microbe-host interactions.
Outcomes:
Students will have a strong understanding of basic principles of microbiology, virology and immunology as well as an understanding of key concepts related to microbe-host interactions

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (3 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Students will learn how to perform laboratory work, including how to appropriately control their experiments, how to interpret results, and what conclusions they may draw

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (0-1 Credit Hours)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor. They will defend their results in a public forum.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students advance their knowledge of new neuroscience concepts and methods, gain experience in presenting in front of a group, and gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

NRSC 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (0-1 Credit Hours)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (0-1 Credit Hours)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PHAR 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PHAR 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

PHYS 473 Energy and Sustainability (4 Credit Hours)
A course that investigates the role of energy in physical systems such as thermosphere and also various sources of energy.
Outcomes:
Ability to apply laws of thermodynamics to physical systems and apply material to high school science class

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Physiology (PIOL)

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 418 Teaching of Physiology (0 Credit Hours)
Teaching training and practice opportunities for upper level PhD candidates.

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 425 Physiology of Aging (3 Credit Hours)
Pre-requisites: BMSC 410, BMSC 412, BMSC 416
The focus of this special topics course is on the unique physiological changes that occur with aging. Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
1) Acquire advanced knowledge of aging processes; 2) Identify key gaps in knowledge in the aging field; 3) Engage in transformational/critical discussion of seminal papers in the aging field

PIOL 426 Biophysical Research Methods (3 Credit Hours)
Pre-requisites: IPBS Core curriculum The focus of this special topics course is to introduce students to the field of biophysics, with special focus on practical applications of biophysical methods in research Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
Demonstrate a general understanding of the field of biophysics; Demonstrate deep knowledge and understanding of fundamental aspects cell mechanics, muscle mechanics, and integrated biomechanics; Demonstrate knowledge of current biophysical methods used in research; Demonstrate knowledge of fluorescence spectroscopy; Demonstrate knowledge of microscopy; Demonstrate understanding of computational biology approaches; Critically evaluate biophysical data from the literature; Interpret biophysical data for a general audience and effectively communicate biophysical information in both oral and written forms; Incorporate high standards of ethics into data interpretation and presentation

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PIOL 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Course equivalencies: BMSC600/MIIM600/PIOL600

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (0-3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Arts and Sciences

Graduate Programs

- Bioinformatics (p. 1558)
  - Bioinformatics (MS) (p. 1559)
- Biology (p. 1560)
  - Biology (MS) (p. 1563)
  - Medical Sciences (MA) (p. 1564)
- Chemistry and Biochemistry (p. 1565)
  - Chemistry (MS) (p. 1568)
  - Chemistry (PhD) (p. 1569)
- Child Development (PhD) with Erikson Institute (p. 1570)
- Classical Studies (p. 1571)
  - Classical Studies Certificate (p. 1575)
- Computer Science (p. 1576)
  - Computer Science (MS) (p. 1583)
  - Computer Science (PhD) (p. 1585)
  - Cybersecurity (MS) (p. 1586)
  - Information Technology (MS) (p. 1587)
  - Networking and Information Security Certificate (p. 1588)
  - Software Engineering (MS) (p. 1589)
  - Technology Management Certificate (p. 1590)
  - Web Programming Certificate (p. 1591)
- Criminal Justice and Criminology (p. 1591)
  - Criminal Justice and Criminology (MA) (p. 1594)
- Data Science (p. 1595)
  - Data Science (MS) (p. 1596)
- Digital Humanities (p. 1598)
  - Digital Humanities (MA) (p. 1598)
- English (p. 1600)
  - English (MA) (p. 1603)
  - English (PhD) (p. 1604)
- History (p. 1606)
  - History (MA) (p. 1609)
  - History (PhD) (p. 1611)
  - Public History (MA) (p. 1615)
  - Public History Program with Dominican University (MA/MLIS) (p. 1616)
- Mathematics and Statistics (p. 1617)
  - Applied Statistics (MS) (p. 1622)
  - Mathematics (MS) (p. 1623)
- Modern Languages and Literature (p. 1625)
  - Hispanic Studies (MA) (p. 1627)
- Philosophy (p. 1628)
  - Philosophy (MA) (p. 1631)
  - Philosophy (PhD) (p. 1632)
  - Social Philosophy (MA) (p. 1634)
- Political Science (p. 1638)
  - International Affairs (MA) (p. 1642)
  - Political Science/Law (MA/JD) (p. 2230)
  - Political Science (MA) (p. 1644)
  - Political Science (PhD) (p. 1646)
- Psychology (p. 1648)
  - Applied Social Psychology (MA) (p. 1651)
  - Applied Social Psychology (PhD) (p. 1652)
  - Clinical Psychology (PhD) (p. 1654)
  - Developmental Psychology (PhD) (p. 1656)
- Sociology (p. 1658)
  - Sociology (MA) (p. 1661)
  - Sociology (PhD) (p. 1663)
- Theology (p. 1665)
  - Theology (MA) (p. 1668)
  - Theology (PhD) (p. 1670)

  - Gender Studies and Migration for Social Justice Online Certificate (p. 1675)
  - Women's Studies and Gender Studies (MA) (p. 1676)
  - Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 2264)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Catholic Studies (CATH)

CATH 400 Catholicism in the Americas (3 Credit Hours)
This course examines social, political, and religious developments in the Americas from the colonial era with a particular focus on the years following the Second Vatican Council through the present day in order to explore a range of issues regarding the nature of religion, politics, and the role of the Catholic Church.

