Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Bioinformatics

ABOUT US

Bioinformatics is a highly interdisciplinary STEM field that integrates computational and statistical methods for analyzing large biological data sets. Bioinformaticians apply their biological and computational sciences backgrounds to develop, utilize, and optimize new computational tools to organize, synthesize, and analyze the rapidly increasing amount of biological and biomedical data.

The Bioinformatics Program includes Loyola faculty from the Departments of Biology, Chemistry, Computer Science, and Mathematics and Statistics. While these faculty have a vast area of research interests, all require interdisciplinary approaches.

The Bioinformatics Program at Loyola is part of the College of Arts and Sciences. The program provides students with unique preparation for professional careers by offering both integrated and project-based learning with courses that feature the latest developments in the field.

GRADUATE PROGRAMS

- Bioinformatics (MS) (p. 1559)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Bioinformatics (MS)

Bioinformatics is a highly interdisciplinary STEM field that integrates computational and statistical methods for analyzing large biological data sets. Bioinformaticians apply their biological and computational sciences backgrounds to develop, utilize, and optimize new computational tools for organizing, synthesizing, and analyzing the rapidly increasing amount of biological and biomedical data.

Prospective students choose between the **Thesis-based track** and the **Non-thesis track**.

Thesis-Based Track

Students will be trained and mentored in
conducting independent hypothesis-driven research, including experimental design, data analysis, and interpretation of results. They will also learn scientific writing and presentation design and delivery. After graduation, students are primed for competitive Ph.D. programs and positions at research institutions, in government agencies and other public sectors, as well as in the private sector.

Non-Thesis Track

Students gain real-world experience in an internship environment and are exposed to a breadth of coursework in the field of bioinformatics.
At the conclusion of their studies, graduates are competitive for employment in the biotech industry, as well as in bioinformatics positions in academia, government agencies, hospitals, and related public and private institutions.

CURRICULUM

Degree Requirements

Applicants pursuing the Master of Science in Bioinformatics select the **Thesis-based track** or the **Non-Thesis track**. Students must complete 30 credit hours. Six (6) courses, worth a total of 17 credit hours, comprise the ***Core Curriculum***, and the remaining 13 credit hours will consist of track-specific courses.

Core Curriculum

Code	Title	Hours
BIOL 488	Bioinformatics	3
COMP 483	Computational Biology	4
STAT 437	Quantitative Bioinformatics	3
BIOI 500	Advanced Bioinformatics	3
BIOI 501	Bioinformatics Seminar	1
BIOI 565	Exploring Proteins (Fall only)	3
or CHEM 465	Special Topics in Biochemistry	
Track Specific Courses (p. 1559)		**13**
Total Hours		**30**

Track Specific Courses

Thesis Track

Code	Title	Hours
UNIV 370	Responsible Conduct in Research and Scholarship	0
BIOI 494	Bioinformatics Research Design	1
BIOI 499	Bioinformatics Research	8
BIOI 595	Thesis Supervision	1
+ 1 Bioinformatics Elective *		3
Total Hours		**13**

* *Thesis track: No stipulation regarding the department of the Bioinformatics Elective (see list below).*

Non-Thesis Track

Code	Title	Hours
BIOI 498	Bioinformatics Internship	1
+ 4 MS Bioinformatics Electives *		12
Total Hours		**13**

* *Non-Thesis Track: Bioinformatics Elective Courses must be selected from at least three departments.*

COMP 479	Machine Learning	3
COMP 486	Computational Neuroscience	3
Statistics		
STAT 406	Stochastic Processes	3
STAT 407	Statistical Design	3
STAT 408	Applied Regression Analysis	3
STAT 410	Categorical Data Analysis	3
STAT 436	Topics in Biostatistics	3

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

LEARNING OUTCOMES

In Loyola's M.S. in Bioinformatics program you will gain fundamental skills that will help you be an inquisitive scientist, including:

- a solid foundation in biological, computational, chemical, and statistical concepts and theory;
- the facility to interpret primary scientific literature;
- the capacity to employ statistical and computational methods to investigate and solve problems within the life sciences;
- the ability to conduct bioinformatics study in industry and/or the research environment; and
- science-related oral and written communication skills.

Biology

Overview

The Biology Department offers Masters programs in Biology and Medical Sciences. Our faculty members are well-respected leaders in their fields and publish extensively. They also attract a significant amount of external grant support which allows them to pursue research projects that are at the forefront of modern biology. Students receive individual attention as they pursue their own research and work toward their master's degree.

Graduate Programs

- Biology (MS) (p. 1563)
- Medical Sciences (MA) (p. 1564)

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Biology (MS)

Our faculty members are well-respected leaders in their fields and publish extensively. They also attract a significant amount of external grant support which allows them to pursue research projects that are at the forefront of modern biology. Students receive individual attention as they pursue their own research and work toward their master's degree.

The MS in Biology degree program focuses on the development of experimental and intellectual skills required for vigorous research. Our program is research/thesis-based and takes most students two to three years to complete.

Students are assigned an advisor to help them develop an individualized curriculum. Once a curriculum is selected, students join the labs of their thesis directors and begin their research.

Curriculum

The Master of Science in Biology requires 30 hours of coursework and a formal research thesis.

Course Requirements

To become an official candidate for the MS degree, students must earn 30 credit hours and show satisfactory performance in course work and thesis research.

Code	Title	Hours
Required Courses		
BIOL 470	Biostats & Exp Design Lec/Lab [1]	4
BIOL 500	Scientific Logic [2]	3
BIOL 510	Instructions in Teaching Biology	1
BIOL 511	Biology Teaching Practicum [3]	2
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
BIOL 422	Research	1-6
	Hours taken for Research vary per term. Students will earn 3-9 hours over the course of the program.	
Graduate level BIOL electives		*9-15*
BIOL 402	Microbiology	
BIOL 405	Advanced Development	
BIOL 409	Advanced Genetics	
BIOL 410	Advanced Cell Biology	
BIOL 413	Advanced Immunology	
BIOL 415	Advanced Parasitology	
BIOL 416	Limnology Lec/Lab	
BIOL 417	Wetland Ecology Lec/Lab	
BIOL 418	Aquatic Insects Lecture & Laboratory	
BIOL 426	Entomology Lec/Lab	
BIOL 482	Advanced Molec Genetics	
BIOL 483	Pop Genetics	
BIOL 485	Prin Electron Microscopy Lec/Lab

BIOL 493	Directed Reading	
BIOL 495	Special Topics	
BIOL 595	Thesis Supervision	0
Total Hours		**30**

1. BIO 470 must be completed with a grade of B or higher to demonstrate proficiency in experimental design and analysis.
2. BIO 500 must be completed with a grade of B or higher to demonstrate proficiency in scientific writing and reading scientific literature.
3. University-funded students must take BIOL 511 Biology Teaching Practicum twice (4 credit hours). Grant-funded or externally-funded students take BIOL 511 Biology Teaching Practicum once (2 credit hours).

Thesis Requirements

Research is the focus of the master's degree program at Loyola University Chicago. Faculty engage students in ongoing studies and students are well-supported when taking on new projects and challenges. Students work with their thesis advisors to develop and conduct a specialized research project. Based on this work, students write and defend a master's thesis. Students in the MS program must write and present a thesis outline to their faculty committee. The proposal outline must be approved by February 1 of the student's first year in the program. Following this approval, students will write and defend the master's

thesis. The final thesis will be deposited in a publicly accessible database in accordance with Graduate School policy.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
BIOL 500	Scientific Logic	3
BIOL 510	Instructions in Teaching Biology	1
Elective		0-5
	Hours	**7**
Spring		
Electives or Research		0-6
BIOL 511	Biology Teaching Practicum [1]	2
	Hours	**8**
Year Two		
Fall		
BIOL 470	Biostats & Exp Design Lec/Lab [2]	4
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
Electives or Research		0-3
	Hours	**9**
Spring		
Electives or Research		6-7
	Hours	**6**
	Total Hours	**30**

1. Students on University Scholarships must take BIOL 511 Biology Teaching Practicum two times. Unsupported students, students supported through an advisor's grant, and students supported by their own grants take BIOL 511 one time.
2. BIOL 470 Biostats & Exp Design Lec/Lab is offered every other year and alternates with BIOL 500 Scientific Logic.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MS in Biology, students will be able to demonstrate:

- Proficiency in experimental design and analysis.
- Proficiency in scientific writing and reading scientific literature
- Communication skills in both teaching and presenting research
- The ability to critically think, analyze data and write scientifically
- The ability to interact as an independent researcher

Medical Sciences (MA)

The Master of Arts in Medical Sciences program is a special master's program (SMP) that prepares students to build a compelling medical school application. MAMS is a record enhancement program and not a career changer program, and as such, all pre-medical prerequisites must be completed. Our graduate post-baccalaureate is known for the rigor and quality of our coursework leading to a master's degree. Also, we have a long-term commitment to advising our students and assisting them at every stage of the medical school application process. We are dedicated to promoting the personal and professional development of each student, facilitating their entry and assuring their future success in Medical School. We maintain a student-centered, non-competitive environment that allows each student to capitalize on their strengths as they build their medical school credentials. We are guided by the Jesuit values of "seeking knowledge in the service of humanity; preparing to live in a shared, global community; and building on the desire to always do and become more."

In support of our mission, Loyola's MAMS program:

- Provides students with a high-quality educational experience from dedicated faculty recruited from some of the best medical schools in the US.
- Offers substantial office hours contact with faculty.
- Provides premedical advising upon entry to the program, through post-graduation, on every aspect of a student's medical school application. Students enjoy a full-time pre-medical advisor who works solely with MAMS students.
- Provides support for medical school applications with letters of recommendation.
- Fosters an active community in which students support each other through collaborative learning and group study.
- Facilitates access to Chicago-area hospitals and clinics with opportunities to work with underserved populations, sensitizing students to social justice issues, especially regarding the availability of medical care.
- Offers professional development seminars to familiarize students with individual medical schools, to strengthen their medical school applications, and to discuss ethical issues and social justice efforts with experts in the field.
- Values diversity in our student, professional and social communities.

Related Programs

Master's

- Biology (MS) (p. 1563)
- Medical Laboratory Science (MS) (p. 1870)

Combined

- Medicine/Public Health (MD/MPH) (p. 2222)

Curriculum

To receive the MA in Medical Sciences degree, students must complete 30 credit hours in a curriculum drawn each year from courses listed below. However new courses are added on a routine basis and students should confirm course selections with their MAMS advisor.

Courses

Code	Title	Hours
BIOL 401	Medical Literature and Ethics	3
BIOL 408	Writing for the Medical Professions	3
BIOL 409	Advanced Genetics	3
BIOL 410	Advanced Cell Biology	3
BIOL 413	Advanced Immunology	3
BIOL 452	Human Anatomy and Physiology I	3
BIOL 453	Human Anatomy and Physiology II	3
BIOL 455	Advanced Neuroscience	3
BIOL 466	Advanced Biochemistry	3
BIOL 495	Special Topics	3
Total Hours		**30**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
BIOL 401	Medical Literature and Ethics	3
BIOL 409	Advanced Genetics	3
BIOL 410	Advanced Cell Biology	3
BIOL 452	Human Anatomy and Physiology I	3
BIOL 455	Advanced Neuroscience	3
	Hours	**15**
Spring		
BIOL 408	Writing for the Medical Professions	3
BIOL 413	Advanced Immunology	3
BIOL 453	Human Anatomy and Physiology II	3
BIOL 466	Advanced Biochemistry	3
BIOL 495	Special Topics	3
	Hours	**15**
	Total Hours	**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the program and implementing advice received from the program, students will have strengthened their medical school candidacy by demonstrating to medical schools that:

- They can succeed in rigorous science courses
- They can secure and maintain a volunteer position in a hospital or clinic
- They embody the characteristics of professionalism and leadership necessary in the medical profession.

Chemistry and Biochemistry

The Department of Chemistry provides graduate students in our MS and PhD programs a unique atmosphere, with state of the art instrumentation, accomplished professors, and motivated researchers. Much of the current research transcends traditional boundaries to include fields such as surface chemistry of organic electronic materials, quantifying physiological processes via synthesis of optical probes, applied information theory to thermodynamic systems, and metal analysis in retina causing cataract development. Weekly seminars and the annual Denkewalter Lecture (https://www.luc.edu/chemistry/events/denkewalterlecture/), which brings the winner of either the American Chemical Society's Pure Chemistry or Eli Lilly awards (https://www.acs.org/content/acs/en/funding/technical-divisions.html) to campus, provide opportunities to learn about recent advances from respected academic and industrial scientists.

Graduate Programs

- Chemistry (MS) (p. 1568)
- Chemistry (PhD) (p. 1569)

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Chemistry (MS)

The Graduate Chemistry program at Loyola University Chicago encompasses the traditional fields of specialization, including: *Analytical Chemistry, Biochemistry, Chemical Education, Inorganic Chemistry, Organic Chemistry and Physical Chemistry*

For students who enroll in our course-based Master of Science program, you will enjoy the small class sizes found in our upper level courses and access it provides to your instructors. Students with a strong interest in research can choose to obtain a thesis-based master's in a diverse range of subjects. Our MS students receive the academic rigor and laboratory instrumentation access associated with our PhD program in a flexible and condensed schedule expected of a master's program.

CHEM 435	Special Topics in Physical Chemistry (Computational Chemistry)	
CHEM 605	Master's Study	0
CHEM 595	Thesis Supervision	0
Total Hours		**30**

Thesis Requirement

In addition to coursework, students in Thesis-based MS in Chemistry will write and defend a research thesis. Once students have completed coursework and are solely working on the thesis they will be enrolled in the appropriate study or supervision course to maintain good standing in the university.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Trained in necessary lab protocol (notebooks, design of experiment, safety, etc.), effective communication of science, and job function (intellectual property, regulatory, ethics, etc.) necessary for careers with an advanced degree.
- Develop capabilities to solve fundamental problems on advanced topics in chemistry sub-disciplines relevant to their field of study.
- Demonstrate the ability to select and utilize appropriate methodologies and practices to solve chemical problems.

Chemistry (PhD)

Doctoral study in Chemistry at Loyola University Chicago is designed to develop within students the foundational skills for industrial work, academic research, and teaching careers in diverse learning communities. The department of chemistry offers opportunities for graduate study in sub-fields of chemistry such as Physical & Surface Chemistry, Medicinal Chemistry, Theoretical Chemistry, Biochemistry and Chemical Education.

Related Programs

Master's

- Biochemistry and Molecular Biology (MS) (p. 1734)
- Chemistry (MS) (p. 1568)

Combined

- Biochemistry (BS/MS) (p. 1006)

Curriculum

The PhD in Chemistry requires 60 credit hours earned through 6 (six) required courses and 42 credit hours of research in their sub-field, as well as an entrance examination, comprehensive examination, and dissertation. Students may choose a specialization in Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry, or Physical Chemistry.

PhD Students will complete entrance exams, a comprehensive exam and then propose and defend research towards the dissertation.

Code	Title	Hours

Total Hours		**60**

1. Must choose from one of the following: Archeometry and Adv Analytical Chemistry.
2. For CHEM 465 choose from one of the following: Plant Biochemistry; The Chemistry of Enzymes; Biochem of Lipids; Adv Approaches in Biochemistry; Adv Enzyme Kinetics and Mech; Molecular Immunology; Biochem of Renewable Energy; and Proteomics;
3. For CHEM 445 choose from one of the following: Molecular Characterization Part B; Medicinal Inorganic Chem; and Electron and X-Ray Methods.
4. For CHEM 425 choose from one of the following: Orgo Structure Determination; Strategy & Tactics or Org Chem; Func Dyes Biomed Imaging; Adv Orgo-Synthesis and Mech; Comp Organomet Chem; and Advanced Organic Synthesis;
5. For CHEM 435 choose from one of the following: Exp Tech of Surface Science; Survey of Modern Physical Chemistry; Surface Chem and Analysis; Thermodynam/ Protein Structures; and Computational Chemistry;

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Trained in necessary lab protocol (notebooks, design of experiment, safety, etc.), effective communication of science, and job function (intellectual property, regulatory, ethics, etc.) necessary for careers with an advanced degree.
- To be able to educate students interested in chemical sciences.
- Develop capabilities to solve fundamental problems on advanced topics in chemistry sub-disciplines relevant to their field of study.
- To be able to effectively design and carry out independent research leading to new knowledge or a practical, applicable result. This includes mastery of gathering, organizing, analyzing, and reporting data.

Child Development (PhD) with Erikson Institute

As of Fall 2024, this program is no longer accepting new students.

The PhD in Child Development is offered in partnership between the Erikson Institute and the Graduate School at Loyola University Chicago. Students examine how factors such as culture, social class, and social relationships influence human development from infancy through early and middle childhood. Among others, PhD graduates can consider careers in research, applied child development research, program design and evaluation, college teaching, program administration, and policy analysis.

Curriculum

The PhD in Child Development requires 42 credit hours of coursework, a qualifying paper, and a dissertation. Students enroll in courses both at Erikson Institute and at Loyola simultaneously.

Required Coursework

Code	Title	Hours
ERIK E421	Social and Emotional Development I	3
ERIK E426	Cognitive Development	3
ERIK E477	Seminar Children-At-Risk	3
ERIK E479	Teaching & Learning: Linking Theory & Research to Practice	3
ERIK E481	Seminar Social & Cultural Contexts	3
ERIK E482	Program Evaluation and Implementation Science	3
ERIK E489	Special Topics in Child Development	3
ERIK E486	Teaching Internship	3
ERIK E485	Research Internship	3
ERIK E497	Doctoral Study	0
ERIK E499	Dissertation Supervision	0
Select Two Graduate Electives from Loyola [1]		*6*
Select Three Graduate Methods or Statistics Courses at Loyola [2]		*9*
Total Hours		**42**

1. Loyola coursework is frequently taken in the School of Education or Psychology department. Students may speak with Graduate Program Director for assistance.
2. A list of approved methods and statistics courses will be made available by the Graduate Program Director.

Qualifying Paper

Upon completion of coursework, students will complete a qualifying paper to demonstrate readiness for candidacy.

Dissertation

Guided by a committee of faculty members, students will execute a substantial original piece of research to advance knowledge in the field of child development. After a public oral defense, the final dissertation will be deposited in a publicly available database per Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research

and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Child Development, students are expected to understand and apply the following in the areas of Theory, Context, Research Methods, and Intervention:

- (Theory) Basic tenets of influential child development theories and emerging theoretical and conceptual frameworks (e.g., behavioral genetics and developmental neuroscience)
- (Theory) Theoretical and conceptual frameworks utilized in empirical child development research
- (Theory) Processes and mechanisms that promote development and change
- (Theory) The use of scientific methods to inform and advance theory
- (Context) The transactional nature of development and how it interacts with all ecologies within which children are located (e.g., homes, schools, neighborhoods)
- (Context) Inequities in resources (historical and current) and structural oppressions and how these impact child development
- (Context) Strengths-based approaches to child development and the impacts that deficit lenses have
- (Research Methods) Quantitative and qualitative research methods and how each can be applied to relevant questions in child development
- (Research Methods) Univariate and multivariate data analytic techniques, including: correlation and regression (e.g., hierarchical multiple regression and logistic regression), factor analysis (e.g., exploratory, confirmatory) and ANOVA (e.g., repeated measures, MANOVA)
- (Research Methods) Up-to-date approaches for analyzing mediation, moderation and interdependence and for interpreting results of these analyses.
- (Research Methods) Specific analytic techniques for answering specific types of research questions and for drawing appropriate inferences from results.
- (Research Methods) Explain the strengths and limitations of measurement (e.g., reliability, validity) and designs (e.g., correlational, experimental, quasiexperimental; cross-sectional vs. longitudinal), quantitative and qualitative methods and analysis strategies to the study of child development
- (Intervention) The landscape of interventions for children and families (e.g., home visiting, early childhood education), and how such programs are developed and evaluated
- (Intervention) Research designs for assessing intervention effectiveness (e.g., appropriate application of quasi-experimental, experimental (RCT)
  and non-experimental research)
- (Intervention) Critical elements in intervention research and implementation science (including issues such as fidelity, attrition, dosage and local
  adaptations)
- (Intervention) Ethical and responsible conduct of intervention research (including attention to research with vulnerable populations)
- (Intervention) Empirical and theoretical foundations of interventions (either existing or newly designed), including hypothesized mechanisms of change, cultural appropriateness, and research for assessing effectiveness of a specific intervention

Classical Studies

The Post-Baccalaureate Certificate in Classical Studies offers students who have completed a Bachelor's degree the opportunity to achieve the fluency in reading ancient Greek and Latin required to pursue graduate study in Classics or related fields such as ancient history, archaeology, art history, philosophy, theology, or medieval studies. Coursework at the post-baccalaureate level also introduces some of the scholarship of Classical texts in which graduate study engages. Post-baccalaureate students become able to clarify their professional goals while they sharpen their technical skills and become better qualified to advance on the path they choose.

Linguistic preparation is a critical factor in students' success in the early years of their graduate programs. Committed and otherwise well-qualified students who have been able to begin serious language study only toward the end of their undergraduate careers face a competitive disadvantage. The Post-Baccalaureate Certificate is a credential with which to surmount it. No previous language experience is required, and students may choose from three tracks: Ancient Greek & Latin, Ancient Greek, or Latin.

Graduate Program

- Classical Studies Certificate (p. 1575)

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATIN (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Classical Studies Certificate

The Post-Baccalaureate Certificate in Classical Studies offers students who have completed a Bachelor's degree the opportunity to achieve the fluency in reading ancient Greek and Latin required to pursue graduate study in Classics or related fields such as ancient history, archaeology, art history, philosophy, theology, or medieval studies. Coursework at the post-baccalaureate level also introduces some of the scholarship of Classical texts in which graduate study engages. Post-baccalaureate students become able to clarify their professional goals while they sharpen their technical skills and become better qualified to advance on the path they choose.

Linguistic preparation is a critical factor in students' success in the early years of their graduate programs. Committed and otherwise well-qualified students who have been able to begin serious language study only toward the end of their undergraduate careers face a competitive disadvantage. The Post-Baccalaureate Certificate is a credential with which to surmount it.

Loyola's program is shaped in terms of competence attained, rather than a fixed period of study. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Curriculum

The Post-Baccalaureate Classical Studies Certificate has three tracks: Greek and Latin, Greek, or Latin. Each option requires 6 courses (18 credit hours) to complete.

Greek and Latin Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in both Classical languages with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Greek author-courses and at least 6 credit-hours in 300-level Latin author-courses. We recognize some students will have attained intermediate or advanced competence in both languages before their post-baccalaureate study and will need only two semesters of target-level work; some may have had the opportunity to become proficient in one Classical language but have weaker preparation in the other; and some may need to begin their study of both languages and will need additional coursework to complete the Certificate. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Code	Title	Hours
Two 300-level LATN Courses		*6*
Two 300-level GREK Courses		*6*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**18**

Greek Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in Greek with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Greek author-courses and 6 credit-hours in composition or directed studies. We recognize some students will have attained intermediate or advanced competence in Greek before their post-baccalaureate study and will need only two semesters of target-level work, others may need more time; Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Code	Title	Hours
Four 300-level GREK Courses [1]		*12*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**18**

[1] Two of these courses are typically Greek Composition or a Directed Study.

Latin Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in Latin with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Latin author-courses, and 6 credit-hours in composition or directed studies. We recognize some students will have attained intermediate or advanced competence in Latin before their post-baccalaureate study and will need only two semesters of target-level work, others may need more time; Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Four 300-level LATN Courses [1]		*12*
Two Graduate Level Courses in Classical Studies		*6*
Total Hours		**18**

[1] Two of these courses are typically Latin Composition or a Directed Study.

Course descriptions for Undergraduate Classical Studies courses can be found here (p. 334) and for Graduate Classical Studies courses can be found here (p. 1571).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Greek and Latin Track

Course	Title	Hours
Year One		
Fall		
LATN 300-Level Course		3
GREK 300-Level Course		3
CLST Elective		3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Fluency in reading ancient Greek and/or Latin.
- Increased knowledge of the history of scholarship in ancient studies.
- Broader knowledge of the ancient Mediterranean world, gained through courses in art, archaeology, literature, and history.
- Sharpened technical skills (e.g., producing original and creative translations, reading scholarly articles, writing, presenting orally, preparing graduate school applications).
- Clarified goals for future professional work or higher education experiences.

Computer Science

Overview

The Computer Science Department offers PhD, Masters, and Graduate-level Certificate programs spanning their discipline to further their technical understanding.

Graduate Programs

- Computer Science (MS) (p. 1583)
- Computer Science (PhD) (p. 1585)
- Cybersecurity (MS) (p. 1586)
- Information Technology (MS) (p. 1587)
- Networking and Information Security Certificate (p. 1588)
- Software Engineering (MS) (p. 1589)
- Technology Management Certificate (p. 1590)
- Web Programming Certificate (p. 1591)

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (0 Credit Hours)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (0 Credit Hours)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science (MS)

The Master of Science in Computer Science provides a broad background in the practical and theoretical foundations of Computer Science appropriate for those interested in research or in advanced career opportunities.

The M.S. in Computer Science offers the following areas of specialization:

- No Concentration (Default)
- Artificial Intelligence
- Cybersecurity
- Computer Systems
- Thesis Track

Related Programs

Master's

- Information Technology (MS) (p. 1587)
- Software Engineering (MS) (p. 1589)

Curriculum

The Master of Science in Computer Science requires a total of 30 credit hours (typically 10 courses). To achieve depth and breadth, Computer Science students must complete the following to obtain the required 30 credits to graduate:

Code	Title	Hours
COMP 417	Social and Ethical Issues in Computing [1]	3
COMP 460	Algorithms & Complexity [1]	3
Track/Major Requirements		**12**
No Concentration (Default)		
Required Course		
COMP 413	Intermediate Object-Oriented Development	
Select three of the following:		
COMP 410	Operating Systems	
COMP 433	Web Services Programming	
COMP 436	Markup Languages	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 443	Computer Networks	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Artificial Intelligence [2]		
Required Course		
COMP 479	Machine Learning	
Select one of the following:		
COMP 429	Natural Language Processing	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics [3]	
Select two of the following:		
COMP 406	Data Mining	
COMP 429	Natural Language Processing	
COMP 458	Big Data Analytics	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics	
Cybersecurity [2]		
Required Course		
COMP 401	Computer Security	
Select three of the following:		
COMP 431	Cryptography	
COMP 440	Computer Forensics Investigations	
COMP 445	Internet of Things Device and Application Security	
COMP 447	Intrusion Detection and Computer Forensics	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
COMP 488	Computer Science Topics [3]	
Computer Systems [2]		
Required Course		
COMP 410	Operating Systems	
Select three of the following:		
COMP 405	Database Administration	
COMP 413	Intermediate Object-Oriented Development	
COMP 439	Distributed Systems	
COMP 443	Computer Networks	
COMP 451	Enterprise Networking	
COMP 462	Advanced Computer Architecture	
COMP 464	High-Performance Computing	
COMP 472	Compiler Construction	
General Elective Courses		12
Total Hours		**30**

1. Either required course above can be substituted with another graduate course under the discretion of Graduate Program Director if students had their equivalent in their undergraduate program.
2. Students may petition the Graduate Program Director to substitute COMP 460 with a fifth course from this list.
3. COMP 488 counts as an AI restricted elective only if the GPD determines that the course in question is related to Machine Learning. Similarly, COMP 488 counts as a Cybersecurity restricted elective only if the GPD determines that the course is related to Cybersecurity.

Prerequisite/Preparation Courses

All of these courses must be taken if you do not have a four-year undergraduate degree in a related field, and will not be counted towards the MS degree requirements.

Code	Title	Hours
COMP 400A	Object-Oriented Programming	3
COMP 400B	Data Structures I	3
COMP 400C	Data Structures II	3
COMP 400D	Computing Tools and Techniques	1
COMP 400E	Discrete Structures	3

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director.Students may not use an introductory course to satisfy a foundation or elective requirement.

Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.
- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived with discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

General Electives

General electives can be any COMP 400 (p. 1576)-level class, except the preparation courses listed above. The elective course options are common for all programs, differing only in the total number of credits required. There are numerous options for independent study, including a programming project, research, or a service-oriented project. Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship to fulfill electives.

Thesis Tracks

MS in Computer Science students may elect to craft a master's thesis. Course work is strongly recommended over the thesis option, especially for those not planning on a research-oriented career. Many students pursuing the thesis option would be considering a PhD program.

Students wishing to do a thesis should discuss this option as early as possible with the Graduate Program Director. These may involve research in purely theoretical computer science (for example, development or analysis of algorithms), the development of a software package, or instrumentation, measurement, and analysis of existing systems (for example, studying network performance). Because of this wide range, there is no one formal course in research methods. Courses in the electives list contain a significant component of area-specific integrated research methods material. Students interested in writing a thesis are strongly urged to seek advising as early as possible as to which electives will be the most appropriate for the student's proposed area of research.

1. Identify a faculty advisor and select a tentative topic or area of research. The existing program allows you to take up to 6.0 hours of COMP 490 Independent Project. You will typically begin your research program in such a course, though you may also identify an advisor and select a tentative topic as part of a conventional classroom.
2. Secure permission to pursue the thesis option from the Graduate Program Director. The Graduate Program Director, in consultation with you and your chosen advisor, recommends a thesis committee to the Graduate School. The committee will consist of at least three faculty members; normally the committee director will be the advisor.
3. Once required courses are concluded and a thesis committee is approved, you maintain full-time status by enrolling in the zero-credit-hour COMP 605 Master of Science Study or COMP 595 Thesis Supervision.
4. You will then prepare a formal research proposal, in consultation with your advisor. This proposal must be submitted to your committee for review. Any research involving human subjects will required IRB approval or exemption *before* the Graduate School approves your proposal. After this step you are now ready to "conduct research" for the project.
5. Upon completion of your thesis, you will be required to formally defend your research. Schedule this with your committee. Your thesis should be in nearly final form. Typically you should give the committee three weeks to read the final draft of the thesis before the defense date. Once approved by your committee, the GPD will submit the ballot for Graduate School approval and the student will submit their thesis for publication in the university eCommons.

Suggested Sequence of Courses

This sequence assumes starting in Fall and taking one Internship in the following Summer.

Course	Title	Hours
Year 1		
Fall		
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
Elective 1		3
	Hours	**9**
Spring		
COMP 460	Algorithms & Complexity	3
Restricted Elective 1		3

Restricted Elective 2		3
	Hours	**9**
Summer		
COMP 499	Internship	3
	Hours	**3**
Year 2		
Fall		
Restricted Elective 3		3
Elective 2		3
Elective 3		3
	Hours	**9**
	Total Hours	**30**

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain a broad background in the practical and theoretical foundations of Computer Science.
- Students in a specific concentration will gain mastery in that area, which students who pursue the thesis option will gain deep expertise in their research area.

Computer Science (PhD)

The PhD in Computer Science is a new research-focused doctoral program with the objective to help students develop proficiency in conceptualizing and implementing computer models and tools that address societal needs. This proficiency will enable students to analyze and review critically the scientific work in their area of interest and in the broader field of computer science.

COMP 502	Structure of Research Management and Funding	3
COMP 503	Technology Entrepreneurship	3
Dissertation Research		*21*
Total Hours		**60**

[1] To establish qualifications for research, students must take courses covering at least three of the four pillars of computer science (theory, systems, software, and artificial intelligence). A grade of A is required in three courses for successful qualification for doctoral candidacy.

Research and Dissertation

The doctoral program culminates in a dissertation that makes an original contribution to the discipline. Along the way, doctoral students are expected to write peer-reviewed conference and journal articles, engage in community outreach, develop their pedagogical skills, and pursue increasingly complex research projects. Students are also expected to open-source their research projects. The final dissertation must be deposited in a publicly accessible database in accordance with Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Computer Science, students will be able to demonstrate:

- Fundamental understanding of the principles, major research findings and current open problems in their area of emphasis
- Effective scientific communication skills
- Proficiency in critical thinking (including social impact)
- Appropriate use of the scientific method
- Technical writing proficiency
- Original scholarship and the ability to conduct independent research
- Understanding of equitable and inclusive computer science pedagogy
- Understanding of the grant proposal development process and various funding agencies

Cybersecurity (MS)

As cybersecurity becomes an increasingly valuable discipline to protect organizations' devices, networks, software, and data from cyber threats and attacks, the demand for skilled well-trained cybersecurity professionals will continue to grow. This program equips students with the skills and experience needed to begin or advance a successful career in cybersecurity. The Cybersecurity MS program offers a balance of technical and experiential learning through interdisciplinary coursework, innovative instruction, and opportunities to engage in research, competitions, and internships. Guided by Loyola's faculty, composed of active researchers and experienced practitioners, students develop advanced knowledge and earn first-hand experience in cybersecurity fundamentals, threat analysis, secure system design, incident detection and response, ethical hacking and penetration testing, artificial intelligence and machine learning, and more.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Security Fundamentals: Strong understanding of the fundamental principles and concepts of cybersecurity, including confidentiality, integrity, availability, authentication, and authorization.
- Threat Analysis: Ability to identify and assess security threats and vulnerabilities and develop strategies to mitigate cybersecurity attacks.
- Secure System Design: capacity to design and implement secure systems and networks, considering security at all stages of the development lifecycle.
- Incident Detection and Response: Skills to detect, respond to, and recover from cybersecurity incidents, including malware infections, data breaches, and denial-of-service attacks.
- Ethical Hacking and Penetration Testing: Competency in the areas of ethical hacking and penetration testing. This includes adherence to ethical principles and professional standards for cybersecurity, the ability to assess the security of systems and networks and recommend remediation strategies.

Information Technology (MS)

The Master of Science in Information Technology is designed for current and aspiring professionals in charge of developing, implementing, operating, and managing information systems in a variety of organizations.

Students in this program will gain a broad technical understanding of current and emerging technologies in the industry, familiarity with systems engineering concepts, and a solid foundation in net-centric computing. They will also have a firm grasp of current and future effects of the convergence of the telecommunications, media, and information technology sectors.

Courses may be taken in person or online.

Master's

- Computer Science (MS) (p. 1583)
- Software Engineering (MS) (p. 1589)

Curriculum

The Master of Science in Information Technology requires a total of 30 credit hours (generally ten 3 credit courses). The M.S. in Information Systems offers the following tracks of specialization: Data Management; Technology Management; IT Security; or Enterprise Networking.

To achieve depth and breadth, Information Technology students must be complete the following:

Code	Title	Hours
COMP 417	Social and Ethical Issues in Computing [1]	3
Select Three Courses in a Track [2]		**9**
Data Management (DM) Track		
COMP 405	Database Administration	
COMP 406	Data Mining	
COMP 425	Rapid Applications Development	
COMP 453	Database Programming	
COMP 488	Computer Science Topics	
Technology Management (TM) Track		
COMP 403	Operations Management	
COMP 404	Organizational Development	
COMP 420	Software Systems Analysis	
COMP 477	IT Project Management	
IT Security (IS) Track		
COMP 401	Computer Security	
COMP 440	Computer Forensics Investigations	
COMP 447	Intrusion Detection and Computer Forensics	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
Enterprise Networking (EN) Track		
COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 451	Enterprise Networking	
Select six graduate level COMP Electives [3]		*18*
Total Hours		**30**

1. This course can be substituted with another graduate course at the discretion of Graduate Program Director if students had the equivalent in their undergraduate program.
2. Courses can be substituted at the discretion of the Graduate Program Director. Substitutions will usually be limited to special-topics courses (COMP 488 Computer Science Topics) which have learning outcomes closely related to other courses in the track in question.
3. Electives can be any COMP 400 level class (p. 1576), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship. You can go here (p. 1576) for a list of COMP 400-level course descriptions.

Preparation Courses

The following courses are required if you do not have a four-year undergraduate degree in a related field.

- COMP 400A Object-Oriented Programming
- COMP 400B Data Structures I

Students may not use an introductory course to satisfy a foundation or elective requirement. Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.
- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived under the discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director. Students may not use an introductory course to satisfy a foundation or elective requirement.

Suggested Sequence of Courses

This sequence supposes that the student starts in Fall and takes one Internship course over the following summer.

Course	Title	Hours
Year 1		
Fall		
COMP 417	Social and Ethical Issues in Computing	3
Track Course 1		3
Elective 1		3
	Hours	**9**
Spring		
Track Course 2		3
Elective 2		3
Elective 3		3
	Hours	**9**
Summer		
COMP 499	Internship	3
	Hours	**3**
Year 2		
Fall		
Track Course 3		3
Elective 4		3
Elective 5		3
	Hours	**9**
	Total Hours	**30**

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain familiarity with the broad outlines of computer technology, and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Networking and Information Security Certificate

This certificate program is focused on the increasingly important area of network security within the broader field of information technology. The coursework includes broader courses like Computer Networks and Network Security, plus more specialized courses on Intrusion Detection, Wireless Security, and Computer Forensics.

Related Programs

Certificate

- Technology Management Certificate (p. 1590)
- Web Programming Certificate (p. 1591)

Curriculum

Code	Title	Hours
COMP 447	Intrusion Detection and Computer Forensics	3
Select Two Electives		*6*
COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 488	Computer Science Topics	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.
- Students will be able to manage and address security concerns in networks, including wireless networks.
- Students will acquire the skills to monitor and secure computers and network environments.
- Students will have a fundamental understanding of computer forensics, and be able to design and implement a forensics examination.

Software Engineering (MS)

The Master of Science in Software Engineering caters to students interested in software engineering, software development, and other contemporary topics of long-term value to the industry. Most early careers in the industry are based on either software development or managerial aspects of software development. This degree places more weight on software development. For those seeking a greater focus on managerial aspects, we offer the M.S. in Information Technology (p. 1587).

Master's

- Computer Science (MS) (p. 1583)
- Information Technology (MS) (p. 1587)

Curriculum

The Master of Science in Software Engineering requires a total of 30 credit hours. To achieve depth and breadth, Software Engineering students must complete the following:

Code	Title	Hours
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
Three Courses from Restricted Elective Groups		**9**
Group 1 (at least one course)		
COMP 424	Client-Side Web Design	
COMP 433	Web Services Programming	
COMP 434	Enterprise Software Development	
COMP 437	Intro Concurrent Programming	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 460	Algorithms & Complexity	
COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Group 2		
COMP 410	Operating Systems	
COMP 412	Open Source Computing	
COMP 420	Software Systems Analysis	
COMP 436	Markup Languages	
COMP 441	Human-Computer Interaction	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
General Elective Courses [1]		*15*
Total Hours		**30**

[1] Electives can be any COMP 400 level class (p. 1576), except the preparation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship.

Prerequisites/Preparation Courses

All of these courses must be taken if you do not have a four-year undergraduate degree in a related field.

Code	Title	Hours
COMP 400A	Object-Oriented Programming	3
COMP 400B	Data Structures I	3
COMP 400C	Data Structures II	3
COMP 400D	Computing Tools and Techniques	1

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director. Students

may not use an introductory course to satisfy a foundation or elective requirement.

Preparatory courses do not count towards the 30 required credit hours of non-preparatory courses.

A student taking any necessary preparation course is considered to be a full-fledged student of the Graduate School. Preparation courses may be taken in the same semester as other graduate courses, provided the prerequisites for the other graduate courses are met. Students are expected, however, to take all necessary preparation courses early in their career.

A student may place out of an introductory course under any of the following conditions:

- The student has appropriate coursework equivalent to the introductory course.
- The student has appropriate and verified professional experience equivalent to the introductory course.
- The student passes a Graduate Competency Assessment (GCA) in the introductory course area.
- This can be waived under the discretion of the GPD.

If a student has had a preparatory course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that preparatory course as a prerequisite.

If a student enters the program with an academic record of success in a a course similar to COMP 413 Intermediate Object-Oriented Development, or if the student can demonstrate programming experience with the concepts of COMP 413 Intermediate Object-Oriented Development, then the Graduate Program Director may substitute for the COMP 413 Intermediate Object-Oriented Development requirement a course in Group 1 or 2 that has COMP 413 Intermediate Object-Oriented Development as a prerequisite.

The department may substitute newly created permanent courses as members of either Group 1 or Group 2. Similarly, COMP 488 Computer Science Topics offerings may also be designated as members of either Group 1 or Group 2. Students are responsible for verifying any such substitutions in advance with their Graduate Program Director.

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain familiarity with software development in a wide range of application contexts, using a range of programming languages and tools.

Technology Management Certificate

This certificate program is focused on preparing students for leadership roles in managing the organizational impacts of technological change. The coursework includes broader courses like Organization Change and Development, plus more specialized courses on Project Management and modeling with Operations Management.

Related Programs

Certificate

- Networking and Information Security Certificate (p. 1588)
- Web Programming Certificate (p. 1591)

Curriculum

The Certificate in Technology Management requires 9 credit hours.

Code	Title	Hours
Select three of the following:		*9*
COMP 403	Operations Management	
COMP 420	Software Systems Analysis	
COMP 477	IT Project Management	

COMP 488	Computer Science Topics (Organizational Change and Development)	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.
- Students will acquire a better understanding of the structure of an organization and how this impacts and is impacted by technology acquisition.
- Students will develop models to support business decisions.
- Students will be able to identify IT system requirements and build a design or plan and execute a project to satisfy those requirements.

Web Programming Certificate

This certificate program is focused on mastering programming skills required to create and support applications on the web, including mobile web development, and specialized courses on client-side web programming, and a server-side applications course.

Related Programs

Certificate

- Networking and Information Security Certificate (p. 1588)
- Technology Management Certificate (p. 1590)

Curriculum

The Certificate in Web Programming requires 9 credit hours. For students entering with limited background, CPST 342 Introduction to Web Application Development should be completed first.

Code	Title	Hours
Select three of the following:		*9*
COMP 422	Software Development for Wireless and Mobile Devices	
COMP 424	Client-Side Web Design	
COMP 441	Human-Computer Interaction	
COMP 425	Rapid Applications Development	
CPST 342	Introduction to Web Application Development [1]	
Total Hours		**9**

[1] Offered by the School of Continuing Professional Studies.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.
- Students will acquire proficiency in object-oriented programming.
- Students will be able to develop applications incorporating a variety of both client-side and server-side technologies, using appropriate protocols.
- Students will design interfaces that promote ease of user interaction in a variety of platforms.

Criminal Justice and Criminology

The Department of Criminal Justice and Criminology offers a master's degree that prepares students to excel in today's evidence-based criminal justice system. A supportive environment accommodates the diversity of our students' lives with evening classes, option of part-time or full-time status, and flexible tailoring of electives. The Department is well-connected to local and federal agencies. Graduates have been placed in all areas of the criminal justice system including state and county agencies, and federal agencies such as the FBI, Secret Service, Federal Probation, Homeland Security, Federal Pretrial Services and DEA. Graduates also have been admitted into PhD programs or law schools.

Graduate program

- Criminal Justice and Criminology (MA) (p. 1594)

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the U.S

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the U.S. in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e., 408 project or thesis).

Criminal Justice and Criminology (MA)

The Master of Arts in Criminal Justice and Criminology provides students with a cutting-edge education that will prepare them to assume leadership roles in criminal justice and related agencies as well as to pursue more advanced educational opportunities.

Related Programs

Combined

- Criminal Justice and Criminology (BS/MA) (p. 1072)

Curriculum

The Master of Arts in Criminology and Criminal Justice requires 30 credit hours of coursework, consisting of five required courses (including a culminating experience) and five elective courses. In order to demonstrate cumulative proficiency, students are required to pass either Applied Research in Criminal Justice & Criminology or complete a thesis as their culminating experience. By default, all students are placed in the non-thesis option unless they select and are approved for the thesis option.

Coursework Requirements

Code	Title	Hours
Required Courses		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
CJC 403	Research Methods and Program Evaluation [1]	3
CJC 404	Applied Data Analysis and Interpretation [1]	4
Culminating Experience Course		
CJC 408	Applied Research in Criminal Justice & Criminology [1,3]	2
or CJC 501	Thesis Research	
Select Five Electives [2]		**15**
CJC 415	Mental Illness and Crime	
CJC 416	International Criminal Justice	
CJC 499	Independent Study	
CJC 502	Practicum in Criminal Justice	
Variable Topics Electives - Maximum of 3 in each area		
CJC 410	Advanced Topics in Criminology	
CJC 411	Advanced Topics in Policing	
CJC 412	Advanced Topics in Courts	
CJC 413	Advanced Topics in Corrections	
CJC 414	General Special Topics	
Total Hours		**30**

1. Student must earn a grade of **B** or better in order to graduate (a B- or below will not fulfill this requirement), and class must be repeated if grade below a B is earned.
2. Students are required to take at least **three** graduate-level electives in the Department of Criminal Justice & Criminology. In consultation with the Graduate Program Director, students may also select up to two graduate-level electives among those offered within the Department of Criminal Justice & Criminology as well as from other programs such as Social Work, Psychology, Women's Studies and Gender Studies, Public Policy, and Sociology. Students can take no more than one online graduate-level elective outside of the Department.
3. Students choosing the thesis track will complete a research thesis and take CJC 501 Thesis Research, while students who choose a non-thesis option will complete a major research paper and take CJC 408 Applied Research in Criminal Justice & Criminology.

Thesis Option

Students who have aspirations to pursue research in their career, or pursue a PhD, should consider the thesis track. Optimally, students should complete CJC 403 during the fall semester of their first year in the graduate program. In order to be approved for the thesis option, students must receive permission from the Department of CJC's Graduate Committee. The following requirements must be met:

- Completion of CJC 403 Research Methods and Program Evaluation with a grade of A- or better (no exceptions);
- Submission of a class paper to demonstrate writing skills that are acceptable to the Department of CJC's Graduate Committee; and,
- Submission of a thesis approval form that provides a brief description of the proposed research question, the proposed methodology, and a detailed timeline.

Once a student has selected the thesis option, they will sign a written agreement acknowledging that they cannot switch back to the non-thesis option if it becomes too difficult or takes longer than anticipated.

Students will work with their thesis chairperson to complete an acceptable draft of their thesis proposal. The thesis proposal draft will consist of a detailed literature review, research questions or hypotheses, research design, analysis plan, and a discussion of the strengths and limitations of the proposed research.

If data collection involves human participants, students must follow all of the requirements established by Loyola's Institutional Review Board (IRB) for the Protection of Human Subjects. Students cannot submit an IRB application until their thesis proposal is officially approved.

Once the formal thesis proposal has been approved, students will then work towards the completion of the research and composition of the thesis. Once final draft is reviewed and approved by entire committee, the student will make a formal presentation (defense) of the thesis and submit it to a publicly available database per Graduate School policies.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The CJC graduate curriculum incorporates six Student Learning Outcomes:

- Provide students with a broad liberal arts background, with stimulating and challenging courses pertinent to the study of criminal justice and criminology.
- Give students the awareness and appreciation of group similarities and differences, especially those relating to culture and race, and to ethics, norms, and values.
- Help students develop theoretical and practical knowledge of the structures, processes, and functions of the criminal justice system, always stressing its links and interdependence with other institutions in the social system.
- Provide students with an understanding of criminological theory and how these apply to criminal justice policy and practice.
- Help prepare students for professional service in a wide range of careers in criminal justice.
- Enable talented students to enter confidently into graduate or professional school programs in criminal justice, law, social work, or any of the social sciences.

Data Science

Data Science

Over the last several decades there has been an explosion of data in nearly every field imaginable including business, marketing, sports, as well as scientific fields such as medicine, genetics, and neuroscience. As a result of this deluge of data, the demand for individuals with the skills to manage, analyze, and communicate results based on large amounts of data is as high as it has ever been.

Data science is a multi-disciplinary field combining techniques from mathematics, computer science, and statistics to organize, analyze, visualize, and extract useful information from data.

At the graduate level, students can pursue a Master's Degree (M.S.) in Data Science with an option between thesis track and non-thesis track. In addition, undergraduate students have the option to pursue a Bachelor's and Master's degree in five total years through the 4+1 program.

Further Information

If you have questions about the graduate programs in Data Science at Loyola University Chicago, please contact Dr. Yasin Silva, Graduate Program Director for Data Science, and Dr. Swarnali Banerjee, Director of the Data Science Program.

GRADUATE PROGRAMS

- Data Science (MS) (p. 1596)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

DATA SCIENCE GRADUATE HANDBOOK

Access the latest version of the Data Science Graduate Handbook (https://www.luc.edu/media/lucedu/cas-datascience/Data_Science_Graduate_Handbook.pdf). This document contains the academic policies for the Data Science MS and BS/MS programs, a description of the general duties of graduate assistants in these programs, and multiple resources available for data science students.

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Data Science (MS)

Students earning a MS in Data Science will gain a wide variety of skills needed to work with many different types of data, and to analyze, visualize, and extract useful information from data in a variety of ways. They will apply those skills in various contexts, especially during their capstone consulting class or thesis work. This 30-credit program has two tracks (thesis and non-thesis), can be completed full-time or part-time, and includes courses from Computer Science, Statistics, and Mathematics.

Related Programs

Combined

- Data Science (BS/MS) (p. 1080)
- Data Science/Applied Statistics (BS/MS) (p. 1083)
- Data Science/Mathematics (BS/MS) (p. 1086)

Curriculum

The Master of Science in Data Science requires 30 hours of coursework and a capstone project. Students may elect to conduct research and write a thesis instead of the capstone.

Non-Thesis Track

Code	Title	Hours
Statistics Requirements		**6**
STAT 408	Applied Regression Analysis	
STAT 410	Categorical Data Analysis	
Computer Science Requirements		**6**
COMP 453	Database Programming	
COMP 458	Big Data Analytics	
Data Science Core		**9**
DSCI 401	Introduction to Data Science	
STAT 438	Introduction to Predictive Analytics	
or COMP 479	Machine Learning	
DSCI 470	Data Science Consulting (Capstone)	
Three Statistics or Computer Science 400 Level Electives [1,2]		**9**
Total Hours		**30**

1 A list of electives can be found later in this document.
2 For electives, students must take one COMP class for 3 credit hours, one STAT class for 3 credit hours, and one course in either COMP or STAT for 3 credit hours.

Thesis Track

Code	Title	Hours
Statistics Requirements		**6**
STAT 408	Applied Regression Analysis	
STAT 410	Categorical Data Analysis	
Computer Science Requirements		**6**
COMP 453	Database Programming	
COMP 458	Big Data Analytics	
Data Science Core		**7**
DSCI 401	Introduction to Data Science

Electives

The list of electives is divided into primary and secondary electives. Primary electives are recommended classes to all data science students. Secondary electives are courses that may be a good fit for students with a specific area of emphasis. Students need to coordinate with the Graduate Program Director if they plan to take a secondary elective.

Code	Title	Hours
Primary COMP electives		
COMP 406	Data Mining	3
COMP 429	Natural Language Processing	3
COMP 484	Artificial Intelligence	3
COMP 487	Deep Learning	3
COMP 488	Computer Science Topics (If the topic is relevant to data science. Example: Topics in Computer Vision)	1-4
Primary STAT electives		
STAT 411	Applied Survival Analysis	3
STAT 421	Math Modeling & Simulation	3
or COMP 421	Math Models & Simulation	
STAT 451	Applied Nonparametric Methods	3
STAT 444	Longitudinal Data Analysis and Mixed Modeling	3
STAT 488	Topics in Statistics (If the topic is relevant to data science. Examples: Multivariate Statistics, Bayesian Statistics)	1-3
Secondary COMP electives		
COMP 436	Markup Languages	3

COMP 441	Human-Computer Interaction	3
COMP 460	Algorithms & Complexity	3
COMP 405	Database Administration	3
COMP 412	Open Source Computing	3
COMP 413	Intermediate Object-Oriented Development	3
COMP 418	Combinatorial Mathematics	3
COMP 424	Client-Side Web Design	3
COMP 474	Software Engineering	3
COMP 422	Software Development for Wireless and Mobile Devices	3
COMP 417	Social and Ethical Issues in Computing	3
COMP 490	Independent Project	1-6
COMP 499	Internship	1-6
COMP 477	IT Project Management	3
Secondary STAT electives		
STAT 403	SAS Program & Applied Statistics	3
STAT 407	Statistical Design	3
STAT 404	Probability & Statistics I	3
STAT 405	Probability & Statistics II	3
STAT 498	Independent Study Statistics	1-6

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Non-thesis Track

Course	Title	Hours
Year One		
Fall		
DSCI 401	Introduction to Data Science	4
STAT 408	Applied Regression Analysis	3
COMP 453	Database Programming	3
	Hours	**10**
Spring		
STAT 410	Categorical Data Analysis	3
COMP 458	Big Data Analytics	3
COMP or STAT 400-Level Elective [1]		3
	Hours	**9**
Year Two		
Fall		
STAT 438 or COMP 479	Introduction to Predictive Analytics or Machine Learning	3

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- The ability to manage large data sets in preparation for data science analysis.
- A working knowledge of statistical techniques and computer algorithms, and the ability to apply these methods to a wide array of real-world problems.
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible and ethical research.

- The ability to program in both the R and Python programming languages.
- Complete a project demonstrating competence in the field of data science. Non-thesis track: Students will be required to complete a real-world data science project prior to graduating from this program, either through our consulting course, an internship, an independent study, or other appropriate project. Thesis track: Students will be required to undertake a research project culminating in a thesis.

Digital Humanities

Overview

Digital Humanities offers an interdisciplinary Master of Arts program. Coursework is designed to provide technical skills to humanities students, as well as humanistic scholarly research methods to those with a technical or computer science background.

GRADUATE PROGRAMS

- Digital Humanities (MA) (p. 1598)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

Digital Humanities (MA)

The Master of Arts in Digital Humanities program at Loyola University's Center for Textual Studies and Digital Humanities (CTSDH) combines theoretical and practical courses. Its aims are ultimately practical and professional, training new digital specialists for the growing knowledge and information economy and today's research in humanities disciplines.

Because the nature of much Digital Humanities work is constructive and project-based, students in the MA program will be given hands-on

training in the workshop or seminar-based classes, such as training in text editing and markup, programming, interface design, project management, and digital archive construction. The MA program also explores theoretical, critical, social, and ethical contexts for thinking about Digital Humanities research and applications, including issues of data ethics, design justice, archive theories, public humanities, and digital preservation. The Master of Arts in Digital Humanities program was designed with partner departments including Computer Science, English, and History for students with interdisciplinary interests. We encourage students with interests at the intersection of culture and technology to consider this degree, which allows one to elect courses from the various partner departments.

Curriculum

The MA in Digital Humanities requires coursework totaling 30 credit hours and the completion of a capstone project. Students take six (6) core seminars in addition to a faculty-led practicum and two electives within the field of their choosing. In a student's final semesters they will work with faculty members to design and build their own digital research project.

Seminar topics range from an introduction to the methods and methodology of the field, to special topics in public history, design, research methods, textual criticism, human-computer interface, and web application development. Courses emphasize both discussion of the theories that shape and define the field of Digital Humanities as well as hands-on project building. Coursework is designed to provide technical skills to humanities students, as well as humanistic scholarly research methods to those with a technical or computer science background.

Code	Title	Hours
Core Curriculum		*18*
DIGH 400	Introduction to Digital Humanities Research	
DIGH 401	Introduction to Computing	
DIGH 402	Digital Humanities Design	
DIGH 403	Introduction to Web Application Development	
COMP 417	Social and Ethical Issues in Computing	
ENGL 413	Textual Criticism	
Two 400-Level Electives Chosen with Advisor [1]		*6*
DIGH 500	Digital Humanities Practicum	3
DIGH 501	Digital Humanities Project	3
Total Hours		**30**

[1] Electives can be any 400-level course but do check to see if there are course prerequisites. Suggested departments for elective course offerings include English, History, Communications, Environmental Sustainability, Women's and Gender Studies, and Theology. Students who have met necessary pre-requisites may be eligible to take other 400-level Computer Science classes, with approval from the Chair of Computer Science. Please confer with the Graduate Program Director for assistance.

Evaluation

Each student will produce a capstone project in one of their final courses (DIGH 501 Digital Humanities Project DIGH 501 Digital Humanities Project) under the direction of an advisor; the capstone will demonstrate knowledge and skills gained in coursework and will address one or more key problems in digital humanities research or applications.

Suggested Course Sequence

For full-time students; students taking the program part-time will work with the Graduate Program Director to plan their coursework.

Course	Title	Hours

	Total Hours	**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Digital Humanities, graduates will be able to:

- Demonstrate advanced knowledge of the interdisciplinary field of Digital Humanities.
- Utilize computers and computational tools for the exploration, analysis, and production of humanistic knowledge.
- Produce and develop a public-facing Digital Humanities research project.
- Shape and create ethical structures of knowledge and information systems through hands-on work in at least one area of Digital Humanities such as: digital mapping, textual analysis, digital archives, coding, design and UX/UI, and/or critical Digital Humanities.

English

Mission and Goals

The Department of English at Loyola University Chicago seeks to promote the university's mission to encourage freedom of inquiry, the pursuit of truth and care for others through teaching, scholarship and service of the highest caliber.

In its teaching, the Department of English seeks to provide students with an education of the highest quality in the English language, in literature written in English and in critical and creative writing, judiciously combining breadth with depth, tradition with contemporaneity. It seeks to attract the best possible students from diverse geographical, professional, racial and ethnic backgrounds; it encourages minority and foreign applicants and those returning to school after an interruption of their academic lives. It encourages students throughout their programs so as to enable them to progress expeditiously to their degrees and to gain the maximum benefit from their experience.

Through the work of its faculty, the Department of English also strives to participate in and contribute to the wider community of scholarship, research and pedagogical theory and practice in the disciplines of literary and critical studies; in creative and critical writing; in comparative literature; in gender, ethnic and cultural studies; in teacher training; and in linguistics.

The Department of English also seeks to serve the larger university and greater Chicago community through public event programming, collaborative projects with secondary schools and other colleges and universities, and general assistance.

Graduate Programs in English

The Department of English's interdisciplinary M.A. and Ph.D. programs each offer courses across three broad historical areas, with a special emphasis in textual studies. Our programs

- Maintain a curriculum and examination structure that facilitates the advanced study of literature in English in its cultural context, as experienced in any one of our three broad historical areas and textual studies: Medieval and Renaissance Literature, Nineteenth-Century Studies, Modern Literature and Culture, and Textual Studies and Digital Humanities
- Allow students to learn relevant literary and social history as well as acquire training in careful textual analysis
- Provide students with training in research and bibliographic methods, acquaint them with basic issues in the area of textual criticism, develop their reading and analytical skills, and offer study in the history and theory of literary criticism
- Promote interest in and knowledge about the linguistic contexts in which literary works exist
- Strive by example, precept, and encouragement to enable students to improve their research writing skills, to apply these skills professionally outside the classroom and to become publishing scholars
- Prepare students to become effective teachers, equipping them to teach composition and literature courses at the college, university and advanced secondary-school level, and assisting them to develop their teaching potential through experience tutoring in the Writing Center, teaching composition and assisting in the teaching of literature courses in the department
- Support scholarly development of the faculty and students by promoting teaching and research assistantship programs that bring faculty and students together inside and outside the classroom to work on pedagogical and scholarly issues of mutual interest
- Strive to assist students in finding professional employment that makes effective use of the skills and knowledge acquired in their training, both inside and outside the academic community

Graduate Programs

- English (MA) (p. 1603)
- English (PhD) (p. 1604)

ENGLISH (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory--for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

English (MA)

The MA in English offers broad training in a variety of historical eras and cultural traditions, from the Medieval period to the contemporary moment. There are also opportunities for students interested in the digital humanities, critical theory, and writing pedagogy.

Curriculum

Program Requirements

The Master of Arts in English requires 30 semester hours of coursework and a written examination. The program is designed so that a full-time student can complete these requirements in a year and a half of study.

Required Courses

Code	Title	Hours
ENGL 400	Intro to Graduate Study	3
Select Three (3) Courses in Literary Studies Courses (p. 1603)		9
At least one course must be in literature before 1800, and one in literature after 1800.		
Select One Course in Critical Theory		*3*
ENGL 406	History of the English Language	
ENGL 410	Contemporary Literary Criticism	
ENGL 419	Contemporary Issues in Literature and Culture	
ENGL 420	Topics in Critical Theory	
ENGL 422	Postcolonial Theory	
ENGL 423	Marxist Literary Theory	
ENGL 426	Feminist Theory and Criticism	
ENGL 427	Dramatic Theory	
Select One Course in Textual Studies or Digital Humanities		*3*
ENGL 412	History of the Book to 1800	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Select Four 400-Level ENGL Elective Courses [1]		*12*
Total Hours		**30**

[1] Course descriptions for 400 level English courses can be found here (p. 1600). For students interested in taking an elective outside of the English Department, please contact the Graduate Program Director.

ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Part-time students must complete all requirements for the degree within four years.

If you are required to take certain undergraduate courses as a condition of admission, they have priority over all other program requirements. Undergraduate courses cannot be applied to the MA.

MA Qualifying Examination

All students will take a four-hour written examination at the end of their course work. The exam will be prepared and graded by a four-member MA examining committee using a standard set of questions, each testing a particular skill. Faculty teaching graduate seminars in any one year will submit a short list of required readings (literary, critical, and theoretical) from their courses. From that list, the examining committee will form an exam list of major texts to be used by students in answering the exam questions. The short lists will be shared with students prior to the exam, the exam list will not.

The exam will be graded as High Pass, Pass, Low Pass or Fail. The minimum requirements for the MA degree will be a Low Pass on the exam and a B average in all course work. MA students who fail the exam may retake it once, at the conclusion of the following semester. PhD students who fail the exam may also retake it once, but only to complete the MA degree: they will not be allowed to continue in the program.

The MA exam serves as both a requirement for the master's degree and a qualifying exam for students intending to proceed toward the PhD. The Committee on Graduate Programs will consider the performance of such students in all facets of the MA program; however, the MA exam is designed as a key indicator of students' ability to continue work toward the PhD.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA program students will be able to:

- Write effectively about a broad range of texts in English using effective compositional and rhetorical techniques.
- Assess and intervene in existing scholarly discourses in the field as a literary critic.
- Distinguish and interpret diverse experiences across various social formations (race, class, gender, sexuality, ability, etc.) as registered in literary works.
- Evaluate and apply the principles of a range of critical and textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works.

English (PhD)

The PhD in English offers in-depth training in a variety of historical eras and cultural traditions, from the Medieval period to the contemporary moment. Students choose an area of specialization – Early Modern, Nineteenth-Century, or Modern – but also take courses in other areas. We offer many opportunities for students interested in getting involved in the digital humanities as well as other kinds of content, like archival studies, public humanities, and initiatives for exploring new futures in the humanities.

Related Programs

Master's

- English (MA) (p. 1603)

Combined

- English (BA/MA) (p. 1095)

Curriculum

The PhD requires a total of 60 credit hours of coursework, a qualifying written and oral examination, and a dissertation. According to Graduate School regulations, work on the PhD must be completed eight years from the time you have begun coursework applicable to the degree; if you entered with an MA, you will have six years from the time of beginning course work for the PhD.

Required Coursework

Code	Title	Hours
Required Courses		**9**
ENGL 400	Intro to Graduate Study	
ENGL 402	Teaching College Composition	
ENGL 502	Independent Study-Doctoral Qualification	
Select two of the following: [1]		**6**
Textual Studies Courses		
ENGL 412	History of the Book to 1800	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Critical Theory Courses (at least one)		
ENGL 410	Contemporary Literary Criticism	
ENGL 420	Topics in Critical Theory	
ENGL 422	Postcolonial Theory	
ENGL 423	Marxist Literary Theory	
ENGL 426	Feminist Theory and Criticism	
ENGL 427	Dramatic Theory	

Field-Specific Requirements	**24**
Students choose one of three specialized fields: Medieval and Renaissance Literature; Nineteenth-Century Studies; or Modern Literature and Culture. Students take six (6) courses in their chosen and 1 course each from the other two specializations, eight (8) courses total.	
Electives	
Seven (7) ENGL 400-Level or Higher Electives	21
Total Hours	**60**

[1] At least one course must be in critical theory. Students should confer with Graduate Program Director when selecting courses to ensure that they are the best fit for their course of study.

Field-Specific Requirements

Doctoral students in English who have completed the MA degree will enter one of the following three specialized fields and must meet the course requirements defined for that specialization. Students will be free to change their field at any time, provided that they are able to fulfill the course requirements for the new field. Students may choose to specialize in Medieval and Renaissance Literature, Nineteenth-Century Studies, or Modern Literature and Culture. Students will complete at least six (6) courses in their specialization, at least one (1) course in each of the other two specializations, and seven (7) 400-level elective courses of their choosing. ***Note that several of these requirements will be partly or wholly fulfilled by all students as a part of their MA study.***

If a student has been required to take certain undergraduate courses as a condition of admission, those courses have priority over all other program requirements. Undergraduate courses cannot be counted towards the PhD degree requirements.

Medieval and Renaissance Literature Courses

Code	Title	Hours
ENGL 440	Topics in Medieval Literature	3
ENGL 441	Old English Language & Literature	3
ENGL 443	Middle English Literature	3
ENGL 444	Medieval Drama	3
ENGL 447	Chaucer	3
ENGL 450	Topics in Early Modern Literature & Culture	3
ENGL 455	Shakespeare	3
ENGL 456	Early Modern Drama	3
ENGL 457	Seventeenth-Century Literature	3
ENGL 458	Milton	3

Nineteenth-Century Studies Courses

Code	Title	Hours
ENGL 460	Topics in Restoration & 18th Century Literature	3
ENGL 466	Eighteenth-Century Novel	3
ENGL 470	Topics in Romanticism	3
ENGL 471	Poetry of Romantic Period	3
ENGL 475	Topics in Victorian Literature	3
ENGL 476	Victorian Poetry	3
ENGL 477	Victorian Prose	3
ENGL 478	Victorian Novel	3
ENGL 490	Topics in American Literature	3
ENGL 491	Early American Literature	3
ENGL 492	American Romanticism	3
ENGL 493	American Realism	3

Modern Literature and Culture Courses

Code	Title	Hours
ENGL 480	Topics in Modernism	3
ENGL 481	Modern Poetry	3
ENGL 482	Modern Drama	3
ENGL 483	Modern Novel	3
ENGL 484	Literature and Culture of the Jazz Age	3
ENGL 485	Contemporary Literature	3
ENGL 487	Postcolonial Literature	3
ENGL 488	20th Century Literature in English	3
ENGL 489	Magic Realism	3
ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Optional Specialization in Digital Humanities

Ph.D. students may obtain a specialization in Digital Humanities. To obtain this specialization students take one foundational course, followed by two electives. Note that COMP 400A or equivalent is a prerequisite for certain electives.

Code	Title	Hours
Required Foundational Course [1]		
Select one of the following:		3
COMP 400A	Object-Oriented Programming	
COMP 400D	Computing Tools and Techniques	
DIGH 400	Introduction to Digital Humanities Research	
DIGH 402	Digital Humanities Design	
Electives [2]		
Select two of the following:		6
COMP 400B	Data Structures I	
COMP 400C	Data Structures II	
COMP 401	Computer Security	
COMP 412	Open Source Computing	
COMP 417	Social and Ethical Issues in Computing	
COMP 436	Markup Languages	
COMP 441	Human-Computer Interaction	
COMP 477	IT Project Management	
COMP 502	Structure of Research Management and Funding	
COMP 503	Technology Entrepreneurship	
DIGH 401	Introduction to Computing	
DIGH 403	Introduction to Web Application Development	
DIGH 500	Digital Humanities Practicum	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Total Hours		**9**

[1] Students are allowed to take any course from this list as an elective if not being used to meet this requirement.
[2] Other 400-level courses may count toward the specialization with approval of the Director of Graduate Programs.

Research Tool

Ph.D.-level research in literary studies presupposes skills (or 'research tools') not taught in ordinary graduate-level coursework in a Department of English. In view of the multilingual character of humanist study, scholars of literature must often read text in a language other than their principal one. For these reasons, as fulfillment of the discipline's research tool, Ph.D. students in the Department of English are required to demonstrate reading proficiency in a language other than English. This may be done by (a) passing a translation examination or (b) receiving a grade of B or higher in a graduate-level course in a language other than English. Exams and coursework at other institutions will usually be accepted, subject to review by the Director of Graduate Programs. Under special circumstances priority may be given to another research tool: for instance, a computer language, statistical analysis, or protocols for research with human subjects. Students are encouraged to discuss completion of this requirement with the Director of Graduate Programs soon after entering the program.

PhD Qualifying Examination

The PhD examination has a written component and an oral component. The written component consists of three three-hour essays. Each essay covers a field articulated by the student in consultation with their examining committee and the director of graduate programs. There are two basic kinds of field:

- An area of literary theory or research methods
- Literature of a historical period

The second type of field may be narrowed further, for instance to a particular genre, tradition, or region. Most students devise one field of the first type and two of the second. Other configurations are possible with approval of the graduate programs director.

Field descriptions and reading lists are worked out by the student in consultation with their examining committee and must be approved by examiners and by the graduate programs director. Field statements are due one month prior to the exam date.

The oral component is a two-hour oral examination, based on but not limited to the writing produced in the written component.

Candidacy and Defense

Students advance to doctoral candidacy when they have fulfilled all required courses and the research tool requirement, passed the Ph.D. qualifying examination, established a dissertation committee, and produced an approved dissertation proposal.

Readers' copies of the completed dissertation are due to the dissertation committee one month prior to the final public presentation and defense.

Suggested Sequence of Courses

Students should consult the Graduate Program Director (GPD) to outline course selection and academic objectives. Students take ENGL 400 Intro to Graduate Study during their first Fall semester and ENGL 402 Teaching College Composition in their second Fall semester unless waived by the GPD for students entering with an M.A. With the guidance of the GPD, students will complete the remainder of their 400-level coursework in Critical Theory, Textual Studies, Field-Specific Requirements, and Electives based on offerings. ENGL 502 Independent Study-Doctoral Qualification should be taken at the end of the student's 400-level coursework, before starting ENGL 610 Doctoral Study and ENGL 600 Dissertation Supervision.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD program students will be able to:

- Write effectively about a broad range of texts in English using effective compositional and rhetorical techniques.
- Assess and intervene in existing scholarly discourses in the field as a literary critic.
- Distinguish and interpret diverse experiences across various social formations (race, class, gender, sexuality, ability, etc.) as registered in literary works.
- Evaluate and apply the principles of a range of critical and textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works.
- Define, distinguish, and evaluate three fields of study in literature as defined by historical period, genre, critical theory, and/or single author.
- Employ significant developments and emergent trends in pedagogical theories, methods, and materials to teach college-level composition and literature effectively.
- Use a variety of research methods (e.g., close reading, textual criticism, linguistic analysis, archival, biographical, etc.) and interpret the findings in order to produce a sustained analysis of one or more literary works.
- Defend scholarly interpretations and interventions at a professional level, leading to internal and external conference presentations, publication, fellowships, grants, and academic employment.

History

Graduate Study in History

The Department of History supports graduate study in Public History and US Social and Cultural History with a focus on the 19th and 20th centuries. Faculty strengths in this area include urban history, digital

history, the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment.

Led by a diverse and nationally-acclaimed faculty, our curriculum is designed to develop a deep understanding of the human past and to provide students with insight into the world in which they live through a perspective of time and change. Loyola History graduate students also have excellent opportunities for learning and exploration outside of the classroom.

Infused by our Jesuit mission, we support study that deepens our understanding of the human condition, reflects a shared commitment to a just and humane society, and puts knowledge to work in the world.

Graduate Programs

- History (MA) (p. 1609)
- History (PhD) (p. 1611)
- Public History (MA) (p. 1615)
- Public History Program with Dominican University (MA/MLIS) (p. 1616)

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.

HIST 482 Archives & Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Students learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career. MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (0 Credit Hours)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (0 Credit Hours)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

History (MA)

The M.A. in History prepares students to become insightful and skilled research scholars, ready for PhD programs in History or a broad range of careers in cultural, academic, policy, or business settings.

Academic Areas of Focus

The History MA program focuses on 19th- and 20th-Century American History, with specific strengths in Social, Cultural, and Urban History. Faculty strengths in American history also include the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment. Students in the MA program are required to select a major field in United States history. In addition, they will choose a minor field in Public, Medieval, Modern Europe or Gender and Women's history. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to do so.

One HIST 400-Level Elective [1]		*3*
Total Hours		**30**

[1] All History 400-level courses can be found here (p. 1607).

Major and Minor Field

Students in the MA program have a major field in 19th and 20th Century United States History. They will choose a minor field in Public, Medieval, Modern Europe, or Gender and Women's History. The courses listed below are possible options as any actual minor field coursework will be developed with the Graduate Program Director. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to use public history to do so.

Public History Minor Field Courses

Research Tool

All master's level students must demonstrate competence in a research skill (oral history, public history media, or a reading knowledge of a foreign language, for example) appropriate to their major field. They are expected to master this skill before advancing beyond 18 credit hours. Coursework taken to master a language or for oral history and public history media if used for a research tool does not apply toward graduation.

Comprehensive Field Examinations

Toward the end of their graduate program, students must pass a take-home written examination in the major field. The student will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the student's examination committee. In addition, students satisfy the examination requirements in the minor field through earning nine credit hours with at least a B (3.0) average.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

Course	Title	Hours
Year 1		
Fall

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master of Arts in History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession.

History (PhD)

The Department of History supports graduate study in Public History and US Social and Cultural History with a focus on the 19th and 20th centuries. Faculty strengths in this area include urban history, digital history, the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment. We offer a PhD in American History and a PhD in Public History/American HIstory. History doctoral students work closely with faculty in and out of the classroom as they train to become academic historians, public historians, teachers, archivists, museum professionals, and researchers as well as possess sufficient preparation to pursue other career pathways.

Curriculum

PhD in History Course Requirements

The PhD Program is an in-person program that culminates in a Doctor of Philosophy (PhD) degree. There are two pathways for the PhD Program: PhD in American History and PhD in Public History/American History. Each requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations, and writing and defense of a dissertation.

All PhD students must successfully complete UNIV 370 (https://catalog.luc.edu/search/?P=UNIV%20370) Responsible Conduct in Research and Scholarship. It is strongly recommended that students complete this two-day training before beginning the second year of their program.

Students who enter the PhD in History after completion of a master's degree in history will have slightly adjusted coursework requirements.

PhD in History - American History Course Requirements

The PhD in 19th- and 20th-Century American History is an in-person program that culminates in the Doctor of Philosophy Degree. The PhD in History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in major and minor fields, and writing and defense of a dissertation. Students will select a major field in United States history and two minor fields in consultation with the Graduate Program Director.

Code	Title	Hours
HIST 400	Contemporary Approaches to History	3
HIST 403	Professional Lives of Historians	3
HIST 598	Dissertation Proposal Seminar	3
Six Major Field Courses		*18*
HIST 450	Nineteenth Century America	
HIST 461	Twentieth Century America	
Four (4) Additional HIST 400-Level Courses		
Two 500-level Research Seminars or one 500-level Reserach Seminar and HIST 599 Directed Research. One of the Research Seminars must be in the Major Field.		*6*
Three Courses in First (https://catalog.luc.edu/graduate-professional/graduate-school/arts-sciences/history/histminorfield/) [1]		*9*
Three Courses in Second (https://catalog.luc.edu/graduate-professional/graduate-school/arts-sciences/history/histminorfield/) [1]		*9*
Three Directed Studies or Electives		*9*
HIST 400-level course or HIST 499 Directed Study		
Total Hours		**60**

[1] In consultation with their advisor, students will select two minor fields. Each minor field consists of three courses. Students coming in with a M.A. will select one minor field in which they must complete at least three courses. This field must be distinct from the major field and from fields taken at the Master's level. Students entering with a B.A. must complete **two** minor fields.

- Minor fields include areas of geographic or topical foci such as Gender and Women's History, Modern Europe, and Public History.
- Other thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director.
- Students may also select a minor field from another discipline with the approval of the Graduate Program Director.
- Students wishing to pursue a minor field in public history must meet with the Public History Program Director to formally declare public history as their minor field and indicate their plans for fulfilling the minor.

PhD in History - Public History/American History Course Requirements

The PhD in Public History/American History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in both Public History and American History major fields, a Public History Portfolio, and writing and defense of a dissertation. Public History/American History PhD students have two

major fields in Public History and American History, thus they do not have any minor field requirements.

Building on Loyola's already strong Master's public history program, this 60-hour in-person degree program provides the opportunity for students to compete for positions calling for a doctorate, such as teaching public history at the university level, curating or administrating at governmental institutions such as the Smithsonian Institution or the National Park Service, or serving as a principal in a consulting firm. In essence, this program is similar to the standard American history PhD program but requires a double major in Public History and American History instead of a major field in American History and two minor fields. Students will leave Loyola with a firm grounding in American history as well as in the skills and theory of public history and its practice. Loyola is one of the few universities to offer a public history degree at the doctoral level and hopes to continue to attract strong non-traditional students already working in the public history profession as well as students interested in history at the doctoral level.

Code	Title	Hours
HIST 400	Contemporary Approaches to History (if equivalent not taken for Master's program)	3
HIST 403	Professional Lives of Historians	3

Seven American History Major Field Courses		*21*
HIST 450	Nineteenth Century America	
HIST 461	Twentieth Century America	
Four (4) Additional HIST 400-Level Courses		
HIST 500-level course		
Three Elective Courses		*9*
All electives must be HIST 400-level courses.		
Total Hours		**60**

Minor Fields

Students in the PhD in American History will choose two minor fields in Public, Medieval, Modern Europe, or Gender and Women's History. The courses listed below are possible options as any actual minor field coursework will be developed with the Graduate Program Director. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to use public history to do so.

Public History Minor Field Courses

Code	Title	Hours

HIST 442	Women's & Gender History: U.S.A.	3
WSGS 401	History of Feminist Thought	3

Research Tools

PhD in American History Research Tools

Students must demonstrate competency in two research tools. One tool must be within public history and may include HIST 483 Oral History: Method and Practice or HIST 479 Public History Media. When taken for the research tool requirement, HIST 483 and HIST 479 *cannot* be counted toward the minor field in Public History. In special circumstances, students may petition the Graduate Program Director to substitute another research tool in place of the public history research tool requirement.

The second research tool requirement may be fulfilled in two ways: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: digital humanities, statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

PhD in Public History/American History Research Tools

Students must demonstrate competency in two research tools. When taken for the research tool requirement, HIST 483 *cannot* be counted toward the major field in Public History. The research tool requirement may also be fulfilled by: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: digital humanities, statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

Comprehensive Examinations

PhD in American History Examinations

Near the end of their graduate coursework, PhD students must pass a take-home written examination and a two-hour oral examination in their major field. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam.

For the major field examination in **US history**, students will have a field in two chronological areas:19th-Century and 20th-Century US History. They should also choose two thematic areas for the examination. Thematic areas include: Urban, Women/Gender, Sexuality, Indigenous America, Religion, African-Americans/Race, American West, Immigration/Ethnicity, Labor, Environmental, or Legal. Other thematic fields are possible with the approval of all committee members.

Students satisfy **the first** (of two) **minor field** requirements by the successful completion of three courses (nine credit hours) with at least a B (3.0) average.

The second minor field requirement is satisfied one of two ways:

- Passing a take-home written examination in which they will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the committee. Those who select a minor field outside of history must successfully pass a comprehensive examination in that discipline.
- The **Public History minor field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be the Public History Program Director. Students must schedule an exam date during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to the oral exam.
- Students entering the PhD Program with Advanced Standing take only one minor field exam.
- For the minor field examinations in areas **outside of US history** (such as medieval, modern Europe and other thematic fields with a Transnational Urban focus), students should work closely with their committee members to create reading lists with a broad chronological sweep and a set number of thematic areas.

PhD in Public History/American History Examinations and Portfolio

Near the end of their graduate coursework, PhD students in the Public History/American History Program must take two series of comprehensive exams, one for each major field.

For the **American History major field**, taken near the end of their graduate coursework, students complete a take-home written examination and a two-hour oral examination. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam.

For the **American History major field**, students will have a field in each of two chronological areas: 19th-Century and 20th-Century US History. They should also choose two thematic areas for the examination. Thematic areas include Urban, Women and Gender, Sexuality, Indigenous America, Cultural, African Americans and Race, American West and Borderlands, Immigration and Ethnicity, Labor, Environmental, or Legal. Other thematic fields are possible with the approval of all committee members.

The **Public History major field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be the Public History Program Director. Students must schedule an exam date during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to oral exam.

PUBLIC HISTORY PORTFOLIO REQUIREMENT

The portfolio, which represents the capstone of the Public History major field, documents the achievements of PhD students and thereby identifies their strengths, weaknesses and abilities as public historians. Students begin compiling their portfolio during the first semester in the program. The final version will be submitted to the public history examination committee a minimum of two days prior to the oral exam.

Dissertation

Students will develop a dissertation field within their major field. For students in the Public History/American History program, their dissertation will be in their American history major field, although it can have a Public History focus. This field must be designated before students conclude their required coursework (typically not more than 18 credits beyond the MA, and at the end of the first year of the doctoral program). They will present a dissertation topic and proposal to their major advisor for review and approval when they take HIST 598 Dissertation Proposal Seminar. Students formalize their proposed committee with approval from the Graduate Program Director and the Graduate School.

Following the successful completion of doctoral examinations and the portfolio requirement, students will make a public presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation. In discussing the proposal, students and members of the committee should work out problems and address questions the committee members may have. Upon successfully completing the dissertation proposal review, students complete the Graduate School dissertation proposal process and submit their proposal, if applicable, to any relevant research compliance bodies (IRB) and to the Graduate School. Following its approval by the Graduate School and the successful completion of all other degree requirements, students are admitted to PhD candidacy.

Once students have advanced to candidacy, they will enroll in HIST 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation.

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

PhD in American History Sample Program

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession.
- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources. [Public History/American History]
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession. [Public History/American History]
- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields. [Public History/American History]

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Public History (MA)

The Master of Arts in Public History program provides students both the theoretical and practical skill sets needed to perform public history work in a variety of vocations, whether as museum professionals, archivists, government contractors, community consultants, teachers both inside and outside the classroom, among others. Public historians are fundamental to shaping our understanding of the past—and our approach to the present.

Loyola University Chicago's distinguished MA in Public History prepares students to contribute to our shared knowledge of the history that informs our world today. Public history uses the past to serve a variety of contemporary needs. It entails the application of the skills and methods of history to the study, management, preservation, and interpretation of historical records and artifacts. A public historian is a professional who can put knowledge and skills to use in our society in such diverse activities as museum, historical society or archival work; neighborhood or community history projects; historic preservation and cultural resource management programs; and local, state, or federal research projects. Working with architects, librarians, business people, government policy analysts, exhibit designers or history enthusiasts, public historians contribute to our knowledge and understanding of the past.

The MA in Public History can be pursued full time or part time.

Comprehensive Field Examination

Toward the end of their graduate program, public history students must pass a two-hour oral examination in the field of public history before a two-person faculty committee, one of whom must be the Public History Program Director. The examination covers the field of public history and reflects the readings and assignments included in each of the public history courses as well as a review of the student's portfolio.

There is no examination in the minor field, but students must maintain at least a B average (3.0) in the three minor field courses.

Public History Portfolio

The portfolio, which represents the capstone of the program, documents the achievements of master's students and thereby identifies their strengths, weaknesses, and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the two-person faculty examination committee. The portfolio will be submitted to the examination committee a minimum of two days prior to the oral exam.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Public History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields.

Public History Program with Dominican University (MA/MLIS)

The Loyola Department of History and the Graduate School of Library and Information Science (GSLIS) of Dominican University (https://www.dom.edu/academics/majors-programs/mlis-and-ma-public-history/) in River Forest, IL, cooperate to offer a joint program leading to two separate degrees: Master of Arts in Public History and Master of Library and Information Science (MLIS). The joint program allows students to complete work on the two degrees in a shorter time than if each degree were pursued separately.

Academic Areas of Focus

The joining of two applied degree programs, public history and library and information science, provides interested students with the opportunity to combine historical training with a more focused educational background in archives and library and information science. The Loyola University Chicago degree grounds graduates in the use of public history methods and theories and strengthens their ability to share historical interpretation with a broad range of public audiences.

Rrelated Programs

Master's

- History (MA) (p. 1609)
- Public History (MA) (p. 1615)

Doctoral

- History (PhD) (p. 1611)

Curriculum

The Master of Arts in Public History/Master of Library and Information Science with Dominican University requires 24 credit hours (including an internship) taken in Loyola University Chicago's history department, a public history portfolio, comprehensive examination, and 30 credit hours from the Graduate School of Library and Information Science at

Dominican University. Information about the MLIS course requirements can be found on the Dominican University website.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Public History and MLIS in Library and Information Science at Dominican University, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields.

Mathematics and Statistics

The Department of Mathematics and Statistics at Loyola University Chicago, in the College of Arts and Sciences, supports the Jesuit ideal of knowledge in the service of humanity. The department endeavors to advance knowledge in mathematics and statistics, engaged with Chicago, the nation and the world. To achieve this mission, the department participates in the discovery, development, demonstration and dissemination of professional knowledge and practice within a context of professional ethics and service to others.

Beyond honing students' analytical skills, the mathematics and statistics curricula also foster critical thinking and the ability to articulate it... skills that are in high demand in many diverse fields.

The Department of Mathematics and Statistics will work to ensure that we invest in each student's success, sense of belonging, and cultural competency. We will strive to engage, empower, inform, and hold our faculty and students accountable for fostering an environment where every person shares in the responsibility for advancing diversity and inclusive excellence. Likewise, the department decisions and policies will be crafted with these goals in mind. We commit to this mission recognizing a definition of diversity that includes, but is not limited to, race, ethnicity, color, religion, national or ethnic origin, sex, age, military/veteran status, disability, marital status, sexual orientation, gender identity and expression, socio-economic background, and residency.

Graduate Programs

- Applied Statistics (MS) (p. 1622)
- Mathematics (MS) (p. 1623)

Mathematics (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 464L History of Math with Science Contributions for Middle Grades (3 Credit Hours)
This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonja Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics in the middle grades

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.
Course equivalencies: X-MATH465/STAT465

MATH 466L Geometry with Science Applications for the Middle Grades (3 Credit Hours)
Pre-requisites: This course is limited to graduate education students only; it is not accepted for other Mathematics and Statistics graduate degree programs
No course description is available

MATH 468L Probability and Statistics with Science Applications for Middle Grades (3 Credit Hours)
Pre-requisites: School of Education Graduate Program
Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics

MATH 469L Mathematics and Science Applications for Middle Grades (3 Credit Hours)
Mathematical concepts such as rates, ratios and proportions, probability and statistics and measurement that support scientific investigation and analysis will provide the focus for this course. Hands-on activities that illustrate the connections be used. Hands-on activities that illustrate the connections between Science and Math and appropriate use of technology will be emphasized.
Outcomes:
Students will acquire knowledge of mathematics that supports scientific investigation for the middle grades

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (0-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (0 Credit Hours)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Applied Statistics (MS)

Loyola's Master of Science in Applied Statistics emphasizes applied statistics and predictive modeling which gives students an advantage in evidence-based fields such as biomedical, environmental, marketing, educational, financial, and contract research (CRO) sectors. Our program can also be completed on a part-time basis and while working full-time.

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

The below suggestion is for Fall full-time entrants. Adjustments are made for Summer or Spring entrants. Adjustments are also done on a case-by-case basis for part-time students or if discussed with the Graduate Program Director.

Course	Title	Hours
Year 1		
Fall		
STAT 401	Introduction to Applied Statistics Using R	1
STAT 403	SAS Program & Applied Statistics	3
STAT 404	Probability & Statistics I	3
STAT 408	Applied Regression Analysis	3
	Hours	**10**
Spring		
STAT 405	Probability & Statistics II	3
Two 400-level STAT Electives		6
	Hours	**9**
Summer		
One 400-level STAT Elective [1]		3
	Hours	**3**
Year 2		
Fall		
STAT 407	Statistical Design	3
STAT 495	Statistical Consulting Capstone	2
One 400-level STAT Elective [1]		3
	Hours	**8**
	Total Hours	**30**

[1] If no elective is taken during the Summer term, it is expected that students will take two (2) 400-level STAT courses in Fall term Year 2.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of our MS program in Applied Statistics, students are expected to have:

- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model.
- Received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference.
- Worked with data from application fields such as public/global health, medical, industrial and environmental research.
- Received training to ethically apply statistical training in the real world.
- Obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class.
- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program

Mathematics (MS)

Loyola's Master of Science in Mathematics degree is a highly customizable program supporting students with a variety of career goals.

Beyond delivering foundational knowledge in the discipline, its focus on critical-thinking, organizational, technological, and communication skills leaves students well-prepared for their next step.

STEM Designation

The MS in Mathematics has been granted a STEM designation from the U.S. Department of Homeland Security. International students completing degrees with this designation can qualify for extended OPT (Optional Practical Training), bringing the total OPT time granted to 36 months.

Related Programs

Master's

- Applied Statistics (MS) (p. 1622)
- Data Science (MS) (p. 1596)

Curriculum

The Master of Science in Mathematics requires 27 credit hours of coursework, a one-credit professional development seminar during the first semester, and a two-credit practicum during the final semester, for a total of 30 credit hours.

Coursework includes required foundational courses in algebra, analysis, and statistics, as well as 18 credit hours of electives chosen from courses in Mathematics and cognate fields (such as Applied Statistics, Data Science, and Computer Science). With their practicum, students design and independently execute a research project under faculty supervision.

Code	Title	Hours
Foundational Course Requirements		
MATH 416	Survey of Algebra	3
MATH 454	Survey of Analysis	3
MATH 404 / STAT 404	Probability & Statistics I [1]	3
or STAT 408	Applied Regression Analysis	
Depth Requirement Courses		
Algebra or Analysis.		*3*
MATH 414	Algebra II	
MATH 415	Topics in Linear Algebra	
MATH 452	Analysis II	
MATH 453	Complex Analysis	
Cognate Fields. [1]		*3*
MATH 405 / STAT 405	Probability & Statistics II	
STAT 410	Categorical Data Analysis

COMP 487	Deep Learning	
DSCI 401	Introduction to Data Science	
Or Another Course with Graduate Program Director Approval [2]		
Additional Requirements		
MATH 401	Introduction to Graduate Study in Mathematics	1
MATH 495	Graduate Practicum in Mathematics	2
Select four approved 400-level Electives in Mathematics or Statistics [3]		12
Total Hours		**30**

1. Students who select MATH 404/STAT 404 in Foundational Courses may opt to take STAT 408 as a Depth Course, and vice versa.
2. The depth requirement for Cognate Fields may be fulfilled by other courses, including courses from other departments, with approval of Graduate Program Director.
3. Approved elective courses should be selected with advice of Graduate Program Director to complement student's previous learning and support future plans.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
MATH 401	Introduction to Graduate Study in Mathematics	1
MATH 404 / STAT 404	Probability & Statistics I	3
or STAT 408	or Applied Regression Analysis	
MATH 415	Topics in Linear Algebra [1]	3
or MATH 453	or Complex Analysis	
400-level Math/Stat Elective		3
	Hours	**10**
Spring		
MATH 405 / STAT 405	Probability & Statistics II [2]	3
or STAT 410	or Categorical Data Analysis	
MATH 416	Survey of Algebra	3
MATH 414	Algebra II [1]	3
or MATH 452	or Analysis II	
or 400-level Math/Stat Elective		
	Hours	**9**
Year 2		
Fall		
MATH 454	Survey of Analysis	3

400-level Math/Stat Elective		3
MATH 495	Graduate Practicum in Mathematics	2
	Hours	**11**
	Total Hours	**30**

1. Students need only take one of MATH 414, MATH 415, MATH 452, or MATH 453 to fulfill the mathematics depth requirement for the program.
2. Or another course fulfilling the cognate fields depth requirement for the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Graduates of the Master of Science in Mathematics Program will:

- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation;
- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines;
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries;
- receive training on how to act responsibly and ethically within the discipline.

Modern Languages and Literature

The Department of Modern Languages and Literatures offers a Master of Arts in Hispanic Studies. The department has full-time faculty with strong dedication to graduate teaching and a firm commitment to research. Study in the Department of Modern Languages and Literatures encourages close contact between faculty and students. In the tradition of the university at large, we value the individual.

We take pride in the diverse cultural, educational, intellectual and recreational opportunities available in the city of Chicago.

Graduate Programs

- Hispanic Studies (MA) (p. 1627)

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing. The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (0 Credit Hours)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Hispanic Studies (MA)

Our Masters of Arts degree in Hispanic Studies allows students to begin their careers as Hispanists in many areas: teaching, translation and interpretation, diplomacy, foreign service, social work, journalism, editing, international business and more. This degree program allows students to explore their own academic interests, while at the same time providing them with a solid foundation in the literature and culture of the Hispanic world.

Related Programs

Master's

- Language, Culture, and Curriculum (MEd) (p. 2012)

Curriculum

The Master of Arts in Hispanic Studies can be completed through a coursework or a master's paper or thesis option. The coursework option requires 30 credit hours of courses and a two-part comprehensive examination based on coursework and the Graduate Reading List. The second option requires the completion of 27 credit hours of courses, composition of a master's essay (or research-length article), and oral defense. The third option requires 27 credit hours of courses and completion of a master's thesis and oral defense. The master's essay and thesis option can only be taken with approval of the Graduate Program Director and the Graduate Committee.

Additionally, candidates for the MA degree fulfill the Research Tool Requirement of the Graduate School by showing competency in a language other than English or Spanish. This requirement can be fulfilled by taking a translation exam in the Graduate School, or by taking a language course at Loyola or elsewhere and earning a grade of B or higher.

Required Coursework

Coursework for credit toward the MA in Hispanic Studies consists of graduate seminars in Spanish. With the permission of the Graduate Program Director, graduate students may take up to two graduate seminars in other academic departments of Loyola University, and up to two independent study courses.

Code	Title	Hours
Ten (10) SPAN Courses		**30**
Students completing a Master's Essay or Master's Thesis choose only nine (9) courses.		
Students choose from the following based on offerings available:		
SPAN 402	Methods of Teaching Spanish	
SPAN 403	Structure of Modern Spanish	
SPAN 405	Critical Methods	
SPAN 410	General Linguistics & Romance Languages	
SPAN 415	Medieval Spanish Literature	
SPAN 416	Golden Age of Spanish Literature	
SPAN 419	Romanticism in Spanish Literature	
SPAN 420	Realism & Naturalism	
SPAN 421	Theatre of Twentieth Century	

SPAN 426	Theater of The Golden Age	
SPAN 431	Poetry of The 20th Century	
SPAN 436	Poetry of The Golden Age	
SPAN 437	Golden Age-Spanish Mysticism	
SPAN 441	Prose of The 20th Century	
SPAN 446	Prose of The Golden Age	
SPAN 447	Don Quijote	
SPAN 470	Hispanic-American Poetry	
SPAN 480	Hispanic-American Novel	
SPAN 487	La Novela De La Revolucion Mexico	
SPAN 489	Cuento Hispano-Americano	
SPAN 490	Hispanic Culture & Civilization	
Total Hours		**30**

Independent Studies/Directed Readings

Occasionally the department of Modern Languages and Literatures offers independent studies at the graduate level SPAN 500 Directed Readings SPAN 500 Directed Readings . When applicable, students may take up to one or two of these courses for credit towards the MA in Hispanic Studies. Normally, independent studies in other LUC departments or academic programs do not apply.

Internships

On occasion, the graduate program also offers academic credit towards the MA in Hispanic Studies in the form of an internship (SPAN 499 Graduate Internship SPAN 499 Graduate Internship). Please see the program director for more details.

Master's Paper or Thesis

Students who choose to write a master's paper or thesis are enrolled in SPAN 595 Thesis Supervision SPAN 595 Thesis Supervision or SPAN 605 Master's Study SPAN 605 Master's Study to maintain standing in the Graduate School while conducting research and writing.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, graduates will be able to:

- demonstrate familiarity with works of Latin American and Peninsular literature
- demonstrate familiarity with the general characteristics of several traditions and trends within the literary contexts of Latin America and Spain
- use the Spanish vocabulary necessary for discussing literature critically
- understand broad historical events, cultural currents, and current academic trends as they are represented in Latin American and Peninsular literature
- read, write, and speak Spanish fluently
- demonstrate the ability to do independent, scholarly research by integrating, comparing, and evaluating ideas and materials from various sources, both literary and critical
- develop and sustain a coherent argument in both oral and written Spanish
- know how to foster a collegial, collaborative learning environment that encourages self-expression
- comprehend the social and historical function and significance of literature, culture, and art in Spain and Latin America, and more broadly
- understand and incorporate the national standards for the teaching of foreign languages into the teaching of Spanish at various levels
- understand from a task-based perspective the theoretical and practical issues of communicative language teaching for all skill areas
- demonstrate competence in a language other than English or Spanish, for the purpose of research

Philosophy

Our graduate programs prepare students to be scholars and teachers who are grounded in the history of philosophy as well as contemporary philosophical methodologies. Our programs support specialization in a variety of contemporary fields, including those that expand the purview of philosophical inquiry beyond its traditional boundaries. Our department values philosophical pluralism, and our faculty represent diverse philosophical schools and perspectives, offering students a uniquely well-rounded education. We also take seriously the commitment of our Jesuit institution to social justice, providing opportunities to pursue philosophical inquiry that is socially engaged, interdisciplinary, and oriented toward the betterment of the world.

Graduate Programs

- Philosophy (MA) (p. 1631)
- Philosophy (PhD) (p. 1632)
- Social Philosophy (MA) (p. 1634)

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (0 Credit Hours)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (0 Credit Hours)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (0 Credit Hours)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (0 Credit Hours)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Philosophy (MA)

The terminal MA in Philosophy at Loyola integrates a strong grounding in the history of philosophy with current debates in social and political philosophy, ethics, and contemporary philosophy. Our department is distinguished by its exceptional breadth in the history of philosophy with internationally recognized faculty working in ancient Greek and Chinese philosophy, Islamic philosophy, and medieval, modern and 19th and 20th century European philosophy. Students who complete the terminal MA can therefore expect to develop a strong foundation in the core areas of philosophy and the ability to pursue specialized research in a range of areas at the doctoral level. Loyola's terminal MA also lays an excellent intellectual foundation for those who intend to pursue graduate work outside of philosophy in such fields as history, theology, and English, as well as those interested in pursuing this degree for personal enrichment.

Program Highlights

- First year proseminar to prepare students for coursework in graduate school
- Professional development and placement workshops that prepare students to present and publish their original research and apply for doctoral programs in philosophy and other fields
- Generalist training in the history of philosophy and an emphasis on philosophical pluralism that can prepare students for specialized research at the doctoral level
- Opportunity to attend seminars, conferences, and lectures in the Chicago-area

Curriculum

The Master of Arts in Philosophy requires 30 credit hours of coursework and a comprehensive examination. Entering MA students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy (ordinarily an undergraduate minor or its equivalent).

Specific courses may not be offered every semester and course offerings are subject to change.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1628).

Language Requirement

There is no language requirement or other research tool requirement for the M.A. degree in the Philosophy Department.

MA Examination

Toward the end of the course of studies, students pursuing the MA in Philosophy must pass an oral examination before a committee of at least three faculty members on a substantial research paper or thesis the student has written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Philosophy, students will have:

- Acquired advanced knowledge and be able to: demonstrate knowledge of the history of philosophy; demonstrate knowledge of perennial and contemporary issues in philosophy; and demonstrate expertise in a particular area of philosophy.
- Engaged in discursive and critical thinking and be able to: identify hidden presuppositions of everyday beliefs; articulate and evaluate philosophical arguments; consider alternative kinds of philosophical argumentation; apply philosophical categories, methods, and insights to other areas of human interest, experience, or cognitive inquiry.
- Produced and disseminated scholarship and be able to frame, research, complete and defend the MA Examination.
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and the world and be able to: work for others for the sake of common purposes; foster Jesuit ideals, including truth and justice; enhance the pleasures of work in common.

Philosophy (PhD)

Loyola's PhD in Philosophy is a premiere program for graduate study in continental philosophy, social and political philosophy, and the history of philosophy. It is also renowned for its strengths in feminism, ethics and value theory, critical philosophy of race, and bioethics. Our department values philosophical pluralism and faculty are informed by a variety of traditions and methodologies, so students are exposed to a range of approaches, both analytic and continental, through their coursework. Loyola thus offers doctoral students a uniquely well-rounded education as well as a diversity of research paths that they can pursue.

Program Highlights

- **Outstanding Mentorship and Professional Development:** In addition to outstanding individual mentorship and advising, our faculty collaboratively designs and conducts programming to support student success. This includes a first year proseminar to prepare students for graduate coursework and professional development workshops throughout the year to prepare students to present and publish original research.

- **Developing Research Skills:** Doctoral students can take on research assistantships that cultivate relevant research and professional skills, for instance, by serving as editorial assistants for academic journals, directing our MAP chapter (https://www.luc.edu/philosophy/researchandinitiatives/minoritiesandphilosophychapter/), and engaging in faculty directed research. Doctoral students are also encouraged to participate in at least one of our research groups (https://www.luc.edu/philosophy/researchandinitiatives/researchgroups/) to expand their scholarly networks and present their research.
- **Teaching Excellence:** Loyola will prepare you to be an agile teacher who can design and deliver courses across the core areas of philosophy and adapt to the needs of students in an increasingly complex world. Our teaching assistantships prioritize pedagogical development, and we offer teacher training through pedagogy seminars and one-on-one mentorship as well as the opportunity to teach courses as instructors of record.
- **Academic Careers:** In addition to individual advising, Loyola's placement committee offers workshops and seminars to prepare doctoral students for success on the academic job market. This committee provides feedback on application materials, schedules mock-interviews, and coaches students through the process of campus visits and job offers. Our alumni enjoy great success in their chosen career paths, and many secure full-time positions at respected colleges and universities.
- **Career Diversity:** Loyola also recognizes the importance of supporting students interested in pursuing non-traditional career paths, offering internships and training in such fields as education administration, academic publishing, public policy, social work, and computer programing.

Curriculum

The PhD in Philosophy requires 48 hours of coursework, a foreign language requirement, qualifying examination, and dissertation. All requirements for the Master of Arts in Philosophy must be satisfied as the first stage of doctoral work. Entering PhD students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy, ordinarily an undergraduate major, including coursework in the history of ancient and early modern European philosophy as well as in metaphysics, epistemology, logic, ethics, and social-political philosophy.

[1] This will be taken as a 0-credit Pedagogy Seminar.

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1628).

For further information, please refer to the Philosophy Graduate Student Handbook (https://www.luc.edu/media/lucedu/philosophy/pdfs/Grad%20Handbook%20January%202023.docx.pdf), or contact the Graduate Program Director.

Foreign Language Requirement

A reading knowledge of one foreign language, e.g., German, French, Greek or Latin, is normally required for the doctorate, normally one that the student will use as a research tool for the dissertation. The requirement must be met at two levels:

1. basic language competence and
2. facility with the language in doing philosophy research.

The dissertation topic may also require knowledge of additional foreign languages. In exceptional cases students may petition that the research tool requirement be fulfilled in another way than by knowledge of a foreign language, e.g., by a knowledge of statistics.

PhD Qualifying Examination

PhD students will be required to complete a Foundational Paper and oral defense. This paper will test their knowledge in their general dissertation research area and should be completed during the Fall of Year 3. Upon completing and defending the Foundational Paper, students will take the Dissertation Proposal Seminar in Spring of their third year in preparation for their candidacy exam. The candidacy exam focuses on a dissertation proposal and a draft of the first chapter or an extended review of the literature relevant to the dissertation. It also includes an oral defense designed to assess whether the proposal is well formed and a project which the student is prepared to carry out successfully. This examination may be taken after a student has completed all course distribution requirements and the first level of the language or other research tool requirement for the degree.

Dissertation and Oral Defense

The last stage of the PhD is the writing and defense of a dissertation. The dissertation is written under the direction of a member of the department's graduate faculty, and must be read and approved by at least two other readers who are ordinarily members of the department's graduate faculty. Formally, the dissertation begins with the submission of a "Thesis Outline." Upon approval of this outline the student is formally advanced to candidacy. The dissertation is completed with the passing of the public oral defense of the work and its acceptance by the Graduate School.

The MA Degree as Part of the PhD

The Master of Arts in Philosophy is ordinarily earned as the first part of a student's PhD work. Thirty hours of graduate coursework (10 courses) are required for students in the MA program. These courses must include five of the seven PhD distribution requirements, namely courses in contemporary Analytic Philosophy, Contemporary Continental Philosophy, Ancient Philosophy, Medieval Philosophy, and Modern Philosophy.

An MA Examination is required for students in the BA/MA, MA in Social Philosophy, and MA in Philosophy programs. It is also required for students in the PhD program who have not completed an MA thesis prior to entering the PhD program at Loyola. There are three options for completing the MA Examination depending on the program of study: (1) Oral Defense of MA Thesis; (2) Oral Defense of MA Paper; and (3) Faculty Review of MA Portfolio comprised of Two Scholarly Research Papers (article-length).

Options 1 and 2 are designed for students in the BA/MA, MA in Social Philosophy, and MA in Philosophy. Option 3 is designed for students in the PhD program. While students may fulfill the MA examination in any one of these three ways, it is strongly recommended that students take the exam that has been designed for their program of study. Students will determine in consultation with their advisors which MA Examination option is best for them. Students should also consult the GPD if they wish to deviate from the recommended MA Examination option for their program.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Philosophy, students will have:

- Acquired advanced knowledge and be able to: demonstrate knowledge of the history of philosophy; demonstrate knowledge of perennial and contemporary issues in philosophy; and demonstrate expertise in a particular area of philosophy.
- Engaged in discursive and critical thinking and be able to: identify hidden presuppositions of everyday beliefs; articulate and evaluate philosophical arguments; consider alternative kinds of philosophical argumentation; apply philosophical categories, methods, and insights to other areas of human interest, experience, or cognitive inquiry.
- Produced and disseminated scholarship and be able to: frame, research, complete and defend the PhD dissertation; and frame, complete and submit papers for scholarly conferences and publications.
- Developed effective teaching skills and be able to: effectively present material; create syllabi and craft a statement of teaching philosophy; run an effective philosophy course; satisfy University and Department expectations of core courses and instructors.
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and the world and be able to: work for others for the sake of common purposes; foster Jesuit ideals, including truth and justice; enhance the pleasures of work in common.

Social Philosophy (MA)

The Master of Arts in Social Philosophy provides an education for students interested in ethical, political, and other philosophical issues concerning society and social justice. Students enrolled in this program will learn to analyze the human condition through complex social, political, economic, and cultural contexts that characterize the contemporary global landscape. This program emphasizes

the integration of theoretical work in the classroom with work in the community. It also encourages interdisciplinary research and engagement with a variety of philosophical traditions and methodologies.

The MA in Social Philosophy serves several student populations with tracks appropriate to each. This includes a track for students who are interested in developing their knowledge of social, political, critical, and ethical philosophy and integrating this with professional and non-profit work in areas like law, criminal justice, public policy, migration, environmental justice, and education. It also serves Jesuit scholastics in Loyola's First Studies program. The Jesuit portion of this degree has two tracks. The first is called the Foundational Track, and it is designed for Jesuits who enter First Studies with little or no background in philosophy. This track is structured to introduce Jesuits to philosophy through a sequence of courses in the history of philosophy, as well as tiered courses in social and political philosophy that build foundational knowledge. The second track is called the Enhanced Track. It is designed for Jesuits with some background in philosophy who are interested in enhancing their theoretical knowledge of social, political, critical, and ethical philosophy, as well as those interested in pursuing doctoral studies in philosophy.

Key Strengths of Loyola's MA in Social Philosophy

Foundational Studies in the History of Philosophy: The Philosophy Department at Loyola has expert faculty and exceptional breadth in the history of philosophy, with coverage in ancient philosophy, medieval philosophy, modern philosophy, and nineteenth-century philosophy. Our department is also distinguished by its strengths in traditions that expand beyond traditional Western European philosophy, with faculty working in Ancient Chinese philosophy, Islamic philosophy, and the history of the philosophy of race. This allows students to explore questions of metaphysics, epistemology, and ethics from the vantage point of a variety of philosophical traditions and cultural perspectives.

Philosophy and the Existing World: Loyola's philosophy faculty has significant strengths in social, political, ethical, and critical philosophy. The degree prepares students to think critically and analytically about pressing matters facing the world today. This includes issues such as racial justice, poverty, migration, and environmental sustainability, not only in the U.S., but globally.

Interdisciplinary Research: Loyola's Philosophy Department embraces interdisciplinary approaches to these matters, for instance, by working with Loyola's School of Environmental Sustainability to offer courses that speak to issues of ecology, environmental philosophy, and environmental justice. The program encourages research across philosophy, the humanities, and the sciences, and many of our faculty are engaged in cross-disciplinary research and teaching activities that integrate philosophy with studies in history, theology, literature, neuroscience, and bioethics.

Integrating Theory and Practice: Students in this program are encouraged to bring the work they do in the classroom to bear on the service and ministerial work they are doing in the community. Equally important is learning how their work in the community can challenge and reshape theoretical research in philosophy. Chicago is an especially important site for undertaking this work and offers a unique opportunity to bring the theoretical and practical together. At the end of the program, students on all three tracks are required to take a Social Ethics Practicum that involves 70-80 hours of work in the community as well as a series of discussions, reflection papers, and research papers centered on the relation of this experience to their theoretical work.

- Philosophy (MA) (p. 1631)

Doctoral

- Philosophy (PhD) (p. 1632)

Curriculum

For students who begin the MA in Social Philosophy in Fall 2024 or after there are three available tracks: Master of Arts in Social Philosophy - Jesuit Scholastic Foundational Track (p. 1635), Master of Arts in Social Philosophy - Jesuit Scholastic Enhanced Track (p.), and Master of Arts in Social Philosophy (Non-Jesuit Track) (p.).

Master of Arts in Social Philosophy - Jesuit Scholastic Foundational Track

The MA in Social Philosophy Jesuit Scholastic Foundational Track requires 30 credit hours of coursework, a 0-credit Pedagogy Seminar, and an MA examination. The Foundational Track is designed for Jesuit scholastics in First Studies with little or no background in philosophy. It includes a sequence in the history of philosophy as well as sequenced courses in ethics and social and political philosophy to build foundational knowledge and skills.

Specific courses may not be offered every semester and course offerings are subject to change.

1. In general, these courses meet the requirements, but sometimes a topic may not be suitable, in which case the Graduate Program Director will advise about a substitute.
2. Whether a course counts as Level I or Level II may vary depending on the topic, which will be determined by the Graduate Program Director in consultation with the Graduate Program Advisory Committee and flagged on the graduate course schedule.
3. Students may also take PHIL 500, PHIL 501, PHIL 502 and PHIL 503
4. While it is not required, it is recommended that students take electives in areas that emphasize interdisciplinarity, engaged learning, and/or environmental issues.
5. Up to two electives may be taken in related courses offered by other graduate departments or schools within Loyola, subject to approval from the Graduate Program Director.
6. This will be taken as a 0-credit Pedagogy Seminar.

Students should consult with the Graduate Program Director if a course of interest is not shown in the curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1628).

Master of Arts in Social Philosophy - Jesuit Scholastic Enhanced Track

The MA in Social Philosophy Jesuit Scholastic Enhanced Track requires 30 credit hours of coursework, a 0-credit Pedagogy Seminar, and an MA examination. The Enhanced Track is designed for Jesuit scholastics in First Studies who have some background in philosophy. It serves students interested in enhancing their theoretical knowledge of social, political, critical, and ethical philosophy as well as students interested in pursuing doctoral studies in philosophy.

Specific courses may not be offered every semester and course offerings are subject to change.

For students who began the MA in Social Philosophy before Fall 2024

The Master of Arts in Social Philosophy requires 30 credit hours of graduate coursework (10 courses). The below requirements apply to any student following the M.A. program in Social Philosophy. However, Jesuits who elect to pursue this degree should consult with their advisor regarding other requirements associated with their First Studies program.

Specific courses may not be offered every semester and course offerings are subject to change.

Code	Title	Hours
Select two courses in Moral Philosophy: [1]		*6*
PHIL 462	Kant's Moral Philosophy	
PHIL 463	Virtue Ethics

PHIL 480	Social & Political Philosophy	
PHIL 481	Philosophy of Action	
PHIL 482	Philosophy of Social Science	
Select five graduate level Elective Courses [3]		*15*
Total Hours		**30**

1 PHIL 470 Ethics & Economic Justice can fulfill either the Moral Philosophy or the Social Philosophy requirement. Some courses can fulfill the Moral or Social Philosophy distribution requirements depending on course content. Students may seek course selection advice from the Graduate Program Director in order to meet requirements.

2 These courses often include issues concerning ethics and social justice.

3 Up to two electives may be taken in related courses offered by other graduate departments or schools within Loyola, subject to approval from the Graduate Program Director.

- For students who begin an M.A. in Social Philosophy in Fall 2023 or later: Beginning in Fall 2023, all required courses must be taken at the 400 or 500 level. 300-level undergraduate courses cannot be counted toward the MA in Social Philosophy. This does not apply to students who entered before Fall 2023.
- For students who began an M.A. in Social Philosophy before Fall 2023: Of the required courses, up to three may (but need not) be taken as upper-division undergraduate (300-level) courses. The remainder must be graduate courses (400 or 500 level).

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1628).

Research Tool Requirement

There is no research tool/language requirement for this degree.

MA Examination

An MA Examination is required for students in the BA/MA, MA in Social Philosophy, and MA in Philosophy programs. It is also required for students in the PhD program who have not completed an MA thesis prior to entering the PhD program at Loyola. There are three options for completing the MA Examination depending on the program of study: (1) Oral Defense of MA Thesis; (2) Oral Defense of MA Paper; and (3) Faculty Review of MA Portfolio comprised of Two Scholarly Research Papers (article-length).

Options 1 and 2 are designed for students in the BA/MA, MA in Social Philosophy, and MA in Philosophy. Option 3 is designed for students in the PhD program. While students may fulfill the MA examination in any one of these three ways, it is strongly recommended that students take the exam that has been designed for their program of study. Students will determine in consultation with their advisors which MA Examination option is best for them. Students should also consult the GPD if they wish to deviate from the recommended MA Examination option for their program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Social Philosophy students will have:

- Acquired advanced knowledge and be able to: demonstrate knowledge of the history of philosophy; demonstrate knowledge of perennial and contemporary issues in philosophy; and demonstrate expertise in a particular area of philosophy.
- Engaged in discursive and critical thinking and be able to: identify hidden presuppositions of everyday beliefs; articulate and evaluate philosophical arguments; consider alternative kinds of philosophical argumentation; apply philosophical categories, methods, and insights to other areas of human interest, experience, or cognitive inquiry.
- Produced and disseminated scholarship and be able to: frame, research, complete and defend the MA examination; and frame, complete and submit papers for scholarly conferences and publications.
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and the world and be able to: work for others for the sake of common purposes; foster Jesuit ideals, including truth and justice; enhance the pleasures of work in common.

Political Science

The Department of Political Sciences offers students a personalized education within a distinctive graduate program. Graduate courses are taught by full time faculty and conducted in a seminar form, with specific attention to the individual interests of students. All graduate students receive extensive methodological training, a well-rounded exposure to political science- including courses in comparative politics and international relations- as well as courses in American politics and political theory.

Graduate Programs

- International Affairs (MA) (p. 1642)
- Political Science/Law (MA/JD) (p. 2230)

- Political Science (MA) (p. 1644)
- Political Science (PhD) (p. 1646)

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (0 Credit Hours)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (0 Credit Hours)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (0 Credit Hours)
The course is for students researching a dissertation towards earning a PhD.

International Affairs (MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impact of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Master of Arts in International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

MPBH 432	Health Impact Assessment
Quinlan School of Business	
ECON 424	International Business Economics
FINC 455	International Financial Management
HRER 422	Global HR Management
HRER 502	Global Employment Relations
MARK 465	International Marketing
MARK 561	Comparative Consumer Behavior
MGMT 446	International Business Ethics
SCMG 486	Global Logistics
Capstone	**3**
Select one of the following:	
INTA 470	Fieldwork in PLSC-Internship
PLSC 499	Directed Readings
PLSC 605	Master's Study
Total Hours	**30**

[1] Students interested in honing their foreign language skills will have the option of taking a 300 or 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola at the 300 level include Chinese, French, German, Italian, and Spanish. Modern Languages and Literatures offers graduate-level courses in Spanish. The courses that follow are open only to interested students with advanced writing, speaking, and reading skills in Spanish.

[2] MA in International Affairs students must take variable credit Law courses for 3 credit hours. The course cannot be taken for less than 3 credit hours.

Note on Elective Courses

Students will take six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core International Affairs courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses. The participating programs that will contribute classes include eight departments in Arts & Sciences (History Department, Philosophy Department, Political Science Department, Psychology Department, Sociology Department, Theology Department, Criminal Justice & Criminology Department, and Modern Languages and Literatures Department) and four additional Schools (School of Communication, School of Education [International Education], School of Social Work, and School of Law). Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses below for approval.

Suggested Sequence of Courses

In order to provide optimal flexibility in the Master's program, there is no required course sequence. However, it is suggested that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) as soon as they are offered before taking elective courses.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students will graduate from our program having achieved:

- A foundation for understanding and critiquing research related to International Affairs, including methods training that leverages both qualitative and quantitative data
- Knowledge of the principal theories of comparative politics and international relations, as well as the key areas of research in these two subfields
- An interdisciplinary understanding and appreciation of International Affairs through coursework available within eight different departments in the College of Arts and Sciences and four additional Schools at Loyola
- Enhanced writing and critical thinking skills and dispositions through class-based projects and a capstone experience
- Strengthened methods, research, or writing skills tailored to students interests with advanced methods courses, language training, or the writing of a master's thesis

Political Science (MA)

The Master of Arts in Political Science provides students with a general, political science graduate education that trains students in methodological techniques and research design, and provides training in at least three fields of political science.

Related Programs

Master's

- International Affairs (MA) (p. 1642)

Doctoral

- Political Science (PhD) (p. 1646)

Combined

- Political Science/Law (MA/JD) (p. 2230)

Curriculum

The Master of Arts in Political Science requires 30 hours of coursework. Students are required to take 3 methods courses and a combination of courses in the sub-fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students may complete an internship, write an MA thesis, or take comprehensive exams to fulfill their degree requirements.

Course Requirements

Code	Title	Hours
Political Science Methods		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
PLSC 476	Political Analysis II	3
Seven Electives from Two Subfields [1]		*21*
The sub-fields that may be chosen from are International Relations, Comparative Politics, American Politics, and Political Theory.		
International Relations Courses		
PLSC 430	Theories of International Politics	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 437	Selected Problems International Law	
PLSC 439	Selected Problems in International Politics	
PLSC 531	Seminar: International Politics	
Comparative Politics Courses		
PLSC 420	Comparative Political Systems	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 423	Soviet & Post-Soviet Politics	
PLSC 424	Politics of Developing Areas	
PLSC 425	Sub-Saharan Africa	
PLSC 426	Latin American Politics	
PLSC 427	Politics of the Middle East	
PLSC 428	Political Violence	
PLSC 429	Comparative Politics Selected Problems	
PLSC 520	Seminar: Comparative Politics	
PLSC 521	Seminar Western European Politics	
PLSC 532	Soviet/Post-Soviet Foreign Policy	

American Politics Courses	
PLSC 404	Selected Problems in American Politics
PLSC 405	American Executive Branch
PLSC 406	American Legislative Branch
PLSC 407	Public Policy-Making & Implementation
PLSC 410	Urban Politics
PLSC 411	American Political Parties/Electoral Process
PLSC 412	Constitutional Politics
PLSC 417	The American Legal System
PLSC 418	Political Psychology & Socialization
PLSC 419	Managing Urban Government
Political Theory Courses	
PLSC 440	Ancient Political Thought
PLSC 442	Modern Political Thought
PLSC 444	Great Authors
PLSC 446	Political Ethics
PLSC 447	American Political Thought to Civil War
PLSC 449	19th Century Political Thought
PLSC 543	Liberalism
PLSC 546	Political Philosophy Selected Problems
Total Hours	**30**

[1] Seven elective courses should be chosen from at least two subfields: International Relations, Comparative Politics, American Politics, or Political Theory. With approval of the Graduate Program Director, up to six (6) hours may be at the graduate level in related disciplines.

Capstone Requirement: Thesis, Comprehensive Exams, or Internship

Thesis

Students may satisfy six hours (2 courses) by writing a thesis. Students who choose this option will take PLSC 596 Thesis Research for two semesters (a total of 6 credit hours, which count as electives) and take PLSC 595 Thesis Supervision until they are done with the thesis.

Code	Title	Hours
Take for two semesters (may satisfy 6 elective hours)		
PLSC 596	Thesis Research	
Take until done with thesis		
PLSC 595	Thesis Supervision	

Comprehensive Exam

MA students can choose to take a written comprehensive examination. The student will select five courses from the substantive courses they have taken on which they will be tested. Prior to taking the exam students must finish all incompletes. Students may be currently registered for courses necessary for the degree in the semester in which they take the exam. If the student has fulfilled all degree requirements except for the comprehensive exams, they should register for PLSC 605 Master's Study in the semesters leading up to and including the exam. Students taking comprehensive examinations at the master's degree level are expected to answer theoretical and substantive questions from a range of five courses they have taken in their coursework. Once a student knows that s/he will take the exam in a particular semester, we highly recommend that they discuss the exam with the faculty members with whom they have taken the five chosen courses. Comprehensive exams will take place during the second half of the fall and spring semesters. Students will answer three questions over a weekend, receiving the exam on a Friday at 5:00 PM and returning the completed examination the following Monday, at 9:00 AM. All three answers must be written during the specified weekend with no outside assistance. Students will write a maximum of 21, double-spaced pages (normal formatting: 1" margins, Times New Roman, 12 pitch font). Each answer should be approximately six or seven pages. Prior to taking comprehensive exams, students must submit to the Graduate Program Director a departmental "MA Requirements and Comprehensive Examination Form," that lists all of the courses the student has taken and identifies on which courses the student would like to be tested. At the beginning of each semester the Graduate Program Director will distribute this form to all students who will take the exam

Internship

PLSC 470 Fieldwork in Political Science-Internship offers academic credit toward your major or minor while interning and gaining professional experience at one of several organizations, either here in Chicago or elsewhere. The intent is for students to 1) apply their education to date in a professional setting, 2) gain valuable experience at the start of their professional careers, 3) to explore a particular area of professional interest before embarking on their careers, and 4) to potentially "get a foot in the door" within a particular field or employer with the hope of landing a permanent position upon graduation. While past interns have received job offers from organization where they have interned, there are no guarantees or promises of employment that accompany taking this course.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
Elective		3
	Hours	**9**
Spring		
PLSC 476	Political Analysis II	3
Elective		3
Elective		3
	Hours	**9**
Year 2		
Fall		
Elective [1]		3
Elective		3
	Hours	**6**
Spring		
Elective [1]		3

Elective	3
Hours	**6**
Total Hours	**30**

[1] If pursuing thesis capstone option, student must substitute this elective for PLSC 596 Thesis Research.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The MA in Political Science offers students:

- American Politics (study of U.S. institutions and political processes).
- Comparative Politics (study of political regimes, including the state, development and modernization, political, economic, and social movements).
- International Relations (study of global processes throughout the international system).
- Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Extensive methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- Preparation for purposeful careers in politics, government, international affairs, law, the non-profit world, journalism, business, education, social services, and other professions, as well as for further graduate (PhD) study at professional schools and institutions of higher learning, both in the U.S. and abroad.

We also encourage our MA students to take advantage of additional learning opportunities through numerous Political Science-sponsored programs:

1. Advanced methodological training
2. Advanced language training/proficiency in a language other than English
3. Advanced research skills
4. International, cross-cultural experience
5. Professional development and experience
6. Networking opportunities

Political Science (PhD)

The PhD program in political science is intended for students who wish to acquire careers in teaching and research or work in the government or the private sector. The focus includes the four fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students will take most of their courses and specialize in two fields. One of the two fields will constitute the major field and the other the minor field.

PLSC 543	Liberalism
PLSC 546	Political Philosophy Selected Problems
Total Hours	**48**

[1] Students who do not enter Loyola with an MA may take the master's comprehensive exam after completing 10 courses (including PLSC 401 Intro to Research Design & Method, PLSC 475 Political Analysis I, and PLSC 476 Political Analysis II) and earn the MA en route to the PhD. Students must complete four semesters of residence, including at least two consecutive semesters at Loyola. At least one academic year (two consecutive semesters) must be spent as a full-time student.

Language Proficiency

Students may be required to develop language proficiency to conduct research for their doctoral dissertations. PhD students who need to take language courses that are necessary for dissertation research may be able to secure tuition support from The Graduate School with approval of the Graduate Program Director.

Comprehensive Exams

Candidates must pass three total comprehensive examinations (made up of both written and oral components), culminating in an oral examination where 4/5 faculty examiners must approve. All course requirements, including resolution of any outstanding Incomplete grades, must be fulfilled before students can take the written comprehensive examinations.

Dissertation

Candidates must complete and successfully defend both a dissertation proposal and the completed dissertation. Sometime in the third year of study, students are expected for form a dissertation committee, with the assistance of the Graduate Program Director.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

After coursework listed below is complete, students begin taking PLSC 610 Doctoral Study or PLSC 600 Dissertation Supervision until dissertation defense.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The PhD in Political Science offers students:

- An in-depth understanding of the theories and scholarly literature in the sub-fields of Comparative Politics (study of political regimes, including the state, development and modernization, political, economic, and social movements), International Relations (study of global processes throughout the international system), American Politics (study of U.S. institutions and political processes), and Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Extensive methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Research and teaching training by serving as both a research assistant for department faculty and professor of record for at least one class during the period of the PhD student's funding.
- An enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- Preparation for careers in research and teaching at colleges and universities or work in the government, non-profit, and private sectors.
- We also encourage our PhD students to take advantage of additional learning opportunities: Advanced methodological training; Advanced language training/proficiency in a language other than English; Advanced research skills; International, cross-cultural experience; Professional development and experience; and Networking opportunities.

Psychology

Consistent with Loyola University's mission as a Jesuit, Catholic institution, transformative graduate education in the Department of Psychology has two foci: **Healthy Development in Children, Youth, and Families**, and **Psychological Foundations of Social Justice**.

Within each, faculty and students pursue research and provide graduate training that draws upon clinical, developmental, and social psychology, and that has as its ultimate goal maximizing human potential and eliminating barriers to fully effective human functioning, development, and interaction.

- Students interested in focusing on **Psychological Foundations of Social Justice** and who aspire to a non-clinical academic or professional career, follow the Applied Social Psychology Program (p. 1651).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a clinical academic or professional career, follow the Clinical Psychology PhD Program (p. 1654).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a non-clinical academic or professional career, follow the Developmental Psychology Program (p. 1656).

Graduate Programs

- Applied Social Psychology (MA) (p. 1651)
- Applied Social Psychology (PhD) (p. 1652)
- Clinical Psychology (PhD) (p. 1654)
- Developmental Psychology (PhD) (p. 1656)

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (0 Credit Hours)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (0-3 Credit Hours)
Enrollment is Restricted to Psychology graduate students. Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (0 Credit Hours)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (0 Credit Hours)
Students complete dissertation research under the supervision of a faculty member.

PSYC 605 Master's Study (0 Credit Hours)
Students complete master's thesis readings and research under the supervision of a faculty member.

PSYC 610 Doctoral Study (0 Credit Hours)
Students complete dissertation readings and research under the supervision of a faculty member.

Applied Social Psychology (MA)

The Master of Arts in Applied Social Psychology is a terminal degree program designed primarily to prepare people for careers as research specialist. Such individuals usually work under the direction of a PhD-level supervisor in government agencies, market research firms, research centers, personnel departments and so forth.

Related Programs

Doctoral

- Applied Social Psychology (PhD) (p. 1652)
- Clinical Psychology (PhD) (p. 1654)
- Developmental Psychology (PhD) (p. 1656)

Curriculum

The Master of Arts in Applied Social Psychology requires 30 credit hours of coursework and the completion of a master's thesis.

Required Coursework

Code	Title	Hours
Core Course Requirements		*12*
PSYC 420	Research Methods in Psychology [1]	
PSYC 460	Social Psychological Theory	
PSYC 482	Advanced Statistics	
PSYC 491	Multivariate Analysis [1]	
Advanced Methods [2]		*6*
PSYC 486	Methods of Program Evaluation (required)	
PSYC 493	Structural Equation Modeling	
Applied Topics (Pick One)		*3*
PSYC 472	Organizational Psychology	
PSYC 484	Prejudice and Intergroup Relations	
PSYC 485	Psychology and Law	
PSYC 489	Political Cognition	
Basic Social Psychology (Pick One)		*3*
PSYC 461	Attitude and Attitude Change	
PSYC 462	Cognitive Social Psychology	
PSYC 479	Cognition and Emotion	
PSYC 474	Research in Group Dynamics	
PSYC 477	The Self and Self-Esteem	
Two Graduate-Level PSYC Electives [3]		*6*
Total Hours		**30**

1. Course must be completed with a grade of "B" or better.
2. Advanced Methods courses can be any graduate level statistics or methods course. Please contact Graduate Program Director for assistance.
3. Graduate level (400+) Psychology courses can be found here (p. 1648).

Thesis

The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The student must present the results of the study to the faculty and students of the Social Psychology Program as part of the Program colloquium series. All master's theses must be submitted for publication in accordance with Graduate School policy.

Students are encouraged to begin work on their Master's thesis early in their graduate careers. Optimally, data collection should begin in the fall semester of the student's second year, and the thesis should be completed by the beginning of the fall semester of his/her third year. This allows students to begin teaching for the department during their third year of graduate school.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Acquisition of research and publication skills that will allow students to pursue an applied job after completing the program

Applied Social Psychology (PhD)

Loyola University Chicago offers a Ph.D. Degree in Applied Social Psychology in the Psychology Department.

Related Programs

Master's

- Applied Social Psychology (MA) (p. 1651)

Doctoral

- Clinical Psychology (PhD) (p. 1654)
- Developmental Psychology (PhD) (p. 1656)

Curriculum

The PhD in Applied Social Psychology requires 60 credit hours of coursework, a master's thesis, internship in teaching or research, doctoral candidacy exam, and dissertation.

Coursework Requirements

Code	Title	Hours
Psychology Core [1]		**12**
PSYC 420	Research Methods in Psychology	
PSYC 486	Methods of Program Evaluation	
PSYC 482	Advanced Statistics	
PSYC 493	Structural Equation Modeling

PSYC 485	Psychology and Law	
PSYC 489	Political Cognition	
PSYC 484	Prejudice and Intergroup Relations	
Six Electives [2]		*18*
Total Hours		**60**

1. Courses in Psychology Core must be completed with a grade of B or better to be applied to degree.
2. Electives may be selected from above courses, other graduate level Psychology courses, and graduate level coursework from other departments in the University (*eg* Sociology, Counseling and Educational Psychology). Students are strongly encouraged to contact the Graduate Program Director for approval before registering. Electives may also include independent, individualized readings (PSYC 599 Directed Readings) or research (PSYC 598 Research) courses with any willing faculty member.

Doctoral Candidacy Examination

The Doctoral Candidacy Exam is broken down into two components. In order to be a successful applied social psychologist, there are two domains within which a student must develop expertise: the application of theory to applied questions, and the use of methodology and statistics in empirical inquiry. Consequently, the Candidacy Exam in Applied Social Psychology has two components that correspond to these two critical domains: *Theory and Applied* and *Methodology and Statistics*. Successful completion of the candidacy exam process will demonstrate that the PhD candidate has acquired expertise in a specific theoretical domain as applied to some relevant social issue, and has the developed the ability to empirically investigate such questions with appropriate methods and statistics.

For each area, students are required to choose the topics and present them to two members of the faculty – a first and second reader for that particular exam. Once both the student and the faculty readers are in agreement on the appropriateness of the topic, the student puts together a reading list of approximately 1500 to 2000 pages of relevant work in that domain. In addition, the student creates an outline summarizing the topics developed in the readings and what the student wants to learn from the endeavor. When the student and readers are in agreement on the readings and outline, the student becomes responsible for doing the readings and then demonstrating expertise in that domain. For each area, there are multiple ways to demonstrate such expertise and options are discussed in the student handbook.

*Note: The candidacy exam project cannot analyze exactly the same data from the student's MA thesis or PhD dissertation. Students cannot use the exact same methods and analyses that are the core of the thesis or dissertation for this exam.

Internship

All PhD in Social Psychology students are required to complete an internship either as a researcher in an applied setting (for those students interested in applied setting employment), or as a teacher in an academic setting. The applied research internship requires approximately 1000 hours of research experience; the teaching internship requires teaching four college-level psychology courses, covering at least two different courses. Students can choose to split the internship - 1/2 applied research and 1/2 teaching by performing 500 hours of applied research and teaching two college-level courses. Internships are usually completed after receiving the MA degree and completing most required coursework - i.e., in the third or fourth year of a student's graduate career. However, students can also complete internship hours during the summer. All PhD students must make a presentation at SARS concerning their internships and what they learned while involved in order to complete the internship requirement.

Thesis and Dissertation

Students will complete a master's thesis and earn the MA in Social Psychology en route to the PhD. The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The thesis will be published according to Graduate School policy.

The dissertation represents the culmination of one's graduate study. Writing a dissertation is an opportunity to draw upon all of one's knowledge and experience while making an original contribution to general knowledge and/or the solution to some social problem. After finishing the candidacy exam, students are well prepared for this task. In fact, students typically formulate their exam areas with an eye toward their relevance for the dissertation. Upon completion and successful oral defense of the dissertation, it will be deposited in a publicly accessible database in accordance with Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended

that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

PhD Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Gain experience teaching undergraduate psychology classes
- Acquisition of research and publication skills that will allow students to pursue either an academic job or an applied job after completing the program

Clinical Psychology (PhD)

The Clinical Psychology PhD program at Loyola University Chicago adheres to the scientist-practitioner model of clinical training and is designed to develop skilled, creative professionals prepared to succeed in a variety of settings (e.g., clinical, research, academic). The program strives to provide a balance of training and experience in research, clinical work, and teaching. The mission of the program is to provide students with a strong foundation in general psychology along with training focused on the integration of research and practice of clinical psychology. Students are exposed to a range of clinical training and research, with an orientation toward social justice applications of both research and practice. Located in Chicago, Illinois, students have access to a variety of community-based research and clinical externship opportunities. Formal specialization is available in the area of clinical child psychology and/or neuropsychology.

APA Accredited

The clinical psychology program at Loyola University Chicago has been fully accredited by the American Psychological Association (https://www.apa.org/) since 1959.

[1] Electives are selected by the student in consultation with their advisor and should provide the student with grater depth in their special interest area as well as a richer contextual framework for their clinical interests. Electives may be chosen from graduate level psychology courses or other graduate level courses in the university with approval.

APA Course Requirements

To acquire a broad background in primary content areas designated by APA ("discipline-specific knowledge"), clinical students are required to complete courses the Biological, Cognitive, Affective, Social, and Developmental Aspects of Behavior, as well as Psychometrics and Advanced Integrative Knowledge in Scientific Psychology. In order to effectively plan coursework to meet all distribution requirements, students should consult their advisor and Graduate Program Director frequently.

The APA requires that students in all accredited clinical programs acquire basic knowledge in each of seven areas described as "broad theoretical and scientific foundations of the field of psychology." Note that the Department and APA requirements overlap in several respects. One class can simultaneously satisfy both Departmental and APA requirements.

Supervised Clinical Experience and Internship

Supervised clinical experience is an integral part of the overall program. All clinical students must complete a minimum of 800 hours of pre-internship, or practicum/externship training, experience. This begins during the second year when students complete a two-semester psychotherapy practicum based in the University's Wellness Center.

After the second year, students progress to advanced-level externship placements where they continue to receive supervised experience, generally with a wider range of assessment and intervention techniques and more diverse clinical populations. The Clinical Program maintains a close working relationship with many hospitals, medical centers, clinics, and mental health facilities in the Chicago metropolitan area.

Clinical Internship: The 12-month full-time internship is typically taken in the 6th year of study and may be completed at any APA-accredited site within the Chicago area or anywhere in the United States.

Comprehensive Examinations

In addition to the oral examinations associated with the master's thesis and doctoral dissertation, all clinical students are required to complete the Clinical Qualifying Examination. This exam is designed to provide a comprehensive assessment of professional and scientific competency in clinical psychology. Students typically take this exam after their third year of study. This exam covers three major areas: assessment, intervention, and psychopathology. An oral exam, the Clinical Competency Examination, is also required. In this exam, students are required to discuss clinical material related to a case that is given to the student by the examination committee. Students typically take this exam at the end of their fourth year of study.

Research, Thesis, and Dissertation

All clinical students are required to complete an empirical master's thesis and a doctoral dissertation. As such, students will complete a Master of Science in Clinical Psychology en route to the PhD. The program emphasizes research on clinical problems in applied clinical settings and strongly encourages such research. Because of the close working relationships between the clinical program at Loyola and Chicago-area mental health facilities, opportunities for clinical research are available at a variety of locations.

In addition to the required research and related courses, other elective opportunities exist for students to participate in research activity. Within the Department, faculty lead research teams that provide active forums for generating research ideas. Such research covers areas such as family and marital issues, depression, ethics, adolescence, psychotherapy research, exposure to violence, children's mental health services, and pediatric psychology. Finally, our faculty encourage students to present papers and posters at professional meetings and to publish their research.

The master's thesis and dissertation will be subject to oral defense and the final approved manuscript must be deposited in a publicly accessible database in accordance with Graduate School policy.

Child Clinical Sub-Specialty

The child sub-specialty allows students to develop special expertise in psychological approaches to understanding and treating children, adolescents, and families. Many of the clinical faculty teach courses and

conduct research on issues related to children, adolescents, and families. In addition, clinical students and faculty interact closely with students and faculty of the developmental division through program meetings and research collaborations.

Students who enroll in this "track" complete the core courses required of all clinical students. In addition, they complete a series of advanced coursework in the child clinical sub-specialty and acquire clinical and research experience relevant to this sub-specialty as described below. It is important to note that all clinical students may take child clinical courses and acquire child related experiences. However, students can only report that they have been trained as child clinical psychologists if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses within their psychology core or electives: PSYC 473 Social Development, PSYC 475 Cognitive Development, PSYC 451 Psychopathology of Childhood & Adolescents, PSYC 438 Principles of Psychological Assessment Child & Adult, PSYC 451 Psychopathology of Childhood & Adolescents.
- Students must complete a dissertation directly related to child, adolescent, or family issues. Also, at least one faculty member from the child track must serve on each student's Thesis and Dissertation Committees.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on work with children, adolescents, and/or families.
- Students are required to complete an internship where at least 33% of one's time is spent working with child, adolescent, or family clients

Neuropsychology Module

The neuropsychology module allows students to develop special expertise in clinical neuropsychological assessment. Students who wish to pursue completion of this "module" enroll in the core courses required of all clinical students. In addition, they complete advanced coursework in clinical neuropsychology and acquire clinical experience relevant to clinical neuropsychology as described below. It is important to note that all clinical students may take neuropsychology and acquire neuropsychology-related experiences. However, students can only report that they have focused their training in clinical neuropsychology if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses as part of their psychology core or electives: PSYC 552 Neuropsychology, PSYC 553 Neuropsychological Assessment, and PSYC 436 Psychopharmacology.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on clinical neuropsychological assessment of adults and/or children.
- Students are required to complete an internship where a significant portion of one's training is in the practice of clinical neuropsychology.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Knowledge of the substantive content in the field of clinical psychology
- Knowledge of theories and methodological approaches in psychology
- Design and implementation of psychological research
- Specialized knowledge of clinical assessment, treatment, and psychopathology, including integration of research and practice
- Effective communication of psychological information across contexts
- Knowledge of and adherence to the ethical standards of the profession
- Awareness and integration of intersectional dimensions of diversity and individual differences in the application of psychological principles and approaches

Developmental Psychology (PhD)

The Developmental Psychology Graduate Program aims to understand and support the healthy development of children, youth, and families. Our faculty specialize in the cognitive, cultural, social-emotional, linguistic, and neural factors that promote typical development and learning in infancy through adolescence. Through research training, coursework, and teaching, students gain the professional skills they need for non-clinical academic or professional careers.

Related Programs

Master's

- Applied Social Psychology (MA) (p. 1651)

Doctoral

- Applied Social Psychology (PhD) (p. 1652)
- Clinical Psychology (PhD) (p. 1654)

Curriculum

The PhD in Developmental Psychology requires 60 credit hours, a critical review paper, master's thesis, qualifying examination, and dissertation.

En route to earning the PhD in Developmental Psychology, students complete a master's degree (30 credit hours). An additional 30 credit hours are required beyond the master's degree for the doctoral degree.

Coursework Requirements

Code	Title	Hours
Psychology Core [1]		
PSYC 420	Research Methods in Psychology	3
PSYC 482	Advanced Statistics	3
PSYC 435	Seminar in Cognitive Neuroscience	3
or PSYC 552	Neuropsychology	

PSYC 491	Multivariate Analysis	3
Development Track Requirements		
PSYC 473	Social Development	3
PSYC 475	Cognitive Development	3
Choose Four Developmental Courses		*12*
PSYC 515	Infancy	
PSYC 540	Psychology of Language Development	
PSYC 545	Select Topics in Developmental Psychology (Attention Learning and the Media)	
PSYC 545	Select Topics in Developmental Psychology (Parenting)	
PSYC 545	Select Topics in Developmental Psychology (Child Development and Social Policy)	
PSYC 548	Risk and Opportunity in Childhood and Adolescence	
Choose One Social or Clinical Course		*3*
PSYC 438	Principles of Psychological Assessment Child & Adult	
PSYC 451	Psychopathology of Childhood & Adolescents	
PSYC 460	Social Psychological Theory	
PSYC 461	Attitude and Attitude Change	
PSYC 462	Cognitive Social Psychology	
PSYC 474	Research in Group Dynamics	
PSYC 477	The Self and Self-Esteem	
PSYC 484	Prejudice and Intergroup Relations	
PSYC 489	Political Cognition	
PSYC 525	Seminar in Social Psychology	
Four Directed Readings		*12*
PSYC 598	Research	
PSYC 597	Integrative Readings in Psychology	
PSYC 599	Directed Readings (Taken Twice)	
Three Electives [2]		*9*
Two Minor Area Courses [3]		*6*
Total Hours		**60**

1 All courses in the Psychology Core must be completed with a grade of B or better to be applied to the degree.

2 Elective courses may be selected from the Developmental, Social or Clinical Topics courses listed above, or courses in the students' minor area, but each course can count only once toward meeting a requirement (i.e., no double dipping).

3 Minor Areas include, but are not limited to: Statistics and Education. Other courses not listed here might also be acceptable to meet the minor requirement, but student must confer with the Graduate Program Director. All courses must be taken at the graduate level (400 or above).

Minor Area Options

Code	Title	Hours
Minor Area Options		
Statistics Minor		
PSYC 493	Structural Equation Modeling	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
RMTD 488	Meta-Analysis	
Education Minor		
CIEP 401	The Exceptional Child	
CIEP 451	Psychology of Learning	
CIEP 481	Prevention, Assessment & Intervention: Early Childhood	

Comprehensive Examination

The doctoral qualifying exam is taken after the student has completed at least two full years in the graduate program. The qualifying examination is a written exam, completed independently, and is the final step before the student begins dissertation research. At this stage, the student should have acquired considerable knowledge of the field of developmental psychology and of one or more specialty areas. Students will write a grant proposal related to their research area, based on guidelines from the faculty.

Thesis and Dissertation

The Master's thesis is an original research project, supervised by a Psychology Department faculty member, written up as a journal article and orally defended. Students who enter with advanced standing should check with the Graduate Program Director to determine if this requirement is met with previous master's degree.

The Dissertation is the product of a large-scale research endeavor undertaken with guidance and supervision of a faculty committee. A public oral defense of the dissertation is required, and after successful completion the final work will be deposited in a publicly available database in accordance with Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the PhD in Developmental Psychology will:

- Acquire broad understanding of psychological concepts, and advanced knowledge of the cognitive, cultural, social-emotional, linguistic and neural factors that promote the learning and development of children and youth.
- Become versed in various data gathering methods, the ethical conduct of research, and the use of sophisticated statistical techniques.
- Conduct original research that contributes new knowledge and can ultimately support the healthy development of children, youth, and families.
- Learn about available research funding opportunities, and obtain experience with grant writing.

- Produce high quality oral and written presentations, including posters at conferences, and publications in peer-reviewed journals.

Sociology

The Department of Sociology at Loyola University Chicago advances the university's mission (https://www.luc.edu/mission/) of expanding knowledge in the service of humanity. We are committed to social justice, diversity, inclusion, scientific inquiry, and academic freedom. As scholars trained in diverse methodological approaches and practitioners of community-engaged scholarship, our work addresses public issues in Chicago as well as nationally, transnationally, and globally.

The Department of Sociology offers both an MA and a Ph.D. program. These programs provide students with a broad foundation in general sociology and extensive training in qualitative and quantitative research methodologies. The department offers electives and research opportunities in a variety of sub-areas, including:

- Urban, Environment, and Community
- Health and Medicine
- Politics, Power and Social Justice
- Global and Transnational
- Race, Ethnicity, Gender, and Sexuality
- Religion, Science, and Knowledge

Graduates of our master's program most often go on to careers in administration and research in business, education, health care and non-profit organizations. About a fifth of the master's students continue on to Ph.D. degrees at Loyola or other universities. About two-thirds of our Ph.D. graduates go on to teach in colleges or universities, while others work in research or administration in the public or private sector.

Graduate Program

- Sociology (MA) (p. 1661)
- Sociology (PhD) (p. 1663)

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (0 Credit Hours)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (0 Credit Hours)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (0 Credit Hours)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Sociology (MA)

The Department of Sociology offers a comprehensive graduate program for a Master of Arts (MA) which provides a broad foundation in the discipline and enables students to explore a field relevant to their career interests. This program has two tracks: a general Master of Arts in Sociology track and a Public and Applied Sociology track. The general track prepares students for mid-level administration, research, and teaching positions, as well as for continuing into a Ph.D. The Public and Applied track prepares students to help shape and evaluate social policy and programs and includes a required internship. Both tracks train students in both qualitative and quantitative research methods and offer an elective in writing and presenting research.

Related Programs

Doctoral

- Sociology (PhD) (p. 1663)

Combined

- Sociology (BA/MA) (p. 1361)

Curriculum

The Master of Arts in Sociology requires 30 credit hours and a master's thesis or portfolio. Students may choose between a general or applied sociology track.

General Sociology Requirements

The General MA Sociology track provides students with a broad foundation in sociological theory and methods, as well as a particular focus in a more specialized field of relevance to the student's career interests in academic, private sector work, government work, or public service. It is also the foundation for entrance into doctoral study in sociology and most other social science programs. This track requires ten courses plus the completion of a master's thesis. Completion of this degree normally takes up to two years as a full-time student.

SOCL 498	Independent Research	
SOCL 499	Directed Study	
Total Hours		**30**

Public and Applied Sociology Requirements

The Public and Applied Sociology track emphasizes the application of sociological knowledge and methods to the development and evaluation of policies and programs. It provides students with a broad foundation in sociological theory and methods, as well as a focus on a more specialized field of relevance to the student's career interests. This track requires ten courses, one of which is a credit-bearing internship in an organization outside of Loyola, as well as the completion of a research portfolio, consisting of one library-based paper and one empirical paper.

This degree can be particularly useful for students planning careers in corporations, hospitals, social service agencies, labor unions, community organizations, non-profit organizations, or government agencies. Completion of this degree normally requires one and a half years as a full-time student.

In addition to five electives within the Sociology Program, this track consists of five required courses:

Code	Title	Hours
Applied Sociology Required Courses		
SOCL 405	History Sociological Thought	3
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 414	Statistical Methods Analysis I	3
SOCL 494	Internship	3
Choose Five Electives		**15**
SOCL 406	Modern Sociological Theory	
SOCL 415	Statistical Methods of Analysis II	
SOCL 418	Demography	
SOCL 421	Theories Social Change	
SOCL 423	Social Movements	
SOCL 425	Inequality and Society	
SOCL 426	Sociology of Gender	
SOCL 427	Political Sociology	
SOCL 428	Poverty and Social Welfare	
SOCL 432	Socialization Thru Life Cycle	
SOCL 438	The Family	
SOCL 439	Community Change	
SOCL 440	Organizations & Organizational Change	
SOCL 441	Sociology of Religion	
SOCL 442	Religious Conflict & Change	
SOCL 446	Knowledge, Power & Expertise	
SOCL 447	Sociology of Culture	
SOCL 448	Technology & Material Culture	
SOCL 452	Complex Organizations	
SOCL 453	Occupations and Professions	
SOCL 461	Race & Ethnicity	
SOCL 462	The Urban Metropolis	
SOCL 463	Sociology & Natural Environment	
SOCL 471	Sociology of Deviance & Control	
SOCL 473	Criminology	

SOCL 481	Medical Sociology	
SOCL 490	Workshop: Applied Sociology	
SOCL 491	Sociological Discourse	
SOCL 497	Independent Research	
SOCL 498	Independent Research	
SOCL 499	Directed Study	
Total Hours		**30**

The internship is a unique opportunity for students to gain hands-on experience and to make professional contacts that will facilitate their careers. Interns have worked in a variety of organizations-the Illinois Criminal Justice Authority, American Medical Association, Better Government Association, and the Midwest Women's Center-as well as for several metropolitan newspapers, fair housing commissions, city government departments, and major corporations.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

There are two possible tracks when obtaining your M.A.: the General M.A. or the Public & Applied M.A. in Sociology.

The General MA Sociology track provides students with a broad foundation in sociological theory and methods, as well as a particular focus in a more specialized field of relevance to the student's career interests in academic, private sector work, government work, or public service. It is also the foundation for entrance into doctoral study in sociology and most other social science programs. This track requires ten courses plus the completion of a master's thesis. Completion of this degree normally takes up to two years as a full-time student. This degree prepares students for positions as research staff in government, non-profit, and for-profit sectors.

The Public and Applied Sociology track emphasizes the application of sociological knowledge and methods to the development and evaluation of policies and programs. It provides students with a broad foundation in sociological theory and methods, as well as a focus on a more specialized field of relevance to the student's career interests. This track requires ten courses, one of which is a credit-bearing internship in an organization outside of Loyola, as well as the completion of a research portfolio, consisting of one library-based paper and one empirical paper.

This degree can be particularly useful for students planning careers in corporations, hospitals, social service agencies, labor unions, community organizations, non-profit organizations, or government agencies. Completion of this degree normally requires one and a half years as a full-time student. This degree prepares students for positions as program directors or staff in government, non-profit, and for-profit sectors.

Students will learn to:

- Identify the broad theoretical orientations of the discipline. [General Track]
- Frame sociological research questions. [General Track]
- Synthesize social scientific literature. [General Track]
- Select appropriate data sources. [General Track]
- Collect and present data in accordance with ethical and professional standards. [General Track]
- Use one or more data collection methods to carry out a research project, such as interviews, participant observation, surveys, or archival evidence. [General Track]
- Analyze quantitative or qualitative data. [General Track]
- Write a sociological research report. [General Track]
- Apply sociological knowledge to governmental, non-profit, or for-profit organizational activities. [Applied Track]
- Contribute to the work of a governmental, non-profit, or for-profit organization through an internship. [Applied Track]
- Frame a research question relevant to an organization. [Applied Track]
- Select appropriate data sources. [Applied Track]
- Collect and present data in accordance with ethical and professional standards. [Applied Track]
- Use one or more data collection methods, such as interviews, participant observation, or surveys. [Applied Track]
- Analyze quantitative or qualitative data. [Applied Track]
- Write a sociologically-informed report that is relevant to an organization. [Applied Track]

Sociology (PhD)

The PhD program in Sociology is designed to produce independent scholars able to conduct research, teach or serve in a variety of settings. We offer comprehensive training in the knowledge and skills which constitute professional competence in the field. The curriculum is designed to equip students with a broad foundation in general sociology and in more specialized knowledge related to students' career interests in teaching, research, governmental work, or public service.

PhD students work closely with faculty as they advance in the program. The program has particular strengths in the following sub-fields of sociology:

- Urban, Environment, and Community
- Health and Medicine
- Politics, Power and Social Justice
- Global and Transnational Sociology
- Race, Ethnicity, Gender, and Sexuality
- Religion, Science, and Knowledge

Related Programs

Master's

- Sociology (MA) (p. 1661)

Combined

- Sociology (BA/MA) (p. 1361)

Curriculum

The PhD in Sociology requires 60 credit hours, comprehensive examinations, and a dissertation. Students who enter the program with a master's degree in Sociology are required to complete 30 credit hours of coursework at Loyola. The student's thesis or research paper may also be certified at this time as meeting the department's master's thesis requirement for the PhD.

Course Requirements

After the initial integrative coursework in preparation for the qualifying exams and the doctoral review, students move on more advanced coursework. This involves specialized courses, individual study, and seminars in areas relevant for the student's scholarly and professional development. These courses include classes on college-level teaching and writing for publication. Students who successfully complete the course on college-level teaching and have a master's degree are eligible to teach at the university.

Code	Title	Hours

SOCL 560	Seminar-Issues in Communities & Urban Sociology	
SOCL 580	Seminar: Issues in Medical Sociology	
SOCL 600	Dissertation Supervision	0
Total Hours		**60**

[1] In planning the more specialized phase of their graduate program, doctoral students are encouraged to take full advantage of the resources of the university and, where pertinent, to take courses in other graduate departments.

Comprehensive Examinations

Written examinations in two related special fields are normally taken after coursework is completed. Students must choose two Special Fields, or sub-fields in sociology, in which they wish to be examined. We strongly suggest that these exams be completed in the third year or the beginning of the fourth year. You may not take an exam if you have any Incompletes, or if you are on Academic Probation. The Department offers exams in several different subfields. Please consult with the Graduate Program Director or see the Graduate Student Handbook for specific details. Students may petition to take one of the two exams in another area (but not more than one) upon consultation with the Graduate Program Director. Such exceptions are not regularly granted. The only fields that will be considered are those established as sections within the American Sociological Association: http://www.asanet.org/asa-communities/asa-sections/current-sections.

The goals of the Special Field exams are to demonstrate:

- sophisticated knowledge of the development and current theoretical and empirical debates in a sub-field
- knowledge of important empirical patterns relevant to a sub-field
- the capacity for analytic writing, including the ability to marshal evidence to make claims, the capacity to make logic comparisons, and the capacity to identify gaps and issues in fields.
- the capacity to write in a clear, organized academic style, with few grammatical and spelling errors

The exam is a five-day, take-home exam, in which students answer 3 to 4 questions chosen by the committee. The questions are typically handed out on a Monday morning and completed by the end of the day on a Friday (or a similar time period). Students, who for medical, family, or work reasons, are unable to take the five-day exam, may petition the GPD to use a different exam form: a 30-40 page review that demonstrates your knowledge of the key developments and current debates in the field, key empirical patterns relevant to your field, and methodological techniques and tools commonly used in the sub-field. Students may want

to model their papers on articles in The Annual Review of Sociology and similar periodicals. Again, this option is reserved for students who have extenuating circumstances that strongly limit their ability to take the 5-day exam. The Director will provide more guidance on expectations. Under no circumstances may students answer specific questions set by the Director and Reader: the student must produce a review essay.

Dissertation

Once both comprehensive exams are passed, the next step is to prepare the **dissertation proposal**. The proposal is an important document for the candidate, for the faculty committee, and for the department. The acceptance of the dissertation proposal indicates that your committee is confident that the proposed research is highly likely to contribute original results that are important to other sociologists, under the limited time frame of graduate school. The Sociology Department requires that all dissertation proposals be defended in front of the Dissertation Committee. At Loyola, these hearings are "open," which means that members of the university, as well as family and friends, may attend the defense. The purpose of the proposal hearing is primarily to judge whether the proposal is sound enough for the research to go forward; secondarily, it is to provide constructive feedback. For more on the dissertation proposal and defense, please see the graduate student handbook.

The **dissertation** is the culmination of your doctoral program career. It will be the most sustained piece of research and writing you will have done to this point in your career, and it will serve as the basis of publications as an Assistant Professor if you are planning an academic career. A well-planned dissertation is one of the keys to success; time management is another. The Department requires a public defense of all doctoral dissertations. When your committee agrees that the dissertation is ready for defense, you will need to follow the formal procedures laid down by the Graduate School for final defense and deposition. For more information on the dissertation and dissertation defense, please see the graduate student handbook.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

This degree prepares students for research and teaching positions in the academic, government, non-profit, and for-profit sectors.

- Demonstrate knowledge of the broad theoretical orientations of the discipline. [Research learning outcome]
- Demonstrate knowledge of two empirical sub-fields in the discipline. [Research learning outcome]
- Frame sociological research questions both theoretically and empirically. [Research learning outcome]
- Select appropriate data sources. [Research learning outcome]
- Analyze and present data in accordance with ethical and professional standards. [Research learning outcome]
- Use one or more data collection methods to carry out a major research project: interviews, participant observation, surveys, or archival evidence. [Research learning outcome]
- Analyze quantitative or qualitative data with respect to sociological claims or theories. [Research learning outcome]
- Write for publication. [Research learning outcome]
- Present findings orally for lay or professional audiences. [Research learning outcome]
- Assist an instructor of record with grading, tutoring, and class presentations. [Teaching learning outcome]
- Teach as an undergraduate instructor of record, by developing the capacity to: design a syllabus; create and carry out assignments, assessments, and lectures; integrate Ignatian pedagogical techniques, including curia personalis; and reflective learning. [Teaching learning outcome]

Theology

Loyola University Chicago is home to a number of leading scholars in Christian Ethics, Systematic Theology, and New Testament/Early Christianity. Our graduate programs are designed to equip students with the resources necessary for contributing to theology as a discipline that is at once academically rigorous and creative.

Graduate Programs

- Theology (MA) (p. 1668)
- Theology (PhD) (p. 1670)

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (0 Credit Hours)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (0 Credit Hours)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (0 Credit Hours)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Theology (MA)

The MA degree program is appropriate for students seeking either a terminal degree or a degree that will prepare them to pursue a doctoral degree. Applicants can be admitted to the program on a part-time basis. Many courses are conveniently scheduled during late afternoon or evening hours.

Related Programs

Doctoral

- Theology (PhD) (p. 1670)

Combined

- Theology (BA/MA) (p. 1384)
- Theology/International Affairs (BA/MA) (p. 1388)

Curriculum

The Master of Arts in Theology requires 30 credit hours of coursework and a comprehensive examination. Students may choose to concentrate in one of the following areas: Theological Studies, Biblical Languages and Literature, Biblical Studies, or Christian Ethics. An Education minor option is also offered.

Code	Title	Hours
MA Requirements		**30**
Students may choose one of the following concentration areas. (p. 1669) Courses in the concentrations are chosen from theology course areas with the option for directed readings and independent study for particular areas of study.		
Theological Studies		
Two (2) courses in Biblical Studies Area (p. 1669)		
Two (2) courses in Systematic or Historical Theology Area (p. 1669)		
Two (2) courses in Christian Ethics Area (p. 1669)		
Four Gradute-level electives		
Biblical Languages and Literature		
Four courses in Major Biblical Language (Hebrew or Greek)		
Two courses in Minor Biblical Language (Hebrew or Greek)		
Two courses in Old Testament		
Two courses in New Testament		
One (1) course in Systematic or Historical Theology Area (p. 1669)		
One (1) course in Christian Ethics Area (p. 1669)		
Biblical Studies		
Five (5) courses in Biblical Studies Area (p. 1669)		
One (1) course in Systematic or Historical Theology Area (p. 1669)		
One (1) course in Christian Ethics Area (p. 1669)		
Three Graduate Electives		
Christian Ethics		
Five (5) courses in Christian Ethics Area (p. 1669)		
Two (2) courses in Systematic or Historical Theology Area (p. 1669)		
Two (2) courses in Biblical Studies Area (p. 1669)		
Graduate Elective		
Bioethics & Health Care Policy		
BEHL 401	Clinical Topics in Bioethics	
Two (2) courses in Christian Ethics Area (p. 1669)		
Two (2) courses in Biblical Studies Area (p. 1669)		
Two (2) courses in Systematic or Historical Theology Area (p. 1669)		

Three courses in Bioethics [1]	
Total Hours	**30**

[1] One course in Bioethics may be taken at the Neiswanger Institute.

Education Minor Option

Students seeking an MA in any of our four concentrations can pursue a minor in Education. This option is excellent preparation for those who plan to teach theology at the high school level, where candidates with a combination of academic theological training and teacher training are in high demand.

Code	Title	Hours
CIEP 414	Instructional Methods-Diverse Population	3
CIEP 423	Advanced Literacy Instruction in the Content Area	3
CIEP 425	Theory and Practice in Assessment	3
CIEP 458	Classroom Management	3

For those students who choose this option, the Theology Department will recognize two of these four required School of Education courses as fulfilling two electives in the MA program. The other two School of Education courses are in addition to the usual MA course requirements. Students frequently take these additional two courses during the summer

Concentration Descriptions

The Master of Arts in Theology requires 30 credit hours of coursework and a comprehensive examination. The following descriptions are provided to aid in choosing a concentration area:

- **Theological Studies**: emphasizes exposure to the full range of theological investigation.
- **Biblical Languages and Literature**: provides students with the initial language and biblical study necessary to apply to doctoral programs in Biblical Studies. Half of the coursework is in biblical Greek and Hebrew. Note: requires an additional 6 credit hours due to intensive language requirements.
- **Biblical Studies**: directed towards students with a particular interest in Biblical Studies, but does not incorporate the language study necessary for doctoral work in Biblical Studies.
- **Christian Ethics**: focuses on coursework in Christian Ethics with similarities to the concentration in Theological Studies for a comprehensive overall coursework.
- **Bioethics & Health Care Policy**: offered jointly with the Neiswanger Institute for Bioethics and Healthcare Leadership. This concentration is appropriate for students interested in pursuing a social ethical understanding of bioethics. Courses in this concentration address the history of bioethics including the issues of racism and eugenics; methods and approaches in medical ethics and bioethics (ethnography, narrative bioethics, feminist bioethics); and topics in bioethics such as reproductive medicine and reproductive justice, genetics, disability ethics, spiritual care ethics, end of life, and healthcare justice.

Biblical Studies Area

Code	Title	Hours
THEO 401	Tutorial in Biblical Studies	3
THEO 403	Topics in Rabbinic & Medieval Literature	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Objectives:

- Provide students with advanced mastery of theological traditions and disciplines (all M.A. programs).
- Help students aiming at a teaching career to gain pedagogical skills and excellence (especially M.A. THEO/EDU MINOR).
- Support the Jesuit Order's First Studies Program at Loyola.
- Forward the Jesuit mission and identity of Loyola University Chicago.

Assessment

1. All M.A. Students are required to take rigorous courses, giving students a solid foundation in theological traditions and disciplines. At the end of the program, each student takes a comprehensive written exam. The questions in these exams are tailored to the students' course record and interest.
2. M.A. students can participate in many of the pedagogical opportunities that we offer as a department, e.g., course design, assessment tools, etc., which are especially pertinent to the M.A. THEO/EDU MINOR students.
3. The M.A. program regularly enrolls Jesuit scholastics in a wide range of our courses as they pursue the M.A. in Social Philosophy from the Philosophy Department. Their presence enriches our classes and our diversity of students enriches the scholastics' educational breadth of experience. Occasionally, Theology faculty direct or advise their M.A. theses.
4. Our M.A. students are exposed to the many programs across the university that support the Jesuit mission, to which our department's faculty contribute. In particular, the *Healing Earth Project*, an online tool to teach environmental science in secondary schools, integrated with ethics and spirituality, allows M.A. students who will teach in high schools to excel in this area.

Theology (PhD)

The study of religion has been called a "field-encompassing field" (Clifford Geertz) in that the understanding of religion involves many disciplines. The PhD in Theology at Loyola emphasizes interdisciplinary engagement, drawing on historical, linguistic, philosophical, sociological, and literary methods, in addition to the core materials and texts of the fields of Systematic Theology, Christian Ethics, or Biblical Studies. Loyola University's doctoral program in theology is designed for those who envision a career primarily in teaching and scholarly research at an advanced level. We offer two specializations.

In our Integrative Studies in Ethics and Theology (ISET) specialization, students give particular attention to the ways in which theology (historical and systematic) and Christian ethics intersect with and influence one another in particular thinkers and with respect to concrete theological and ethical questions.

The New Testament and Early Christianity specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

Related Programs

Master's

- Theology (MA) (p. 1668)

Combined

- Theology (BA/MA) (p. 1384)

Curriculum

The PhD in Theology can be pursued in one of two areas of study: Integrative Studies in Ethics and Theology or New Testament and Early Christianity.

Integrative Studies in Ethics and Theology Requirements

The PhD in Theology with a concentration in Integrative Studies in Ethics and Theology requires 30 credit hours of coursework, two research tools (typically two modern languages), a comprehensive examination, and dissertation. Students must complete a master's degree (30 credit hours) before entering the PhD program; the courses listed below are required for the PhD.

The program in Integrative Studies in Ethics and Theology (ISET) represents an effort to rethink the riches of the Christian theological tradition to meet the intellectual, societal, and ethical challenges that confront humanity in the 21st century. In their studies and research, students give particular attention to the ways in which Christian theology and ethics interrelate and mutually inform one another.

ISET-ETHICS Required Courses

[1] The ISET seminar is taken during the Spring semester of the first two years of PhD coursework. Please consult with the GPD regarding the courses which will fulfill the ISET requirement.

Language Requirements

Students who want to pursue the specialization in Integrative Studies in Ethics and Theology must be able to demonstrate a reading knowledge of French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in one of the other two modern languages (or, in the case of Theology, a language pertinent to the intended dissertation topic) before the beginning of their third year of doctoral study.

New Testament and Early Christianity Requirements

The New Testament and Early Christianity specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

The PhD in Theology with a concentration in New Testament and Early Christianity requires 36 credit hours of coursework, demonstrated competency in four languages (Greek, Hebrew or Latin, and two modern languages), a comprehensive examination, and dissertation. Students must complete a master's degree (30 credit hours) before entering the PhD program; the courses listed below are required for the PhD.

Select Five Electives [1]		*15*
Total Hours		**36**

[1] Two (2) of the five (5) electives may be used for language remediation if needed.

Language Requirements

Students who want to pursue the specialization in New Testament and Early Christianity must be able to demonstrate a reading knowledge of Greek and either French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in Hebrew or Latin and one additional language before the beginning of their third year of doctoral study. German must be one of the modern languages. Modern languages courses taken to fulfill this requirement do not count towards the degree.

Comprehensive Exams

All PhD students complete comprehensive doctoral exams.

The doctoral exam for Integrative Studies in Ethics and Theology takes place over three days. The first two days of comprehensive exams cover the student's area of focus, either Ethics or Theology, but the third day is integrative. Each student chooses one of two options: to compare two figures in depth - one working primarily in Christian ethics and one working primarily in Theology or Bible; or to focus around a particular theme and propose authors working on this theme to read and prepare

The New Testament and Early Christianity written exams take place over three days. Day one consists of translation, textual criticism, and exegesis of a Greek text from the NT or other early Christian literature. Day two consists of questions related to a large cross section of reading outside the New Testament from 200 BCE to 200 CE. Day three consists of material chosen by the student as their "minor area" and is usually preparation for the student's dissertation research. These three days of writing are followed by an oral defense, usually during the week following the written exams.

Dissertation

Students will develop a dissertation field within their specialization. Following the successful completion of doctoral examinations and the portfolio requirement, students will make a presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation.

Following approval of the dissertation proposal and the successful completion of all other degree requirements, students are admitted to PhD candidacy. Once students have advanced to candidacy, they will enroll in THEO 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation.

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Doctoral Program, Objectives, Criteria, and Assessment

The objectives for the doctoral program, and the criteria by which we propose to assess them, include the following:

- Train students to develop sophisticated knowledge of theological traditions and disciplines.
- Train students to produce high-quality, original research.
- Mentor students to develop pedagogical excellence.
- Prepare students for positions in academic, ministry, non-profit, and other venues.
- Forward the Jesuit mission and identity of Loyola University Chicago.

OBJECTIVE 1: Train students to develop sophisticated knowledge of theological traditions and disciplines.

CRITERIa:

1. Excellence in coursework
2. Successful passage of comprehensive exams
3. Successful defense of dissertation

ASSESSMENT:

1. The Department has a standard process of oversight through the GPD, the advisors and exam committees.
2. Comprehensive exams, written and oral, based on the rubrics found in the Appendices, must be passed by all doctoral students (see Appendix 17: Theology Department Comprehensive Exam Rubric for Ph.D. in ISET and Appendix 18: Theology Department Comprehensive Exam Rubric for Ph.D. in NT/EC).
3. In the research and writing phase of the dissertation assessment takes place under the close and formalized supervision of the director and readers.

OBJECTIVE 2: Train students to produce high-quality, original research.

CRITERIA:

1. Doctoral curriculum
2. Mentoring of students' scholarly research
3. Scope and methods of research and dissertations
4. Publication record

ASSESSMENT:

1. Taught and mentored by internationally and nationally recognized faculty, doctoral students begin training in research during the coursework portion of their program. They receive guidance in researching and writing scholarly papers, and they are offered numerous extracurricular lectures, colloquia, advanced seminars, individualized reading and research opportunities, etc. Doctoral students on assistantships serve as research assistants to the members of the graduate faculty.
2. Under supervision and mentoring of faculty, doctoral students develop their own research, often emerging from their coursework, which they present at national and international conferences.
3. The department's students engage in wide-ranging topics of theology and ethics, history, and biblical studies. The Loyola Theology Department distinguishes itself from peer institutions by its commitment to interdisciplinary methods, integrating biblical, theological and ethical reflection with literary theory, social and political theory, or medical sciences, among others. The interdisciplinary, interreligious, intercultural, and international focus is reflected in the Loyola students' interests.
4. Many of our students have a strong record of publishing peer-reviewed articles, and/or chapters in edited books, even before graduation. Some students have served as co-editors of books with faculty members. A significant number of dissertations produced by our graduates are later published as monographs; since 2011, at least 27 of our PhD graduates have had their dissertations published; the rate has increased significantly over the previous ten years. Several students have been awarded external prizes and internal and external fellowships, including a Fulbright. (See Appendix 19: Information on Recent Graduates of the Loyola University Chicago Department of Theology Doctoral Program.)

OBJECTIVE 3: Mentor students to develop pedagogical excellence.

CRITERIA:

1. Pedagogical training and experience
2. Teaching excellence

ASSESSMENT:

1. Pedagogical training is integrated into the doctoral course of study. All doctoral students participate in two theological pedagogy courses. Most of our doctoral students serve as teaching assistants for at least two semesters, offering support to full-time faculty members teaching core, in offering lectures, running discussion sessions, and in grading. Most after completion of doctoral exams teach one or more sections of courses offered to our undergraduates. All doctoral students on assistantship take the Teaching Effectiveness Seminar through the Graduate School during the year in which they begin teaching as a teacher of record, and all those who are serving as a teacher of record for the first time are assigned a full-time faculty member as a teaching mentor, to help guide syllabus and curriculum preparation (see Appendix 20: Theology and Religious Studies Pedagogy).
2. Teaching excellence is promoted and assessed via departmental practices: all teachers of record are evaluated by their students, and their faculty mentors perform classroom visits and provide evaluations.

OBJECTIVE 4: Prepare students for positions in academic, ministry, non-profit, and other venues

CRITERIA:

1. Strength of mentoring relationships between faculty and students
2. Strength of professional development programs for students
3. Reasonable time to completion of doctoral degree
4. Placement record of graduates in various career paths

ASSESSMENT:

1. Through intense and strong mentorship, the high ratio of graduate faculty to students, and three endowed chairs whose teaching obligations are dedicated primarily to the doctoral program, students gain sophisticated mastery of theology, ethics, and / or New Testament & Early Christianity studies; and they are prepared to become experts in their field of specialization. The quality of mentoring is assessed through written reports by students and faculty and through regular section meetings.
2. The main professional development occurs across the entire range of coursework, exam preparation and dissertation research and writing. In addition, we offer workshops on publishing and on presenting papers at conferences and we strongly support our students'

membership in national and international academic societies (AAR, CBA, CSBR, CTA, CTSA, SBL, SCE, SE etc.).

3. The Department of Theology has significantly reduced its average time to degree completion in the years 2013-2017, compared to the previous five-year period (2008-2012). However, in previous years the department admitted not only students with full fellowships, but also unfunded and part-time students. Some of these took much longer to complete their degree. (See Appendix 19: Information on Recent Graduates of the Loyola University Chicago Department of Theology Doctoral Program.)
4. In a changing job market, the doctoral program recognizes our graduates need to be prepared for academic careers while enabling them to pursue alternatives to a tenure-track position in a university. Therefore, careers such as non-profit management, publishing, academic administration, or leadership positions in healthcare, and ministry are receiving more attention than in the past. (See Appendix 21: Department of Theology Placement Statistics, Ph.D. Program, 2013 – 2018.)

OBJECTIVE 5: Forward the Jesuit mission and identity of Loyola University Chicago

CRITERIA:

1. Contribution of doctoral programs
2. Contribution of department's widespread support of Jesuit identity and mission

ASSESSMENT:

1. The Jesuit Order is committed to a broad range of values: social justice, solidarity, and ecological sustainability. Doctoral level courses stress these commitments, and the department encourages and engages students in multiple services that resonate with the Jesuit mission, both on and off campus. Some of our graduates have gone on to teach in Jesuit universities and colleges, and at least two currently serve as chairs of AJCU departments of theology. In the last few years a number have taken teaching positions at Jesuit high schools.
2. Our department's faculty contribute to numerous programs across the university that support the Jesuit mission, such as the Peace Program, Environmental Studies, Human Rights of Children, and Bioethics. Our faculty are responsible for the core teaching of Catholic theology as well as religious studies. The engagement with diverse cultures, Christian confessions, and religions of the world has long been a hallmark of the Jesuit mission. Our doctoral students share this vision and are trained in translating it into their research and teaching.