CATH 402 Catholic Church in Modern World (3 Credit Hours)
This course will examine the Church in the modern world-- with an emphasis on the relationship between Catholicism and democracy, placing particular stress on their relevance to contemporary American public life. In this context, Catholicism will be understood not only as a religious institution, but as the source of a tradition of communitarian social and political thought, while democracy will be understood not only as a form of government, but also as an ethos shaping American society. Authors and texts will include Alexis de Toucqueville, Orestes Brownson, Dorothy Day, John Courtney Murray, and relevant documents from Vatican II and the American hierarchy. The historic tension between Catholicism and democracy will be the subject of our conversation as will the possibilities for greater harmony between them. In particular, we will explore the possibility that Catholicism's communitarian orientation might serve as a corrective to American individualism and consumerism, while democratic institutions and practices might have something to offer Catholicism.

CATH 498 Integrative Project (3 Credit Hours)
This is a synthesis course in which the student, in consultation with a faculty member, will independently research and develop a project that integrates subject-mastery and skills that they have developed over the course of their studies.

CATH 499 Independent Study (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Catholic Studies not otherwise covered by course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Catholic Studies

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (0 Credit Hours)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (0 Credit Hours)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science and Education (CSED)

CSED 401 Intro to Programming & Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 430 Technical Administration of PC Cluster (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 431 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

Computer Science & Information Systems (CSIS)

CSIS 484 Project Management (3 Credit Hours)
The art and science of project management as applied to a variety of large and small project situations, in commercial, public, and private sectors. Coverage includes project life cycle management, project organization and leadership, proposals and contracts, and techniques for project planning, estimating, scheduling, and control.
Course equivalencies: X-CSIS484/ISOM484

CSIS 498 Telecommunications for Managers (3 Credit Hours)
This course introduces the basic concepts of data communications, telecommunications networks, and business applications of telecommunications technology, from a managerial perspective. Basic concepts covered include data communications hardware and software, transmission media, and network topology, with an emphasis on local area networks (LANs) and client server applications. Issues related to the management of LANs, wide area networks, and international telecommunications networks will be presented. The course will address technical and managerial issues related to the use of telecommunications for strategic advantage and its role in business organizations. Business cases involving the planning, designing, implementation, and management of communications networks in business organizations will be discussed.
Course equivalencies: X-CSIS498/ISOM498

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the U.S

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the U.S. in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e., 408 project or thesis).

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory--for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

Erikson Institute (ERIK)

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

Graduate School Seminar (GSSM)

GSSM S59 Thesis Supervision-Summer (0 Credit Hours)
Course for continuing students engaged in thesis research and writing under advisor's supervision during summer.

GSSM S60 Dissertation Supervision-Summer (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision during summer.

GSSM S61 Doctoral Study-Summer (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations in summer.

GSSM S65 Master's Study-Summer (0 Credit Hours)
Course for continuing master's degree students engaged in study for comprehensive or qualifying examinations during summer.

GSSM 501 Teaching Effectiveness Seminar (0 Credit Hours)
Pre-requisites: Approval of the Graduate School
This seminar provides pedagogical support to funded graduate students serving as teachers of record.
Outcomes:
To enhance students' abilities to teach undergraduate courses and deepen their pedagogical toolkit

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Hebrew (HEBR)

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Interdisciplinary Studies (INDS)

INDS 400X TBA-Foreign Stdy (0-15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

Italian (ITAL)

ITAL 401 Italian Language and Culture (3 Credit Hours)
This course offers advanced students the opportunity to undertake an in-depth study of cultural debates that have emerged in Italy over the centuries. It examines transformations in Italian culture, and the challenges Italy has confronted in the face of societal changes through the study of a variety of written and visual texts. The course may examine other sources and media.
Outcomes:
By the end of the course, students will formulate their own hypotheses on the transformative periods and the role played by cultural figures and forces in promoting change; Students will explore a topic of their choice guided by the faculty member and will conduct a research project that will result in a final paper; ACTFL* achievement level desired: Advanced Mid to High

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (0-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

PHYS 473 Energy and Sustainability (4 Credit Hours)
A course that investigates the role of energy in physical systems such as thermosphere and also various sources of energy.
Outcomes:
Ability to apply laws of thermodynamics to physical systems and apply material to high school science class

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (0-3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing. The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women's and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