Women's Studies and Gender Studies

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention. It is also an intimate community where students build strong bonds with each other and with their faculty.

Graduate Programs

- Gender Studies and Migration for Social Justice Online Certificate (p. 1675)
- Women's Studies and Gender Studies (MA) (p. 1676)
- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 2264)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing a teaching or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (0 Credit Hours)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (0 Credit Hours)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Gender Studies and Migration for Social Justice Online Certificate

The Certificate in Gender Studies and Migration for Social Justice is a fully online certificate offered in collaboration with the School of Social Work. This post-graduation opportunity is intended for new students not already enrolled in programs at Loyola University Chicago, particularly, individuals working in professional settings such as social work, nursing, education, public policy, and non-governmental organizations among other academic/professional fields.

In our increasingly global world, migration issues have assumed a front and center position. Gender influences reasons for migrating, who migrates and to where, how people migrate and the networks they use, opportunities and resources available at destinations, and relations with the country of origin. Risks, vulnerabilities and needs are also shaped in large part by one's gender expression. Yet we believe that the emphasis should not be on biological sex or on women migrants alone. On the contrary, the awareness that sex and gender are not fixed categories or the product of biology should encourage the development of migration theories and social practices aimed at revealing and dismantling the relationships of power that have shaped such social constructions. The roles, expectations, relationships and power dynamics associated with being a man, woman, boy or girl, and whether one identifies as lesbian, gay, bisexual, transgender, queer, and/or intersex (LGBTQI+), significantly affect all aspects of the migration process, and can also be affected in new ways by migration.

The certificate combines the expertise and practice of faculty in Women's Studies and Gender Studies and the School of Social Work. Its goal is to make accessible theoretical tools of decolonial feminism, which seeks to deconstruct normalized Western gender concepts, with the goal of

re-introducing indigenous and postcolonial worldviews of gender into feminist discourse, and contemporary gender studies for social justice from global perspectives.

The certificate program directly tackles the societal challenge of addressing the needs of immigrant populations, particularly with respect to issues of gendered agency, racial and sexual discrimination, and sexual identity. It also stands to have an impact on the promotion of global and community partnerships.

Related Programs

Master's

- Women's Studies and Gender Studies (MA) (p. 1676)

Combined

- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 2264)

Curriculum

The Certificate in Gender Studies and Migration for Social Justice requires 12 credit hours and is offered online year-round.

Code	Title	Hours
Required Courses		
WSGS 401	History of Feminist Thought	3
WSGS 450	Global Feminisms	3
SOWK 732	Migration, Social Justice, and Human Rights	3
WSGS 460	Migration, Identity, Sexuality	3
Total Hours		**12**

These courses are intended to foster students' recognition of how the struggle for gender justice is connected to larger social, economic, political, and cultural forces, local & global.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students completing the program will be able to:

- Implement key theoretical concepts in the study of "borders," identity politics, trans-nationalism, and sexuality from an intersectional and de-colonial lens.
- Demonstrate cultural competency in critical theory and familiarity with key issues in different disciplinary realms, such as race theory, migration, diaspora, masculinity studies, transnational studies, Queer theory, film, and visual studies.
- Advocate for humane policies regarding immigration grounded in an understanding of gender expression and social justice animated by Ignatian principles.

Women's Studies and Gender Studies (MA)

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention.

Certificate

- Gender Studies and Migration for Social Justice Online Certificate (p. 1675)

Combined

- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 2264)

Curriculum

The Master of Arts in Women's Studies and Gender Studies requires 30 credit hours of courses plus a capstone project (WSGS 599).

Code	Title	Hours
Required Courses		
WSGS 401	History of Feminist Thought (Offered every fall)	3
WSGS 402	Foundations of Women's Studies (Offered every spring)	3
One Global Feminisms course [1]		**3**
WSGS 450	Global Feminisms	
Select seven elective courses [2]		**18**
WSGS 460	Migration, Identity, Sexuality	
WSGS 455	Feminist Pedagogy	
WSGS 470	Sexual Assault Advocacy	
WSGS 475	Masculinity Studies: Equity, Race, Transformation	
WSGS 480	Queer Theory	
WSGS 497	Topics in Women's Studies and Gender Studies	
WSGS 498	Practicum	
WSGS 499	Independent Study	
WSGS 595	Thesis Supervision [3]	0
WSGS 500	Thesis Research	3
Total Hours		**30**

1. The third core requirement is a course that explores feminism/gender in a global dimension; a number of different courses can satisfy this requirement.
2. Some graduate level electives are offered through other departments, including English, History, Philosophy, Sociology, Political Science, Theology, Communications, Law, and Social Work. Students must select three electives to apply to a track of study (detailed below).

[3] WSGS 500 Thesis Research and WSGS 595 Thesis Supervision are taken by students who elect to write a thesis for the MA rather than a capstone.

Tracks of Study

Students must choose one of the following concentration tracks for at least three of their electives. Dual-degree students will not be required to choose a concentration beyond their dual degree, but they may organize their electives around a concentration if they choose.

- Global and Transnational
- Gender and Violence
- Bodies and Sexualities
- Religion and Ethics
- Expressive Arts
- Self-designed concentration (must be approved by the Graduate Program Director based on a written statement explaining the merits of the proposed course of study)

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon graduating, Graduate Women's Studies and Gender Studies students will be able to:

- Identify major influences within key historic feminist/gender studies movements. These influences may include activists, authors and/or writings, or legislation both in and outside the US.
- Articulate and understand how women's and gender studies is a distinct and fundamental field of study intimately connected to other interdisciplinary academic disciplines.
- Evaluate, compare, and analyze gender and feminist theories and methodologies from both an intersectional and social justice lens.
- Identify and examine the intersections of identities (e.g., gender, race, ethnicity, class, sexuality, nationality, etc.) and assess the ways in which they contribute to instances of privilege and power dynamics across global cultures, space, and time.
- Conduct research by privileging Feminist, Queer, and/or other Gender Studies methodologies.

Communication

Located in one of the world's top communication centers, Loyola University Chicago provides an ideal setting for integrating study with practical application in the expanding fields of advertising, advocacy, digital media, film, multimedia journalism, public relations, and other areas of communication.

Students benefit from a distinguished scholarly faculty of experienced communication professionals in journalism, media studies, documentary film production, cultural communication and public advocacy.

Loyola's School of Communication offers state-of-the-art on-site production facilities, labs, and equipment, as well as proximity to Chicago's vast production community. Loyola is home to WLUW, a 24-hour FM radio station, *The Phoenix*, an award-winning student newspaper, and an extensive internship program.

The study of communication is one of the primary means for promoting the traditional goals of liberal education: understanding political rhetoric and social justice, participating in media advocacy and developing an ethical sensitivity so necessary in our time. Students at Loyola's School of Communication learn not just how to get a message out, but how to think critically and communicate ethically.

Graduate Programs Communications (COMM)

COMM 400 Designing for Digital Environments (3 Credit Hours)
Students will learn about the design and usability of websites from several perspectives: how they look, how they work, and how they are made. Students must be enrolled in the graduate program for MC in Digital Storytelling.
Outcomes:
Students will how stories are told through new media, understand how to analyze and critique them and create digital artifacts that demonstrate their role as effective and ethical producers and users of new media

COMM 401 Foundations of Global Strategic Communication (3 Credit Hours)
This course delves into two areas impacting communicators' success in the global arena: new media and culture. Through a blend of class discussions, interactive activities and guest speakers, students will study frameworks for strategic communication in a global environment and then apply these lessons in group and individual projects. Enrollment limited to students in GSCM-MS Program. Students are expected to understand fundamental concepts in strategic communication, be able to identify and explain the role of strategic communication in the global business context, understand the importance of dialogue and engagement, and have the ability to construct effective messages.

COMM 402 Organizational Leadership and Change Management (3 Credit Hours)
Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders. Enrollment limited to students in GSCM-MS Program. Students are expected to gain knowledge and leadership skills needed to help organizations chart a successful course through change. They are also expected to understand the major drivers of organizational change; the role leadership plays in anticipating, planning and navigating organizational change.

COMM 403 Strategic Communication Research Methods (3 Credit Hours)
This course is designed to provide students with a critical framework for evaluating communication research and first-hand experience in the research process. Specifically, we will examine how research questions, originating from client-specific interests, are translated into a research project. Enrollment limited to students in the GSCM-MS Program. Students are expected to know how to read and evaluate a research study, select appropriate research questions, develop measurements, draw a sample, collect and analyze data and interpret the results.

COMM 405 Story Development and Production (3 Credit Hours)
This course will give students a basic understanding of narrative theory and its evolution. It will also emphasize the idea that telling a good story begins with having something to say and a purpose for telling it to someone. Students must be enrolled in SOC Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will read, write and practice narrative techniques on electronic modes of communication while learning about narrative structure, content and form of delivery

COMM 406 Environmental Advocacy (3 Credit Hours)
Pre-requisites: COMM 100 and sophomore standing; Digital Media & Storytelling (DMST* Masters students and any students majoring in SES may also enroll
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Course equivalencies: XCOMM306/ESP 329/PAX 329
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the U.S. environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 409 Video Production Lab (3 Credit Hours)
This six-week graduate course is designed as an entry-level introduction to the foundational concepts and techniques in video, audio, and editing production. This class prepares students with little to no prior experience in video and audio production to readily participate in the Digital Media and Storytelling (DMST) master's program. Students with some or greater knowledge in this field will also have the opportunity to expand their prior knowledge as the course focuses on developing practical skills to effectively capture and edit video and audio elements to create compelling visual narratives. Students will be provided access to industry- standard tools while learning how to shape stories using best practices in media production. Throughout the course, students will explore the fundamentals of video production, including camera operation, sound recording, and editing software using Adobe software. Emphasis will be placed on hands-on experience, with each student producing and editing short video projects that integrate both visual and audio storytelling techniques.
Outcomes:
Demonstrate proficiency in operating digital video cameras and audio recording equipment to capture high-quality footage and sound for storytelling purposes; Apply fundamental techniques of video composition, including framing, lighting, and shot sequencing, to create visually compelling narratives; Utilize industry-standard editing software, such as Adobe Premiere Pro, to edit and assemble video and audio elements into coherent short-form productions; Implement basic audio post-production techniques, including dialog editing, sound effects creation, and mixing, to enhance the overall quality of video projects; Develop and execute a complete video production workflow, from pre-production planning to final delivery, demonstrating an understanding of storytelling principles and best practices in digital media production

COMM 410 Media Law for Inclusive Digital Storytelling (3 Credit Hours)
This course addresses how courts and lawmakers have addressed legal issues presented by digital media. Students must be enrolled in Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will learn some of the ways that blogger's rights, intellectual property, libel, privacy and threats pose challenges to internet legal regulations and social ethics

COMM 411 Strategic Communication Ethics and Law (3 Credit Hours)
This course explores various approaches to ethical decision-making and applies them to diverse aspects of strategic communication in professional settings. Students will learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various business situations, and clearly explain their analyses. Enrollment is limited to students in the GSCM-MS Program. Students will have learned fundamental ethical principles and decision-making processes, examined some of the most pressing ethical issues facing strategic communicators and applied course material to specific strategic communication decisions.

COMM 412 Communication Content Mining and Analytics (3 Credit Hours)
This course is for students interested in learning practical data analysis/data mining techniques in strategic communication. A useful takeaway from the course will be the ability to perform powerful data analysis using popular statistic packages (e.g., R, SPSS, Excel) and web analytics (e.g., Google Analytics). Enrollment limited to students in the GSCM-MS Program. Students are expected to increase their critical thinking ability to assess the quality of consumer information and the limitations of online data. They will become familiar with frequently used data analysis tools.

COMM 413 Writing for Strategic Communication (3 Credit Hours)
This advanced writing intensive course engages students in the strategic process of professional-level writing by focusing on communication objectives, cultural differences among audiences, techniques, style and mechanics. Students will learn the importance of planning, research, pre-writing, editing and rewriting in the writing process. Restricted to Global Strategic Communication Students
Outcomes:
The course also provides practical, real world writing experience in diverse formats for a wide range of audiences, including memos, proposals, creative briefs, executive speeches, op-eds, fact sheets, news releases, blogs and other social media

COMM 414 Advertising Campaigns (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
In this Advertising Campaigns class, students will explore the profound impact of rapidly evolving technologies on modern advertising practices. The course examines how changing media consumption behaviors have transformed consumer journeys from linear patterns to complex, interconnected experiences driven by micro-moments and personal intents. Students will critically analyze traditional advertising agency models, identifying why many long-standing practices are becoming obsolete in today's digital landscape. The class will challenge participants to rethink creative processes and develop innovative approaches that align with current market demands and communication goals. Through collaborative projects and discussions, students will work to bridge the gap between conventional advertising wisdom and the realities of the digital age. The course emphasizes the need for original thinking and adaptability in crafting effective campaigns that resonate across various touchpoints in consumers' lives.
Outcomes:
Analyze the impact of changing technologies on consumer behavior and media consumption patterns; Evaluate traditional advertising models and identify areas for innovation in the digital age; Develop strategies to engage consumers across multiple touchpoints throughout their non-linear consumer journey; Create data-driven, intent-based advertising campaigns that resonate with target audiences in their micro-moments; Design integrated campaigns that seamlessly blend traditional and digital advertising approaches; Apply critical thinking skills to assess and adapt campaign strategies in response to rapidly changing market conditions

COMM 415 Data-Powered Digital Storytelling (3 Credit Hours)
This course focuses on how and where to discover compelling story ideas utilizing investigative methods to cultivate original points of view for digital presentations.
Outcomes:
Students learn to use records and data mining techniques to analyze information and cultivate stories to be told in digital formats

COMM 417 Media Planning (3 Credit Hours)
This course examines the advertising and marketing processes required to research, develop and implement an effective media plan for budgeting appropriate advertising time and space. Only BASD-ADPR and MS-GSCM students may enroll.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies and tactics to construct an advertising media plan

COMM 420 Digital Production: Storytelling with Impact (3 Credit Hours)
This lab-based course will introduce students to production techniques for digital storytelling. Students will acquire knowledge of videography, sound recording, video and audio editing, web design and interactivity.
Outcomes:
Students will find compelling stories, set scenes and use narrative techniques to craft influential stories designed for professional purposes in advertising, journalism or documentary production

COMM 421 Topics in Global Strategic Communication (3 Credit Hours)
This course will offer in-depth reading, case studies, and discussion in specialized areas dealing with current issues in global strategic communication. Enrollment limited to students in the GSCM-MS Program. Students will develop in-depth knowledge of a current issue or opportunity in global strategic communication, become acquainted with how and where local strategic communicators work, and examine the differences and similarities in how strategic communication is defined and practiced in different countries.

COMM 422 Global and Multicultural Audiences and Stakeholders (3 Credit Hours)
In this course students will investigate various audiences in today's global marketplace that organizations need to consider to remain relevant. The course will explore the concept of globalization and how, as a dynamic and uneven process, it requires practitioners to understand global and local audiences and those influenced by multiple cultures. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
The goals of the course are to learn to be sensitive to a variety of cultures; recognize particular values, needs, and behaviors; and craft messages that connect and engage

COMM 425 Digital Marketing and Analytics (3 Credit Hours)
This course will explore online audience behavior and measurement. Students will use analytics to understand user activities and to drive improvements in distribution performance. In the course of their development, students will come to understand intellectual property protection, self-publication, bandwidth issues, usability, file formats, social sharing, security, syndication and mobile delivery.
Outcomes:
Analyze digital audience behavior using analytics tools to inform marketing strategies and content distribution decisions; Evaluate the legal, marketing, and economic factors affecting digital content distribution and audience targeting; Implement data-driven strategies to improve digital content performance and audience engagement across various platforms; Design digital marketing materials that comply with intellectual property laws and address security and usability concerns; Optimize digital content for multi-platform delivery, with a focus on mobile and social media channels, considering bandwidth and file format implications

COMM 426 Strategic Business Communication for Social Impact (3 Credit Hours)
The strategic simulation class setting will engage the students in the imaginary leadership role to exercise how to make an ethical decision on the issues and challenges. This incorporates a mix of lectures, case discussions, role-playing, and group projects in real-world applications.
Outcomes:
Apply fundamental principles of communication in different organizational contexts\\n; Demonstrate ability to write and present effectively, considering audience and purpose; Understand and address critical challenges during crises; Identify communication solutions to foster a positive team culture through employee communication; Leverage ethical communication in decision-making and problem-solving; Navigate cross-cultural and global communication issues and differences

COMM 429 Advertising and Public Relations Design (3 Credit Hours)
This course is for students who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio. Restricted to GSCM-MS students.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 430 2D Design for Print and the Web (3 Credit Hours)
This course will focus on visual theory, graphic design, photo editing, and web design. Restricted to Masters students enrolled in the Digital Media & Storytelling Masters program.

COMM 431 Campaign for Social Impact (3 Credit Hours)
This course empowers students to design, implement, and evaluate digital campaigns using Integrative Marketing Communication (IMC) principles with a strong emphasis on community service and engaged learning. Students will work on hands-on projects that address real-world community needs, applying research, planning, implementation, and evaluation strategies. Through case studies, client campaigns, and community-based initiatives, students will build a portfolio of projects that not only enhance their professional skills but also contribute positively to the community and society.
Outcomes:
Develop and manage online content promotion and branded digital campaigns to promote community-based initiatives and social causes; Apply critical thinking and research skills to craft clear messages and digital materials for social good; Execute social media engagement and user-oriented content strategies; Evaluate campaign success by setting the key performance indicators (KPIs) to assess the effectiveness of campaigns and their impact on community improvement; Engage in a cycle of practice, feedback, and refinement to develop transferable skills while making meaningful contributions to community projects

COMM 432 Public Interest Communication (3 Credit Hours)
This course explores the principles and best practices of strategic communication aimed at achieving lasting, positive social change in various areas, including climate change, racial justice, healthcare access, and housing policy. This interdisciplinary program draws from practice and scholarship in public relations, journalism, advertising, psychology, sociology, political science, anthropology, and neuroscience. This course is custom-tailored for current and future communications directors at a nonprofit organization or a media relations officer at a foundation being an account executive at a strategic communications firm.
Outcomes:
Identify and target issues that can be addressed with public interest communications; Conduct research to underpin strategic communications aimed at driving social change; Use systems thinking to identify a specific approach to driving change; Develop strategic communication initiatives that can drive positive social change; Advocate and advise in the use of visual collateral that can best reach the target community

COMM 433 Corporate Communication (3 Credit Hours)
Pre-requisites: For GSCM-MS students, COMM 401; DMST-MC students may also enroll without pre-requisite
This course develops a multiple stakeholder approach to managing the communication function in corporations. Management topics include developing a communication plan, budgeting, creating a communications calendar, working with agencies and other external resources, project management and evaluation.
Outcomes:
At the end of the course, students are expected to understand how the communication function is organized in corporations and non-governmental organizations (NGOs)

COMM 434 Business-to-Business Communication (3 Credit Hours)
The robust business-to-business (B2B) sector provides enormous opportunity in the global marketplace. This course will explore B2B's unique set of challenges that strategic communicators need to consider in developing and delivering effective messages. Restricted to Global Strategic Communication Students.
Outcomes:
Students are expected to gain a working knowledge of the theories, concepts, and issues of in B2B communication

COMM 435 Public Affairs and Issues Management (3 Credit Hours)
The course explores how to predict and identify emerging issues, which can proliferate rapidly through digital and social media; accurately assess the potential threat posed by issues; and plan and implement effective response to prevent issues from growing into crises. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students will understand the role of the public affairs function in organizations, know how to monitor for and identify emerging issues and to build a firewall to make organizations less vulnerable to attack

COMM 436 Social Media Crisis Communication (3 Credit Hours)
This course focuses on realistic social media issues and crisis cases and students' practices on how to respond to fast-paced information on multiple social media channels and to create effective responses. This course is custom-tailored for current and future PR managers, digital specialists, community managers, and others who need to have a high degree of public visibility and responsibility.
Outcomes:
Master crisis communication theories; Identify different types of crises; Successfully manage social media during a crisis; Develop key messages and identify and implement the preemptive and responsive strategies; Train yourself as a spokesperson

COMM 437 Advertising/PR Multimedia Commercial Production (3 Credit Hours)
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll. Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts.
Course equivalencies: COMM 337/COMM 437

COMM 438 Search & Display Advertising (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course covers the enduring foundation of digital advertising --- Search Advertising and Display Advertising, which is a part of the bigger scope called programmatic advertising. Students will be exposed to 1) fundamental concepts in search and display advertising, 2) hands-on practices on creating both search and display advertising campaign, and 3) evaluation skills in optimizing search & display advertising campaigns. This course is mostly built upon Google's advertising products. However, the fundamental logics, once acquired, can be applied to all forms of paid ads in digital space.
Outcomes:
Knowledge of the key terms and development process of search & display advertising; Knowledge of the various factors that could influence the success of search & display campaigns; Ability to develop and implement search & display advertising campaigns; Ability to evaluate and optimize for search & display advertising campaigns; Analyze and interpret complex campaign data using industry-standard analytics tools to drive performance improvements; Integrate search and display advertising strategies with broader digital marketing efforts for cohesive brand messaging and improved customer journey mapping

COMM 439 Video Documentary (3 Credit Hours)
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods. Restricted to students in the DMST-MS program.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 441 Global Strategic Communication Capstone (3 Credit Hours)
Students will synthesize & apply knowledge and skills from previous courses to demonstrate competence in a specialized area of strategic communication of greatest interest to them. Students will submit a comprehensive work, research project, media artifact, business plan, or any other comparable work approved by the instructor. In addition, students will develop fully annotated & professional quality final presentation. Enrollment is restricted to students in the GSCM-MS Program. Students are expected to become more knowledgeable in an area of specialization by exploring a specific type of strategic communication, engaging in research, building relationships with professionals and developing creative applications to demonstrate professional-level knowledge, understanding of practices, skills & competencies.

COMM 444 Social Media Advertising (3 Credit Hours)
This course covers the latest theories and practices of social media advertising. Students will be exposed to 1) evolving concepts and theories related to social media advertising, 2) case studies that discuss the strategies of social media campaigns, and 3) hands-on practices of digital technologies to implement social media campaigns. Only students in the BASD-ADPR and MS-GSCM programs can enroll.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Knowledge of theories relating to social media advertising, ability to create strategic plans on social media, skills for digital technologies in social media advertising campaigns, and understanding social media advertising ethics

COMM 445 AI in Advertising (3 Credit Hours)
Pre-requisites: COMM 211 or enrollment in the Global Strategic Communication (MS) program
This course explore what is AI, how it¿s been applied in various stages and aspects of advertising, and be creative in using artificial intelligent technologies to create better advertisement and consumer experiences.
Course equivalencies: X - COMM 335 / COMM 445
Outcomes:
Students will learn the fundamental of logics of AI technologies, and its implications in various aspects of advertising

COMM 448 Advanced Storytelling (3 Credit Hours)
Pre-requisites: Restricted to MC-DMST students only
This course enhances students' abilities to craft compelling non-fiction, longform narratives. Building on foundational storytelling skills, students learn advanced techniques of topic selection, story structure, and character development. The course emphasizes a self-directed approach, encouraging students to manage projects from initial ideation through completion. By the end of the course, students will have developed original content that reflects their personal interests and creativity.
Outcomes:
Produce a longform, non-fiction narrative that demonstrates advanced storytelling techniques, including effective topic selection and story structure; Create multi-dimensional characters that enhance the narrative and engage the audience, employing advanced character development strategies; Plan and execute a self-directed storytelling project from initial ideation through to completion, demonstrating effective project management skills; Articulate the creative process behind their original content, including the challenges faced and solutions implemented during project development; Evaluate and critique both their own work and that of peers, identifying strengths and areas for improvement in non-fiction storytelling techniques

COMM 449 Capstone Seminar (3 Credit Hours)
Pre-requisites: COMM 400
Capstone Seminar is designed to equip students with the necessary skills, knowledge, and strategies to successfully complete their culminating capstone project. This course focuses on project planning, development and execution. Students will develop a clear project proposal, enhance their research and critical thinking skills. Through workshops, peer feedback, and faculty guidance, students will develop their capstone project idea and establish timelines. By the end of this course, students will have a solid foundation to confidently begin their capstone project.
Outcomes:
Students will develop skills in project planning and time management, including setting timelines, defining objectives, and coordinating resources for their capstone project; Students will analyze and critique various forms of digital media, understanding their impact on audiences and the techniques used to create them; Students will conduct research relevant to their capstone project, utilizing academic and industry sources to inform their work; Students will understand and apply ethical principles in digital media production, including copyright, privacy, and representation; Students will complete a proposal or preliminary work that prepares them for successful execution of their capstone project; Students will engage in self-assessment and reflection on their learning experiences, identifying strengths and areas for improvement as they prepare for their capstone

COMM 450 Capstone II (3 Credit Hours)
Pre-requisites: COMM 400, 405, 410, 415, 420, 425, and 430
This course involves integration of new media tools and storytelling, culminating in a professional project that is conveyed to public audiences and widely distributed.

COMM 455 Animation (3 Credit Hours)
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works. Only DMST-MC students may enroll. All pre-requisites are waived.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 458 Newscasting and Producing (3 Credit Hours)
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 358/COMM 458

COMM 459 Advanced Post Production (3 Credit Hours)
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms. Restricted to students in the DMST-MC program.
Course equivalencies: X-COMM359/459/IFMS359
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 461 Health Communication (3 Credit Hours)
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work. Only MS-GSCM and ADPR BASD students may enroll.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 462 Health Literacy & Digital Technology (3 Credit Hours)
This course explores a deeper understanding of the potential of digital communication tools to improve health literacy and contribute to better health outcomes across the full spectrum of healthcare. This course prepares these students to enter a local health department, community organization, or government agency, and global health communication PR consultancy, which contributes to health communication research, patient counseling, materials design, and program management.
Outcomes:
Be skilled in analyzing, interpreting, and communicating complex health concepts across a wide range of media platforms, equipping them to effectively manage health communication in a digital landscape; Describe and assess the ecological factors that affect health literacy; Assess the potential for digital technologies to either bridge or deepen health inequities based on factors such as age, education, socio-economic status, and geographic location; Evaluate the role of digital health interventions in addressing health system deficiencies, particularly in underserved or remote areas, and understand the challenges related to infrastructure and accessibility; Monitor and evaluate the utilization and impact of digital health technologies across different social groups to ensure that the benefits of digital health are equitably distributed; Develop communication interventions that leverage digital technologies to improve health equity, ensuring that these innovations do not reinforce existing social and health inequities

COMM 463 Intermediate Advertising Design (3 Credit Hours)
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print and for client presentations. Only students in the BASD-ADPR , MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 464 Mobile Advertising (3 Credit Hours)
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 465 Advertising & Public Relations Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course empowers students with the essential skills to conduct and evaluate business research, a critical component of informed decision-making in today's dynamic market environment. Students will master a diverse array of research methodologies and techniques, learning to design and execute professional-grade projects, analyze complex market dynamics, and utilize both qualitative and quantitative methods. By the course's conclusion, participants will be adept at conducting rigorous, actionable research tailored to specific business objectives, as well as critically assessing the validity and applicability of existing studies. Through hands-on projects and interactive learning experiences, students will develop the analytical prowess to transform raw data into strategic assets, cultivating a research mindset that is indispensable for driving business growth, innovation, and evidence-based decision-making in the modern, data-driven business world.
Outcomes:
Understand market research basics and importance; Develop research objectives and questions; Distinguish research types: exploratory, descriptive, causal; Create research plans/proposals; Conduct secondary research effectively; Perform qualitative primary research (focus groups, observation, mystery shopping); Develop effective surveys; Apply proper sampling techniques; Implement various survey distribution methods; Organize data and perform statistical analysis; Communicate research results through appropriate reporting tools; Create comprehensive primary research reports

COMM 466 Advanced Quantitative Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course is students to get familiar with sophisticated statistical techniques and data analysis procedures in conducting academic research in the field of advertising. The course will cover topics such as experimental design, survey design, regression analysis, moderation analysis, mediation analysis, structural equation modeling, and longitudinal data analysis. Hands-on sessions using statistical software (e.g., SPSS) will be integral, allowing students to gain practical experience with real datasets. The course will culminate in a final project where students will apply learned methods to a research question of their choice, fostering skills in research design, data analysis, and scholarly communication.
Outcomes:
Understand and apply advanced statistical methods in research; Proficiently use statistical software for data analysis; Design and execute quantitative research studies; Interpret and critically evaluate quantitative research findings; Communicate research findings effectively through written and oral presentations; Develop a research project proposal using advanced quantitative methods

COMM 467 Advanced Digital Analytics (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This is an intense course designed for students who have a foundational understanding of digital data analysis and are looking to deepen their expertise. This course will explore the advanced techniques and tools used in the analysis of digital data, with a strong emphasis on SQL and its applications in digital analytics. The course integrates theoretical knowledge with practical skills, offering hands-on sessions where students will work with real data sets. Students will learn to extract, transform, and analyze data from various digital sources to make informed business decisions. The course culminates in a capstone project where students apply their skills to solve a real-world digital analytics problem.
Outcomes:
Demonstrate advanced understanding of digital data sources and structures; Proficiently use SQL for complex data queries and analysis; Apply statistical methods to analyze and interpret digital data; Integrate data from multiple sources for comprehensive analytics; Develop and execute a digital analytics project from conception to completion; Effectively communicate analytical findings to both technical and non-technical audiences

COMM 468 Consumer Psychology (3 Credit Hours)
This is a course designed for students who wants to explore the psychological principles and theories underlying consumer behavior, offering insights into how consumers think, feel, and make decisions. In a format of seminar discussion, students will be exposed to a blend of theoretical exploration and practical applications. They will also examine various aspects of consumer psychology to analyze real-world examples, and concludes with a project where students apply their understanding to a consumer behavior problem or opportunity.
Outcomes:
Understand key psychological theories relevant to consumer behavior; Analyze how consumer perception, motivation, and decision-making processes influence buying behavior; Apply consumer psychology principles to marketing and business strategies; Evaluate the impact of social and cultural factors on consumer behavior; Conduct research and analyze data to inform consumer psychology insights; Develop and present a comprehensive project that applies consumer psychology concepts to a real-world problem

COMM 469 Human-Computer Interaction in Persuasion (3 Credit Hours)
This is a course designed for students who wants to explore the vital role of human-computer interaction (HCI) in creating effective and engaging digital communication strategies. Students will learn to apply principles of design thinking, user interface (UI) and user experience (UX) system design, and human-centered design to advertising contexts. The course will also delve into the ethics of HCI in advertising and public relations, including considerations around user data and privacy. A unique aspect of the course is the focus on virtual agent design, examining how AI, in the forms of chatbots and bots can enhance advertising efforts and consumer experience.
Outcomes:
Understand the principles of HCI and their application in persuasion; Apply design thinking to create innovative solutions; Design effective UI and UX systems for digital communication campaigns; Implement human-centered design approaches in digital strategies; Recognize and address ethical considerations in HCI for diverse audiences; Develop skills in virtual agent design for persuasion purpose; Create and evaluate a comprehensive project that integrates HCI, UI/UX, and ethical considerations

COMM 470 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major. Restricted to students in the ADPR-BASD and GSCM-MS programs.
Course equivalencies: COMM 370/COMM 470

COMM 473 Digital Storytelling Abroad (3 Credit Hours)
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 373/COMM 473

COMM 479 Digital Sustainability (3 Credit Hours)
Pre-requisites: DMST and SES grad students can enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 480 Project I (3 Credit Hours)
This first phase of the MS Advertising final project focuses on idea generation, research, and strategic planning. Students will choose between a data-driven research project or a production-focused advertising project, working closely with a supervisor to develop a comprehensive project proposal. For research-oriented projects, students will conduct a thorough literature review, identify research gaps, and formulate hypotheses or research questions. Those pursuing production projects will analyze market trends, extract consumer insights, and create a detailed creative brief for a real-world client. Both tracks emphasize critical thinking, strategic planning, and the development of a solid foundation for project execution. Through weekly meetings with supervisors and structured modules, students will refine their project concepts, ensuring they are well-prepared for the execution phase.
Outcomes:
Conduct comprehensive background research, including literature reviews or market analysis, to inform project direction; Formulate clear research questions, hypotheses, or creative briefs that guide the project's development; Develop a thorough project proposal, including objectives, methodologies, and expected outcomes; Demonstrate critical thinking in identifying research gaps or market opportunities; Apply ethical considerations in research design or advertising strategy development; Articulate complex ideas clearly in both written proposals and oral presentations

COMM 481 Project II (3 Credit Hours)
Building on the foundation laid in Phase 1, this course guides students through the execution, analysis, and presentation of their capstone projects. Students pursuing data-driven research will collect and analyze data, interpret findings, and prepare a comprehensive research paper. Those engaged in production projects will create tangible advertising materials based on their creative briefs, such as integrated campaigns, digital content, or other innovative advertising solutions. Both tracks emphasize practical application of skills, problem-solving, and the ability to adapt to challenges that arise during project execution. The course maintains a focus on weekly supervision meetings and structured modules to support students through data analysis or creative production, culminating in a final presentation of their completed projects. This phase prepares students to deliver high-quality, professional-grade work that demonstrates their readiness for advanced roles in the advertising industry or further academic pursuit.
Outcomes:
Execute the designed research methodology or creative strategy effectively; Analyze and interpret data or consumer insights to drive decision-making in research findings or creative execution; Create professional-quality deliverables, such as research papers or advertising materials, that meet industry or academic standards; Utilize technical skills relevant to their chosen project type, such as statistical analysis software or creative design tools; Manage a long-term project effectively, adhering to timelines and adapting to challenges as they arise; Demonstrate problem-solving skills in addressing unexpected challenges during project execution

COMM 491 Advertising/Public Relations Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the ADPR-BASD and GSCM-MS programs. Students must attend an internship orientation and submit application packet to instructor. If approved, student is enrolled in course.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 492 Multimedia Journalism Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the DMST-MC program.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 494 Film & Digital Media Internship (3 Credit Hours)
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 498 Directed Study for Graduate Students (1-3 Credit Hours)
Students may sign up for a one to three credit hour course to work independently in the student's area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials, a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication. Restricted to students in the DMST-MC, ADPR-BASD, and GSCM-MS programs.

COMM 700 Certificate: Digital Media Ethics (0 Credit Hours)
Loyola's Center for Digital Ethics and Policy certificate course explores codes of ethics and ethical decision making, legal limits of online speech, strategies to spot and deal with fake content, intellectual property and user generated content, understanding privacy concerns, ethical issues with big data, the ethics of deception online, among other topics.
Outcomes:
Participants will be able to understand ethical issues that are most likely to come up in their particular professional contexts and be able to take this knowledge back to their organization to help guide policy and procedure

COMM 701 Organizational Leadership and Change Management (0 Credit Hours)
Loyola's School of Communication offers a new certificate course custom-tailored for managers who want to accelerate the pace of successful change in their organizations. This course combines online learning with a focused 3-day program at Loyola, plus personalized coaching afterward. Participants will be able to shape their learning around their organization's needs.
Outcomes:
This course will help managers who want to accelerate the pace of successful change in their organizations, leading change on the front lines and managers whose supervisors have identified them as emerging leaders

Digital Advertising (MS)

Advertising graduate students in the MS in Digital Advertising are required to study the history, design, distribution, ethical standards and research methods for communicating commercial messages to diverse, international audiences within a digital context. With a broad variety of elective choices, students are introduced to advertising theories and creative concepts through copywriting, design and directing for online, interactive and moving image commercial media work, and to courses with more in-depth work on the psychology of audiences, mobile advertising, social media distribution and digital analytics strategies.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate communication skills in advertising, such as strategic acumen, knowledge of research methods, creative insights, content design and creation that will include written and visual

communication, and may include film and interactive digital production, including gaming.
- Develop integrated advertising campaigns that apply cutting-edge research methods and are informed by consumer behavior, data analytics, ethical considerations and the trending practices of AI.
- Collaborate and work as part of a diverse team skillfully managing conflicts and expressing viewpoints to help create and implement cohesive advertising campaigns.
- Think critically to evaluate data, assess strategies, and execute creative directions.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Present a thesis or project of relevant work that demonstrates an impressive knowledge of the advertising business.
- Possess the competencies to work as a professional in an advertising role.

Digital Media and Storytelling (MComm)

Create a Personal and Rewarding Experience.

Loyola University's Master of Digital Media and Storytelling program is for makers. Makers of all forms of digital content who desire the tools to turn their ideas into compelling, marketable stories they can share with the world. The two-year program prepares professionals for a career in digital media by teaching them the most important skills hiring managers need: How to write, shoot and edit powerful digital content.

One of the greatest strengths of our program is that students can shape their own experience. Prospective candidates should demonstrate an interest in digital media and/or storytelling in relation to:

- Journalism
- Advertising
- Public relations
- Documentary filmmaking

Digital Media and Storytelling Program Highlights

- Real-world curriculum equips students from diverse backgrounds with a broader, more in-depth skill set so that they can become productive members of communications teams in a variety of organizations.
- Create a digital portfolio in the heart of Chicago—Courses take place at Loyola's Water Tower Campus in Chicago, a world-class city that is recognized as a leading communications and business district.
- A capstone course that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public.
- Students can work with faculty to help determine the right career for them or how to become more marketable in their current area of employment.

When Do Classes Meet?

Each course numbered COMM 400 Designing for Digital Environments or above is held one night per week. Most courses meet between 7:00pm - 9:30pm.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the graduate program in Digital Media and Storytelling will:

- Gain proficiency in using industry-standard cameras and sound equipment, including smartphone technology in video storytelling.
- Develop the ability to craft engaging and well-structured non-fiction narratives across multiple digital platforms.
- Analyze digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content.
- Gain proficiency using the Adobe Creative Suite (Photoshop, AfterEffects, Illustrator, InDesign, etc.) and achieve proficiency in digital and print visual design.
- Create industry-standard content that integrates learning from all coursework and culminates into a capstone project suitable for a professional portfolio.
- Develop a mindful approach to ethical storytelling and the representation of diverse voices and perspectives. By understanding the impact of media, students create projects that reflect inclusivity and social responsibility.

Global Strategic Communication (MS)

Whether you're a recent graduate looking to jumpstart your communication career, a communicator who wants to build or advance their career on the global stage or a mid-career professional seeking expanded skills and digital fluency to move into communication management, the M.S. in Global Strategic Communication may be the perfect graduate program for you.

It's a professionally-focused, interdisciplinary, non-thesis program designed to prepare graduates for successful careers in public relations, advertising, digital and social media, corporate communication, content marketing and related fields. It accommodates busy working professionals with evening courses, online electives and full- and part-time options.

Length of Program

Full- and part-time options are available. Full-time students take three courses in the fall and four in the spring with summer options, allowing them to complete the program one and a half years. Part-time students have up to three years to complete the program. The program is flexible – it's possible to switch between full- and part-time study.

Curriculum

The curriculum is designed to help recent graduates successfully launch careers in communication and to enable professional communicators to take their careers to the next level. Courses emphasize acquiring expert knowledge and up#to-date digital and analytical tools, developing a global perspective and honing skills – such as critical thinking, creativity, problem solving, writing, business literacy, leadership and entrepreneurship – needed for a competitive edge.

The program's touchstones include an emphasis on strategic planning, consideration of multiple stakeholders, cultural relevance and sensitivity, social justice, effective use of digital channels and ethical decision making. Courses teach a combination of practical skills and "big-picture" knowledge intended to help students develop into skilled strategists, capable organizational leaders and ethical communicators.

In addition, multicultural and multinational examples, cases and perspectives are integrated throughout the curriculum to help students build or enhance a global perspective. The program also offers opportunities for study and immersion in China and London.

These are some of the topics examined in the program:

- As our economy further globalizes, how do we understand new stakeholders and create culturally sensitive and relevant messages and campaigns to engage them?
- Many corporations are embracing "profit with purpose" and building alliances with nonprofits, as well as optimizing their operations for their communities, employees and suppliers. Strategic communication campaigns tell these compelling stories.
- The Internet knows no boundaries: YouTube has become the globe's jukebox, and people around the world participate in revolutions via SMS text and Twitter. The Internet has created a new category of earned media – one that presents new opportunities but must be negotiated carefully because everyone is potentially an influencer.
- Digital messages can be measured with unparalleled precision. We can now use big data and other unobtrusive tools to find insights, and use web and social analytics to precisely measure the success of our communication programs.

Courses are taught by seasoned teachers and communication professionals who are digitally fluent and savvy in both media and business. Classes are small, personal and hands-on, include the Convergence Studio, state-of-the-art computer labs and exceptional infrastructure for learning and demonstrating digital communication skills.

Classes frequently partner with local nonprofits as pro bono clients, and students will have ample opportunities to do meaningful real-world projects. Whether it's developing a social media strategy or crafting an entire communication campaign, this work enriches student portfolios and enables students to shape and effectively express their personal brand.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the graduate program in Global Strategic Communication will:

- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Develop strategic messages to engage with diverse stakeholders through multiple channels, including both traditional and digital media.
- Understand the digital marketing and analytic strategies and tactics for marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication to create a social impact that both benefits the organization and the society

- Demonstrate the competencies to work as a professional in strategic communication management for social impact

Counseling Psychology (CPSY)

CPSY 400 Research Fundamentals: Family Studies (3 Credit Hours)
No course description is available

CPSY 406 Professional, Ethical, Legal Issues: Family & School (3 Credit Hours)
No course description is available

CPSY 407 Professional Field Experience: Family Studies (0 Credit Hours)
No course description is available

CPSY 417 Intro to Family Studies (3 Credit Hours)
No course description is available

CPSY 418 Theories of Family (3 Credit Hours)
No course description is available

CPSY 419 Family Communications (3 Credit Hours)
No course description is available

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 422 Group Dynamics: Theory/Practice (3 Credit Hours)
No course description is available

CPSY 423 Theory Counseling & Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development & Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 438 Program for Addicted Personality (3 Credit Hours)
No course description is available

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (0 Credit Hours)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 452 Educational Implication Social Psych (3 Credit Hours)
No course description is available

CPSY 453 Affective Development (3 Credit Hours)
No course description is available

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 455 Interpersonal Relations & Sexuality (3 Credit Hours)
No course description is available

CPSY 456 Personality Theory & Education (3 Credit Hours)
No course description is available

CPSY 457 Child Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to child development
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in children and prevent the development of psychological and academic problems

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 464 Adult Development & Counseling (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY464/PSYC450

CPSY 480 Mental Tests:School Age& Adult (3 Credit Hours)
No course description is available

CPSY 481 Mental Tests: Preschool (3 Credit Hours)
No course description is available

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 483 Advanced Projectives (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP483/CPSY483

CPSY 484 Neuropsychological Assessment (3 Credit Hours)
Pre-requisites: CPSY 461
This course introduces students to the administration and interpretation of neuropsychological tests.
Outcomes:
Students will be able to demonstrate knowledge of major neuropsychological assessment tools and their application to the assessment of neuropsychological conditions

CPSY 485 Career Assessment (3 Credit Hours)
This course introduces the career assessment process from theoretical, empirical and practical perspectives. The appraisal of aptitudes, interests, values, needs, and work environments will be studied.
Outcomes:
Students will be able to demonstrate knowledge of the nature, structure, function, and cross-cultural generality of work-related aptitudes, interests, needs, and values and prominent tools to assess each

CPSY 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CPSY 489 Achievement Tests (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP493/CPSY489

CPSY 490 Advanced Educational Statistics (3 Credit Hours)
No course description is available
Course equivalencies: RMTD481 / CPSY490

CPSY 495 Research Methods (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP495/CPSY495

CPSY 496 Computers in Educational Research (3 Credit Hours)
No course description is available

CPSY 497 Microcomputer Applications School or Agency (3 Credit Hours)
No course description is available

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.
Outcomes:
Outcomes are chosen between the instructor and the student during the semester the student takes the course

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 551 Writing for Publication (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY551/GNUR506

CPSY 552 Research in Self Esteem (3 Credit Hours)
No course description is available

CPSY 553 Language & Communication Devel (3 Credit Hours)
No course description is available

CPSY 554 Moral Development (3 Credit Hours)
No course description is available

CPSY 555 Seminar Human Development (3 Credit Hours)
No course description is available

CPSY 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (0 Credit Hours)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Education Leadership and Policy Studies (ELPS)

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 401 Documentary Research in Education (3 Credit Hours)
Documentary research in the field of education introduces graduate students to archival research and addresses issues related to the role and use of documents and public and private records.
Course equivalencies: RMTD401 / ELPS401

ELPS 402 Mission and Catholic School Leadership (3 Credit Hours)
This course explores how mission must be central to leadership and how all activities must align with that mission. Students will explore inputs, transformation processes and outputs as they relate to Catholic Ed leadership and school improvement.
Course equivalencies: RMTD402 / ELPS402

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 411 Special Education in the Catholic School (3 Credit Hours)
This course will examine moral and practical foundations of developing special education programs with the Catholic schools setting. This course will also explore the connection between Church documents and serving students with disabilities in This course is restricted to those enrolled in the Leading Inclusive Catholic Schools

ELPS 412 Urban Education Policy (3 Credit Hours)
This course uses a range of theoretical perspectives, theories and empirical research to analyze urban education policy. This course explores urban schools' and urban educational policy's evolution in response to changes in U.S. cities, urban teaching and school governance, and contemporary educational policies that are prevalent in urban school districts.
Outcomes:
1) Improved ability to critically evaluate ideas, arguments, and points of view regarding urban education policy; 2) Expanded knowledge of contemporary events, issues, movements and policies in urban education settings

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural and social factors that helped to shape educational policy and schooling in the United States.
Course equivalencies: X-ELPS444/HIST454
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 445 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

ELPS 446 Historical Foundations of Western Education and Social Policy (3 Credit Hours)
This course examines the development of Western education through an examination of changing concepts of what it means to be an educated person and the intellectual movements and socio-cultural contexts within which such notions have emerged.
Course equivalencies: X-ELPS446/HIST437
Outcomes:
Students will be able to demonstrate a historical understanding of the development of Western education

ELPS 447 History of Modern European Education (3 Credit Hours)
An examination of the development of national systems of education across Europe since the nineteenth century and an analysis of the development of cross-European educational initiatives in the context of the European Union.
Course equivalencies: X-ELPS447/HIST438
Outcomes:
Students will be able to demonstrate a historical understanding of the development of nationally specific and regionally focused educational policies and schooling systems

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership such as: Instructional Leadership, Equity and Justice; Collective Bargaining; Research in Educational Leadership; Instructional Leadership, Cultural Context for Informed Decision Making; The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (0-3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: Consent of instructor
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Learning outcomes are created individually for each Independent Study

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 502 Fundamentals in College Teaching and Course Design (3 Credit Hours)
Students will assess their experiences in the IHE program based on the tenets of the Jesuit Examen. Students will write a culminating final capstone paper which they will present at a School of Education mini-conference. Students will write a final culminating paper that identifies experiences, people, and places in the program that have impacted them personally and professionally; Students will analyze their successes, failures, and mediocrity as students in the program and articulate the major takeaways from their learning.
Outcomes:
Students will reflect upon their IHE program experience utilizing the principles of the Jesuit Examen

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 504 Advanced Financial Strategies in Higher Education (3 Credit Hours)
The purpose of this course is to build on a basic understanding of program budgeting to examine institutional financial strategies; state, and federal institutional funding; and public and financial aid polices that effect who has access to higher education. Apply higher education budget fundamentals to gain insight on institutional financial challenges. 2. Identify and assess the impact of the macro-dimensions of finance and how they inform campus level dynamics (e.g., budgeting, planning, equity) that complicate institutional financial decision-making
Outcomes:
Students should be able to demonstrate observable growth in their ability to: 1

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 507 Advanced Governance in Higher Education (3 Credit Hours)
This course examines the governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 508 Equity and Justice in Higher Education (3 Credit Hours)
his workshop/course focuses on diversity, equity, inclusion, and justice in higher education, providing a learning environment for advanced discussions, as well as opportunities for EdD doctoral students to apply learning to practice.
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the area of diversity, equity, inclusion and justice in higher education

ELPS 509 Introduction to Analytics in Higher Education (3 Credit Hours)
This course is designed to help students leverage data sets and systems in applied ways to improve their leadership. The course will cover key education data portals (e.g., IPEDS, Census data, proprietary systems) as well as introduce students to different data visualization techniques (e.g., geospatial mapping, infographics, etc.). Students will produce reports or grant proposals relevant to their career trajectory as a key deliverable.
Outcomes:
After taking a class on data analytics, students should have acquired a range of technical and nontechnical skills, as it relates to higher education as well as gained an understanding of the key concepts and methods used in data analytics

ELPS 510 Seminar in the Sociology of Education (3 Credit Hours)
This course is an advanced seminar that will focus on a specific topic in education that incorporates sociological perspectives and research literature. Students will read in depth on the course topic (reading both theoretical literature and case material), will develop their understanding of texts and the topic through intensive seminar discussion, and will conduct independent research leading to a thorough literature review or empirically-based research paper on a topic related to the course theme.
Outcomes:
Students who complete this course will greatly expand their familiarity with and command of research literature, theory and contemporary cases related to the course theme

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 540 Seminar in the History of Education (3 Credit Hours)
Pre-requisites: Previous history of education coursework, or permission of instructor
An in-depth examination of a selected topic or area of research in the history of education.
Course equivalencies: X-ELPS540/HIST560
Outcomes:
Student develops an advanced understanding of the seminar topic, knowledge of the scholarly literature on it, and the methods of historical inquiry that can be used to study it

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 555 Seminar Comparative Education (3 Credit Hours)
In-depth, cross-national analysis of a special topic in Comparative Education. As topics change, ELPS 555 is repeatable as long as a repeat is not on a topic covered previously.
Outcomes:
Students will demonstrate a sound grasp of the social, economic, and political forces shaping educational systems as they relate to the topic

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Students in Educational Leadership (0-4 Credit Hours)
A seminar taken to address the interests and needs of students during Ed Leadership studies. The topics include preparation for the comprehensive examination, Writing Workshop, Internship planning and on-boarding, planning and writing the capstone or dissertation and other topics planned by the EDLD faculty.
Outcomes:
EDLD Students will be able to demonstrate understanding of the various seminar topics presented - internships, dissertation, comprehensive exams

ELPS 595 Thesis Supervision (0 Credit Hours)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (0 Credit Hours)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 601 Capstone Supervision (0 Credit Hours)
This course is to develop a Capstone project. Students are engaged in planning and writing of the capstone project; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and capstone student. Culminating project is the Capstone Project and Capstone defense. Completion of all forms required for Capstone completion are the responsibility of SOE graduate student.
Outcomes:
School of Education students will complete and defend their required capstone project for an EdD degree; Students will research, write and defend their capstone project under the supervision of a Capstone Chair and Capstone committee

ELPS 605 Master's Study (0 Credit Hours)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (0 Credit Hours)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 621 EdD Capstone Research (3 Credit Hours)
This course focuses on the application of research understandings, knowledge, concepts and terminology so this is an opportunity for students to incorporate research information, foundational knowledge and conceptual understanding of research methods. While the nature of the capstone project is more personal, this scholarly work is a culmination of student learning. 2) Learn, design, and write the initial chapters of their capstone project. 3) Provide meaningful feedback to their peers regarding specific areas of their capstone project development and writing. 4) Understand the importance of the capstone committee chairperson and other members of the committee.
Outcomes:
1) Enhance their research inquiry capacity and ability to critically analyze research proposals, research reports and reviews of literature

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Research Methods (RMTD)

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 401 Discourse Analysis and Documentary Research (3 Credit Hours)
This research methods course will examine a number of different discourse analysis techniques. It will also prepare students to conduct historical documentary research, all with a special emphasis on how these methods can be applied to educational research and policy analysis projects.
Course equivalencies: RMTD401 / ELPS401
Outcomes:
Students in the course will be able to critically evaluate the diverse range of approaches used to analyze discourse and conduct educational research using documentary sources

RMTD 402 Comparative Analysis (3 Credit Hours)
No course description is available
Course equivalencies: RMTD402 / ELPS402

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 405 Qualitative Research (3 Credit Hours)
This course explores the discipline and practice of qualitative research through the examination of various theories, genres and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to recognize and discuss theories and components of qualitative research, to analyze various qualitative studies in terms of design, validity and meaning orally an in written critiques, to conceptualize, design and write a proposal for a small qualitative study, to collect, code and analyze data appropriate to a qualitative study, and to write up a small qualitative study including conceptual framework, research question, methods and collected data

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Community Counseling (MA)

The MA in Counseling Psychology prepares students to help communities living with disparities in health and well-being, especially the under-served. Loyola's program is the place for you to commit to shifting this inequitable landscape.

Related Programs

Master's

- Community Counseling (MEd) (p. 1979)

Doctoral

- Counseling Psychology (PhD) (p. 1709)
- School Psychology (PhD) (p. 1715)

Curriculum

The Master of Arts in Counseling Psychology requires 48 semester hours of graduate study focused in two major areas: counseling core and a specialty area. The program includes 450 clock hours of practicum/internship experience for six semester hours of course credit. Students must also take and pass a comprehensive examination during their final semester of study.

For more information about the following items, please refer to the Counseling Student Handbook 2023-2024 (https://catalog.luc.edu/graduate-professional/graduate-school/education/counseling-psychology-phd/2023CPSYDOCTORALHANDBOOK.pdf). Total Hours		**48**

Please note that PC and LCPC eligibility in Illinois requires CPSY 437 Addiction Counseling, CPSY 444 Family Therapy I, CPSY 528 Clinical Appraisal and Treatment Planning, and 700 hours of practicum/internship training.

[1] Students are required to participate on a faculty member's research team for one semester. CPSY 499 Independent Research should be taken at that time and the student should register for his or her faculty mentor's section of CPSY 499 Independent Research. Voluntary (i.e., not for course credit) participation in research for more than one semester is recommended.

[2] Practicum/Internship requires 450 hours of supervised experience in a setting relevant to community counseling practice.

[3] General Elective can be another course selected from Research Elective list, or 3 semester hours from this list.

Comprehensive Assessment

A comprehensive proctored examination is required. Please see the School of Education Academic Calendar for comprehensive exam dates.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will engage in independent scholarship on questions important to counseling psychology, and develop and evaluate interventions to promote positive human development.
- You'll be equipped to pursue doctoral study and will graduate with competencies in research, ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, assessment, and clinical interventions.

Counseling Psychology (PhD)

Loyola's PhD in counseling psychology has been accredited by the American Psychologist Association (APA) since 1984. The mission of the PhD program in counseling psychology at Loyola University Chicago is to graduate scientist-practitioner-oriented health service psychologists who identify with the field of counseling psychology and who are committed to promoting social justice in all their professional activities.

Related Programs

Master's

- Community Counseling (MA) (p. 1707)

Doctoral

- School Psychology (PhD) (p. 1715)

Combined

- School Psychology (MEd/EdS) (p. 2237)

Curriculum

The PhD in Counseling Psychology requires 69 credit hours of coursework beyond a master's degree, written and oral comprehensive examinations, a culminating portfolio and a dissertation with oral defense. Students develop an area of research expertise by engaging in research with faculty throughout their doctoral study. A 2,000 hour pre-doctoral internship is also required.

For more information about the following items, please refer to the Counseling Student Handbook 2024 (https://catalog.luc.edu/graduate-professional/graduate-school/education/counseling-psychology-phd/2023CPSYDOCTORALHANDBOOK.pdf)-2025 (https://acrobat.adobe.com/link/review/?uri=urn:aaid:scds:US:ce7389bd-a3b7-3a9f-8cd3-f07993bc594d).

COURSEwork

Code	Title	Hours
Prerequisites		
Ideally, students will have completed these courses or their equivalents prior to the start of the program.		
CPSY 420	Counseling Skills	
CPSY 423	Theory Counseling & Psychotherapy	
CPSY 425	Assessment in Counseling	
CPSY 426	Group Counseling: Theory and Practice	
CPSY 433	Multicultural Counseling	
CPSY 440	Practicum	
CPSY 444	Family Therapy I	
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	
CPSY 528	Clinical Appraisal and Treatment Planning	
RMTD 400	Introduction to Research Methodology	
RMTD 404	Introduction to Educational Statistics	
Psychology Core		**12**
Students will complete 12 credit hours towards the Psychology Core by selecting courses to fulfill each area listed below. Courses may be used to fulfill more than one area.		
One Course on Biological Basis of Behavior		
CPSY 461	Neuropsychology	
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 552	Neuropsychology	
One Course on Cognitive Basis of Behavior		
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 462	Cognitive Social Psychology	
PSYC 475	Cognitive Development	
One Course on Affective Basis of Behavior		
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	
CPSY 461	Neuropsychology	
One Course on Social Basis of Behavior		
PSYC 460	Social Psychological Theory	
PSYC 462	Cognitive Social Psychology	
PSYC 473	Social Development	
One Course on History and Systems of Psychology		
PSYC 401	History & Systems of Psychology	
One Course in Advanced Integrative Knowledge		
PSYC 435	Seminar in Cognitive Neuroscience	
PSYC 462	Cognitive Social Psychology

[1] Repeatable

Practicum

The Chicagoland area provides a wealth of clinical training opportunities for doctoral students in counseling psychology. Approximately half of our students seek training in university counseling centers in the city and suburbs, while the other half receives their clinical and diagnostic training in hospitals and community mental health centers. Students receive a generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, veterans, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain APA-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

Comprehensive Examination

The comprehensive examination is an oral exam that provides students an opportunity to integrate all course work, individual reading, research, and applied training. The comprehensive examination committee will be composed of the student's advisor (who will chair the exam) and two counseling psychology faculty members. Comprehensive examination performance will be evaluated by the committee using a rubric published in the Student Handbook and will evaluate student's understanding of profession wide competencies and program competencies.

Culminating Portfolio

The culminating portfolio represents the final pre-internship opportunity for students to demonstrate their integrative knowledge of health service and counseling psychology. The portfolio must be completed and submitted electronically by January 31 of the year the student applies for internship. Successful completion of this portfolio is required before leaving for internship. The following documents are required:

- Approved Dissertation Proposal
- Approved Clinical Case Study
- Approved Assessment Report
- Integrative Paper
- Social Justice Intervention Paper

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall

[1] Students may also choose to take a Psychology Core or Research Elective in this term.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will engage in independent scholarship on questions important to counseling psychology, and develop and evaluate interventions to promote positive human development.
- You'll be equipped to practice as a health service psychologist with competencies in research, ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, assessment, intervention, supervision, consultation and inter-professional/interdisciplinary knowledge and skills.

Cultural and Educational Policy Studies (MA)

Curriculum

The Master of Arts in Cultural and Educational Policy Studies requires 30 credit hours of coursework and a thesis. Students select a specialization in Comparative and International Education, History of Education, Sociology of Education, or Philosophy of Education.

Required Coursework

Code	Title	Hours
Select Three Courses in Major Area [1]		*9*
Select Two from Outside the Major Area		*6*
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
RMTD 400	Introduction to Research Methodology	3
Select Four Electives		*12*
ELPS 595	Thesis Supervision	0
Total Hours		**30**

[1] At least one course in Major Area must be at introductory level (ELPS 410 Sociology of Education, ELPS 420 Philosophy of Education, ELPS 444 American Schooling and Social Policy: A Historical Perspective, or ELPS 455 Comparative Education).

[2] Two courses are selected in consultation with the advisor in order to customize the course of study to the student's particular interests and needs. Commonly, students take additional research methods courses (*eg* RMTD 404 Introduction to Educational Statistics or RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method. However, electives may also be taken in other areas of the School of Education and, if appropriate, in other areas of the university as well.

Thesis

The MA thesis is the final requirement for the degree and will make a noteworthy, original contribution to current research knowledge and understanding of an educational issue or question that falls within the social foundations of education. A typical CEPS MA thesis is in the realm of 30-50 double-spaced pages (excluding references) and may eventually be revised and reworked to be submitted for publication as a book chapter or journal article.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Cultural and Educational Policy Studies (PhD)

Curriculum

The PhD in Cultural and Educational Policy requires 60 credit hours of coursework, qualifying examination, and dissertation.

To fulfill the Cultural Foundations and Policy core, students will choose one course from each of the following areas: Comparative and International Education, History of Education, Philosophy of Education, and Sociology of Education. Students will then choose a Depth Area from those above and take five (5) courses within it.

Required Coursework

Code	Title	Hours
Cultural Foundations and Policy Core		**12**
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
Coursework in Depth Area		**15**
Research Methods		**6**
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method [1]	
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	
Select Nine Graduate Level Electives [2]		**27**
ELPS 600	Dissertation Supervision	0
ELPS 610	Doctoral Study	0
Total Hours		**60**

1. RMTD 420 and RMTD 421 combined will fulfill the responsible conduct of research and scholarship training required by the Graduate School for all students completing a thesis or dissertation.
2. Students will select electives in consultation with their advisor to customize the course of study in the student's area of interest and research. Students are encouraged to complete coursework that contributes to a minor area of study within the four CEPS areas.

Comprehensive Exam

After PhD in Cultural and Educational Policy Studies students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations. The comprehensive examination is intended to establish that doctoral students have sufficient
comprehensive knowledge and academic writing skills to succeed in their areas of study. The examination consists of three different sections: one pertaining to the student's area of concentration; one related to a minor area of study in one of the four CEPS core areas; and one on a topic connected to the student's prospective dissertation. Over a one-week period, the student writes an essay in response to a question on each of these sections, so that all three sections are covered over three weeks. Each essay should be approximately 10-12 double-spaced pages in length (2500-3000 words excluding bibliography) but no more than 15 pages (3750 words excluding bibliography) overall. The essays should include complete citations and bibliography in APA or Chicago Manual of Style format.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Higher Education (PhD)

Loyola's PhD in Higher Education is an interdisciplinary program that encourages students to connect theory to practice while supporting scholarship on equity and social justice in various post-secondary contexts.

RMTD 482	Introduction to Linear Models	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 487	Factor Analysis	
Minor Courses [3]		**12**
General Elective Courses		**9**
Total Hours		**60**

1 Please confer with Graduate Program Director regarding appropriate Higher Education Electives.

2 RMTD 420 and RMTD 421 combined will fulfill the responsible conduct of research and scholarship training required by the Graduate School for all students completing a thesis or dissertation.

3 Minor Course Option A: The completion of four graduate-level courses in a single field of study outside the School of Education (e.g., history, sociology, anthropology, management).
Minor Course Option B: The completion of four graduate-level courses in one area in the School of Education (e.g., counseling, foundations of education). Coursework in higher education administration cannot be used to fulfill this requirement.
Minor Course Option C: An intellectually defensible minor developed in conjunction with a student's advisor, consisting of two courses, each from options A and B (e.g., a minor in educational history, drawing on appropriate course work in history and educational leadership and policy studies).

Higher Education Courses

Below is a list of all Higher Education courses. This can be used in reference for electives if not used in other curricular requirements.

Code	Title	Hours
ELPS 400	Inquiry Into Educational Policy	3
ELPS 405	Introduction to Educational Policy Analysis	3
ELPS 413	Critical Social Theories	3
ELPS 419	Leadership in Higher Education	3
ELPS 425	Foundations in Student Affairs	3
ELPS 426	Student Affairs Administration Higher Education	3
ELPS 427	Foundations in Higher Education	3

ELPS 600	Dissertation Supervision	0

Comprehensive Exam

After PhD in Higher Education students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations and should speak with their academic advisors. Advisors assist students to develop research questions and the literature that should be reviewed to complete the exam. The comprehensive examination is offered during the fall, spring and summer semesters.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking ELPS 610 Doctoral Study or ELPS 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will gain scholarly frames for understanding various higher education contexts, critically evaluate research (i.e., designs, data analysis, and data interpretation) and apply critical inquiry and research skills to successfully complete your dissertation research.

Research Methodology (MA)

We believe that data tells the story of the human experience. In Loyola's Research Methodology Program, we look at numbers in context. Unlike in math or statistics, where a number is the final answer, we know that numbers tell a story. We challenge our students to use data to highlight the systematic and personal characteristics that contribute to social inequities and leverage the findings to devise ways to offset those inequities.

Related Programs

Doctoral

- Counseling Psychology (PhD) (p. 1709)
- Research Methodology (PhD) (p. 1715)

Combined

- School Psychology (MEd/EdS) (p. 2237)

Curriculum

The Master of Arts in Research Methodology requires 30 credit hours. Students may also choose to write a master's thesis.

Required Courses

Code	Title	Hours
Required Courses		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method [1]	3
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
Select Six Electives [2]		*18*
Total Hours		**30**

1. RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method and RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method will fulfill the responsible conduct of research and scholarship requirement for students who compose a thesis.
2. At least one elective (3 credit hours) must be taken in a substantive area of the social sciences with approval from the student's advisor. This course is usually in the area that the student would like to apply research methods (*e.g.* Higher Education, Social Work, or Curriculum and Instruction).

Thesis Option

Students can choose to complete a thesis as part of their electives. Students completing a thesis can focus on the application of methods to a substantive area (higher education, social work, curriculum and instruction, etc.) or an investigation of methods.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will be able to critically evaluate bodies of knowledge from a variety of methodological traditions, use a variety of software programs to implement analyses, and assist with all stages of a research study in applied settings.

Research Methodology (PhD)

The Research Methodology program offers a comprehensive curriculum designed to equip students with the knowledge and skills to conduct rigorous and effective research across various disciplines. Through a combination of theoretical foundations, practical applications, and hands-on experience, students gain proficiency in quantitative, qualitative, and program evaluation methodologies.

Related Programs

Master's

- Research Methodology (MA) (p. 1714)

Doctoral

- Counseling Psychology (PhD) (p. 1709)
- School Psychology (PhD) (p. 1715)

Curriculum

The PhD in Research Methodology requires 60 credit hours, the completion of a research portfolio, and a dissertation. Students also participate in a consulting experience, where they participate in research or provide consulting assistance to researchers or organizations.

Required Courses

Code	Title	Hours
RMTD 403	Survey Research	3
RMTD 406	Educational Evaluation	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method *	3
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
One advanced quantitative course		3
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 488	Meta-Analysis	
One advanced qualitative course		3
RMTD 422	Single Subject Design	
RMTD 432	Item Response Theory	
RMTD 440	Mixed Methods Research	
RMTD 470	Case Study Research	
Three courses in Minor Research Area		9
Eleven Electives		33
Total Hours		**60**

Comprehensive Assessment

A Comprehensive Research Portfolio is required. The portfolio contains three items: a) a report on a research consulting experience, b) a research paper demonstrating the candidate's understanding of all phases in the research process and the ability to analyze and interpret data from a research study, and c) a literature review of an issue in the candidate's area of concentration.

Dissertation

A dissertation, as well as an oral defense of the dissertation, is required. Once completed, the final dissertation must be submitted to a publicly accessible database according to Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will be able to critically evaluate bodies of knowledge from a variety of methodological traditions, use a variety of software programs to implement analyses, and conduct all stages of a research study in applied settings. Plus, you'll participate in a required consulting experience, where you'll conduct a research study and then provide consulting advice to a researcher or organization.

School Psychology (PhD)

Work directly with students, while also publishing change-making research that will help disrupt inequities in our education system with a PhD in School Psychology.

Accreditation

Loyola's PhD in School Psychology has been accredited by the American Psychologist Association (APA) and approved by the National Association of School Psychologists (NASP).

Related Programs

Master's

- Community Counseling (MA) (p. 1707)

Doctoral

- Counseling Psychology (PhD) (p. 1709)

[1] Students must have previously completed an undergraduate or graduate level course in statistics with a grade of B or better, or take such a course before entering the program or in Fall of the first semester.

Students must also participate in a faculty research team during years one through four.

Practicum and Internship

In the second year of the program, students complete two semesters of a structured school-based practicum, in which they spend two days a week in a school setting and complete structured activities under the supervision of a credentialed school psychologist. In the third and fourth years of the program, students complete two advanced practica in a school or clinical setting while working on the dissertation proposal. In the fourth year of the program, students apply for a calendar-year-long doctoral APA-accredited internship in health service psychology through the Association of Psychology Postdoctoral and Internship Centers (APPIC) matching system. The internship must be under the direction of a licensed psychologist and certified school psychologist. The Director of Clinical Training approves internship applications submitted by doctoral students

Candidates in all programs leading to Illinois certification are required to pass an Illinois State Criminal Background Check.

Comprehensive Assessment

Doctoral students complete their major comprehensive examination (Doctoral Culminating Portfolio) prior to accepting an internship and typically during the fourth year of study.

Dissertation

A dissertation and oral defense is required. Upon completion, the dissertation is submitted for publication in a publicly accessible database per Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The School Psychology PhD program has three aims:

- To develop scientist-practitioners who have a professional identify as socially just school psychologists who are guided by the ethical and legal principles of the profession;
- To develop scientist-practitioners who understand and can implement evidence-based, assessment, intervention, and consultation practice from a social justice perspective; and
- To develop scientist-practitioners who can evaluate, produce, and disseminate research

To achieve these aims, the program is scoped and sequenced to build students' knowledge, attitudes, and skills such that they can enter the profession with the foundational and functional competencies needed to effectively provide services.

  - Cell and Molecular Physiology (MS) (p. 1736)
  - Cell and Molecular Physiology (PhD) (p. 1737)
  - Cell and Molecular Physiology (MD/PhD) (p. 2210)
  - Cellular and Molecular Oncology (MS) (p. 1738)
  - Clinical and Applied Proteomics (MS) (p. 1739)
  - Health Professions Education (MHPE) (p. 1740)
  - Health Professions Leadership and Education Certificate (p. 1741)
  - Infectious Disease and Immunology (MS) (p. 1741)
  - Integrative Cell Biology (MS) (p. 1742)
  - Integrative Cell Biology (PhD) (p. 1743)
  - Integrative Cell Biology (MD/PhD) (p. 2216)
  - Medical Physiology (MS) (p. 1744)
  - Microbiology and Immunology (MS) (p. 1745)
  - Microbiology and Immunology (PhD) (p. 1745)
  - Microbiology and Immunology (MD/PhD) (p. 2224)
  - Molecular Pharmacology and Therapeutics (MS) (p. 1747)
  - Molecular Pharmacology and Therapeutics (PhD) (p. 1747)
  - Molecular Pharmacology and Therapeutics (MD/PhD) (p. 2225)
  - Neuroscience (MS) (p. 1749)
  - Neuroscience (PhD) (p. 1749)
  - Neuroscience (MD/PhD) (p. 2227)
  - Pharmacology/Business (MS/MBA) (p. 2228)
  - Pharmacovigilance Certificate (p. 1751)
- Neiswanger Institute of Bioethics and Healthcare Leadership (p. 1751)
  - Bioethics and Health Policy (DBe) (p. 1752)
  - Bioethics and Health Policy (MA) (p. 1753)
  - Bioethics and Health Policy Certificate (p. 1753)
  - Healthcare Mission Leadership (DHCML) (p. 1754)
  - Healthcare Mission Leadership (MA) (p. 1755)
  - Healthcare Mission Leadership Certificate (p. 1756)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Biochemistry & Molecular Biology (BMB)

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

BMB 600 Dissertation Supervision (0 Credit Hours)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given a letter grade.
Outcomes:
Development of the dissertation project, writing and defense of the dissertation

Bioethics & Healthcare Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (0 Credit Hours)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
IPBS PhD students will complete their degree work while registered for BMSC 600

Cellular & Molecular Oncology (CMO)

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (0 Credit Hours)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours.
Outcomes:
Allows completion of thesis research and defense, required for degree

Clinical and Applied Mass Spectrometry (CAMS)

CAMS 401 Theory and Physics of Mass Spectrometry (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.
Outcomes:
At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity

CAMS 402 Chemistry of Protein Separation (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamentals of separating biological agents in solution for analysis by mass spectrometry.
Outcomes:
At the end of this course students will be able to: 1) Describe the composition of typical biological collections including blood and waste; 2) Describe best-practices for preparing collections for mass spectrometry; 3) Describe fundamentals of separating biomolecules according to size, charge and other physiochemical factors; and 4) Describe mechanisms and tradeoffs behind common approaches for separating biological samples via chromatography (liquid and gas)

CAMS 403 Introduction to Mass Spectrometry Instrumentation (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will introduce the mass spectrometry instrumentation that is utilized in clinical, pharma, and academia, including HPLC and other sample preparation instrumentation.
Outcomes:
At the end of this course students will be able to: 1) Describe the basic technologies and instrumentation currently used for mass spectrometry; 2) Understand the basics in how to operate this instrumentation (theory, no hands on); 3) Appreciate the similarities and differences in the different technologies, and in what situation each instrument would be most appropriate; and 4) Describe the instrumentation used in sample preparation

CAMS 411 Computation and Bioinformatics for Proteomics (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the governing principles of analyzing proteomics data, with a special emphasis on data derived from mass spectrometry (MS). Computational methods and tutorials will complement the theoretical material.
Outcomes:
At the end of this course students will be able to: 1) Describe key approaches for matching MS spectra to known proteins, as well as identifying and quantifying protein content in analyzes samples; 2) Describe methodologies and limitations thereof for labeling and quantifying proteins of interest; 3) Perform routine computational analyses of MS data using python; and 4) Describe best-practices for objective data analysis and reproducibility

CAMS 412 Clinical Considerations and Biomarker Development (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover fundamental concepts about the criteria for something to qualify as a biomarker and how they are analyzed by mass spectrometry from a variety of biological fluids and/or tissues. We will also discuss the broader uses of mass spectrometry in a clinical or hospital setting.
Outcomes:
At the end of this course students will be able to: 1) Compare and contrast aspects of good vs bad biomarkers and the utility of mass spectrometry for their detection in biological samples; 2) Describe best practices for sample collection and the limitations of using biological samples; 3) Describe current regulations and standards for biomarker use in the clinic; 4) Identify and describe biohazard safety issues when working with biological samples; 5) Describe analytical approaches for quantification of biomarkers; and 6) Describe the type of mass spectrometry assays typically used in a clinical or hospital setting

CAMS 413 Advanced Mass Spectrometry Approaches (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover advanced MS approaches to address specialized needs. These approaches will frequently require specific instrumentation, and bioinformatics approaches, but sometimes only involve changes to sample preparation and interpretation.
Outcomes:
At the end of this course students will be able to: 1) Understand the need for specialized mass spec approaches; 2) Appreciate the theory behind specialized mass spec approaches; 3) Describe the technical and practical considerations when utilizing specialized MS approaches; and 4) Be able to choose the correct advanced MS approach for a particular situation

CAMS 491 Mass Spectrometry Lab Rotation A (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to prepare samples that are "mass spec ready" from a variety of liquid and solid tissue biological samples. Students will learn quality control parameters and will produce high quality samples for use in the HPLC and mass spectrometer.
Outcomes:
At the end of this course students will be able to: 1) Process liquid and tissue biological samples for analysis by mass spectrometry; 2) Perform gel electrophoresis on prepared samples and excise selected gel bands; 3) Perform in in-gel digestions using standard enzymatic approaches; 4) Perform in-solution digestions using standard enzymatic approaches; 5) Quantify protein samples before and after digestion; and 6) Use column chromatography to generate high purity samples

CAMS 492 Mass Spectrometry Lab Rotation B (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to perform normal LC-mass spectrometer general upkeep including HPLC setup, mass spectrometer calibration, quality control, etc. Students will then learn the process of running mass spectrometers for two types of approaches: discovery and targeted mode.
Outcomes:
At the end of this course students will be able to: 1) Setup HPLC, mass spectrometer and software; 2) Perform normal instrument upkeep including calibration, quality control, solution changes; 3) Be able to troubleshoot common instrument issues; 4) Analyze sample on mass spectrometer for discovery (two group comparison); 5) Analyze sample on mass spectrometer for targeted quantification (in simple solution); 6) Use bioinformatics software packages to analyze data from mass spectrometers; and 7) Understand how to present mass spectrometry data

CAMS 493 Capstone Design - Applications in Mass Spectrometry A (2 Credit Hours)

Pre-requisites: Enrollment in CAMS-MS program

During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.

Outcomes:

At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CAMS 494 Capstone Design - Applications in Mass Spectrometry B (2 Credit Hours)

Pre-requisites: Enrollment in CAMS-MS program

During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.

Outcomes:

At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

Healthcare Professions Education (HPE)

HPE 400 Research Methods in Health Professions Education (4 Credit Hours)

Introduction for Health Professions Education (HPE) students to the fundamentals of research design for education and scholarship in teaching and learning. This course offers a deep dive into educational research, covering problem identification, literature review, research question formulation, and the critical evaluation and synthesis of existing studies. It provides a solid foundation in quantitative research (including reliability, validity, survey construction, and validation), qualitative research (focusing on interviews and focus groups), and mixed methods research. The course emphasizes ethical principles in research and teaches effective data interpretation and presentation. Additionally, students will be introduced to grant development and introduced to their capstone project which is a research proposal. This course will equip students with the skills needed to excel in educational research., reliability, validity, survey construction, and survey validation), qualitative research (as it relates to interviews and focus groups) and mixed methods research (how to manage and use more than one method of data collection); Analyze data and ethical research practices that guide educational research; Illustrate grant development with an introduction of the capstone project research proposal.

Outcomes:

Identify a research problem and method of literature review; Formulate research questions and hypothesis; Distinguish between quantitative, qualitative, and mixed methods research; Describe fundamentals of quantitative research (e.g

HPE 401 Fundamentals of Learning and Teaching Modalities in Health Professions (3 Credit Hours)

Introduction to a range of teaching modalities, including large group lectures, small group teaching, case-based, problem-based, and team-based learning, flipped classrooms, standardized patients, simulation, e-learning, procedural, chalk talks, and clinical and bedside teaching. Ignatian Pedagogy will be threaded throughout the course. Rooted in adult learning theories and human cognition, students will review these fundamental concepts and seamlessly apply them throughout the course. There is a strong focus on practical application, enabling participants to create innovative and engaging learner-centered experiences, establish supportive learning environments, and adeptly integrate feedback. As a culmination of their learning, students will craft a final project, utilizing one of these teaching modalities to instruct peers on a relevant topic, applying the skills in a real-world educational context., large group lecture, small group teaching, cased-based, problem based and team-based learning, flipped classroom, standardized patients, simulation, e-learning and clinical and bedside teaching); Define the concepts of adult learning theories (e.g., learning theory, human cognition); Apply knowledge and understanding of androgyny to class work during this course; Demonstrate course skills, including the creation of innovative and engaging learner-centered experiences which will be showcased in the teaching portfolio project; Appraise experience with teaching modalities in education through reflective writing.

Outcomes:

Categorize different teaching modalities (e.g

HPE 402 Technology in Education and Effective Lecture Skills (4 Credit Hours)
In this engaging course, through a series of hands-on activities, participants will design and produce an electronic lecture that skillfully incorporates critical components of effective instruction. Students will not only create an educational presentation, but also assess its effectiveness through peer review, showcasing their critical evaluation skills and the ability to use feedback for continuous improvement. By the course's conclusion, participants implement peer-reviewed feedback and integrate best practices to refine their lecture into a polished, pedagogically effective resource.
Outcomes:
Produce an engaging and impactful electronic lecture that incorporates critical components of effective instruction; Demonstrate critical evaluation skills through peer review of educational content; Use peer feedback to revise and enhance their lecture; Appraise use of technology in education with discussion posts

HPE 403 Principles of Curriculum Design (4 Credit Hours)
The course will focus on the formal process of curriculum development. Much of the course will cover the standard medical education curriculum development process developed by Kern and Thomas (Thomas PA, Kern DE et al. Curriculum Development for Medical Education: A Six-Step Approach. 3rd ed. The Johns Hopkins University Press). Throughout this course, students will delve into essential theoretical literature specific to healthcare education, equipping participants with a solid foundation. They will learn to pinpoint educational challenges through needs assessment and distinguish between learning goals and objectives. Furthermore, students will master the art of crafting effective learning objectives using Bloom's Taxonomy and selecting fitting evaluation designs. Participants will learn educational strategies that will allow them to achieve their curriculum objectives. Finally, students will gain practical strategies for collecting and leveraging educational data to continuously enhance pedagogy, ensuring their healthcare education practices are informed, effective, and patient centered.
Outcomes:
Develop familiarity with essential theoretical literature of Kern's Six-Step Approach to Medical Education curriculum development; Identify curricular problems; Formulate a needs assessment; Recall the fundamental differences between learning goals and objectives; Illustrate how to create learning objectives for courses and educational sessions utilizing Bloom's Taxonomy; Select an appropriate evaluation design based on the identified objectives; Evaluate the effectiveness and impact of various educational technologies on learning outcomes and instructional design; Develop strategies to gather, review, and utilize educational data to improve pedagogy

HPE 404 Statistical Methods for Educational Research (4 Credit Hours)
This course offers a foundational understanding of statistical analysis within the context of research in clinical and health professions education. Through a blend of theoretical knowledge and hands-on practice, students will become proficient in defining core statistical concepts, applying statistical methods to diverse data types, and recognizing statistical analysis as a versatile toolkit for uncovering insights in data. Additionally, they will explore how statistical thinking enhances problem-solving skills in health professions education research and gain an understanding of the purpose and proper application of statistical techniques. Practical skills include conducting statistical tests, interpreting their outcomes, and translating results into meaningful conclusions. By the course's conclusion, students will be well-prepared to engage in evidence-based research, make informed decisions, and contribute to advancements in both clinical practice and medical education.
Outcomes:
Define basic statistical concepts; Analyze statistics from clinical and educational data; Classify statistical analysis as a collection of techniques that are intended to uncover information in data; Discuss how statistical methodology is used to aid thinking in health professions education research; Describe proper use of the statistical techniques that are presented in this course; Compute statistical tests of research hypotheses using methods presented in this course; Interpret the meaning of tests of hypotheses and other statistical computations

HPE 405 Strategies in Assessment, Implementation, and Evaluation in HPE (4 Credit Hours)
This course is designed to equip students with the advanced skills and knowledge required to navigate the evolving landscape of healthcare education. This program offers a dynamic blend of theory and practice. Dive deep into the art and science of designing effective assessment strategies, implementing innovative educational techniques, and rigorously evaluating the outcomes in health professions education. Through critical analysis and synthesis, students will gain the skills to create holistic, evidence-based educational approaches.
Outcomes:
Apply advanced theoretical knowledge to real-world scenarios within the evolving landscape of healthcare education; Employ a blend of theory and practice to effectively address complex challenges and opportunities; Analyze the art and science of effective assessment strategies, innovative educational techniques, outcomes evaluations in health professions education; Demonstrate an understanding of various assessment and testing methods; Appraise educational practices, leveraging advanced skills and knowledge to lead positive change and innovation in healthcare education

HPE 406 Leadership in Health Professions Education (3 Credit Hours)
This course is designed to provide students with an understanding of the various theories that underpin leadership education and practice within the context of health professions education. As an active participant in this class, students will explore the presented leadership theories to shape their approach as an educator but also examine how these theories inform their interactions and engagement with the world within and beyond the healthcare and education domains. Participants will gain insights into how leadership principles can be applied to address the unique challenges and opportunities faced by health professions educators, helping them become a more effective leader and educator in the healthcare field, ultimately contributing to the advancement of healthcare education and practice.
Outcomes:
Review the fundamental concepts of leadership and the theories in the context of health professions education; Analyze ideas, arguments, and viewpoints related to leadership theories within healthcare and educational settings; Assess the effectiveness of different leadership styles, change agent qualities, and approaches in various organizational contexts, especially in the context of driving change; Articulate how one's personal developmental perspective influences both philosophical beliefs and practical applications in healthcare leadership and education

HPE 407 Administrative Skills and Organizational Change (3 Credit Hours)
This course has a clear focus on two main aspects: understanding how organizations undergo transformations and equipping individuals to drive change within an organization. It covers several key areas, including the driving forces behind change, the process of implementing change, the qualities, and skills necessary for effective change agents, and the behavioral theory explaining how both individuals and organizations evolve. A comprehensive grasp of the various theoretical frameworks shaping the organization and structure of higher education is integral to achieving proficiency in these areas. The goal of this course is to provide students with valuable insights into the major functions and structures within higher education. In essence, it's not focused on teaching administrative or faculty tasks but rather on helping participants understand the context within which they operate within higher education. This course introduces students to important concepts, theories, and fiscal practices in higher education. Moreover, it offers opportunities for students to analyze, test, and receive feedback on their financial decision making and its impact on critical higher education issues.
Outcomes:
Explain the significance of theoretical frameworks in shaping the structure of higher education and organizational dynamics; Apply knowledge of organizational change forces; Analyze real-world scenarios of organizational transformation; Examine the various factors contributing to the success or failure of change initiatives within organizations; Demonstrate competence in financial decision-making processes by making informed decisions that address critical higher education issues; Develop innovative approaches for implementing change within an organization

HPE 408 Health Professions Education Capstone Project (3 Credit Hours)
In this course students craft a research proposal primed for submission to the Institutional Review Board (IRB). Guided by seasoned educators and researchers, participants skillfully construct essential components of a robust research proposal that fills a current gap in the literature. Proposals will include an introduction, background, significance, thorough literature review, research methods, budget, and thoughtful implications and conclusions. By course end, students will not only have a well prepared research proposal but also the knowledge and confidence to undertake impactful research in the dynamic landscape of health professions education.
Outcomes:
Demonstrate a grasp of health professions education research principles; Construct an effectively structured research proposal that includes a well-defined introduction, background/significance, and literature review; Develop the research methods, implications, and conclusion sections of a health professions educational research proposal; Generate a coherent, complete, well-structured, and insightful proposal ready for IRB submission

Infectious Disease & Immunology (IDIM)

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages.
This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (0-5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (0 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Students will 1) Understand the significance and clearly communicate the research problem; 2) Describe the approaches used and results obtained; 3) Draw conclusions and identify future directions

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Graduate Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (0-1 Credit Hours)
Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446.

ICB 446 Review Seminar (0-1 Credit Hours)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with the Scientific Literature Course 445 and is only offered during the spring semester.

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (0-2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (0-2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

ICB 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Microbiology and Immunology (MIIM)

MIIM 402 Microbes & Hosts (3 Credit Hours)
Pre-requisites: Cell Biology BMSC 412, and Molecular Biochemistry BMSC 410 or permission from the instructor
Microbes & Hosts conveys important concepts in bacteriology, virology and immunology as well as the interactions of microbes with host organisms. Through a combination of didactic lectures and group discussions, students will come to appreciate fundamental processes which influence microbe-host interactions.
Outcomes:
Students will have a strong understanding of basic principles of microbiology, virology and immunology as well as an understanding of key concepts related to microbe-host interactions

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (3 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Students will learn how to perform laboratory work, including how to appropriately control their experiments, how to interpret results, and what conclusions they may draw

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (0-1 Credit Hours)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (0 Credit Hours)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor. They will defend their results in a public forum.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students advance their knowledge of new neuroscience concepts and methods, gain experience in presenting in front of a group, and gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

NRSC 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (0-1 Credit Hours)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (0-1 Credit Hours)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PHAR 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PHAR 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Physiology (PIOL)

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 418 Teaching of Physiology (0 Credit Hours)
Teaching training and practice opportunities for upper level PhD candidates.

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 425 Physiology of Aging (3 Credit Hours)
Pre-requisites: BMSC 410, BMSC 412, BMSC 416
The focus of this special topics course is on the unique physiological changes that occur with aging. Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
1) Acquire advanced knowledge of aging processes; 2) Identify key gaps in knowledge in the aging field; 3) Engage in transformational/critical discussion of seminal papers in the aging field

PIOL 426 Biophysical Research Methods (3 Credit Hours)
Pre-requisites: IPBS Core curriculum The focus of this special topics course is to introduce students to the field of biophysics, with special focus on practical applications of biophysical methods in research Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
Demonstrate a general understanding of the field of biophysics; Demonstrate deep knowledge and understanding of fundamental aspects cell mechanics, muscle mechanics, and integrated biomechanics; Demonstrate knowledge of current biophysical methods used in research; Demonstrate knowledge of fluorescence spectroscopy; Demonstrate knowledge of microscopy; Demonstrate understanding of computational biology approaches; Critically evaluate biophysical data from the literature; Interpret biophysical data for a general audience and effectively communicate biophysical information in both oral and written forms; Incorporate high standards of ethics into data interpretation and presentation

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

PIOL 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Course equivalencies: BMSC600/MIIM600/PIOL600

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Biomedical Sciences

The Graduate School at the Health Sciences Campus offers advanced degree programs in a range of disciplines in the biomedical sciences.

A PhD degree in biomedical sciences is offered through our Integrated Program in Biomedical Sciences (IPBS). The IPBS is an umbrella admission program that allows students to select one of six different tracks for specialization (Biochemistry, Molecular, and Cancer Biology, Cell and Molecular Physiology, Integrative Cell Biology, Microbiology and Immunology, Molecular Pharmacology and Therapeutics, and Neuroscience) . Students admitted to the Stritch School of Medicine MD/PhD enroll in the IPBS during the PhD-phase of their training and join one of the six IPBS tracks.

Master of Science degrees in the biomedical sciences are offered by each of our six IPBS tracks, plus programs in Infectious Disease and Immunology, Cellular and Molecular Oncology, Clinical and Applied Proteomics, Mass Spectrometry and Medical Physiology.

A Pharmacovigilance Certificate program is also offered, in addition to a MS in Pharmacology/MBA dual degree offered in conjunction with the Quinlan School of Business.

Graduate Programs

- Biochemistry and Molecular Biology (MS) (p. 1734)
- Biochemistry, Molecular and Cancer Biology (PhD) (p. 1735)
- Biochemistry and Molecular Biology (MD/PhD) (p. 2207)
- Cell and Molecular Physiology (MS) (p. 1736)
- Cell and Molecular Physiology (PhD) (p. 1737)
- Cell and Molecular Physiology (MD/PhD) (p. 2210)
- Cellular and Molecular Oncology (MS) (p. 1738)
- Clinical and Applied Proteomics (MS) (p. 1739)
- Health Professions Education (MHPE) (p. 1740)
- Health Professions Leadership and Education Certificate (p. 1741)
- Infectious Disease and Immunology (MS) (p. 1741)
- Integrative Cell Biology (MS) (p. 1742)
- Integrative Cell Biology (PhD) (p. 1743)
- Integrative Cell Biology (MD/PhD) (p. 2216)
- Medical Physiology (MS) (p. 1744)
- Microbiology and Immunology (MS) (p. 1745)
- Microbiology and Immunology (PhD) (p. 1745)
- Microbiology and Immunology (MD/PhD) (p. 2224)
- Molecular Pharmacology and Therapeutics (MS) (p. 1747)
- Molecular Pharmacology and Therapeutics (PhD) (p. 1747)
- Molecular Pharmacology and Therapeutics (MD/PhD) (p. 2225)
- Neuroscience (MS) (p. 1749)
- Neuroscience (PhD) (p. 1749)
- Neuroscience (MD/PhD) (p. 2227)
- Pharmacology/Business (MS/MBA) (p. 2228)
- Pharmacovigilance Certificate (p. 1751)

Biochemistry and Molecular Biology (MS)

The goal of the Master of Science in Biochemistry and Molecular Biology is to train students in the basic science and methodology of Biochemistry and Molecular Biology, to allow them to apply this knowledge in jobs as research assistants in academy or the biotechnology industry, or as teachers in primary or secondary education. Students graduating with an MS degree often obtain additional education in PhD and MD programs.

Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand concepts in biochemistry and molecular biology.
- Develop and test research-based hypotheses
- Implement research projects in an academic setting.
- Write scientific abstracts and manuscripts on their own projects.

Biochemistry, Molecular and Cancer Biology (PhD)

The PhD program in Biochemistry, Molecular, & Cancer Biology is part of the Integrated Program in Biomedical Sciences at Loyola University's Health Sciences campus. The goal of this program to train students as independent investigators who will go on to post-doctoral fellowships following the completion of the degree, and eventually become independent academic researchers and teachers.

Related Programs

Master's

- Biochemistry and Molecular Biology (MS) (p. 1734)

Combined

- Biochemistry, Molecular, and Cancer Biology (MD/PhD) (p. 2207)
- Microbiology and Immunology (MD/PhD) (p. 2224)

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:
- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in biochemistry, molecular biology, and cancer biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cell and Molecular Physiology (MS)

The Master of Science in Cell and Molecular Physiology (MS CaMP) is a research-intensive program that provides a broad, foundational knowledge of cellular, molecular, and systems-level physiology as well as the opportunity to pursue research with faculty mentors. The MS CaMP program fosters a stimulating and exciting research environment.

PIOL 595	Thesis Supervision	0
Total Hours		**30**

[1] Students may elect to take PIOL 401 Physiology in Fall or Spring semester depending on systems of interest. On rare occasions, students may elect to enroll twice with the approval of their PI and the Graduate Program Director. Research hours will be adjusted accordingly.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MS CaMP students will be able to demonstrate ability in:

- Gaining a general knowledge base in the biomedical sciences
- Acquisition of deeper knowledge of past and current scientific literature in a more specific field within physiology (i.e., in the chosen track of study)
- Ability to form hypotheses and to design and perform appropriate experiments to test these hypothesis
- Acquisition of oral and written communication skills for scientific peers and general audiences

Cell and Molecular Physiology (PhD)

Physiology is the study of the function of living organisms. The PhD in Cellular and Molecular Physiology trains students to acquire, analyze and integrate data obtained from their basic research into a physiological context to understand the molecular basis of cell function and dysfunction within the organism. With cardiovascular research and neurosciences & metabolism as main research topics, students receive a solid integrated training in basic medical sciences including biochemistry, biophysics, cell biology, molecular biology, physiology and pathophysiology.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Cell and Molecular Physiology Track Specific Course Requirements

The PhD in Cell and Molecular Physiology requires 48 credit hours made up of the IPBS Core Curriculum, 15 credit hours of Cell and Molecular Physiology courses, Research, Seminar, Journal Club, a comprehensive examination, and completion of a dissertation.

Code	Title	Hours
IPBS Core Curriculum (see above)		**14**
Cell and Molecular Physiology Courses		
PIOL 401	Physiology	4
PIOL 412	Research [1]	1-6
or BMSC 499	Research	
PIOL 416	Research Seminar [2]	1
PIOL 446	Cardiovascular Journal Club [1]	2
Select Three Cell and Molecular Physiology Electives		11
PIOL 425	Physiology of Aging	
PIOL 420	Methods/Technical in Physiological Research	
PIOL 414	Graduate Colloquy	
PIOL 418	Teaching of Physiology [2]	
PIOL 470	Excitability & Ion Transport	
PIOL 472	Structure/Function Membrane Proteins	
BMB 490	Special Topics in Molecular Biology	
PIOL 600	Dissertation Supervision	
Total Hours		**48**

[1] Hours Vary

[2] 1 credit for first year; subsequent years of study are 0 credits for Research Seminar

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in cell and molecular physiology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cellular and Molecular Oncology (MS)

The Cellular and Molecular Oncology Master of Science (CMO MS) program will prepare master's level scientists to meet the changing landscape of cancer research. Our CMO MS graduate program focuses on training and providing both the academic and laboratory research tools to best prepare graduate students to meet the challenges within the field of oncology early in their careers.

Students will be trained for future careers in the pharmaceutical, biotech, or biomedical industry. Top researchers within Loyola's Department of Cancer Biology will mentor CMO MS students toward the successful completion of their thesis research, directly involving students in the lab from day one. The profile of CMO MS students will be as diverse as the subject matter that they seek to study, many may seek to prepare themselves for an industry-related career, others will become top

candidates for PhD programs, and some will be competitive candidates for healthcare professional schools.

A commonality linking Loyola's CMO MS graduate students lies in their fundamental passion for effecting change in cancer-research.

Total Hours		**30**

Research and Thesis

Hands-on laboratory research will begin in the first semester of study. Students will complete two lab rotations to help them identify their research advisor and lab. Upon completion of the first semester, a student's research advisor will be assigned and subsequent lab time will be spent designing, conducting, and analyzing independent research projects under the supervision of the student's advisor. Upon completion of the CMO MS program, graduates can expect they will be highly knowledgeable in the methodology and skill necessary for success in future research endeavors.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Deploy a number of concepts, techniques and resources, within the specific topic of their thesis project, to carry out a largely independent research project in experimental oncology.
- Analyze, interpret and comprehend experimental data in a critical fashion.
- Engage in self-directed problem solving. Employ critical thinking and evaluate risks in original scientific projects.
- Use problem-solving experiences to diagnose and troubleshoot new failures to fix experimental faults in a rapid and consistent fashion.
- Being familiar with scholarly publications and the major open questions within an area of investigation.
- Present, verbally and in written form, their scientific results, relating the results to the existing body of knowledge.

Clinical and Applied Proteomics (MS)

The Master of Science in Clinical and Applied Proteomics is designed for science graduates and those already working in the field of scientific research who wish to pursue or advance their career through specialized study in the exciting field of Proteomics and Mass Spectrometry. This program is a combination of innovative, didactic online study of theory, combined with two in-person hands on laboratory rotations in order to provide students with the freedom to study from anywhere while still gaining access to operational training with some of the most specialized, modern equipment available.

Curriculum

The Master of Science in Clinical and Applied Proteomics requires 30 credit hours. The time limit to complete all the work towards the degree is one year.

The didactic classes will take place online. The laboratory rotation will take place in person at the Loyola University of Chicago's Health Sciences Campus in Maywood, IL.

Code	Title	Hours
CAMS 401	Theory and Physics of Mass Spectrometry	4
CAMS 402	Chemistry of Protein Separation	4
CAMS 403	Introduction to Mass Spectrometry Instrumentation	2

CAMS 413	Advanced Mass Spectrometry Approaches	2
CAMS 491	Mass Spectrometry Lab Rotation A	5
CAMS 492	Mass Spectrometry Lab Rotation B	5
CAMS 493	Capstone Design - Applications in Mass Spectrometry A	2

CAMS 494	Capstone Design - Applications in Mass Spectrometry B	2
Total Hours		**30**

The didactic classes will take place online. The laboratory rotation will take place in person at the Loyola University of Chicago's Health Sciences Campus in Maywood, IL.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand how compounds can be isolated for analysis based on their chemical properties.
- Describe the physics of each step of mass spectrometry.
- Read and interpret mass spectra.
- Identify the best mass spectrometry approach for a given situation.
- Perform all steps, from sample preparation to data analysis, of the mass spectrometry analysis workflow.
- Be able to explain the bioinformatic analysis of mass spectra and how to choose the most appropriate approach for a given situation.
- Develop a project based on a clinical or applied mass spectrometry question.

Health Professions Education (MHPE)

Teaching, leading, and learning in health professions education has evolved to necessitate an understanding of pedagogy, assessment, feedback, leadership and scholarship in order to create curricula, lead programs, and properly execute academic research. Our MHPE program targets individuals who seek a more granular development of these skills to advance their effectiveness as health professions educators and their careers. Our focus will be on healthcare professionals who are serving or desiring to assume roles in educational leadership, healthcare organizations, or professional societies.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate newly gained expertise in health professions pedagogy by receiving a passing score on a final project utilizing an evidence-based teaching approach.
- Cultivate an inclusive and culturally competent learning environment, thereby, allowing all to live out LUC's commitment to social justice, as evidenced by receiving a passing score on discussion posts and replies within each course.
- Apply leadership skills obtained through specialized coursework, particularly skills to help form and educate other healthcare

professionals, as evidenced by receiving a passing score on the leadership philosophy paper.
- Design an impactful and purpose-driven curricula related to a relevant health professions topic, as evidenced by receiving a passing score on a final curriculum design project.
- Develop expertise in educational synthesis and scholarship, as evidenced by designing a capstone research project that earns a passing score.

IDIM 501	Seminar	1
IDIM 502	Special Topics in Infectious Disease and Immunology	5

MIIM 503	Current Literature	1
IDIM 595	Thesis Supervision	0
Total Hours		**30**

Students will participate in the Department of Medicine's Clinical Grand Rounds that are held once a week. Students are expected to attend at least five Grand Rounds seminars, generally in their second year. This requirement allows Master's students to interact with physicians, residents, and medical students.

Research

Students will select a laboratory for research following one to three 6-week rotations during the first semester. Students will select laboratories for each rotation in consultation with faculty mentors and the program's graduate program director. MS candidates are expected to undertake an independent, original experimental study resulting in a new and significant contribution to knowledge. The research will culminate in the preparation of a thesis and a final oral examination conducted by the student's MS Thesis Committee.

Thesis

By the beginning of the second year (August), in consultation with her/his mentors, students will select a committee (the two mentors plus two other faculty) and submit a written proposal for the master's thesis work. Following approval of the proposal, students continue to carry out the appropriate experiments and develop the written thesis. The thesis is defended orally to the committee by the end of the second year (by the end of July). Students are expected to actively engage in research for the duration of the program, including during semester breaks.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Master's students will graduate with the ability to:

- Discuss, develop, conduct and/or supervise research projects that call for broad training in the biomedical sciences and focused training in Infectious Disease and Immunology.
- Provide technical expertise in molecular biology and cellular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culture.
- Act as liaison between researchers and clinical faculty and in situations that require familiarity with clinical presentations within the areas of infectious disease and immunology, as well as treatment of infectious disease.
- Incorporate high standards of ethics into research design and execution and data interpretation.
- Demonstrate strong oral presentation skills in the course of dialogues with colleagues, clients, physicians, and research scientists.
- Have thorough knowledge, within the fields of infectious diseases and immunology, of the biomedical research process including project planning, experimental design, and research protocol development.

This knowledge will be beneficial to those pursuing careers in health sciences, government or commercial environments.

Integrative Cell Biology (MS)

Knowledge in the Biomedical Sciences has been growing exponentially over the last decade. As we learn more about cells at the molecular level, we also discover the need to understand their interactions and functions integratively, emulating life in an in vitro setting. The Master of Science in Integrative Cell Biology at Loyola University Chicago is training the next generation of biomedical researchers. Through the program, students acquire a solid foundation and understanding of cell function at molecular, multicellular tissue, and organ structure levels.

ICB 459	Research	8
Total Hours		**30**

Research and Thesis

During the summer between the first and second year, students will meet with a potential mentor and select a laboratory where they will conduct research leading to the thesis. The final approved thesis must be submitted to a publicly available database in accordance with Graduate School policy

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and current biomedical research methods.
- Propose original biomedical research questions and design experiments to interrogate these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Clearly and effectively communicate scientific information in both oral and written forms
- Critically evaluate the results to arrive at a conclusive interpretation of the novel findings.
- Search and critically evaluate the scientific literature and data in the context of the novel findings.

Integrative Cell Biology (PhD)

The PhD in Integrative Cell Biology offers students a flexible curriculum focused on learning cell biology in a comprehensive scope, ranging from the molecular biology of cells and cell structures to cellular functions in various biological contexts, like cancer, inflammation, and immunology.

Related Programs

Doctoral

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Medical Physiology (MS)

The Master of Science in Physiology (MSMP) program at Loyola University Chicago Health Sciences Campus is designed for college graduates who are interested in strengthening their understanding of medical physiology with the intent of enhancing their academic credentials to succeed in their medical school applications and the medical school academic years. The MSMP program is a non-thesis, full-time, nine month special master's program running from early September to late May. Our courses are designed specifically for MSMP students and are classroom-taught by medical school faculty professors who have extensive medical education and admissions experience at Loyola University Chicago Stritch School of Medicine.

MSMP students will pursue intensive studies in M1-level graduate cell physiology, physiological biochemistry, organ system medical physiology, neurophysiology, basic human anatomy, introduction to pathophysiology and clinical bioethics. Our Professional Development course helps each student with all aspects of their applications to medical school. Each student in the MSMP program is assigned a faculty advisor to guide them throughout the program, as well as with their medical school applications. We also provide assistance for students interested in local medical and community volunteer programs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program graduates will be able to demonstrate ability in:

- Acquiring advanced knowledge and engaging in transformational and critical thinking.
- Producing and disseminating scholarship.
- Demonstrating ethical thinking and responsible conduct.
- Applying principles of social justice to the larger community.

Microbiology and Immunology (MS)

The Microbiology and Immunology MS program offers a two-year, research-intensive program that leads to a Master's degree in Microbiology and Immunology. Students will be trained in the rigor of the scientific method by proposing and completing a research project under the direction of a selected faculty mentor.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- apply their broad training in the biomedical sciences and specialized training in Microbiology and Immunology. This wide knowledge base will provide versatility in applying for subsequent positions in research or teaching.
- demonstrate expertise in molecular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culturing.
- communicate your scientific expertise in oral presentations.
- Our graduates are equipped to succeed in more advanced research, teaching or administrative positions and will serve as leaders in their chosen professions. They are also prepared for additional educational objectives such as obtaining an advanced degree in such areas as law, medicine or research.

Microbiology and Immunology (PhD)

The PhD in Microbiology and Immunology trains students for a career in research and teaching in microbiology, virology, immunology or molecular biology. The Department of Microbiology and Immunology creates and environment through courses, laboratory work, and other activities to allow students to acquire the tools necessary to work independently and to think critically. The department instills a sense of thoroughness, accuracy, and knowledge of common research tools that is indispensable. Students will able to independently analyze and evaluate scientific problems and be responsible for their research by the end of their program.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours
Core Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Specific Requirements		
Track Required Coursework		15
Research [1]		19
Seminar		
Journal Club		
Dissertation Supervision		0
Total Hours		**48**

[1] Students can choose to take more than 15 credits of electives and reduce research credits accordingly.

Microbiology and Immunology Track Specific Course Requirements

The PhD in Microbiology and Immunology requires 48 credit hours and consists of the IPBS Core Curriculum plus Microbiology and Immunology Electives, Research, Journal Club, Seminar, a comprehensive examination, and completion of a dissertation.

Code	Title	Hours
IPBS Core Curriculum		**14**
Mircobiology and Immunology Electives (see notes)		**15**
MIIM 402	Microbes & Hosts	
MIIM 411	Basic Molecular Microbiology	
MIIM 413	Basic Concepts of Immunology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
MIIM 471	Molecular Microbial Genetics	
MIIM 502	Special Topics (2 sessions required; additional sessions may be taken up to total of 4 credits)	
IDIM 502	Special Topics in Infectious Disease and Immunology (Optional)	5
MIIM 492	Research (hours vary)	19
MIIM 501	Seminar	0
MIIM 503	Current Literature	1
MIIM 600	Dissertation Supervision	0
Total Hours		**48-50**

Note: students required to take 2 MIIM electives, and may choose other electives from other programs with GPD approval. At least two special topics classes are required and up to 2 additional special topics classes may be taken to bring the track coursework credit number to 15.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam,they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation.The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.

- Demonstrate a deep knowledge in microbiology and immunology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Molecular Pharmacology and Therapeutics (MS)

The Master of Science in Molecular Pharmacology and Therapeutics is a research intensive program designed to graduate students with a broad base of knowledge in the biomedical sciences and a more focused understanding of pharmacology. The goal of our graduate program is to prepare students for advanced training in the biomedical sciences, academia, the pharmaceutical industry, or consulting.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods.
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease.
- Understand, assess, and draw conclusions from published research.
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use.
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions.
- Design and effectively present scientific presentations, write scientific papers and grants.
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity.

Molecular Pharmacology and Therapeutics (PhD)

The PhD in Molecular Pharmacology & Therapeutics is dedicated to training outstanding scientists in the pharmacological sciences. After successful completion of formal course work students will have acquired in-depth knowledge of pharmacology and basic knowledge of molecular and cellular biology, biochemistry, and physiology. Our training provides a solid foundation for successful scientific careers in a wide range of areas, including academia, government, and the pharmaceutical industry.

Neuroscience (MS)

The Master of Science in Neuroscience is a two-year, research-intensive program designed to provide students with a foundational understanding of neuroscience and an appreciation for emerging concepts and related methodologies. At Loyola University Chicago, we take an intra-departmental and interdisciplinary approach to learning, giving students a broad choice of mentors and neuroscience-related research projects to help advance your career. Students will acquire the knowledge and confidence to develop novel neuroscience questions, address them with rational and reproducible experimental design, and succeed in challenging academic and industry environments.

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- A thorough conceptual understanding of structure and function of the nervous system as well as the biology and function of cells of the nervous system.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Pharmacovigilance Certificate

Pharmacovigilance is the science of collecting, detecting, assessing, and monitoring data of drugs in order to minimize or prevent adverse effects. Pharmacovigilance, modernization and evolution of safety pharmacology, employs sophisticated state of the art approaches in the collection and analyses of data for therapeutics under development and for post-marketing surveillance of pharmaceutical products. Pharmacovigilance offers the promise of significant beneficial improvements in human health by providing safer, more effective and individually tailored therapeutics.

Loyola's Department of Molecular Pharmacology & Neuroscience offers a 12-credit certificate program in Pharmacovigilance which can be completed in 1-year (full-time) or 2-years (part-time). This program is especially well suited for individuals who are planning careers in the pharmaceutical industry, public health sciences, or biomedical research. The certificate program is also suited for physicians, nurses, and scientists in epidemiology or therapeutic-related fields. The program covers all aspects of Pharmacovigilance, related drug development and regulatory topics, and the ethics associate with these endeavors. Courses involve executives and expert scientists from the pharmaceutical industry who are world leaders in these areas.

All courses consist of Asynchronous lectures and synchronous course meetings (early evening) and are flexible to allow students to take the courses from home and around daytime obligations.

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Identify and evaluate Drug Development pathways including pre-clinical and clinical trials and the ethical, scientific, and regulatory issues around them.
- Identify and evaluate signal identification, assessment, management, and causality assessment.
- Evaluate benefit-risk, risk minimization, product safety monitoring, and vaccine safety monitoring.
- Evaluate and assess real world data/evidence.
- Interpret evidence obtained in Pharmacovigilance, including behavioral science, patient perspectives, and risk communication.
- Identify and explain the ways in which Pharmacovigilance can produce evidence and evaluations of data, and how these can be used to benefit human health.

Neiswanger Institute of Bioethics and Healthcare Leadership

The Neiswanger Institute for Bioethics and Healthcare Leadership is a pluralistic program that draws upon the commitment to social justice of the Jesuit and Roman Catholic heritage of the Stritch School of Medicine in its teaching, research, and service. The Institute promotes the ideals of Jesuit education in seeking to form "men and women for others" and to make our classrooms a "home for all faiths." Thus, while giving special regard to Catholic healthcare ethics in teaching and research, the Institute also fosters respectful dialogue among all traditions represented in our student body and patient population.

Two things distinguish the Neiswanger Institute for Bioethics:

- A commitment to educating healthcare professionals to be effective leaders for social justice in medicine and society, and;
- A commitment to understanding and respecting the role of religious and spiritual traditions, especially that of the school's Roman Catholic heritage, in healthcare decision making.

The primary values of the Institute, a regard for social justice and a commitment to understanding the roles of religion and spirituality in medicine, give rise to a research and teaching focus for institute faculty that includes addressing racial and ethnic disparities in healthcare, fostering cultural humility and competence, contributing to global health, promoting public health, and advocating a renewal of medical professionalism that evidences a concern for the common good.

As part of our mission, the Institute offers online master's degree programs and a hybrid doctoral degree in bioethics and healthcare mission leadership, as well as online certificate programs for healthcare professionals. Our innovative online environment supports practical education and provides valuable engagement and networking among peers and experts in the field of bioethics and health policy.

- Healthcare Mission Leadership (DHCML) (p. 1754)
- Healthcare Mission Leadership (MA) (p. 1755)
- Healthcare Mission Leadership Certificate (p. 1756)

Bioethics and Health Policy (DBe)

Our professional Doctorate in Bioethics (DBe) is a first of its kind and meets the growing need for advanced training in bioethics for those professionals that have increased responsibilities related to bioethics and health policy at their institution. Such individuals may serve as chair of a hospital's ethics committee, perform clinical ethics consultations, have administrative oriented ethics work or are a steward for issues central to your institution's mission and values. This degree offers healthcare professionals an opportunity to obtain a high quality doctorate through a hybrid delivery system (asynchronous online courses combined with blended courses that require 2-3 days of on-campus activity).

Curriculum

The Doctorate in Bioethics (DBe) is a professional doctoral degree and requires 57 credit hours of coursework, written and oral qualifying examinations, two capstone courses, and one capstone presentation (virtual or in-person). Matriculants in the doctoral program are required to maintain a 3.5 cumulative GPA.

Students who enter with a previously earned master's degree in bioethics may transfer up to 27 credit hours (pending approval from program director), and are required to complete a minimum of three (3) required courses, five (5) elective courses, and the two (2) capstones at Loyola.

Total Hours		**57**

[1] Indicates hybrid course offered asynchronously online with two to three days of on-campus activity.

Qualifying Examination

The qualifying examination students in the Bioethics Doctoral Program (DBe) should be completed after other coursework but *prior to* the Doctoral Capstone courses. This is an open book essay exam that should be an opportunity for the doctoral student to showcase their knowledge from the coursework they've already taken. After written responses are submitted, an oral exam is conducted online with the student and two faculty reviewers. This is an opportunity for the student to clarify and expand upon their written answers. The student will receive a letter from the graduate program director indicating successful completion of the written and oral exams.

Capstones

DBe students will take two doctoral capstone courses (BEHL 423 Doctoral Capstone I and BEHL 424 Doctoral Capstone II), each of which should result in peer-reviewed articles. Afterwards students will make a virtual or in-person presentation of their capstone work.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Participants who complete the program will be able to:

- Analyze common ethical challenges arising in clinical cases.
- Apply fundamental ethical principles and legal frameworks to clinical cases.
- Develop a credible argument regarding a current bioethical controversy.
- Demonstrate the knowledge and skills necessary to advise healthcare professionals in a specialized area of bioethics such as clinical case consultation, research ethics, public health ethics, Catholic bioethics.
- Produce a manuscript for submission to a peer reviewed publication.

Bioethics and Health Policy (MA)

The key ingredients to a successful experience in an online educational program are the quality of the students and the dedication of the faculty. Our students typically have advanced or professional degrees in a variety of disciplines and they hail from all over the country (and even a few from outside the US). Our program attracts physicians, nurses, social workers, chaplains, health care administrators, lawyers, researchers, and even a few of our own medical students.

Our faculty members (https://hsd.luc.edu/bioethics/aboutus/facultydirectory/) are trained in a variety of disciplines: law, medical humanities, philosophy, psychology, public health, theology, and health care ethics (https://hsd.luc.edu/bioethics/aboutus/whatisbioethics/). Because of the commitment of our faculty to online education, we can boast a low attrition rate, and students typically complete the master's program within 2 to 3 years.

Healthcare Mission Leadership (DHCML)

As the position of mission leadership has evolved over the past three decades, leaders working in Catholic healthcare cite an increasing need for well-prepared executives with deep understanding of Catholic theology, bioethics, practical business acumen, and organizational leadership who can function in an executive capacity to guide increasingly complex organizations.

Our interdisciplinary online Doctorate in Healthcare Mission Leadership builds on the MA in Healthcare Mission Leadership and provides a professional, doctoral-level preparation for individuals who hold or will hold positions of senior leadership within Catholic healthcare organizations.

Related Programs

Master's

- Healthcare Mission Leadership (MA) (p. 1755)

Certificate

- Healthcare Mission Leadership Certificate (p. 1756)

Curriculum

The Doctorate in Healthcare Mission Leadership (DHCML) is a professional doctoral degree and requires 66 credit hours of coursework. Matriculants in the doctoral program are required to maintain a 3.5 GPA.

Students may transfer up to 33 credit hours of coursework from an external MA degree toward the DHCML based on curricular requirements. Prior graduate coursework will be evaluated on an individual basis. Each student's course of study will be tailored to build on and complement their previous coursework. DHCML students may also select additional electives in healthcare leadership and management from the Quinlan School of Business or in theology and spirituality from the Department of Theology. These electives will be selected in conversation with the student's academic advisor.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Participants who complete the program will be able to:

- Analyze common challenges to maintaining fidelity to the mission of Catholic healthcare institutions.
- Apply fundamental ethical principles and theological frameworks to clinical and organizational questions.
- Develop a credible argument regarding a current mission-related challenges.
- Develop strategies to foster fidelity to mission utilizing management, formational, theological, and ethical knowledge and skills.

Healthcare Mission Leadership (MA)

The Master of Arts in Healthcare Mission Leadership offers professional preparation for those in senior leadership positions in a healthcare environment who are charged with developing, enhancing, cultivating, and protecting the identity and mission of their organizations. This interdisciplinary program is offered collaboratively by Loyola's Neiswanger Institute for Bioethics and Healthcare Leadership at the Stritch School of Medicine, the Marcella Niehoff School of Nursing, and the Institute of Pastoral Studies. It integrates courses from theology, spirituality, bioethics, organizational development, and leadership to offer a well-rounded degree pertinent to the work being done in Catholic hospitals and health systems throughout the world.

Related Programs

Doctoral

- Develop a credible argument regarding a current mission-related challenges.

Healthcare Mission Leadership Certificate

The Certificate in Healthcare Mission Leadership is for associates across Catholic healthcare who wish to deepen their understanding of the theological, ethical, and practical elements of the mission and ministry of Catholic healthcare. This certificate is designed for those interested in exploring the area of mission or who would like to deepen their expertise in Catholic identity or one or more of the *Catholic Health Association (CHA) competencies* and for those who wish to do "mission-in-place" to enhance the work they do in finance, patient services, clinical care and more through engagement with the foundations of Catholic healthcare.

Related Programs

Master's

- Healthcare Mission Leadership (MA) (p. 1755)

Doctoral

- Healthcare Mission Leadership (DHCML) (p. 1754)

Curriculum

The Certificate in Healthcare Mission Leadership required 15 credit hours. Students can choose any five courses in the areas of Ethics, Theology and Spirituality, and Organizational Management and Leadership from the curriculum for the MA in Healthcare Mission Leadership (p. 1755). This flexibility allows those who have strong backgrounds in healthcare administration to focus their coursework in the theological disciplines, while those with backgrounds in theology may, for example, choose to focus on organizational development.

Nursing (PhD)

Preparing nurse scholars to improve health through research, education, and leadership. The PhD in Nursing prepares graduates to advance the scientific foundation of nursing practice and health care delivery. Under the guidance of our faculty, students are prepared to launch a program of research addressing the social, cultural, political and ethical issues related to an area of nursing scholarship.

Related Programs

Doctoral

- Adult Gerontology Clinical Nurse Specialist (DNP) (p. 1833)
- Family Nurse Practitioner (DNP) (p. 1837)

Curriculum

The PhD in Nursing requires 49 credit hours for students entering with a Master of Science in Nursing.

Classes meet on campus one weekend each month throughout the semester. Classes are held in Fall, Spring, and Summer sessions and meet on a rotating basis between the Lake Shore and Health Sciences campuses.

Required Courses

For students who enter the PhD program with a BSN, their first 24 credit hours of graduate level coursework will be chosen in concert with their advisor and taken through the MSN or DNP program. The remaining coursework makes up the body of the PhD in Nursing, and totals 49 hours depending on internship credit.

Total Hours		**49**

[1] GNUR 510 Teaching Practicum is required for students who receive funding through the Nurse Faculty Loan Program. Students in that program will complete 52cr hours of coursework.

[2] Students who have not taken a graduate level statistics course prior to entering the PhD program may be required to take an additional three credit hour graduate statistics course before enrolling in GNUR 546 Advanced Statistics I or GNUR 547 Advanced Statistics II. The pre-requisite will not replace one of the above required courses and students will graduate with 49 credit hours.

Qualifying Examination

At the completion of coursework, students are required to successfully complete a qualifying examination consisting of both written and oral components. The examinations are designed to assess the depth, breadth, comprehension, integration, and synthesis of knowledge that forms the foundation for conducting dissertation research.

Dissertation

A directed dissertation is required to complete a PhD in Nursing. All students in the Graduate School who write a dissertation must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship. It is recommended that this course be taken prior to beginning research.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Program Goal

The goal of the PhD in Nursing program is to prepare scholars who improve human health through the development and expansion of knowledge.

Learning Outcomes

At the completion of the program the graduate has the knowledge and skills to:

- Initiate a beginning program of research that expands nursing and healthcare knowledge.
- Incorporate social, cultural, political, economic, and ethical considerations into nursing scholarship and practice.
- Participate in the international community of scholars to further the Jesuit mission of generation and dissemination of knowledge in the service of humanity.
- Assume leadership roles in nursing research, education, practice, policy development, and/or administration in order to improve the health of society.
- Differentiate between managing a career as a nurse scientist and stewarding the nursing discipline.

Social Work (SOWK)

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Understand the critical impact of the bio-psycho-social-spiritual perspective on the social work profession, 2) identify the role trauma and resilience have in human development and behavior

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Describe the elements of strength-based and contextual assessments, 2) explain process of culturally informed assessment, 3) apply knowledge by assessing client and community situations

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50
Outcomes:
1) Examine students' engagement in a deep exploration of self-awareness of their identities, values, and biases in several areas 2) recognize their knowledge and awareness of cultures and identities outside their own

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Corequisite is SOWK 501; Restricted to Graduate Social Work students
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Understand core social work skills relevant to engaging with and working with individuals and families, 2) apply core skills to diverse client situations

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Understand the role of group work as a key social work methodology, and how group work is practiced within agency and community settings, 2) gain awareness of themselves as group members and facilitators

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Identify research literacy and research skills in order to be accountable, and to evaluate their own practice, programs, and service delivery in the field, 2) understand the methods of social work research

SOWK 508 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work Students
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
Describe the importance of integrated practice; Examine a variety of models that can be used in integrated practice; Discuss the importance of empirical research of theories as well as interprofessional and interdisciplinary collaboration

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Course equivalencies: X- SOWK 509/IPS 635
Outcomes:
1) Examine social workers in policy practice & as change agents within communities and organizations, 2) understand the history and current structures of social policies and services; the role of policy in service delivery; and the role of practice in policy development

SOWK 600 Dissertation Supervision (0 Credit Hours)
Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels
Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.
Outcomes:
Understand the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels; Examine how policy shapes the experiences of individuals and families, important aspects of care delivery and financing, models of care, tools for analyzing policies and advocacy, financial structures, and financial sustainability, and workforce issues

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention
It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.
Outcomes:
Introduce students to core theoretical concepts, values, and competencies that characterize planned short-term psychotherapy; Apply time-limited approaches to brief psychodynamic, crisis, cognitive behavioral, Motivational Interviewing, and solution-focused treatments

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice. Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Identify the role of school social workers; Execute a system of care that includes direct service, consultation, advocacy, program development, evaluation, and the social worker's role in the special education process

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Develop specific skills in assessment and intervention strategies; Apply skills to individuals, groups, and schools; Implement trauma-informed care

SOWK 611 Social Work Practice with Couples (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course explores clinical models and techniques for the treatment of couples with relationship problems. Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.

SOWK 612 Family Assessment and Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families. The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.

SOWK 613 Advanced Family Treatment (3 Credit Hours)
This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relation-centered framework.

SOWK 615 Adolescent Client: Diagnosis and Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.

SOWK 616 Psychotherapy with Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.
Outcomes:
Apply content and processes of psychotherapy; Implement strategic use of therapeutic communication with adults

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.

SOWK 619 Issues in Treatment of Women (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination
In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.
Outcomes:
Understand a clinical relationship that children find meaningful in advancing their self-determination; Apply the central concepts in direct social work treatment of children

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.
Outcomes:
Apply key clinical tasks associated with counseling clients affected by substance use disorders (SUD); Demonstrate evidence-based approaches to screening, assessment, and treatment of SUD

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course includes a review of the basic concepts of gerontology/ geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.
Outcomes:
Identify basic concepts of gerontology and geriatric practice; Apply the person-in-environment theory and the principles, standards, and values of social work to practice with older adults

SOWK 634 Special Topics (1-3 Credit Hours)
Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.
Outcomes:
Students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma

SOWK 645 Crisis Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.
Outcomes:
Identify general crisis theories, assessment models, and treatment/ intervention strategies; Apply theories, models, and strategies in various practice settings

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course builds knowledge and skills in the areas of program development, sustainability, and evaluation. Program development is presented using an approach that also highlights the role of power, values, needs, and resources in decision-making processes. Grant-writing skills are developed alongside a critical analysis of social entrepreneurship and longstanding models of philanthropy. Knowledge and application of technology-based strategies to monitoring, evaluation and program improvement through data collection, data analysis, and data presentation are covered as well.

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.

SOWK 654 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.

SOWK 662 Professional Development (3 Credit Hours)
This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 663 Women in a Global Context (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Understand women in a global context, social development institutions, and women's representation within then and in related media and social media; Review a broad range of readings and audio-visual material from across disciplines to explore the populations of women in the world and their political, social, and economic orientations

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.
Outcomes:
Students will learn to apply critical thinking to inform and communicate professional judgments using oral and written communication as appropriate to the practice setting

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity.
Outcomes:
Demonstrate professional use of self, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts; Demonstrate understanding of discrimination patterns in society and how macro, mezzo, and micro-level oppression impacts micro-level social work practice

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.
Outcomes:
Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

SOWK 682 Advanced Mezzo and Micro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 505, SOWK 508, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students. This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community-engaged practices and considers the community as a place of practice and source of social change and discusses the role. Emphasis is given to philanthropy and its critiques, as well as grant-writing. In addition, the course will provide(s) practical experience such as creating work team contracts, articulating the elements of a typical grant proposal, and reviewing grant proposals.
Outcomes:
Demonstrate integrated practice skills that take into consideration the contextual environment of marginalized populations; Analyze models used in community intervention; Apply course content to develop a research topic on macro social work

SOWK 689 Arts-Based and Experiential Approaches to Social Work (3 Credit Hours)
Pre-requisites: SOWK 501 and SOWK 503 (Grade of C or better), or Advanced Standing or 5-Year SOWK Students
Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.

SOWK 690 Independent Study (1-3 Credit Hours)
Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 709 Social Work and Law (3 Credit Hours)
This course focuses on of the relationship between the disciplines of social work and law. Students acquire a framework for comprehending and analyzing laws, learn to critically examine the function of law in society and examine criminal and juvenile justice; child welfare; domestic violence; and confidentiality.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)
Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students
This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.
Course equivalencies: PHPY402/SOWK714

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)
This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)
This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)
This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)
This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)
This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)
This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.
Outcomes:
Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)
Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Program (1 Credit Hour)
This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Program (2 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.
Outcomes:
Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.
Outcomes:
Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.
Outcomes:
Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)
This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.
Outcomes:
Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)
Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)
This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality. Restricted to Social Work PhD students.

SOWK 801 Historical & Contemporary Issues in Social Work Practice (3 Credit Hours)
The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities. Restricted to Social Work PhD students.

SOWK 802 Grand Theories & Perspectives in Social Work Knowledge (3 Credit Hours)
This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas. Restricted to Social Work PhD students.

SOWK 803 Advanced Statistics (3 Credit Hours)
This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice. Restricted to Social Work PhD students.

SOWK 804 Qualitative Research (3 Credit Hours)
This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing. Restricted to Social Work PhD students.
Outcomes:
Students will be able to design and implement a qualitative research project with understanding of the various methods; ability to understand and apply various methods of data analysis; identify and apply criteria for rigor and trustworthiness

SOWK 805 Research Practicum I (3 Credit Hours)
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 806 Research Practicum II (3 Credit Hours)
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals. Restricted to Social Work PhD students.

SOWK 808 Integration of Research, Practice, & Theory in Social Work Scholarship (3 Credit Hours)
This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students' substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions. Restricted to Social Work PhD students.

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.

SOWK 820 Social Theory & Social Change (3 Credit Hours)
Pre-requisites: PhD Social Work student
This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.

SOWK 822 Organizational Analysis (3 Credit Hours)
This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.

SOWK 827 Doctoral Study (0 Credit Hours)
Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content. Restricted to Social Work PhD students.

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from a social justice and anti-racist perspective with the practical experience of preparing and teaching course content. SOWK 829 also continues focus on integrating material from SOWK 828 and creating and managing an inclusive environment via a variety of learning platforms with diverse students. Restricted to Social Work PhD students.

Social Work (PhD)

The PhD in Social Work, established in 1986, extends the tradition of educating students skilled in clinical research, scholarship, and teaching with the Jesuit ideals of service to others and commitment to social justice as its foundation. The doctoral program prepares students for leadership roles in diverse practice and academic arenas.

Our mission is to educate and train doctoral students to be independent scholars who conduct rigorous social work research and deliver effective teaching strategies to future social workers. The PhD Program at Loyola University Chicago School of Social Work builds on its clinical reputation by preparing doctoral students to create and evaluate practice-informed, client-centered interventions and policies that impact practice at the micro, mezzo, and macro levels. Doctoral students are trained in these practice-informed approaches to understand and respond to the complex social, racial, and economic justice issues that impact the most marginalized and oppressed in our society. The doctoral program reflects the social justice mission of our university by training doctoral students to engage in reflective and intentional study to become scholars who transform themselves, their community, the profession, and their world.

Program Goals

The specific goals of the PhD Program at the School of Social Work at Loyola University Chicago are consistent with national goals as outlined in the Group for Advancement of Doctoral Education (https://www.gadesocialwork.org/) and prepare professionals for:

- Scholarship and research in areas that include but are not limited to theory building, the effectiveness of practice interventions, and program evaluation.
- Academic teaching in the content areas of theory, practice, research, and policy.
- The advancement of the social work profession in a context that is global, and multi-cultural, requiring and addressing global-based human rights violations and inequalities.
- Leadership in the profession's commitment to remedying the growing and profound inequality with a commitment to policies, practices, and research that remedy those inequalities and their immediate negative effects on vulnerable populations.
- Inter-disciplinary scholarly work through course electives taken outside the SSW (School of Social Work) to enhance student's learning toward the completion of their dissertation.

Curriculum

The PhD in Social work requires 48 credit hours of coursework, a comprehensive examination, and a dissertation.

Coursework Requirements

The PhD in Social Work courses expand on student's understanding of social work research methodology and teaching.

Code	Title	Hours
SOWK 800	Statistics	3
SOWK 801	Historical & Contemporary Issues in Social Work Practice	3
SOWK 802	Grand Theories & Perspectives in Social Work Knowledge	3
SOWK 803	Advanced Statistics	3
SOWK 804	Qualitative Research	3
SOWK 805	Research Practicum I	3
SOWK 806	Research Practicum II	3

SOWK 829	Teaching Seminar & Practicum II	3
Graduate Level Elective Courses [1]		6
SOWK 827	Doctoral Study	0
SOWK 600	Dissertation Supervision	0
Total Hours		**48**

[1] The goal of elective courses is to enhance the quality and scholarship of the dissertation. The Director of the Doctoral Program should be consulted to provide advising about potential elective courses.

Once a student has completed coursework, they are registered for SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision to maintain standing in the Graduate School. It is not necessary for students to register for either of these courses during the summer term, but it is imperative that they register for either of these two courses every fall and spring term until graduation.

Comprehensive Examinations

Once students have completed the core curriculum (the second year of course work) they prepare for the Comprehensive Exam which is

taken during the fall semester of their third year and prior to developing a dissertation proposal. The written and oral exam test knowledge and critical thinking in research and micro/mezzo/macro theories and practices in the context of social justice applications.

Dissertation

Students are encouraged to begin thinking about specific areas for scholarly inquiry early in their course of study and to discuss these interests with full-time faculty members who have similar interest and expertise. The educational experiences are planned to facilitate the development of skills of intensive investigation and the application of research techniques to clinical phenomenon, process and/or services. A dissertation proposal Chairperson may be selected as early as the second semester of study. The selection of the Chairperson is normally a matter of mutual agreement between the student and the faculty member involved. The development of the dissertation proposal is a continuous process of focus, modification, and refinement until the proposal is developed to the satisfaction of the student and the dissertation Chairperson.

The following criteria will be applied by members of the Dissertation Proposal Committee in determining acceptability of the document and in granting final approval:

1. Proposals must have as their ultimate objective a contribution to the knowledge of the practice of social work. This objective may be in the advancement of relevant theory, the improvement of practice, the process outcomes, or synthesis of existing knowledge.
2. The formulated research question must be based on informed and extensive knowledge of theory and prior empirical study in the specific area of pursuit.
3. Clear concepts and well articulated research questions must be formulated.
4. Client systems, other social systems, and social service delivery systems are acceptable foci for subject matter within the context of practice related problems, situations, interactions, processes, and outcomes.
5. Replication of other studies is acceptable provided theory is advanced by way of its application to practice. This implies thinking though of alternative explanations of prior findings, the formulation of questions and hypotheses which reflect this thinking and the development of designs which take into account the gaps and/or limitations of prior work.
6. Proposals must include an acceptable plan and methodology of inquiry. No single research methodology is favored or prohibited. The proposed study may be exploratory, experimental, or historic in nature. Appropriate guidelines for the collection of data and data analysis must be stated.
7. Sample size must be appropriate to the nature of the study, the questions asked and methods to be used. Intensive case study (individual, group or family) and single subject approached may be acceptable. However, replication over series of cases may improve the potential for committee approval as a dissertation topic and would provide opportunity for comparative analysis.
8. When agency accessibility and cooperation is essential to the study, a plan based on preliminary negotiations when attention to feasibility must be presented.
9. Proposals must accord with the policies and procedures of all relevant review boards for the Protection of Human Subjects.

When the Chairperson is satisfied that a report is reaching a stage at which approval from the Committee is likely, the Chairperson will request the Director of the Doctoral Program to schedule a Dissertation Hearing which will be open to the public and advertised to the students and faculty and the School of Social Work.

After the Dissertation Committee has given final approval to the Dissertation, the student must bring the manuscript form into conformance with official specifications and to submit all appropriate abstracts and forms. Students should be aware that they will not be allowed to graduate unless the Graduate School is satisfied that they have met all the requirements related to the submissions of the final document.

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, doctoral students in the PhD program should be able to demonstrate the following competencies as a practice-informed researcher in the field of social work.

- Apply a commitment to social justice, equity, and inclusion of all people, in all course assignments, comprehensive exams and dissertation work, with particular attention to the needs and empowerment of people who are vulnerable, oppressed, and living in poverty guided by the National Association of Social Work Code of Ethics
- Critically analyze and evaluate social work theories, practices, policies, and research and contribute to, extend, and create knowledge in your area of specialization
- Differentiate, appraise, and develop the capabilities as an independent research scholar, the necessary interpersonal skills for team-based research and scholarship, and the ability to contribute to the knowledge base in one's area of interest through independent and collaborative scholarship.
- Examine one's positionality in research and teaching and develop a commitment to anti-racist and anti-oppressive practices in social work research, practice, and education as demonstrated by completion of yearlong research and teaching practicums.
- Compare, contrast, and critique existing social work pedagogies, and construct an emerging pedagogical style with teaching strategies for online and in person classrooms, which support establishing an inclusive classroom tailored to the learning styles of diverse students and their intersectional identities.

Institute of Pastoral Studies

Mission & Vision

The Institute of Pastoral Studies at Loyola University Chicago, a Catholic and Jesuit institution, facilitates the integrated ministerial development of diverse and dynamic leaders for creative, compassionate, and courageous service to church and society.

The Institute of Pastoral Studies aims to be a renowned global hub for educating and forming leaders in ministry who can adapt to the rapidly changing religious and social landscapes of the 21st century.

Degree Programs

IPS has six graduate degree programs and six degree concentration options that engage students at the nexus of theory and practice. Each program is built on foundational knowledge, enhanced by professional skills, and requires contextual education (https://www.luc.edu/ips/resources/contextualeducation/). No degree program at IPS is complete without an integration project (https://www.luc.edu/ips/resources/procedures/#den124710), ensuring that the academic knowledge, skills, and context come together so that our degree students graduate as true "Masters" in their chosen field of study. Our placement rates for graduates are strong, as each student has access to Loyola's career center as well as one of the largest, global network of ministerial alumni from a Catholic institution.

IPS degree programs are offered in Chicago, online, and in Rome, Italy. In addition to the assistance that may be provided by the University's Financial Aid office, IPS manages grants and scholarships available exclusively to its students seeking a graduate certificate or degree. As we live in an increasingly diverse and global world, IPS supports international education for its students through a special fund established for that purpose.

Being at a world-class institution in a world-class city means that IPS attracts a world-class faculty. Students study with highly-qualified professors, many of whom also bring ministerial experience to the program. Whether our students seek a program that leads to a career in ministry, service in the Church, counseling, spirituality, or social entrepreneurship, IPS has a degree or certificate to meet their needs.

To learn more about the Institute of Pastoral Studies, please complete the request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session (https://www.luc.edu/ips/admission/visit/), "All About IPS."

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.*

*Loyola University Chicago's Institute for Pastoral Studies is accredited by the Association of Theological Schools (ATS) and is currently under a Warning pertaining to ATS Standards 2.6-7 on Educational Evaluation.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), Master of Arts in Pastoral Studies (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Graduate Certificates

The Institute of Pastoral Studies (IPS) offers eight graduate certificate programs. All certificate programs are accessible online. Some of these programs provide practical skills and can be obtained without an advanced degree, while others require an advanced degree to support the additional scholarly study. Please see the individual descriptions for prerequisite requirements.

The certificate programs provide participants with the opportunity to pursue a concentrated series of courses in Pastoral Counseling, Spiritual Direction, Christian Spirituality, Social Justice, Social Enterprise, Pastoral Leadership, Church Management, and Religious Education. In each of the advanced graduate certificate programs, students may substitute some courses for others, with the approval of the program director, in order to avoid redundancy or in order to create specialized professional focus.

Association of Catholic Theological Schools (ACTS)

ACTS 991 Old Testament Topics (1-3 Credit Hours)
Topics will vary.

ACTS 992 New Testament Topics (1-3 Credit Hours)
Topics will vary.

ACTS 993 Historical Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 994 Theological Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 995 Ethical Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 996 Religion and Society Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 997 World Mission Studies Topics (1-3 Credit Hours)
Topics will vary.

ACTS 998 Ministry Studies Topics (1-3 Credit Hours)
Topics will vary.

Institute of Pastoral Studies (IPS)

IPS 400 Introduction to Graduate and Professional Writing (0 Credit Hours)
Writing skills are essential for success in graduate study and work in a variety of professional and ministerial settings. This course covers the following topics: academic integrity, grammar, research skills, citation, writing organization, thesis construction and critical thinking. Restricted to Institute of Pastoral Studies students
Outcomes:
Students will enhance their writing skills and develop analytical and communication skills that are critical to academic and professional writing

IPS 402 Church and Mission (1-3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II to contemporary times

IPS 403 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

IPS 404 Theologies of Suffering (3 Credit Hours)
This course focuses on theologies of suffering with written interaction and assignments, personal reflection on the theologies of suffering and substantive feedback. The readings include 1) Scriptural treatment of suffering (Psalms, Job, Lamentations); 2) Theologians on suffering (Moltmann, Schillebeeckx, Gutierrez, Hall); 3) From various perspectives (womanist, liberation theologians, pastoral care).
Outcomes:
Integrate unit reading and resources with contemporary experience, highlighting the key concepts and points made by the authors

IPS 416 Introduction to New Testament (3 Credit Hours)
This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.
Outcomes:
Gain insight into the socio-economic-political context, discover and utilize the tools of historical studies and textual criticism and to translate New Testament faith into their own contexts

IPS 417 Introduction to the Old Testament (3 Credit Hours)
This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship.
Outcomes:
Understand key theological points, recognize historical realities that gave rise to texts, recognize the theological, sociological, historical critiques expressed by texts, and demonstrate awareness of modern approaches to understanding texts

IPS 420 Ignatian Spiritual Direction Practicum I (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God.
Outcomes:
Upon completion of this course, students will be able to: Define and demonstrate spiritual direction in the Ignatian tradition; differentiating between direction, therapy, and pastoral counseling; Recognize key moments in directees, including touchstone moments, images of God and self, key facts of one¿s spiritual journey, and how discernment is operative; Understand and experience the importance of supervision for on-going formation of all spiritual directors; and Identify and implement healthy and appropriate boundaries in a direction relationship

IPS 421 Ignatian Spiritual Direction Practicum II (2 Credit Hours)
Pre-requisites: Restricted to Approved Ignatian Practicum Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God. - Attend to and integrate one¿s personal grief as a way of increasing capacity to direct those who are grieving. - Understand and be aware of resistance in directees and how to respond.
Outcomes:
- Define and demonstrate spiritual direction in the Ignatian tradition
- Integrate learning into directing those with marginalized identities, including people of color, women, members of the LGBTQ+ community, and the aging

IPS 424 Catholic Social Ethics & Migration (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to: (1) Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants; (2) Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change); (3) To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40); (4) To become aware of our status as social beings and the universal call to love through "The Theology of the Good Samaritan" as one of the key teachings of Pope Francis' new encyclical, Fratelli Tutti, which implies working towards creating change in structures to make resettlement easier legally and institutionally; (5) Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants. Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.
Outcomes:
Explain the key principles of social ethics in the Catholic tradition, particularly as outlined in modern 20th and 21st-century Church documents; Develop a pastoral plan that integrates practical, methodological, and pastoral tools to systematically address the spiritual and social needs of migrants; Critically assess the social structures that hinder the development of migrants and propose ways to accompany and support their holistic growth through ministry

IPS 428 Introduction to Spirituality Praxis (3 Credit Hours)
Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology.
Outcomes:
Understand the nature of the ministry of spiritual direction; Interpret primary sources on the theme of spiritual formation; Analyze their working spiritual theology and their potential to become spiritual directors

IPS 429 Essentials of Spiritual Direction (3 Credit Hours)
Pre-requisites: IPS 428
This course invites students to consider the practical conditions, requirements and main challenges of the ministry of spiritual direction/ accompaniment so as to further their discernment process and prepare them for the Contextual Education component of their program of study, where they will begin to serve as spiritual directors/companions.
Outcomes:
Identify relational dynamics operative in spiritual direction; Measure the significance of developmental, relational and social-cultural factors for spiritual direction; Employ open listening, questioning and verbatim accounts

IPS 430 Spiritual Direction Development and Practice (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
This course is designed for those called to the ministry of spiritual direction in the Christian tradition. It is structured to enable students to clarify their own frames of reference, develop interpersonal skills specific to spiritual direction, and experientially and academically consider the purposes and nuances of spiritual direction. In-class lecture, discussion, and practice of spiritual direction will be incorporated into synchronous sessions.
Outcomes:
More deeply understand and articulate one¿s own spirituality and its influence in one¿s practice of spiritual direction; Identify and explain key components and considerations for the practice of spiritual direction; Engage in meaningful ways with doing spiritual direction with individuals from different identities, communities, and ideologies and how this impacts the practice of spiritual direction; and Demonstrate interpersonal maturity and active listening skills in the context of spiritual direction

IPS 433 Dorothy Day and Thomas Merton (3 Credit Hours)
Dorothy Day, Catholic Worker co-founder, and Thomas Merton, Trappist monk, were outstanding American Catholics. Their lives and teaching raise important questions concerning vocation and religious commitment, war and peace, contemplation and simplicity in modern life, Christian activism, racial justice, capitalism, women, laity, and, with Merton, Christianity's relationship to world religions.
Outcomes:
A critical appropriation of activist-and-contemplative Christian/Catholic Christian spirituality and theology as understood and practiced in the lives of two outstanding American Catholic Christians

IPS 434 Art and Spirit: The Sacred and the Secular (3 Credit Hours)
An introduction to the visual arts exploring various approaches to understanding art, art history, terminology, techniques, media, and motivating factors for creating art from secular and sacred perspectives. A secular art appreciation textbook will be used in conjunction with Sacred Art Learning Units including lectures, readings, museum visits, and discussions on art from the Catholic tradition and other perspectives.
Outcomes:
Students will gain an understanding of liturgical art and environment ministry; enriched sense of religious identity; understanding of basic components of secular and sacred visual art, art history, contemporary art, and the value of art

IPS 435 Spirituality and Same-Sex Orientation (3 Credit Hours)
Spirituality is the lived experience of faith. What is the lived experience of Christian faith of gay and lesbian persons? What are the classical and contemporary resources biblical, theological, scientific, psychological, spiritual and experiential by which gay Christians affirm a spiritual core from which they live their lives and faith?
Outcomes:
Demonstrated understanding of key elements by which gays and lesbians shape lives that are simultaneously faithful to the gospel of Christ, their religious tradition, and the truth of their sexuality

IPS 436 Prayer: Ongoing Path of Conversion (3 Credit Hours)
The course combines theory and practice. It presents prayer as an intimate means of ongoing conversion in the Christian life. Content includes the biblical, historical, and theological foundations of prayer, psychological factors, and the actual practice of various Christian meditative and contemplative practices (lectio divina, meditation, Ignatian contemplation, centering prayer).
Outcomes:
A demonstrated understanding of: the history of Christian prayer; growth and development models in prayer; biblical and theological foundations; the experience of 4 Christian and 1 non-Christian prayer form

IPS 440 The History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution in the context of the ancient Near East. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 440/THEO 404

IPS 441 The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament , in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS441/THEO 405

IPS 442 Prophetic Literature (3 Credit Hours)
This course examined the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by the contemporary sociological and anthropological perspectives. Standard historical critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of this course

IPS 443 Wisdom Literature and Psalms (3 Credit Hours)
This course will study the Wisdom tradition and the Psalms of Israel. Formal critical analysis and history of tradition studies will be emphasized. The rich diversity of these parts of scripture will be a prime focus.
Course equivalencies: IPS 443/THEO419
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 445 The Synoptic Gospels (3 Credit Hours)
Even though the course focuses on Matthew, there will be a continual comparison with the other two Synoptics and occasionally with John. By exegesis of the Gospel of Matthew and the study of its specificity among the gospels, it is hoped students will be able to connect their contemporary experience of Christian diversity to the experiences of the earliest followers of Jesus. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 445/THEO 424

IPS 446 Luke-Acts and the New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view. Emphasis will be placed on the theological perspective of the writer of Luke-Acts and on the relationship of that perspective to other early Christian writers (Mark, Matthew, and Paul).
Course equivalencies: IPS 446/THEO 425
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 447 The Johannine Literature (3 Credit Hours)
The gospel of John has arguably exerted more influence on later Christian theology than any other gospel. Its unique Christology, possible anti-Judaism, the history of the Johannine community as reflected in the gospel, and the relation of the gospel to the Johannine epistles will be explored. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 447/THEO426

IPS 448 St. Paul's Contribution to Christianity (3 Credit Hours)
This course looks to three goals: a careful understanding of Paul's thought, to be discovered through exacting analysis of often difficult Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity in its facets of spirituality, Christology, redemption, ecclesiology, worship, sacraments, sin, etc.
Course equivalencies: IPS 448/THEO 427
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 449 The Person of Jesus in the New Testament (3 Credit Hours)
In this course attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities. Emphasis will be placed on both the variety and the development of early Christian attempts to understand the meaning of Jesus. In addition this variety and development will be placed in the context of early Judaism and Graeco-Roman religions.
Course equivalencies: IPS 449/THEO 429
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 454 Ministry with Young People & Spirituality Today (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. The class will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.
Outcomes:
Articulate the differences between Youth Ministry, Young Adult Ministry, and Pastoral Juvenil in relation to the cultural and societal shifts affecting young people today, including secularization and disaffiliation; Apply Ignatian spirituality as a tool for discernment and accompaniment in ministry, supporting young people on their spiritual journeys toward developing their identity as missionary disciples; Evaluate current ministry approaches and propose new strategies for engaging youth, young adults, and jóvenes in a multicultural, secularizing world

IPS 465 Psychology and Spirituality of Life Transitions (3 Credit Hours)
Course examines the dynamics of change, attachment, and loss, suffering and grief and the transition process of endings, empty spaces and new beginnings. Conscious and intentional living is recognized as the most precious gift to give to oneself, loved ones, and the world.
Outcomes:
Students will learn how to face and incorporate change with increased faith and hope; more fully understand the psychological and spiritual impact of change; recognize value and meaning in events of daily life

IPS 467 Introduction to Canon Law (3 Credit Hours)
This course introduces students to Canon Law, also known as church law, which is grounded in the theology and ecclesiology of the Catholic Church.
Outcomes:
General overview of canon law as needed for lay ecclesial ministry; basic understanding of canon law as a discipline; knowledge of canons as related to sacrament of marriage and sacraments of initiation

IPS 472 Pastoral Counseling in an Intercultural Context (3 Credit Hours)
This course invites students into a reflective, interactive, experiential process of exploring the place of culture, values, beliefs, and biases in the counseling context. Students examine their own cultural experiences, with special attention to power dynamics, even as they study the complex dynamics of other cultures.
Outcomes:
Deepen awareness of one's own cultural dynamics; develop an increased understanding of other cultures; consider strategies and interventions for sensitively meeting the needs of those encountered in pastoral counseling

IPS 473 Family Therapy and Personal Transformation (3 Credit Hours)
Family therapy is a unique way of working with individuals, couples and families. This course will examine the foundations of, and theory and practice of family therapy as expressed in five major schools. We will integrate psychological and theological dimensions throughout. The course will balance didactic input and experiential exercises.
Outcomes:
Demonstrated knowledge of application ability of family system theory, family therapy, and understanding of culture and other effects on family systems

IPS 474 Addictions & Modes of Therapy (3 Credit Hours)
Addictions are among the most pervasive and potentially destructive entrapments of the human condition. Their presence in manifold forms, underscores the importance of understanding the roots and sources of its patterns, in order to ultimately shape treatment and therapeutic strategies from a holistic and integrative point of view.
Outcomes:
Gain understanding of general addictive patterns/processes as they are discernible across addictions; Grapple with the roots, causes, and extent of addictions, from various viewpoints; Understand various treatment approaches

IPS 478 Couples Counseling (3 Credit Hours)
This course prepares clinicians to understand and work with couples in crisis by examining five therapy approaches. Marital development, premarital counseling, healthy marital functioning, sexuality, spirituality, physiology, enrichment and working with affairs will be addressed. Class built upon lecture, case study, video presentation, role play, small and large group processing.
Outcomes:
Working knowledge of marital health, conflict and role of affect; ability to assess family dynamics and prepare treatment plan; comfort level with couples

IPS 480 Mindfulness and Pastoral Ministry (3 Credit Hours)
Participants will examine: a) historical overview of mindfulness in Christian and certain Eastern religious traditions; b) integration of mindfulness in pastoral ministry; c) emerging neuroscience regarding mindfulness; and, d) clinical research on the effectiveness of mindfulness in promoting positive mental health.
Outcomes:
Participants will gain the ability to describe the benefits of mindfulness and how mindfulness can be integrated into personal life and utilized in professional and/or ministerial roles; be personally knowledgeable about the experience of developing mindful awareness

IPS 483 The Pastoral Care & Counseling of Men (3 Credit Hours)
This course explains what it means to be male and masculine in this time and culture. Psychological development, influence of culture, power, the Male Code, intimacy, emotions, sexuality, spirituality, and inner life will all be explored. Individual and group, clinical and educational approaches will be discussed.
Outcomes:
Appropriated gender-based approach to working with men; and acquired inquisitiveness to men's issues and upbringing

IPS 485 Religious Education, Evangelization & Cultures (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs within cultural settings (e.g., urban/suburban/rural; secular/religious; settled/immigrant; ethnically diverse/uniform; Millennial/GenX/Boomer/Greatest generation). This course provides the tools to analyze a cultural context, identify barriers to ongoing conversion, and teach effectively for religious and spiritual growth. Understand the educational significance of cultural context; Develop ethnographic and contextual analytical skills; Analyze and evaluate themselves, curricula and others for cultural appropriateness; Create culturally sensitive learning events.
Outcomes:
Know basic catechesis

IPS 486 Principles of Religious Education (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs in many contexts often targeted for a particular age or cultural group. This basic course in religious education reveals the theological and educational roots and introduces the basic elements and processes including assessment, backward design, curriculum and learning. Analyze learning contexts; Apply theories to real life contexts; Evaluate oneself, curricula, and others with standards; Create a lesson addressing a real-life teaching challenge.
Outcomes:
Know and understand basic catechesis

IPS 493 Health Care Integration Project Portfolio (0 Credit Hours)
Pre-requisites: This course must be taken in the last year of study after fulfilling the other requirements for the concentration including: 3 designated health care courses, 2 workshops, basic CPE and CPE residency; Focused on the Certification process, an Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program; This 0 credit course seeks to assist in the process by providing supervision for the student Focused on the process for Board Certification. Health Care Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program. This 0 credit course seeks to assist in the process by providing supervision for the student.
Outcomes:
Completed portfolio for Board Certification with the National Association of Catholic Chaplains or Association of Professional Chaplains

IPS 499 Guided Study (1-6 Credit Hours)
Topics will vary.

IPS 501 Advanced Human Relation Skills (3 Credit Hours)
Provides the skills needed for the interpersonal involvement essential in any helping relationship. Participants learn and practice the skills of communicating empathy and challenge to others as well as exploring and disclosing oneself. Learning consists of applying theory to the experience of relationships in small groups.
Outcomes:
Students will effectively use ten essential skills to communicate and connect in relationships; Students will practice these skills with one another to understand the effect of these skills on the receiver

IPS 502 Theology of the Developing Person (3 Credit Hours)
This course seeks to help the students think theologically about human personhood. It offers students a theological anthropology presented with developmental considerations in mind. It offers a theological dialogue partner for psychological perspectives on development.
Outcomes:
Students will form a more abiding and working connection between theology and human experience; Students will understand how pastoral and therapeutic practice is strengthened by theological awareness and supports therapeutic and caregiving relationships

IPS 503 Fundamentals of Pastoral Counseling (3 Credit Hours)
Pre-requisites: IPS 501 (minimum grade of C+)
This course focuses on the process and skills of pastoral counseling. Emphasis is on training in basic listening and influencing skills. Students practice selected strategies drawn from various approaches to counseling.
Outcomes:
At the conclusion of this course, students will be expected to demonstrate mastery of two classes of core counseling skills (listening and influencing), which they will practice in small peer groups under the supervision of the instructors

IPS 505 Group Counseling Approaches (3 Credit Hours)
This course introduces students to the theory and practice of group approaches to counseling and preventative, psychoeducation work. Group dynamics and leadership issues are explored. Students will design and lead a group of their choosing.
Outcomes:
From various approaches to structured and unstructured groups, students develop a design for a specific group in which they are interested and which they plan to use in their subsequent career

IPS 507 Pastoral, Psychodynamic Assessment and Intervention (3 Credit Hours)
This course offers students the opportunity to integrate theoretical insights with the practical issues of assessment, diagnosis and response strategies for individuals and families. Psychodynamic and theological models are used in this effort, as is a strong commitment to naming the pastoral dimensions of assessment and response.
Outcomes:
Gain awareness of how healing and renewal is strengthened therapeutically; Examine how prevailing cultural attitudes contribute to human distress and / or renewal

IPS 509 Psychopathology (3 Credit Hours)
Pre-requisites: IPS 517
Students will learn how to use the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) for diagnosing various psychopathological disorders.
Outcomes:
Familiarity with the DSM-5; DSM-IV TR multi-axial system; examine the etiology, treatment, and prognosis of selected mental disorders; develop interviewing skills to identify psychopathology; integrate a pastoral dimension of dealing with persons suffering from psychopathology

IPS 511 Internship Supervision I (3 Credit Hours)
Internship Supervision/Practicum I intend to facilitate entrance into the clinical internship site. Students will obtain further development of theory and skills of pastoral counseling. The course will facilitate the integration of theory and praxis, psychological and theological, and the personal and professional dimensions of one's identity as a pastoral counselor.
Outcomes:
Demonstrate growing integration of pastoral counseling skills and psychological theory into practice; Develop knowledge and understanding of competencies and diverse perspectives needed by spiritually integrated and clinically informed pastoral counselors

IPS 512 Ethics, Pastoral Counseling, and Spirituality (3 Credit Hours)
This course introduces students to the richness and diversity of the Christian moral tradition, giving particular attention to the deep interconnections between spirituality and ethics. It also introduces students to the codes, procedures and theoretical underpinnings of professional ethics, essential for those pursuing vocations as pastoral counselors and spiritual directors.
Outcomes:
Articulate ethical methodologies, relationship between spirituality and ethics, knowledge of several professional codes, skills of assisting clients, awareness of personal ethical stances and their integration in counseling and spiritual direction

IPS 513 Internship Supervision II (3 Credit Hours)
Pre-requisites: IPS 511
Supervision II/Practicum intends to facilitate ongoing development of theory and skills of pastoral counseling. Students will facilitate the integration of theory and practice, psychological and theological, personal and professional dimensions of one's identity as a pastoral counselor. The course includes the completion of the clinical integration project.
Outcomes:
Demonstrate integration of pastoral counseling skills and psychological theory into practice; Consolidate knowledge and understanding of competencies and diverse perspectives needed for spiritually integrated counseling by pastoral counselors

IPS 515 Research Methods (3 Credit Hours)
This course familiarizes students with research methods quantitative and qualitative approaches, experimental research design, interview and survey methods, descriptive and analytical statistics and evaluative research.
Outcomes:
Increased knowledge of research methods and statistics; critically evaluate research literature; become familiar with current research in counseling and pastoral counseling; identify research topics of personal and professional interest

IPS 517 Models of Pastoral Counseling (3 Credit Hours)
Models act like paradigms that inform therapists about what is important to focus on in their clients and what is healing, restorative, and growth-inducing in therapy. Each says something about what normal and abnormal functioning looks like and how therapy helps a person move from unhealthy to healthy functioning.
Outcomes:
Become familiar with basic counseling theories; articulate key concepts, assumptions about human nature, therapist, client relationship, process and goals, techniques, as well as strengths and limitations of each approach

IPS 518 Career Counseling for the Pastoral Counselor (3 Credit Hours)
This course will shed light on the value of the career counseling process by integrating career counseling theory, career inventories case studies, experiential learning and class discussion.
Outcomes:
General understanding of major career development theories and their relevance to the counseling process; Utilize multiple career development exercises and job search strategies, including resume-writing and interviewing techniques

IPS 520 Testing, Measurement & Assessment (3 Credit Hours)
Pre-requisites: Completion of a minimum of 24 credit hours, including Models of Pastoral Counseling (517), Psychopathology (509), and Human Development (555)
The course is required for licensure but is not a prerequisite for other courses. This course will provide an understanding of the role of individual and group approaches to assessment and evaluation and its role in diagnosis, clinical intervention, and treatment planning. It will cover assessment of the various attributes of a person though standardized tests, and also include an overview of statistical procedures relevant to test standardization and interpretation. Students will gain first-hand exposure to specific tests and learn to read and evaluate such instruments.
Outcomes:
This course is being added to the MA PC curriculum in response to a new requirement in state licensure for master level counselors

IPS 530 Clinical Pastoral Care Registration (0 Credit Hours)
Pre-requisites: Must be in MDiv or MAPS program to register for this course
CPE site must be approved prior to engagement. Clinical Pastoral Care registration for MDiv and MAPS students provides confirmation of CPE requirement for degree. This course serves as continuous enrollment and fulltime status verification for IPS students for whom CPE is a program requirement.
Outcomes:
Fulfills CPE or Contextual Ed requirement for MDiv and MAPS students

IPS 531 Christian Doctrine (3 Credit Hours)
The course is divided into two sections: (1) the historical evolution of Christian doctrine and its theological interpretations through Vatican II; (2) the development of doctrine in the post-Vatican II era, including an in-depth study of Karl Rahner's fundamental theology and contemporary theological issues with applications to present-day pastoral ministry.
Course equivalencies: X - IPS 531 / BEHL 502
Outcomes:
Students will discover the tools of historical theology and correlation; revising theological understanding in changed historical-cultural contexts; and the hermeneutical task of translating their meaning into present contexts

IPS 532 Social Context of Ministry (3 Credit Hours)
Christian life and ministry are socially located; they take place in specific social, cultural, political and economic contexts. We cannot minister effectively if we do not have a better understanding of the context in which we are called to serve. These contexts are the environment within which persons minister.
Outcomes:
Gain skills of critical social analysis and theological assessment for strategies of social change to facilitate ministry in a given context

IPS 541 Liturgy and Christian Sacraments (3 Credit Hours)
The Sacraments express our faith bringing us into an encounter with God's grace, forming us into the image of Christ. This course explores the theological, religious, and cultural origins of the liturgy and the sacraments as they have developed in response to the needs of the Church communities throughout time.
Outcomes:
Students will develop the ability to articulate a sacramental theology and understanding of the sacraments that enables them to address the meaning of the sacraments in connection to contemporary culture

IPS 545 The Foundations of Christian Spirituality (3 Credit Hours)
Enrollment Conditions: This course is required of all students in the MASp: Contemporary Spirituality Concentration and/or the Spiritual Direction Concentration; Is also required of all MDiv students. Christian spirituality (the "lived experience of Christian faith") is a separate but partnered academic field with theology today. Key issues are: defining "spirituality", methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

IPS 551 Social Ethics in the Catholic Tradition (3 Credit Hours)
Students should ideally complete IPS 416, 417, and 531 prior to taking this course. This course focuses on the tradition and practice of Catholic social thought. Students will become familiar with the documentary tradition of Catholic social teaching, as well as the ways that Catholic social thought has been embodied and advanced through the lives of Catholic activists and liberation theology. Particular attention will be given to history, texts, methodology, and significant figures in the tradition.
Outcomes:
Upon completion of this course, students will have a thorough knowledge of the tradition of Catholic social thought, will be able to analyze contemporary issues through the lens of this tradition, and will be able to enact this tradition in their ministerial contexts

IPS 553 Moral Theology and Christian Ethics (3 Credit Hours)
This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching. To articulate the history and central categories in Catholic moral theology; to analyze a variety of contemporary methodologies in theological ethics.

IPS 555 Human Person and Psychological Development (3 Credit Hours)
Human beings are created to grow and mature into their full humanity. Every phase of life carries particular psychological and spiritual agendas. While each person is unique, our developmental story from birth to death is also our universal human story with particular variations, sharpened around gender and cultural differences.
Outcomes:
Exploration of developmental differences; Discovery of reliable markers for ministry to persons throughout the life cycle

IPS 560 Liturgical Leadership (3 Credit Hours)
This practicum develops skills in preparation for preaching and presiding at liturgical celebrations. The student will become familiar with different preaching styles, as well as theories of preaching and presiding. The focus includes public communication and preaching skills, as well as supervising and training volunteer liturgical ministers. Knowledge of preaching and presiding styles and theory.
Outcomes:
Ability to preside at liturgical celebrations; Development of preaching and public speaking skills; Familiarity with liturgical rites

IPS 564 Foundations of Pastoral Care (3 Credit Hours)
Pastoral Care is the ministry of accompanying people in the difficult times of their lives. Students explore the history, theology and purpose of pastoral care, including their own personal loss experiences. Students will be able to assess who they are as minister and what they bring into the pastoral care environment. Students will demonstrate the ability to implement pastoral care skills.

IPS 565 Pastoral Leadership (3 Credit Hours)
Examines recent and contemporary leadership theories, principles and practices, and assists students' applications as pastoral leaders in their own religious traditions and institutions. Offers a wide array of readings from the organizational and corporate literature, church documents, and pastoral literature from Roman Catholic, hierarchical church, and congregational church perspectives.
Outcomes:
Apply leadership literature from organizational, corporate, and pastoral perspectives, growing personal capacity for integrating pastoral management and leadership performances appropriate to their religious traditions, governance structures, and communities

IPS 570 Introduction to Theology and Ministry (3 Credit Hours)
IPS 570: Introduction to Theology and Ministry is recommended as the first course in the program. This course explores the interplay among traditions of theology and ministry, the history of ministry and the challenge of relating foundational traditions to the present array of ministries. The course allows you to become more certain and deliberate about the skills that constitute ministerial practice and ministerial theology.
Outcomes:
Students clarify and articulate a theory of ministry and method of ministry from which to operate; The heart of the course is development of self-confidence ministerial capacities as a professional

IPS 572 Ignatian Spirituality (3 Credit Hours)
This course invites students to consider core elements and principles of Ignatian spirituality, through the study of Ignatius of Loyola's major works and relevant Ignatian literature. Particular attention will be given to the Spiritual Exercises and their use for spiritual direction and formation, discernment and prayer.
Outcomes:
Identify the distinctive characteristics of Ignatian spirituality; Acquire practical knowledge of Ignatian imaginative prayer and discernment of spirits; Learn to adapt and direct Ignatius' Spiritual Exercises for spiritual direction

IPS 573 Spiritual Exercises of St Ignatius (3 Credit Hours)
This course provides an introduction and overview to Ignatian spirituality and the Spiritual Exercises of St. Ignatius of Loyola, equipping students to provide spiritual direction to individuals making the Exercises. Throughout the course we will address and discuss Ignatian topics, such as the movements of the Spiritual Exercises, the importance of discernment as a spiritual director, and one's own personal experience with the Exercises.
Outcomes:
Recognize the Ignatian Rules for Discernment within the context of directing an individual making the Spiritual Exercises; Identify and witness the key movements and meditations of the Spiritual Exercises; Recognize key elements of Ignatian spirituality and how they fit in the Spiritual Exercises; Articulate one's own personal experience and transformation due to Ignatian Spirituality and the Spiritual Exercises; Engage with current and prudent practices and be aware of opportunities for continuing education as spiritual directors

IPS 578 Contextual Education Preparation (0 Credit Hours)
Restricted to Institute of Pastoral Studies students. Prepares students to engage in the practice of contextual education by orienting students to the contextual education framework, focusing on their own vocational identity, and reflecting on how students view the work of ministry. It also covers the logistics of procuring a site and conducting theological action research.
Outcomes:
Facilitate site selection and completion of site agreement; introduce the practice of Theological Action Research; be orientated to contextual education

IPS 579 Contextual Education Introduction (1.5 Credit Hours)
Restricted to Institute of Pastoral Studies students. Facilitates the student's initial foray into work at their contextual education site, through regular coaching for reflection and guidance as well as workshops on useful skills for ministry. Students gain 100 hours of hands on experience at their site of ministry and begin to develop a community-based theological action research project.
Outcomes:
To gain basic familiarity with the contextual education site and to build relationships within the community, and gain basic experience in the work of ministry pertaining to the site

IPS 580 Contextual Education I (1.5 Credit Hours)
Pre-requisites: Completion of at least 18 credit hours, attendance at prep session, approval of site and supervisor by CCE, completed required documentation
Students apply for placement with an approved site at which they will exercise & develop professional/ministerial skills. Students engage in a minimum of 200 hours of leadership praxis. Students receive practically oriented instruction, participate in practice-based workshops & reflect on their leadership experience with their peers & an experienced coach.
Course equivalencies: IPS 580/IPS 640
Outcomes:
Gain tangible skills for leadership in ministry; Test vocational commitments and refine vocational identity; Develop capacity for theological reflection especially toward the integration of discipleship, leadership and mission

IPS 581 Contextual Education II (3 Credit Hours)
Pre-requisites: IPS 580
Students continue in their field placement exercising professional/ministerial leadership and further developing their self-identified professional/ministerial skills. While continuing to engage these contexts, students meet in class to further reflect on their leadership in ministry, discerning emerging strengths and areas of needed growth.
Course equivalencies: IPS 641/IPS 581
Outcomes:
Gain further proficiency in skills for leadership in ministry; Deepen & refine vocational identity in relation to present & future work; Further develop capacities of theological reflection on their work of ministry

IPS 593 Integration Project (0 Credit Hours)
The Integration Project (typically a written paper) involves the personal integration and application of one's course of studies at IPS into one's vocational/ministerial identity. 593 is required for MDIV, MASJ, MASp, MAHCML and MAPS students (though MAPS-Health Care Chaplaincy concentration students take 493 instead). Enrollment Conditions: Students should register in their final semester of coursework, or when they are within 9 credits of completing the degree. Registration requires a signed copy of the Integration Project Proposal.
Outcomes:
Successful integration and assessment of students' studies and vocational development

IPS 596 Special Topics in Health Care Ethics (1-3 Credit Hours)
This course is restricted to IPS graduate students.

IPS 599 Special Topics (1-6 Credit Hours)
Topics will vary. Restricted to IPS graduate students.

IPS 605 Master's Study (0 Credit Hours)
IPS students who have not completed their degree are required to be continuously enrolled in a course until their degree is completed. This zero credit hour course fulfills that requirement for those who are finished with their coursework but not their final projects. Maintaining enrollment for those who are finished with their coursework but not their final projects.

IPS 610 Foundations of Social Justice (3 Credit Hours)
This course explores the philosophical, ethical and theological foundations for social justice with a particular emphasis on Catholic Social Teaching and Catholic social ethics, addressing the practice of justice with attention to concrete dilemmas which confront Christians in their efforts to do justice.
Outcomes:
To develop an in-depth understanding of social justice in the Catholic social teaching tradition, and in the Jewish and Christian scriptures; to articulate and support a working definition of social justice informed by the course

IPS 615 Liberation Theology (3 Credit Hours)
Liberation Theology refers to several related theologies that emerged in Latin America. Many more have been developed but all share the same basic methodology, focus their efforts on issues of social justice, and proceed with a prophetic voice. The course introduces the method of liberation theology and surveys a selection of primary texts from a variety of social contexts.
Outcomes:
Students will critically and constructively assess the contributions of Liberation Theology in the broader theological conversation; develop the skills necessary to assess and respond theologically to their own social contexts

IPS 620 Diversity and Equity (3 Credit Hours)
This course explores diversity in a global environment characterized by color, ethnicity, culture, national origin, class, gender, age, religion, physical or mental ability, gender identity and sexuality. Students will effectively analyze and assess the cultural and institutional context of social justice issues. IPS 620 is cross-listed with SOWK 502: Oppression,Privilege,Diversity.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

IPS 625 Social Ethics: Politics and Global Economics (3 Credit Hours)
Economic institutions and issues of global justice are considered in the writings of philosophers, economists and socio-political theorists. Students effectively analyze institutional contexts of social justice issues and understand foundational local, national, and international justice issues linked to the political, economic, and social arenas. Analyze & evaluate current trends in international relations policy, economic markets & environmental impact from social justice perspective. Develop tactics for engaging in the work of social change within emerging global context.

IPS 627 Social Entrepreneurship (3 Credit Hours)
Intensive consideration of different examples of social entrepreneurship, including at least one utilizing Catholic Social Teaching; and more general observations of other models of social engagement and challenging unmet needs.
Outcomes:
Creation of an initial business sketch for a viable social entrepreneurship project to address a specific need

IPS 635 Community Organizing and Community Development (3 Credit Hours)
This course combines experiential learning with theories of community organization and development, exploring methods, strategies and key ideas of broad-based community organizing. Students will learn and practice the tools needed to organize as well as exhibit initial (foundational) competencies in social advocacy, community organizing and social change. IPS 635 is cross listed with SOWK 509: Community Intervention.
Course equivalencies: X- SOWK 509/IPS 635
Outcomes:
Increase understanding of approaches and methods of community organizing and community development; Become competent in evaluating resources available for the work of community organizing and development

IPS 651 Clinical Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues that will be examined and analyzed include problem-solving methods, the theory and practice of informed consent, end-of-life decision making, physician-assisted suicide, pediatric ethical dilemmas, spirituality in clinical encounters, the injustice of health care disparities, and the role of ethics committees.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with the terminology, resources, and major frameworks of ethical analysis in biomedical ethics

IPS 652 Organizational Ethics I (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Social and economic context of health care in the United States will be overviewed as the background for considering the responsibilities social justice entails to self, one's profession, one's patients, and the underserved

IPS 653 Organizational Ethics II (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Questions of leadership style and theories of what constitutes effective leadership are considered; Communication strategies and methods of organizational change key focuses

IPS 654 Catholic Bioethics and Clinical Practice (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
Assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics

IPS 655 Catholic Bioethics and Social Justice (3 Credit Hours)
Course involves an historical study of the development of the body of official Catholic Social Teaching specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Develop the participants understanding of the principles of Catholic Social Teaching and their application to the healthcare context

IPS 656 Advancing Health Equity Practice (3 Credit Hours)
A two-month long blended course of online learning and a two-day intensive experience on the HSD campus. Topics cover the role of racial and economic health disparities in the process of care and health outcomes, Cultural and Linguistic Appropriate Standards (CLAS) in health care, self-assessment and evaluation of institutional needs.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Knowledge and skills gained in this course can be used to develop an advocacy role for evaluating and promoting cultural competency within a health care system

IPS 657 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

IPS 658 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

IPS 659 Management of Professionals in Healthcare Organizations (3 Credit Hours)
This course offers students the opportunity to analyze, expand, and synthesize their understanding of technical, human relations and conceptual skills essential to functioning within the role of manager/administrator in health care settings.
Course equivalencies: X-IPS 659/CMAN568
Outcomes:
Analyze and synthesize knowledge of the concepts of professional role and organizational dynamics for use as a foundation for the role of manager/administrator in health care settings

IPS 660 Leadership in Social Justice Organizations (3 Credit Hours)
This course explores different approaches to leadership on behalf of social justice with a strong focus on developing a personal leadership style and practices to deepen students' sense of vocation. Develops a number of practical leadership skills connected to discernment, leading through adaptive challenges, team development and bridge building, management, and visioning.
Outcomes:
To understand leadership models and techniques for social justice organizations; To integrate spiritual practices and disciplines into leadership and management; To develop skills managing and interfacing with faith-based and non-profit

IPS 672 Media for Ministry and Mission (3 Credit Hours)
For more than a hundred years, film, radio, and television have had a profound effect on the practice on ministry and pastoral care. Now in the 21st century, the explosion of new types of interactive and social media have revolutionized our interactions, our economy, and our world. Churches and social justice organizations, however, have often been slow to adopt or even explore these new technologies.
Outcomes:
Participants will leave this course with an understanding of how to navigate the changing media landscape, think theologically about digital communications, and put media tools to work for ministry and mission; You will learn to plan strategic campaigns, create content, and measure results; Coursework will include engagement with various platforms, as well as an introduction to key concepts from media history and theory

Counseling

- Counseling for Ministry (MA) (p. 1780)
- Pastoral Counseling (MA) (p. 1781)
- Pastoral Counseling Certificate (p. 1783)

Counseling for Ministry (MA)

The 36 credit hour Master Of Arts degree in Counseling For Ministry is designed to prepare students to become competent and effective pastoral caregivers in their present and future ministries.

Our contemporary social and cultural contexts reveal strong needs for ministry-based caregiving with competency from within religious traditions and their communities. The long and rich history of counseling within ministry gives witness to that commitment called "ministry of care", or in Jesuit terms, *cura personalis*.

The Master's in Counseling for Ministry degree program is suited to international students and others who do not require the 60 credit hour MA in Pastoral Counseling that is designed to meet the requirements for Illinois licensure as a clinical counselor.

The MA in Counseling for Ministry mirrors the competency requirements of the Pastoral Counseling program but without the additional licensure requirements, allowing students to serve the therapeutic needs of faith communities in the USA and around the world.

To learn more about the master's degree in counseling for ministry and studying in the USA, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Counseling for Ministry, students will be able to demonstrate:

- The ability of pastoral caregivers to engage their social and cultural contextual environments in order to expand their pastoral competencies. (Cultural Context)
- The ability to interpret and assess pastoral caregiving in relation to the historical and contemporary pastoral commitments of faith communities. (Theology/Spirituality/Religious Heritage)
- The ability to offer competent and meaningful pastorally supportive services within largely faith-based contexts, based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas within the range of their defined competencies. (Skills/Ministerial Leadership)

Pastoral Counseling (MA)

Pastoral counseling at IPS is understood as professional therapeutic ministry. This ministry is pursued with a vision of the human person that includes insights from the human sciences as well as religious and spiritual dimensions of life. Often, but not always, pastoral counseling takes place in a setting that reflects a spiritually-oriented environment. The purpose of the M.A. in Pastoral Counseling is to prepare caregivers and counselors for this work.

This degree program prepares pastoral clinicians to provide therapeutic services in faith-based and other contexts. A multidisciplinary curriculum and peer learning groups are among the distinguishing characteristics of this degree.

Students in this program will find an understanding of pastoral counseling incorporating both the best of psychological theory and the riches of contemporary theology. They will find educational and spiritual approaches that combine both theory and practice. They will discover a vision of the counselor that reflects both individual and relational work, supportive and intensive therapies, psychological competence and theological congruence. And they will find a methodology that is consistently committed to the achievement of personal and professional integration.

In order to meet the current licensure requirements of the state of Illinois (LPC as a base for moving toward LCPC), and to respond to developing nationwide trends toward interstate licensure portability, while continuing to provide the integrative pastoral focus of Loyola's MA Pastoral Counseling degree, the degree has moved to a three year, 60-hour design.

- LPC = Licensed Professional Counselor
- LCPC = Licensed Clinical Professional Counselor

The Master's in Pastoral Counseling program can also be completed half time over four or five years. The half time student's curriculum is determined with their advisor.

The Master's in Pastoral Counseling can be completed entirely online. Students seeking to complete the degree fully online and in three years (as a full-time student) must enroll and begin in a Fall semester.

A diverse number of internship sites are available from non-profits, governmental organizations, schools, counseling, mental health and faith-based sites. Students apply for these internships and are selected by the sites. Students may submit a site of their own choosing, but it must be approved by IPS.

International Students

International students who will study in person in Chicago must enroll and begin the curriculum in a Fall semester.

Learning Outcomes

Master of Arts in Pastoral Counseling

By completing the Master of Arts in Pastoral Counseling, students will be able to demonstrate:

- The ability to pastorally and clinically engage human psychological, relational, and contextual distress in therapeutic ways. (Cultural Context)
- The ability to interpret, engage, and expand psycho-spiritual meaning making in relation to the pastoral legacy of faith communities. (Theology /Spirituality/Religious Heritage)
- The ability to offer competent therapeutic services in secular and/or faith-based contexts based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess and diagnose personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas. (Skills/Ministerial Leadership)

Pastoral Counseling Certificate

Available On-Site and Online. This advanced graduate certificate program prepares counselors to practice counseling in secular and/or faith-based settings through gaining additional skills in psychospiritual therapeutic accompaniment. A Masters degree in counseling or Ministry/Divinity/Theology is a prerequisite for this certificate. Five courses comprise the certificate with one of these courses to include a one semester practicum and/or internship supervision experience.

Learning Outcomes

- The Certificate in Pastoral Counseling prepares counselors of various theoretical orientations to practice spiritually integrated counseling within faith-based and/or secular settings.

Divinity

- Divinity (MDiv) (p. 1783)
- Divinity with a Concentration in Chaplaincy (MDiv) (p. 1786)
- Divinity with a Concentration in Spiritual Direction (MDiv) (p. 1787)
- Divinity and Pastoral Counseling (MDiv/MA) (p. 2212)
- Divinity and Social Justice (MDiv/MA) (p. 2213)

Divinity (MDiv)

Available Online. The Master of Divinity (MDiv), is a comprehensive degree designed to meet the educational needs of persons called to professional ministerial leadership. Those who elect to pursue this Master of Divinity degree are making a major commitment to prepare for pastoral ministry, choosing to join in the adventure of discerning their gifts and preparing themselves for a life of religious leadership in an evolving church and society.

These ministers extend the religious tradition in spiritual leadership in a variety of contexts (parishes and churches, healthcare institutions, faith-based non-profit organizations, retreat centers, educational institutions, etc.) by preaching and teaching, by counseling, consoling, and offering pastoral care, by serving and challenging, by leading prayer and praying, by empowering and equipping, by prophetically pointing to injustice and by faithfully organizing for needed change. Born of the present needs for church ministers and decision-makers, this degree qualifies students for the new genre of pastoral leadership. The MDiv cultivates a ministerial way of being through academic and formational requirements, which parallel the Church's traditional seminary setting. Loyola's Jesuit and university context provides the breadth and depth that tomorrow's Church requires.

The religious leaders who emerge from this MDiv program are called upon to resource (both to mediate and to augment) the Christian Tradition. Thus, they require education and formation not only for the way things are, but also for the way things are going to be. They need to be generalists grounded in the faith tradition, but also specialists possessing the interpersonal and spiritual skills to empower others in particular settings. These persons will be leaders who can articulate in religious language their own profound experience, discern the presence of the divine in others' experience, and convoke and nurture community, accompanying others on the journey through life.

While focused primarily to prepare non-ordained people for ministerial leadership, the Loyola MDiv program also welcomes members of religious communities, clergy, and participants from other communions committed to an academic and formational experience attuned to the diversity, mutuality, and collaboration that will characterize tomorrow's Church.

Students can pursue the degree on campus or as a distance program via online education. For the distance program all courses are available entirely online. Students can take courses on either a full or part-time basis. Full-time students take three-four years to complete the program; part-time students typically complete their degree within five-six years. The typical course load is three or four courses per semester for full-time students, with additional classes taken over two summers. The MDiv degree cannot be completed on a summers-only basis.

The MDiv of the Institute of Pastoral Studies at Loyola University Chicago truly assists persons in achieving a degree of difference for tomorrow's Church as it prepares people to lead extraordinary lives.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

Related Programs

Combined

- Divinity and Pastoral Counseling (MDiv/MA) (p. 2212)
- Divinity and Social Justice (MDiv/MA) (p. 2213)

Curriculum

The MDiv curriculum recognizes that professional ministerial leadership emerges from faith-filled ministerial practice and seeks reflective critical understanding to prepare graduates to know, serve and love practically.

This gives rise to three aspects of the MDiv program: faith formation, reflective critical understanding and ministerial practice.

These areas of the curriculum prepare students for work in various areas:

- The church's institutional placements, which include parish leadership, diocesan administration, hospital chaplaincy and campus ministry, and parallel religious organizations, which include ministry options in organizations dealing with religious communications.
- Peace and justice advocacy, parochial school administration, as well as spirituality centers.
- Public-service positions such as legal advocacy, industrial chaplaincy, business ethics, social work, nursing and counseling that invite a pastoral or spiritual perspective, along with standard knowledge of the field.

The MDiv degree is a 72-credit-hour (24-course) degree program, composed of three interconnected components: academic coursework, pastoral formation and ministerial skills. The IPS MDiv curriculum recognizes ministerial leadership as emerging from faith-filled ministerial practice, seeking reflective critical understanding, so as to serve, know, and love practically. These three movements are reflected in each aspect of the MDiv Program: Faith Formation, Reflective Critical Understanding and Ministerial Practice.

The MDiv curriculum builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program.

IPS 581	Contextual Education II	3
Total Hours		**71.5-73.5**

Contextual Education

As a "pastoral" institute, IPS operates from a "praxis paradigm*" in relation to theological and ministerial education. This means that in Contextual Education students acquire knowledge for the sake of religious transformation as they experience God's action in persons' lives and link this action with tradition. Thus, images of Contextual Education limited to giving students work experience. while they are studying, or that understand Field Education to be the context in which to "learn skills," are marginal to and outmoded for the praxis paradigm for pastoral studies. On the contrary, Contextual Education is an essential locus for exercising and gaining the knowledge essential for pastoral studies. It is a theological exercise, including four movements:

- Describing the community's practice
- Analyzing this practice historically
- Systematically relating life themes in the practice to the religious traditions
- Establishing the norms and strategies of ministerial response to the practice

Contextual Education plays a major role in the very orchestration of theological education, an activity through which students generate data for theological construction and reconstruction. It also provides a setting for the student to exercise ministerial skills of caring for creation (cosmic, social, personal, and individual welfare), proclaiming the faith, and enacting the community.

Contextual Education then stands at the portal between the community and the university. In one direction the Contextual Education students join the community engaging the religious experiences of life. In the other, at the Institute, they join teachers and colleagues reflecting on the community's practice in light of the religious traditions. During this exchange MDiv Students learn to generatively practice reflection and reflectively practice. They learn to become "ministers," ambassadors to the community.

MDiv students normally engage in Contextual Education during the second year of the program (or after 8–12 courses have been completed). This allows students to do one year of classroom work and to prepare to engage a Contextual Education placement. It provides another year of classroom endeavor after the experience to concentrate on one's ministry objectives, refined in Contextual Education.

Clinical Pastoral Education

Clinical Pastoral Education (CPE) is a an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before application to candidacy to address one key candidacy concern, namely, personal growth matters of self awareness and self reflection. The student uses material from the CPE report to support his or her candidacy.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

MDiv Midpoint Review

When students reach the half-way point in their coursework, they being preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement, as well as the student's progress toward the completion of the M.Div. program. The advisor will note the successful completion of the Midpoint Review in the student's eportfolio on TaskStream. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction or pastoral counseling, re-taking courses in which one did not receive a passing grade, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the MDiv program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Faith Formation

Spiritual Direction

Spiritual direction is the process of deepening one's relationship with God through a reflection and discernment process shared with a mentor trained to facilitate listening and responding to God's continuing revelation in the whole of one's life. It is recognized that many MDiv students have a spiritual director and the availability of this service is not intended to replace that long-standing relationship. However IPS does provide the opportunity of experienced spiritual directors for all IPS students. Individual sessions will be held for one hour every other week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each

semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Pastoral Counseling

Pastoral counseling is a process of developing a deeper understanding of self and self-in-relationship to others, to society and to the environment. Particular attention is given to theological and psychological dimensions of personal growth and integration. Individual sessions will be one hour each week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Click here (https://www.luc.edu/ips/resources/spiritualformation/) **for further information on the Institute's program of Personal Growth and Spiritual Development.**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Divinity with a Concentration in Chaplaincy (MDiv)

The M.Div. with the Chaplaincy concentration prepares students for the process to be certified as a Board Certified Chaplain (BCC via BCCI (https://bcci.professionalchaplains.org/content.asp?pl=25&contentid=25)) with the Association of Professional Chaplains (APC) (https://www.professionalchaplains.org/) or The National Association of Catholic Chaplains (NACC) (https://www.nacc.org/). On the IPS website, you can learn more about Chaplaincy (https://www.luc.edu/ips/resources/chaplaincy/).

Combined

- Divinity and Pastoral Counseling (MDiv/MA) (p. 2212)
- Divinity and Social Justice (MDiv/MA) (p. 2213)

Curriculum

The Master of Divinity, M.Div. (p. 1783) degree is a 72-credit-hour (24-course) degree program that builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program. All components of the M.Div. Chaplaincy concentration, except for Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/), can be completed online or on-campus. Some courses are also available in the summer through the IPS Rome program. Students can complete the CPE requirement at any ACPE accredited location (across the USA).

Contextual Education

Based on the requirements for Board Certification as a chaplain, the M.Div.—Chaplaincy concentration requires students to complete four units of Clinical Pastoral Education (CPE). Three of these units must be submitted for Advanced Standing (https://www.luc.edu/media/lucedu/ips/pdfs/Advanced_Standing-1.pdf) credits for two Contextual Education courses (6 credit hours): IPS 580 Contextual Education I and IPS 581 Contextual Education II.[1] More information on CPE can be found here (https://www.luc.edu/ips/resources/cpe/). During the fourth and final unit of CPE, students must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

[1] Certification through APC only allows 1 unit of CPE to count for 3 credits towards the 72 credits of graduate work required. Students who plan to seek board certification may need to take an additional 3 credit elective.

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

Final Integration Project

The final program requirement is IPS 493 Health Care Integration Project Portfolio. In IPS 493 Health Care Integration Project Portfolio, students are mentored in the process of preparing the materials required to sit for board certification.

More information about the vocation of chaplaincy can be found here (https://www.luc.edu/ips/resources/chaplaincy/).

To learn more about the Spiritual Direction concentration, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate an understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate a competency to obtain certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC), The Association of Professional Chaplains (APC), or other recognized national certifying association.

Divinity with a Concentration in Spiritual Direction (MDiv)

The IPS Master of Divinity (M.Div.) offers a unique Spiritual Direction concentration to provide students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

Total Hours		**72**

Contextual Education

The Contextual Education requirement is adapted to enable students of the M.Div. Concentration in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained coach/mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Dr. Dan Rhodes, Faculty Coordinator of Contextual Education.

Clinical Pastoral Education

Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/) is an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before the application to candidacy to address one key candidacy concern, namely, personal growth matters of self-awareness and self-reflection. The student uses material from the CPE report to support his or her candidacy. Students complete CPE units at any ACPE Accredited Center (https://acpe.edu/education/cpe-students/) and must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

Spiritual Direction

Students must complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the M.Div. program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Final Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit course that facilitates the completion of the Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Pastoral Studies

- Church Management Certificate (p. 1789)
- Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish) (p. 1790)
- Pastoral Leadership Certificate (p. 1794)
- Pastoral Studies (MA) (p. 1795)
- Pastoral Studies with a Concentration in Church Management (MA) (p. 1796)
- Pastoral Studies with a Concentration in Digital Communication (MA) (p. 1797)
- Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA) (p. 1798)
- Pastoral Studies with a Concentration in Religious Education (MA) (p. 1799)
- Religious Education Certificate (p. 1800)

Church Management Certificate

This Certificate emerges from reflection on the gap in skill sets among the leaders of many churches today, Catholic and Protestant. Members of church staff, comprised increasingly of laypersons with degrees in pastoral ministry, education, counseling, and theology, find themselves engaging in activities related to budgeting, project management, human resources, organizational development and change, and more. There is a need for parish leaders and pastoral ministers to have the education, training, and skills associated with these areas.

The MBA curriculum at the Quinlan School of Business includes a set of core and non-core courses. The core graduate courses at Quinlan are designed for those with no business experience. Students who already have a business degree, however, or who have taken business courses in the past (within the last 5-10 years) and possess significant business experience should be advised to skip the core courses and go directly to more specific and specialized courses in consultation with their academic advisor at IPS and the Associate Dean for Programs at the QSB.

IPS offers an education in Church Management through a concentration within the MA in Pastoral Studies and through a Graduate Certificate. Click here for information on the MA Degree and Concentration option: Pastoral Studies with a Concentration in Church Management (MA) (p. 1796).

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Certificate

- Pastoral Leadership Certificate (p. 1794)
- Religious Education Certificate (p. 1800)

Curriculum

The Graduate Certificate in Church Management requires two courses (6 credit hours) at the Institute of Pastoral Studies and three courses (9 credit hours) at the Quinlan School of Business (QSB), for a total of 15 hours. The two IPS courses will be chosen in consultation with the academic advisor. The decision concerning which courses to take at QSB will be determined according to each student's experience in consultation with their academic advisor and the Assoc. Dean for Programs at QSB. There are, however, guidelines that will ensure that each student is well formed in the areas of accounting and management. The Graduate Certificate in Church Management can be completed online, though there are more course options at QSB for students who take in-person courses.

Church Management

- The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and

organizational development and change in non-profit or faith-based settings.

Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish)

DISPONIBLE EXCLUSIVAMENTE EN LÍNEA

El programa Virtual (Online) Bilingüe (Español) Maestría de Artes en Estudios Pastorales (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSSpanish.pdf) prepara estudiantes para el servicio ministerial en comunidades biculturales y bilingües (diócesis, parroquias, escuelas, hospitales, y otras organizaciones comunitarias), tanto a nivel local como internacional. Este es un programa que integra la formación teológica y pastoral en cuatro áreas fundamentales:

1. Humana
2. Espiritual
3. Intelectual
4. Ministerial

Por medio del estudio e investigación y de la integración de un proyecto teológico-pastoral en el contexto de sus experiencias, los estudiantes desarrollan sus cualidades y habilidades personales para su ministerio, arraigados en la fe y en la comunión eclesial y Trinitaria. El Programa Virtual Bilingüe MAPS en el Instituto de Estudios Pastorales ofrece a los estudiantes una amplia fundación sistemática para una variedad de ministerios y herramientas necesarias para comprometerse crítica y constructivamente con los retos y oportunidades de nuestro tiempo.

Esta Maestría de Artes en Estudios Pastorales (MAPS) *Bilingüe* en *Español* es completamente virtual, con sesiones sincrónicas y asincrónicas. En las sesiones sincrónicas estudiantes y profesores desde distintas partes del mundo se reúnen simultáneamente en un salón virtual por medio de plataformas (Sakai) y herramientas electrónicas ofrecidas por la Universidad de Loyola Chicago. En las sesiones asincrónicas los estudiantes consultan los recursos y materiales de clase y envían sus ensayos, tareas y preguntas en Sakai de acuerdo a sus propios horarios.

De esta manera los estudiantes no necesitarían trasladarse a Chicago para sus cursos, pero si pudieran asistir, con gusto les daremos la bienvenida a Chicago para la ceremonia de graduación.

Este programa es dialéctico y contextual, en el que interactúan las visiones, ideas, y las *praxes* de teólogos y agentes de pastoral que trabajan en comunidades bilingües y multiculturales en los Estados Unidos de Norteamérica y alrededor del mundo, unidos por el amor al evangelio de Jesucristo y comprometidos con los valores del Reino de Dios.

Al terminar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes estarán preparados para responder al los desafíos pastorales contemporáneos e integrarse en diversos ministerios en comunidades, instituciones, y organizaciones bilingües y multiculturales.

Visión General

El programa virtual (en línea) bilingüe (español) de maestría en artes en estudios pastorales (MAPS) contiene 12 clases, una experiencia formativa práctica llamada Educación Contextual y un documento de integración acumulativo escrito en el semestre final.

- Las clases estan ofrecidas en español e inglés
- Se puede terminar en 2 años consecutivos
- El programa empieza en el verano (mayo) de cada año
- Todos los cursos se ofrecen en línea, con formatos tanto sincronizados (conferencias de video) como no sincronizados (foros de discusión) que te proveen la oportunidad de ser flexible y balancear el trabajo y vida personal.
- Requisitos de horas de práctica supervisada (Contextual Education) pueden realizarse en tu propia comunidad local.

Importante: Los solicitantes deben tener fluidez en español e inglés para completar con éxito el programa. El MAPS bilingüe en línea es un modelo de cohorte que solo comienza en verano. Las solicitudes deben presentarse antes del 1 de abril de cada año calendario. Se requiere inscripción continua; los cursos se ofrecerán en el semestre de otoño (16 semanas), semestre de primavera (16 semanas) y sesiones de verano (6-8 semanas).

English Text

Available Exclusively Online

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSBiligual.pdf) program prepares students for ministerial service in bicultural and bilingual communities (dioceses, parishes, schools, hospitals, and other community organizations), both locally and globally. This is a program that integrates theological and pastoral formation in four fundamental areas:

1. Human
2. Spiritual
3. Intellectual
4. Ministerial

Through study and research and the integration of a theological-pastoral project in the context of their experiences, students develop their personal qualities and abilities for their ministry, rooted in faith and in ecclesial and Trinitarian communion. The MAPS Online Bilingual Program at the Institute for Pastoral Studies offers students a broad systematic foundation for a variety of ministries and tools necessary to critically and constructively engage with the challenges and opportunities of our time.

This Bilingual Master of Arts in Pastoral Studies (MAPS) in Spanish is completely virtual, with synchronous and asynchronous sessions. In synchronous sessions, students and teachers from different parts of the world meet simultaneously in a virtual room through platforms (Sakai) and use electronic tools offered by the University of Loyola Chicago. In asynchronous sessions, students consult class resources and materials and submit their essays, assignments and questions in Sakai according to their own schedules. In this way, students would not need to travel to Chicago for their courses, but if they could attend, we will gladly welcome them to Chicago for the graduation ceremony.

This program is dialectical and contextual, in which the visions, ideas, and praxes of theologians and pastoral agents working in bilingual and multicultural communities in the United States of America and around the

world, united for the love of the gospel of God, interact. Jesus Christ and committed to the values of the Kingdom of God. Upon completion of their Master of Arts in Pastoral Studies (MAPS) students will be prepared to respond to contemporary pastoral challenges and integrate into diverse ministries in bilingual and multicultural communities, institutions, and organizations.

Overview

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) program contains 12 classes, a practical formative experience called Contextual Education, and a cumulative Integration Paper written in the final semester.

- Classes are offered in Spanish and English
- Program can be completed in 2 consecutive years
- The program begins in the summer (May) of each year
- All courses are offered online, with both synchronized (video conferencing) and non-synchronized (discussion forums) formats that provide you with the opportunity to be flexible and balance work and personal life.
- Supervised practice hour requirements (Contextual Education) can be completed in your own local community.

Important: Applicants must be fluent in both Spanish and English in order to successfully complete the program. The MAPS Online Bilingual degree is a cohort model with a summer start only. Applications must be submitted by April 1 of each calendar year. Continuous enrollment is required; courses will be offered in the fall semester (16 weeks), spring semester (16 weeks), and summer sessions (6-8 weeks).

Descripciónes de los 8 Cursos Comunes (3 Créditos cada Clase)

IPS 570 Introducción a la Teología y Ministerio

Descripción: Este curso, recomendado al comienzo de este programa, explora la interacción entre las tradiciones de teología y ministerio, la historia del ministerio y los retos que presentan al relacionar las tradiciones fundacionales y la diversidad contemporánea de ministerios. Este curso capacita a los estudiantes a ser más asertivos y reflexivos acerca de las habilidades que constituyen la teología y la praxis en el ministerio pastoral.

Resultados: Los estudiantes clarificarán y articularán la teoría y método del ministerio desde los cuales va a realizar su acción pastoral. El corazón de este curso es el desarrollo de autoconfianza de sus habilidades pastorales como un profesional.

IPS 417 Literatura del Israel Antiguo

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Antiguo Testamento: el Pentateuco, los Libros Históricos, los Profetas y la Literatura Sapiencial en su contexto literario, histórico, social y religioso por medio de los métodos de análisis histórico crítico y literario.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Antiguo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 416 Introducción al Nuevo Testamento

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Nuevo Testamento en su contexto literario, histórico, social y religioso del mundo Palestino y Greco Romano.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Nuevo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 531 Doctrina Cristiana

Descripción: En este curso estudiaremos el desarrollo de la doctrina cristiana desde los Padres de la Iglesia, los primeros Concilios Ecuménicos hasta el Concilio Vaticano II. En este curso analizaremos

particularmente el pensamiento de Karl Rahner, Gustavo Gutierrez y Jon Sobrino, así como los documentos latinoamericanos postconciliares y sus repercusiones en la praxis pastoral.

Resultados: Los estudiantes demostrarán y articularán un conocimiento orgánico, sistemático e integral del desarrollo de la Doctrina Cristiana y su aplicación en el contexto histórico y social de su ministerio pastoral.

IPS 402 La Iglesia y su Misión

Descripción: En este curso estudiaremos diversos modelos y tradiciones de la Iglesia y su misión en el mundo, desde el Nuevo Testamento hasta el Concilio Vaticano II, así como las reflexiones y praxes pastorales postconciliares, particularmente en Las Américas.

Resultados: Los estudiantes articularán una visión integral, orgánica y crítica de los distintos modelos de Iglesia y su misión a lo largo de la historia, a fin de identificar los retos y oportunidades de sus propias comunidades eclesiales y su acción pastoral en el contexto socio-económico y cultural del mundo contemporáneo.

IPS 541 Liturgia y Sacramentos

Descripción: En este curso estudiaremos los orígenes bíblicos, teológicos, religiosos y culturales de la liturgia de los sacramentos en las comunidades eclesiales a lo largo de la historia.

Resultados: Los estudiantes desarrollarán la habilidad de articular la teología sacramental y litúrgica de los sacramentos, y así capacitarlos para que respondan al significado y celebración de los sacramentos en su contexto histórico y cultural contemporáneo.

IPS 553 Teología Moral y Ética Cristiana

Descripción: Los estudiantes se familiarizarán con la tradición de la moral católica, así como también con diferentes metodologías contemporáneas sobre ética. Daremos particular atención a la historia de la ética, sus métodos, la función de la Escritura en el razonamiento moral, y en las enseñanzas de la Doctrina Social de la Iglesia.

Resultados: Los estudiantes serán capaces de articular la historia y las categorías centrales en la teología moral Católica para analizar diversas metodologías contemporáneas en teología ética.

IPS 555 La Persona Humana y el Desarrollo Psicológico

Descripción: Los seres humanos son creados para crecer y madurar plenamente. Cada fase de la vida conlleva agendas psicológicas y espirituales particulares. Si bien cada persona es única, la historia de nuestro desarrollo desde el nacimiento hasta la muerte es también nuestra historia humana universal con variaciones particulares, definidas y moldeadas por el género y las diferencias culturales.

Resultados: Los estudiantes explorarán las diferencias del desarrollo humano, así como las características y cualidades confiables para el ministerio de las personas a lo largo de los ciclos de la vida.

Descripciónes de los 3 Cursos Especializadas (3 Créditos cada Clase)

Administración y emprendimiento en contexto pastoral

Descripción: En este curso se hará un repaso general sobre las habilidades fundamentales de administración en el contexto pastoral: financiación y manejo de proyectos, recaudación de fondos, elaboración de presupuestos, políticas de salvaguardia, formación de equipos, manejo de voluntarios, y coordinación de reuniones. Todo desde una perspectiva de emprendimiento que aborde las necesidades de proyectos e iniciativas pastorales.

Resultados: El estudiante demostrará la capacidad de planificar, evaluar, estructurar, coordinar y ejecutar proyectos o iniciativas pastorales con habilidades de planificación estratégica y análisis efectivo en la toma de decisiones.

El ministerio con jóvenes y espiritualidad hoy

Descripción: Los estudiantes explorarán las bases para el ministerio con los jóvenes, incluyendo los componentes esenciales para acompañar a los jóvenes y adultos jóvenes en el desarrollo de su identidad como discípulos misioneros. Exploraremos la espiritualidad ignaciana como una herramienta para responder a las preguntas y desafíos recurrentes que dan forma a la búsqueda de los jóvenes de sentido y propósito en la vida.

Resultados: Los estudiantes podrán articular y evaluar las diferencias entre Youth Ministry, Young Adult Ministry y Pastoral Juvenil Hispana en un panorama actual de multiculturalismo, creciente secularización y desafiliación entre jóvenes, jóvenes adultos, y jóvenes hispanos/latinos hoy, así como encontrar nuevas formas de ayudar a los jóvenes que están en una jornada espiritual a través del discernimiento y el acompañamiento.

Ética Social Católica & Migración

Descripción: Nuestro trabajo pastoral con los y las migrantes requiere de una teología y ética de la solidaridad que dote de mayor sentido al Evangelio y a la experiencia eclesial a través de una cultura del encuentro. En este curso, los y las estudiantes recibirán la oportunidad de:

1. Discernir los “signos de los tiempos” escuchando y poniendo palabras a los sufrimientos, realidades y esperanzas del Pueblo Migrante;
2. Recibir las herramientas para la reflexión personal y comunitaria sobre el fenómeno de la migración e iluminar esta realidad desde una ética de solidaridad expresada en actos de caridad (acogiendo al extranjero) y la justicia social (creando cambios sistemáticos);
3. Tomar conciencia de la condición psicológica, espiritual y social que hace del sujeto migrante una persona extremadamente vulnerable y darse cuenta de que nuestra salvación depende del trato que le hayamos dado (Mt 25,40);
4. Tomar conciencia de nuestra condición de seres sociales y del llamado universal al amor a través de “*La Teología del Buen Samaritano*” como una de las enseñanzas claves de la nueva encíclica del Papa Francisco, *Fratelli Tutti*, la cual implica crear cambios sistemáticos en las estructuras para facilitar el restablecimiento legal e institucional de los migrantes;
5. Reflexionar sobre la importancia y centralidad del acompañamiento como el estilo propio de Jesús y la característica esencial de sus distintos aspectos y retos incluidos en el acto pastoral de acompañar a personas migrantes.

Nota: El curso incorporará una religiosidad popular al igual que las experiencias personales de los y las estudiantes con el fin de acompañar los temas claves que se encuentran en el centro mismo de nuestra Enseñanza Social Católica.

Resultados: Los estudiantes se familiarizarán con la ética social en la Tradición Católica, incluyendo los principios claves establecidos en documentos modernos de los siglos XX y XXI. Los y las estudiantes serán capaces de profundizar en su llamado bautismal de salir al encuentro de los y las migrantes, acompañarles y cuestionar las estructuras que les impiden su desarrollo espiritual y social desde un plan pastoral que incorpore herramientas metodológicas, prácticas y

pastorales con las cuales puedan organizar su ministerio de una manera sistemática y efectiva.

Descripción de "Contextual Education" (Una Secuencia de 3 Clases)

El desarrollo contextual es donde el ministerio del estudiante integra los cuatro aspectos del programa MAPS. Es el lugar para integrar el aprendizaje teológico, ministerial, personal y espiritual en el contexto de su ministerio pastoral cotidiano. En este contexto el estudiante desarrolla su capacitación como agente de pastoral en el lugar donde ejerce su ministerio por medio de la supervisión y la educación semanal facilitadas por profesores y compañeros.

Este desarrollo contextual puede estar directamente relacionado con el trabajo que el estudiante está realizando o puede ser seleccionado de entre lugares que el Instituto de Estudios de Pastoral ha cultivado en los Estado Unidos de Norteamérica, Latinoamérica, España, u otros lugares del mundo.

1. IPS 578 Preparación de Educación Contextual (*0 créditos, precio del curso $125.00*)
2. IPS 579 Introducción a la Educación Contextual (*0 créditos, precio del curso $250.00*)
3. IPS 580 Educación Contextual (*3 horas crédito*)

La Educación Contextual es la experiencia pastoral del estudiante durante su educación que está directamente relacionada con sus estudios pastorales. Al mismo tiempo, el estudiante perfecciona sus aptitudes y teología pastoral, y su identidad vocacional. La Educación Contextual consiste de 10-15 horas a la semanas de ministerio pastoral, reflexión semanal con un supervisor y con compañeros en el lugar donde trabajan. Cada semana los estudiantes revisan los objetivos de aprendizaje, preparan y reflexionan sobre los eventos pastorales, y evalúan su aprendizaje y *praxis* con sus compañeros.

Projecto de Integración

(*cero horas crédito, precio del curso $500*)
En el último año, los estudiantes completan este programa con el Proyecto de Integración IPS 593.

Este es un ensayo de 35-50 páginas en el que los estudiantes demuestran la integración de los cursos con algún asunto relevante en su contexto de trabajo pastoral. Además, en este proyecto el estudiante demuestra su capacidad de investigación en cuestiones de fe y vida, y su habilidad para integrar cuestiones contemporáneas con la tradición de la Iglesia.

ENGLISH TEXT

Curriculum_Guide (https://www.luc.edu/media/lucedu/ips/pdfs/Bilingual%20MAPS-1.pdf)

- 12 courses; 36 credit hours | 75% of core and speciality classes will be delivered in Spanish, 25% in English
  - 8 core courses
  - 3 specialty courses (including Administration and Management for Ministry in Intercultural Communities, Christian Spiritual Praxis in Youth Ministry, and Catholic Social Ethics and Migration)
  - Contextual Education course (English)
  - Integration Project (English or Spanish)

Description of the 3 Specialty Courses (3 Credit Hours per Class)

Administration and Entrepreneurship in a Pastoral Context

Description: This course will provide an overview of fundamental management skills in the pastoral context: project financing and management, fundraising, budgeting, safeguard policies, team building, volunteer management, and coordination of meetings. All from an entrepreneurial perspective that addresses the need for projects and pastoral initiatives.

Outcomes: The student will demonstrate the ability to plan, assess, structure, coordinate and execute pastoral projects or initiatives with strategic planning skills, and effective analysis in decision making.

Ministry with Young People and Spirituality Today

Description: Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. We will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.

Outcomes: Students will be able to articulate and assess the differences between Youth Ministry, Young Adult Ministry and Pastoral Juvenil in a current landscape of multiculturalism, increasing secularization, and disaffiliation among youth, young adults, and jóvenes today as well as to find new ways to help young people who are on a spiritual journey through discernment and accompaniment.

Catholic Social Ethics & Migration

Description: Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to:

1. Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants;
2. Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change);
3. To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40);
4. To become aware of our status as social beings and the universal call to love through "*The Theology of the Good Samaritan*" as one of the key teachings of Pope Francis' new encyclical, *Fratelli Tutti*, which implies working towards creating change in structures to make resettlement easier legally and institutionally;
5. Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants.

Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.

Outcomes: Students will become familiar with social ethics in the Catholic tradition, including the key principles set out in modern documents of the 20th and 21st centuries. Students will be able to deepen their baptismal

call to encounter migrants, accompany them and question the structures that prevent them of their spiritual and social development through a pastoral plan that incorporates methodological, practical and pastoral tools with which they can organize their ministry in a systematic and effective way.

Description of "Contextual Education"

(*A 3-course sequence*)
Contextual Education is where the student's ministry integrates the four aspects of the MAPS program. It is the place to combine theological, ministerial, personal and spiritual learning in the context of your daily pastoral ministry. In this context, the student develops training as a pastoral agent in the place where they exercise ministry through supervision and weekly education provided by teachers and colleagues.

This contextual development can be directly related to the work that the student is doing or can be selected from places that the Institute for Pastoral Studies has cultivated in the United States of America, Latin America, Spain, or other places in the world.

1. IPS 578 Contextual Education Preparation (0 credits, course fee of $125.00)
2. IPS 579 Contextual Education Introduction (0 credits, course fee of $250.00)
3. IPS 580 Contextual Education I (3 credit hours, standard tuition rate)

Contextual Education is the student's pastoral experience during their education that is directly related to pastoral studies. At the same time, the student perfects aptitudes and pastoral theology, as well as vocational identity. Contextual Education consists of 10-15 hours a week of pastoral ministry, weekly reflection with a supervisor and with colleagues in the place where they work. Each week students review learning objectives, prepare and reflect on pastoral events, and evaluate their learning and praxis with their peers.

Integration Project

(*0 credit hours, $500.00 course fee*)
In the final year, students complete their program with the IPS 593 Integration Project.

This is a 35-50 page essay in which students demonstrate the integration of courses with some relevant issue in their pastoral work context. In addition, in this project the student demonstrate the ability to investigate matters of faith and life, and capacity to integrate contemporary issues with the tradition of the Church.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Resultados/Learning Outcomes

Al completar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes serán capaces de demostrar./Upon completing their Master of Arts in Pastoral Studies (MAPS) students will be able to demonstrate:

- Un conocimiento profundo de las fuentes y recursos teológicos, ministeriales, e interpersonales para el servicio efectivo en y para la iglesia y el mundo en posiciones de formación, investigación, o liderazgo eclesial./A deep understanding of theological, ministerial, and interpersonal sources and resources for effective service in and for the church and the world in positions of formation, research, or ecclesial leadership.
- Capacidad para entender y analizar los contextos sociales y culturales en los que el graduado estará llamado a servir, siempre con una mirada y compromiso con los marginados, excluidos, y para luchar para erradicar las estructuras y sistemas de opresión./Ability to understand and analyze the social and cultural contexts in which the graduate will be called to serve, always with a view and commitment to the marginalized, excluded, and to fight to eradicate the structures and systems of oppression.
- Habilidad para articular retóricamente y por escrito temas teológicos y pastorales concretos de relevancia para audiencias y comunidades cultural y teológicamente diversas./Ability to articulate rhetorically and in writing concrete theological and pastoral issues of relevance to culturally and theologically diverse audiences and communities.
- Su compromiso y habilidad personal para nutrirse de los adelantos académicos sobre espiritualidad, teología pastoral y psicología para optimizar sus contribuciones pastorales y académicas en sus contextos particulares./Commitment and personal ability to nurture academic advances in spirituality, pastoral theology, and psychology to optimize his pastoral and academic contributions in his particular contexts.

Pastoral Leadership Certificate

The Graduate Certificate in Pastoral Leadership provides students with a foundational and broad understanding of pastoral care, Christian theology, and scripture. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Related Programs

Master's

- Pastoral Studies (MA) (p. 1795)
- Pastoral Studies with a Concentration in Church Management (MA) (p. 1796)
- Pastoral Studies with a Concentration in Religious Education (MA) (p. 1799)

Curriculum

The Graduate Certificate in Pastoral Leadership requires completion of five courses (15 credit hours). For elective courses, students will work with their academic advisor to choose those that best suit their background, experience, interests, and goals. The Institute of Pastoral Studies offers a large number courses online every year, including the required course for this certificate. It is possible, therefore, to complete this certificate entirely online depending on which elective courses a student chooses within the options that satisfy the curricular requirements.

Total Hours		**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students gain a foundational and broad base of knowledge and skills necessary for pastoral ministry, defined as a ministry of care through accompaniment and support focused on the emotional, spiritual, and social well-being of the person.

Pastoral Studies (MA)

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

Courses are available online, in person at Loyola's downtown Chicago campus, or in Rome, Italy. Students who enroll in the master's degree can study under the general MAPS program or focus their studies in one of four areas of concentration: church management, digital communication, health care chaplaincy, and religious education.

To learn more about state and international authorization of programs, please refer to our State and International Authorization page (https://www.luc.edu/ool/services/stateandinternationalauthorization/). To learn more about the accreditation of Loyola University Chicago and its schools, as well as information about professional licensure, visit our Accreditation page (https://www.luc.edu/accreditation/index.shtml/).

- Pastoral Studies with a Concentration in Digital Communication (MA) (p. 1797)
- Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA) (p. 1798)

Curriculum

Master of Arts in Pastoral Studies

This traditional curriculum, designed to provide a solid first-degree experience in education for ministry includes courses in scripture, pastoral theology, and ministerial skills, as well as numerous concentrations, including one in Healthcare Ministries. This MA in Pastoral Studies forms the basis for the MDiv degree. Students have the option at any point during their degree program or upon completion of their degree program to apply for the MDiv degree, and all of these courses will count toward their MDiv degree.

Code	Title	Hours

IPS 580	Contextual Education I	3
Integration Paper		
IPS 593	Integration Project	0
Total Hours		**36**

Intellectual Development

Intellectual development seeks to expand the pastoral minister's understanding and appreciation of faith. It consists in theological studies, and draws also upon a wide range of other disciplines: philosophy, the arts, psychology, sociology, culture, and language studies.

Ministerial Development

Ministerial development cultivates the knowledge, attitudes and skills that directly pertain to effective functioning in the ministry setting, or to the pastoral administration that supports direct ministry and draws also upon a wide range of other disciplines: counseling, medical ethics, business administration, leadership, organizational development, and law.

Chosen from course offerings to address elements in pastoral ministry competencies in areas such as:

- Promoting or organizing action on behalf of justice
- Youth ministry
- Pastoral presence and care for the sick and the dying
- Parish ministry
- Health ministries

Contextual Development

The contextual development is where the ministry student brings together all four developmental aspects of the degree program. It is the place to integrate the theological, ministerial, personal and spiritual learnings of this degree in the context of the lived everyday ministry setting. Here, in a structured program that combines on-site mentoring and supervision located in actual ministry practice with peer and faculty weekly reflection sessions, the student achieves and realizes that sense of professional and personal competency as minister.

These field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated. Because of the ability to operate in a blended and on-line teaching manner, these placements can be located in the resource rich area of Chicago or other settings around the nation or the world.

Code	Title	Hours
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	0
IPS 580	Contextual Education I	3

Contextual Education is the experience during the student's ministerial education that directly engages pastoral practice in the context of ministerial studies. Simultaneously, the student refines pastoral skills, ministerial theology and vocational identity. Contextual Education consists of 10-15 hours per week of ministry at a site, reflection with a site supervisor and as well as a weekly peer reflection seminar on campus. In the weekly seminar students review learning contracts, prepare and reflect on pastoral events, and exercise peer evaluations.

Human Development

Human development seeks to enhance the pastoral minister's human qualities and character, fostering a healthy and well-balanced personality, for the sake of both human growth and ministerial service.

Spiritual Development

Spiritual development aims to arouse and animate true hunger for holiness, desire for union with God through Christ in the Spirit, daily growing love of God and neighbor in life and ministry, and the practices of prayer and spirituality that foster these attitudes and dispositions.

Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Church Management (MA)

Available Online. The MA in Pastoral Studies (MAPS) with a concentration in Church Management is a 36 hour degree that includes eight core courses, three electives (offered by the Quinlan School of Business), a three credit hour Contextual Education course, and a Final Integration Project. The Church Management concentration can be completed online.

This concentration emerges from reflection on the gap in skill sets among the leaders of many churches today, Catholic and Protestant. Members of church staff, comprised increasingly of laypersons with degrees in pastoral ministry, education, counseling, and theology, find themselves engaging in activities related to budgeting, project management, human resources, organizational development and change, and more. There is a need for parish leaders and pastoral ministers to have the education, training, and skills associated with these areas.

The MBA curriculum at the Quinlan School of Business includes a set of core and non-core courses. The core graduate courses at Quinlan are designed for those with no business experience. Students who already have a business degree, however, or who have taken business courses in the past (within the last 5-10 years) and possess significant business experience should be advised to skip the core courses and go directly to more specific and specialized courses in consultation with their academic advisor and the Associate Dean for Programs at the QSB.

In addition, for the MAPS concentration in Church Management:

- The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change.

The background and initial plan of each student should be summarized and sent to Quinlan's associate dean for graduate programs for discussion and approval prior to registering for classes.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- With the Concentration in Church Management, students also will demonstrate the ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change in non-profit or faith-based settings.

Pastoral Studies with a Concentration in Digital Communication (MA)

The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS degree concentration in Digital Communications allows students to hone their communication skills and learn best practices for using digital media in the dissemination of parish/congregation/diocese news, events, and the message of the Gospel in order to reach a wider audience through social media, webpages, video, and more.

In addition, for the MAPS concentration in Digital Communications:

- An understanding and integration of best practices in communications using digital media into their ministerial context and work.

- With the Concentration in Digital Communications, students also demonstrate an understanding and integration of best practices in communications using digital media into their ministerial context and work.

Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA)

The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS Concentration in Health Care Chaplaincy prepares students for the certification process with the National Association of Catholic Chaplains (NACC) and other certifying bodies that require a 36 credit hour graduate degree.

All components of the MAPS—Health Care Chaplaincy concentration, except for Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/), can be completed online or on-campus. Some courses are also available in the summer through the IPS Rome program.

In addition, for the MAPS concentration in Healthcare Chaplaincy:

- An understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- A readiness to complete successfully the process for certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC).

[1] A variety of health care ethics courses are offered through Loyola's Neiswanger Institute for Bioethics (http://hsd.luc.edu/bioethics/). A list of these courses can be found in the Graduate School catalog, under the heading, "Bioethics and Health Care Leadership (https://catalog.luc.edu/graduate-professional/graduate-school/#coursestext)."

[2] In IPS 493, students are mentored in the process of preparing the materials required to sit for board certification.

On the Institute of Pastoral Studies webpage, you can find more information about the vocation of chaplaincy (https://www.luc.edu/ips/resources/chaplaincy/).

Students interested in becoming Board Certified Chaplains with the Association of Professional Chaplains (APC) can do so by pursuing the Master of Divinity (MDiv) (p. 1783) degree and choosing electives aimed at meeting APC competencies. The APC requires a 72 credit hours degree (the MDiv) and certifies Protestant chaplains as well as chaplains in an array of religious traditions.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate an understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate a competency to obtain certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC) or other recognized national certifying association that requires a 36-credit hour graduate degree.

Pastoral Studies with a Concentration in Religious Education (MA)

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS concentration in Religious Education enables students to develop the practices of thinking, acting, and teaching necessary for service in today's culturally, generationally, and theologically diverse church. Students in this concentration cultivate the practice of considering every problem and situation through theological lenses, so that the outcome or solution is infused with the principles of faith. These habits prepare students of the Religious Education concentration to engage, catechize, and educate all age groups in a variety of contexts.

In addition, for the MAPS concentration in Religious Education:

- The ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

Curriculum

This traditional curriculum, designed to provide a solid first-degree experience in education for ministry includes courses in scripture, pastoral theology, and ministerial skills along with a selection of courses that prepare students to engage, catechize, and educate all age groups in a variety of contexts. In additional to traditional courses, students complete Contextual Education (https://www.luc.edu/ips/resources/contextualeducation/) and a capstone writing project: the Integration Paper (https://www.luc.edu/ips/resources/procedures/#124694). Students have the option at any point during their degree program or upon completion of their degree program to apply for the M.Div. degree, and all of these courses will count toward their M.Div. degree.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- With the Concentration in Religious Education, students will also demonstrate the ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

Religious Education Certificate

Available Online. The Graduate Certificate in Religious Education develops the practices of thinking, acting, and teaching necessary for service in today's culturally, generationally, and theologically diverse church. Students cultivate the practice of considering every problem and situation through theological lenses, so that the outcome or solution is infused with the principles of faith. These habits prepare students of the Religious Education Certificate to engage, catechize, and educate all age groups in a variety of contexts.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

- Social Justice with a Concentration in Social Enterprise (MA) (p. 1804)

Social Justice (MA)

As disparities along ethic/racial, economic, gender and religious lines gain prominence in the national conversation, there is a growing need for trained "change agents" to carry out the work of community development, social justice and human rights advocacy.

Faith-based community service programs, service immersion trips, and social justice projects attract high-minded "change agents" of great generosity and courage who want to serve economically disadvantaged communities, underserved and underrepresented populations, and people whose human dignity is under assault by social arrangements and structures. The post-Vatican II emphasis on a Church that sees working for justice as constitutive of the Christian life and that proposes an "option for the poor" as a pastoral standard, has spawned a growing number of talented and educated young adults who want to integrate service, social justice, and advocacy into their life patterns and career choices. With Pope Francis, the social justice movement is gaining even more momentum.

This degree program is designed to serve these change agents, offering a solid grounding in spiritual and theological foundations for this work, information about the key social justice issues today, the skills and told of assessment and analysis in addressing these issues, best-practice strategies for effective work in advocacy and community development, contextual education at sites where social justice work is exemplary, and the practical tools of successful leadership in addressing social justice issues.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

Electives

Electives (9 credit hours) are chosen in consultation with the academic advisor. Electives may be taken in IPS or in many of the other schools, colleges, academic centers and institutes at Loyola University Chicago. See your academic advisor for more details.

The following represents a list of courses across the university that would be appropriate for students in the MA in Social Justice. It is meant to be suggestive rather than exhaustive. This list is to make students aware of "sub-disciplines" within social justice as a way of exploring different career options. This list also emphasizes the interdisciplinary nature of the degree and the career field. In this way, students might take multiple electives within a given field.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Social Justice, students will be able to demonstrate:

- Examine philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.
- Describe a greater awareness and understanding of competing forces at the heart of conflicts over justice in various contexts and one's own location in relation to them. (poverty, culture, race, ethnicity, gender, sexual orientation, power, inequality, religion)
- Demonstrate a spiritual maturity that drives one to fully and productively engage in diverse contexts experiencing oppression, marginalization, deprivation and conflict.
- Develop the primary skills of deep listening, dialogue, adaptive leadership, conflict transformation, relationship building, and have basic facility in the secondary skills of community organizing and development, advocacy for policy change, and practical knowledge for organizational management and social entrepreneurship.

Social Justice and Social Enterprise Certificate

The Certificate in Social Justice and Social Enterprise is a 15 credit hour graduate certificate designed for those interested in professional formation to enhance their work for social justice and in social organizations but for whom a full graduate degree may not be necessary.

This program is especially suited to those who have completed an undergraduate degree and wish to deepen their understanding of social justice and students in graduate programs who wish to add an advanced graduate certificate in social justice and social enterprise. The Certificate is also well suited for professionals whose work in the field would be enhanced by the well-rounded theoretical and practical formation afforded by this program.

For students who complete this Certificate and return to pursue the full MA in Social Justice (36 credit hours) within 8 years of graduating, all the credit hours applied to this Certificate will count toward the MASJ. This Certificate can be applied toward to the requirements of any MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Curriculum

The Certificate in Social Justice and Social Enterprise requires students to complete five courses (15 credit hours). Two of these courses will be taken at the Institute of Pastoral Studies: IPS 610 Foundations of Social Justice and one IPS elective course. The IPS elective will be chosen from among the core courses in the social justice curriculum. Two of the required courses will be taken at the Quinlan School of Business (QSB): MGMT 485 Social Enterprise and one QSB elective course. The QSB elective will be chosen in consultation with their academic advisor. The fifth and final course required for the Certificate is an elective and can be completed at either the QSB or the IPS. This will discerned in conversation with their academic advisor and according the student's experience, context, and interests.

Please Note: If the coursework is planned strategically and only online classes are chosen then this certificate may be completed entirely online. However, this may result in the certificate taking more time to complete based on available online course rotation.

Learning Outcomes

By completing the Certificate in Social Justice and Social Enterprise, students will be able to demonstrate:

- An understanding of philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.
- how to create social value by business means;
- how to fund, start, sustain, scale, and measure the impact of an entrepreneurial social venture.

Social Justice Certificate

Available Online.[1] The Graduate Certificate in Social Justice is intentionally designed in direct consultation with the "best practices" of community-based organizations. It prepares people for faith-based leadership in social advocacy, community and labor organizing, and systemic social change. The program combines theoretical and practical learning in social justice and activism.

The certificate program is specifically designed for:

1. students who have completed an undergraduate degree and wish to deepen their understanding of social justice;
2. students in graduate programs who wish to add an advanced certificate in social justice;
3. professionals whose work in the field would be enhanced by a graduate-level credential.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

To learn more about the Graduate Certificate in Social Justice, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Certificate in Social Justice is comprised entirely of elective courses, all chosen from within the curriculum of the MA in Social Justice. The learning outcomes of the Certificate, therefore, are determined by the collection of courses chosen by the student.

At a general level, students will be able to demonstrate:

- An understanding of theories and perspectives on social justice, with special attention to Biblical traditions of justice and modern Catholic social teaching;
- An understanding of the histories, movements, theories, and practices studied in chosen elective courses.

Social Justice with a Concentration in Social Enterprise (MA)

The Institute of Pastoral Studies and Quinlan School of Business partner to offer an optional concentration in Social Enterprise. With this track, students will have the opportunity to develop, in consultation with their academic advisors, course plans that will help them gain understanding and nurture business skills specific to their interests and context. Students can focus on areas such as marketing, management, leadership, operations, accounting, entrepreneurship, and more. With business knowledge and skills, graduates of the MASJ-SE program will be equipped to lead social justice organizations effectively and sustainably over time, increasing the depth and breadth of their social impact.

To learn more about the MASJ Concentration in Social Enterprise, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Spirituality

- Christian Spirituality (MA) (p. 1805)
- Christian Spirituality - Spiritual Direction Concentration (MA) (p. 1806)
- Christian Spirituality Certificate (p. 1807)
- Spiritual Direction Certificate (p. 1808)

Christian Spirituality (MA)

Drawing on the wisdom of the Ignatian tradition, the Master of Arts in Christian Spirituality equips students for meaningful and holistic living and ministry to meet the personal and social challenges of our time by deepening their knowledge of God and self. Joining contemplation to action, the Ignatian approach to spirituality and spiritual formation is grounded in a personal relationship with God/Christ, lived in the world and addresses the needs and issues of our time, ecumenical in its appeal to all Christians, and adapted to each person's uniqueness.

The Master of Arts in Christian Spirituality is a 36-hour degree program which can be completed entirely online or by taking a combination of online and in-person courses. Students also have the opportunity to take IPS summer courses that include a 10-day experience in Rome, many of which fulfill requirements for the MA in Christian Spirituality. Full-time students can complete the MA degree in two years.

Students completing the MA in Christian Spirituality may choose to pursue a concentration in *Spiritual Direction*. The Spiritual Direction concentration is designed to prepare spiritual directors to facilitate the regular, on-going practice of accompanying people as they attempt to deepen their relationship with the divine. Unique to the Institute of Pastoral Studies, students have the opportunity to receive training on how to direct and make use of the *Spiritual Exercises of Ignatius of Loyola* (30-day or 30-week format) in spiritual direction.

To learn more about the Master of Arts in Christian Spirituality, please complete our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session (https://www.luc.edu/ips/admission/visit/).

The U.S. Department of Education requires any institution offering distance education/online programs to students outside of its home state to acquire authorization from the states in which students reside. Regulations vary from state to state. While Loyola University Chicago is authorized, exempt or pursuing authorization in most states, some restrictions apply. Please see our State Authorization (https://www.luc.edu/online/aboutloyolaonline/state-authorization/) page for the most up-to-date information.

Loyola University Chicago is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools

Contextual Education

MA in Christian Spirituality students acquire and enhance their spiritual leadership and skills in a structured contextual education program that combines onsite mentoring and supervision, skill-based workshops, as well as peer and faculty weekly reflection sessions. Students typically minister 8-10 hours per week for a period of 20-22 weeks, for a total of at least 200 hours of onsite experience and formation. The field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated in the resource rich area of Chicago or other settings around the nation or the world.

Students fulfill the Contextual Education requirement of the MA in Christian Spirituality by successfully completing the following 3 courses:

Code	Title	Hours
IPS 578	Contextual Education Preparation	0
IPS 579	Contextual Education Introduction	1.5
IPS 580	Contextual Education I	1.5

Integration Project

MA in Christian Spirituality students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Christian Spirituality, students will be able to demonstrate:

- Spiritual perspective formed in self-awareness and engagement with modern culture and the classic and contemporary resources of the Christian tradition;
- Spirituality literacy grounded in biblical, theological and psychological competencies;
- Spirituality praxis through personal engagement with the spiritual dimension of Christian faith, discipleship and ministry;
- Professional skills in and for spiritual accompaniment.

Christian Spirituality - Spiritual Direction Concentration (MA)

The Spiritual Direction Concentration provides MA in Christian Spirituality students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

This degree is suited to those holding a bachelor's degree in any field and who are interested in forming themselves for the vocation of spiritual director, including the integration of spiritual direction into existing careers and current contexts, including retreat centers, community programs, church and parish offices, and more.

Those already holding a graduate degree in theology, ministry, or related fields may qualify to pursue formation as a spiritual director through the Spiritual Direction Certificate (p. 1808).

Available Online.

IPS 580	Contextual Education I	1.5
IPS 593	Integration Project	0
One IPS Elective Course		3
Total Hours		**36**

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* (optional) will count for 2 semesters of personal spiritual direction.

Students in the MACS-Spiritual Direction concentration with the goal of learning how to direct the Spiritual Exercises of St. Ignatius must have completed the 30-day or the 30-week (19th Annotation) format of the Exercises prior to beginning the Contextual Education component of their program (before your final year begins). This requirement will be waived for those who have completed the Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable MA in Christian Spirituality: Spiritual Direction Concentration students to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by the Faculty Coordinator of Contextual Education.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Spiritual perspective formed in self-awareness and engagement with modern culture and the classic and contemporary resources of the Christian tradition;
- Spirituality literacy grounded in biblical, theological and psychological competencies;
- Spirituality praxis through personal engagement with the spiritual dimension of Christian faith, discipleship and ministry;
- An understanding of key components and considerations for the practice of spiritual direction;
- Self-awareness of one's own spirituality as it relates to the ministry and practice of spiritual direction;
- Demonstrate professional skills in and for spiritual direction.

Christian Spirituality Certificate

The Graduate Certificate in Christian Spirituality provides students with a foundational and broad understanding of Christian spiritual theologies, traditions, and practices. Students develop an integrated spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. They advance in their spiritual maturity and with a perspective grounded in key biblical, theological, and psychological competencies. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

The Graduate Certificate in Christian Spirituality provides a flexible course of study for

- Persons seeking to deepen their understanding and practice of Christian spirituality
- Those exploring a new career path in ministries that involve spiritual accompaniment
- Ministers who want to expand their vocational horizon, expanding their knowledge and skill base to include Christian spiritual theologies, traditions, and practices
- Volunteers or part-time professionals who seek to advance in their ministry

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Curriculum

The Graduate Certificate in Christian Spirituality requires completion of five courses (15 credit hours). Three courses are required and two courses are electives. Students will work with their academic advisor to choose elective courses that best suit their background, experience, interests, and goals.

Code	Title	Hours
IPS 545	The Foundations of Christian Spirituality	3
IPS 572	Ignatian Spirituality	3
IPS 428	Introduction to Spirituality Praxis	3
Electives		6
Total Hours		**15**

The Institute of Pastoral Studies offers a large number of courses online every year, including the three required courses for this certificate. It is possible, therefore, to complete the Graduate Certificate in Christian Spirituality entirely online depending on which courses a student chooses within the elective options that satisfy the curricular requirements.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
IPS 428	Introduction to Spirituality Praxis	3
IPS 545	The Foundations of Christian Spirituality	3
	Hours	**6**
Spring		
IPS 572	Ignatian Spirituality	3
Elective #1		3
	Hours	**6**
Summer		
Elective #2		3
	Hours	**3**
	Total Hours	**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students gain a foundational and broad base of knowledge and skills related to Christian spirituality. Students advance their personal spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. Graduates integrate and embody key biblical, theological, and psychological competencies resulting from personal engagement with the spiritual dimensions of faith, discipleship, and ministry.

Spiritual Direction Certificate

Available Online. The Graduate Certificate in Spiritual Direction is suited to applicants holding a Master's degree or above in theological or ministerial studies, psychology or counseling, psychiatric social work, or health care and who seek to develop and integrate spiritual direction skills and practices into their work. Those not holding such a qualifying degree should apply to the MA in Christian Spirituality, Concentration in Spiritual Direction (https://catalog.luc.edu/graduate-professional/institute-pastoral-studies/christian-spirituality-spiritual-direction-concentration-ma/).

For those who have discerned a call to work in specifically Jesuit contexts or in ways that integrate Ignatian Spirituality into their practice, IPS offers a track that trains students to be a director in the Spiritual Exercises of St Ignatius. This option requires that a student have completed the Spiritual Exercises within five years of commencing the Certificate or can commit to doing so during their first year (before entering the contextual education requirement of the Certificate).

Total Hours		**15**

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

Students in the Certificate in Spiritual Direction seeking to learn how to direct the Spiritual Exercises of St. Ignatius must have completed the 30-day or the 30-week 19th Annotation format of the Exercises prior to beginning the Contextual Education component of their program. This requirement will be waived for those who have taken the complete Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable students of the Certificate in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained coach/mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Prof. Dan Rhodes, Faculty Coordinator of Contextual Education.

Applicants holding a Master's degree in psychology, counseling, or psychiatric social work must provide evidence of having completed prerequisite graduate level courses in biblical and foundational theology, typically a 3-credit hour course in Hebrew Scriptures (Old Testament) or New Testament, and a 3-credit hour course in systematic theology.
Applicants from the psychology or counseling fields who have not completed courses in biblical and theological foundations can do so at the IPS by taking courses such as:

Code	Title	Hours
IPS 416	Introduction to New Testament	3
IPS 417	Introduction to the Old Testament	3
IPS 531	Christian Doctrine	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Spiritual Direction Certificates, students will be able to demonstrate:

- An understanding of key components and considerations for the practice of spiritual direction;
- Self-awareness of one's own spirituality as it relates to the ministry and practice of spiritual direction;
- Demonstrate professional skills in and for spiritual direction.

Marcella Niehoff School of Nursing

Mission, Vision & Core Values

Our Jesuit values guide us to shape the future of health and health care

Our mission at the Marcella Niehoff School of Nursing is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

Our vision at the Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities and populations, while promoting social justice, health equity and quality care for all.

In keeping with the University's Ignatian heritage, the School of Nursing is committed to the five hallmark characteristics of a Jesuit education. These characteristics provide the foundation for our core values, helping guide and motivate our administrators, faculty, students, and graduates to think differently about their approach to health care.

Core Values

Commitment to Excellence

Apply well-learned lessons and skills to achieve new ideas, better solutions, and vital answers.

- Promote dialogue, critical thinking, and the discernment of meaning in the process of enhancing health of persons and communities, both locally and globally.
- Foster an academic environment that supports and guides students in their transformation toward becoming health care leaders.

Faith in God and the Religious Tradition

Promote well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God.

- Acknowledge that humans are physical, psychosocial, and spiritual beings
- Recognize that spirituality affects health.
- Respect that spirituality is lived out differently through diverse faiths, beliefs, and religious traditions.
- Create a safe place to search for meaning in the process of discovery and transformation, as well as social change.
- Respect our potential for achievement while accepting our human limitations in the pursuit of good.

Service that Promotes Justice

Use learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth, and care for others.

- Commit to social justice by engaging individuals, families, and communities, both locally and globally, to improve and promote health.
- Recognize that health disparities exist; those with the greatest need and with the least access hold a higher priority for action.
- Engage in research and application of evidence-based practice or best practices that limit health disparities.

Values-Based Leadership

Ensure a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness.

- Foster synergistic collaborations within and between professions, disciplines, programs, and partners.

- Respect the dignity and fundamental rights of all.
- Embrace the tension that exists between competing priorities (e.g., mission-driven, financially-driven, Ethical & Religious Directives for Catholic Health Care Services) when making choices.
- Accept responsibility to make choices and act through discernment, being wise stewards of resources.
- Actively seek diversity in people, programs, professions, and practice to strengthen the communities of which we are a part.
- Promote a culture of purposeful transparency.

Global Awareness

Demonstrate an understanding that the world's people and societies are interrelated and interdependent.

- Understand that individuals are intimately connected to, live within, and operate within community.
- Recognize that communities have cultural capital with unique strengths.
- Foster relationships and engaging in partnerships in order to promote health.
- Embrace culture as a means to serve and to lead change toward better health.
- Apply the lessons we learn locally to global milieus and applying lessons learned globally to local initiatives.

Accreditation

The master's degree program in nursing and the Doctor of Nursing Practice program and the post-graduate APRN certificate program at Loyola University Chicago is accredited by the

Commission on Collegiate Nursing Education
655 K Street, NW

CM/MH/AD Nursing (CMAN)

CMAN 403 Health Care Delivery and Organization (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Distinguish the roles, functions and responsibilities of healthcare system components (ie, delivery, financing and regulation); 2) Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access; 3) Compare the organization of multiple healthcare delivery structures to the effectiveness of meeting population health needs; 4) Analyze factors influencing trends in healthcare quality and patient safety

CMAN 407 Population Health Informatics (3 Credit Hours)
This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.
Outcomes:
1) Apply principles of health care informatics for population health; 2) Apply basic concepts of epidemiology for population health; 3) Analyze the role of population health informatics in understanding data, information, & knowledge; 4) Apply population health informatics in surveillance, interoperability and big data contexts; 5) Evaluate quality in electronic health records, mobile applications, and personal health records; 6) Identify the economic value and potential for sustainability in population health technologies

CMAN 410 Epidemiology (1 Credit Hour)
The course covers the basic principles of epidemiology including descriptive epidemiology, causation, basic epidemiologic designs and interpretation.

CMAN 417 Nursing and Health Care Administration Practicum (1-6 Credit Hours)
The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Outcomes:
1) Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings; 2) Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions, implement safety initiatives, and monitor patient outcomes; 3) Incorporate effective communication techniques to deliver evidence-based, patient-centered care; 4) Analyze and evaluate healthcare organization structure, mission, and philosophy as they relate to the standards of care, staffing and performance, development and marketing of programs and projects; 5) Evaluate the use of information technology to improve patient care outcomes and create a safe care environment; 6) Apply legal, ethical principles to the nursing role of leadership and management

CMAN 425 Advanced Quality and Safety in Health Care (3 Credit Hours)
This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the forces driving the focus on safety and quality in health care; 2) Evaluate strategies for improving safety and quality in health care; 3) Explain the influence of systems (environmental, organizational, provider, technological and task) on healthcare outcomes; 4) Analyze the role of various systems and factors in creating safe environments of care; 5) Explain the impact of just culture thinking on safety and quality improvement in health care; 6) Develop a plan for improvement of a safety and/or quality issue

CMAN 430 Leadership and Administration in Health Care (3 Credit Hours)
This course focuses on the integration of core knowledge in leadership, administration, human resources and communication in health care organizations. Special emphasis is placed on leadership styles, the roles of the leader, human resources management and communication. The course is designed to provide the student with knowledge to practice the leadership skills necessary to positively impact healthcare systems. Selected Topics May Include: Leadership theory and style and professional practice a) leader competencies b) Influencing behaviors c) Relationship management d) Culture e) Nimble flexibility f) Professional accountability g) Motivation for high performance h) Strategic leadership and tactical leadership (Administration vs management) Human resource management a) Communication b) Difficult conversations c) Conflict resolution d) Coaching e) Performance evaluation f) Onboarding Power politics a) Development and management of partnerships/relationships/networks b) Strategic negotiation c) Power.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Relate essential nurse leadership competencies for effective management in healthcare organizations; 2) Evaluate the impact of leadership styles on organizational culture and effectiveness; 3) Generate strategies to optimize human resource performance in healthcare settings; 4) Identify strategies to address interpersonal and intraorganizational conflict

CMAN 436 Advanced Practice Concepts in Community Health (2 Credit Hours)
This course provides a framework for advanced practice in a variety of specialty areas through analysis of essential concepts and methodologies.

CMAN 445 Health Care Outcomes (3 Credit Hours)
This course focuses on the theory and methods to measure and evaluate healthcare outcomes. Concepts of population health will guide the comparison and analysis of health outcomes and measures. Current political, legal, regulatory, and ethical issues will be explored as these relate to health outcomes. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze the political, legal, regulatory, and ethical influences in the development and current status of outcomes management; 2) Apply methods and processes for improving outcomes; 3) Utilize data-driven decision making for health outcomes; 4) Develop leadership and interprofessional competence in analyzing healthcare outcomes; 5) Generate data-driven change strategies to improve health outcomes

CMAN 448 Program Planning and Marketing in Health Care (3 Credit Hours)
This course presents an integrated approach to strategic planning, program planning, and marketing in nursing and health care organizations. Key models, elements and processes associated with strategic planning are presented with an emphasis on the leadership role in leveraging information, environmental scanning, and competitive analysis. Theories, models, tools, and processes for program planning, implementation, and evaluation and the marketing of nursing and healthcare services are addressed. The integration of strategic planning, program planning, and marketing with the mission, goals, and objectives of organizations and services is emphasized. 6. Relate the strategic planning, program planning, and marketing processes to nursing leadership competencies.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze models and theories of strategic planning, program planning, and marketing; 2) Explain the relation between organization mission, goals, and objectives and the strategic planning, program planning, and marketing processes; 3) Apply tools of strategic planning to an organization; 4) Create a comprehensive plan focused on the needs, design, implementation and evaluation of a program that derives from an organizational strategic plan; 5) Evaluate marketing strategies

CMAN 460 Health Care Policy (3 Credit Hours)
This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.
Outcomes:
1) Identify key policy issues in contemporary health systems; 2) Analyze the effect of health policy on practice; 3) Analyze strategies for health system improvement through public policy; 4) Advocate for policy adoption to a health care decision maker; 5) Identify the effects of government regulation on education and practice

CMAN 533 Fiscal Management in Health Care Organizations (3 Credit Hours)
This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery; 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations; 3) Apply cost accounting techniques in health care; 4) Analyze ethical and legal issues surrounding fiscal management

CMAN 569 Comparative Effective Research in Healthcare (3 Credit Hours)
Pre-requisites: GNUR 450 or equivalent required; CMAN 439 and 440 recommended
Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.
Outcomes:
Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population

Doctor of Nursing Practice (DNP)

DNP 510 Capstone Seminar (1-3 Credit Hours)
The DNP scholarly project demonstrates an in-depth knowledge of each student's area of specialization in nursing practice. This project relates to advanced practice in the nursing specialty and benefits a group, population, or community rather than an individual patient. The DNP Scholarly project is a synthesis of the student's work and lays the groundwork for future scholarship with the goal of a tangible and deliverable academic product derived from the practice courses and immersion experience. The DNP scholarly project, unlike that of PhD level research, may take a number of forms such as: practice change initiative; pilot study; program evaluation; quality improvement project; evaluation of a new practice model; or a consulting project. This course addresses the unique needs and challenges second year DNP students face while completing their projects. Seminar content focuses on skills necessary for successful clinical project completion through: presentations, selected readings and online forums. The seminar operates at the group level and is designed to work in concert with and support individual students' DNP Faculty Director and external mentor (often the student's preceptor at the project site). Course content parallels the three overall stages of a DNP Scholarly Project: the design, proposal submission and proposal approval (First semester); project implementation (second semester); and, final presentation and dissemination (third semester). Students are expected to have a Faculty Director for their project and a tentative external mentor in place prior to course entry. This seminar is completed sequentially over a minimum of three semesters. Students are expected to be enrolled in this course each semester that they are working on the DNP Scholarly Project.

DNP 511 Practicum (1-6 Credit Hours)
Theory, evidence, and the systematic translation of research into practice serve as the foci for DNP practicum experiences across the program of study. Students investigate clinical problems and refine their clinical translational capabilities within the context of the broader health care system. Clinical learning is directed toward systematic application of knowledge and scientific discovery in resolving new or persistent problems affecting the safety and quality of patient care. Mentored clinical application of evidence-based knowledge and skills, as well as independent investigation and evaluation of outcomes, supports integration of the DNP role into the complex circumstances of contemporary nursing practice. Leadership, consultation, advocacy, fiscal accountability and interdisciplinary collaboration serve as core competencies to effect organizational change.

General Nursing (GNUR)

GNUR 402 Ethics for Health Professionals (2 Credit Hours)
In their various roles and practice settings, health care professionals participate in the unfolding stories of patients/clients and their families. They encounter ethical questions, concerns, problems and dilemmas in the course of their professional lives. These challenges affect health care professionals as independent and collaborative decision makers as well as members of the health care team who may be called upon to implement the decisions of others. This course provides students with opportunities to explore the impact of ethical issues on their personal and professional lives. Individual, family, institutional and societal issues are discussed. Students are guided in the application of frameworks that aid in resolving ethical dilemmas in professional practice. Emphasis is placed on developing skills in reflective moral thinking.

GNUR 404 Theories & Concepts for Advanced Clinical Practice (3 Credit Hours)
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.
Outcomes:
Upon successful completion of the course the student will be able to: 1) Understand the history and driving forces for knowledge development in nursing; 2) Describe the philosophical foundations of nursing and advanced nursing practice; 3) Understand the levels of theory development in nursing; 4) Explain the use of selected concepts and middle-range theories to guide advanced nursing practice; 5) Analyze concepts and theories for use in nursing practice; 6) Analyze the relation between theory, research, and nursing practice

GNUR 405 Introductory Statistics for Healthcare Professionals (3 Credit Hours)
Pre-requisites: Restricted to MSN, DNP, and PhD Nursing students
This course is focused on facilitating student acquisition of the knowledge and skills that will enable them to manage basic statistical issues that confront practitioners and researchers in health professions. Course topics and experiences will prepare students to interpret findings from published research and quality improvement reports and to conduct basic data analysis in future projects.
Outcomes:
1) Define basic statistical concepts; 2) Differentiate descriptive and inferential statistical tests; 3) Describe the purpose and appropriate application of statistical techniques; 4) Interpret the meaning of statistical tests; 5) Manage and analyze data using statistical software

GNUR 407 Social Justice and Ethics in Health Care (3 Credit Hours)
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics; 2) Analyze social justice and ethical issues at local, national, and global levels; 3) Apply professional codes to individual and interwoven issues of social justice, ethics and leadership; 4) Develop a plan to address population health inequities, based on evidence, codes and principles

GNUR 408 Research for Advanced Clinical Practice (3 Credit Hours)
Pre-requisites: Admission to a Master of Science in Dietetics or Master of Science in Nursing program
This course prepares students to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices and protocols form the foundation health care practice. The importance of translation of scientific evidence to improve practice is emphasized.
Outcomes:
Conceptualize an evidence-based protocol or pilot research study that corresponds to a clinical, educational administrative or policy issue or problem

GNUR 409 Advanced Health Assessment Lecture and Lab (3 Credit Hours)
This course prepares graduate nursing students to obtain a complete and accurate health database, including history, physical examination, and laboratory components, as a foundation for advanced nursing practice. Building upon previously acquired assessment skills, the focus is on the critical skills of obtaining a meaningful history and integrating it with physical findings to begin to develop a problem list.

GNUR 413 Advanced Pharmacology (3 Credit Hours)
This course will be the foundation for the advanced practice nurse to make appropriate decisions regarding the pharmacological management of patients in clinical practice. Pharmacological principles, including pharmacokinetics, pharmacodynamics, mechanisms of adverse drug reactions, and contraindications will be discussed. Legal requirements for writing prescriptions and the format for prescriptions as well as common sources of medication errors and methods to prevent them will be described. Developmental considerations, socioeconomic status, and complementary therapies will be addressed throughout the course. Pharmacotherapy of selected common disorders will be addressed. Students will synthesize and integrate diverse viewpoints, principles, and selected research findings related to the complex needs of patients via case study analyses. This course, along with clinical courses, will prepare the advanced practice nurse for prescriptive authority.

GNUR 420 Leadership and Roles in Advanced Nursing Practice (3 Credit Hours)
This course focuses on leadership concepts and theories with emphasis on application for transformation in healthcare. This course is designed to assist the student to enter into leadership and advanced nursing practice roles. Special emphasis is placed on the student's personal and professional development as a leader with a clear, individual vision for impacting the health of specific populations.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Synthesize knowledge of the concept of role and its components as they relate to advanced nursing practice; 2) Understand role expectations of advanced nursing practice and its major components: advanced practitioner (NP, CNS, CNM, CRNA), consultant, change agent, case manager, educator, researcher and leader and how they are integrated into health systems; 3) Articulate the role of the graduate prepared nurse as a clinical nurse expert, leader and innovator in healthcare; 4) Analyze knowledge of leadership theories for use as a foundation for role enactment as a leader in healthcare; 5) Understand principles of systems theory and their application to the clinical environment; 6) Compare models for change and sustainability consistent with current healthcare system dynamics; 7) Identify actionable leadership opportunities to improve nursing practice and patient outcomes; 8) Understand the potential for information systems to support decision making and innovation in practice and care delivery systems

GNUR 425 Advanced Health Assessment Across the LifeSpan (4 Credit Hours)
This course will prepare the graduate-level nursing student to generate a patient health database, including history and physical examination to inform clinical decision making and health promotion, across the lifespan. The course includes lecture and laboratory components.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Obtain comprehensive and problem-focused health histories including nutritional, cultural, social, functional, and developmental components; 2) Document comprehensive and problem focused health histories; 3) Perform comprehensive and problem-focused physical .examinations; 4) Differentiate normal and abnormal physical, behavioral, and developmental findings; 5) Develop a client problem list based on that patient's health history, and physical examination; 6) Plan anticipatory guidance and health promotion based on age, developmental level and cultural background

GNUR 432 Philosophy of Science (3 Credit Hours)
This course addresses the history and philosophy of science and the influence on nursing knowledge and the rapidly evolving nature of nursing science. This course includes the exploration of a diverse range of historical and contemporary influences of epistemological perspectives of the nature of knowledge and patterns and/or processes of knowing. An evolutionary lens is used to examine the history, philosophical foundations, and associated purpose, and methods of science as a foundation for nursing science.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Describe philosophies of science within historical contexts; 2) Discuss how the nature of knowledge relates to philosophy of science; 3) Analyze how different philosophies of science provide a foundation for nursing knowledge development and discovery; 4) Analyze the association between epistemological and philosophy of science foundations that guide scientific methods

GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan (2 Credit Hours)
Pre-requisites: GNUR 425 Advanced Health Assessment Across the Lifespan
This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit a comprehensive psychiatric health history and mental health assessment; 2) Distinguish assessment features, interviewing techniques, and legal/ethical aspects for children, adolescents, older or cognitively-impaired adults, and other special populations; 3) Integrate medical history and laboratory findings into differential diagnoses and diagnostic formulation; 4) Apply critical thinking skills and diagnostic reasoning with the use of evidence-based clinical practice guidelines across the lifespan; 5) Identify risk and protective factors, vulnerability, and areas of mental health resilience for patients, families, and communities

GNUR 440 Systematic Inquiry I: Scholarly Writing (2 Credit Hours)
This course focuses on types and styles of academic and scholarly writing. Students learn and apply elements of a rhetorical situation in the production of written work. Style and formatting considerations of scholarly writing are integrated into the drafting and revision of various forms of written work. Experiences with editing, peer-evaluation, and self-evaluation are integrated into the course, along with responding to substantive feedback in the revision of written work. Upon successful completion of this course, the student will be able to:
Outcomes:
1) Compare different genres of academic and scholarly writing styles and products; 2) Apply elements of style and grammar to scholarly writing; 3) Integrate components of a rhetorical situation into logical, focused, and coherent written works; 4) Engage in self and peer critique of written work; 5) Respond to substantive critiques of written work

GNUR 442 Advanced Physiology/Pathophysiology (3 Credit Hours)
This course presents contemporary principles of physiology that underlie the normal function of the human body and serve as a basis for clinical practice in a variety of settings. The content is taught within the context of key molecular processes, cellular and organ system function, and interactions among organ systems. Select clinical cases and exemplars are used to illustrate physiologic concepts and to facilitate the application of physiologic principles to understand the body's homeostatic processes in health and disease. Emphasis is on normal physiology but approaches are used to bridge physiological science with clinical application to common clinical disorders. The educational experience consists of three hours of classroom or on-line instruction per week, independent readings, case analyses, web-based applications, and classroom and/or course platform-supported discussion.

GNUR 451 Psychopharmacology Across the Lifespan (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the development of psychopharmacologic knowledge, critical thinking, and clinical judgment in the application of psychotropic medications to treat and manage psychiatric mental health conditions across the lifespan. Emphasis is on the neurobiological underpinning of psychopathology, pharmacodynamics, and pharmacokinetics of psychotropic medications. Students will learn the general principles of psychopharmacologic treatment, major psychotropic drug classes, and the ethical, legal, and professional guidelines for prescribing as an advanced practice nurse.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand the neurobiological processes related to the psychopharmacological treatment of psychiatric mental health disorders across the lifespan; 2) Differentiate between the major classes of psychopharmacologic medications in terms of pharmacokinetics, pharmacogenomics, pharmacotherapeutic value, and pharmacodynamics; 3) Apply critical thinking and clinical judgment when selecting appropriate psychotropic medications for patients, including: indication for use, diagnostic reasoning, medication and family history, dosing regimens, side effects, drug interactions, contraindications, and therapeutic drug monitoring; 4) Distinguish the management of psychotropic medications across the developmental lifespan, including children, adolescents, adults and older adults, and for patients with psychiatric comorbidities, substance use disorders, and other acute or chronic medical illnesses; 5) Evaluate therapeutic outcomes of psychopharmacological intervention using evidence-based prescribing guidelines, standard monitoring methodologies, psychological tools sensitive to medication changes, and other recommended laboratory testing; 6) Understand the legal, ethical, socio-cultural, and economic considerations when prescribing psychotropic medications across the lifespan

GNUR 455 Scholarly Writing (1 Credit Hour)
This course provides the opportunity for graduate students to further develop their scholarly writing skills. Research tools, publication ethics, literature reviews, academic writing, scientific research reports, submission strategies and etiquette, and alternative disciplinary genres will be explored.
Outcomes:
Develop individual strategies for reading, generating, revising, editing, and proofreading scholarly writing; Recognize, discuss, and demonstrate dynamics of effective literature reviews, scientific research reports and proposals

GNUR 456 Psychotherapeutics Individuals Groups Families (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the theoretical underpinnings and professional practice of integrating and evaluating psychotherapeutic modalities into advanced practice psychiatric nursing care with individuals, groups, and families. Using the principles of psychotherapy, students will learn the skills to develop strong therapeutic relationships to enhance mental health treatment, strengthen mental health resilience, and improve psychiatric outcomes. Emphasis will be on patient and family-centered care, which integrates socio-cultural perspectives of mental health and illness, treatment preferences, ethics and values, and legal or economic considerations.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize theories, ideological approaches, and methods for psychotherapeutic intervention as a basis for individual, family, and group therapy; 2) Understand how psychotherapeutic modalities, such as cognitive-behavioral, humanistic, and integrative-holistic therapies, are recommended based on age and developmental level, psychiatric condition, evidence-based practice, and patient-family preferences; 3) Apply clinical judgment, critical thinking, and decision making when integrating principles and techniques of psychotherapy into care; 4) Assess socio-cultural and spiritual perspectives of individuals, groups, and families and incorporate values into care; 5) Evaluate psychotherapeutic approach based on patient or family response, research and practice evidence, and changes in health policy; 6) Integrate legal, ethical, economic, and professional standards to the practice of psychotherapy

GNUR 461 Health Policy Issues (1 Credit Hour)
This course will introduce graduate nursing students to general health policy with a clinical approach. The focus of study in this course is to look at health policy as well as individual patients and caregivers and how they interact with each other and with the overall health systems. Health policy affects the patients we see on a daily basis, and the finances of health in the United States influences the care that is offered depending upon public or private health care funding. This course content will help bridge the gap separating the micro-world of individual patient and the macro universe of health policy.

GNUR 462 Health Care Financing (1 Credit Hour)
This course introduces concepts of economics and financial management for health care professionals. Course content includes principles of economics, fundamentals of managed care, and health reform, budgets and budget preparation, financial analysis, preparation of business plans, and health program grant proposals, and issues relevant to international settings and future trends.

GNUR 463 Cancer Genomics (3 Credit Hours)
This course uses a case-based learning process to examine the genetic basis for cancer disease, common cancer genetic syndromes, relative risk assessments, screening and surveillance guidelines, and the educational and management needs of clients and their families related to genetic predisposition to cancer. The emphasis is on the role of the advanced practice nurse.
Outcomes:
Upon completion of this course the student will be able to: 1) Describe the structure of DNA and differentiate among the various forms of genetic inheritance; 2) Describe the cancer burden in United States and how the science of genetics will assist with cancer control; 3) Explain oncogenesis, and function of oncogenes and tumor suppressor genes; 4) Obtain a genetics family history, and make a preliminary assessment of risk for genetic predisposition for cancer and the need for referral for further a genetic work-up; 5) Develop a basic level of skill in communicating information regarding cancer predisposition with sensitivity to the culture and the educational level of the clients and their families; 6) Analyze the cancer risk associated with common genetic cancer syndromes, the criteria for genetic screening and surveillance, and the genetic therapies available to date; 7) Analyze and apply current and future applications of genomics to cancer care

GNUR 471 Palliative Care (2 Credit Hours)
This course is designed to provide the student with an overview of the philosophy and principles of palliative care; the course emphasizes the unique knowledge that describes, explains, and guides the provision of hospice and palliative care. Students consider a holistic approach to care, including state-of-the-art nursing interventions that provide effective pain and symptom management and promote psychosocial and spiritual well-being. Students are prepared to serve diverse client populations whose diseases are life-threatening, and to perform effectively as members of an interdisciplinary team providing palliative care.

GNUR 472 Psychiatric Mental Health Advanced Practice Across Lifespan I (3 Credit Hours)
Pre-requisites: GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan
This course focuses on the neuroscientific understanding of psychiatric mental health disorders, which includes current evidence in genetics, biochemistry, neuropsychiatry, and behavioral neurology. Students will learn the DSM-5 classification for mental disorders, including etiology, development and course, risk and prognostic factors, diagnostic criteria, differential diagnoses, and cultural considerations. Major categories of mental disorders examined in this course are: psychosis and schizophrenia, depression and other mood disorders, anxiety disorders, trauma and stressor-related disorders, attention-deficit hyperactivity disorder, and substance use disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the developmental lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. Socio-cultural and ethical implications of the psychiatric mental health diagnosis also will be discussed.
Outcomes:
At the successful completion of the course, students will be able to: Synthesize neuroscientific evidence for the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; Apply critical thinking, diagnostic reasoning, and clinical judgment to the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; Implement the use of psychological tools and rating scales to strengthen diagnostic certainty, collect subjective and objective data, measure progress, and evaluate treatment outcomes; Examine the socio-cultural and ethical implications associated with the psychiatric mental health diagnosis

GNUR 474 Psychiatric Mental Health Advanced Practice Across Lifespan II (3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course builds on the knowledge base, diagnostic reasoning, and critical thinking competencies developed in Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I. This course continues the neuroscientific understanding of psychiatric mental health disorders and DSM-5 classification - for additional categories of illness, including autism and other neurodevelopmental disorders, eating disorders, dementia and delirium, sleep disorders, suicidality, and personality disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. In addition, emphasis on the bio-social-cultural understanding of mental health and illness will continue to be explored with special consideration to vulnerable groups.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize neuroscientific evidence on the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; 2) Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; 3) Apply critical thinking, diagnostic reasoning, and clinical judgment into the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; 4) Develop treatment recommendations and care plans that incorporate the perspectives, cultures, and values of patients and families with consideration to safety, environmental context, and professional ethics; 5) Explain the complex socio-cultural, ethical, political, and economic context for psychiatric diagnosis, mental health care, and mental health policy within the US; 6) Examine the impact of policy changes and advocacy efforts for special or vulnerable populations within psychiatric mental health care and treatment

GNUR 476 Basic Diagnostics for Advanced Practice (2 Credit Hours)
Pre-requisites: Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology
The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.
Outcomes:
1) Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses; 2) Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis; 3) Interpret diagnostic test results for clinical decision making

GNUR 482 Psychiatric Mental Health Advanced Practice Nursing Practicum (2-3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit and document a comprehensive psychiatric history and mental health assessment with consideration for level of care and treatment setting; 2) Generate differential diagnoses, problem list, and diagnostic formulation after synthesizing and evaluating objective and subjective data from patients, families, and other informants; 3) Develop an evidence-based treatment plan based on psychiatric diagnosis and presentation, knowledge of psychopharmacology and psychotherapeutic approaches, respect for persons, and consideration to special or vulnerable groups; 4) Apply critical thinking, clinical judgment, and decision making when implementing treatment recommendations and evaluating strategies within mental health care plans; 5) Understand the importance of coordinated care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care; 6) Implement preventive psychiatric mental health care for populations across the lifespan, which includes health and wellness programs, mental health screening, psychoeducation, counseling and therapeutic services, and integrative and holistic approaches

GNUR 498 Independent Study (1-6 Credit Hours)
Directed study in a specific topic area under the supervision of a faculty member.

GNUR 499 Interprofessional Team Practicum (1-7 Credit Hours)
Consent of discipline Program Director in collaboration with course faculty is required for registration. This course provides opportunities to students with backgrounds in a variety of clinical disciplines to engage in interprofessional team projects in healthcare settings and health and human service organizations, and to develop interprofessional competencies and project management skills.
Outcomes:
Apply knowledge of selected concepts, models, and theories from the clinical and management sciences to the management of high performing teams; apply evidence based/research findings for a selected problem/project; and examine the leader role within an interprofessional team environment

GNUR 500 Phenomena and Theories for Nursing Science I (2 Credit Hours)
This course emphasizes methods to analyze and develop knowledge of a phenomenon that is relevant to nursing science. Traditional and advanced methods of concept analysis and development are explored and critiqued for the advancement of nursing knowledge and nursing science. Fieldwork experiences for developing and refining a phenomenon of interest are included in the course.
Outcomes:
Upon successful completion of the course, the student is able to: 1) Evaluate existing and emerging concept development and analysis methods in developing substantive knowledge of a phenomenon; 2) Differentiate between disciplinary and professional knowledge of a phenomenon of interest; 3) Analyze the theoretical-conceptual-empirical structure of a phenomenon; 4) Compare extant and sensitizing conceptualizations of phenomenon

GNUR 501 Phenomena and Theories for Nursing Science II (2 Credit Hours)
This course is focused on the role of theory in the development of nursing knowledge. Emphasis is placed on strategies for theory development and evaluation in the generation and advancement of nursing science. Levels of theory on a continuum spanning grand theory to middle range theory are examined for utility in nursing science. The relation between theory and the substantive structure of nursing is examined.
Outcomes:
Upon successful completion to this course, the student is able to: 1) Relate the domain and perspective of the substantive structure of nursing to nursing theory and nursing science; 2) Analyze levels of theory, nursing theory, and theory development; 3) Apply theory analysis, theory synthesis, and theory derivation strategies; 4) Evaluate the logical and conceptual structure of theory and nursing theory

GNUR 504 Emergency and Acute Care Procedures for the NP (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 508 The Nurse Scientist Role (2 Credit Hours)
This course addresses the responsibilities and activities of a nurse scientist including the responsible conduct of research and ethical practice; scientific freedom and social responsibility; collaboration and negotiation; and the peer review process. The development of a program of research and research career trajectory including research funding and dissemination of research are examined. Students will identify traditional and emerging settings for the nurse scientist. The course explores knowledge and skills required to successfully work in teams within the local and global scientific community. The role expectation of the nurse scientist related to intra-professional and interprofessional research and mentorship are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze the qualifications, attributes, professional values, and ethics of a nurse scientist; 2) Identify career trajectory options of a nurse scientist; 3) Analyze stewardship of the nursing discipline within intra- and interprofessional teams

GNUR 509 Teaching Methods (3 Credit Hours)
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluation and measurements strategies, the faculty role, and regulatory issues.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain philosophies, theories and principles of teaching and learning; 2) Evaluate curricular design and implementation; 3) Analyze evaluation and measurement strategies in nursing education; 4) Discuss expectations of the faculty role; 5) Articulate the relationship among educational setting, teaching methods, and learner outcomes; 6) Evaluate education and nursing education research literature for implementation in practice

GNUR 510 Teaching Practicum (3 Credit Hours)
This practicum course provides students with a context for applying the concepts of teaching and learning in nursing education. Students will experience various dimensions of the teaching role and design, deliver and evaluate teaching/learning strategies. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Assess the learning needs and learning styles of learners; 2) Apply effective teaching in a selected area of nursing; 3) Apply principles of evaluation in formative and summative evaluations of the learners

GNUR 512 Quantitative Methods & Design for Nursing Research (3 Credit Hours)
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection and analysis, and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Students will gain practical experiences in quantitative research methods.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Evaluate and synthesize quantitative research studies and identify gaps for future quantitative research; 2) Identify theoretical or conceptual frameworks that guide research; 3) Develop research aims to address gaps in knowledge; 4) Understand conceptual-operational linkages in quantitative nursing research; 5) Assess the adequacy of quantitative designs in answering research questions; 6) Identify ethical concerns of quantitative research and the protection of human subjects; 7) Apply knowledge and skills related to conducting a quantitative research study

GNUR 513 Qualitative Methods in Nursing Research (3 Credit Hours)
This course focuses on exploration of qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical and special concerns of qualitative research are emphasized.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science; 2) Explain the relationship between theoretical and philosophical foundations and assumptions of qualitative research methods; 3) Compare qualitative research designs including background, purpose, research; 4) Develop basic skills in qualitative data collection and analysis; 5) Analyze ethical issues related to qualitative research and the protection of human subjects

GNUR 514 Common Health Problems of Adults/Older Adults (3 Credit Hours)
One course of a three-course sequence, GNUR 514 is designed to prepare the Nurse Practitioner to assume responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing common health problems.

GNUR 517 APN Practicum: Primary Health Care (1-6 Credit Hours)
Pre-requisites: Minimum grade of B- in GNUR 413, GNUR 425, & GNUR 442
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Clinical seminars will include discussion of concepts introduced in previous courses with application to clinical practice. Seminars will include student and faculty-led discussions, case reviews, and guest speakers.

GNUR 518L First Semester Student Standardized Patient Lab (0 Credit Hours)
This one-day seminar focuses on helping the primary care nurse practitioner student prepare for the first clinical practicum. The seminar includes a standardized patient experience.

GNUR 519 Measurement for Nursing Research (3 Credit Hours)
This course focuses on principles and concepts of measurement in nursing research. Psychometric theory, measurement frameworks and instrument development, critique, and testing are addressed. Methods for generating and evaluating reliability and validity evidence are emphasized and operationalized. Ethical concerns related to the development and use of measuring instruments are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Understand key principles and concepts of psychometric theory and measurement frameworks; 2) Differentiate between reliability and validity as evidence to support the use of a measure; 3) Apply statistical techniques in the generation of reliability and validity evidence; 4) Evaluate the suitability of measuring instruments for use in nursing research; 5) Understand principles and approaches to instrument development and testing; 6) Understand ethical issues related to instrument development, testing, and usage

GNUR 520 Systematic Inq II: Reviewing & Synthesizing Lit (2 Credit Hours)
This course focuses on learning and applying the process of systematic inquiry as a method to identify the state of science of a substantive area, gaps in the literature, and implications for nursing. Students learn how to search, organize and analyze the literature, synthesize and report the findings.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Define systematic inquiry and its relationship to research; 2) Distinguish among different types of literature syntheses; 3) Apply the process of systematic inquiry to a select topic; 4) Apply tools, methods and techniques for organizing literature; 5) Utilize appropriate standardized guidelines when reporting a literature review

GNUR 521 Population-Focused Health (3 Credit Hours)
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
Outcomes:
1) Analyze the role of federal, state, and local governments in population health; 2) Assess population specific health needs using Healthy People and the determinants of health as frameworks; 3) Examine the role of the World Health Organization and non-governmental organizations in population health; 4) Analyze health disparities and needs of priority populations using databases; 5) Apply epidemiologic concepts when completing a population needs assessment; 6) Examine evidence-based interventions for population specific health issues

GNUR 522 Emergency Health Care of Adults (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 523 Health Care Policy and Economics (3 Credit Hours)
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels; 2) Analyze the effects of health policy; 3) Analyze the effects of economic factors on health care decision making; 4) Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research; 5) Design practice improvement recommendations that account for policy, economic and financial variables affecting selected populations

GNUR 524 Advanced Reproductive and Sexual Health (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course will prepare the advanced practice nurse to manage the reproductive and sexual health care needs of all individuals throughout the lifespan. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for reproductive and sexual health. Emphasis is on the principles of reproductive anatomy and physiology including puberty, genetics, pregnancy, embryonic/fetal development, parturition, puerperium, lactation, and menopause in relationship to advanced practice nursing care.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Synthesize principles of neuroendocrine and physiological regulation of female and male reproductive function and the normal parameters of puberty, menarche, fertility, and menopause; 2) Analyze the impact of non-gynecologic primary health conditions on reproductive and sexual health; 3) Incorporate established evidence based sexual and reproductive health clinical practice guidelines; 4) Identify strategies to provide high quality, person-affirming, and culturally inclusive healthcare for self-identified gender and sexual minority persons and non-conforming individuals; 5) Develop genomics and genetic risk factor assessment in relation to reproductive and sexual health care, including basic principles of genetic testing, counseling, and referrals; 6) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes

GNUR 525 Special Populations and Topics in Emergency Health Care (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Synthesize evidence-based theories and practices into assessment, diagnosis and treatment of patients in special populations that present to the emergency department for care; 2) Analyze subjective/objective information to emulate differential diagnoses of emergent conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Develop treatment plans that incorporate inter-professional and socio-cultural sensitive treatment options; 5) Recognize legal issues that are unique to the delivery of care in the emergency setting; 6) Apply principles of disaster management to the care of individuals and communities affected by disasters

GNUR 526 Management of Common Adult Health Problems (4 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Assess presenting common health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of common conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 528 Management of Complex Adult Health Problems (4 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Assess presenting complex health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of complex conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 529 Family-Focused Health Promotion and Disease Prevention (3 Credit Hours)

Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment

This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.

Outcomes:

By the end of this course, advanced practice nursing students will: 1) Analyze data sources that identify and predict health risks of the individual, family, and community to facilitate development of clinical intervention strategies; 2) Integrate family systems theory and research on health promotion and disease prevention into strategies to manage health-related problems affecting family and community; 3) Synthesize broad ecological, global and social determinants of health to design evidence-based, culturally relevant clinical interventions and strategies; 4) Apply evidence-based guidelines to the identification and prevention of significant healthcare problems affecting populations at risk; 5) Distinguish cultural, spiritual, ethnic, gender, sexual orientation, economic, environmental, and age cohort differences in the risk, presentation, progression, and treatment of health problems

GNUR 530 Topical Seminar for Nursing (1-5 Credit Hours)

These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation.

Outcomes:

Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

GNUR 532 Research Internship (2-3 Credit Hours)

This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

GNUR 534 Advanced Practice Nursing Care of Older Adults (2 Credit Hours)

Pre-requisites: GNUR 528 Management of Complex Adult Health Problems for NP students OR MSN 447 for CNS students

This course explores current issues in aging and the care of older adults. A major focus of the course is preparing the advanced practice nurse to manage the healthcare of older adults with multiple medical and psychosocial needs in increasingly complex care systems. Topics include health promotion, disease prevention, and social determinants of health for older adults across the spectrum of health and illness, best practices in the management of geriatric syndromes, and special considerations in the assessment of older adults with functional and cognitive limitations.

Outcomes:

1) Apply current issues in aging, including aging theory, social determinants of health, caregiving, and legal-ethical considerations in the care of older adults; 2) Investigate the variety of care systems and settings where older adults receive care, including transitions of care; 3) Generate comprehensive health maintenance plans for healthy older adults and older adults with multiple comorbidities, incorporating evidence-based screening and prevention principles; 4) Discuss special considerations in the assessment of older adults with functional and cognitive limitations; 5) Apply best practices in assessment and management of geriatric syndromes; 6) Evaluate the importance of interprofessional teamwork in the care of older adults with multiple comorbidities

GNUR 535 Substance Use Disorders Addiction Lifespan I (3 Credit Hours)

Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I and II

This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and treat clients with substance use and addictive disorders. Neurobiological, behavioral, and socioecological perspectives will be used to understand the etiology, course and development, differential diagnoses and management of substance use and addiction. Students will learn pharmacological and non-pharmacological interventions to treat and manage substance use and addictive disorders across the lifespan.

Outcomes:

At the successful completion of the course, students will be able to: 1) Synthesize evidence-based scientific theories of substance use and addictive disorders; 2) Understand the neurobiological, behavioral, and socioecological aspects of substance use and addiction; 3) Assess and diagnose substance use and addictive disorders for clients with developmental considerations across the lifespan; 4) Apply pharmacologic, non-pharmacologic, and behavioral interventions in the management of clients with substance use and addictive disorders; 5) Evaluate management strategies in the treatment of substance use and addictive disorders

GNUR 536 Management of Adults with Acute/Critical Conditions I (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in the assessment, diagnoses, collaborative and holistic management of adults and older adults with traumatic, pulmonary and cardiothoracic disorders in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with trauma and cardiothoracic disorders within an acute care setting; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 537 Substance Use Disorders Addiction Lifespan II (2 Credit Hours)

Pre-requisites: Substance Use Disorders and Addiction Across the Lifespan I

This course focuses on the complex management of treating substance use and addictive disorders across the lifespan. Evidence-based strategies for caring for clients with co-occurring substance use and psychiatric disorders are presented. Students will learn innovative and novel approaches within research and practice to treat substance use and addiction. The socio-cultural, ethical, and legal challenges surrounding addiction and substance use disorders also will be explored.

Outcomes:

At the successful completion of the course, students will be able to: 1) Understand different philosophical approaches to manage addiction and substance use, including abstinence and harm reduction models; 2) Implement and evaluate evidence-based strategies to care for clients with complex co-occurring psychiatric and substance use disorders with an emphasis on recovery; 3) Describe how to include family and community members into the management of substance use disorders and address stigma associated with addiction and substance use; 4) Analyze the current research and practice focused on innovative and novel approaches and examine socio-cultural, ethical, and policy implications; 5) Explain the legal, ethical, and economic factors associated with substance use and addiction practice

GNUR 538 Management of Adults with Acute/Critical Conditions II (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in assessment, diagnoses, collaborative and holistic management of adults and older adults with systemic disorders that include episodic and chronic health problems in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with systemic disorders that include acute and critical episodes of health problems in acute care settings; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 539 Innovative Science, Theory and Methods (3 Credit Hours)
This course will introduce doctoral students to evolving areas of science and technology relevant to nurse scientists that require collaborative approaches and interdisciplinary team science. Content will focus on informatics and data science, genomics, implementation science, team science, and the value of health care.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Identify core concepts in informatics/data science, genomics, and implementation science; 2) Describe implementation science methods and determine appropriate models for health-related interventions; 3) Analyze the main ethical issues surrounding the use of big data (of all types); 4) Determine the value of innovative science methods to the health care system; 5) Analyze current and future applications of omics for precision health

GNUR 540 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Outcomes:
1) Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy; 2) Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing; 3) Identify presuppositions/assumptions underlying one's positions and the bases for accepting those presuppositions/assumptions; 4) Examine fundamental critical questions in ethics and nursing; 5) Explore selected social justice bioethical issues

GNUR 542 Grant and Proposal Writing (3 Credit Hours)
This course provides the foundation for grant development and submission. Content includes identifying sources and types of funding from governmental agencies, private foundations, and professional societies. Fundamental skills and strategies needed to prepare a competitive research grant proposal are addressed. Emphasis is placed on the strategies in revising an application, and the peer review process. Students will gain experience in writing sections of a competitive grant proposal, critiquing proposals and participating in a mock review.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Identify major sources and mechanisms of public and private funding for health-related research; 2) Describe key components of a research grant proposal; 3) Evaluate the strengths and weaknesses of research proposals; 4) Develop skills in preparing a competitive grant application; 5) Critique research grant proposals using peer review process

GNUR 543 Adult Primary Care NP Practicum (1-4 Credit Hours)
Pre-requisites: GNUR 526: Management of Common Adult Health Problems or GNUR 528: Management of Complex Adult Health Problems; WHNP Students also need MCN 414: Childbearing/ Family Course
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in primary care. During each practicum, the student will care for adult patients. This care includes health promotion, disease prevention, as well as assessment and management of the most common acute, chronic, and complex health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform complete physical, psychological and social health assessments, incorporating principles of health promotion, health maintenance, and chronic disease management; 2) Provide teaching, counseling, and anticipatory guidance in accordance with the patient and family's readiness stage; 3) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 4) Integrate knowledge of pathophysiologic and psychosocial changes associated with common acute, chronic and complex health problems into clinical decision-making; 5) Implement evidence-based, developmentally supportive plans of care for adolescents, adults, and older adults; 6) Modify management plan according to clinical response and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

GNUR 544 Nursing and Health Policy (3 Credit Hours)
This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level, The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
Course equivalencies: X-DNP 503/GNUR 544
Outcomes:
1) Analyze health care delivery systems and specific health policies using selected theoretical models; 2) Describe forces that shape health care policy development and implementation in the United States; 3) Relate the philosophy and ethical basis of Jesuit education to the values and preferences which shape health policy in a pluralistic society; 4) Outline the process of policy development and implementation within the content of multiple forces (government, the private sector, health professionals and consumers) that shape health care policy in the United States; 5) Discuss current health and nursing policy issues in the US and globally with emphasis on the political, social, economic, and cultural factors which influence health disparities and access to care; 6) Analyze a health policy within the student's own area of practice and interest in terms of the social, economic, legal political, and ethical forces that effect current and latent health outcomes; 7) Explain specific methods and strategies hat health care providers can use to advocate for and influence health policy at the organization, local, state, national and/or international level

GNUR 545 Evidence Translation for Advanced Clinical Practice (3 Credit Hours)
This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate theory, concepts and methods to guide translation of evidence; 2) Formulate questions about population-based practice problems, issues and areas for improvement in context; 3) Synthesize the state of evidence with regard to a specific practice problem; 4) Develop an evidence-based protocol to address the practice problem, issue and/or area for improvement in context; 5) Understand the use of metrics in the identification, monitoring and evaluation of practice outcomes; 6) Analyze social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 546 Advanced Statistics I (3 Credit Hours)
This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. The major topics covered in this course are univariate/multivariate linear regression, advanced data screening, model building, variable selection, regression diagnostics, univariate/factorial analysis of variance, and repeated measures design analysis of variance. Conceptual understanding and critical evaluation of statistical models is emphasized. Students will gain practical experience in using statistical software packages for the analysis of data.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply general linear modeling techniques in answering research questions; 2) Analyze bivariate and multivariate associations; 3) Interpret results of statistical testing using general linear modeling techniques; 4) Understand the process of model building and variable selection; 5) Evaluate assumptions of general linear models; 6) Apply regression diagnostic techniques

GNUR 547 Advanced Statistics II (3 Credit Hours)
This course will introduce advanced data analysis techniques common in clinical, behavioral and health outcomes research. Students will learn how to conduct and interpret mediational effects and path analysis, multivariate statistical models, repeated measures analysis, nonparametric analysis, and logistic regression models. Although the mathematical basis of the techniques will be considered, the course emphasizes the appropriate use and interpretation of these techniques.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Select appropriate analytic techniques based on the research questions; 2) Understand the computational basis for statistical techniques covered in this course; 3) Evaluate assumptions associated with each statistical technique; 4) Employ statistical software to conduct the appropriate analysis; 5) Interpret the results and make statistical inference

GNUR 550 Substance Use Management Practicum (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Practicum
This specialty practicum course has a focus on the diagnostic reasoning and clinical judgment required to assess, diagnose and treat substance use and addictive disorders. Students will integrate knowledge from their coursework and psychiatric mental health population clinical to diagnose and manage clients with substance use and addictive disorders across the lifespan. The student's level of performance is expected to progress throughout the clinical practicum.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence-based practice strategies to assess and diagnose children, adolescents, adults and older adult clients with substance use and addictive disorders; 2) Implement management strategies in the treatment of substance use and addictive · disorders; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of clients with substance use and addictive disorders; 4) Coordinate care across transitions for clients diagnosed with substance use and addictive disorders

GNUR 551 Cancer Care: Cancer Biology and Epidemiology (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to present an in-depth understanding of the current knowledge and research in cancer biology and pathogenesis. Genetic, molecular and cellular mechanisms of cancer pathogenesis are covered in depth. Cancer epidemiology, concepts of primary risk reduction, as well as cancer screening are presented. Susceptibility for hereditary cancers due to germline mutations is included in the context of primary and secondary prevention. Current and future applications of genomics to cancer care are presented and discussed.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of the biology of cancer; 2) Describe national and global trends in cancer incidence and mortality; 3) Discuss evidence supporting cancer prevention; 4) Analyze cancer risk associated with common hereditary cancer syndromes; 5) Understand general principles of cancer screening; 6) Analyze current and future applications of genomics to cancer care

GNUR 553 Cancer Care: Diagnostic and Therapeutic Approaches (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course will focus on the diagnostic and management dimensions of select cancers including hereditary cancer syndromes. Specialized content will focus on the therapeutic modalities utilized during the acute care phase of the cancer continuum across multiple care settings. Pharmacology of cancer therapies will be explored.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Differentiate among specific cancer types in terms of: epidemiology, etiology, prevention, screening, detection, classification, and treatment; 2) Apply diagnostic approaches and methods to cancer management; 3) Explain concepts and principles of cancer staging for various cancer types; 4) Apply general principles of treatment planning in cancer management; 5) Compare major treatment modalities; 6) Evaluate evidence-based therapeutic and pharmacologic treatment strategies for patients across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 555 Cancer Care: Palliative/Supportive Management (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to present an in-depth understanding of the current knowledge and research in psychological and supportive care for patients and families living with cancer. Information relevant to the following domains will be explored: symptom management; psychological, spiritual and culturally-appropriate care; communication; survivorship; and hospice and palliative care.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of cancer and treatment-related symptoms across the cancer care continuum; 2) Identify evidence-based advanced nursing practice for symptom management and psychological care of patients with cancer, across the cancer care continuum, including at the end of life; 3) Identify strategies for effective communication with patients, families, and interprofessional team members; 4) Describe psychosocial, spiritual, and culturally appropriate components of care with patients and families coping with cancer; 5) Explain unique issues of the cancer survivor; 6) Integrate principles of palliative care across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 560 Cancer Care Advanced Practice Practicum (2-3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the advanced practice nurse providing advanced nursing care to patients and families across the cancer care continuum. Students will gain experience in a variety of settings that will advance their proficiency in caring for patients and families with cancer.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply evidence in the assessment and management of patients across the cancer care continuum; 2) Collaborate with health professionals to plan and implement best practices in cancer care; 3) Evaluate the treatment plan for value and quality and modify as needed; 4) Analyze the ethical, legal, cost, and policy issues affecting advanced practice nursing of patients and families across the cancer care continuum; 5) Discuss the value of multidisciplinary cancer care teams to provide the most appropriate care for this complex and vulnerable population; 6) Demonstrate and document personal and professional growth in the role of the advanced practice nurse

GNUR 562 Emergency Health Care Advanced Practice Practicum (1-6 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the nurse practitioner in the emergency setting. Students will advance their proficiency in caring for patients that present across the lifespan and across acuity levels.
Outcomes:
1) Apply evidence-based practice strategies to assess and diagnose patients across the lifespan and across acuity levels that present with emergency/urgent conditions; 2) Implement management strategies in the treatment of patients in the emergency department setting; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of patients that present in an emergency/urgent care setting; 4) Implement proficiency in procedural skills relevant to the evaluation, stabilization, resuscitation, and treatment of the patient in the emergency setting; 5) Integrate the appropriate use of consultation, collaboration, and referral to appropriate health care providers into management of patients in an emergency/urgent care setting

GNUR 570 DNP Scholarly Project: Planning (1 Credit Hour)
Pre- or co-requisites: GNUR 545
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH course focuses on skills necessary for planning a successful DNP scholarly project. Project identification within the student's area of advanced expertise, organizational needs assessment, and outlining the project are emphasized. Skills necessary for the implementation of a successful DNP scholarly project, including collaborative inter-professional team participation and leadership, communication, and methods for project management, are emphasized.
Outcomes:
Upon successful completion of this course, DNP students will apply project management principles in the identification of a feasible DNP Scholarly Project that reflects the student's practice expertise, is evidence-based and grounded in theory

GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation (2 Credit Hours)
Pre-requisites: DNP Scholarly Project: Planning
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 2 SH course entails 1 SH of on-line seminar and 1 SH (75 clock hours) of practicum experience. The seminar focuses on full development and writing of a succinct proposal which describes planning, implementing, evaluating, and disseminating a scholarly project. The project is designed to improve patient, practice, or organizational outcomes based on an organizational needs assessment that demonstrates feasibility and organization's readiness for student's proposed project. Development of relationships at the project site, and exploration/initiation of preliminary project steps are emphasized during the practicum hours.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Incorporate findings from an organizational needs assessment into the development of a feasible scholarly project; 2) Defend a written project proposal which links scholarly experiences, use of evidence to improve either practice or patient outcomes or both

GNUR 572 DNP Scholarly Project: Project Implementation (2 Credit Hours)
Pre-requisites: GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Implement DNP Scholarly Project using project management skills and competencies; 2) Demonstrate leadership skills in project implementation and management; 3) Apply problem-solving methods and change concepts during project management

GNUR 573 DNP Scholarly Project: Analysis and Dissemination (1 Credit Hour)
Pre-requisites: GNUR 572 DNP Scholarly Project: Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.
Outcomes:
Upon successful completion of this course, DNP student will integrate project elements and data, demonstrating the use of evidence to improve patient or system outcomes

GNUR 598 Directed Study (1-6 Credit Hours)
Directed Study is a focused, defined, and substantive reading or research experience supervised by a faculty member. Directed study involves a close collaboration between the student, supervising faculty, and the academic advisor/chair in the design, scope, and expected student learning outcomes from the experience. Directed study may not be used as a substitute for an existing course or a cancelled course. Directed study credits may range from 1 to 3 semester hours. A course topic of Directed Readings or Directed Research may be requested to be entered on the transcript.

GNUR 600 Dissertation Supervision (0 Credit Hours)
This course focuses on continuing formation as a scholar through the development of the dissertation proposal. Using the student's dissertation plans as a reference point, the course will target strategies and competencies in generating and critically evaluating new knowledge, understanding the legacies of past and current work in the discipline and topic area, the transformational nature of knowledge, and the transformative work of communicating knowledge to others. Students are expected to maintain close and frequent contact with their dissertation chairperson/ committee members during their enrollment in the course. Two semesters in seminar format and thereafter the student works with the Dissertation Chair and committee in completing the dissertation

GNUR 605 Master's Study (0 Credit Hours)
Course designation for students who have completed their coursework and are completing the master's comprehensive examination. Enrollment in GNUR 605 is considered full-time study. Graded as credit (pass) or no credit (fail). This course can be taken twice.

GNUR 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

Maternal/Child Nursing (MCN)

MCN 401 Child/Family Health (3 Credit Hours)
Pre-requisites: B- or higher in GNUR 413, GNUR 425, and GNUR 442
MCN 401 is designed to prepare the Nurse Practitioner to assume responsibility for the coordination and management of health care for children, birth through adolescence. A developmental perspective is used to address the primary health care needs of the childrearing family with an emphasis on meeting the psychosocial and developmental needs of children and families. A major focus of the course is to prepare the student to assess, diagnose and manage selected common health problems of the pediatric population in primary care settings. Indications for collaboration, consultation, and/or referral to other members of the health care team are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical clinical judgment and implement theoretical knowledge in the management of the pediatric population, both in health and when experiencing common health problems.

MCN 414 Childbearing/Family (3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course will prepare the advanced practice nurse to manage the health care of essentially normal childbearing women during the prenatal and postpartum periods. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for childbearing women and families. Emphasis is on the concept of wellness during pregnancy, recognition of high-risk conditions requiring referral or collaborative practice, and the importance of support from family and community networks.

MCN 420 APN Practicum: Child/Family Health (1-3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425, and GNUR 442 (minimum grade of B-)
Co-requisites: MCN 401 (as prerequisite, minimum grade of B-)
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Pre or
Course equivalencies: MCN 420 / MCN 406

MCN 516 Pediatric Primary Care NP Practicum (3 Credit Hours)
Pre-requisites: MCN 401 Child/Family Health
This course guides the student toward a synthesis of content from nursing and related sciences, applying this knowledge to the role of the nurse practitioner in the primary care of pediatric patients. During this practicum experience, the student will care for children from birth through adolescence across a continuum from health promotion to the management of common health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform a complete physical, psychological and social health assessment incorporating principles of child development, health promotion and health maintenance; 2) Provide developmentally appropriate teaching, counseling, and anticipatory guidance; 3) Apply preventive interventions and risk reduction strategies for infants through adolescents, and their families; 4) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 5) Implement evidence-based, developmentally supportive plans of care for pediatric patients and their families; 6) Modify management plans according to clinical responses and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

MCN 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation. Restricted to Graduate Nursing students.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

Medical/Surgical Nursing (MSN)

MSN 408 APN Practicum (1-9 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include understanding relationships among nursing theory, research, principles of epidemiology and practice; formulating research questions and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

MSN 431 12-Lead ECG Interpretation (1 Credit Hour)
12-Lead ECG Interpretation is a summer course that promotes in-depth exploration of the significant diagnostic ECG challenges encountered in the advanced practice nursing environment. An understanding of the importance of clinical assessment skills and clinical judgment associated with diagnosis of clients in a variety of settings is an underlying assumption of faculty teaching this course. Included in this course are techniques for interpreting a variety of basic and advanced dysrhythmias and the ECG changes associated with bundle branch block, myocardial ischemia and infarct, atrial and ventricular hypertrophy, electrolyte imbalance, drug effects on the ECG, and other miscellaneous changes. Diagnostic characteristics, causes of the disorder, clinical significance, and management strategies will be highlighted. The student will be provided with opportunities for practicing 12-lead ECG interpretation using a variety of media.

MSN 432 Diagnostic Imaging for Advanced Practice Nurses (1 Credit Hour)
This course offers the advanced practice registered nurse (APRN) basic principles of radiographic interpretation. A systematic approach to interpret chest x-rays (CXR) will be discussed. Normal and abnormal findings commonly seen in emergency departments and critical care areas are presented. Correlation between symptoms and radiographs will be delineated. Common indications for obtaining a plain x-ray, CT, or MRI and orthopedic injury will be discussed in regard to patient safety, cost contained care and optimization of outcome.

MSN 433 Suturing and Acute Wound Management (1 Credit Hour)
This course is designed to enable the APRN student to obtain the theoretical knowledge and practical skills necessary to assess and manage acute wounds. This didactic/lab course discusses principles of wound care and teaches students techniques of wound closure including pain control, basic suturing and advanced skin closures; management of infections and injuries to the skin, hands and feet; and simple incision and drainage of abscesses. The student will be able to practice advanced skills that essential in the clinical management of the patient with acute wounds.

MSN 447 CNS Practice Across the Adult Age Spectrum (3 Credit Hours)
This course promotes in-depth exploration of significant clinical problems occurring in adult health patients from the vantage point of the advanced practice nurse prepared as a clinical nurse specialist (CNS). This course will prepare the CNS student for expert clinical practice and the competencies to translate clinical expertise into quality, cost-effective outcomes for adult patients. A major focus of the course is to prepare CNS students to assume responsibility for coordination, management and assurance of safety and quality of care of adult patients across the three spheres of influence: patient/client, nurses and nursing practice, organization/system of adult health patients. Attention will be directed to identifying and analyzing selected problems, designing effective advanced nursing interventions and evaluating health care outcomes related to adult health patients. Special consideration with be given to the top Medicare diagnoses, National Patient Safety Goals, CMS core performance measures, and new models for healthcare delivery. Indications for leadership, collaboration and consultation with other health care professionals are emphasized to insure optimal clinical management and achievement of evidence-based outcomes for the hospitalized adult patient. Strategies for improving the quality of health care through patient safety interventions and strategies are incorporated into patient care protocols at the individual, group and system level. The subsequent APN practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the coordinating and managing the care of adults experiencing acute and chronic health problems.

MSN 449 Management of Complex Adult Health Problems (3 Credit Hours)
One course of a three-course sequence, MSN 449 is designed to prepare the Nurse Practitioner to assume the responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults/older adults who are experiencing complex health problems.
Outcomes:
1) Analyze pathophysiologic and psychosocial components of complex health problems while doing client assessments; 2) Select appropriate and cost effective diagnostic tests and procedures for complex health problems; 3) Choose appropriate and cost effective traditional and alternative therapeutic approaches in the management of complex health problems, with emphasis on health restoration and maintenance; 4) Formulate prognoses and expected outcomes for persons with complex health problems; 5) Determine when consultation and collaboration with and referral to appropriate health care providers are necessary; 6) Design an appropriate plan of care for the adult /older adult with complex health problems synthesizing knowledge from ethics, research, and biological, behavioral, and nursing science; 7) Evaluate the management outcomes of adults with complex health problems and revise management as appropriate

MSN 485 APN Practicum: Adult/Older Adult Acute Care NP (1-12 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This clinical practicum is designed to guide the student toward the development of scientific knowledge and advanced practice skills in the area of acute care nursing. The attainment of this advanced practice mastery involves the synthesis of concepts, knowledge and skills gained in the previous courses applied to the care of the acutely ill adult patient. Course content focuses primarily on the advanced practice of acute care nursing and guides the student toward an actualization of the role of the acute care practitioner. The student will care for the acute care patient from admission to the tertiary care center through discharge/rehabilitation when possible. Through the use of nursing frameworks, nursing diagnosis, the nursing process, application of advanced knowledge, and advanced practice skills, the student will develop strategies for the nursing management of the critically ill patient. Professional, legal, cultural and ethical implications are presented. The practicum offers the student opportunities to work with the interdisciplinary team and to develop skills necessary for advanced practice nursing, advanced management, and exploration of research in the area of acute care nursing. Clinical seminars will include discussion of concepts that have been introduced in previous courses and will be built upon with added depth. A grand rounds/case study approach will be utilized with cases cared for by students in the clinical arena. Other possible topics include: implementation of the advanced practice nursing role, social support, patient advocacy, vulnerable populations, cultural diversity, contracting, credentialing, privileging, etc. Seminars will also include identification of ethical issues in the students' practice, application of research findings, applying a Jesuit philosophy in the care of the acutely ill individual or family, and individual development of a philosophy of advanced practice nursing. Seminars will include student and faculty-led discussions.

MSN 510 Clinical Practicum for Advanced Practice in the CNS role (2-4 Credit Hours)
Pre-requisites: MSN 447 CNS Practice Across the Adult Age Spectrum
This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact.
Outcomes:
At the end of the course the student will be able to: 1) Apply nursing health related models in the clinical practice setting; 2) Collaborate with the interprofessional team to support and improve patient outcomes; 3) Demonstrate the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; 4) Design, deliver and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; 5) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 6) Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; and 7) Analyze psychosocial, legal, ethical, political, and spiritual factors relevant to advanced nursing practice across the three spheres of impact

MSN 516 Adult Gerontology Acute Care NP Practicum (2-5 Credit Hours)
Pre-requisites: GNUR 536 Mgmt of Adults with Acute/Critical Conditions I and 538 Mgmt of Adults with Acute/Critical Conditions II
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in acute care. The practicum offers the student opportunities to work with the interprofessional team and to develop skills necessary for advanced practice nursing, including advanced management and exploration of evidence in the area of acute care nursing.
Outcomes:
1) Assess acutely ill adults applying nursing, behavioral and natural sciences concepts; 2) Collaborate with an interprofessional team in providing care to acutely ill patients in primary, secondary and tertiary health care settings; 3) Apply evidence-based strategies to the management of acutely ill adults; 4) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 5) Incorporate teaching-learning principles in meeting the educational needs of patients, families, and the community at large; 6) Examine quality improvement issues in the clinical setting, prioritizing patient safety and cost effectiveness; 7) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens

Nursing and Healthcare Administration (MSN)

The MSN track in Nursing and Healthcare Administration is designed to prepare the next generation of nursing executives with the clinical and administrative skills to shape nursing and health care teams and improve the overall delivery of patient care.

Curriculum

Loyola's MSN in Nursing and Health Care Administration is a hybrid program with both online courses and annual Immersion sessions.

Code	Title	Hours
Core Courses		
GNUR 404	Theories & Concepts for Advanced Clinical Practice	3
GNUR 407	Social Justice and Ethics in Health Care	3
GNUR 408	Research for Advanced Clinical Practice	3
Nursing and Healthcare Care Administration Courses

CMAN 407	Population Health Informatics	3
CMAN 425	Advanced Quality and Safety in Health Care	3
CMAN 430	Leadership and Administration in Health Care	3
CMAN 445	Health Care Outcomes	3
CMAN 448	Program Planning and Marketing in Health Care	3
CMAN 460	Health Care Policy	3
CMAN 533	Fiscal Management in Health Care Organizations	3
Practicum		
CMAN 417	Nursing and Health Care Administration Practicum	6
Total Hours		**39**

Clinical Requirements

All our practicums are designed by faculty members, who will help you secure your clinical site placements. Practicum experiences for the Nursing & Health Care Administration program can be completed in the student's geographical area.

The Nursing & Health Care Administration Practicum is six semester hours (each semester hour equals 56 clock hours).

Exam Requirements

All MSN students are required to complete a comprehensive exam to complete their degree.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

This is a sample program plan based on a Fall semester start. All students will work with their program director to create their program plan prior to starting the program.

[1] Nursing and Healthcare Administration MSN is an online program that will include immersion weekends. There will be one weekend in the Fall semester and one weekend in the Spring semester for the first two years of the student's program. Immersion weekends will begin on Saturday morning and conclude Sunday afternoon.

Immersion Sessions

Loyola's Nursing Health Care Administration MSN program is offered in a hybrid learning format that combines distance education with on-campus immersion sessions annually incorporating course work, seminars, and presentations.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Master of Science in Nursing (MSN) program is to prepare nurses at the master's level who use advanced knowledge and skills to assume a leadership role in interprofessional healthcare delivery to improve health outcomes at the system, population, or individual patient levels.

Program Outcomes

At the completion of the MSN program, the graduate has the knowledge and skills to:

- Integrate scientific findings from nursing, healthcare, and biopsychosocial fields; public health sciences; and the Jesuit Catholic tradition for the continual improvement of nursing and healthcare across diverse settings.
- Function as a leader emphasizing ethical and critical decision-making, effective working relationships, and application of organizational sciences in a systems perspective, to promote safe and high quality patient-centered care.
- Use translational science to integrate evidence into practice.
- Critically appraise healthcare technologies and information systems and incorporate data to promote optimal communication and healthcare delivery at the system and patient-care levels.
- Understand and appreciate the importance of health policies on health status and employ advocacy strategies to positively influence health care at the population level.
- As a leader or member of an interprofessional team, effectively communicate, collaborate, and consult with other health professionals to improve patient and population health outcomes.
- Working collaboratively with patients, families, and communities, utilize culturally sensitive evidence-based strategies for health promotion and disease prevention locally, nationally, and globally.
- Use expanded knowledge and change-agent skills for professional growth and the provision of indirect and direct care that enhances outcomes for individuals, populations, and systems.

Adult-Gerontology Acute Care Clinical Nurse Specialist (DNP)

Graduates of the Adult-Gerontology Acute Care Clinical Nurse Specialist track use advanced skills to care for adults in increasingly complex acute and critical care settings. The curriculum focuses on three spheres of impact: patient care, nursing personnel, and the health care system. Graduates of the track possess the core competencies to practice as a CNS for acute and critically ill adult patients in a variety of inpatients

settings, including direct care, consultation, systems leadership, collaboration, research, ethical decision-making, and advocacy.

Clinical Experiences

Practicum experiences are designed by faculty members, who will help secure clinical site placements. Practicum experiences for the Adult-Gerontology Acute Care CNS program can be completed in the student's geographical area. Students must have an RN license in before they begin clinical rotations.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Acute Care Nurse Practitioner (DNP)

Learn to care for adults with complex and critical conditions.

The Adult Gerontology Acute Care Nurse Practitioner track is designed to develop the advanced skills and knowledge to handle complex and critical patient situations, involving adults and older adults.

Curriculum

Total Hours		**71**

Clinical Experiences

A minimum of 2,000 hours of recent clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have an Illinois RN license and CCRN certification before they begin their clinical experience/rotation.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult Gerontology Clinical Nurse Specialist (DNP)

The Clinical Nurse Specialist (CNS) role provides leadership for best practice initiatives and cost- effective quality improvement.

Clinical Nurse Specialists possess the advanced knowledge and skills to coordinate quality care practices across three spheres of impact: patient care, nursing personnel, and the health care system. The role may include direct patient care, as well as consultation, systems leadership, research, ethical decision-making, and advocacy.

Specialty

Learn about the advanced practice care of patients across the cancer care continuum, by adding an Oncology specialty to your DNP degree.

Learn more about Loyola's Oncology Nursing program. (https://www.luc.edu/nursing/academics/certificateprograms/oncologynursing/)

Curriculum

The Adult-Gerontology CNS program can be completed fully online, allowing students to complete their clinical practicum hours at a site close to home. The program is 62-63 credit hours.

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult Gerontology Clinical Nurse Specialist with Oncology Specialty (DNP)

The Clinical Nurse Specialist (CNS) role provides leadership for best practice initiatives and cost- effective quality improvement.

Clinical Nurse Specialists possess the advanced knowledge and skills to coordinate quality care practices across three spheres of impact: patient care, nursing personnel, and the health care system. The role may include direct patient care, as well as consultation, systems leadership, research, ethical decision-making, and advocacy.

The oncology specialty preparation in the Adult Gerontology Clinical Nurse Specialist track provides the graduate with advanced oncology knowledge and skills to care for patients and their families across the cancer care continuum.

Curriculum

The Adult-Gerontology CNS program can be completed fully online, allowing students to complete their clinical practicum hours at a site close to home. This program is 63 credit hours for the Adult Gerontology Clinical Nurse Specialist track and 12 credit hours for the Oncology Specialty preparation. Six credit hours of practicum requirements are used to meet both the clinical nurse specialist requirements and the oncology specialization requirements. The program is 69 credit hours total.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Primary Care Nurse Practitioner (DNP)

The Adult-Gerontology Primary Care Nurse Practitioner track of the DNP Program is designed to prepare graduates to conduct advanced health assessments and histories, develop treatment plans for acute illness and chronic disease management, manage overall adult and gerontologic patient care, including issues related to aging and development, and leadership in interprofessional advanced nursing practice.

Clinical Experience

DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet the competencies to practice as an Adult-Gerontology Primary Care NP. Faculty design clinical rotations and place students with preceptors. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working in underserved communities.

A minimum of 2,000 hours of clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have an Illinois RN license before they begin their clinical experience/rotation.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Primary Care Nurse Practitioner with Oncology Specialty (DNP)

The Adult-Gerontology Primary Care Nurse Practitioner Program is designed to prepare graduates to conduct advanced health assessments and histories, develop treatment plans for acute illness and chronic disease management, manage overall adult and gerontologic patient care, including issues related to aging and development, and leadership in interprofessional advanced nursing practice.

The oncology specialty preparation in the Adult Gerontology Primary Care Nurse Practitioner track provides the graduate with advanced oncology knowledge and skills to care for patients and their families across the cancer care continuum.

Practicum		**13**
GNUR 543	Adult Primary Care NP Practicum	
GNUR 560	Cancer Care Advanced Practice Practicum	
Total Hours		**74**

Clinical Experience

DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet the competencies to practice as an Adult-Gerontology Primary Care NP. Faculty design clinical rotations and place students with preceptors. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working in underserved communities.

A minimum of 2,000 hours of clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have an Illinois RN license before they begin their clinical experience/rotation.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Family Nurse Practitioner (DNP)

The Family Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct advanced health assessments and histories, develop evidence-based treatment plans for acute and chronic disease management across the lifespan, manage overall patient care across the lifespan, and provide leadership in advanced nursing practice.

Clinical Experiences

All DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet FNP competencies. Faculty design all clinical rotations and secure placements for students. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working with and in underserved communities.

An RN license and a minimum of 2,000 hours of recent RN clinical practice experience is required before beginning the first practicum.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.

- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Family Nurse Practitioner with Emergency Specialty (DNP)

The Family Nurse Practitioner with Emergency Specialty track of the DNP program is designed to prepare graduates to work in emergent settings. Graduates are prepared to prioritize and triage patients, conduct advanced health assessments and health histories, diagnose and manage episodic illnesses, injuries, and acute exacerbation of chronic diseases in emergency settings, undertake emergency care procedures, and provide leadership in team partnerships to advanced emergency care, emergency preparedness, and response efforts.

Clinical Experiences

Faculty design and secure all clinical rotations for students. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on serving communities with high needs. Clinical experiences will be completed in primary care and emergency department settings.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Psychiatric Mental Health Nurse Practitioner (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental

health, develop and implement mental health treatment plans included medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

Curriculum

The Psychiatric Mental Health NP program is a blended format with both online and in-person instruction, including Immersion weekends at Loyola's Health Sciences Campus. Many students are working professionals with families, so we offer both part-time and full-time options to fit your schedule.

With our rigorous curriculum and significant number of credit and clinical hours, we seek to prepare you to successfully take the American Nurses Credentialing Center (ANCC) certification board in Psychiatric Mental Health Nurse Practitioner (Across the Lifespan).

The DNP can be completed in 74 credit hours or about four to five years.

Clinical Experience

DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet the competencies to practice as a psychiatric mental health NP. Faculty design clinical rotations and place students with preceptors. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working in underserved communities.

An RN license and a minimum of 2,000 hours of recent clinical nursing experience in psychiatric mental health is required before beginning your first practicum.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Psychiatric Mental Health Nurse Practitioner with Substance Use and Addictions Specialty (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental

health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental health, develop and implement mental health treatment plans included medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

The Substance Use and Addiction specialty preparation is focused on the comprehensive diagnosis and treatment of substance use disorders and the impact of these disorders on psychiatric mental health and treatment options. Students complete additional coursework and practicum experiences with a specific focus on substance use and addiction.

Curriculum

The Psychiatric Mental Health NP with Substance Use and Addictions specialty is offered in a hybrid learning format with both online and in-person instruction. This program is 78 credit hours.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Systems Leadership (DNP)

The Systems Leadership track of the Doctor of Nursing Practice program integrates advanced nursing practice competencies in a post- master's curriculum that includes leadership, systems thinking, quality and safety, health policy, and health care economics and finance.

This program is available to students entering with a completed MSN degree.

Curriculum

Our flexible DNP in Systems Leadership program provides part-time and full-time options to fit your schedule.

[1] Required for students participating in Nurse Faculty Loan Program

The online program includes two required immersion weekends for integrated learning and collaboration with classmates and faculty. The weekends occur once a year during the last two years of the program at Loyola's Health Sciences Campus.

DNP Project

Students are required to complete a final DNP project which must focus on translating evidence to practice, practice change, or health policy change.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Women's Health/Gender Related Nurse Practitioner (DNP)

The Women's Health/Gender Related track of the Doctor of Nursing Practice program prepares graduates to conduct advanced health assessments and health histories, develop treatment plans for acute illness and chronic disease management, manage health across the lifespan, including pregnancy and menopause, manage sensitive topics in women's and gender related health, and provide leadership in interprofessional, team-based evidence-based health care.

Clinical Experiences

A minimum of 2,000 hours of recent clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have a RN license in the state of Illinois before they begin the clinical portion of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Post-Graduate Advanced Practice Registered Nurse (APRN) Certificate

The Post-Graduate APRN Certificate program is designed for graduate prepared registered nurses who wish to obtain preparation in an additional advanced practice nursing role and/or population, and eligibility for completing the certification examination in that role and/or population. A gap analysis that considers prior graduate level coursework and the recency of that coursework serves as the foundation for an individualized program of study leading to the certificate.

Program Goal

The goal of the post-graduate Advanced Practice Registered Nurse (APRN) certificate programs is to prepare APRNs in a selected role and population, with the option of a specialty focus, by building on previous graduate level nursing education.

The coursework in the Post-Graduate APRN Certificate Program is individualized, based on prior graduate level coursework in nursing, and the recency of that coursework. At a minimum, students in the Post-Graduate APRN Certificate Program will complete patient care management coursework and clinical practicum experiences relevant to the role and population focus being pursued through the program.

Learning Outcomes

Upon the successful completion of the Post-Graduate Certificate Program, the graduate will be able to:

- Integrate scientific findings from nursing, healthcare, biopsychosocial fields and public health into values-based advanced practice nursing care.
- Function as a clinical leader, emphasizing ethical and critical decision-making and effective working relationships in the delivery of safe, high quality, patient-centered care.
- Use translational science to integrate evidence into practice.
- Employ advocacy strategies in advanced nursing practice.
- Collaborate with patients, families, and communities, utilizing culturally sensitive, evidence-based strategies for health promotion and disease prevention.
- Communicate, collaborate, and consult with members of the interprofessional team in the improvement of patient and population health outcomes.

Oncology Nursing Certificate

The Oncology Certificate program is designed for baccalaureate or graduate prepared nurses who desire to advance their skills and knowledge in the care of patients with cancer.

Students may also complete Oncology Specialization as part of their program of study in the Adult-Gerontology Clinical Nurse Specialist or Adult-Gerontology Primary Care Nurse Practitioner tracks of the DNP program.

Loyola Nursing's Online Oncology Certificate program is designed for advanced practice nurses and BSN-prepared nurses who want to advance their oncology knowledge and skills. Experience in an oncology nursing practice area is required.

Curriculum

Loyola's Oncology Certificate program focuses on the continuum of cancer care—from prevention, risk identification, acute care, and end of life. The online certificate can be completed in nine semester hours.

Students pursuing an Oncology Certificate, will take the following courses:

Code	Title	Hours
GNUR 551	Cancer Care: Cancer Biology and Epidemiology	3
GNUR 555	Cancer Care: Palliative/Supportive Management	3

GNUR 553	Cancer Care: Diagnostic and Therapeutic Approaches	3
Total Hours		**9**

Students pursuing Oncology Specialty preparation as part of the DNP program complete the following courses and the oncology specialty practicum:

Code	Title	Hours
GNUR 551	Cancer Care: Cancer Biology and Epidemiology	3
GNUR 555	Cancer Care: Palliative/Supportive Management	3
GNUR 553	Cancer Care: Diagnostic and Therapeutic Approaches	3
Oncology Specialty Practicum		6
Total Hours		**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Oncology Nursing Certificate program is focused on:

- Collaboration with health professionals to plan and implement best practices in cancer care
- Providing advanced nursing care to patients and families across the cancer care continuum

Parkinson School of Health Sciences and Public Health

Loyola University Chicago's Parkinson School of Health Sciences and Public Health brings together our call as a Jesuit institution to go to the frontiers of education, research, and practice, and help people who live at the margins.

An established leader in health care education with the Stritch School of Medicine and the Marcella Niehoff School of Nursing, the Parkinson School of Health Sciences and Public Health draws on those strengths to address today's public health challenges and train the next generation of experts in public health, health systems and informatics, dietetics, exercise science, and medical laboratory science.

Flexible degree programs and certificates are available as listed below that meet student, community, and industry needs. The Parkinson School includes programs for undergraduate and graduate students, as well as career professionals who seek additional skills or a career change. Innovative and accessible program formats for adult learners along with traditional undergraduates include online instruction and hybrid learning programs on Loyola's Health Sciences Campus and Lakeshore campuses. Insight into the student experience (https://www.luc.edu/features/stories/parkinson/).

Graduate Programs

- Clinical Certificate in Blood Banking (p. 1858)
- Clinical Certificate in Hematology (p. 1859)
- Clinical Certificate in Microbiology (p. 1859)
- Clinical Research Methods and Epidemiology (MS) (p. 1860)
- Dietetic Internship Certificate (p. 1861)
- Dietetics (MS) (p. 1864)
- Exercise Science (MS) (p. 1865)
- Health Informatics (MS) (p. 1867)
- Health Informatics Certificate (p. 1868)
- Healthcare Administration (MHA) (p. 1869)
- Medical Laboratory Science (MS) (p. 1870)
- Medicine/Public Health (MD/MPH) (p. 2222)
- Public Health (MPH) (p. 1871)
- Public Health Certificate (p. 1874)
- Social Work/Public Health (MSW/MPH) (p. 2259)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Exercise Physiology (EXCM)

EXCM 401 Applied Physiology of Exercise (4 Credit Hours)
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.
Outcomes:
1) Describe major milestones, influences, and future directions in the development of the science of exercise physiology; 2) Explain the importance of the physiological adaptations that occur as a result of properly designed training programs; 3) Analyze measures of the physiology of respiration, circulation, energy production, metabolism, and muscle function in rest and exercise states; 4) Interpret research findings focused on cardiovascular, respiratory, metabolic and neuromuscular physiology in exercise science; 5) Perform selected laboratory and field tests of physiological function and physical fitness; 6) Interpret results from laboratory and field tests of physiological function and physical performance; 7) Differentiate positive training changes and signs and symptoms of overtraining among healthy individuals throughout the life cycle

EXCM 424 Motor Learning and Performance (3 Credit Hours)
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.
Outcomes:
1) Understand theoretical approaches that drive motor control and motor learning research; 2) Analyze principles and processes underlying movement skilled performance; 3) Analyze the human motor system and how it supports the acquisition and retention of complex movement skills; 4) Adapt instruction situations to achieve maximum performance and retention of learned skills; 5) Relate information processing and decision-making models to performance and movement

EXCM 435 Health Promotion and Wellness Theories and Frameworks (3 Credit Hours)
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.
Outcomes:
1) Relate concepts of health, health promotion, and wellness that influence individual and group health and quality of life; 2) Assess the health education and health promotion needs of individuals and groups in diverse populations; 3) Design culturally congruent health education, wellness, and behavioral modification programs, focused on improved health and quality of life, in community-based settings; 4) Implement health education, wellness, health promotion, and behavioral modification programming for diverse populations; 5) Evaluate health education, wellness, health promotion and behavioral modification programming in a variety of settings, using an outcomes-oriented approach; 6) Identify cultural, social, economic, and political influences on decision making and action in health and wellness

EXCM 444 Strength Training and Conditioning (3 Credit Hours)
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individuals¿ goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.
Outcomes:
1) Analyze the relation between resistance training and human performance; 2) Incorporate appropriate exercises, such as resistance training, medicine ball, balance, plyometric, and linear and lateral movement exercises into exercise prescriptions; 3) Differentiate between general fitness prescriptions and specific training to enhance athletic performance; 4) Evaluate biomechanical aspects of efficiency and performance; 5) Apply performance enhancement training principles to individuals' specific needs and goals

EXCM 450 Nutrition, Health and Performance (3 Credit Hours)
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimension of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.
Outcomes:
1) Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance; 2) Apply principles of evidence-based nutrition to the food habits and practices of diverse individuals and populations; 3) Analyze energy and nutrient intake based on level of training and type of sport and exercise; 4) Understand roles and domains of practice of collaborating professions in promoting health, fitness and performance; 5) Develop interprofessional competencies to collaborate with nutrition professionals in optimizing nutrition for health, fitness, and performance

EXCM 454 Applied Sports Science (3 Credit Hours)
This course focuses on the application of science in the study of elite athlete sports performance. Advanced aspects of physiological monitoring, along with other athlete assessment tools will be examined. Special emphasis will be placed on the evidence-based, practical application of these various techniques, enabling a holistic approach to improving athlete health and performance.
Outcomes:
Identify the relation between cumulative stress and human performance; Plan periodized practices of strength and conditioning, sport training, nutrition, and psychological preparation to optimize performance in individual and team sport

EXCM 458 Cardiac and Pulmonary Disease and Rehabilitation (3 Credit Hours)
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.
Outcomes:
1) Understand anatomy and physiology associated with cardiopulmonary health and disease; 2) Relate pathophysiology changes in cardiac and pulmonary disease to exercise prescription; 3) Explain diagnostic tests and procedures used in exercise assessment and intervention in cardiac and pulmonary health and disease; 4) Understand essential elements and phases of cardiac and pulmonary rehabilitation; 5) Design preventive exercise prescriptions for cardiac and pulmonary health in individuals and groups; 6) Design rehabilitative exercise prescriptions for patients with cardiac and pulmonary health alterations

EXCM 468 Application of Advanced Clinical Exercise Testing & Prescription (4 Credit Hours)
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.
Outcomes:
1) Understand the signs, symptoms and scope of cardiovascular conditions, respiratory conditions, and metabolic conditions, and the development of these pathologies; 2) Apply risk assessment and stratification models in the diagnostic and functional assessment of individuals; 3) Evaluate the indications and contraindications of subject selection for testing, considering safety precautions, indications for test termination, and emergency procedures for conducting a graded exercise stress test; 4) Interpret results of exercise stress tests; 5) Differentiate normal and abnormal electrocardiographic responses to exercise of varying duration and intensity; 6) Design appropriate exercise test mode and protocols in consideration of client characteristics; 7) Understand responses to various emergency situations that may occur in exercise settings

EXCM 475 Exercise Applications in Special Populations (3 Credit Hours)
This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.
Outcomes:
1) Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations; 2) Analyze the effects of exercise training and nutrition on the underlying etiology and pathophysiology of acute and chronic conditions; 3) Prescribe exercise activities to optimize health and performance in special populations; 4) Adapt exercise prescriptions based on the individualized needs of individuals with anatomic, physiologic, or sensory challenges; 5) Evaluate the effectiveness of adaptations to exercise prescriptions and programming in special populations

EXCM 478 EKG Interpretation (3 Credit Hours)
This course will help students master the practical competencies of electrocardiography (EKG), including performing a 12-lead EKG, ambulatory monitoring, and the concepts of monitoring and interpreting an EKG with and without exercise stress testing. Additionally, this course will present content related to the cardiac cycle, EKG abnormalities, ectopy, and dysrhythmias, and identifying ischemia. Students will perform hands-on 12-lead EKG analysis at rest and with exercise and the steps required for ambulatory monitor testing.

EXCM 480 Advanced Exercise Assessment and Programming (3 Credit Hours)
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.
Outcomes:
1) Apply periodization models in the optimization of athletic or physical training and performance; 2) Analyze the relationship between training volume and intensity over time; 3) Analyze principles of program design for performance enhancement; 4) Evaluate testing approaches to the assessment of strength and conditioning; 5) Generate exercise program modifications for individuals based on youth development, injuries, and inexperience; 6) Relate variables of overload, variation, and specificity to strength and conditioning training

EXCM 482 Research Methods and Evidence in Exercise Science (3 Credit Hours)
This course prepares the student to understand scholarly inquiry, evaluate research evidence, develop evidence-based practices/protocols, and generate knowledge for evidence-based practice in exercise and fitness. Methods of operationalizing scholarly inquiry include: understanding relations among theory, research, and practice; formulating research questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying research findings to exercise science practice. Social, cultural, political and ethical issues related to research are addressed, including special considerations of research conducted in exercise settings.
Outcomes:
1) Understand scholarly inquiry processes in relation to evidence-based practice and knowledge generation in the field of Exercise Science; 2) Formulate research questions that address clinical, educational, administrative, or policy issues for evidence-based practice in Exercise Science; 3) Understand the elements of various quantitative research designs; 4) Assess the adequacy of selected quantitative and qualitative designs in answering research questions in Exercise Science; 5) Evaluate extant evidence and theories relevant to knowledge gaps in the field of exercise science; 6) Analyze ethical issues and concerns in research related to Exercise Science

EXCM 485 Applied Biomechanics (4 Credit Hours)
This course will provide an analytical approach to the study of the human nervous system and human motion as applied to kinematic and kinetic analysis, study of anatomy, physiology, and mechanics.
Outcomes:
Students will use and apply laboratory measurement techniques commonly used in exercise science

EXCM 490 Special Topics in Exercise Science (1-3 Credit Hours)
Contemporary research, literature, projections and views as applied to fitness, nutrition, health, and well-being. Much of the learning that occurs in this course will be the result of group discussion. The topic areas covered will include fitness, nutrition, health, aging, obesity, and injuries. However, topics covered will largely be determined by student interests. Pre-requisites: Restricted to Parkinson School of Health Sciences and Public Health students.
Outcomes:
1) Understand research findings and scholarly writings in a specific topical area of Exercise Science; 2) Evaluate scientific and theoretical literature in s specific topic area of Exercise Science; 3) Direct scholarly discussion in a topical area of exercise science, with a focus on the individual, family, and community

EXCM 495 Advanced Exercise Science Internship (4 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management. 1 credit hour is 50 clock hours of internship.
Outcomes:
1) Apply specialized skills and knowledge acquired in exercise science core courses in a practicum setting; 2) Work collaboratively with the interprofessional team; 3) Participate in planning sessions, meetings, and other activities of the professional staff in the field setting; 4) Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes, and timelines. Permission of the Program Director required.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

Food and Nutrition (FONU)

FONU 400 Role Development in Dietetic Practice (1 Credit Hour)
Pre-requisites: Admission to the dietetic internship
This course includes concepts and resources related to professional practice as a registered dietitian. Ethical issues, licensure, and scope of practice will be explored. Professional development will be discussed from entry-level to advanced practice. Fiscal aspects of professional practice, such as reimbursement and compensation, will also be considered.
Outcomes:
Students will define ethical issues, licensure requirements, increase professional development, and learn about fiscal aspects of the practice, such as reimbursement and compensation

FONU 410 Nutrition Focused Physical Assessment (2 Credit Hours)
This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities. Master of Science in Dietetics major, or instructor permission
Outcomes:
Demonstrate competence in conducting a nutrition-focused physical assessment; Demonstrate skills for assessment and care of the patient receiving specialized nutrition support; Measure common physiologic parameters used in medical nutrition therapy

FONU 420 Transition to Supervised Practice in the Dietetic Internship (1 Credit Hour)
Pre-requisites: admission to LDI
This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422 Medical Nutrition Therapy Theory (3 Credit Hours)
Pre-requisites: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, and renal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424 Public Health Nutrition and Research Theory for Dietetic Practice (3 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 426 Food Management Theory: Geriatric Nutrition (1 Credit Hour)
This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition (1 Credit Hour)
This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Permission of the Program Director.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

FONU 501 Writing and Communications in Nutrition and Dietetics (3 Credit Hours)
This course focuses on scientific writing and communication skills essential to dietetic practice. Emphasis will be placed on clarify, consistency and translation of scientific evidence into effective messages for diverse populations. Standards for publication of practice and research based papers understanding and responding to peer review process will be discussed. Master of Science in Dietetics major, or instructor permission
Outcomes:
Create proposals, scientific reports and/or articles using writing skills of planning, drafting, revising and editing to incorporate appropriate evidence tailored to different audiences, publications and media formats

FONU 503 Dietetic Theories & Research Methods (3 Credit Hours)
This course analyzes theories of health and disease with implications for dietetic practice. Principles of research will be examined with a focus on methods to assess food, nutrients and related physical or biochemical parameters.

FONU 505 Trends in Dietetic Practice (2 Credit Hours)
Pre-requisites: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission
This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergics and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including movational interviewing for behavior change.
Outcomes:
Student will demonstrate knowledge in emerging areas related to dietetic practice

FONU 507 Behavioral Change for Health Promotion (3 Credit Hours)
This course focuses on concepts and theories of health and behavior related to food, nutrition and other behaviors. Evidence to support select skills and techniques for health will be evaluated and applied. The impact of interventions will be analyzed to provide evidence-based frameworks for behavioral change in individuals and groups. Master of Science in Dietetics major, or instructor permission.
Outcomes:
Incorporate evidence-based behavioral change interventions into nutrition care plans; demonstrate skill in a behavioral change encounter in a simulation, analyze major approaches and influences of health promotion (eg policy, community engagement, advocacy and social marketing)

Health Informatics & Data Science (HIDS)

HIDS 401 Foundations of Health Informatics (3 Credit Hours)
This course offers students a broad overview of health informatics as a foundation for further study of the topic. Designed as a survey of informatics domains as well as primer of informatics methods, this course serves as an introduction for anyone interested to ask good informatics questions, employ informatics tools, or design informatics systems across a broad range of biomedical applications.
Outcomes:
Understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge in the context of health and biomedical domains; Understand the particular nature of data, information, and knowledge in health, analyze the importance and limitations of coding standards; Analyze and evaluate the role of health informatics and its societal impact; Analyze the current trends and current issues in health informatics

HIDS 411 Clinical Data Science (3 Credit Hours)
Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.
Outcomes:
Understand and describe the steps in the life cycle in biomedical and clinical research; Understand the key principles of data management; Apply, analyze, and evaluate data structures, standards, and quality of data in large biomedical databases and clinical research; Analyze and evaluate key data analytics concepts as they apply to biomedical research; Analyze ethical and legal issues when dealing with biomedical and clinical data

HIDS 412 Translational Bioinformatics (3 Credit Hours)
Pre-requisites: HIDS 411 Clinical Data Science
This course covers the fundamentals of bioinformatics and how they apply to translational and clinical problems. The purpose of this course is to give students a broad overview of the field of bioinformatics, and the tools commonly used, as well as the applications to practical biomedical issues, diseases, population health, drug discovery, etc. The students will also be exposed to a variety of open-source software for sequence alignment, SNPs discovery, and on how to access and analyze data from large biological databases, for translational and clinical research.
Outcomes:
Understand and apply a range of bioinformatics algorithms, and their computational efficiency; Apply and analyze informatics techniques to retrieve, store, and analyze 'omics' data; Apply and analyze open-source tools and open access databases to find and analyze data of translational and clinical importance; Analyze the current trends and problems in bioinformatics and how they relate to clinical issues, population and public health

HIDS 421 Security and Privacy in Healthcare (3 Credit Hours)
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.
Outcomes:
Understand the role of information security and data privacy in healthcare; Apply basic principles of computer security, such as confidentiality, integrity, and availability; Apply and analyze security principles in research data management; Analyze and evaluate the ethical and legal considerations associated with biomedical and clinical data; Understand and analyze the importance and role of the Institutional Review Board and its function with respect to protecting human subjects

HIDS 422 Ontologies in Healthcare (3 Credit Hours)
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.
Outcomes:
Understand the role of ontologies in knowledge representation; Understand the differences between realist and anti-realist ontologies; Understand and describe the importance of propositional and predicate logic in knowledge representation and discovery; Understand basic principles of developing ontologies in health care; Build ontologies using computer ontology-building tools; Understand and describe how ontologies affect biomedical informatics systems and how we discovery new knowledge

HIDS 431 Introduction to Natural Language Processing in Health (3 Credit Hours)
Pre-requisites: HIDS 401 Foundations of Health Informatics and HIDS 411 Clinical Data Science
The objective of this course is to present a broad overview of methodologies to analyze and mine biomedical text automatically. Students will be exposed to some of the common and state-of-the-art software, algorithms and techniques to extract content and knowledge from biomedical texts. A particular emphasis will be placed on how these methodologies are used in the context of health care, clinical records and narratives, and how extracted information can be used to improve care.
Outcomes:
Understand and apply artificial intelligence methodologies and software to automatically extract information from unstructured text; Assess and evaluate advantages and disadvantages of such methodologies; Understand and analyze how machine learning tools are used in a clinical context; Analyze how NLP techniques enrich structured data, improve accuracy of diagnosis, and their role in learning health systems

HIDS 441 Human Centered AI for Healthcare (3 Credit Hours)
This is a survey course of AI user-facing systems for healthcare, that demonstrates the practical use of seminal algorithms in machine learning and AI, as well as principles of interaction design and user center design. In addition, the course focuses on how these design principles and algorithms can be blended to generate impactful systems that help bridge health disparities.
Outcomes:
Analyze the factors that influence a successful human interaction with computer systems for healthcare; Compare and contrast the opportunities and limitations of AI infused technologies for healthcare applications; Develop evaluation and testing plans for eHealth applications/devices that use AI; Design applications/devices that satisfy a healthcare need using principles of AI and human factors

HIDS 495 Independent Study (1-4 Credit Hours)
This is a directed study course in health informatics for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 499 Health Informatics Capstone (1-3 Credit Hours)
Pre-requisites: Students in the HIDS program must have completed 2 semesters of course work
Development of an informatics project, including research question, literature review, and assessment.
Outcomes:
Development of a scholarly paper and presentation

Healthcare Administration (MHA)

MHA 405 U.S. Health Systems Management (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.
Outcomes:
Distinguish roles, functions and responsibilities of healthcare system components; Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access

MHA 415 Culture of Quality & Safety in Health Care (3 Credit Hours)
Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.
Outcomes:
Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes; Analyze role of various systems, factors in creating safe environments of care; Explain "just culture" thinking on safety, quality improvement; Develop plan for improvement of safety/quality

MHA 430 Managerial Epidemiology (3 Credit Hours)
Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.
Outcomes:
Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions

MHA 440 Healthcare Management and Ethics (3 Credit Hours)
This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.
Outcomes:
Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager; Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges

MHA 450 Research Literacy for Health Decision Makers (3 Credit Hours)
This course explores the research process and the regulatory requirements in health sciences research. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations. Students will present a critical analysis of multiple types of research studies. 2) Describe research governance, ethical doctrine and regulations impacting human participant protection. 3) Assess study design and describe appropriate measures and data collection techniques. 4) Discuss regulatory and policy factors that impact health-related research. 5) Critically evaluate health-related research, including analysis and conclusions. 6) Evaluate the relevance and implementation challenges of novel research. 7) Determine how ethical healthcare leaders impact innovation and research.
Outcomes:
1) Explain the scientific method as it relates to research

MHA 451 Healthcare Finance I (3 Credit Hours)
This course provides a basic understanding of financial management principles with emphasis on the not-for-profit entity. Foundational accounting concepts are explored with a focus on risk, financial statements, capital investments, debt and equity financing.
Outcomes:
Students will be able to recognize the three main corporate financial statements and explain in lay terms the information contained therein

MHA 452 Healthcare Finance II (3 Credit Hours)
Pre-requisites: MHA 451
Building on the foundational learning from Healthcare Finance I, this course focuses on for-profit entities within the health care sector and reimbursement methods. Financial concepts, discounted cash flow analysis, risk, financial performance evaluation, capital investments, capital budgeting, debt, equity financing will be explored. Description, assessments of reimbursement methodologies, strategies will be explored.
Outcomes:
Engage in long-term financial forecasting and planning; Differentiate various reimbursement strategies/ methodologies; Complete comprehensive financial forecast for a healthcare organization

MHA 460 Strategy & Leadership in Healthcare Organizations (3 Credit Hours)
This course examines competitive strategy, leadership in current healthcare environment. Content emphasizes formulation, execution & management, critical evaluation of organizational strategy. Key challenges faced by U.S. healthcare organizations and strategic responses are introduced. The relationship between strategic outcomes and leadership is explored emphasizing values-based leadership and individual qualities that define effective leaders. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 468 Healthcare Data Analytics & Business Intelligence (3 Credit Hours)
This course explores the use of data analytics, mining, visualization, tools to support data-driven decisions in healthcare organizations. Students develop a comprehensive view of data, use data to drive outcomes and efficiencies in healthcare. Commonly used methods/challenges in data analytics discussed. Multiple sources are explored including patient-generated data, electronic health records, administrative databases.
Outcomes:
Students will discuss the role of data analytics in health care organizations, demonstrate conceptual and practical knowledge, share structuring of health and healthcare data, retrieve data, perform descriptive analyses on healthcare datasets

MHA 480 Topics in Post-Acute Care (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
This course acquaints students with services delivered following traditional acute-care episodes or stays, providing comprehensive overview of programs, policies, services specific to post-acute care providers, facilities. The operating environment is examined with emphasis on regulations, reimbursement, care delivery, alternative delivery systems. Timely issues, challenges, dilemmas confronting long term care management explored.
Outcomes:
Demonstrate understanding of the basic operations of the continuum of post-acute care services, including delivery systems, consumers, providers, competitors; Discuss legal, regulatory environment surrounding post-acute care; Delineate role of financing/reimbursement

MHA 484 Capstone I-Healthcare Decision Support (3 Credit Hours)
Pre-requisites: Instructor Permission required
The course focuses on understanding decision support systems and how they are used to inform leadership decision-making across healthcare organizations. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 489 Human Resources and Professionalism (3 Credit Hours)
Human Resources and Professionalism is designed to equip students with the knowledge and skills to effectively manage human resources in the dynamic healthcare industry. Students will explore the role of human resources in healthcare, understanding the success of any healthcare organization is heavily dependent on workforce planning, recruitment, selection and retention. This course introduces the technical and legal aspects of human resources management (HRM) from a strategic business perspective and examines how HRM best practices can be applied to health services organizations (HSO s). The course examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently constraining health care organizations. 2) Develop talent management processes including; recruitment plans, selection, engagement, and retention, and performance appraisal of employees. 3) Identify laws and policies affecting and protecting healthcare workers. 4) Determine effective strategies for conflict identification and management. 5) Discuss ethical leadership, codes of conduct and professional responsibilities. 6) Develop a plan for continued professional development, network expansion, and service to the profession.
Outcomes:
1) Evaluate HR management practices

MHA 490 Research and Innovation in Healthcare Administration (3 Credit Hours)
This course explores the research process and the regulatory requirements in drug, device, and biological product development. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations.
Outcomes:
1) Outline the research and drug, device, and biologic development processes; 2) Discuss regulatory and policy factors that impact health-related research; 3) Critically evaluate health-related research; 4) Evaluate academic and industry contributions to innovation; 5) Evaluate the relevance and implementation challenges of novel research; 6) Determine how ethical healthcare leaders impact innovation and research

MHA 491 Systems Thinking for Healthcare Leaders (1 Credit Hour)
This two-day immersion will serve as an introductory course for the MHA program. Students will explore the concepts of systems thinking and develop practical skills for its application in healthcare settings. Students will be provided with supplemental reading materials and participate in simulations and exercises to hone their skills in this critical leadership competency.
Outcomes:
Students will define systems thinking as a leadership model and Apply relevant components of systems thinking in real-world healthcare setting

MHA 492 Policy in Health Systems (1 Credit Hour)
This Immersion provides students with policy, economic, and governance framework for understanding healthcare delivery systems. Selected theoretical models will be used to analyze existing and proposed health policies from the perspective of relevant stakeholders. Critical appraisal of selected national and global programs including their underlying values, socio-political, and economic issues, is a focus. This critical appraisal,based on the political, economic, legal, social, and ethical forces which impact the health policy-making process will be examined against the backdrop of US healthcare delivery systems. Implications for research and practice aimed at improving health outcomes of a student's target population will be a focus of this course. 2) Define various governance models and their relationships to governing regulatory bodies. 3) Use selected theoretical models to critically analyze health policies and related .issues from multiple stakeholder perspectives, including underrepresented populations.
Outcomes:
1) Describe the policy development and implementation processes in the United States

MHA 493 Healthcare Performance Management (1 Credit Hour)
This two-day immersion helps students build practical skills for ongoing performance management and monitoring of strategically aligned key performance indicators. Students will explore use of scorecards, dashboards as tool for ongoing outcomes monitoring, management within health systems. Students will be provided with supplemental reading, guest lecturers, participate in simulations, exercises.
Outcomes:
Students will build outcome monitoring scorecards and dashboards, effectively communicate outcomes and performance metrics

MHA 494 Multi-disciplinary Teams in Healthcare (1 Credit Hour)
Two-day immersion provides students with practical lessons, recognizing and optimizing the multi-disciplinary nature of healthcare workforces. Focus on building cross-functional teams, recognizing potential strengths/weaknesses of team members from different educational/ practice backgrounds. Team building exercises, small group theories will be incorporated to demonstrate practical value of multi-disciplinary teams. Course includes supplemental reading materials, guest lecturers, simulations, exercises to hone skills in critical leadership competency.
Outcomes:
Students will identify opportunities, challenges facing healthcare workforce; will effectively build multi-disciplinary teams of health care workers from a variety of specialties and fields

MHA 495 Capstone II (3-6 Credit Hours)
Pre-requisites: MHA 484 *Students without work experience or looking to gain more confidence and skill may take a 2nd capstone course, either concurrently or after the first capstone
This course provides students with the direction and support to complete an independent capstone project relative to an area of professional interest. Students develop a 1) workable problem statement; 2) a precise and targeted literature review on the topic of interest; and 3) propose an interventional capstone project to address the identified need/ problem using the principles of Six Sigma DMAIC (Define, Measure, Analyze, Implement, and Control). Students identify a community-based partner organization and secure commitment from the organization and individual preceptor willing to facilitate the project. A written plan of execution is submitted in the form of the Capstone Project Plan. Upon faculty approval, students may begin the implementation of the project. The second capstone provides more experiential learning opportunities and allow for greater interaction with the partner organization and problem-solving methodology. 2) Demonstrate analytic, critical thinking, and problem-solving capabilities by proposing an administrative solution to a healthcare problem.
Outcomes:
1) Examine a relevant healthcare problem or knowledge gap by executing and synthesizing a professional research and literature review

MHA 499 Independent Study in Healthcare Administration (1-3 Credit Hours)
Pre-requisites: Course open to MHA students; Permission of the Program Director
This is a directed study course in healthcare administration for approved students, supervised by a member of the MHA faculty. Students must have assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

Implementation Science (MIS)

MIS 400 Implementation Science Theories (3 Credit Hours)
The course will review the major theories used in implementation science.
Outcomes:
Students will be able to define, explain and determine in what situations the various theories of implementation science best apply

MIS 402 Implementation Science Research Methods (3 Credit Hours)
This course will review research methods used in conducting implementation science research.
Outcomes:
Students will be able to define, explain and apply various research methods to different study questions

MIS 404 Qualitative Methods for Implementation Science Research (3 Credit Hours)
This course will review various qualitative methods including interviews, focus groups and other strategies.
Outcomes:
Students will be able to create an interview guide and focus group script, and understand basics of coding qualitative data

MIS 406 Community-Engaged Research (3 Credit Hours)
This course will review various qualitative methods including interviews, focus groups and other strategies.
Outcomes:
Students will be able to create an interview guide and focus group script, and understand basics of coding qualitative data

MIS 408 Dissemination Strategies (1 Credit Hour)
This brief course will demonstrate how to present key findings in the most understandable and usable formats.
Outcomes:
Students will be able to prepare key findings and messages in understandable and usable formats

MIS 410 Field Practicum in Implementation Science (6 Credit Hours)
Pre-requisites: MIS 400, MIS 402, MIS 404, MIS 406, MIS 408
This practicum will provide students with hands on experience in developing and leading a pilot implementation project.
Outcomes:
Students will present their findings as a requirement for completion of their MS

Master of Public Health (MPBH)

MPBH 400 Determinants of Population Health (3 Credit Hours)
This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed. Graduate standing in the MPH or Public Health Certificate Program, or permission of instructor.

MPBH 401 Environmental Health (3 Credit Hours)
This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.
Course equivalencies: X-ENVS301/PUBH301/MBPH401

MPBH 402 Public Health Practice and Management (3 Credit Hours)
This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.
Outcomes:
Assess population needs, assets and capacities that affect communities' health; Apply awareness of cultural values and practices to the design or implementation of public health policies or programs; Design a population-based policy, program, project or intervention; Explain basic principles and tools of budget and resource management; Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making

MPBH 403 Introduction to Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

MPBH 404 Biostatistics for Health and Biological Science (3 Credit Hours)
Introductory course allows students to utilize SAS software to perform analytical methods including Graphical and Numerical Descriptive Statistics, Probability calculations and distributions with emphasis on the binomial(discrete) and normal (continuous) distributions, Inferential Statistics: Point Estimation, Interval Estimation and Hypothesis Testing, Nonparametric statistical methods and Sample Size Calculation.
Course equivalencies: CRME420/BMSC402/MPBH404

MPBH 407 Public Health Policy: Concepts and Practice (3 Credit Hours)
Pre-requisites: Open for registration for MPH students; All other students require department approval
No course description is available
Course equivalencies: PUBH 307/MPBH 407

MPBH 409 Biostatistics I (3 Credit Hours)
Pre-requisites: Introductory course
Introductory biostatistics course which allows students to utilize STATA software and perform/ operate analytic methods. Course provides outline of tests of statistical significance and probability theory. Students will conduct statistical hypothesis testing using methods presented in class.

MPBH 410 MPH Practicum (1-3 Credit Hours)
All MPH students are required to complete at least 1 credit of a practicum (internship) to gain a better understanding of a public health practice, directly utilize their own MPH training, and network with public health professionals in the field. Students need to provide a signed agreement and must be in the process of completing 21 credit hours, including at least four core courses.

MPBH 411 MPH Capstone (1-3 Credit Hours)
The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice. Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.
Outcomes:
The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation

MPBH 412 Intro to Statistical Computing for Public Health (1-3 Credit Hours)
Pre-requisites: This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409)
This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages., data importation from various sources, cleaning, validation, subsetting, merging, and transforming datasets); Construct clear and concise documentation of newly created datasets; Use SAS data-step programming, macros, and built-in procedures for statistical analysis and visualization (i.e., PROC MEANS, FREQ, SGPLOT, and UNIVARIATE); Demonstrate the ability to use descriptive techniques to summarize public health data (i.e., t-tests, chi-square tests, and basic regression models); Describe the results of basic statistical analyses.
Outcomes:
Execute data management techniques to create public health analytical datasets (i.e

MPBH 413 The Epidemiology of Obesity: An Energy Balance Perspective (3 Credit Hours)
Pre-requisites: MPBH 403 or department consent
This course is a survey course designed to expose MPH and other interested inter-professional students, e.g., nursing and dietetic students, to the multiple domains of the worldwide obesity epidemic. The course will explore determinants, outcomes and public health policy associated with obesity from the perspective of energy balance, i.e., that ultimately all determinants and outcomes of obesity.
Outcomes:
Describe the concept of energy balance and how it is related to the development, treatment and prevention of overweight and obesity; Explain the scope and historical trends of obesity prevalence among children and adults in both the industrialized and developing worlds

MPBH 414 Introduction to Global Health (3 Credit Hours)
Introduction to Global Health is an introductory course to global health, both epidemiology and policy aspects, focusing on health disparities on the international level.
Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 415 Non-Communicable Disease Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 or consent of instructor
This course covers public health topics related to non-communicable diseases (NCDs). The course explores topics such as: burden of NCDs in populations; the conceptual frameworks for studying chronic disease causation and control; the epidemiology of cardiometabolic diseases as well as the epidemiologic transition in relation to risk factors for the major chronic diseases (e.g. nutrition, obesity, physical exercise, alcohol and tobacco use) as well as upstream factors impacting on diseases such as food policy and the built environment; integrated healthcare services and public health interventions; and, the study designs used to assess associations between exposures and NCDs.
Outcomes:
Apply frameworks to understand social and ecological determinants of non-communicable diseases, as well as the biological and behavioral risk factors across the life-course; Articulate the methodological issues in the study of non-communicable diseases including tools for surveillance, the limits of observational evidence, life-course epidemiology and genetic associations, assessment of risk and risk scores, burden of disease estimates; Explain the drivers of non-communicable disease epidemiology; Discuss interventions to prevent and control non-communicable diseases low-middle income countries

MPBH 416 Health Services Research Methods (3 Credit Hours)
This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.
Outcomes:
Determine health services research's scope

MPBH 417 Global Maternal & Child Health (3 Credit Hours)
Pre-requisites: MPBH 414 Introduction to Global Health and MPBH 403 Introduction to Epidemiology; This course will be required for the newly approved Global Health Equity track of the Master in Public Health Program
No course description is available
Course equivalencies: X-HSM210/PUBH314/ENVS385

MPBH 420 Public Health Law: Theories and Cases (3 Credit Hours)
This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy. This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.
Outcomes:
Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching public health through law

MPBH 421 Biostatistics II (3 Credit Hours)
Pre-requisites: MPBH 409 Biostatistics I Students will utilize text on Biostatistics for Public Health
Course will cover linear and logistic regression and ANOVA. Students will utilize STATA software for hypothesis testing.
Outcomes:
Students will conduct statistical hypothesis testing using methods presented in class

MPBH 422 Population Health Planning & Management (3 Credit Hours)
This course prepares students to confront--thoughtfully and systematically-resource allocation decisions by developing the knowledge, tools, and skills needed to plan, implement, and evaluate programs, interventions, and services that address public health problems, improve population health, and reduce inequities.

MPBH 423 Intermediate Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 Introduction to Epidemiology and MPBH 412 Introduction to Statistical Computing for Public Health Research
Intermediate Epidemiology focuses on analysis of observational data. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 424 Health Economics and Healthcare Financing (3 Credit Hours)
This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research.
Outcomes:
Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis

MPBH 425 Policy Analysis (3 Credit Hours)
This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice. This is a track-specific requirement for MPH Graduates in the Health Policy track.
Outcomes:
Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems

MPBH 426 Infectious Disease Epidemiology (3 Credit Hours)
Pre-requisites: Introduction to Epidemiology (MPBH 403)
This course will introduce the basic methods for infectious disease epidemiology and review case studies of important disease syndromes and entities. Important terminology and definitions for infectious disease epidemiology will be reviewed, including nomenclature related to outbreak investigations, disease surveillance, laboratory diagnosis, molecular epidemiology, disease transmission and susceptibility.

MPBH 427 Advanced Statistical Methods (1-3 Credit Hours)
Co-requisites: MPBH 421 (or prior completion of a two-semester course sequence in Biostatistics) and one course in statistical computing such as MPBH 412
This course covers a broad overview of statistical models and estimation methods for outcome variables (normal and non-normal) that are clustered or measured repeatedly in time or space. The focus is on applications and computer software methods for correlated regression models, including ANOVA based methods, hierarchical linear models, etc.
Outcomes:
Apply generalized linear models to regress a set of explanatory variables against non-normally distributed outcomes, including binary outcomes (logistic regression), multinomial outcomes (ordinal and multinomial logistic regression), and count outcomes (Poisson and negative-binomial regression); Identify and employ appropriate methods for the analysis of repeated measures, including the use of generalized estimating equations (GEE models) and/or mixed-effects models for nested and hierarchical data; Analyze data using Parametric methods for time-to-event data; Conduct Bayesian estimation for unknown parameters; Employ multivariate methods to solve real-world problems and dimensionality reduction; Use statistical programming to apply learned statistical models and estimation methods; Explain the results of statistical analyses

MPBH 430 Environmental Health Policy (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. This course is offered both online and in-person.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

MPBH 431 Grant Writing (3 Credit Hours)
This course will provide an overview of the NIH extramural funding process, with additional information on funding opportunities outside NIH. Students will learn the key components of successful grants and factors that may lead to grants not being reviewed favorably. The focus will be on grant writing skills.
Outcomes:
Students will be required to write a 10-12 page R01-style grant proposal (application), as described in the NIH guidelines

MPBH 432 Health Impact Assessment (3 Credit Hours)
This course is an introduction to health impact assessment which is a decision-support tool that uses a combination of procedures, methods, and approaches to determine how a policy, project/program may affect the health of a community, and the distribution of those effects within the population of the community.

MPBH 433 Clinical Trials (3 Credit Hours)
Clinical Trials course is designed for students interested in the design, implementation and management of clinical trials and their ethical and clinical implications. Topics include trial design, randomization, recruitment and sample size, monitoring and analysis. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 434 Systematic Review and Meta-Analysis (3 Credit Hours)
Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 449 Biostatistics for Public Health Interventions (3 Credit Hours)
This course targets the application of sophisticated statistical methodologies to enhance the efficacy and precision of public health interventions. At the heart of this course is a rigorous examination of strategies for reducing bias in observational studies through advanced techniques such as imputation for missing data and propensity scores. The curriculum is expanded to include psychometric analysis, providing essential tools for the evaluation of measurement instruments, and ecological analysis, which aids in the interpretation of population-level health outcomes. A significant addition to this course is the analysis of screening and diagnostic tests, focusing on studying measures of accuracy and agreement critical for evaluating the performance of these tests in public health. The course also explores the complexities of survey design, offering insights into managing and analyzing data from multifaceted study designs to ensure the reliability and validity of intervention assessments.
Outcomes:
Apply advanced statistical techniques including imputation for missing data, and propensity score analysis to reduce bias in observational studies; Evaluate the design of public health research studies and interventions for methodological soundness; Apply psychometric principles to evaluate the reliability and validity of measurement instruments used in public health research; Use ecological analysis to interpret population-level health outcomes, understanding the impact of environmental and social factors on public health

MPBH 450 Biostatistics for Electronic Health Record (EHR) Data (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 449
This course delves into the analysis and interpretation of data from Electronic Health Records (EHRs), a cornerstone of clinical, epidemiologic, and translational research. Emphasizing a hands-on approach, it covers EHR system fundamentals, data extraction and cleaning, privacy standards, case identification, study design, and advanced statistical analysis. Students will learn to navigate EHR data structures, medical vocabularies, and relational databases, applying these skills to design research studies and create patient cohorts. The goal is to equip students with the ability to harness EHR data for innovative healthcare solutions., ICD, CPT, NDC, SNOMED, and LOINC codes) for accurate case identification; Develop skills in constructing patient cohorts and extracting relevant data; Identify controls and apply propensity score matching in observational research; Design robust matched case-control and retrospective cohort studies using EHR data; Recognize privacy and security standards, including HIPAA regulations; Apply advanced statistical methods to analyze EHR data and assess research findings critically.
Outcomes:
Explain relational database and data warehouse models pertinent to EHR data; Use medical vocabularies and ontologies (i.e

MPBH 460 Public Health Data Visualization and Reporting (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 421 (Biostatistics II) or equivalent experience in biostatistical methods and public health principles
This course is designed to navigate the intersection of public health data, visual communication, and ethical representation, focusing on creating impactful visuals that cater to diverse audiences including patients, healthcare providers, policymakers, and the broader community. It emphasizes the ethical considerations in data visualization, tackling potential biases, and ensuring visuals are both informative and accessible. Through practical applications, students will learn to craft infographics, community health maps, dashboards, and effective manuscript tables, all while understanding the unique needs of different user groups. The course will explore advanced visualization techniques like heatmaps, interaction visuals, and temporal data displays, equipping students with the skills to present complex health data.
Outcomes:
Develop the ability to create impactful and ethically responsible visual representations of public health data tailored to diverse audiences, including patients, healthcare providers, policymakers, and the general public; Explore advanced data visualization techniques, including heatmaps, interactive visuals, and temporal data displays, to effectively present complex health information; Apply ethical considerations in data visualization, addressing potential biases and ensuring that visuals are accurate, accessible, and inclusive; Design visual communication strategies into public health research and reporting to enhance the impact and understanding of data-driven insights

MPBH 495 Special Topics (1-3 Credit Hours)
This course covers a specific topic in public health. Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor. Outcome: students will be able to articulate a general understanding of the selected topic.

MPBH 499 Public Health in Action (3 Credit Hours)
Public Health in Action prepares MPH students for the real world through practical hands-on learning that addresses the cross-disciplinary competencies in advocacy, leadership, budgeting, planning and implementing programs with limited resources, building a shared vision and mission, setting priorities and goals, contributing on inter-professional teams, advancing cultural diversity and inclusiveness in community health efforts, building partnerships, leading community initiatives, and communicating to media. It is intended students will take this course at the end of the MPH program. Enrollment Conditions: Graduate standing in the MPH Program and graduating in the current or following semester, or permission of instructor. Students should have completed at least 18 credit hours of coursework, including all other core courses. MD/MPH students may take this course in the spring of their first year in the program.

Medical Laboratory Science (MLS)

MLS 401 Laboratory Fundamentals (2 Credit Hours)
Introduction to life in the clinical laboratory. Safety practices, laboratory mathematics, statistical analysis, and fundamental laboratory training in phlebotomy, pipetting, microscopy and calibrations.
Outcomes:
Demonstrate and identify safe and professional knowledge consistent with the field of Medical Laboratory Science, including use of universal precautions and ability to decipher Safety Data Sheets; Accurately perform skills needed in medical laboratory science including phlebotomy, processing of specimens, pipetting, microscopy, and calibrations\\n; Demonstrate competency in use of laboratory calculations\\n; Understand the history and role Medical Laboratory Scientists play in health care

MLS 410 Clinical Immunology (2 Credit Hours)
This course focuses on principles and procedures of immunology and serology. Emphasis will be on the role of the immune system in health and disease and developing an understanding of the role of both humoral and cellular immunity. Admission to M.S. in Medical Laboratory Science program. Upon completion, students will demonstrate understanding of the discipline of immunology and apply theoretical concepts to differentiate patient health and disease states.

MLS 415 Urinalysis and Body Fluids (2 Credit Hours)
Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease. Restricted to students in the M.S. in Medical Laboratory Science program. Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

MLS 420 Molecular Diagnostics (2 Credit Hours)
This course is will provide students with an understanding of the processes which have been collectively referred to as molecular biology as they relate to laboratory medicine. Instruction emphasizes molecular methodologies and current applications of molecular diagnostics utilized in the clinical laboratory. Upon completion of this course students will gain a background in molecular biology which will promote critical thinking and problem solving as it relates to clinical molecular diagnostics.

MLS 430 Clinical Chemistry I (3 Credit Hours)
Pre-requisites: Admission to M.S. in Medical Laboratory Science program
This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.
Outcomes:
Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins

MLS 440 Clinical Chemistry II (2 Credit Hours)
Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program
Outcomes:
Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis

MLS 450 Hematology (4 Credit Hours)
Study of formed elements of blood including normal and abnormal conditions. Recognition and correlation of pathological changes in cells of the peripheral blood and bone marrow to disease states. This course will prepare students for a clinical practicum in Hematology. Admission to the M.S. in Medical Laboratory Science program required. Identification of morphological characteristics for normal and abnormal cellular elements of blood and associations to disease states.
Outcomes:
Students will describe the physiology, development of cells, and process of hematopoiesis

MLS 455 Hemostasis (2 Credit Hours)
This course will cover the mechanisms by which blood coagulates. Topics explored include the pathophysiology of hemostatic disorders and the antithrombotic therapies utilized to manage them. Focus on examination of the coagulation system and correlations of laboratory results to clinical findings in the classification of disorders. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will apply knowledge of the process of coagulation to interpret laboratory results as they relate to hemostatic dysfunctions and treatment of clinical disease.

MLS 460 Immunohematology (5 Credit Hours)
Focus on principles of the antigen/antibody reactions and their relevance to Immunohematology. ABO/Rh and major blood group systems, regulation, procedures, adverse reactions, and donation of blood components are all studied as integral parts to the practice of transfusion medicine. This course prepares students for a clinical practicum in Immunohematology. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program.
Outcomes:
Upon completion of this course students will be able to apply theoretical concepts and techniques to analyze and determine Immunohematology results

MLS 465 Laboratory Leadership I (1 Credit Hour)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
This first of three courses in the leadership series, prepares the student for an entry-level laboratory position by developing skills in basic laboratory management practices including principles of leadership, functions of a manager, and personnel management.
Outcomes:
Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues

MLS 466 Laboratory Leadership II (1 Credit Hour)
The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

MLS 467 Laboratory Leadership III (1 Credit Hour)
The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning. Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

MLS 470 Bacteriology and Virology (5 Credit Hours)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology.
Outcomes:
Upon completion, students will be able to identify bacterial or viral organisms by characteristic clinical features of infections through laboratory testing

MLS 475 Clinical Parasitology and Mycology (2 Credit Hours)
Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

MLS 481 Clinical Practice in Hematology (3 Credit Hours)
Pre-requisites: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory

MLS 482 Clinical Practice in Chemistry (3 Credit Hours)
Pre-requisites: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory

MLS 483 Clinical Practice in Immunohematology (3 Credit Hours)
Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

MLS 484 Clinical Practice in Hemostasis and Body Fluids (1-2 Credit Hours)
Pre-requisites: MLS 415, MLS 455, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hemostasis, Urinalysis, and other Body
Fluid analyses under the guidance of qualified medical laboratory professionals. Application of knowledge and clinical skills gained from first year courses. Focus on acquisition of manual and automated laboratory skills, laboratory safety, principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will demonstrate evidence of possessing the knowledge and skills necessary to perform Hemostasis, Urinalysis, and Body Fluid analyses testing in a medical laboratory

MLS 485 Clinical Practice in Microbiology (3 Credit Hours)
Pre-requisites: Completion of MLS 470, MLS 475, and good academic standing as defined in the M.S. in Medical Laboratory handbook
Clinical experience in Microbiology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first-year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Microbiologic testing in a medical laboratory

MLS 486 Clinical Practice - MLS Special Topics (1-2 Credit Hours)
Clinical experience in specialty areas of laboratory medicine under the guidance of qualified medical laboratory professionals. Students will actively engage in applying the medical knowledge and clinical skills gained in the didactic and student training laboratory courses in Molecular Diagnostics, Flow Cytometry, HLA testing, and laboratory administration. Completion of MLS 420, MLS 466, and good academic standing as defined in the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills needed to enter into specialty areas of a medical laboratory.

MLS 490 MLS Educational Practice and Review (2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
This course will prepare students for taking a Medical Laboratory Science certification exam. Students will gain basic educational and pedagogical approaches needed to train others in the field of Medical Laboratory Science. Application of theories demonstrated through presentation of review lectures and assisting in kinesthetic instruction for laboratory sessions.
Outcomes:
Upon completion of this course students will be able to utilize effective teaching strategies to plan and present a lecture unit, including writing objectives and assessment strategies

MLS 495 Medical Laboratory Science Capstone (1-2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine.
Outcomes:
This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience

Clinical Certificate in Blood Banking

Laboratory Medicine is essential to the practice of healthcare and competent laboratorians are critical to the prevention, diagnosis, treatment, and monitoring of health and disease.

Blood Banking Scientists perform specialized and routine testing to determine patient blood types, identify blood antibodies, and provide blood products compatible for transfusion to patients. Students who complete the Clinical Certificate in Blood Banking will immediately be eligible to sit for the American Society of Clinical Pathology (ASCP) Board of Certification (BOC) Blood Banking exam through Route 3 eligibility after the conclusion of the program.

The Clinical Certificate in Blood Banking is offered under the umbrella of the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) accredited M.S. in Medical Laboratory Science (MLS) program (https://www.luc.edu/parkinson/mls/msinmedicallaboratoryscience/), meeting rigorous standards for quality, education, and innovation. *NAACLS can be contacted at: National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720 Rosemont, IL 60018; Ph: 773-714-8880; Fax: 773-714-8886; Email:* **info@NAACLS.org**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of a clinical Certificate program, students will:

- Apply critical thinking skills to evaluate and interpret clinical data.
- Exhibit oral and written communication skills sufficient to serve the needs of patients and the health care team.
- Demonstrate competency needed to work as a medical scientist in their specific concentration by performing basic and diagnostic laboratory analysis in accordance with established laboratory procedures.

Clinical Certificate in Hematology

Laboratory Medicine is essential to the practice of healthcare and competent laboratorians are critical to the prevention, diagnosis, treatment, and monitoring of health and disease.

Hematology Scientists perform manual and automated analyses of blood cells to determine hematologic and coagulation disorders. Students who complete the Clinical Certificate in Hematology will immediately be eligible to sit for the American Society of Clinical Pathology (ASCP) Board of Certification (BOC) Hematology exam through Route 3 eligibility after the conclusion of the program.

The Clinical Certificate in Hematology is offered under the umbrella of the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) accredited M.S. in Medical Laboratory Science (MLS) program (https://www.luc.edu/parkinson/mls/msinmedicallaboratoryscience/), meeting rigorous standards for quality, education, and innovation. *NAACLS can be contacted at: National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. Clinical Research Methods and Epidemiology (MS)

Design and implement your own health care clinical studies to improve patient care.

Loyola University Chicago's Master of Science (MS) in Clinical Research Methods and Epidemiology (CRME) degree is a 2.5 year part-time program for clinicians and other health care professionals, based in the Chicago-land area, wanting to pursue clinical and patient-orientated research. With the guidance of a research mentor, you will create your own research proposal and project. The flexible learning environment in this clinical research master's program combines in-person classroom instruction with one-on-one mentoring to give you the skills to design and implement clinical studies and obtain independent funding.

Related Programs

Master's

- Clinical and Applied Proteomics (MS) (p. 1739)

Certificate

- Clinical Certificate in Hematology (p. 1859)
- Clinical Certificate in Microbiology (p. 1859)

Curriculum

A total of 30 credit hours are required to complete the degree. Students must complete six core courses (18 credit hours) and three elective courses (9 credit hours). All students must also complete a research project (3 credit hours) as part of their degree. Courses are offered both on campus and online.

Code	Title	Hours
Core Courses		
BEHL 405	Research Ethics (online)	3
MPBH 403	Introduction to Epidemiology (classroom and online)	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 421	Biostatistics II (classroom)	3
MPBH 423	Intermediate Epidemiology (classroom)	3
MPBH 431	Grant Writing (classroom)	3
Electives		
Select three of the following:		9
HIDS 401	Foundations of Health Informatics	
HIDS 411	Clinical Data Science	
HIDS 421	Security and Privacy in Healthcare	
HIDS 422	Ontologies in Healthcare	
MPBH 400	Determinants of Population Health	
MPBH 401	Environmental Health (online)	
MPBH 402	Public Health Practice and Management	
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective (online)	
MPBH 414	Introduction to Global Health	
MPBH 416	Health Services Research Methods (online)	
MPBH 420	Public Health Law: Theories and Cases	
MPBH 422	Population Health Planning & Management	
MPBH 424	Health Economics and Healthcare Financing	
MPBH 425	Policy Analysis	
MPBH 432	Health Impact Assessment	
MPBH 433	Clinical Trials (classroom)	
MPBH 434	Systematic Review and Meta-Analysis (classroom)	
MPBH 495	Special Topics (upon approval)	
Research Project		
MPBH 411	MPH Capstone	3
Total Hours		**30**

Research Project

All students must demonstrate integration of knowledge gained through the program by presenting a research project (either a completed research project or research proposal) to the Master of Science in Clinical Research Methods Program Curriculum Committee. This research project or proposal will incorporate the skills and concepts obtained from the coursework. Students will have up to three years after enrolling in the program to complete the research project and obtain the degree.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Apply components of research design and analysis for the purpose of critically reviewing research and programs in medicine
- Analyze various methods to evaluate topics in healthcare
- Identify the uses to which data management can be put in practical statistical analysis, including the establishment of standards for documentation, archiving, auditing, and confidentiality; guidelines for accessibility; security; structural issues; and data cleaning

Dietetic Internship Certificate

Translate science into solutions for health.

Loyola University Chicago offers two tracks of an accredited Dietetic Internship (DI) to prepare students to become professional registered dietitian nutritionists. Students benefit from the constructive and supportive environment of Loyola University Chicago. With Jesuit values as a foundation, students learn leadership, communication, and management skills which are applied to dietetic practice in health care and other settings. This prepares our students to enter dietetic practice as competent, highly qualified professionals after passing the registration exam for dietitians. Graduates of Loyola's Dietetic Internship program is highly sought for positions in health care and nutrition programs. Students enter a wide range of dietetic careers, including:

- Clinical dietitians with health care organizations including hospitals, medical centers, dialysis centers, skilled nursing, and rehabilitation facilities
- Community nutritionists with public health departments, federally qualified health centers, community clinics, and federal nutrition programs such as the Women, Infant, and Children's program
- Director or manager of food service operations
- Private practice or consulting

To Become a Registered Dietitian Nutritionist

To become a registered Dietitian Nutritionist (RDN) The following criteria must be completed:

1. Completion of a bachelor's degree at a US regionally accredited university or college and course work accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®) of the Academy of Nutrition and Dietetics,
2. Completion of an ACEND®-accredited supervised practice program, such as the Loyola Dietetic Internship,
3. Pass the Registration Examination for Dietitians, national examination administered by the Commission on Dietetic Registration (CDR).
4. More information regarding the examination can be found online through CDR (https://www.cdrnet.org/).
5. Licensure is required to practice as a Registered Dietitian Nutritionist in the State of Illinois (https://www.idfpr.com/profs/dietNutrition.asp)

To maintain the RDN credential, one must complete continuing professional education requirements.

Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require the minimum of a master's degree to be eligible for the credentialing examination for registered dietitian nutritionist (RDN). For more information about this requirement, please refer to the CDR website (https://www.cdrnet.org/).

Professional Dietetic Practice

Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars, and others based on track), students receive a verification statement of completion of the ACEND - accredited dietetic internship and are eligible to take the *Registration Examination for Dietitians* by the Commission on Dietetic Registration. In the State of Illinois, one must be licensed by the Department of Professional and Financial Regulation to practice dietetics. Information about licensure for dietitians in Illinois can be obtained at: http://www.idfpr.com/Renewals/apply/Forms/diet-ex.pdf.

Additional information about licensure for dietetic practice in other states can be found online (https://www.cdrnet.org/).

Accreditation

The Loyola University Chicago Dietetic Internship (LDI) is accredited by the Council on Accreditation for Education in Nutrition and Dietetics (ACEND) an agency of the Academy of Nutrition and Dietetics (AND). Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars and others based on program track), students receive an ACEND verification statement and are eligible to take the Registration Examination for Dietitians by the Commission on Dietetic Registration. Information about accreditation status can be obtained from:

Accreditation for Education in Nutrition and Dietetics
Academy of Nutrition and Dietetics
120 South Riverside Plaza, Suite 2190
Chicago, IL 60606-6995
1-800-877-1600 ext 5400 or education@eatright.org

Curriculum

The Loyola Dietetic Internship offers two options or tracks to completion: Dietetic Internship Certificate track (DI/C) or a combined Master of Science in Dietetics/Dietetic Internship (MS/DI).

Dietetic Internship Certificate track (DI/C)

This is 8 courses, 14 credits and includes 1100 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427.

Upon completion of the DI/C requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*.

Code	Title	Hours
Didactic Courses		
FONU 400	Role Development in Dietetic Practice	1
FONU 420	Transition to Supervised Practice in the Dietetic Internship	1
FONU 422	Medical Nutrition Therapy Theory	3
FONU 424	Public Health Nutrition and Research Theory for Dietetic Practice	3
FONU 426	Food Management Theory: Geriatric Nutrition	1
Supervised Practice Courses		
FONU 423	Supervised Practice (SP) in Medical Nutrition Therapy	2
FONU 425	Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing	2
FONU 427	Supervised Practice: Food Management, Geriatric Nutrition	1
Total Hours		**14**

Combined Master of Science in Dietetics/Dietetic Internship (MS/DI)

This is 20 courses, 46 credits and includes 1100 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427, and the comprehensive exam.

Upon completion of the MS/DI requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*, and a Master of Science in Dietetics degree from the Loyola University Chicago Graduate School.

Total Hours		**46**

Once a week, students are required to participate in class at the Loyola University Health Sciences Division (HSD) campus in Maywood, IL. Class time is not calculated in the supervised-practice hours and typically are scheduled from 6 p.m. - 9 p.m. Classes include lecture, discussion, group problem-solving, critical-thinking activities, exams, and additional assignments. In addition to the courses below, dietetic interns are required to attend seminars, both internal and external to the University, that enhance knowledge and skill development.

Please note that completion of the MS in Dietetics (p. 1864) degree also requires successful comprehensive exam completion according to policies of the Parkinson School of Health Sciences and Public Health.

Internship

Two Options For Completing the Loyola Dietetic Internship

Each track meets ACEND standards for dietetic internships. Ten students are admitted annually to each track of the LDI as coordinated by nationwide, computerized matching by D&D Digital (https://www.dnddigital.com/).

ANTICIPATION TIME FOR COMPLETION
- DI/C: 13 months
- MS/DI: 22 months

CREDITS
- DI/C: 14
- MS/DI: 46

D&D DIGITAL MATCHING NUMBER
- DI/C: 494
- MS/DI: 156

Both tracks are eligible to take the registration examination for dietitians.

HOURS OF SUPERVISED PRACTICE
- DI only: 1100
- MS/DI: 1100

SUPERVISED PRACTICE STARTS
- DI/C: The first semester after admission
- MS/DI: After completing majority of graduate work

UPON COMPLETION STUDENT RECEIVES
- DI/C: ACEND verification state of DI completion
- MS/DI: ACEND verification statement of DI completion and Loyola Master of Science (MS) in Dietetics degree

Supervised Practice Experiences Summary

Interns complete eight rotations during the course of the program, which are nested within FONU 423, FONU 425, and FONU 427. Interns are typically scheduled to complete supervised practice eight hours per day, typically Monday through Friday. Interns should expect to be in supervised practice two-three weekend days per semester. Time for travel is not part of supervised practice.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy

Medical Nutrition Therapy (55 days): Interns develop skills to meet the responsibilities of a clinical dietitian and follow the host facility's standards of care and practice guidelines. Interns are initially assigned a low number of assessment, screening, educational, and follow-up activities per week on less-complex patients. As the weeks proceed, interns are assigned more complex cases and the volume of patients increases. In addition, interns participate in the quality management program for clinical nutrition care, in-service presentations, patient care conferences, and departmental meetings.

Dialysis Medical Therapy (5 days): Interns develop medical nutrition therapy skills with a focus on renal patients.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing

Public Health Nutrition (35 days): This experience allows interns to work with diverse age groups, as well as socioeconomic and cultural backgrounds. Interns are involved in planning and delivering nutrition programs including those provided by the Women, Infant, Children (WIC) special supplemental nutrition program, schools and school-based health clinics, Catholic Charities, and outpatient departments.

Professional Development (10 days): Students identify an area of professional dietetic practice that they would like to explore with additional experiences. The DI Director and student collaborate to develop this individualized experience using available resources.

Research (10 days): Students develop and engage in scholarly inquiry under the direction of faculty and preceptors, including perspectives of ethical considerations, research methods, statistical analysis, and dissemination of findings. Projects may be individual, group, and/or at other supervised practice sites.

Marketing Rotation (5 days): Interns have the opportunity to work on marketing a food product or nutrition service, employing market strategies, evaluating consumer needs and trends, testing products, and interacting with the media. Possible sites include food and pharmaceutical companies, public relations firms, and wellness programs.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition

Management Rotation (25 days): Interns actively participate in all aspects of food-service management, including production, purchasing, service, inventory systems, human resources, safety, and sanitation. Through this experience, interns gain experience in problem solving, quality management, and fiscal management.

Long-Term Care Rotation (5 days): Interns work collaboratively with preceptors to provide nutrition care to the elderly, developmentally disabled, psychiatric, and rehabilitation residents in long-term care facilities. This rotation includes experiences in both clinical nutrition care of residents and management of food-service operations within long-term care facilities.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Total Hours	**46**

Monthly Seminars and Activities

Interns broaden their perspective on various areas of dietetics through seminars, group tours, and other activities. Participation in all seminars and related activities is mandatory for all interns. Examples include: participation in the Distinguished Speaker Seminar Series and the Palmer Research Symposium sponsored by the Marcella Niehoff School of Nursing; Illinois Dietetic Association (IDA) Annual Assembly; IDA Lobby Day in Springfield, IL; seminars on sports nutrition, reimbursement and ethical issues in dietetic practice; media training; and an ethnic food tour. Participation in these activities is required. This time is not calculated as part of supervised-practice or didactic hours. An additional fee is added to tuition to cover the costs of seminar participation.

Other Details

Details about the Loyola academic calendar, including the start dates of each semester, can be found online (https://www.luc.edu/academics/schedules/index.shtml/).

Download the Loyola Dietetic Internship (LDI) program plan (https://www.luc.edu/media/lucedu/schoolhealthsciencespublichealth/documents/LDIProgramPlan.pdf). For additional questions, please contact: Joanne Kouba, (jkouba@luc.edu) PhD, RD, LDN, Director, Dietetics Education Programs. Also see the Dietetics Handbook Aug 2023 (https://www.luc.edu/media/lucedu/parkinson/pdfs/LDI.Handbook.revised.2023.08.28.Final.pdf).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Interns should become competent in the application of theoretical education, adjusting to the reality of existing practice environments, and develop interaction skills with other professionals, workers, and clients. Competent practice is defined not only as the application of knowledge in nutrition, foods, and related areas, but also as the development and use of skill in leadership, communication, and management.

Dietetics (MS)

For registered dietitians who want to be leaders in health care administration.

Loyola University Chicago offers a unique opportunity to complete a Master of Science degree in Dietetics. The program offers a healthcare administration focus, preparing professional, registered dietitians to design and implement systems that lead to desired health outcomes. This program can also be completed while simultaneously completing the Dietetic Internship.

Related Programs

Master's

- Exercise Science (MS) (p. 1865)
- Healthcare Administration (MHA) (p. 1869)

Certificate

- Dietetic Internship Certificate (p. 1861)

Curriculum

Successful completion of a comprehensive exam is a program requirement for degree conferral. The Master of Science in Dietetics (without the dietetic internship) does not require supervised practice or practicum hours in a health care agency. FONU 410 Nutrition Focused Physical Assessment requires experiential learning in a clinical skills or simulation lab on campus.

Required Courses and Elective Options

Code	Title	Hours
Required Core Courses		
FONU 400	Role Development in Dietetic Practice (Fall/Spring)	1
FONU 410	Nutrition Focused Physical Assessment (Fall)	2
FONU 422	Medical Nutrition Therapy Theory	3
FONU 424	Public Health Nutrition and Research Theory for Dietetic Practice	3
FONU 426	Food Management Theory: Geriatric Nutrition	1
FONU 501	Writing and Communications in Nutrition and Dietetics (Spring)	3
FONU 503	Dietetic Theories & Research Methods (Spring)	3
FONU 507	Behavioral Change for Health Promotion (Fall)	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Evaluate research and apply evidence-based guidelines, systematic reviews, and scientific literature in nutrition and dietetics practice.
- Design, implement, and evaluate presentations to a target audience.
- Articulate one's skills, strengths, knowledge, and experiences relevant to career goals.
- Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment, and supplies.
- Demonstrate professional writing skills in preparing professional communications.

Exercise Science (MS)

Take the next step towards a career in rehabilitation, sports medicine, strength and conditioning, or clinical exercise physiology.

While a bachelor's degree in exercise science is sufficient to get an entry-level position, continuing education in exercise science is a must

to advance in the field. At Loyola, you can earn a master's degree in exercise science and graduate better prepared to start your career in rehabilitation, sports medicine, strength and conditioning, or clinical exercise physiology.

Picture yourself helping people make positive lifestyle choices for their health, whether it's serving injured athletes, those living with primary disabilities, or the general public. A Masters Degree in Exercise Science affords you access to professionally accredited certifications, jobs with top-level employers, and a career that sets you above the rest if continuing to a terminal degree (e.g. Doctor of Physical Therapy, Ph.D., Physicians Assistant, etc.).

Related Programs

Master's

- Dietetics (MS) (p. 1864)
- Health Informatics (MS) (p. 1867)

Certificate

- Health Informatics Certificate (p. 1868)

Curriculum

During your first year in this two-year program, you will build a foundation in exercise science-related fields through classroom instruction and lab-based activities. In your second year, you will complete advanced specialty coursework as well as a 200-hour internship and a comprehensive final examination.

MSES Curriculum (36-38 credits)

Pre-Requisites: Anatomy with Lab (4 credits); Physiology with Lab (4 credits); Exercise Physiology (3 credits); Biomechanics or Applied Kinesiology with Lab (4 credits)

Code	Title	Hours
Foundational Coursework		
EXCM 401	Applied Physiology of Exercise	4
EXCM 450	Nutrition, Health and Performance	3
EXCM 475	Exercise Applications in Special Populations	3
EXCM 482	Research Methods and Evidence in Exercise Science	3
Concentrations and Electives (p. 1866)		**18-19**
General track must complete a minimum of 18 credit hours of electives (15 of which are EXCM courses) from below.		
Concentrations in Strength and Conditioning and Human Performance or Clinical Exercise Science must complete 13 credit hours of track-specific curricula and a minimum of 6 credit hours of electives (3 of which are EXCM courses) from below.		
Internship Course		
EXCM 495	Advanced Exercise Science Internship	4
Total Hours		**36**

Concentrations & Electives

General track must complete a minimum of 18 credit hours of electives (15 of which are EXCM courses) from below. Concentrations in Strength and Conditioning and Human Performance or Clinical Exercise Science must complete 13 credit hours of track-specific curricula and a minimum of 6 credit hours of electives (3 of which are EXCM courses) from below.

General Track

Code	Title	Hours
MS EXCM General Track-Specific Curricula		**18-19**
Must complete a minimum of 18 credit hours (15 of which are EXCM courses) from below:		
EXCM 424	Motor Learning and Performance	
EXCM 435	Health Promotion and Wellness Theories and Frameworks	
EXCM 444	Strength Training and Conditioning	
EXCM 454	Applied Sports Science	
EXCM 458	Cardiac and Pulmonary Disease and Rehabilitation	
EXCM 468	Application of Advanced Clinical Exercise Testing & Prescription	
EXCM 475	Exercise Applications in Special Populations	
EXCM 478	EKG Interpretation	
EXCM 480	Advanced Exercise Assessment and Programming	
EXCM 485	Applied Biomechanics	
FONU 507	Behavioral Change for Health Promotion	
MHA 405	U.S. Health Systems Management	
MPBH 413	Non-Communicable Disease Epidemiology	
MPBH 431	Grant Writing	

Strength and Conditioning and Human Performance

Code	Title	Hours
MS EXCM Strength and Conditioning and Human Performance Track-Specific Curricula		
EXCM 424	Motor Learning and Performance	3
EXCM 444	Strength Training and Conditioning	3
EXCM 480	Advanced Exercise Assessment and Programming	3
EXCM 485	Applied Biomechanics	4
Electives		
Must complete a minimum of 6 credit hours (3 of which are EXCM courses) from below:		*6*
EXCM 435	Health Promotion and Wellness Theories and Frameworks	
EXCM 454	Applied Sports Science	
EXCM 458	Cardiac and Pulmonary Disease and Rehabilitation	
EXCM 468	Application of Advanced Clinical Exercise Testing & Prescription	
EXCM 478	EKG Interpretation	
FONU 507	Behavioral Change for Health Promotion

Comprehensive Examination

A comprehensive exam is required for all students. Please contact your Graduate Program Director or visit the EXCM Graduate Student Sakai page for more information.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the program, graduates will be able to:

- Conduct comprehensive health and fitness assessments using theories and frameworks.
- Apply scientific principles and evidence-based recommendations into the prescription, implementation, and evaluation of exercise and fitness programs.
- Create lifestyle modification and health promotion plans for individuals and groups.
- Incorporate effective communication and motivational strategies to support clients or patients as they adopt, perform, and maintain a healthy lifestyle.
- Implement role behaviors consistent with the scope of practice of exercise sciences.
- Manage human, fiscal, and physical resources of health fitness facilities and programs.

Health Informatics (MS)

Create data-driven solutions to improve patient care.

With the abundance of data, particularly in health care, a Master of Science (MS) in Health Informatics & Data Science from Loyola University Chicago's Parkinson School of Health Sciences and Public Health will prepare students to understand how to use data to improve patient care and population health. Learn how to unlock the power of data through a wealth of career paths such as: Healthcare Data Analyst or Informaticist.

In our 100% online program, you will access real-world data through an internship or capstone project. Become a part of the new health care workforce trained in informatics and data science to improve outcomes and delivery, minimize health inequities, and achieve better care.

Related Programs

Master's

- Exercise Science (MS) (p. 1865)
- Public Health (MPH) (p. 1871)

Certificate

- Health Informatics Certificate (p. 1868)

Curriculum

Loyola's MS in Health Informatics & Data Science is a two-year, 100% online program, with full- and part-time options available. You will start with foundational courses in health care informatics and data science, then hone in on your interests with elective courses. The program concludes with a capstone project and/or internship.

The program is 39 credit hours with a capstone project or 33 credit hours with an internship with capstone report and presentation.

Code	Title	Hours
Core Courses		
HIDS 401	Foundations of Health Informatics	3
HIDS 412	Translational Bioinformatics	3
HIDS 421	Security and Privacy in Healthcare	3
HIDS 422	Ontologies in Healthcare	3
HIDS 431	Introduction to Natural Language Processing in Health	3

HIDS 499	Health Informatics Capstone	3
	Hours	**6**
	Total Hours	**33**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Evaluate existing research studies and their methodologies in the field of health informatics
- Apply computing, information science, and communication in solving real-world health problems
- Integrate social equity and ethical principles to improve health informatics processes and outcomes
- Demonstrate knowledge of database design to manage and analyze health data

Health Informatics Certificate

Learn how to unlock the power of data to improve health outcomes and patient care.

Electronic Health Records (EHRs) contain vast amounts of data. Yet typically, only 20 percent can be readily extracted.

In this certificate program, students learn how to apply machine learning, research methods, natural language processing, and database management to leverage the other 80 percent of "unstructured" health data. We work with our academic medical center partners to provide a hands-on, real-world healthcare database learning environment of more than two million patient encounters over 12 years (including structured and unstructured EHR data).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Graduates will be able to work with a multidisciplinary team of computer scientists, healthcare researchers, and data analysts to learn how to use open-source software packages to solve real healthcare programs.

Healthcare Administration (MHA)

The mission of the Department of Healthcare Administration (HCA) is to develop leaders to improve healthcare through education, research, and service, grounded in the Jesuit values of care for others and social justice.

Built on a thriving undergraduate Healthcare Administration (p. 721) (HCA) program and its strong national reputation within the Association of University Programs in Healthcare Administration (https://www.aupha.org/home/) (AUPHA), the new Healthcare Administration (HCA) graduate program is uniquely designed for aspiring professionals seeking the flexibility of part-time, online formats.

The program encourages individuals from diverse backgrounds and those with varied interests in health care. The department's vision is to be a national leader whose graduates are forces for positive change and leaders of teams that meet the challenges and opportunities of healthcare consistent with the highest ethical values.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Aligned with our Jesuit heritage, MHA students (and graduates) will have the skills and confidence to positively influence change in the healthcare industry. Through experiences such as the unique capstone project, students are asked to take initiative, analyze various types of information, and use evidence-based problem solving. In short, graduates are taught to be forces for positive change and leaders of teams that meet the challenges and opportunities of healthcare consistent with the highest ethical values.

Specifically, graduates will be prepared to:

- Apply core business and financial principles to the healthcare environment
- Evaluate industry and organizational dynamics in the healthcare environment
- Assess and prioritize population health needs
- Drive operational and performance improvements in healthcare organizations
- Manage data to guide decision making in health services organizations
- Synthesize theoretical and analytical knowledge, critical thinking, and communication skills to solve problems in healthcare administration
- Integrate values, ethics, and social justice into the management and leadership of health services organizations, aligned with the Jesuit Catholic tradition
- Incorporate management techniques and theories into leadership activities
- Respond to the need for change and lead the change process
- Present results of data analysis in a way that is factual, credible, and understandable to the decision-making
- Demonstrate problem-solving and problem-solving skills
- Demonstrate high ethical conduct, a commitment to transparency, and accountability for one's action
- Balance the interrelationships among access, quality, safety, cost, resource allocation, accountability, care setting, community need, and professional roles
- Use vital statistics and core health indicators to guide decision-making and analyze health trends of the population to guide the provision of health services
- Effectively use key accounting principles and financial management tools
- Use data sets to assess performance, establish targets, monitor indicators and trends, and determine if deliverables are met: Driving improvements requires a data-driven approach
- Develop and track indicators to measure quality outcomes, satisfaction, and patient safety, and plan continuous improvement
- Demonstrate an understanding of the interdependency, integration, and competition among healthcare sectors

Medical Laboratory Science (MS)

Medical Laboratory Scientists are at the heart of a patient-centered healthcare team, managing labs and running tests that will inform diagnosis and treatment.

A career in medical laboratory science combines the challenges of medicine, pathology, basic sciences, and clinical laboratory sciences. Students receive training in major disciplines of laboratory science, including Chemistry, Hematology, Hemostasis, Immunology, Immunohematology, Microbiology, Molecular Diagnostics, and Body Fluid Analysis. Using state-of-the-art biomedical instruments, critical thinking skills, and molecular techniques, medical laboratory scientists are the detectives of healthcare. Loyola's two-year Master of Science in Medical Laboratory Science will give you the tools you need to enter this low-profile, but critically important, aspect of the health care field.

This degree is geared towards those holding a baccalaureate degree in an area other than Medical Laboratory Science looking to expand their scientific career. Upon completion of the M.S. in Medical Laboratory Science degree, students will be eligible to sit for national Medical Laboratory Science certification exams.

The Loyola University Chicago Medical Laboratory Science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). They can be contacted at: National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720 Rosemont, IL 60018; Ph: 773-714-8880; Fax: 773-714-8886; Email: info@NAACLS.org

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Competencies to work as an entry-level medical laboratory scientist in accordance with established laboratory procedures.
- Apply critical thinking skills to evaluate and interpret clinical data.
- Strong written and verbal communication skills to serve the needs of patients, the health care team, scientific peers, and the general public

Public Health (MPH)

How will you improve population health? As a public health professional, you can change lives by promoting and protecting the health and well-being of people and their communities locally, regionally, nationally, and globally.

The Master of Public Health program prepares students to promote health equity. We prepare future public health leaders through a competency-based and flexible community- engaged curriculum.

The Master of Public Health program is ideal for individuals seeking leadership careers in the diverse and growing field of public health.

Accreditation

Loyola's BSPH and MPH programs are accredited by the Council on Education for Public Health (CEPH). CEPH accreditation provides assurance that the program has been evaluated and met accepted standards established by and with the public health profession. For question on accreditation, contact the MPH Program Director, Ruth Kafensztok (rkafens@luc.edu).

Curriculum

Offered in-person, online, or hybrid, Loyola's MPH is a 42-credit curriculum. Online courses include both synchronous and asynchronous components. We offer concentrations in four study tracks: Epidemiology, Policy and Management, Global Health Equity, and Biostatistics. The curriculum includes six core courses, concentration-specific courses, electives, and applied practice and integrative learning experiences.

Online Learning

Convenient and rigorous, the online program is geared to working professionals, non-traditional students, and individuals who need a more flexible learning format. Loyola University Chicago faculty with expertise in Public Health, Public Health Policy and Management, Environmental Health, Bioethics, Epidemiology, and Biostatistics teach in this program. The vast resources of Loyola's Parkinson School and the Health Science Campus, along with the combined knowledge and experience of distinguished faculty from medicine, social work, bioethics, health policy and law, will help you take on many opportunities and challenges.

Code	Title	Hours
MPH Core Courses		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
or MPBH 409	Biostatistics I	
MPBH 407	Public Health Policy: Concepts and Practice	3
MPBH 499	Public Health in Action	3
MPH Track-Specific Curricula [1]		**15-18**
MPH Electives		**3-6**
Select two of the following: [2]		
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective	
MPBH 426	Infectious Disease Epidemiology	
MPBH 432	Health Impact Assessment	
MPBH 495	Special Topics	
Applied Practice Experience		**1**
MPBH 410	MPH Practicum	
Integrated Learning Experience		**2**
MPBH 411	MPH Capstone	
Total Hours		**42**

1. Selected courses from other schools/programs may satisfy MPH elective requirements. Students in the Biostatistics track will take six (6) track courses instead of five (5).
2. Selected courses from other schools/programs may satisfy MPH elective requirements. Students in the Biostatistics track will take only one elective.

MPH Track-Specific Curricula (15-18 credit hours)

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPBH 427	Advanced Statistical Methods	1
MPBH 431	Grant Writing	3
Select one Research Methods Course from the following:		3
MPBH 413	The Epidemiology of Obesity: An Energy Balance Perspective	
MPBH 414	Introduction to Global Health	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
ENVS 480	Introduction to Geographic Information Systems	
Total Hours		**15**

Global Health Equity

This concentration is a hybrid program of online and evening classes. Study the health of global populations with the ultimate goal of identifying and eliminating structures and practices of inequity and injustice to advance health equity for individuals and populations.

Code	Title	Hours
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal & Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 431	Grant Writing	3
Select one of the following: [1]		3
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 432	Global Bioethics	
Total Hours		**15**

1. Students may choose an elective course not on this list with Track Director approval.

Public Health Policy and Management

This concentration can be completed entirely online, and also can be taken with in-person courses. This curriculum studies the organization, structure, and delivery of health-related services, and associated population health outcomes. Students may customize their academic focus in either public health policy, administration, or both.

Code	Title	Hours
MPBH 416	Health Services Research Methods	3
MPBH 425	Policy Analysis	3
Select one of the following:		3
BEHL 402	Justice & Health Care	
BEHL 404	Biomedical Ethics and Law	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 411	Systems Ethics Frameworks	
BEHL 412	Organizational Ethics I: Business, Professionalism, and Justice	
BEHL 432	Global Bioethics	
Select two of the following:		6
Policy-oriented		
MPBH 420	Public Health Law: Theories and Cases	
MPBH 424	Health Economics and Healthcare Financing	
Management-oriented		
CMAN 533	Fiscal Management in Health Care Organizations	
MPBH 422	Population Health Planning & Management	
Total Hours		**15**

Biostatistics

This track aims to equip students with advanced skills in statistical techniques and data analysis, with a particular emphasis on harnessing digital data for public health innovation. By integrating modern analytical methodologies tailored specifically to the digital data landscape of the public health domain, this track enhances the program's relevance and ensures our graduates are well-prepared to lead in the data-driven public health landscape.

Students in the Biostatistics track require the same 6 core MPH courses as the other three existing tracks as well as the Applied Practice Experience and Capstone Experience. They also select one elective course.

Code	Title	Hours
Track Requirements		
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 427	Advanced Statistical Methods	1
MPBH 449	Biostatistics for Public Health Interventions	3
MPBH 450	Biostatistics for Electronic Health Record (EHR) Data	3
MPBH 460	Public Health Data Visualization and Reporting	3
Electives		
Select one of the following:		3
ENVS 480	Introduction to Geographic Information Systems	
HIDS 411	Clinical Data Science	
MPBH 431	Grant Writing	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
Total Hours		**18**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

Dual Degrees and Other Programs

The needs of the public health workforce are diverse and ever-changing. Our students are diverse and pursue public health graduate studies at different points in their careers, from undergraduate through practicing nurses and physicians. To meet these needs, the Department of Public Health Sciences offers six additional programs:

- Five-Year Bachelor/MPH Degree
  - Environmental Science BA or BS/MPH
  - Health Care Administration BS/MPH
  - Public Health BS/MPH
- Doctor of Medicine/ Master of Public Health (MD/MPH)
- Master of Social Work/Master of Public Health (MSW/MPH)
- MS in Clinical Research Methods and Epidemiology (CRME)
- Public Health Certificate

Note: Students entering the program may wish to pursue careers that may require licensure (e.g. Registered Environmental Health Specialist) or certification (e.g. Certified in Public Health or Certified Professional in Food Safety) upon or before employment. Loyola University Chicago cannot guarantee that the Master of Public Health will prepare students to meet the unique requirements for licensure or certification in their specific location and/or area of expertise. Students should check with their local licensing or certifying authority to determine what requirements are necessary.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will graduate with public health competencies in the areas of quantitative and qualitative data collection, evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking. More specifically, **public health foundational competencies** attained through the MPH curriculum include:

- Evidence-based Approaches to Public Health: Apply epidemiological methods to the breadth of settings and situations in public health practice; Select quantitative and qualitative data collection methods appropriate for a given public health context; Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate; and Interpret results of data analysis for public health research, policy or practice.
- Public Health & Health Care Systems: Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings; and Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.
- Planning & Management to Promote Health: Assess population needs, assets and capacities that affect communities' health; Apply awareness of cultural values and practices to the design or implementation of public health policies or programs; Design a population-based policy, program, project or intervention; Explain basic principles and tools of budget and resource management; and Select methods to evaluate public health programs.
- Policy in Public Health: Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence; Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes; Advocate for political, social or economic policies and programs that will improve health in diverse populations; and Evaluate policies for their impact on public health and health equity.
- Leadership: Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making; and Apply negotiation and mediation skills to address organizational or community challenges.
- Communication: Select communication strategies for different audiences and sectors; Communicate audience-appropriate public health content, both in writing and through oral presentation; and Describe the importance of cultural competence in communicating public health content.
- Interprofessional Practice: Perform effectively on interprofessional teams.
- Systems Thinking: Apply systems thinking tools to a public health issue.

Public Health Certificate

How will you help address health disparities? Loyola's commitment to serve people who live on the margins and suffer other injustices includes efforts to eliminate disparities in access to health care in Chicago and throughout the world. The Public Health Certificate (PHC) program trains students to address racial and economic health disparities through public health research, practice, and advocacy. Loyola's campuses, in racially and economically diverse communities, provide "real-world" experience during your certificate courses, and our health professionals and faculty are committed to promoting social justice in the Jesuit tradition.

Combined

- Medicine/Public Health (MD/MPH) (p. 2222)

Curriculum

Students must complete 12 credit hours (four courses) of introductory graduate-level coursework including:

Code	Title	Hours
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
MPBH 402	Public Health Practice and Management	3
MPH Graduate Elective [1]		3
Total Hours		**12**

[1] A selection of pre-approved MPBH courses can satisfy the Public Health Certificate elective. Please see MPH curriculum for all MPBH courses. For a list of all courses and descriptions click here (p. 1843).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Public Health Certificate from Loyola will provide students with core public health knowledge and skills to address public health concerns in your field of practice or to further pursue a master's in public health. More specifically, by completion of the program students should:

- Acquire proficiency in the core public health disciplines, including epidemiology, biostatistics and public health practice/management.
- Have a foundation to explore further training in public health and/or global health.
- Develop skills in the areas of: Evidence-based approaches to research; Health care systems planning and management; and Leadership and communication.

Quinlan School of Business

From the smallest startups to the largest international corporations, the rapidly changing business world needs leaders who can anticipate change and innovate.

Loyola University Chicago's **Quinlan School of Business** helps prepare you for these leadership roles. Our top-ranked programs offer convenient MBA and MS programs in the heart of Chicago.

Flexible. Convenient. Transformative.

Through evening and weekend classes in downtown Chicago and online, you will be able to fit your graduate business program into your personal and professional life.

We offer a broad range of programs and specializations:

What Sets Us Apart

You have big plans for the future. Whether you're building a new career or enhancing the job you have, we can get you where you want to be. Loyola University Chicago's Quinlan School of Business offers top-ranked and respected graduate programs to make those big plans a fulfilling reality.

Sustainable Leadership

Extraordinary leaders are respected and trusted in their organizations as well as in their communities. At Quinlan, you will learn from the successes and mistakes of business leaders and see how those principles translate into the work you are doing today and in your future.

Real-world Learning

All of our courses focus on real-world, hands-on business issues in a global context. You'll apply theory learned in the classroom to current business problems. Our faculty members are established business experts who enrich our graduate programs with their extensive knowledge and first-hand experiences.

Faculty

Quinlan students rely on the expertise of our instructors to gain a global perspective and to refine their analytical tools and managerial abilities, while sharpening critical thinking and leadership skills.

Mid-career professionals benefit from building their theoretical and practical know-how by analyzing case studies and developing real-world projects.

Our Alumni Network

Quinlan graduates join an impressive network of 30,000 alumni in Chicago, the U.S., and around the world—many of whom have achieved leadership positions, and the majority of whom continue to reside and work in the Chicagoland area.

Our Values

Our graduate business programs believe that it is possible to be successful in business while still operating in an ethical and responsible manner:

- **Community**: We value all members of our campus, local, and global community, and seek to develop involved and responsible community members.
- **Diversity**: We value civility, respect, appreciation, and an in-depth understanding of diversity, including the ability to put knowledge into meaningful action.
- **Ethics**: We focus on ethical issues and challenges in business to develop leaders who demonstrate ethical awareness, ethical judgment, and the ability to evaluate and make moral decisions in difficult scenarios.
- **Justice**: We value justice through service that uses learning and leadership in the pursuit of truth and care for others.
- **Leadership**: We value personal growth through leadership and seek to develop responsible leaders who are committed to the common good.
- **Sustainability**: We engage students in understanding and responding to local and global environmental issues by raising awareness, advancing our knowledge of environmental problems, developing solutions, encouraging action, and developing an environmentally conscious culture throughout the university.

Accounting (ACCT)

ACCT 400 Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400B Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400E Financial Statement Analysis and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the development and application of financial statement information. Students will focus on basic concepts, standards, and practices of financial reporting to serve decision-making needs. Students will also work with financial ratio analysis software.
Course equivalencies: ACCT600E/ACCT400E

ACCT 402 Issues in Financial Reporting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course stresses research of selected accounting issues and uses the authoritative pronouncements to better understand financial accounting and reporting. The course structure includes lectures, class discussion, case analysis, and research of timely accounting issues. Group interaction is heavily emphasized.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the recognition and measurement of selected accounting topics; Students will also be able to work as a team to research an accounting issue and professionally communicate their research findings

ACCT 404 Financial State Analysis (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course evaluates the information contained in the financial statements, footnotes, and management discussion and analysis for its usefulness in making investment and credit decisions. Students will synthesize these assessments via a comprehensive financial statement analysis project.
Outcomes:
Students will be able to assess the appropriateness of asset valuation, liability measurement, and equity values for judging the performance of an enterprise

ACCT 405 Accounting Theory I (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent with a grade of C- or better
The course involves a detailed study of the theory, concepts, and procedures of financial accounting. The course focuses on applications involved in accounting for assets, equities, and the valuation and measurement of related income items. It also focuses on the accounting model with emphasis on applying the accounting framework to revenue and asset valuation. Time is spent discussing the theory and logic behind the accounting model and how it impacts financial statements. Restricted to Graduate School of Business Students.

ACCT 406 Accounting Theory II (3 Credit Hours)
A continuation of ACCT 405, the course focuses on valuation issues related to liabilities and other special topics. Complex problems involving investments, earnings per share, pensions, leases, income taxes, bond valuation, and fair value accounting are studied.

ACCT 407 Tax Principles Applied to Individuals (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to individual taxpayers.

ACCT 408 Tax Principles Applied to Entities (3 Credit Hours)
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to various business entities and an overview of Federal transfer taxes.

ACCT 409 Audit I -Audit and Assurance (3 Credit Hours)
This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 410 Audit II-Advanced Audit and Professional Ethics (3 Credit Hours)
This course consists of an in-depth study of specific topics related to both attest and non-attest services rendered by public accounting firms. Topics include: Professional ethics and a study of the AICPA Code of Professional Conduct; Accountants legal liability, federal securities laws and cases related to CPA malpractice; The use of technology and sampling in an audit; Securities & Exchange Commission practice, the integrated audit and the Sarbanes-Oxley Act; and Audit and other reports. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 411 Business Law and Accountants (3 Credit Hours)
This course is designed to familiarize the student with aspects of the legal environment of special concern to accountants. With emphasis on the legal aspects of commercial transactions, the course examines the laws governing sales transactions and the instruments for financing those transactions. Topics include contract law, the Uniform Commercial Code (sale of goods, negotiable instruments, secured transactions), and creditor-debtor relations.

ACCT 412 Special Topics in Accounting (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 424 Managerial Accounting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
Topics include product costing and activity based costing concepts, development and analysis of information for short-run and long-run decision making, the impact of accounting information on divisional performance, cost estimation and cost-volume-profit analysis, segment analysis, transfer pricing, budgeting concepts, and behavioral issues associated with accounting information.
Outcomes:
Develop and use managerial accounting information for operational and strategic decision making

ACCT 424E Strategic Cost Accounting (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Explores the application of internal accounting information. Students will focus on traditional and contemporary managerial accounting practices. Students will work to (1) understand cost behavior, (2) conduct activity analysis, and (3) predict cost under different business decisions.
Course equivalencies: ACCT 424E/ACCT 601E

ACCT 425 International Accounting (3 Credit Hours)
This course explores the similarities and differences of accounting principles and procedures between the United States and other countries. Topics include consolidation of foreign subsidiaries, performance evaluation of foreign operations, translation issues, inflation accounting, and efforts at standardization of accounting rules.
Outcomes:
Students will become familiar with international accounting issues including accounting harmonization, pronouncements of the International Accounting Standards Board, transfer pricing, foreign currency financial statements, foreign exchange, and international taxation

ACCT 431 Tax Research (3 Credit Hours)
This course will provide graduate business students with the basic techniques of conducting federal tax research, and enable them to apply those techniques to a variety of research cases and communicate their research results in both written and oral formats. Includes establishing relevant facts; identifying tax issues; developing & communication conclusions and recommendations in writing and orally.

ACCT 432 State, Local and International Tax (3 Credit Hours)
Pre-requisites: ACCT 408 with a grade of C- or better or its equivalent; Department Consent Required
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. multi-jurisdictional taxation. The first half of the course will focus on the various types of state and location taxation and their common themes and differences. The second half will address Federal income taxation of cross-border transactions, both inbound and outbound.
Outcomes:
Demonstrate the ability to properly allocate taxable income between different taxing jurisdictions; Understand the basic principles and policies underlying state, local, and international taxation; Develop a working knowledge of the different types of taxes

ACCT 433 International Tax (3 Credit Hours)
Pre-requisites: ACCT 341 or ACCT 408
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. International taxation. The course will primarily focus on US companies with foreign subsidiaries ("outbound transactions") but will also discuss foreign companies with US subsidiaries ("inbound transactions") and individual taxation. Topics include; Sources of income, foreign tax credits, controlled foreign corporations (CFCs), Subpart F provisions, US treaties, and BEPS initiatives.
Outcomes:
Develop an understanding of International taxation and how it impacts operational and strategic decision making

ACCT 435 Internal Audit (3 Credit Hours)
This course will expose students to the fundamentals of internal auditing with an emphasis on internal controls. Topics covered will include an overview of internal auditing theory and internal audit in practice. After these overviews, an in depth review of internal controls will be examined, including internal controls best practices, risk assessment, control identification, audit design, testing of controls and audit reporting. Finally, the class may include a hands-on internal audit engagement in a real life setting. Student must have completed 9 hours of undergraduate accounting or 6 hours of graduate accounting courses.
Outcomes:
Students should have a clear understanding of how internal controls are used throughout a company and how auditors help design, test and report on their effectiveness

ACCT 436 Forensic Accounting and Fraud (3 Credit Hours)
The purpose of the course is to familiarize students to the field of Forensic Accounting and sensitize them to: the prevalence of fraud in all forms of business activity; the methods people use in initiating/perpetuating fraud scheme; ways of staying out of or getting out of a fraud conspiracy. Students are presumed to have strong accounting and auditing skills. This course will be covering ethics, accounting, auditing, misappropriation of assets, fraudulent financial reporting, electronic fraud and other fraud investigation/forensic accounting topics.
Outcomes:
Students who successfully complete this course will be able to demonstrate: knowledge of the nature and magnitude of economic fraud as it affects a variety of entities; understanding of the role of the accounting profession in fraud prevention and detection; technical knowledge of forensic accounting, forensic investigations and research

ACCT 437 Advanced Forensic Accounting (3 Credit Hours)
This course will focus on fraud audits of private entities. In the course of financial reviews questions arise about complex financial transactions, employee dishonesty, collusion, and breakdowns in internal controls. Normal audit procedures may discover the issue but additional steps are necessary to quantify and detect the extent of the fraud.
Outcomes:
Students in this course will develop basic forensic skills via analytical training

ACCT 439 Independent Study (1-3 Credit Hours)
Independent study is in-depth research and/or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Student is typically expected to develop a manuscript worthy of publication. The project should require the workload associated with a graduate level course. Normally, this course may be taken one time for credit.
Outcomes:
Student must demonstrate a detailed understanding of the selected accounting topic

Business Administration (BSAD)

BSAD 400E Business Foundations (1.5 Credit Hours)
Enrollment limited to students enrolled in the EMBA or EMBA Health Care Management Programs. Introductory course delivered during initial residency/orientation week to lay foundation for business education in the EMBA and EMBA Health Care Management Programs. Course coverage includes: Jesuit traditions/values, Quantitative Methods, Business Communications, and current topical lecture.

BSAD 401E Effective Business Writing Workshop (0.75 Credit Hours)
Enrollment is restricted to the Executive MBA or Executive MBA Health Care Management program. This course introduces the fundamentals of good written and oral business communications. Course topics include: communicating strategically; making a business case (argumentation and persuasion); presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering a powerful presentation.

BSAD 402E Effective Business Presentation Skills Workshop (0.75 Credit Hours)
This course introduces the fundamentals of good oral business communications. Course topics include: presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering powerful presentations. Restricted to students enrolled in EMBA or MBA Health Care Management cohort

BSAD 409E Integrative Strategy (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Integrates functional area considerations with strategic decision-making at the end of the program.

BSAD 499E Special Topics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Offers students opportunity to gain additional understanding on a special business topic not otherwise covered in the standard EMBA curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate understanding of specialized topics not otherwise covered in EMBA curriculum

BSAD 601E Special Topics (1.5 Credit Hours)
Restricted to Executive MBA students. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

BSAD 609E Integrative Strategy (1.5 Credit Hours)
Restricted to Executive MBA students. Integrates holistic and humanistic concepts (social justice, sustainability, greater good, Jesuit perspectives, etc.) into scientific business management and one's individual lifestyle. Students apply these perspectives by addressing recent developments in emerging topics. In addition, students will present final Capstone project.

Business Ethics (ETHC)

ETHC 441E Business Ethics and Values (1.5 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
This course combines Quinlan's core business ethics course with contemporary instruction in leadership. Students will develop a framework for ethical decision making and the leadership strength needed to advance business decisions.
Course equivalencies: ETHC 600E/ETHC 441E

ETHC 441N Business Ethics (3 Credit Hours)
Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender; Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner

ETHC 499 Special Topics in Business Ethics (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Economics (ECON)

ECON 420 Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 OR ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420B Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 or ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions. Restricted to students in the Baumhart Scholars Program.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420E Managers, Markets and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. The purpose of this course is to guide students in recognizing, analyzing, and solving managerial problems related to firms and markets under conditions of uncertainty. The course uses economic analysis to understand demand, supply, profit, production, competition, pricing policies and business criteria for investments. Strategic decisions using economic laws influenced by FED will also be examined.
Course equivalencies: ECON 420E/ECON600E

ECON 421 Business Fluctuations (3 Credit Hours)
Pre-requisites: ECON 420
This course studies the economic environment's impact on the firm where topics include national income accounting, factors in economic fluctuations and growth, fiscal and monetary policies, economic forecasting, the relationship of foreign trade and balance of payments on economic activities, economic indicators and measures, and problems of public policy.
Outcomes:
Students learn to recognize the macro environment and the business cycles in which to operate in and to make learned forecasts

ECON 424 International Business Economics (3 Credit Hours)
Pre-requisites: ECON 420
This course analyzes topics in international economics, specialization and comparative advantage, balance of payments and foreign exchange, elements of commercial policy, and international investment.
Outcomes:
The students develop skills in this course in analytical and creative thinking, Communication and team-work in evaluating trade policies and opportunities, comparative advantage, exchange rate dynamics and fluctuations and risk management

ECON 424E Global Issues in Economics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 429 Independent Study in Business Economics (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in economics

ECON 522 Game Theory & Strategy (3 Credit Hours)
Pre-requisites: ECON 420
This course studies cooperative and non-cooperative games and winning strategies and discusses prisoners dilemma, tragedies of common resources, executive compensation and auctions as applied to mergers and acquisitions.
Outcomes:
Students learn to think systematically to set strategy for the modern corporate firm in both cooperative and non-cooperative situations and to solve conflicts arising from principal agent problems

ECON 599 Special Topics (3 Credit Hours)
Pre-requisites: ECON 420; Restricted to Graduate School of Business students
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 602E Global Issues in Economics (1.5 Credit Hours)
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

ECON 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

Finance (FINC)

FINC 450 Financial Management (3 Credit Hours)
Pre- or co-requisites: ACCT 400
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450B Finance for a Sustainable World (3 Credit Hours)
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450E Financial Management (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks, and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty.
Course equivalencies: FINC 450E/FINC 600E

FINC 451 Financial Markets & Institutions (3 Credit Hours)
Pre-requisites: FINC 450
Introduction to the financial system in the United States, including the fundamentals and role of money and capital markets, the institutions operating in these markets, the instruments traded, and the organization, functioning and operation of the Federal Reserve System.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 452 Investment Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course includes the topics of asset pricing models; risk and return analysis of stocks, bonds and cash equivalents; portfolio theory; bond pricing, the term structure of interest and immunization strategies in managing fixed income securities.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 453 Topics in Advanced Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 455 International Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course examines the international dimensions of financial management. It introduces potential opportunities/challenges faced by multinational corporations as they expand their business overseas.
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, foreign exchange risk management strategies, and capital budgeting for multinational corporations

FINC 455E International Financial Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 456 Management of Financial Institutions (3 Credit Hours)
Pre-requisites: FINC 450
The course analyzes the importance played by financial institutions. This is a survey course that analyzes the present financial institutional structure with a special focus on managing risk.
Outcomes:
Students will demonstrate an understanding of the following topics: the role of financial intermediaries in managing interest rate, credit, market and international banking risks; Special attention will be given to procedures for measuring and managing these risks

FINC 459 Independent Study-Finance Management (3 Credit Hours)
Pre-requisites: FINC 450
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 470N Business Finance (3 Credit Hours)
Pre-requisites: FINC 450 or equivalent course
Exposure to international financial markets, international diversification, derivatives, risk management, asset valuation, multinational capital budgeting and more.
Outcomes:
Exposure to international diversification, derivatives, risk management, trading options, asset valuation and more

FINC 552 Emerging Markets (3 Credit Hours)
Pre-requisites: FINC 450 and ECON 420
An introduction to the contribution made by financial markets and institutions to economic growth and development in emerging market countries. Normally taught in Thailand, the course will provide a close look at a successful emerging market country.
Outcomes:
Students will demonstrate an understanding of the following topics: the contribution of financial institutions and markets to economic growth and development, the causes and effects of financial crises, the financial liberalization controversy, the impact of inflation, and the causes and effects of corruption; In addition, students will also demonstrate knowledge of Thailand's economic and financial systems

FINC 553 Applied Portfolio Management (3 Credit Hours)
Pre-requisites: FINC 452
This is a course in investment analysis and applied portfolio management. Topics will include investment policy and objectives, performance analysis and attribution, portfolio design, fixed income analysis and portfolio management, and equity analysis and portfolio management.
Outcomes:
At the conclusion of this course the student should be able to: 1) Create an investment policy statement; 2) Analyze and value fixed income securities; 3) Analyze and value equity securities; and 4) Develop and manage a portfolio of debt and equity securities

FINC 554 Fixed Income (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver; or B or better in FINC 335
This course provides an in-depth coverage of fixed income securities, and their markets. The course is an extension to other offerings in the finance program on futures, equities, and interest rate derivatives. The course is supplemented with hands-on applied sessions using Bloomberg, a leading global benchmark for data and analysis used by financial professionals worldwide.
Outcomes:
Identify the types, classifications, and characteristics of fixed income securities; Use Bloomberg and/or other resources to extract, interpret and aggregate key data; Analyze and price different types of fixed income securities

FINC 556 Investment Banking (3 Credit Hours)
Pre- or co-requisites: FINC 452; or prerequisite FINC 335 with minimum grade of " B"
This course provides a broad overview of the activities of investment banks, including venture capital fundraising, stock and bond underwriting, mergers and acquisitions, trading, asset securitization and money management.
Outcomes:
Students will understand how investment banks enhance capital markets by providing financing and investment services to companies, governments and individuals

FINC 599 Special Topics (3 Credit Hours)
Pre-requisites: FINC 450
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

FINC 602E International Financial Management (1.5 Credit Hours)
Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 620 Financial Mathematics and Modeling I (3 Credit Hours)
Pre-requisites: FINC 452 (co-requisite) and ISSCM 491 (pre-requisite); OR FINC 335 with a minimum grade of B (pre-requisite)
This course focuses on how to effectively use Python to build financial models. The course initially trains students to become sufficiently proficient to build financial models using Python, and then moves to its applications, such as translating raw data into meaningful indicators to help investment decisions. The course will examine financial securities, portfolio optimization, as well as valuation problems.

FINC 621 Financial Mathematics and Modeling II (3 Credit Hours)
Pre-requisites: FINC 620
Financial mathematics and modeling II is the second in a sequence of two courses. It is a combination of lecture and lab and will focus on the core mathematical, computational and practical modeling aspects encountered in modern financial applications. The programming languages of choice will be R and Excel/VBA. This course has a prerequisite of FINC 450, FINC 452, FINC 620, and ISOM 400. No prior R programming experience is required but familiarity with Excel/VBA is a pre-requisite.

FINC 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

FINC 624 Interest Rate Risk Management (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.
Course equivalencies: X-ECON624/FINC624
Outcomes:
Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks

FINC 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

FINC 626 Credit Risk Management and Structured Finance (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

FINC 628 Valuation (3 Credit Hours)
Pre-requisites: FINC 450 or Quinlan Finance 450 Student Group Waiver, or FINC 342 with the minimum grade of "B"; Restricted to Graduate School of Business or Undergraduate School of Business
This is an advanced course in valuation where students are given a thorough grounding in traditional valuation models (DCF and relative valuation) and also introduced to real option methods and ideas; a certain emphasis is placed on the valuation of start-ups and students are introduced to the venture capital markets.
Outcomes:
Students will be able to demonstrate an understanding of traditional valuation models as well as real options methods and ideas

FINC 630 Capstone Master of Science Finance (3 Credit Hours)
Pre-requisites: FINC 450 and any 3 additional 450 and above FINC courses
This course integrates theory, analytics, and modeling skills acquired in advanced finance courses. Subject matter will include topics and techniques in corporate finance, international financial management, risk management, and investments. It is intended for Master of Science in Finance (MSF) students and select MBAs concentrating in finance and who have satisfied the necessary prerequisites.
Outcomes:
Students will be able to perform a complicated valuation analysis of a public or private company; Students will understand different short and long-term financing techniques and their impact on a firm's cost of capital, capital structure, financial risk, credit, and business strategy; Students will be able to perform a complicated international capital budgeting analysis; Students will be able to evaluate public and private investments and assess their place in a portfolio

Healthcare Management (HCMT)

HCMT 501 Healthcare Finance and Accounting (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA Health Care Management program
No course description is available

HCMT 502 Healthcare Economics (3 Credit Hours)
This course provides an understanding of the unique economic complexities of the health care industry, with a focus on consumer demand for health and the supply of health care services.

HCMT 505 Healthcare Business Ethics (3 Credit Hours)
This course examines the decision-making process in health care settings using an ethical framework that reconciles competing values and a mindset that prioritizes dwindling resources among a significant number of health care stakeholders.

HCMT 506 Healthcare Policy and Law (3 Credit Hours)
This course will introduce the student to the US Legal System and its application to the Healthcare Administrative environment. Topics covered will include the major legislative and regulatory standards of Health Care Law.

HCMT 507 Healthcare Risk Management (3 Credit Hours)
Students will learn to identify legal, ethical, administrative and compliance risk management and patient safety issues and to reach resolutions for the problems presented. Students will learn how to respond to various risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed; and often how these perceptions are in conflict.

HCMT 508 Global Issues in Healthcare Management (3 Credit Hours)
This course provides students with an understanding of comparative global health care systems. Topics of study will include different models of funding health care services (via public and private health insurance systems), various models of organization of health care providers, and measures of population health in the visit countries.

HCMT 509 Special Topics in Health Care Management (1.5 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary. Enrollment is restricted to students enrolled in MBA-Health Care Management program.
Outcomes:
Students will be able to demonstrate understanding of specialized topics in health care

HCMT 510 Data Driven Decision Making in Healthcare Management (3 Credit Hours)
The intent of this course is to expand data literacy by learning about data tools and how pitfalls can occur in the process of creating them. This includes learning how data is defined, captured, analyzed, and cleaned. In addition, students will learn how data science tools are used within a healthcare setting and what ethical concerns may exist.

HCMT 512 Healthcare Marketing Management (3 Credit Hours)
This course will cover how marketing should be integrated across today's healthcare organizations, and give healthcare leaders a foundational understanding of the marketing concepts necessary for effectively defining their market, communicating with multiple customer groups, and ultimately driving customer loyalty and growth.

HCMT 513 HR Strategic Management (1.5 Credit Hours)
This course will help students understand and analyze the strategic HR challenges and decisions that organizations face today. The course will include lecture, readings, completion of case analysis in learning teams, a group presentation on one case, an individual paper, and a panel discussion with healthcare HR professionals.

HCMT 514 Healthcare Leadership (1.5 Credit Hours)
This course will help students expand their thinking on what it takes to be an effective leader in today's healthcare environment. It will also provide students an opportunity to gain insight on themselves as leaders, including their leadership purpose, values, style, talents, and development priorities.

HCMT 515 Project Management (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA-HCM program
No course description is available

HCMT 516 Change Management (1.5 Credit Hours)
This course explores the complexity and dynamics of change in organizations, with a particular focus on the health care domain. Topics covered include organization development, managing resistance, and change leadership. Students will develop an awareness of the ethical issues of change and corporate social responsibility. Restricted to Healthcare Management cohort only (HCMC-MBA).
Outcomes:
Students will develop an awareness of the ethical issues of change and corporate social responsibility

HCMT 530 Capstone: Strategic Management (3 Credit Hours)
This is the capstone course of the Health Care MBA program, and is intended to be a bridge to working responsibly and effectively in the real world, particularly in the health care industry. This course will explore the fundamental frameworks for identifying, developing and implementing effective strategy for health care organizations.

Human Resources & Employment Relations (HRER)

HRER 413 Compensation (3 Credit Hours)
This course examines wage and salary policies and programs in private and public organizations. Legislative and social issues affecting pay decisions, and the alignment of pay policies with the business strategy and other human resource programs are covered.
Course equivalencies: HRIR413/HRER413
Outcomes:
Students will learn how to design and implement compensation policies and programs that will give their employers a competitive advantage; resolve compensation problems from both a human resource professional and managerial perspective; and create pay policies that are perceived as just and equitable; Students will improve their team leadership, analytical and writing skills

HRER 415 Internship (1 Credit Hour)
An internship provides the student with direct exposure to human resources and/or industrial relations functions as they are practiced in the real world.
Course equivalencies: HRIR415/HRER415
Outcomes:
Students will learn to practically apply the concepts and theories learned in the classroom to a real organizational work environment

HRER 417 Managing and Motivating in the Workplace (3 Credit Hours)
The course primarily explores the structure and function of human behavior in organizations. Students will be introduced to the principles of theory of perception, motivation, decision-making, job and organizational design as they relate to organizational realities such as power, politics and change.
Course equivalencies: CORD/HRIR/TRDV/HRER417/MGMT470
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417B Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores the structure and function of human behavior in organizations with a special focus on diversity, equity, and inclusion and on change management.
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417N Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Graduate School of Business Student
Students research a global HR challenge and develop written and oral communications focused on resolving the challenge that are presented to an executive panel at the end of the class. Students lead multiple in-class presentations and case analysis writing. Readings provide insight on building an inclusive work environment and resolving conflict.
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including culture, race, religion, and gender; Communication Skills: communicating effectively in an oral and written manner

HRER 418 Human Resources Law (3 Credit Hours)
This course will introduce students, by a combination of statutory case law analysis and readings, to the substantive case law in the area of employee-employer relations' law. The statutes and case law encompass the following: National Labor Relations Act, Title VII of the Civil Rights Act of 1964, Age Discrimination in Employment Act (ADEA), Americans with Disabilities Act (ADA), Civil Rights Act of 1991, Illinois Human Rights Act, and Illinois Employment Law Statutes and Regulations.
Course equivalencies: HRIR418/HRER418
Outcomes:
The primary purpose of this course is to introduce graduate students to a practical examination of the principles of "employee-employer" relations law, also called human resources law or personnel law; Students will be exposed to the principal theories, policies and literature concerning the relevant federal and state (Illinois) court case law and government regulations of the employee-employer relationship in primarily the private sector

HRER 422 Global HR Management (3 Credit Hours)
This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team building, and communication.
Course equivalencies: HRIR422/TRDV422/HRER422
Outcomes:
To survey the three types of topics covered by the field of Global HRM: 1. management of human resources in global corporations; 2. management of expatriate employees; 3. comparison of HRM practices in a variety of different countries: To consider special topics at the forefront of global HR, such as effects of NAFTA and the European Union, global ethics, and critiques of globalization

HRER 429 Human Resource Development (3 Credit Hours)
This course examines how organizations develop employees with the appropriate technical, interpersonal and leadership skills to be effective in their jobs.
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, and to evaluate the impact of the program on the employee and organization; In addition to conducting formal training programs, students will learn how to use career planning, job rotation and performance feedback to develop employees and themselves; Students will improve their presentation, team leadership, analytical and writing skills

HRER 430 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

HRER 433 Group Process and Facilitation (3 Credit Hours)
This course focuses on major concepts of group development and group dynamics. Other topics of discussion include communication patterns, authority relations, leadership, norms, stages of group behaviors, paradoxes of group life, and self-awareness within group settings.
Course equivalencies: HRIR433/HRER433
Outcomes:
Students learn the various tools and techniques of process consultation and also gain knowledge and competence for working with groups; The course combines cognitive and conceptual materials with experienced-based learning

HRER 442 Global Overseas Seminar (3 Credit Hours)
This course examines cross-cultural human resources topics both within the business organization and across the global marketplace.
Course equivalencies: X-CORD442/HRIR442/HRER442

HRER 452 Human Resources Information Systems (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course offers an in-depth look into the processes involved in implementing an HRIS and how to use analytics to drive key business decisions.
Course equivalencies: HRIR452/HRER452
Outcomes:
Understand how to prioritize needs, implement, and use HRIS to support business decisions; Learn basic programming for analytics

HRER 453 Incentive Pay and Employee Benefit Programs (3 Credit Hours)
This course examines incentive pay and employee benefit programs in private and public organizations. Program design and the alignment of incentive pay and benefit programs with business strategy and human resource programs are covered.
Course equivalencies: HRIR453/HRER453
Outcomes:
Students will learn to design and implement incentive pay and employee benefit programs that will give their employers a competitive advantage and be perceived as equitable among employees; Students will improve their team leadership, analytical and writing skills

HRER 462 Employment Relations (3 Credit Hours)
This course examines critical labor laws in the United States and the structure and function of our employment relations system.
Course equivalencies: HRIR462/HRER462
Outcomes:
Students will demonstrate understanding of basic case law in the field of labor relations and how unions, management representatives, and government dynamically interact to provide employee representation, balance group interests, and ideally avoid disruptive workplace conflict

HRER 463 Staffing (3 Credit Hours)
This course provides an overview of staffing processes in organizations, with an emphasis on recruitment and selection procedures. Other topics of discussion include legal and strategic issues in staffing, and relevant statistical concepts.
Course equivalencies: HRIR463/HRER463
Outcomes:
Students will become comfortable with the entire staffing process and be able to design and implement cutting-edge staffing systems, with an emphasis on business strategy

HRER 490 Analytical Problem Solving (3 Credit Hours)
This course is designed as an introductory graduate level course in analytical problem solving, another name for research methods, and design. A basic understanding of - and general familiarity with fundamentals of statistical concepts is assumed. However, where necessary, we will revisit these concepts briefly. Of course, this is not a course in statistics.
Course equivalencies: HRIR490/HRER490

HRER 498 Independent Study (3-6 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of human resources not otherwise covered by department course offerings.
Course equivalencies: HRIR498/HRER498
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in human resources management

HRER 499 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: HRIR499/HRER499
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

HRER 500 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
This course engages students in a chosen Special Topic in HRER.
Course equivalencies: HRIR500/HRER500
Outcomes:
In-depth understanding of a special topic in the area of HRER

HRER 501 Performance Management (3 Credit Hours)
Designed to provide both current and future managers an in-depth understanding of performance appraisals and related issues, this course also emphasizes on goal-setting, feedback and the rating process.
Course equivalencies: HRIR501/HRER501
Outcomes:
Students will learn to apply the various techniques used to conduct effective performance appraisal processes and design comprehensive performance management systems for their organizations

HRER 501E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

HRER 502 Global Employment Relations (3 Credit Hours)
This course introduces students to different employment relations systems in advanced industrial economies in North America, Europe, and Asia and to formats for resolving new types of labor problems that have merged in a global economy.
Course equivalencies: HRIR502/HRER502
Outcomes:
Students will be able to identify critical differentiating aspects of employment relations systems in the developed world and common pro and con arguments regarding proposed solutions to substandard working conditions in the developing world

HRER 511E Conflict Management and Negotiation (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

HRER 513E Strategic Human Resource Management (1.5 Credit Hours)
As a leader or manager, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best; preserving the organization's financial health and protecting it from legal risks. This course focuses on how best to accomplish this. Enrollment limited to EMBA Cohort.
Outcomes:
Understand the role of HR in the successful execution of business strategy; Understand the importance of fit-driven strategic hiring; Understand the basic tactics of distributive and integrative bargaining

HRER 600E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

Information Systems (INFS)

INFS 443 Business Analytics (3 Credit Hours)
Business analytics is the practice of using methodically collected data to drive decisions about business and in business applications. The goal of the course is to introduce students to the current approaches, tools, and techniques involved in this practice. Because many topics and concepts in business analytics are best learned through hands-on work, time will be spent obtaining, processing, analyzing and visualizing data that pertain to different business cases. Students will use R, arguably the most popular analytical software used by data scientists. During this course, students will learn to use R, as well as gain and help improve business insight through data-driven analytics. Restricted to Graduate School of Business students.
Outcomes:
Explain the key factors differentiating business intelligence from business analytics; Frame a problem in a business analytics context to drive insightful decisions and gain the competitive edge

INFS 491 Managerial Statistics with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines the integration of statistical methods with artificial intelligence (AI) techniques to analyze and interpret complex data. Students will study key statistical concepts, including descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, correlation analysis, and model building. AI-driven approaches will be introduced for various topics. Emphasis is placed on using statistical software and AI to facilitate data analysis and address real-world problems effectively.
Course equivalencies: ISOM491 / MGSC491
Outcomes:
Students will gain a high-level understanding of common statistical tools used in AI and machine learning algorithms and they will be able to derive conclusions from statistical studies; Students will be able to describe data using visual and numerical summaries, analyze and interpret data effectively, perform estimation and hypothesis testing, develop and evaluate statistical models such as regression, apply statistical software for data analysis, and present statistical findings and AI results clearly and accurately

INFS 492 Database Systems (3 Credit Hours)
This course uses database systems as the focus for studying concepts of data modeling and data manipulation. Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and using it to support business processes.
Course equivalencies: ISOM492 / MGSC492
Outcomes:
Understanding the development and use of business database systems

INFS 492E Business Intelligence/Data Warehousing (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 493 Database Analytics (3 Credit Hours)
Pre-requisites: INFS 492 This course focuses on practical methods for in-database data preparation and manipulation to extract analytical insights out of a large or big data repository
The concept of big data, distributed computing frameworks, and massively parallel processing databases are also covered. Students will become proficient using open source databases, performing extensive advanced SQL programming, writing scripts and manipulating strings, numbers, data, etc. within a database.
Outcomes:
Implement Advanced Data Queries: Conduct advanced searches, hierarchical queries, and implement range-based filtering to address complex data analysis requirements; Master Advanced SQL Techniques: Develop expertise in advanced SQL programming, including \\nstring manipulation, numerical calculations, date handling, and metadata queries; Analyze and Prepare Data for AI: Utilize in-database data preparation techniques to transform raw data into actionable insights, a critical step for AI model development and implementation

INFS 493E Strategic Use of Information Technology (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on the use of information technology for competitive advantage, including the management of information as a corporate resource, and information systems planning and its relationship to corporate planning.
Course equivalencies: ISOM601E / INFS601E/INFS493E

INFS 494 Applied Data Mining and Artificial Intelligence (AI) (3 Credit Hours)
Data Mining involves the search for patterns in large quantities of data using techniques such as clustering, decision trees, neural networks, and association analysis. Machine learning, the process of using mathematical models of data to help a computer learn without direct instruction, an important application of artificial intelligence (AI), is also introduced.
Course equivalencies: X-CSIS494/INFS494
Outcomes:
The student will be able to build models using an industry-standard package and interpret the results; The student will be able to use AI-enabled tools to discover and extract implicit but potentially useful information from data

INFS 495 Forecasting Methods with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: Graduate School of Business Student and ISSCM 491 or ISSCM 402N
Techniques of forecasting and model building are introduced. Methods covered are simple and multiple regression, introduction to time series components, exponential smoothing algorithms, and AIRMA models - Box Jenkins techniques. Business cases are demonstrated and solved using the computer.
Course equivalencies: ISOM495 / MGSC495
Outcomes:
Students will be able to forecast business and economic variables to enhance business decisions; Students will learn how AI enhances forecasting techniques by uncovering complex patterns, automating model optimization, and improving forecast accuracy; Students will be equipped with the skills to create advanced, AI-augmented forecasting models, making them invaluable assets in data-driven decision-making environments

INFS 496 Systems Analysis and Design (3 Credit Hours)
Provides a core set of skills for planning, managing and executing systems analysis and design processes in e-business and Web-based environments. Topics typically include project initiation and planning, methods used in the determination of information requirements, prototyping, techniques used in systems design, testing and implementation strategies.
Course equivalencies: X-INFS496/CSIS496
Outcomes:
Understanding of the development and implementation of business information systems

INFS 499 Independent Study (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information systems not otherwise covered by department course offerings.

INFS 590 Global Strategy and Data (3 Credit Hours)
This course introduces the student to economic and business practices of a foreign country using the analysis of data, and on-site experiences. We will focus on business strategies, impediments, and challenges in light of the culture, politics, history and institutions of a selected country. We will interact with a variety of local people such as small business owners, firm managers, economists, journalists, and students, in order to inform our understanding and analysis.
Course equivalencies: MGMT590/ISOM590
Outcomes:
Students will gain knowledge and analytical skills that can assist them in facing the challenges of conducting business in global locations

INFS 592 Data Visualization (3 Credit Hours)
Pre-requisites: INFS 492
The amount of data that our world generates is growing at a torrid pace. Sifting through & making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries & advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process & visualize large amounts of data in order to enable efficient & effective analysis using industry standard software

INFS 596N Data Driven Decision Making (3 Credit Hours)
Pre-requisites: Restricted to School of Business graduate degree students
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

INFS 600E Business Intelligence & Data Warehousing (1.5 Credit Hours)
Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 604E Business Data Analytics - Infrastructure (1.5 Credit Hours)
The course covers concepts related to data organizing and database modeling, and the managerial issues related to the design, implementation, and utilization of systems that support operational data use and provide infrastructure for business data analytics. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how to gather, understand, manage, and act on information stored in databases, data warehouses, and Big Data repositories

INFS 605E Business Data Analytics - Application (1.5 Credit Hours)
The course covers the effective uses and applications of data analytics; including On-Line Analytic Processing/Business Intelligence, data mining techniques and their particular applications and data visualizations methods and tools. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how business data analytics is applied to create competitive edge and business opportunities and how to understand and manage business data analytics applications projects

INFS 691 Principles of Analytic Programming (3 Credit Hours)
Pre-requisites: INFS 443
This course will focus on the R language and will build on the introduction from INFS 443.
Outcomes:
Students will learn to manipulate data, write functions and scripts for repeatable analysis, build models, and perform data analysis tasks

INFS 791 Programming for Business Decision Making (3 Credit Hours)
This course focuses on how to effectively use a computer programming language to support decision making in business. Examples include using Visual Basic for Applications (VBA) to create applications within Microsoft Excel or using Python for manipulating and analyzing data. In addition to covering the concepts of programming using the specified language, this course covers developing user interfaces, working with external data and debugging code. By the end of this course, the student will be able to build custom procedures and create user-defined functions in the programming language used.

INFS 795 Ethics and Data Analytics (3 Credit Hours)
The rapid advancement in technology necessitates an equally rapid advance in the ethics of data analytics. We will explore ethical questions in this field through the use of business case studies. We will also look at examples of ethical codes of conduct.
Outcomes:
Students will evaluate following ethical considerations: how data is collected, how it is interpreted, how it is applied, and with whom it is shared

INFS 796 Data Warehousing (3 Credit Hours)
Pre-requisites: INFS 492 Outcomes: Students will learn how data warehouses are used to help managers successfully gather, analyze, understand and act on information stored in data warehouses
The components and design issues related to data warehouses and business intelligence techniques for extracting meaningful information from data warehouses are emphasized. Oracle tools will be used to demonstrate design, implementation, and utilization issues.
Course equivalencies: X-ISOM796/MGSC796/CSIS796

INFS 797 Applications of Visualization (3 Credit Hours)
Students will explore human perception and cognition, the use of best design practices, and interacting/storytelling with data.
Outcomes:
This course will develop a vocabulary and framework for discussing, critiquing, assessing, and designing visual displays of quantitative data

INFS 798 AI Product Management (3 Credit Hours)
This 10-week intensive course aims at mastering the end-to-end process of discovering, designing, developing, delivering, and managing products in context to data, machine learning and artificial intelligence. The course concentrates on strategic thinking and tactical implementation of data driven products and provides skills needed to become a successful product manager.
Outcomes:
Apply product management principles to ideate and develop innovative AI tools and solutions; Utilize product management strategies to guide the development of AI tools that support data-driven decision-making; Prototype and validate AI solutions, using product management methodologies to efficiently design, test, and iterate AI prototypes for real-world applications

INFS 799 Special Topics in Information Systems (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Information Systems and Supply Chain Management (ISSCM)

ISSCM 400 Quantitative Methods (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.

ISSCM 400E Quantitative Methods (1.5 Credit Hours)
Quantitative Methods is restricted to students enrolled in the Executive MBA and MBA Health Care Management programs.

ISSCM 400N Quantitative Methods I (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students learn the tools for modeling business decision problems and the techniques for finding solutions for these models

ISSCM 402N Quantitative Methods II - Statistics Primer (0 Credit Hours)
The fundamentals of managerial statistics are presented. Topics include descriptive statistics, regression, and correlation analysis.

ISSCM 484B Project Management (1.5 Credit Hours)
Pre-requisites: Completion of two Core business courses (ACCT 400, MARK 460, HRER 417, ISOM 491, FINC 450, ECON 420, OPMG 480)
The art and science of project management as applied to a variety of business and technical projects in commercial, public, and private sectors. Covers: project life cycle and methodology; teambuilding; project organization, stakeholders and leadership; proposals and contracts; techniques for project planning, estimating, scheduling, and control; PMO.
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods, tools, and procedures for initiating, defining, and executing projects

ISSCM 484E Project Management (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the art and science of project management and systems development, as applied to a variety of large and small project situations in commercial, public, and private sectors.
Course equivalencies: OPMG601E/ISOM484E

ISSCM 484N Project Management (3 Credit Hours)
Project management is the art, craft, and occasional science of being intentional and systematic about transforming ideas into practice and realizing organizational value. We explore how to design and sequence tasks and deliverables, obtain resources, and manage to deadlines and value. Restricted to School of Business graduate degree students.
Outcomes:
Identify project management opportunities; Design executable project plans; Recognize and address risks that arise during execution

ISSCM 486E Global Supply Chain Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers.
Course equivalencies: ISOM486E/OPMG602E

ISSCM 491E Data Analysis for Managers (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Provides an in-depth treatment of computer-based data analysis, including sampling, estimation, hypothesis testing, regression, and time-series models. The emphasis is on managerial applications and on letting the data tell the story.
Course equivalencies: ISOM 600E/ISOM491E

ISSCM 595 Decision Analysis (3 Credit Hours)
Pre-requisites: Restricted to School of Business graduate degree students
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 595B Decision Strategy Critical Thinking & Decision Analysis (3 Credit Hours)
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 596B Data Driven Decision Making (3 Credit Hours)
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

ISSCM 799 Special Topics- Information Systems & Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM799 / MGSC799
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Legal Environment of Business (LREB)

LREB 443E Executive Legal Liability (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Treats selected areas of corporate activities in which officers and directors are subject to personal liability including conflicts of interest, security transactions, and provisions of the Foreign Corrupt Practices Act. Students will design company compliance programs related to such matters including anti-trust regulations.
Course equivalencies: LREB600E/LREB443E

LREB 445 Entrepreneurship Law (3 Credit Hours)
Pre-requisites: Quinlan School of Business graduate students
This course provides aspiring and established business owners with an understanding of the recurring legal issues at various stages in entrepreneurship. Comprehending these principles will assist business owners in better organizing their business structures and operations.
Outcomes:
The goal is to help increase a business' duration and profitability by implementing appropriate processes to reduce the potentially substantial costs and irreparable harm associated with failing to apply proper attention to foreseeable commercial risks

Marketing (MARK)

MARK 425N Business Communication (1.5 Credit Hours)
Effective communication skills are important because they give leaders and followers the ability to transmit and receive information with a high probability that the intended message is passed from sender to receiver. Good leaders communicate ideas, articulate arguments, advocate positions, solicit ideas from others, and persuade others. Restricted to School of Business graduate students.
Outcomes:
1) Learn to communicate effectively in an oral presentation; 2) Develop specific skills to enhance effective professional interpersonal communication as well as written and oral communication

MARK 460 Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460E Marketing Management (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Introduces use of strategic research, customer analysis, target market, and the application of marketing tools to a variety of case problems. Emphasis is placed on product planning, pricing policies, promotional methods, and distribution channels. Considers cultural, governmental, economic, business, and environmental factors affecting the marketing of goods and services globally.
Course equivalencies: MARK600E/MARK460E

MARK 461 Research Methods in Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the marketing research process and the role of survey research in it.
Outcomes:
Students formulate research problems and a design research study, including the development of a questionnaire, selection of an appropriate sample and data analysis

MARK 463 Sales and Strategic Leadership (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the tools and techniques required for developing a sales force and for managing revenue generation within organizations.
Outcomes:
Students apply processes for hiring and managing sales professionals; tools for successful account management; and skills in solving revenue generation problems facing profit and non-profit organizations

MARK 464 Integrated Marketing Communication (3 Credit Hours)
Pre-requisites: MARK 460; MARK 467 is recommended
This course develops an understanding of how advertising, sales promotion, public relations, personal selling and in same cases packaging decisions form a coordinated marketing communications plan.
Outcomes:
Students apply the elements of integrated marketing communications and develop a coordinated Marketing Communications plan for a project or case study

MARK 465 International Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of marketing problems in an international context with particular attention given to how international factors impact consumers, competition, and marketing strategies. Students analyze cases and identify optimal solutions to international marketing problems.
Outcomes:
Students apply the principles of marketing to solve marketing problems in an international context

MARK 467 Consumer Behavior (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of how consumers behave before, during, and after the consumption process by exploring both the micro-level mental processes that impact consumer decision-making as well as the macro- level cultural and social influences on consumer behavior.
Outcomes:
Students apply course concepts and theories to develop a consumer analysis and marketing strategies for a firm or non-profit organization

MARK 468 Digital Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of the Internet as part of an overall marketing strategy by considering the ways in which the Internet has changed marketing and business. The course covers topics such as online consumer behavior, web analytics, online advertising, email, social media, mobile, and search engine marketing (paid and organic). In addition to learning fundamental principles of digital channels, students will apply the learned principles in a class project; example projects include creating a paid search campaign for a client, running a digital marketing simulation, writing a digital marketing plan, or conducting a social media audit.
Outcomes:
Students develop the power to act effectively by using technology in increasingly complex buying environments

MARK 469 Independent Study-Marketing Management (3 Credit Hours)
Pre-requisites: MARK 460
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area not otherwise covered by department course offerings. Variable credit. Permission of area coordinator required. Special Topics are scheduled classes; specific titles and content will vary.
Outcomes:
Varies with course of study selected

MARK 470N Research, Insights and Storytelling (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Students will learn to monitor trends and shifts in the socio-cultural landscape, identify relevant market information, gather consumer research and translate into actionable strategies through storytelling. Enrollment limited to MBA Students. Collect, analyze & glean insights from data; Apply & translate insights into compelling stories for actionable business outcomes & social impact.
Outcomes:
Understand research process & approaches

MARK 472E Market Opportunity Analysis (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Enables students to discover market opportunities and business relationships that are critical to sustainable business growth. Course will challenge students to move away from "copy cat" business ideas to innovative business solutions.
Course equivalencies: MARK 604E/MARK472E

MARK 561 Comparative Consumer Behavior (3 Credit Hours)
This course develops an understanding of the marketing implications of cultural differences and similarities between the people of two or more nations and considers two opposing views of marketing scholars as to whether the similarities or the differences are the more important factor.
Outcomes:
Students apply methods of cross-cultural analysis as well as examine frameworks for assessing multinational strategies

MARK 562 Database Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the development and use of databases for marketing, retrieval of appropriate data and analysis of that data to increase marketing effectiveness.
Outcomes:
The student will perform database manipulation and analysis of data; Analysis includes at least univariate analysis, cross-tabulation, creation of new variables, regression analysis and recency-frequency-monetary analysis

MARK 564 Brand Equity and Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460 or by Departmental Consent
This course develops an understanding of the way firms may increase their share of market and profits by creating, building, and managing strong, unique, and favorable brand equity for their products and services.
Outcomes:
Students develop a Brand Plan, evaluating the contributions of traditional brand elements, and develop a framework for creating the marketing strategies required for successfully building and managing brand equity

MARK 566 Integrated Media Planning (3 Credit Hours)
The course provides an overall understanding of media planning: basic media concepts, buying and selling of media, development and evaluating effective media strategies and plans, and the role that media plays in an integrated marketing and communications plan. The course is recommended for students with little or no media planning experience.

MARK 567 Customer Relationship Management (3 Credit Hours)
Pre-requisites: MARK 460; MARK 468 is recommended
This course develops an understanding of CRM as a business philosophy that involves acquiring new customers as well as maintaining long-term and profitable relationships with existing customers. Key concepts such as customer experience, customer satisfaction, loyalty, customer lifetime value, among others, will be explored.
Outcomes:
Students conduct an analysis and critique of a firm's CRM strategy and provide recommendations for improving the customer-firm/customer-brand relationship

MARK 568 Social Media & Content Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course examines the connection between social media and content marketing for the purposes of branding, acquisitions, customer retention, employee recruitment, and other important organizational initiatives. Assess, implement, and leverage tools to build community and attract customers. Prove the ROI of any social media or content marketing effort.
Outcomes:
Develop social media and content marketing strategies that drive value

MARK 569 Special Topics (3 Credit Hours)
Pre-requisites: MARK 460
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

MARK 660 Digital Marketing Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Restricted to Graduate Business students. This course is centered around decision-making based on data gathered from users' interactions with digital channels such as websites, online search (organic and paid), display media, social media, email, and mobile. Students will learn how to define objectives, collect, and analyze data, and recommend useful insights for more effective marketing strategies.
Outcomes:
Students will be able to understand how consumers interact with brands across owned, paid, and earned media; Students will be able to apply the digital marketing analytics process into various decision-making situations\\n; Students will be equipped to establish business measurement models and identify KPIs for various digital media; Students will have the ability to analyze the digital marketing strategies adopted by a firm and recommend data-driven decisions; Students will be able to evaluate the effectiveness of different digital media channels

MARK 661 Customer Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
In this course students will study how to use data analytics to learn about customer needs and improve targeting individual consumers. The course will encourage students to apply scientific methods and models to predict and respond to customer choices. This is the key part of learning Big Data. The term Big Data is viewed in the broad sense as it relates to various aspects of the consumer behavior, which may be captured, measured, and transformed to the digital form.
Outcomes:
Through applications of statistical models to the analysis of the real-world databases, the students will learn how firms may use customer data to serve customers better

MARK 662 Marketing Metrics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
This course is designed with marketing managers in mind. As profession marketing is evolving, it is no longer based primarily on the conceptual content. Marketers get exposed to thousand times the volume of data she(he) saw five years ago. More data cannot lead to better decision making unless managers learn how to use that data in meaningful ways. In this course, students will be introduced to the analytical decision models that assist modern managers in making marketing decisions related to targeting, product design, communications, and more.
Outcomes:
Learn analytical techniques and decision models for enhancing marketing decision making in the modern organizations; Improve skills to viewing marketing processes and relationships systematically and analytically; Learn power of decision models applied in the real managerial contexts; Provide students with toolkit that may be used to assess, and measure return on marketing investments in organizations

Management (MGMT)

MGMT 400B Values-Based Leadership (1.5 Credit Hours)
This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.
Outcomes:
Students will: 1) learn and understand fundamental and diverse principles and theories of leadership and management; 2) develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions; 3) apply what they learn in this course to clarify thinking on leadership and to solve problems in the future; 4) learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management; 5) develop a personal style that will begin to answer the question "What kind of leader do I want to be?"; and 6) Understand the meaning of "vocation" and how it applies to each student's life

MGMT 401B Innovative Corporate Social Responsibility (1.5 Credit Hours)
This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness.
Outcomes:
Students will be able to: 1) examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives; 2) demonstrate understanding of changing legal, social, and political environments as they affect organizations; and 3) analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes

MGMT 402B Social Enterprise (1.5 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.
Outcomes:
Students will demonstrate: 1) an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship; 2) a strategic understanding of how social enterprises succeed; 3) the ability to use analytical tools to develop and measure the impact of social enterprise models; and 4) the ability to formulate their ideas into a social enterprise model presentation

MGMT 403B Creating Ethical Work Environments (1.5 Credit Hours)
This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility.
Outcomes:
Students will: 1) have familiarity with major ethical issues in human resources; 2) understand how companies make ethical human resources decisions aligned with their values; and 3) demonstrate knowledge of current human resource approaches to diversity, inclusion, and social responsibility

MGMT 404B ESG Investing (1.5 Credit Hours)
This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about: 1) the history and growth of ESG in investing; 2) how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and 3) how companies can improve their ESG performance.
Outcomes:
Students will: 1) understand why ESG factors influence a company's financial performance; 2) assess a company's ESG performance; and 3) develop recommendations for ESG improvement

MGMT 405B Sustainable Business Management (1.5 Credit Hours)
No course description is available
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 406B Influential Leadership (1.5 Credit Hours)
This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace. Students will be able to: 1) identify their personal leadership styles; 2) know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and 3) demonstrate familiarity with coaching techniques to improve personal and team performance.

MGMT 407B Impact Investing (1.5 Credit Hours)
This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns. Students will: 1) understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; and 2) be able to evaluate an investment with an SROI (social return on investment) framework.

MGMT 426N Leadership Development (1.5 Credit Hours)
Leader development is a systematic process that outlines self-improvement goals and strategies to assist leaders to take advantage of opportunities. Development planning consists of identifying development needs, prioritizing development needs, building a development plan, and modifying the development plan. Restricted to School of Business graduate students.
Outcomes:
1) Develop an understanding of the skills that are necessary to be an effective leader; 2) Create a development plan to become a more effective leader and responsible leader who exhibits personal integrity and ethical awareness

MGMT 430B Strategy and Leadership (3 Credit Hours)
The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders. This course is restricted to students in the MBA program and should be taken during the student's final quarter.
Outcomes:
Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity; Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into increasingly more responsible positions inside organizations

MGMT 430E Capstone (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Brings all of the learning together from the program as it concludes. This course builds on the Entrepreneurship course by having teams prepare a complete business plan for the concept they have developed.
Course equivalencies: MGMT610E/MGMT430E

MGMT 430N Strategy and Leadership (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and ISSCM 596N
The MBA Capstone explores the manner in which companies develop and implement a strategic business plan and also examines characteristics and responsibilities of effective general managers and strategic leaders in business organizations.
Outcomes:
An understanding about the business enterprise as a total system and the way it can gain a sustainable competitive advantage; Development of team, analytical, writing, and presentation skills, and the type of leadership skills they will need to move into organizations

MGMT 431N Business Consulting Course (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and ISSCM 596N
This applied fieldwork project provides an opportunity to apply the knowledge and skills learned in the classroom to a client. The student teams will work directly with companies to create implementable business solutions.
Outcomes:
1) Increase proficiency in integrating the techniques, processes and procedures of the fundamental business disciplines; 2) Learn to apply the theory, skills, and knowledge from the business disciplines to business practice; 3) Demonstrate an innovative, entrepreneurial approach to management decisions

MGMT 441 Business Ethics (3 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

MGMT 441B Business Ethics (1.5 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

MGMT 443 Global Environmental Ethics (3 Credit Hours)
This course develops an understanding of the ethical issues and responsibilities arising from human interaction with the non-human natural environment. Perspectives from various religious traditions, Western philosophy, and the science of ecology are considered.
Outcomes:
Students will be able to demonstrate ethical awareness, reflection, and application of ethical principles in decision making

MGMT 444 Introduction to ESG - Expectations & Opportunities (3 Credit Hours)
Pre-requisites: Open to all graduate degree and graduate certificate students
Concepts and practices of ESG are introduced within the context of growing and emerging megatrends such as climate change and social justice concerns that presents companies with new risks and new opportunities. Themes related to private and public companies will be explored.
Outcomes:
Develop strong grounding in the overall themes of ESG; Develop an understanding of the core methods for assessing ESG outcomes; Establish the foundation for delivering ESG impact

MGMT 445 ESG in Practice-Business Leadership in Times of Change (3 Credit Hours)
Pre-requisites: Completion of MGMT 444 and two ESG electives
Class integrates the full knowledge of ESG by building on introductory course while encouraging students to integrate prior ESG knowledge from both practice and other classes. Students apply content and build out plans and pathways for a specific organization. Student may be enrolled in second elective concurrently.
Outcomes:
Demonstrate understanding of reporting tools and approaches; Demonstrate applied understanding of ESG topics; Demonstrate understanding of ESG values based on leadership and change management

MGMT 446 International Business Ethics (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical challenges of international business for managerial decision making. The main emphasis of the course is on implementation, and standards, for operating ethically within multinational corporations and on ethical problems in specific countries or regions of the world.
Outcomes:
The course aims to equip managers with ethical decision-making skills in global business by understanding complex interactions among market, policy, and society, analyzing personal decision-making, and improving communication abilities

MGMT 448 Ethics in Finance (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical challenges in finance, which includes financial markets, financial services, financial management, and finance theory. The aim of this course is to understand the ethical issues that arise in the various areas of finance and to develop an ability to resolve these issues effectively and responsibly. Topics include: fairness in financial markets, the rationale for market regulation, duties of agents, fiduciaries, and professionals, conflict of interest, insider trading, manipulation and fraud, marketing and sales, consumer privacy, abusive credit practices, financial management, financial reporting, bankruptcy, acquisitions and mergers, and building an ethical corporate culture.

MGMT 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MGMT 460E Values Based Leadership (1.5 Credit Hours)
This course is focused on "values-based" leadership. This is an umbrella term that covers a wide range of approaches to leadership, all of which have at their foundation a set of values or principles, or at least an examination of one's values and beliefs.
Outcomes:
To assist students in beginning to develop a personally relevant and valuable style of leadership and management that will positively impact them and their organizations in a complex, diverse, and interdependent world

MGMT 472 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments. Special Note: MGMT 472 is cross-listed with HRER 430.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

MGMT 472E Organizational Change and Development (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 474E Strategic Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. This course introduces and develops strategic techniques to facilitate an organization's articulation of its mission and goals and its formation, implementation, and evaluation of key strategies. Additional topics include: strategic thinking, competitive advantage, vertical and horizontal integration, and planning horizon.
Course equivalencies: MGMT 604E/MGMT474E

MGMT 475 Cross-Cultural Dimensions of International Management & Marketing (3 Credit Hours)
This course examines cross-cultural management and marketing topics both within the business organization and across the global marketplace. Special note: MGMT 475 is cross-listed with MARK 475.
Course equivalencies: X-MARK475/MGMT475
Outcomes:
Students learn how differences in national and ethnic cultures affect the behavior of employees working in organizations, managers making business decisions and consumers making product choices

MGMT 477 Family Business (3 Credit Hours)
This course examines the family, ownership and management challenges involved in operating a family business, including governance and leadership succession.
Outcomes:
Students will be able to analyze the stumbling blocks to family business succession, compare differences between family and non-family owned firms and understand the impact of systems of family ownership and management on a firm's stakeholders and advisors

MGMT 479 Independent Study in Management (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of management not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in management

MGMT 480 Recognizing Entrepreneurial Opportunities (3 Credit Hours)
This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science.
Course equivalencies: X-ENTR 480/MGMT 480
Outcomes:
Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities

MGMT 481 Entrepreneurship (3 Credit Hours)
This course enables the students to develop their new venture ideas. We discuss how to cultivate new business ideas, form venture teams, evaluate the opportunities, and design a firm to bring the ideas to life. At the end, each venture team produces a business plan.
Course equivalencies: X-ENTR 481/MGMT 481
Outcomes:
The students learn how all major functions of a business come together in a new venture; This course will help those who might want to start their own business in the future; It will also help those who will work for existing companies by encouraging them to think more strategically and creatively about business

MGMT 481E Innovation and the Entrepreneurial Mindset (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Introduces the tools necessary for an individual to determine a relevant business concept and prepare to form a business to take that concept to market.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 482 Entrepreneurial Marketing (3 Credit Hours)
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas."
Course equivalencies: X-MGMT 482/ENTR 482

MGMT 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project.
Course equivalencies: X-MGMT 483/ENTR 483

MGMT 485 Social Enterprise (3 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

MGMT 499 Special Topics in Management (3 Credit Hours)
Pre-requisites: Graduate Business Student
No course description is available

MGMT 573 Business Strategy (3 Credit Hours)
This course analyzes the responsibilities of general management in formulating, communicating, and implementing a strategic plan. Whereas corporate strategy (MGMT 574) defines the vertical and horizontal scope of a firm, business strategy (MGMT 573) is concerned with how the firm generates and sustains competitive advantage within a particular industry or product market. Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole. Through case studies, students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the challenges of the business environment.

MGMT 574 Corporate Strategy (3 Credit Hours)
This course focuses on the strategic management of multi-business firms. Whereas business strategy or competitive strategy is concerned with how the firm competes within a particular industry or product market, corporate strategy defines the scope of the firm in terms of the industries and markets in which it competes.

MGMT 602E Organizational Change & Development (1.5 Credit Hours)
Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 605E Conflict Management & Negotiation (1.5 Credit Hours)
Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

MGMT 606E International Immersion (3 Credit Hours)
Students take an international trip to two countries to gain a better understanding of the opportunities and challenges and opportunities related to international business endeavors.

MGMT 607E Entrepreneurship (1.5 Credit Hours)
Introduces the tools necessary for an individual to determine a relevant business concept and prepare a business concept for the marketplace.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 610E Capstone (1.5 Credit Hours)
Enrollment limited to students in MBA for Executives program.
This course brings together all of the learning from the program as it concludes. Students prepare and present a complete business plan for the concept they developed in the Entrepreneurship course (MGMT 607E).
Course equivalencies: MGMT610E/MGMT430E

Quinlan Business (QUIN)

QUIN 401 US Culture & Academic Success Skills for International Students (0 Credit Hours)
This course is restricted to international students admitted to the Quinlan School of Business Graduate Programs. Verbal and nonverbal communication, active listening, participation in classroom discussions, collaborative group work, presentation skills, reading comprehension strategies, academic writing, understanding and avoiding plagiarism.
Outcomes:
International students will be better prepared for achieving success in graduate business studies by adapting to unfamiliar cultural differences in and out of the classroom

QUIN 403 Fundamentals of Business (3 Credit Hours)
Only students with undergraduate degrees other than business are eligible to take this course. This course examines essential topics in management, marketing, operations, information systems, accounting and finance. Within each discipline, we examine the key decisions that are made and how those decisions are or should be made. They will understand what decisions are made in each discipline and how those decisions should be made.
Outcomes:
By the end of this course, students will be familiar with the key discipline areas in business

QUIN 499 Special Topics (3 Credit Hours)
Enrollment is restricted to students in the Quinlan Graduate School of Business. This course offers students the opportunity to gain additional understanding of special business topics not otherwise addressed in the standard graduate business curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate an understanding of a specialized topic not otherwise addressed in the standard graduate business curriculum

QUIN 501 Internship - Curriculum Practical Training (1-3 Credit Hours)
This is the companion course for any Graduate Business student concurrently engaged in an internship for 1 to 3 hours of elective academic credit. BSAD may be taken for academic credit up to three times for a total of 3 credit hours.
Outcomes:
Students will gain first-hand experience with a particular project or area of business operations, will engage in reflection on their contributions to the workplace and the overall internship experience

Supply Chain Management (SCMG)

SCMG 480 Intro to Operations Management (3 Credit Hours)
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Course equivalencies: ISOM480 / MGSC480
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480B Operations Management (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 481 Performance Improvement in Business Processes (3 Credit Hours)
Focuses on process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides the tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and functioning efficiently and effectively in their organization.
Course equivalencies: ISOM481 / MGSC481
Outcomes:
Understanding of the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 481E Performance Improvement in Business Processes (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on teaching students how to successfully analyze a business process, research methods for improving a process, and adapt/integrate the improvement methods into the business process in a prioritized and actionable manner. The course accomplishes this through the concepts of benchmarking, best practices, and performance improvement principles.
Course equivalencies: OPMG 603E/OPMG 481E

SCMG 482 Lean Production Concepts and Practices (3 Credit Hours)
Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, standard operations, visual management, employee empowerment, and supplier partnerships.
Course equivalencies: ISOM482 / MGSC482
Outcomes:
Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 483 Management of Service Operations (3 Credit Hours)
Pre-requisites: SCMG/ISSCM 480
This course explores the application of operations management concepts and techniques in service-sector organizations, and, in particular, how services are delivered to the customer.
Course equivalencies: OPMG483/CSIS483
Outcomes:
Understanding how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations

SCMG 486 Global Logistics (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines how business partners along the supply chain can work together to gain competitive advantage in moving products and services around the world to satisfy customers.
Outcomes:
Understanding best practices like vendor-managed inventory and category management, and the application of information technologies for sharing information

SCMG 486E Global Supply Chain Management (1.5 Credit Hours)
Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers. Must be part of the Cohort of Executive MBA (EMBA) students to enroll.

SCMG 487 Purchasing Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of organizational procurement processes and decision making framework. Topics include in-sourcing/out-sourcing decisions based on total cost of ownership; purchasing cycle and processes; developing material and technical specifications; supplier evaluation, selection and management; supplier quality management; purchasing capital goods and services; global sourcing and e-commerce; and purchasing tools and analytics.
Outcomes:
Students will have developed an understanding of fundamental and strategic issues in material planning and procurement, with the ability to source in a global marketplace

SCMG 488 Inventory Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.
Outcomes:
Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain

SCMG 489 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.
Outcomes:
Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems

SCMG 499 Independent Study-Production & Operations Management (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department course offerings.

SCMG 589 Supply Chain Management Consulting (3 Credit Hours)
Pre-requisites: SCMG 480 Intro to Operations Mgmt; Graduate School of Business students
This course is the capstone of the Supply Chain Management Portfolio of the Master of Science in Supply Chain Management curriculum. As such, it is designed to integrate course topics covered in the foundation courses and engage students in discussions of critical supply chain leadership topics.
Outcomes:
Students will have developed an understanding of how to apply the concepts learned throughout the Supply Chain Management curriculum to a variety of full scale problems

SCMG 603E Performance Improvement in Business Processes (1.5 Credit Hours)
Restricted to Executive MBA students. This course focuses on the process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and function efficiently and effectively.
Course equivalencies: OPMG 603E/OPMG 481E
Outcomes:
Understanding the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 799 Special Topics in Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Sport Management (SPRT)

SPRT 532 Sport Law (3 Credit Hours)
This course examines and analyzes legal issues connected to amateur and professional sport associated with the fundamental concepts of law, sport business structure and legal authority and understanding the process of legal research. Students will comprehend the legal and court system, legal process, and the fundamental concepts of common, statutory, and constitutional law; perform and analyze sport law research; understand the elements of negligence; discuss recent court interpretations; and recommend a risk management standard of practice in the sport industry.

Accountancy (MSA)

With its emphasis on hands-on application of accounting principles and responsible leadership, Loyola's Master of Science in Accountancy program gives you the foundation you need to excel in today's constantly changing regulatory environment.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master of Science in Accountancy (MSA) program, graduates are expected to have acquired essential skills in the areas of:

- Measurement: Graduate accounting students will demonstrate the ability to identify what needs to be measured, apply the appropriate measures, and recognize the strengths and weaknesses of the measures used.
- Decision Making: Graduate accounting students will demonstrate the ability to critically use financial and non-financial data in decision-making.
- Research: Graduate accounting students will demonstrate the ability to research new or existing accounting issues and topics, understand the link between business and accounting, and apply the finding to the business condition.
- Risk Analysis: Graduate accounting students will demonstrate the ability to identify and manage risk.
- Communication: Graduate accounting students will possess the ability to communicate scope, findings and recommendations of accounting work.

Baumhart Scholars MBA (Social Impact MBA)

Baumhart Scholars MBA

We prepare leaders from the private, government, and social sectors to thrive at the intersection of profit and purpose.

Program Highlights

Baumhart Scholars is a highly selective, cohort-based MBA within Loyola's Quinlan School of Business for working professionals who seek to drive their careers and their social impact forward simultaneously. Scholars benefit from:

- Impact-driven curriculum: Scholars go through the MBA together, learning specialized leadership and impact skills alongside the fundamentals of business.
- Individualized mentorship: Scholars meet with professional mentors at the forefront of integrating business strategy and social purpose.
- Exceptional networks: Scholars get special access to Baumhart's leadership networks of higher ambition executives who are marrying profit and purpose.
- International recognition: Scholars receive their MBA from Quinlan, which has been recognized by the *Financial Times* as an international leader in sustainability, ethics, and social purpose in business education.
- Scholarship support: Scholars receive a $20,000 scholarship to celebrate their commitment to harness the power of their MBAs to advance the greater good.

Curriculum

Business Strategy + Social Purpose

Our 16-course, cohort-based approach to the MBA curriculum is designed to provide a solid foundation in all business disciplines, develop leadership skills, and deeply explore purpose in business.

The Baumhart Scholars curriculum has three parts:

- Foundational courses in business fundamentals, which prepare you to be a data-driven business leader with the ability to think critically and communicate effectively.
- Specialty courses in corporate social responsibility, social enterprise, impact investing, ESG, and values-based leadership, which equip you with the tools to marry profit and purpose.
- Elective courses in a wide array of disciplines, which enable you to dig deeper in areas that meet your individual learning goals.

Select three elective courses.		9
Total Hours		**48**

Note: ISSCM 400N Quantitative Methods I and ISSCM 402N Quantitative Methods II - Statistics Primer may also be required, depending on a student's undergraduate record.

Elective Courses

Through your three electives, you can customize your education to your personal career path and interests.

Elective courses can be taken within the Quinlan School of Business or from across Loyola colleges and schools (for example, School of Social Work (https://www.luc.edu/socialwork/academics/graduate/graduate-courses/) or School of Environmental Sustainability (https://www.luc.edu/sustainability/academics/graduatedegreeprograms/)) for flexibility and customization.

You can choose to have a concentration by taking all three elective courses in the same discipline. You can also use your electives to work toward a Graduate Certificate, such as the Environmental, Social, and Governance Certificate (https://gpem.luc.edu/portal/program/?name=environmentalsocialandgovernancecertificate).

Suggested Sequence of Courses

Due to the specialized nature of this curriculum, the majority of courses are taken in a set schedule determined by the program. Scholars are encouraged to meet with their advisor each quarter to discuss their schedule and determine the best time to take electives. Courses typically take place during weekday evenings and occasional weekends. In addition to this core coursework, Scholars are expected to participate in an opening immersion weekend, ongoing leadership development programming, and monthly mentorship. Here is a sample program calendar.

Course	Title	Hours
Year 1		
Fall		
ACCT 400B	Financial Accounting for Business Decisions	3
MGMT 400B	Values-Based Leadership	1.5
MGMT 401B	Innovative Corporate Social Responsibility	1.5
	Hours	**6**

Winter		
FINC 450B	Finance for a Sustainable World	3
MARK 460B	Marketing Management	3
ISSCM 484B	Project Management	1.5
	Hours	**7.5**
Spring		
ECON 420B	Managerial Economics	3
MGMT 406B	Influential Leadership	1.5
Elective		3
	Hours	**7.5**
Summer		
MGMT 441B	Business Ethics	1.5
ISSCM 596B	Data Driven Decision Making	3
MGMT 404B	ESG Investing	1.5
	Hours	**6**
Year 2		
Fall		
ISSCM 595B	Decision Strategy Critical Thinking & Decision Analysis	3
HRER 417B	Managing and Motivating in the Workplace	3
MGMT 407B	Impact Investing	1.5
	Hours	**7.5**
Winter		
SCMG 480B	Operations Management	3
MGMT 402B	Social Enterprise	1.5
Elective		3
	Hours	**7.5**
Spring		
MGMT 430B	Strategy and Leadership	3
Elective		3
	Hours	**6**
	Total Hours	**48**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Provide a solid foundation in all business disciplines: Students in this MBA go through Quinlan's core MBA experience as a cohort, taking courses aimed at developing foundational business knowledge, skills, and values. Students take business ethics, data-driven decision-making, decision strategy, financial accounting for decision-making, financial management for a sustainable world, managerial economics, marketing management, operations management, project management and strategy and leadership.
- Develop leadership skills: Students in this MBA take courses in managing and motivating in the workplace, values-based leadership, and influential leadership.
- Deeply explore purpose in business: Specialty courses in corporate social responsibility, social enterprise, impact investing, and ESG equip students in this MBA with the tools to marry profit and purpose.

Baumhart Certificate in Environmental, Social, and Governance

The Baumhart Certificate in Environmental, Social, and Governance (ESG) will rapidly provide leaders with the knowledge and skills to be effective today as companies determine how they engage in broader societal issues – from climate change to water scarcity, from community stakeholders to internal diversity, equity and inclusion. The Certificate will equip leaders who are already working in companies to accelerate their personal and company's ESG journey by developing fundamental skills to navigate different ESG approaches, assess ESG risks and opportunities, implement ESG initiatives, and ultimately deliver and report financial and societal impacts.

Related Programs

Master's

- Baumhart Scholars MBA (Social Impact MBA) (p. 1897)

Certificate

- Business Ethics Certificate (p. 1904)

Curriculum

The certificate requires the completion of five courses (15 credit hours).

In addition to two ESG-focused courses, you can choose three electives from: the Quinlan School of Business, the Parkinson School of Health Sciences and Public Health, and the School of Environmental Sustainability.

Code	Title	Hours
Introductory Course		
MGMT 444	Introduction to ESG - Expectations & Opportunities	3
Elective Courses		
Select three of the following:		9
ENVS 401	Sustainable Systems - Natural Science Perspectives	
ENVS 402	Sustainable Systems - Social Science Perspectives	
ENVS 410	Introduction to Environmental Law & Policy	
ENVS 412	Water Law & Policy	
ENVS 413	Energy Law & Policy	
ENVS 427	Food Systems Analysis	
ENVS 451	Introduction to Sustainability Concepts & Impacts	
ENVS 463	Sustainable Business Management	
HRER 417	Managing and Motivating in the Workplace	
HRER 433	Group Process and Facilitation	
ISSCM 596B	Data Driven Decision Making	
MGMT 441	Business Ethics	
MGMT 443	Global Environmental Ethics	
MGMT 446	International Business Ethics	
MGMT 485	Social Enterprise	

MHA 430	Managerial Epidemiology	
MPBH 400	Determinants of Population Health	
MPBH 402	Public Health Practice and Management	
MPBH 407	Public Health Policy: Concepts and Practice	
Capstone Course		
MGMT 445	ESG in Practice-Business Leadership in Times of Change	3
Total Hours		**15**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Develop a strong grounding in the overall themes of ESG (Environment, Social and Governance). Provide all students with a required introductory class and a required capstone class that together establish the historical evolution of business, the linkage to all three themes in ESG and the relationship to the economy today. This is solidified in the capstone class, which links the students to examples of real world organizations engaged in ESG.
- Develop an understanding of the core methods for assessing ESG impact. Through the introductory and capstone classes, develop a strong foundation in the methods currently in use to identify ESG trends and impacts. This will connect both the ideas of identifying leadership organizations as well as the emerging ways to link actions to the underlying themes (i.e. Environment: climate and air pollution, etc.; Social: community health and DEI, etc.; Governance: organizational structure and internal policies, etc.)
- Establish an understanding of the current state of the industry and the opportunities to deepen on the ground impacts tied to the ESG high-level framework. Students will have the opportunity to go deep in all three areas by taking targeted classes that further define the ESG themes and are offered across the University. Students can take electives in the Quinlan School of Business, School of Environmental Sustainability, and Parkinson School of Health Sciences and Public Health. They will then go deeper on the impact through a capstone class with an applied project.

Business Analytics (MS)

The Master of Science in Business Analytics offers a unique blend of courses with a strong focus on data analytics–and it can be completed in one year.

This STEM-designated degree emphasizes important skills and tools in the information systems and analytics space such as SQL, Python, R, Tableau, database and data warehouse modeling, data mining, data visualization, and data storytelling.

Related Programs

Master's

- Business Data Analytics (MSBDA) (p. 1902)

Certificate

- Business Analytics Certificate (p. 1901)

Combined

- Business Analytics (MBA/MS) (p. 2209)

Curriculum

The 12-course curriculum of the Master of Science in Business Analytics prepares you to be a responsible leader in the fast-growing information systems and analytics fields.

Courses are offered in online, hybrid, and in-class formats. Students can complete all 12 courses in one year and completely online.

All MS students will be awarded the Business Analytics Certificate (p. 1901) as well. The Business Analytics certificate is a 5-course graduate Quinlan program, and all its courses are a part of the MS program.

Students with previous information systems coursework and part-time students should contact Nenad Jukić (njukic@luc.edu), the program director, for more information on how their courses would be sequenced.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Use data to drive strategic and tactical business decisions;
- Utilize sophisticated database, data warehousing, data mining, and data visualization methodologies and techniques to capture and apply data as a corporate asset;
- Demonstrate competence with various languages and tools, SQL, R, Tableau, and Python;
- Lead, supervise, and manage information systems projects of varying levels of complexity;
- Demonstrate effective communication skills with technical and non-technical individuals and groups;
- Show ability to effectively collaborate with and provide technical leadership to a variety of business units and organizations;
- Demonstrate a high level of technical aptitude in design, development, and use of information systems components;
- Integrate values and ethics into data analysis and information systems projects and solutions.

Business Analytics Certificate

The Business Analytics certificate is an excellent specialization if you are currently pursuing a Quinlan graduate degree or are a working professional who needs to better understand current business analytics methodologies. This certificate will strengthen your analytic skills, while also guiding you through the most contemporary software, languages, and methodologies for modeling and analyzing data.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate program, you will be able to:

- Organize and analyze data in a professional manner using formal methods and techniques;
- Leverage data and analytics as a business asset;
- Use data and analytics to identify new business opportunities;
- Formulate strategic recommendations based on data and analytics;
- Use various languages and tools, including R, SQL, Tableau, and data modeling software

Business Data Analytics (MSBDA)

Position yourself as a data-driven business leader—and your company's data scientist—with an MS in Business Data Analytics.

This one-year, full-time graduate degree program will prepare you to make informed business decisions based on a targeted analysis of the data available to business today.

This program is no longer accepting applicants. Interested students should review the Business Analytics (MS) (p. 1900).

Learn which of our analytics programs best fits your needs through our analytics degree program comparison (https://www.luc.edu/quinlan/academics/graduatedegrees/ms/choosingabusinessdataanalyticsprogram/).

Learning Outcomes

- Gain a deep understanding of some of the tools and software that are used in modern day analytics

- Be able to transform large data sets into insightful and actionable information in an easy-to understand format to assist organizational decision making using advanced analytical tools
- Develop skills in forecasting, modeling and problem solving
- Develop experience tackling industry-specific problems and challenges using advanced analytics and computational methods

Business Ethics Certificate

Learn to do well, and good, with the support of the Business Ethics certificate program. The certificate explores ethical issues in business and the challenges of managing corporate ethics programs.

Related Programs

Master's

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Develop an awareness of different ethical standards and perspectives as well as a tolerance for the conflicts and ambiguities within an organization to work respectfully, ethically, and professionally with people of diverse backgrounds, perspectives, and lived experiences.
- Develop, formulate and implement guidelines for personal and corporate decision-making.
- Understand principles of organizational relationships, and a sensitivity to the ethical concerns associated with dynamics like interpersonal influence, authority, and conflict.
- Demonstrate ability to think critically about managerial ethics, social responsibility, and environmental stewardship while articulating such concerns to various audiences—inside and outside of a business organization.

Cybersecurity Certificate

Never far from the day's headlines, data theft impacts business and consumers throughout our interconnected world. Due to a growing dependency on information security, businesses are hiring more cybersecurity professionals.

Quinlan graduate students have the unique opportunity to earn a certificate in cybersecurity from the highly ranked **University of Dallas** (UD) Gupta College of Business.

The online cybersecurity certificate is a graduate-level, five-course program that provides the foundational skills and knowledge for strategic cybersecurity management.

Related Programs

Certificate

- Cybersecurity Technology Management Certificate (p. 861)

Curriculum

Courses are scheduled to enable completion of the certificate in as fast as 4 trimesters, with students beginning the course sequence in fall or spring. Sessions meet once per week for 12-weeks on the following schedule. All courses are online.

Courses

The following courses are required for the certificate:

- TECH 5F70 - Foundations of Cybersecurity **or** CYBS 5F70 - Information Technologies and Management
- CYBS 6350 - Data Protection
- CYBS 6355 - Compliance and Legal Issues
- CYBS 7350 - Operational Cybersecurity Management
- CYBS 7357 - Network Security

More information can be found on the Quinlan School of Business (https://www.luc.edu/quinlan/academics/graduatecertificates/cybersecurity/) website.

Course Descriptions

TECH 5F70: Foundations of Cybersecurity (OR) CYBS 5F70: Information Technologies and Management (Pick one)

TECH 5F70: This course examines the global issues facing IT and Cybersecurity organizations today by providing an understanding of IT infrastructure, services, and technologies for competitiveness, efficiency, and effectiveness. Students investigate security threats faced by enterprises through the tenets of cybersecurity of confidentiality, integrity, availability, and governance.

CYBS 5F70: This course provides an introduction to the study of cybersecurity and the need to maintain confidentiality, integrity and availability of information. Students will be introduced to cyber laws and governance issues, risk management, security tools, security awareness and the ongoing responsibilities associated with maintaining a secure organization.

CYBS 6350: Data Protection

Provides a working knowledge of fundamental data protection techniques for protecting data at rest, data in motion, and data in processing. Techniques include encryption algorithms and systems (symmetric, asymmetric, standard, digital certificates, and hashes), Steganography, data masking, and data obfuscation. Examines access controls, availability, authentication, confidentiality, data integrity, and non-repudiation as well as defenses against DDOS and other data attacks. Security by diversity and security in depth are presented as fundamental requirements.

CYBS 6355: Compliance and Legal Issues

Examines legal, privacy, and compliance environments facing organizations globally. Students build an understanding of the complexities of security, compliance and legal obligations starting with a general foundation of laws and industry standards that apply across most organizations that handle sensitive data. Examination of industry verticals expand students' knowledge of particular federal and state regulatory and industry-based obligations. It also examines how security and compliance obligations can be used to establish the security, compliance, and risk management programs for an enterprise. Equivalent to TECH 6355.

CYBS 7350: Operational Cybersecurity Management

Focuses on developing skills relative to an understanding of the business risks that exist when proper cybersecurity access controls are not effectively implemented. Students will study breach cases and have the opportunity to interface with security experts to gain an in-depth understanding of current risks, threats, and vulnerabilities organizations face. Lab simulations will be completed and each lab will be analyzed for its meaning and purpose in increasing security knowledge. Students will create a cybersecurity breach report and as a team project create an access control plan with recommendations for overcoming or minimizing cyber breach situations through the use of proper controls, the control framework, lab experiences, and other resources explored in the course. Co-requisite: CYBS 6350. Equivalent to TECH 7350.

CYBS 7357: Network Security

Provides a comprehensive explanation of network security basics including how hackers access networks and the use of network security tools to provide countermeasures. Strategies for meeting the challenges from expanded network boundaries are developed through active hands-on exercises in networked lab environments. Prerequisite: CYBS 5F70 and CYBS 6350.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Earn Microcredentials
Upon successful completion of required coursework, students receive a verified University of Dallas microcredential (https://udallas.edu/minimasters/) in "Cyber Operations."

Microcredentials demonstrate mastery of in-demand skills to potential future employers. They can be displayed with a special digital badge from the University of Dallas on your LinkedIn account and resume. Through Acclaim (https://www.credly.com/organizations/university-of-dallas/badges/), your accomplishment can be verified by employers and hiring managers.

Executive MBA (EMBA)

In today's competitive business environment, you need a degree that sets you apart—and harnesses the power of your experience.

Our transformative 20-month program will help you hone your analytic capabilities, business knowledge, critical thinking, and management and leadership skills.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Quinlan Executive MBA (EMBA) program, graduates will have learned, achieved, or experienced the following:

- Core Business Fundamentals:
  1. Exposure to and be academically rooted in core business fundamental coursework in the areas of accounting, finance, data analytics, economics, management, marketing, human resource management, and operations management
  2. Develop an ability to integrate and see the interplay of core business fundamental coursework
- Entrepreneurship and Innovation:
  1. Anticipate the challenges of leading and managing evolving business and markets
  2. Demonstrate an innovative, entrepreneurial approach to strategy and decision making
- Global Perspective and Diversity:
  1. Equip or enhance global perspective by recognizing international business issues
  2. Understand, appreciate, and leverage individual, team, and organizational diversity
- Ethics and Values-Driven Leadership:
  1. Be exposed to and rooted in ethics and values-related coursework
  2. Demonstrate ability to operationalize ethics and values-related frames into business strategy
  3. Distinguish self as a leader in business who exhibits personal integrity and an ability to apply ethical principles to business practice
- Decision Making:
  1. Achieve a capacity for an integrated critical analysis of business opportunities, processes, and problems
  2. Develop an ability to understand, synthesize, and accordingly activate quantitative and qualitative information to improve managerial decision making
  3. Apply knowledge to solve for real-world business issues and areas of practice
  4. Develop and execute strategic approaches to lead, manage, and operationalize businesses and organizations

Finance (MSF)

You need a firm foundation to stay atop an ever-shifting global financial landscape. Our Master of Science in Finance (MSF) program will provide you with the understanding of financial principles and analytical skills to prepare you for a successful career.

Our curricula is closely linked to professional practice and vital industry connections. And industry leaders on our Financial Advisory Board ensure that our curriculum—and your MSF degree—remains relevant and cutting edge.

Major

- Accounting (BBA) (p. 758)

Master's

- Accountancy (MSA) (p. 1896)

Combined

- Finance (MBA/MSF) (p. 2214)

Curriculum

Completion of the Master of Science in Finance degree requires 12 courses, with additional prerequisite courses depending on academic background.

The curriculum is divided into three sets of courses: prerequisites, required courses, and electives. The required courses are designed to develop strong analytical and modeling skills. The electives enable students to explore topics in corporate finance, risk management, and asset management. Ethical decision-making is woven throughout the program, which will help position you as a responsible leader in your organization.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Our Master of Science in Finance program will provide you with specialized knowledge:

- Learn the concepts of risk and return relationship, diversification, micro and macro structure of global capital markets, and tools for stock and bond portfolio optimizations.
- Learn models and techniques for asset valuation, debt-equity decisions, real options, and cost of capital calculation.
- Learn the application of financial mathematic modeling techniques involving writing and implementing computer codes.
- Learn the concept and valuation of derivatives and their application to manage risk.
- Learn the concepts and application of responsible decision making.

Healthcare Management MBA (MBA-HCM)

Quinlan's MBA in Healthcare Management develops professionals who are effective, responsible leaders with the knowledge, skill, and understanding to successfully manage and lead in any segment of the dynamic healthcare industry.

Whether you are in the hospital or non-hospital sector, we will strengthen your business knowledge, management skills, and leadership capacity to improve the healthcare delivery system.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Completion of the HRER certificate allows you to leverage knowledge and skills to work as a highly effective human resources management professional or as a manager who partners effectively with human resources departments to acquire, develop, and reward talented employees.

Specific skills developed include:

- International human resources.
- Staffing; Compensation/benefits.
- Employment relations.
- Employee development.
- Analytical, team, and communication skills.
- Business ethics and social responsibility.

Marketing (MSM)

Our Master of Science in Marketing (MSM) degree program integrates creativity with analytics and strategy with insight. You'll have the opportunity to accelerate your career in the dynamic fields of 21st century marketing.

Many students with undergraduate degrees in journalism, communications, advertising, and marketing enroll in the MSM program to advance their careers with additional credentials. Others with degrees in finance, economics, medicine, and engineering choose the MSM program as a pathway to career change.

Track Requirements

MSM students choose one of the following three tracks:

- Digital Marketing Analytics (STEM-designated)
- Integrated Marketing Communications
- Supply Chain (STEM-designated)

All three tracks have a 12-course curriculum with one prerequisite course.

Digital Marketing Analytics Track

The STEM-designated Digital Marketing Analytics track is devoted to engaging emerging capabilities built on the foundation of creative, digital, and analytical marketing skill sets.

Combining business goals with marketing decisions, this increasingly critical marketing function leverages consumer, retail, and category trend data to help marketers make informed marketing and business decisions through database models, improved sales forecasting, and data-driven tactics that enhance consumer loyalty, market share, and profitability.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

As a Quinlan MSM student, you will:

- Develop the creative and strategic skills you need to lead and innovate in the diverse, digital, and dynamic field of marketing
- Learn marketing strategies that deliver brand growth and a competitive advantage in a time of sweeping economic, environmental, and social change
- Gain the technical business skills that are essential in today's global economy
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote positive social change
- You will also build a strong foundation in: Marketing finance; Strategic planning; Brand leadership; Digital and social content development; Leadership and ethics; Database analytics; Sustainable business leadership; and Global campaign development.

Next Generation MBA (MBA)

Meet the future of MBA programs.

The Next Generation MBA prepares you to be a data-driven business leader with the ability to think critically and communicate effectively. You'll also build a strong set of values to drive your business decisions and career.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Concentrations (Electives)

You can choose to have a concentration by taking three courses in any one of the twelve disciplines through elective options (four courses needed for accounting). The concentrations available within the Next Generation MBA program are:

Accounting

The MBA with an accounting concentration paves the way for an exciting career in financial management, consulting, or your own business.

The MBA accounting concentration includes fundamental courses in ethics, leadership, and international business. Students may choose to customize their studies by focusing on select accounting concepts, procedures, and applications.

Elective Courses

Choose four of the following elective courses in order to complete the accounting concentration.

Code	Title	Hours
ACCT 404	Financial State Analysis	3
ACCT 424	Managerial Accounting	3
ACCT 432	State, Local and International Tax	3
ACCT 436	Forensic Accounting and Fraud	3
ACCT 437	Advanced Forensic Accounting	3
ACCT 412	Special Topics in Accounting	3
LREB 445	Entrepreneurship Law	3

Business Ethics

The MBA with business ethics concentration emphasizes the importance of having a moral code and behaving ethically in the business environment.

Loyola's business ethics courses are designed to help you meet all challenges head-on. Our practical curriculum based on responsible leadership aims to make you accountable, ethical, and trustworthy. You will learn the business imperative for treating all stakeholders—including customers, employees, and the community—with respect and integrity.

Elective Courses
Choose three of the following elective courses in order to complete the business ethics concentration.

Code	Title	Hours
INFS 795	Ethics and Data Analytics	3
ETHC 441N	Business Ethics	3
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
MGMT 479	Independent Study in Management	3

Derivative Markets

The MBA with a derivative markets concentration prepares you for job opportunities in top financial service companies.

Elective Courses
Choose three of the following elective courses in order to complete the derivative markets concentration.

Code	Title	Hours
FINC 553	Applied Portfolio Management	3
FINC 622 / ECON 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3

Entrepreneurship

The MBA with an entrepreneurship concentration lays the groundwork for your future as a successful business owner. Experts predict that entrepreneurial opportunities will continue to grow in virtually every field of business. A solid knowledge of entrepreneurship principals, laws, and applications will enable you to hit the ground running.

Loyola's entrepreneurship courses provide you with complete hands-on training, often in partnership with local businesses. We offer a global perspective and a practical curriculum that prepares you to exercise sound judgment in recognizing lucrative entrepreneurial opportunities.

Elective Courses
Choose three of the following elective courses in order to complete the entrepreneurship concentration.

Code	Title	Hours
MGMT 472	Leading Change in Organizations	3
MGMT 480	Recognizing Entrepreneurial Opportunities [1]	3
MGMT 481	Entrepreneurship	3
MGMT 482	Entrepreneurial Marketing	3
MGMT 483	Strategic Entrepreneurship and Innovation Management	3
MGMT 485	Social Enterprise	3
LREB 445	Entrepreneurship Law	3

[1] Required

Finance

The MBA with a finance concentration is one of the most popular areas in business studies today. Interest is driven by professional opportunities in business, investment, and finance.

Loyola's MBA with a finance concentration is well known for its practical curriculum, hands-on application, and partnered delivery with established Chicago businesses. In addition to studying relevant trends and current issues, you will employ a global perspective and gain a solid understanding of international and emerging financial systems.

Elective Courses
Choose three of the following elective courses in order to complete the finance concentration.

Code	Title	Hours
FINC 452	Investment Management	3
FINC 453	Topics in Advanced Financial Management	3
FINC 455	International Financial Management	3
FINC 456	Management of Financial Institutions	3
FINC 553	Applied Portfolio Management	3
FINC 556	Investment Banking	3
FINC 599	Special Topics	3
FINC 620	Financial Mathematics and Modeling I	3
FINC 621	Financial Mathematics and Modeling II	3
FINC 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3
FINC 625	Applied Econometrics	3
FINC 628	Valuation	3

Human Resources Management

The MBA with human resources concentration can bolster your ability to manage and motivate a company's most valuable asset—it's employees.

Loyola's professors demonstrate the application of key practices in developing, managing, recruiting, and leading staff. Our strong focus on examining and understanding current issues impacting HR from a global perspective will put you at an advantage in the marketplace.

Elective Courses
Choose three of the following elective courses in order to complete the human resources concentration.

Code	Title	Hours
HRER 413	Compensation	3
HRER 418	Human Resources Law	3
HRER 422	Global HR Management	3
HRER 429	Human Resource Development	3
HRER 430	Leading Change in Organizations	3
HRER 433	Group Process and Facilitation	3
HRER 442	Global Overseas Seminar	3
HRER 453	Incentive Pay and Employee Benefit Programs	3
HRER 462	Employment Relations	3
HRER 463	Staffing	3
HRER 490	Analytical Problem Solving	3
HRER 500	Special Topics in Human Resources and Employment Relations	3
HRER 501	Performance Management	3
HRER 502	Global Employment Relations	3

Information Systems Management

The MBA with an information systems concentration will advance your career in the arena of information technology. Every business relies on IT processes to stay competitive, improve efficiency, and enhance communication. Loyola's practical curriculum helps you develop advanced skills for improving organizational performance

and consequently, profitability, allowing you to naturally progress into leadership or managerial roles.

Elective Courses
Choose three of the following elective courses in order to complete the information systems concentration.

Code	Title	Hours
INFS 443	Business Analytics	3
INFS 485	Business Requirement Analysis	3
INFS 492	Database Systems	3
INFS 493	Database Analytics	3
INFS 494	Applied Data Mining and Artificial Intelligence (AI)	3
INFS 496	Systems Analysis and Design	3
INFS 499	Independent Study	3
INFS 592	Data Visualization	3
INFS 691	Principles of Analytic Programming	3
INFS 791	Programming for Business Decision Making	3
INFS 796	Data Warehousing	3
INFS 797	Applications of Visualization	3
INFS 798	AI Product Management	3
ISSCM 495	Forecasting Methods with Artificial Intelligence (AI)	3

International Business

The MBA with an international business concentration gives you the competitive edge in a distinctly global economy. A growing number of businesses are competing in the international market; advanced knowledge of global practices enhances your opportunities significantly at home and abroad.

Elective Courses
Choose three of the following elective courses in order to complete the international business concentration.

Code	Title	Hours
FINC 455	International Financial Management	3
HRER 422	Global HR Management	3
HRER 502	Global Employment Relations	3
MARK 465	International Marketing	3
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
SCMG 486	Global Logistics	3
Graduate Business Study Abroad		

Management

The MBA with a management concentration will give your career the boost needed to secure leadership, managerial, or executive positions. Our program provides you the advanced knowledge necessary for successful career advancement. A practical curriculum enhanced with a global perspective and strong business ethics foundation affords you a distinct competitive edge.

Elective Courses
Choose three of the following elective courses in order to complete the management concentration.

Code	Title	Hours
MGMT 443	Global Environmental Ethics	3
MGMT 446	International Business Ethics	3
MGMT 472	Leading Change in Organizations	3
MGMT 475	Cross-Cultural Dimensions of International Management & Marketing	3
MGMT 480	Recognizing Entrepreneurial Opportunities	3
MGMT 481	Entrepreneurship	3
MGMT 482	Entrepreneurial Marketing	3
MGMT 483	Strategic Entrepreneurship and Innovation Management	3
MGMT 485	Social Enterprise	3
MGMT 573	Business Strategy	3
MGMT 574	Corporate Strategy	3

Marketing

The MBA with a marketing concentration equips business managers with solid marketing skills to lead and grow brands and companies naturally.

Elective Courses
Choose three of the following elective courses in order to complete the marketing concentration.

Code	Title	Hours
MARK 461	Research Methods in Marketing	3
MARK 463	Sales and Strategic Leadership	3
MARK 464	Integrated Marketing Communication	3
MARK 465	International Marketing	3
MARK 467	Consumer Behavior	3
MARK 468	Digital Marketing	3
MARK 469	Independent Study-Marketing Management	3
MARK 561	Comparative Consumer Behavior	3
MARK 562	Database Marketing Strategy	3
MARK 564	Brand Equity and Marketing Strategy	3
MARK 566	Integrated Media Planning	3
MARK 567	Customer Relationship Management	3
MARK 661	Customer Analytics	3
MARK 662	Marketing Metrics	3

Risk Management

The MBA with a risk management concentration offers you the opportunity to study in Loyola's newest discipline. Calculating and mitigating risk is top of mind for today's senior executives. This concentration focuses on the latest principles and practices for appropriately leveraging business opportunities. We offer you hands-on learning, often in partnership with recognized local businesses, as well as a global perspective on current issues.

Elective Courses
Choose three of the following elective courses (from at least two different disciplines) in order to complete the risk management concentration.

Code	Title	Hours
FINC 622	Derivative Securities	3
FINC 624	Interest Rate Risk Management	3
FINC 628	Valuation	3

Supply Chain Management

The MBA with an supply chain management concentration teaches you advanced strategies to improve business performance and output. Our practical curriculum and hands-on approach contribute to effective and enhanced learning for you.

Elective Courses

Choose three of the following elective courses in order to complete the supply chain management concentration.

Code	Title	Hours
SCMG 481	Performance Improvement in Business Processes	3
SCMG 482	Lean Production Concepts and Practices	3
SCMG 483	Management of Service Operations	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
SCMG 489	Supply Chain Analytics	3
SCMG 589	Supply Chain Management Consulting	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.

Supply Chain Fundamentals Certificate

With markets that move at the speed of ecommerce, global companies must have a high-performing supply chain and logistics system. Learn the fundamentals in our Supply Chain Fundamentals certificate program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Technical Knowledge: Graduates will be proficient in advanced knowledge of supply chain management and methodologies for optimization, transportation, inventory, purchasing management, supply chain analytics, and risk analysis. This comprehensive skill set will enable them to become effective leaders capable of optimizing operations and making informed decisions in a dynamic business environment.
- Critical Decision Making: Graduates will become adept at assessing risks, identifying opportunities for improvement, and devising innovative strategies to enhance supply chain efficiency and overall performance. Equipped with strong critical thinking skills, graduates will be well-prepared to tackle the complexities and uncertainties inherent in supply chain operations, contributing to the success and competitiveness of the organizations they serve.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally and in writing.

School of Continuing and Professional Studies

The School of Continuing & Professional Studies (SCPS) at Loyola offers a diverse range of application-oriented graduate and post-baccalaureate

programs designed to meet emerging labor market demands. Developed in collaboration with industry experts, these programs provide working adult learners with relevant skills and knowledge to advance their careers.

SCPS empowers adult learners through an accessible, impactful, and holistic education, fostering both personal and professional success. With fully online classes and flexible 8-week schedules, programs allow students to balance their studies with their life's other responsibilities. Additionally, the Urban Affairs and Public Policy program area follows a 16-week semester schedule, offering a mix of online and on-campus coursework to accommodate diverse learning preferences. Led by scholars and experienced practitioners, SCPS courses ensure students gain practical, career-ready expertise to thrive in their chosen fields.

Graduate Programs

- Foundations of Instructional Design Certificate (p. 1926)
- Information Technology Leadership and Strategy (MPS) (p. 1927)
- Instructional Design (MPS) (p. 1928)
- Professional Certificate in Instructional Design (p. 1932)
- Public Affairs and Management Certificate (p. 1933)
- Public Policy (MPP) (p. 1934)
- Public Policy/Law (MPP/JD) (p. 2234)
- Public Service Leadership (MA) (p. 1935)
- Urban Affairs (MA) (p. 1936)

Post-Baccalaureate Programs

- Paralegal Studies - Corporate Practice Certificate (p. 1929)
- Paralegal Studies - Customized Certificate (p. 1930)
- Paralegal Studies - Litigation and Corporate Practice Certificate (p. 1930)
- Paralegal Studies - Litigation Practice Certificate (p. 1931)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Instructional Design (INDN)

INDN 420 Instructional Design Theories and Models (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings.
Outcomes:
Differentiate/compare/contrast among learning theories, ID theories and ID models; Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories; Identify/describe motivational theories; Select/apply principles in practical learning situations

INDN 421 Design & Development of Instructional Materials (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course builds upon instructional design theories and best practices introduced in the Principles of Instructional Design course. It provides an overview of a variety of instructional tools and technologies and allows students to implement design principles in the development of instructional materials.
Outcomes:
Recall/describe/apply learning theories and methodologies to design/develop instructional materials; Recognize/describe/apply visual literacy strategies and accessibility standards to create instructional materials; Design/develop/implement instructional materials using multiple media

INDN 430 Performance Improvement in Organizations (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, learners will identify a problem/cause/solution to a performance problem within an organization using the Human Performance Improvement model. Learners will select a learning intervention and create an evaluation plan to assess its effectiveness. Learners will compare/contrast the instructional design process within a variety of organizations.
Outcomes:
Compare/contrast ID teams in organizations; Analyze data to identify performance gaps/causes; Select a performance intervention based on needs analysis; Compose an evaluation plan; Identify Change Management strategies for implementation

INDN 431 Fundamentals of Learning Analytics (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis.
Outcomes:
Explain learning analytics theory; identify recent trends; Use reporting tools to compile/isolate/summarize data; Differentiate between learning models; Align data models to assessments; Conduct predictive data analysis; Discuss ethics considerations

INDN 440 Applications of Human Centered Design Principles (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
Human-centered design places humans and their needs at the center of the design, compels us to take a holistic/thoughtful approach to our designs. This course uses these principles to examine the design process to create learning experiences that are inclusive and responsive. Learners will also craft their own design philosophy.
Outcomes:
Describe principles of human-centered design; Create a space for learning that incorporates principles of human-centered design; Critique the application and use of these principles; Formulate your own philosophy of design

INDN 490 Instructional Design Capstone (3 Credit Hours)
Pre-requisites: CIEP 470 Principles of Instructional Design, last semester of the program, program director approval; Corequisite: 8W1 remaining course requirements must be completed
Students will apply program outcomes to real-world settings in preparation for an ID career. The course combines research and service learning towards the creation of a project, portfolio and professional artifact. Students will partner with a SME to build a module tailored to their course or institution.
Outcomes:
Conduct a needs assessment, compose learning goals/outcomes, and create an evaluation plan by partnering with a subject matter expert; Create a training module incorporating SME content; Develop a professional portfolio

Master of Public Policy (MPP)

MPP 400 Policy Design and Analysis (3 Credit Hours)
Students will learn to analyze issues to determine if there is a role for government intervention, to evaluate public policy options that could address the identified problem, and to design programs that would target the specific issues. The role of political factors in affecting these decisions is also covered.

MPP 401 Analytical Tools in Public Policy (3 Credit Hours)
This class covers diverse modeling tools in public policy, drawing from fields such as economics, geography, demography, spatial analysis, risk analysis. decision theory. The emphasis is on applied analysis to address current public policy issues.

MPP 402 Cost Benefit Analysis (3 Credit Hours)
The course cover the basics of the CBA technique with applications in several policy areas. CBA is grounded in the policy evaluation framework, including discussion of ethical issues and the use of CBA information in policy and program decisions.
Outcomes:
Ability to conduct CBA analysis, understand its use in the policy process, including ethical issues

MPP 403 Public Budget and Finance (3 Credit Hours)
This course provides students with practical knowledge about the budget process and the tools to construct and analyze a public budget. General theories of public finance and the role of the budget as a political document are covered. Assignments will provide practice in the budgeting approaches covered in the readings.

MPP 404 Public Policy Process (3 Credit Hours)
This class provides an introduction to the major theories of the public policy process. We consider issues of problem definition, social construction, agenda setting, the role of government institutions and interest groups in determining policy outcomes.
Outcomes:
Students will understand how political considerations, institutions, and rules of government affect public policy outcomes

MPP 405 Statistical Methods & Analysis for Public Policy I (3 Credit Hours)
This course is an introduction to statistical modeling, and hypothesis testing for applied problems in urban affairs and public policy. This class will provide the foundation for thinking about casual relationships, determining differences among groups, and what might account for those differences.
Outcomes:
Students will learn to conduct basis statistical analysis and write literate data analysis reports

MPP 406 Statistical Methods & Analysis Public Policy II (3 Credit Hours)
Pre-requisites: MPP 405
This class develops the multiple linear regression model and extensions of it that are commonly used in the study of public policy. We investigate the relationships between the type of data available and the quantitative models to use, including logistic analysis and use of simultaneous equations.
Outcomes:
Students will learn to use the tools necessary to understand, critique, and conduct advanced statistics

MPP 407 Local Economic Development (3 Credit Hours)
Students will learn the current theories of local economic development, including the role of infrastructure, access to markets, workforce quality (human capital), technology development, the role of universities, and the value of networks among business actors. Students will use these theories to create a metropolitan benchmarking report and strategic plan.

MPP 408 Political Feasibility Analysis (3 Credit Hours)
Pre-requisites: Graduate Students Only
Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered.
Outcomes:
Ability to craft and implement a comprehensive political strategy to change public policy outcomes; Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies

MPP 409 Education Policy and Politics (3 Credit Hours)
Pre-requisites: Graduate Students Only
This seminar focuses on K-12 policy in the U.S. using a policy analysis framework. We evaluate alternative policy proposals related to different theories of equality and school quality. We examine market-driven, standards-based, human capital, fiscal, and community-based models of reform. The course concludes by examining the political context for reform.
Outcomes:
Develop analytical ability to identify the contemporary problems with education, what causes them, and what policy reforms could be used to address those problems

MPP 410 Special Topics in Public Policy (3 Credit Hours)
This seminar course will cover specialized topics in public policy in greater detail.
Outcomes:
Students will learn about current issues related to the topic, relevant theoretical approaches, and application of theories to the specific issue in order to develop policy solutions

MPP 411 Environmental Governance (3 Credit Hours)
Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

MPP 412 Urban Politics and Policy (3 Credit Hours)
The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.
Outcomes:
Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities

MPP 413 Intergovernmental Relations (3 Credit Hours)
This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not. Department consent required.
Outcomes:
Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments

MPP 414 Affordable Housing Finance and Policy (3 Credit Hours)
This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing. Department Consent Required.
Outcomes:
Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies

MPP 461 Education Law & Policy (3 Credit Hours)
This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law - such as school finance, governance, the balance between federal and state roles in curriculum. Department consent required for enrollment.
Course equivalencies: MPP 461/LAW 461
Outcomes:
Students will be able to: understand fundamental legal doctrines governing US education law, research legal and political issues in education policy; analyze education problems and develop policy options

MPP 499 Directed Readings (3 Credit Hours)
An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

MPP 500 Public Policy Evaluation (3 Credit Hours)
Pre-requisites: PLSC 476 or SOCL 414
This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research - including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

MPP 501 Public Policy Internship (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers. Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

MPP 502 Professional Development Skills (1 Credit Hour)
Requirement for MPP graduate students. The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

MPP 503 Public Policy Practicum (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests.
Outcomes:
Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment

MPP 606 Childlaw Legislation and Policy Clinic (3 Credit Hours)
Permission of instructor is required prior to registration. Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.
Outcomes:
Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally

Public Service Leadership (PSLD)

PSLD 400 Introduction to Public Service (3 Credit Hours)
Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making, and leadership; stresses critical thinking skills. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of ethics, values, and skills for organizational leadership in human service and public service agencies; Knowledge of theory, organizational functions and structures, leadership styles, and value-driven leadership

PSLD 402 Foundations of Global Strategic Communication (3 Credit Hours)
Globalization challenges almost every aspect of communication from creating and delivering messages to spreading ideas that cross language, time, and cultural barriers. The course focuses on using strategies communication planning and management to guide communication activities in organizations. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of critical communication skills and values; Understand the interplay between communication, technology, and culture

PSLD 403 Program Management and Development (3 Credit Hours)
There is an increasing demand for public service workers who can work with diverse communities through program management and development using strengths and empowerment perspectives and social and economic justice principles. This course builds on the ecological systems perspective that views program development as an arena for social change. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge and skills needed for planning new or adapting existing programs within the context of diverse communities; Develop skill set for program development and quality improvement

PSLD 404 Data, Visualization and Evaluation (3 Credit Hours)
Using Microsoft Excel, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Hands-on knowledge and experience managing and analyzing data sets; Best practices for presenting data to diverse stakeholders

PSLD 405 Design Thinking in Mitigating Complex Social Problems (3 Credit Hours)
Design thinking is a way of working with user-centered innovation to address problems where not all knowledge is available at the outset, i.e. the problem itself is unknown (wicked problems). Design thinking rests on principles such as user involvement, problem framing, experimentation, visualization, and diversity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Develop critical skills for management and innovation; Develop creative potential of individuals and enable them to deal with wicked problems

PSLD 420 Disaster Operations and Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Introduction to emergency management theories and practices that are critical in the emergency management profession. Covers the phases of emergency management, human and political aspects, the importance of effective resource management, environmental concerns, and the threats and hazard identification and risk assessment process that is important to emergency management organizations. Introduces participants to issues related to managing personnel, including volunteers, workforce diversity, decision-making, leadership, and stresses critical thinking skills.
Outcomes:
Knowledge of theory, organizational functions and structures, phases of emergency management, resource management, ethics, politics, and threats and hazards; Develops ability to solve complex problems and engaged with a wide variety of organizations that support emergency management

PSLD 422 Disasters and Vulnerable Populations (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Disasters create lasting impacts for communities large and small. This course introduces students to emergency management concepts that ensure the needs are being met for citizens with access and functional needs, those living in areas with high social vulnerability, and other vulnerable populations throughout the community. Teaches students to include vulnerable populations in all phases of emergency management and provides students with the opportunity to learn critical communication and problem-solving skills.
Outcomes:
Understand the make-up of the community being served, ensure plans, processes, and disaster response includes vulnerable populations within the community; Knowledge of tools and resources available to assist in preparedness activities to ensure they involve the community in its entirety

PSLD 423 Integrated Social-Medical Issues in Emergency Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA) Outcomes: Identify social and medical issues in EM practices; Apply the concepts of EM within a social-medical context; Describe EM social and medical organizations and structures and their relation to public service; Apply concepts of leadership to public service, EM, and other sectors
This course builds on existing leadership and public service knowledge with the application of emergency management principles under the shared perspectives of social-medical outlooks. It analyzes current trends and issues within emergency management through a social-medical paradigm and their impact on the public service models and leadership outcomes, including leadership challenges, ineffective communication and processes, and emergency response software, and their impact on medical and social infrastructure,

PSLD 430 Understanding and Mitigating Poverty (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course examines the nature, extent, and causes of poverty and inequality in the US while relying on literature from sociology, political science, economics, psychology and other disciplines. It analyzes the anti-poverty initiatives and policies launched over the past five decades and examines the role of culture, discrimination and classism as well as policy issues.
Outcomes:
Understand key issues regarding causes and consequences of poverty; Describe approaches to understanding and providing solutions to poverty; Explore the dynamics of commitment to social change and anti-poverty initiatives through grantmaking

PSLD 431 Foundations of Social and Sustainable Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Addresses global design for economic and social development via the UN adoption of Sustainable Development Goals and targets. Examines policies and programs that aim to achieve inclusive, people-centered and sustainable development. Covers the basics of narrative policy analysis, measures and outcomes. Explores environmental, social, and economic concerns and their impact at local, national and global levels.
Outcomes:
Identify challenges in social and sustainable development especially in transition to renewable resource use in specific populations; Assess the complex overlap of current science, economics, and geopolitics underlying the overuse of resources, impact on population, and considerations of economic growth

PSLD 432 Gender Diversity & Sustainable Social Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course uses the UNWomen's approach to gender diversity and sustainable development to encompass the issues that hinder and those that contribute to the progress of women and gender diversity within sustainable development. The course reviews the environmental, social, and economic relevance and impact on gender. The specific topics will include, the intersectionality of gender and sustainability in the context of agriculture, forestry, water, health, investment and corporate social responsibility and each topic will highlight a specific region or nation. The course will provide an overview of the underlying intersectionalities of class, age, region within Asia, Latin America, and Africa.
Outcomes:
Describe sustainability and the significance of its interaction with gender; Critically review the history of global development agenda from a gendered perspective; Utilize interdisciplinary frameworks of gender inequity and sustainability; Assess variations in women's contributions to social development - historically, culturally, and politically; and Analyze women and gender within issues of Agriculture, Forestry, Water, Health and Investment in sustainable development

PSLD 433 Social Analysis Inequality Poverty and Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course will introduce students to some of these key concepts and debates to enable critical evaluation of how well sociological understandings of development inform the social analysis of exclusion, poverty and inequality, as well as what implications this might have for development policy especially when focusing on underserved communities.
Outcomes:
Describe the key concepts and debates surrounding poverty and inequality; Evaluate sociological understanding that inform the social analysis of exclusion; and Assess implications for policy regarding underserved communities

Foundations of Instructional Design Certificate

The Foundations of Instructional Design (FIND) graduate professional certificate provides foundational knowledge and skills in instructional design for educational and organizational professionals seeking to enhance their current positions. This includes K-12 teachers and higher education faculty as well as organizational trainers. The certificate program is grounded in SCPS's well-established Master of Professional Studies (MPS) in Instructional Design program, which prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

Related Programs

Master's

- Instructional Design (MPS) (p. 1928)

Certificate

- Professional Certificate in Instructional Design (p. 1932)

Curriculum

The 12-credit hour certificate includes courses offered in 8-week sessions in a fully online format with evening synchronous meetings. Upon completing the certificate, students can apply for admission into the MPS in Instructional Design program, where their four graduate-level FIND certificate courses will count toward that graduate degree's requirements.

Certificate Requirements

Code	Title	Hours
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
INDN 421	Design & Development of Instructional Materials	3
INDN 430	Performance Improvement in Organizations	3
or INDN 431	Fundamentals of Learning Analytics	
Total Hours		**12**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the

start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
	Hours	**6**
Spring		
INDN 421	Design & Development of Instructional Materials	3
INDN 430 or INDN 431	Performance Improvement in Organizations or Fundamentals of Learning Analytics	3
	Hours	**6**
	Total Hours	**12**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc.). while designing and creating effective and innovative learning experiences.
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.

Information Technology Leadership and Strategy (MPS)

This fully online and application-oriented master's degree will provide students with a professional background in Information Technology (IT) and technology related professions, including cybersecurity, software engineering, tech support, etc. to gain the leadership, strategic thinking, and critical thinking skills necessary for advancing in their career IT leadership tracks within small, midsize, and large organizations, with an emphasis on eventually reaching executive positions in the IT field.

Related Programs

Master's

- Information Technology (MS) (p. 1587)

Curriculum

Thirty (30) credit hours are required to complete the degree.

Code	Title	Hours
Required Courses		
COMP 417	Social and Ethical Issues in Computing	3
COMP 477	IT Project Management	3
ITLS 445	Introduction to IT: Networking, Cloud & Security	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies.
- Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework.
- Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success.
- Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies.

Instructional Design (MPS)

For educational enterprises as well as corporations, the need for those who can design effective and innovative learning experiences has never been greater, especially as online education and training becomes more prevalent in contemporary society.

A fully online and application-oriented degree, the Master of Professional Studies (MPS) in Instructional Design at Loyola University Chicago's School of Continuing and Professional Studies (SCPS) prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

The program offers students a sturdy foundation in instructional design as well as the tools and perspectives needed for flexible career paths and continuing professional development in the field. Rather than a focus on a narrower area of specialization within the field, our Instructional Design program provides a breadth of foundational knowledge and skills in different areas. As a result, you will be well positioned to work with technical specialists and subject matter experts and prepared to develop more specialized interests as you advance in your career.

Students who have earned their Foundations of Instructional Design Certificate (p. 1926) or Professional Certificate in Instructional Design (p. 1932) at SCPS can get a jumpstart on their MPS in Instructional Design, too, as both certificates can be applied toward degree requirements.

Related Programs

Certificate

- Foundations of Instructional Design Certificate (p. 1926)
- Professional Certificate in Instructional Design (p. 1932)

Curriculum

The MPS in Instructional Design comprises 30 credit hours. Courses are offered in an 8-week session format with online, evening options.

Program Courses

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.
- Conduct research and predictive data set analysis to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices and performance gaps in an organization.

Paralegal Studies - Corporate Practice Certificate

The Corporate Practice Certificate is designed to prepare students to work in areas of law that are important in the transaction of business, such as corporate maintenance, due diligence, contracts, commercial transactions, and regulatory compliance.

Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Suggested Sequence of Courses

The Institute for Paralegal Studies provides a high-touch advising model in order to accommodate the professional experience and educational goals of each individual student. In order to provide students with maximum flexibility in their education, the Director will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and career goals.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate:

- Prepare summaries of court decisions, statutes, and administrative regulations.
- Develop legal arguments using court decisions, statutes, and administrative regulations.
- Locate relevant legal sources from federal and state jurisdictions.
- Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
- Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
- Assist attorneys who work for corporate clients document the organization and operation of business entities.
- Retrieve information to conduct due diligence procedures for commercial and real estate transactions.
- Draft contract provisions and coordinate the administrative process for contracts.
- Help clients in regulated industries demonstrate compliance with government regulations.

Paralegal Studies - Customized Certificate

Students who wish to earn a customized certificate[1] may complete a specialized curriculum. This curriculum must be approved by the Director and will include courses in legal research, legal ethics, and technology skills.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Professional Certificate in Instructional Design

The Professional Certificate in Instructional Design (PIND) graduate professional certificate provides a strong foundation in instructional design as well as the tools and perspective needed for flexible career paths and continuing professional development in the fast-evolving field. It prepares students to become generalist instructional designers equipped to work in a variety of industries and professional settings, including education and business environments.

Rather than focusing on a narrower area of specialization within the field, such as learning technologies, PIND delivers a breadth of foundational knowledge and skills in different areas. It prepares instructional designers to work with technical specialists as well as subject matter experts and also empowers them to develop more specialized interests as they grow in their profession.

Public Affairs and Management Certificate

As a working professional, you may have a degree in your field but now realize you need additional skills to advance into an administrative or managerial position. The certificate program in public affairs and management can give you that background in only one year of work. The program helps you to develop a set of core skills needed in government or nonprofit work, while providing some tailoring for your particular career needs.

Courses are offered in a mix of online and in-person formats. All in-person classes are taught at Loyola University's Water Tower Campus in the later afternoon or evening. Classes meet once a week for 2 and 1/2 hours for a 15-week semester.

Related Programs

Master's

- Public Policy (MPP) (p. 1934)
- Urban Affairs (MA) (p. 1936)

Combined

- Public Policy/Law (MPP/JD) (p. 2234)

Curriculum

To complete the Public Affairs and Management certificate, you will take 4 three-credit courses for a total of 12 credit hours. These requirements could be fulfilled in one year at full-time status of two classes per semester or two years at part-time status of one class per semester.

All courses are divided into two categories, as seen below. Students take at least one course from each category. This guarantees exposure to perspectives to understand the environment in which you work (political/organizational category) and exposure to new technical skills (skills category).

You will determine your course selection in consultation with an advisor from the MUAPP faculty to reflect your needs based on career stage and goals. Earlier career individuals may want to acquire more skills; mid-career individuals may focus more on the political and managerial environment.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Develop additional technical skills in public policy and data analysis appropriate for the individual's career advancement. These could include: budgeting and finance, policy analysis and design, program evaluation, GIS, project management, or scenario planning.
- Understand the political factors that impact the environment of government agencies and nonprofit organizations.
- Identify relevant actors, their motivations, sources of power, and processes that lead to policy outcomes through the lens of various management theories.

Public Policy (MPP)

Job growth, affordable housing, educational reform, environmental degradation—these are just a few of the significant challenges that face society today. The public policy program at Loyola can help students transform their interest in these types of problems into the ability to analyze and act upon them. The curriculum brings together knowledge about current government programs with the technical skills to assess how politics influence policy choices, how to design more effective programs, and how to evaluate the impacts of existing ones.

The Master of Public Policy (MPP) program at Loyola is a two-year professional degree focused on training students to assume leadership roles in government, non-profit organizations, or businesses. Part-time students typically finish in three years. Internships or capstone projects allow students to apply the skills developed in the program and gain work-related experience.

Related Programs

Master's

- Public Service Leadership (MA) (p. 1935)
- Urban Affairs (MA) (p. 1936)

Combined

- Public Policy/Law (MPP/JD) (p. 2234)

Curriculum

The MPP degree program requires 37 credit-hours of coursework—11 three-credit courses, plus a three-credit internship or capstone experience, and a one-credit professional development course.

Required Coursework

Code	Title	Hours
Core Requirements		
MPP 400	Policy Design and Analysis	3
MPP 401	Analytical Tools in Public Policy	3
MPP 403	Public Budget and Finance	3

Electives (p. 1935)		
Select four from list of Electives		12
Total Hours		**37**

Electives

Students are required to take 12 hours of electives. Electives can be drawn from many departments across the university, including criminal justice, education, environmental studies, political science, public health, psychology, sociology and social work. These electives are where students can focus on their preferred field of policy. The following are some examples of optional courses:

Code	Title	Hours
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 412	Water Law & Policy	3
Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3
Criminal Justice		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
Economic and Community Development		
MPP 407	Local Economic Development	3
MPP 414	Affordable Housing Finance and Policy	3
Education		
ELPS 405	Introduction to Educational Policy Analysis	3
ELPS 412	Urban Education Policy	3
Immigration		
SOWK 730	Immigration Dynamics and U.S. Social Policy	3
SOWK 732	Migration, Social Justice, and Human Rights	3

Internship or Capstone Experience

For students without significant professional work experience prior to starting the program, an internship is required. Most students complete their internships in the summer between their first and second years. For students with professional work experience, a capstone project or policy clinic resulting in a major analytical report could be done instead.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MPP program, graduates will be able to:

- Design policy interventions and apply criteria to assess the best option in each specific case
- Understand a government budget and evaluate it from different stakeholder positions
- Understand the political process at the federal, state and local government levels
- Develop political messaging to advocate for policies and to build a political coalition of support for a program
- Apply appropriate statistical procedures used in public policy research and practice
- Design, conduct and critique program evaluations
- Experience working in the public policy arena in government agency, non-profit, research, or private sector organization

Public Service Leadership (MA)

Addressing some of today's most complex and layered societal issues requires a deeper skill set and a more thorough knowledge base to drive decision-making and execute thoughtful plans. The Master of Arts in Public Service Leadership (MAPSL) at Loyola University Chicago's School of Continuing and Professional Studies (SCPS) prepares students to be justice-sensitive leaders and agents of change in their communities. This forward-leaning degree program equips graduates with the competence, capability, and ethical grounding to push communities forward in enduring ways.

The MAPSL program broadens the concept of public service, with a specific emphasis on leadership within governmental, non-profit, and human service organizations. Through assignments, exercises, and engaging discussions with fellow students and expert faculty, you will reflect critically on your "reason for being" and discern your unique gifts to put into service for others. This introspection, paired with practical

skill-building, helps students achieve their personal and professional goals while addressing critical societal needs.

The program is problem- and solution-focused, emphasizing leadership roles across overlapping health and social sectors. It offers students adaptable values and skills suited to a wide variety of organizations, including public-private partnerships. By navigating the challenges of the modern world, students emerge as thoughtful, justice-oriented leaders prepared to tackle societal challenges.

Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon your successful completion of the MA in Public Service Leadership program, you will have proven your ability to:

- Describe components and levels of leadership across public sectors
- Apply ethical reasoning to administrative design and decision-making in the current realm of public service leadership
- Analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
- Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
- Collect and apply data in problem identification and problem solving
- Differentiate between non-crisis leadership and leadership in emergencies among public, social and economic sectors
- Apply fundamentals of communication appropriate to situation in both local and global situations.

Urban Affairs (MA)

The Master of Arts (MA) in Urban Affairs is an interdisciplinary degree program focusing on how cities work and the challenges they face, such as economic growth or decline, globalization and immigration, and the impact of the housing market on neighborhood stability. The curriculum brings together viewpoints and analytical tools from multiple fields to provide different perspectives on the causes of urban problems and their possible solutions.

The Urban Affairs program at Loyola is a professional degree focused on training students to assume technical or leadership roles in government, nonprofit organizations, or business. Students develop skills in coursework and gain work-related experience through internships or capstone policy clinics.

Related Programs

Master's

- Public Policy (MPP) (p. 1934)

Certificate

- Public Affairs and Management Certificate (p. 1933)

Combined

- Public Policy/Law (MPP/JD) (p. 2234)

Curriculum

The MA in Urban Affairs requires 31 hours of coursework—10 three-credit courses, plus a one-credit Professional Development course where students attend a series of meetings covering critical professional skills such as resume and cover letter writing, informational interviews, self-assessments, and networking. Students also complete a required 3 credit hour internship or capstone policy clinic. Students can complete the program in 18-24 months.

Code	Title	Hours

Select two from list of Electives		6
	Hours	**12**
	Total Hours	**31**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 2300) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master's degree, graduates will be able to:

- Draw on a variety of disciplinary perspectives, such as politics, economics, sociology, and history, to understand the complexity of urban issues.
- Identify sources of urban power and their impact on city conditions, on potential systematic biases, and how likely these biases could be overcome.
- Analyze a city budget and evaluate it from different stakeholder positions.
- Analyze urban issues using multiple technical approaches: statistical techniques; fiscal analysis; needs assessments, community impact studies, and program evaluations.
- Experience working in the public policy arena in a government agency, non-profit, research, or private sector organization.

School of Education

Mission and Vision

Our Vision

At the School of Education of Loyola University Chicago, future education leaders will have a transformational experience, one that prepares them to address social inequalities in both their local and global communities through the power of education and research.

Our Mission

The School of Education at Loyola University Chicago, a Jesuit Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance equity in education in service of social justice, engaged with Chicago, the nation, and the world. In pursuit of our vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice.

Our mission is social justice, but our responsibility is social action through education and research. We fulfill our responsibility by preparing professionals to serve as teachers, administrators, counselors, psychologists, and policymakers who work across the human developmental continuum, and by conducting research on issues of professional practice in schools, families, and communities. In our immersive learning environment, students gain both second-to-none foundational knowledge and a strategic system-wide vision working alongside some of the top scholars and teachers in the nation. Through our rigorous curriculum, students learn to be comfortable with the uncomfortable, supported by our passionate and dedicated faculty, staff, and administrators. And they leave with lasting relationships with each other and an extensive alumni network of leaders in education across Illinois, the U.S., and the world.

Counseling Psychology (CPSY)

CPSY 400 Research Fundamentals: Family Studies (3 Credit Hours)
No course description is available

CPSY 406 Professional, Ethical, Legal Issues: Family & School (3 Credit Hours)
No course description is available

CPSY 407 Professional Field Experience: Family Studies (0 Credit Hours)
No course description is available

CPSY 417 Intro to Family Studies (3 Credit Hours)
No course description is available

CPSY 418 Theories of Family (3 Credit Hours)
No course description is available

CPSY 419 Family Communications (3 Credit Hours)
No course description is available

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 422 Group Dynamics: Theory/Practice (3 Credit Hours)
No course description is available

CPSY 423 Theory Counseling & Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development & Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
